Penn City-National Oil Co., doing business as Russian American Import Co., Philadelphia, Pa. Baku Genuine Russian Mineral Oil. For Russian Mineral Oil. 41,823; Mar. 7.
Royal Estates Tea Co., Jersey City, and Hoboken, N. J. Royal Estate Tea (Blue Label). For Tea. 41,824; Mar. 7.
Russian American Import Co. (See Penn City-National Oil Co.)
Scheyer-Loveless Service, New York, N. Y. Gold Kup Coffee. For Coffee. 41,825; Mar. 7.
Schreiber Products Corporation, Buffalo, N. Y. Schreiber's Manru Barley Malt Syrup. For Barley Malt Syrup. 41,826; Mar. 7.
Servisette. (See Alsen, Fred A.)
Tolfree, Edward R., doing business as "X" Laboratories, New York, N. Y. "X" Odorless Dry Cleaner. For Dry Cleaning Composition. 41,827; Mar. 7.
Tolfree, Edward R., doing business as "X" Laboratories, New York, N. Y. "X" Penetrating Lubricant. For Lubricants. 41,828; Mar. 7.
Trent Laboratories, Cleveland, Ohio. Double Purpose Dentrifice. For Dentrifice. 41,829; Mar. 7.
Union Oil Company of California, Los Angeles, Calif. Union Metal-Tone. For Liquid for Cleaning and Polishing Copper, Bronze, Brass, Zinc, Pewter, Nickel, Etc. 41,830; Mar. 7.
"X" Laboratories. (See Tolfree, Edward R.)

LIST OF REGISTRANTS OF PRINTS

Arden, Elisabeth, of New York, Ltd., doing business as Elisabeth Arden, New York, N. Y. Sometime Soon . . . Face these Facts. For Cleansing Cream, Skin Tonic, Skin Cream, Anti-Brown Spot Ointment, Orange Skin Feed, Etc. 14,066; Mar. 7.
Evening News Company, The, Baltimore, Md. Uncle Jack's Club Scrap Book. For Scrap Books. 14,067; Mar. 7.
Squibb, E. R., & Sons, New York, N. Y. Skippy. For Milk of Magnesia, Milk of Magnesia Wafers, and Sodium Bicarbonate. 14,068; Mar. 7.

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Cotton batting. Stearns & Foster Company. 301,688; Mar. 7.
Pitch for roofing, waterproofing, etc. Barrett Manufacturing Company. 89,980; renewed Jan. 28, 1933.
Skins, Calf, kid and goat. Burk Brothers. 92,630; renewed July 22, 1933.

CLASS 2

Cases for razors and razor parts. Kampfe Bros. 40,777; renewed July 14, 1933.
Cellars, Pepper and salt. Imperial Metal Manufacturing Corporation. 301,621; Mar. 7; Serial No. 331,900; published Dec. 27, 1932.
Containers. Shep-Roid Corporation. 301,622; Mar. 7; Serial No. 332,048; published Dec. 27, 1932.

CLASS 3

Metal ornaments, monograms, and initials for harness. S. M. Riker. 90,379; renewed Feb. 18, 1933.

CLASS 4

Abrasive, Sand-blast. Pangborn Corporation. 301,538; Mar. 7; Serial No. 329,901; published Dec. 27, 1932.
Ammonia cleaning compound, Liquid. Charles Cooper & Company. 301,589; Mar. 7; Serial No. 329,704; published Dec. 20, 1932.
Chemical compounds, Soluble. Cowles Detergent Company. 301,535; Mar. 7; Serial No. 330,651; published Dec. 27, 1932.
Cleaner for automobiles, furniture, woodwork, etc. A. C. Liverpool. 301,537; Mar. 7; Serial No. 330,174; published Dec. 27, 1932.
Cleaner, shaving soap, shoe polish, etc., Liquid dry. Kresge Department Store Corp. 301,533; Mar. 7; Serial No. 330,791; published Dec. 27, 1932.
Cleaning compound. J. B. Ford Company. 301,519; Mar. 7; Serial No. 331,637; published Dec. 27, 1932.
Cleaning compounds for white shoes. C. B. Williams. 301,522; Mar. 7; Serial No. 331,393; published Dec. 20, 1932.
Cleaning fluid, Dry. C. J. McCartney. 301,542; Mar. 7; Serial No. 328,843; published Dec. 27, 1932.
Cleaning preparation. E. Richardson. 301,543; Mar. 7; Serial No. 329,202; published Dec. 20, 1932.
Cleanser, Hand. F. H. Parker. 301,523; Mar. 7; Serial No. 331,342; published Dec. 20, 1932.
Compound for polishing and cleaning. E. W. Bennett & Company. 92,392; renewed July 8, 1933.
Detergents. American Disinfecting Company. 301,520; Mar. 7; Serial No. 331,634; published Dec. 20, 1932.
Dressing, leather dressing, shoe polish, Automobile top. Raynorshyne Products, Inc. 301,541; Mar. 7; Serial No. 329,153; published Dec. 20, 1932.
Grindstones, razor-strops, and razor hones. Morley Brothers. 90,460; renewed Feb. 25, 1933.
Polishes, dressings and cleaning preparations. Manhattan Kreole Products, Inc. 301,524; Mar. 7; Serial No. 331,379; published Dec. 27, 1932.
Shaving cream. J. B. Williams Company. 301,530; Mar. 7; Serial No. 331,131; published Dec. 27, 1932.
Soap. F. Baker. 301,526; Mar. 7; Serial No. 331,277; published Dec. 27, 1932.
Soap. Silica Products Corporation. 301,521; Mar. 7; Serial No. 331,626; published Dec. 27, 1932.
Soap and shaving cream. D. M. Bell. 301,516; Mar. 7; Serial No. 331,847; published Dec. 27, 1932.
Soap, Perfumed. H. Bronnley & Co. 91,315; renewed Apr. 29, 1933.
Soaps, scouring powders, detergents, etc. R. Sabor. 301,611; Mar. 7; Serial No. 326,161; published Dec. 20, 1932.
Strops, Razor. H. S. Guio. 301,610; Mar. 7; Serial No. 328,168; published Dec. 20, 1932.

CLASS 5

Sising, gums, and pastes, Adhesive. W. E. Kriel. 92,234; renewed June 24, 1933.

CLASS 6

Antacid and indigestion preparation. R. F. Downs. 301,505; Mar. 7; Serial No. 329,273; published Dec. 20, 1932.
Anti-freeze solution. Firestone Tire & Rubber Company. 301,608; Mar. 7; Serial No. 331,179; published Dec. 20, 1932.
Antiseptic compounds. Mu-Col Company. 40,479; renewed June 2, 1933.
Antiseptic preparations. Cavendish Chemical Corporation. 301,487; Mar. 7; Serial No. 330,418; published Dec. 20, 1932.
Antiseptic, Vaginal. Walker, Corp & Co. 301,486; Mar. 7; Serial No. 330,641; published Dec. 20, 1932.
Bleaching and washing solution. Garber-Eagle Oil Corp. 301,532; Mar. 7; Serial No. 330,949; published Dec. 20, 1932.
Calomel, thyroid, calcium, etc. Abbott Laboratories. 301,662; Mar. 7; Serial No. 326,929; published Dec. 20, 1932.
Chemical compound. Bevilite Company Ltd. 301,475; Mar. 7; Serial No. 331,098; published Dec. 20, 1932.
Chemical reagents. Urbana Laboratories. 301,663; Mar. 7; Serial No. 326,444; published Dec. 20, 1932.
Cosmetics. Mata-Hara, Incorporated. 301,492; Mar. 7; Serial No. 329,971; published Dec. 20, 1932.
Cosmetics. Richel Company. 301,479; Mar. 7; Serial No. 330,835; published Dec. 20, 1932.
Cosmetics and toilet preparations. S. Hagler. 301,504; Mar. 7; Serial No. 329,377; published Dec. 6, 1932.
Cream and powder, Face. Amorskin Corporation. 301,557; Mar. 7; Serial No. 301,085; published Mar. 15, 1932.
Cream, Hair beautifying. Morton Manufacturing Corporation. 301,546; Mar. 7; Serial No. 328,956; published Dec. 20, 1932.
Cream, massage cream, skin tonic, etc., Cleansing. Antoine de Paris, Inc. 301,503; Mar. 7; Serial No. 329,617; published Dec. 6, 1932.
Creams and facial creams, Cold. Terminal Barber Shops, Inc. 301,667; Mar. 7; Serial No. 325,488; published Dec. 6, 1932.
Dentifrices and mouth washes. C. P. Shoudy. 301,554; Mar. 7; Serial No. 312,202; published May 5, 1931.
Disinfectant, antiseptic, and deodorant. Ammonol Chemical Company. 301,517; Mar. 7; Serial No. 331,717; published Dec. 20, 1932.
Disinfectants. West Disinfecting Co. 40,795; renewed July 21, 1933.
Dye-soap, Liquid. A. C. Horn Company. 301,528; Mar. 7; Serial No. 331,182; published Dec. 6, 1932.
Effervescent preparations, Palatable. S. Heller. 301,478; Mar. 7; Serial No. 330,849; published Dec. 20, 1932.
Facial preparation. M. Pike. 301,501; Mar. 7; Serial No. 330,000; published Dec. 6, 1932.
Fish parasiticidal preparation and water plants nutritive salt. Nicholas Wapler Company. 301,639; Mar. 7; Serial No. 330,581; published Dec. 6, 1932.
Insecticides. Capital Chemical Drug Company. 301,491; Mar. 7; Serial No. 330,290; published Dec. 20, 1932.
Iodine compound. Winthrop Chemical Company. 301,636; Mar. 7; Serial No. 330,804; published Dec. 6, 1932.
Medicinal powder preparation. Hart Drug Corporation. 301,531; Mar. 7; Serial No. 331,107; published Dec. 20, 1932.
Medicinal preparation. V. L. Appleton. 301,477; Mar. 7; Serial No. 330,882; published Dec. 20, 1932.
Medicinal preparation. C. A. Lermann. 301,499; Mar. 7; Serial No. 330,406; published Dec. 6, 1932.
Medicinal preparation. R. G. Reaves. 301,488; Mar. 7; Serial No. 330,411; published Dec. 20, 1932.
Medicinal preparation. Smith, Kline & French Laboratories. 301,527; Mar. 7; Serial No. 331,268; published Dec. 20, 1932.
Medicinal preparations. J. A. Streker. 301,476; Mar. 7; Serial No. 330,938; published Dec. 20, 1932.
Medicinal tablets. New Life Medicine Co. 301,507; Mar. 7; Serial No. 327,887; published Dec. 20, 1932.
Medicine. W. B. Cronin. 301,474; Mar. 7; Serial No. 331,102; published Dec. 20, 1932.
Medicine. M. A. Herradora. 301,529; Mar. 7; Serial No. 331,180; published Dec. 20, 1932.
Medicines, Internal. Societe des Marques Robin, Societe a Responsabilite Limitee. 301,637; Mar. 7; Serial No. 330,870; published Dec. 6, 1932.
Milk sugar U. S. P., coal tar disinfectant, extract witch hazel, etc. Chas. L. Huisking & Co. 301,660; Mar. 7; Serial No. 329,288; published Dec. 20, 1932.
Moth repellant. Odora Company. 301,518; Mar. 7; Serial No. 331,693; published Dec. 20, 1932.
Oils for use in bleaching, cleaning, and dyeing. W. L. Volgt. 90,266; renewed Feb. 11, 1933.
Ointment. J. Chiarello. 301,634; Mar. 7; Serial No. 330,919; published Dec. 6, 1932.
Perfume. Maxine Products Company. 301,628–32; Mar. 7; Serial Nos. 330,959–63; published Dec. 6, 1932.
Perfumes. Saks & Company. 301,607; Mar. 7; Serial No. 331,229; published Dec. 20, 1932.
Perfumes and face powder. Coty, Inc. 301,605; Mar. 7; Serial No. 331,247; published Dec. 20, 1932.
Perfumes and perfumery. Elizabeth Arden, Inc. 301,606; Mar. 7; Serial No 331,239; published Dec. 20, 1932.
Perfumes, toilet water, face powder, etc. Les Parfums de Molyneux (Societe a Responsabilite Limitee). 301,506; Mar. 7; Serial No. 329,146; published Dec. 20, 1932.
Pharmaceutical products. Naamlooze Vennootschap Chemisch-Pharmaceutische Fabriek "Menoline" (Menoline Drug Company). 301,500; Mar. 7; Serial No. 330,206; published Dec. 20, 1932.
Pills. Davis & Lawrence Co. 301,636; Mar. 7; Serial No. 330,922; published Dec. 6, 1932.
Powder and a special liquid germicide, Hygienic. Southwest Laboratories, Inc. 301,626; Mar. 7; Serial No. 331,067; published Dec. 6, 1932.

Preparation for relief of boils. J. R. Ivey. 301,609; Mar. 7; Serial No. 331,153; published Dec. 20, 1932.
Preparation for skin diseases. D. Rosenberg. 301,547; Mar. 7; Serial No. 322,601; published Dec. 20, 1932.
Preparation for the hair. E. Motley. 301,635; Mar. 7; Serial No. 330,929; published Dec. 6, 1932.
Preparation for the treatment of indigestion. Capsuloids (1909) Limited. 301,502; Mar. 7; Serial No. 329,736; published Dec. 6, 1932.
Preparation for treating epilepsy, and mild cases of insanity. B. Naar. 301,525; Mar. 7; Serial No. 331,314; published Dec. 20, 1932.
Preparation of a tonic for anemia. T. Rosa. 301,490; Mar. 7; Serial No. 330,382; published Dec. 20, 1932.
Preparation recommended for athlete's foot and other fungi infections. N. S. Herbert. 301,534; Mar. 7; Serial No. 330,734; published Dec. 20, 1932.
Preparation to prevent runs in hosiery and lingerie. M. Shapiro. 301,627; Mar. 7; Serial No. 331,011; published Dec. 6, 1932.
Preparation used in the treatment of rheumatism and gouty conditions. T. Levine. 301,604; Mar. 7; Serial No. 331,261; published Dec. 20, 1932.
Purgament and preparation for treating obesity. Brady & Schmidgall. 301,536; Mar. 7; Serial No. 330,195; published Dec. 20, 1932.
Remedy for diseases of the liver and stomach. E. E. Sutherland Medicine Co. 92,597; renewed July 15, 1933.
Resin, Synthetic. Beck, Koller & Company. 301,493; Mar. 7; Serial No. 329,928; published Dec. 20, 1932.
Rouge, perfumery, and toilet waters. Amorskin Corporation. 301,545; Mar. 7; Serial No. 324,027; published Mar. 29, 1932.
Solvent, Ink. J. H. Taxon, Jr. 301,661; Mar. 7; Serial No. 329,226; published Dec. 6, 1932.
Stimulant and diuretic, Cardiac. R. McNeil. 301,664; Mar. 7; Serial No. 326,386; published Dec. 20, 1932.
Toilet preparations. Palmer Limited. 301,510; Mar. 7; Serial No. 326,312; published Dec. 6, 1932.
Tooth paste. Society of Chemical Industry in Basle. 301,638; Mar. 7; Serial No. 330,937; published Dec. 6, 1932.
Waving solution, Permanent. Duart Manufacturing Co. Ltd. 301,540; Mar. 7; Serial No. 329,398; published Dec. 20, 1932.

CLASS 7

Cords, twines, ropes, and lines. Henry C. Kelley Company. 92,560–1; renewed July 15, 1933.
Ribbon for tying packages and other uses. Freydberg Brothers, Incorporated. 301,640; Mar. 7; Serial No. 332,186; published Dec. 27, 1932.
Twines. Brown Company. 301,624; Mar. 7; Serial No. 332,174; published Dec. 27, 1932.

CLASS 8

Pipes. Kaufmann Bros. & Bondy, Inc. 301,592; Mar. 7; Serial No. 331,257; published Dec. 27, 1932.

CLASS 10

Fertiliser. Silica Products Corporation. 301,591; Mar. 7; Serial No. 331,628; published Dec. 27, 1932.
Fertilisers, Manufactured. Swift Fertiliser Works. 40,330; renewed May 12, 1933.
Manure, Ground dehydrated. J. A. Miller. 301,584; Mar. 7; Serial No. 331,991; published Dec. 27, 1932.

CLASS 12

Lime. Moores Lime Company. 91,979; renewed June 10, 1933.

CLASS 13

Bath shower curtains. Joseph A. Kaplan, Inc. 301,587; Mar. 7; Serial No. 331,744; published Dec. 27, 1932.
Chains, Tire. Columbian Rope Company. 301,590; Mar. 7; Serial No. 331,635; published Dec. 27, 1932.
Closet combination. A. Weiskittel & Son Company. 92,379; renewed July 1, 1933.
Hangers, Bath tub. Kohler Co. 301,582; Mar. 7; Serial No. 332,154; published Dec. 27, 1932.
Pipes, tubes, and poles, Metal. Union Metal Manufacturing Company. 301,601; Mar. 7; Serial No. 327,074; published Dec. 27, 1932.
Screws, stripper bolts, and pipe plugs. Standard Pressed Steel Co. 301,583; Mar. 7; Serial No. 332,013; published Dec. 27, 1932.
Springs, Coil. Wm. D. Gibson Company. 301,585–6; Mar. 7; Serial Nos. 331,987–8; published Dec. 27, 1932.
Staples, lath nails, brads, etc. Colorado Fuel and Iron Company. 301,600; Mar. 7; Serial No. 328,550; published Dec. 27, 1932.
Wire and wire fence, Barbed. Continental Steel Corporation. 301,589; Mar. 7; Serial No. 331,724; published Dec. 27, 1932.

CLASS 14

Castings, forgings, and welded composite. Forging and Casting Corporation. 301,594–6; Mar. 7; Serial Nos. 330,892–4; published Dec. 27, 1932.

CLASS 15

Gasoline and lubricating oils. Shell Oil Company. 301,513; Mar. 7; Serial No. 331,995; published Dec. 27, 1932.
Lubricants. Technical Equipment Corporation. 301,580; Mar. 7; Serial No. 326,401; published Dec. 27, 1932.
Oil, Lubricating. J. F. Conran. 301,508; Mar. 7; Serial No. 331,041; published Dec. 27, 1932.
Oil, Thread cutting. Ridge Tool Company. 301,511; Mar. 7; Serial No. 332,310; published Dec. 27, 1932.
Oil, Top cylinder lubrication. C. M. Hingle. 301,573; Mar. 7; Serial No. 330,172; published Dec. 27, 1932.
Oils, Lubricating. Atlantic Refining Company. 301,574; Mar. 7; Serial No. 330,843; published Dec. 27, 1932.
Oils, Lubricating. S. Radbill. 301,509; Mar. 7; Serial No. 331,008; published Dec. 27, 1932.

CLASS 16

Paint and painters' materials. Vitro Manufacturing Company. 92,487; renewed July 8, 1932.

CLASS 17

Cigarettes. Société Aponyme le Khedive. 89,933; renewed Mar. 17, 1933.

CLASS 19

Automobiles and structural parts thereof. H. H. Franklin Manufacturing Company. 301,581; Mar. 7; Serial No. 332,228; published Dec. 27, 1932.
Castings, Finished. Federal Malleable Company. 301,597; Mar. 7; Serial No. 330,785; published Dec. 27, 1932.
Seat cushions. Sponge-Aire Seat Company. 301,593; Mar. 7; Serial No. 331,128; published Dec. 27, 1932.
Vehicles, Motor, particularly motorcycles and bicycles. Indian Motocycle Company. 301,588; Mar. 7; Serial No. 331,742; published Dec. 27, 1932.

CLASS 21

Batteries, Dry cell. S. H. Kress & Co. 301,495; Mar. 7; Serial No. 331,587; published Dec. 27, 1932.
Electric fans, beverage mixers, switches, etc. A. C. Gilbert Company. 301,576; Mar. 7; Serial No. 330,367; published Dec. 27, 1932.
Electric grills and toasters. S. Forestek. 301,575; Mar. 7; Serial No. 330,401; published Dec. 27, 1932.
Electric lighting units and wiring fixtures therefor. Vicbridge Lamp Company. 301,577; Mar. 7; Serial No. 330,215; published Dec. 27, 1932.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 7TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A. J. & K. Company, Incorporated, The. (See Janer, Andre, assignor.)
Abbott, Carroll B., et al. (See Hammerly, Fred V., assignor.)
Ackerman, Albert H., assignor to The Studebaker Corporation, South Bend, Ind. Vehicle seat. 1,899,927; Mar. 7.
Ackerman, Michael H., Mansfield, assignor of one-half to L. C. Sickel, Caledonia, Ohio. Seal. 1,900,849; Mar. 7.
Adams, Arthur H., Yonkers, N. Y., assignor to F. Leo Crilly, London, England. Reenforcing cinematograph films. 1,900,681; Mar. 7.
Adams, Edwin C., Pittsburgh, Pa. Gas burner. 1,900,217; Mar. 7.
Adams, Lester V., Schenectady, N. Y., assignor to General Electric Company. Cementing composition. 1,900,537; Mar. 7.
Addressograph Company. (See Eley, Alonzo, assignor.)
Addressograph Company. (See Gollwitzer, Walter T., assignor.)
Addressograph Company. (See Jackson, James P., assignor.)
Addressograph Company. (See Mobler, Valentine J., assignor.)
Addressograph Company. (See Richter, Elmer F., assignor.)
Adhake Company, The. (See Sevison, Harry D., assignor.)
Aikman, Burton S., assignor of one-half to R. P. Tell, Milwaukee, Wis. Steering device. 1,900,218; Mar. 7.
Air Reduction Company. (See Metzger, Floyd J., assignor.)
Air-Way Electric Appliance Corporation. (See Riebel, Frederick, jr., assignor.)
Air-Way Electric Appliance Corporation. (See Riebel, F., jr., and Dow, assignors.)
Ajax Electrothermic Corporation. (See Northrup, Edwin F., assignor.)
Ajax Spring Stabiliser Company. (See Ferguson, Warren T., assignor.)
Aktiebolaget Ljungstrom Angturbin. (See Lysholm, Alf J. R., assignor.)
Aktiebolaget Ljungstroms Angturbin. (See Lysholm, A., Horney, and Wahlsten, assignors.)
Aktiebolaget Malcus Holmquist. (See Brofelth, Gustav E., assignor.)
Aktiebolaget Nomy. (See Wallgren, August G. F., assignor.)
Alcott, James E., Madison, Ill., assignor of one-half to Steadman O. Taylor, Richmond Heights, Mo. Reclaiming car bolsters. 1,900,682; Mar. 7.
Aldon Company, The. (See Roe, Emil W. K., assignor.)
Allee, Herbert D., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Transmission. 1,899,928; Mar. 7.
Allen, Frederick W. (See Malluk, A. M., and Allen.)
Allen, Howard G., assignor to H. R. Bliss Company, Inc., Niagara Falls, N. Y. Hand stitching tool. 1,900,683; Mar. 7.
Allen, W. D., Manufacturing Company. (See Meng, Harry E., assignor.)
Altgelt, Herman E., South Bend, Ind., assignor to Oliver Farm Equipment Company. Dump rake. 1,900,270; Mar. 7.
Altgelt, Herman E. and R. J., South Bend, Ind., assignors to Oliver Farm Equipment Company. Harvester. 1,900,269; Mar. 7.
Altgelt, Rudolph J. (See Altgelt, Herman E. and R. J.)
Aluminum Colors Incorporated. (See Tosterud, Martin, assignor.)
American Car and Foundry Company. (See Willoughby, Victor, assignor.)
American Concrete Pipe Company. (See Whiting, William A., assignor.)
American Cyanamid Company. (See Hansen, Waldemar C., assignor.)
American Cyanamid Company. (See Kilbourne, Kenneth A., assignor.)
American Hat Co. Inc., The. (See Shrader, William T., assignor.)
American Pulley Company, The. (See Bowen, Russell H., assignor.)
American Seating Company. (See Hanson, Walter M., assignor.)
American Seating Company. (See Nuberg, Matthys, assignor.)
American Steel Foundries. (See Darby, Robert F., assignor.)
American Telephone and Telegraph Company. (See Crisson, George, assignor.)
American Telephone and Telegraph Company. (See Hamilton, H. S., and Crisson, assignors.)
American Tissue Mills. (See Perkins, Benjamin F., assignor.)
Anders, Ray, Indianapolis, Ind. Apparatus for forming removable ice cream wrappers. 1,900,083; Mar. 7.
Anderson, Martin J., assignor to Mathews Conveyer Company, Ellwood City, Pa. Brake mechanism for conveyers. 1,900,149; Mar. 7.
Anderson, Martin J., assignor to Mathews Conveyer Company, Ellwood City, Pa. Conveying system. 1,900,150; Mar. 7.
Andres, William J., and C. E. Ward, assignors to Bendix Aviation Corporation, South Bend, Ind. Lever. 1,900,151; Mar. 7.
Andrews, Cyrus N., Yucaipa, Calif. Sound amplifying device. 1,899,929; Mar. 7.
Arasim, John A. (See Kelly, J. E., and Arasim.)
Arge, Hans C., assignor to Doughnut Machine Corporation, New York, N. Y. Alimentary product forming device. 1,900,854; Mar. 7.
Aronson, Louis V., Newark, N. J., assignor to Art Metal Works, Inc. Atomiser. 1,900,087; Mar. 7.
Aronson, Louis V., assignor to Art Metal Works, Inc., Newark, N. J. Lighter construction. 1,900,684; Mar. 7.
Art Metal Works, Inc. (See Aronson, Louis V., assignor.)
Arveson, Maurice H., Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill. Grease insoluble in gasoline. 1,900,759; Mar. 7.
Asahina, Yasuhiko. (See Tamura, K., Kihara, Asahina, and Ishidate.)
Aseltine, Fred E., Dayton, Ohio, assignor to Delco Products Corporation, Anderson, Ind. Charge forming device. 1,900,685; Mar. 7.
Ashbrook, Byron B., Johnstown, Ohio. Automatic door opener. 1,900,785; Mar. 7.
Askania-Werke Aktiengesellschaft. (See Möller, Waldemar, assignor.)
Associated Electric Laboratories, Inc. (See Hershey, Harry E., assignor.)
Atlantic Refining Company, The. (See Kurtz, Stewart S., jr., assignor.)
Auerbach, Zemach, New York, N. Y. Filing or recording device. 1,900,479; Mar. 7.
Augenstein, Karl C., Cranston, assignor to Edwin F. M. Speidel, Edgewood, R. I. Ornamental chain. 1,900,377; Mar. 7.
Automobilewerke H. Bussing, Aktiengesellschaft. (See Staniewicz, Willy, assignor.)
Averill, William H., assignor of one-half to Joseph Pollak, Boston, Mass. Clasp for collars, etc. 1,900,686; Mar. 7.
Avery, Alfred H., Malden, assignor to North American Chemical Company, Cambridge, Mass. Shoe-filling machine. 1,900,322; Mar. 7.
Avery, Alfred H., Malden, assignor to North American Chemical Company, Cambridge, Mass. Shoe-filling machine. 1,900,323; Mar. 7.
Aylsworth, George A., assignor to Cold Control Corporation, Kansas City, Mo. Ventilating means for refrigerators. 1,900,855; Mar. 7.
Aylsworth, George A., assignor to Cold Control Corporation, Kansas City, Mo. Refrigerator construction. 1,900,856; Mar. 7.
Baash, Lawrence F., Los Angeles, and W. H. Maxwell, Beverly Hills, Calif. Tongs. 1,900,878; Mar. 7.
Baehr, Hans, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purification of gases. 1,900,751; Mar. 7.
Bailey, Ervin G., Cleveland Heights, Ohio, assignor, by mesne assignments, to Fuller Lehigh Company. Furnace. 1,900,006; Mar. 7.
Bailey, Ervin G., Easton, assignor to Fuller Lehigh Company, Fullerton, Pa. Furnace block. 1,900,007; Mar. 7.
Bailey Meter Company. (See Benjamin, Merrill G., assignor.)
Bailey, Vernon, Washington, D. C. Animal trap. 1,900,219; Mar. 7.
Bailey, William H., Pueblo, assignor to The Colorado Fuel and Iron Company, Denver, Colo. Dam construction. 1,900,393; Mar. 7.
Baird Machine Company, The. (See Lewis, Arthur J., assignor.)
Bakelite Building Products Co. Inc. (See Harshberger, Norman P., assignor.)
Bakelite Corporation. (See Daniels, Rupert S., assignor.)

Baker Perkins Company, Inc. (See Schmier, Eugene, assignor.)
Bakstad, Johan R., Chicago, Ill., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Crusher. 1,899,930; Mar. 7.
Ball, Joseph A., Los Angeles, Calif., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y. Color cinematographic apparatus. 1,900,034; Mar. 7.
Ballentin, Walter, genannt Mielke. (See Uhlich, E., and Ballentin.)
Ballou, Harry R., Canton, Ohio, assignor to The Hoover Company. Suction cleaner. 1,900,271; Mar. 7.
Barber, George H., New Rochelle, N. Y., assignor to Bond Electric Corporation, Jersey City, N. J. Combined flash-light cap and hanger ring. Des. 89,421; Mar. 7.
Barker, Ralph H., Derry, N. H. Shoe-sole skiving machine. 1,900,786; Mar. 7.
Barmer Maschinenfabrik A.-G. (See Bochmann, O., and Lenk, assignors.)
Barney, Edwin E., New Rochelle, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,900,088; Mar. 7.
Baron, Charles S., Tiffin, Ohio. Covered container and sealing closure therefor. 1,899,921; Mar. 7.
Barstow, Edwin O., assignor to The Dow Chemical Company, Midland, Mich. Production of light metals, such as magnesium. 1,900,220; Mar. 7.
Bartholomew, Robert J., Germantown, assignor to Fletcher Works, Incorporated, Philadelphia, Pa. Traverse motion. 1,900,480; Mar. 7.
Bash, Thomas B., Kansas City, Mo. Switch. 1,900,687. Mar. 7.
Batchelor, Harold, Jersey City, N. J. Vanity case. 1,900,089; Mar. 7.
Baugnée, Justin, Differdange, Luxemburg. Coupling or clutch for coaxial shafts. 1,900,787; Mar. 7.
Baum, Frank G., San Francisco, Calif. Airplane wing. 1,900,688; Mar. 7.
Baum, Frank G., San Francisco, Calif. Airplane. 1,900,689; Mar. 7.
Baumgarten Company of Washington, The. (See Baumgarten, E., Gosnell, and Deisch, assignors.)
Baumgarten, Emanuel, C. W. Gosnell, and N. J. Deisch, assignors to The Baumgarten Company of Washington, Washington, D. C. Stamping press. 1,900,008; Mar. 7.
Bauwens, Seraphine F., Chicago, Ill. Decorative bow for hat bands or the like. 1,900,481; Mar. 7.
Baxter, George L. and F. W. Strachauer, Sacramento, and R. S. Twogood, Berkeley, Calif. Locomotive fire-box. 1,900,324; Mar. 7.
Bayes, Elijah W., Parsons, Kans. Railway track crossing construction. 1,900,788; Mar. 7.
Bayman, Fred, and R. C. Brennesholtz, Seattle, Wash. Automobile table. 1,900,325; Mar. 7.
Beacham, Edwin B., assignor to Chipman Knitting Mills, Easton, Pa. Hosiery. Re18,757; Mar. 7.
Beardsley, Alling P. (See Berry, G. A., Linville, and Beardsley.)
Beardsley, Elmer O., assignor to The Beardsley Piper Company, Chicago, Ill. Thermostatically controlled mixing device. 1,900,221; Mar. 7.
Beardsley & Piper Company, The. (See Beardsley, Elmer O., assignor.)
Beaver, John G. (See Bricken, John.)
Bebel, Abraham, New York, N. Y. Safety removable fastener. 1,900,152; Mar. 7.
Beck, Henry M., Wilkes-Barre, Pa. Fly holder. 1,900,035; Mar. 7.
Becker, Bernard C., York, Pa., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,889; Mar. 7.
Becker, Joseph, Pittsburgh, Pa., assignor, by mesne assignments, to The Koppers Company of Delaware. Coking retort oven. 1,900,752; Mar. 7.
Becker, Joseph, O'Hara Township, Allegheny County, Pa., assignor to The Koppers Company of Delaware. Charging coking retort ovens. 1,900,753; Mar. 7.
Beckett, Charles A., Hull, England. Machine for graining lithographic plates. 1,900,090; Mar. 7.
Bedford, Burnice D., Schenectady, N. Y., assignor to General Electric Company. Phase shifting circuits. 1,900,538; Mar. 7.
Behrens, Hans C. A., assignor of one-half to the Firm Rud. Otto Meyer and one-half to the Firm Kupferhütte Ertel, Bieber & Co., Hamburg, Germany. Apparatus for separating salts or other materials from liquids. 1,900,789; Mar. 7.
Bell Punch Company. (See Black, Horace D., assignor.)
Bellanca, Giuseppe M., New Castle, Del. Air brake for airplanes. 1,900,631; Mar. 7.
Bendix Aviation Corporation. (See Andres, W. J., and Ward, assignors.)
Bendix Aviation Corporation. (See Mock, Frank C., assignor.)
Bendix Brake Company. (See Bendix, Vincent, assignor.)
Bendix Brake Company. (See Frank, Frederick C., assignor.)
Bendix Brake Company. (See McDonald, Eugene G., assignor.)
Bendix Brake Company. (See Norton, Raymond J., assignor.)
Bendix Brake Company. (See Whitworth, Stanley, assignor.)
Bendix, Vincent, Chicago, Ill., assignor to Bendix Brake Company, South Bend, Ind. Conduit. 1,900,091; Mar. 7.
Benjamin, Bert R., Oak Park, and W. S. Graham, Canton, Ill., assignors to International Harvester Company. Tractor planter. 1,899,931; Mar. 7.
Benjamin, Bert R., Oak Park, and S. W. Cady, Canton, Ill., assignors to International Harvester Company. Tractor cultivator. 1,899,932; Mar. 7.
Benjamin, Merrill G., Lakewood, Ohio, assignor, by mesne assignments, to Bailey Meter Company. Furnace control. 1,900,036; Mar. 7.
Benjamin, Philip, New York, N. Y. Article of jewelry. 1,900,425; Mar. 7.
Bennett, Irving T., Brooklyn, assignor to T. E. Murray, deceased, J. B. Murray, T. E. Murray, jr., and J. F. Murray, executors. Electric heater. 1,899,933; Mar. 7.
Bennett, Thomas B. (See Clarke, Alex A., assignor.)
Benzing, Hugo, Dresden, Germany. Power driven typewriter. 1,900,690; Mar. 7.
Berek, Max, assignor to Ernst Leitz Optische Werke, G. m. b. H., Wetzlar, Germany. Ultralight intensive objective. 1,899,934; Mar. 7.
Beresford, Joseph W., Clifton, N. J. Fountain toothbrush. 1,900,826; Mar. 7.
Berger, Emil J., Hatfield, assignor to Dexdale Hosiery Mills, Lansdale, Pa. Hosiery. Des. 89,383; Mar. 7.
Bergische Stahl-Industrie. (See Halbach, Paul, assignor.)
Bergman, Donald J., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 1,900,153; Mar. 7.
Berry, George A., Bound Brook, C. P. Linville, Elizabeth, and A. P. Beardsley, Plainfield, assignors to Calco Chemical Company, Bound Brook, N. J. Apparatus for use in the catalytic oxidation of gases. 1,900,857; Mar. 7.
Best, Harry S., assignor to John H. Best & Sons, Galva, Ill. Display rack. 1,899,935; Mar. 7.
Best, John H., & Sons. (See Best, Harry S., assignor.)
Beyer, Haim. (See Blake, O., and Beyer.)
Bigelow-Sanford Carpet Co. (See Darlenzo, Anthony, assignor.)
Bigelow Sanford Carpet Co. (See Murphy, Francis, assignor.)
Bitney, Dewey H., assignor to Union Steel Products Company, Albion, Mich. Structural unit. 1,900,327; Mar. 7.
Bjorkstedt, William. (See Lowe, R. E., Brown, and Bjorkstedt.)
Black, Horace D., Uxbridge, assignor to Bell Punch Company, Ltd., London, England. Inking device. 1,900,092; Mar. 7.
Black, Lee J., Beaumont, Tex. Blow-out preventing attachment for casing heads. 1,899,922; Mar. 7.
Blake, Octave, and H. Beyer, New York, assignors to Cornell Electric Manufacturing Co., Inc., Long Island City, N. Y. Fixed condenser and making the same. 1,900,093; Mar. 7.
Blanchard, Frederick C., Dorchester, Mass. Lubricating system. 1,900,754; Mar. 7.
Blanchard, George L., Calexico, Calif. Method and apparatus for defibrating cotton seed hulls. 1,900,154; Mar. 7.
Bliffert, Walter J., Milwaukee, Wis. Intake manifold. 1,900,272; Mar. 7.
Bliss, H. R., Company. (See Allen, Howard G., assignor.)
Blumenthal, B., & Co. Inc. (See Bentkow, Abraham, assignor.)
Boardman, Alfred E., Seattle, Wash. Fire extinguishing sprinkler valve. 1,900,032; Mar. 7.
Bochmann, Otto, and W. Lenk, Remscheid-Lennep, assignors to Barmer Maschinenfabrik A.-G., Wuppertal-Oberbarmen, Germany. Device for equalizing the thread tensions for twisting devices. 1,900,037; Mar. 7.
Boggs, Robert, Daly City, Calif. Automatic door tightener. 1,900,328; Mar. 7.
Böhme, the Firm, Dr. Martin. (See Lang, Arno, assignor.)
Bohn, Ralph M., Evanston, Ill. Wheat flour diluent. 1,900,094; Mar. 7.
Bond Electric Corporation. (See Barber, George H., assignor.)
Borden, Moro M., Collingswood, N. J., assignor to Simplex Valve & Meter Company, Philadelphia, Pa. Flow controller. 1,900,273; Mar. 7.
Bossart, Paul N., assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric train signaling system. 1,900,405; Mar. 7.
Bossart, Paul N., assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric train signaling system. 1,900,412; Mar. 7.
Boughtin, Earl M., et al. (See Christensen, John L., assignor.)
Bowen, Russell H., assignor to The American Pulley Company, Philadelphia, Pa. Grooved pulley. 1,900,222; Mar. 7.
Bower, Ward E., Washington, D. C. Oscillation generator. 1,900,038; Mar. 7.
Boyce, Irving J. (See Peters, Frank J., assignor.)
Boyd, Fisher L., Haverford, assignor, by mesne assignments, to National Foam System, Inc., Philadelphia, Pa. Apparatus for producing fire extinguishing foam. 1,900,482; Mar. 7.
Boyden, Roland W., et al., receivers. (See Maynard, Charles E., assignor.)

Brackett, Edward M., and D. Daneke, assignors to The Brackett Stripping Machine Company, Topeka, Kans. Paper cutting and trimming machine and clamping and shock-absorbing mechanism therefor. 1,899,923; Mar. 7.
Brackett Machine Stripping Company, The. (See Brackett, E. M., and Daneke, assignors.)
Brady, Charles T., Detroit, Mich. Reading lamp. 1,900,539; Mar. 7.
Brady, Walter L., Brockton, assignor to The Stetson Shoe Company, Inc., Weymouth, Mass. Shoe. Des. 89,384; Mar. 7.
Brady, Walter L., Brockton, assignor to The Stetson Shoe Company, Inc., Weymouth, Mass. Shoe. Des. 89,385; Mar. 7.
Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg Kliesrath Corporation, Long Island City, N. Y. Brake mechanism. 1,900,155; Mar. 7.
Bragg Kliesrath Corporation. (See Bragg C. S., and Kliesrath, assignors.)
Brandt Automatic Cashier Company. (See Brandt, Edward J., assignor.)
Brandt, Edgar W., Paris, France. Grenade. 1,900,790; Mar. 7.
Brandt, Edward J., assignor to Brandt Automatic Cashier Company, Watertown, Wis. Money handling machine. 1,900,039; Mar. 7.
Brennesholtz, Richard C. (See Bayman, F., and Brennesholtz.)
Brice, Henry E., New York, N. Y. Automatic brake adjuster. 1,900,791; Mar. 7.
Bricken, John (now by judicial change of name to J. G. Beaver), East Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Typewriting and calculating machine. 1,899,936; Mar. 7.
Brien, Joseph R., assignor of one-half to Camille Lapierre, Montreal, Quebec, Canada. Skate. 1,900,040; Mar. 7.
Briggs, Orville B., and G. M. Richard, assignors to Safety Belt Lacer Company, Toledo, Ohio. Method and apparatus for making belt lacing hooks. 1,900,156; Mar. 7.
Bright Star Battery Company. (See Koretzky, H., Horowitz, and Desimone, assignors.)
Bristol, Cyrus J., assignor to Globe Machinery & Supply Company, Des Moines, Iowa. Hydraulic lift for vehicles. 1,900,483; Mar. 7.
Brockie, Harold I., Chatham, N. J. Collapsible play pen and sun bath. 1,900,274; Mar. 7.
Broda, Jan, Torun, Poland. Arched roof. 1,899,924; Mar. 7.
Broderick, John H., Clinton, Mass. Ice-remover for windshields. 1,900,540; Mar. 7.
Brodhun, Carl P., Wilkes-Barre, Pa., assignor to The Okonite Company, Passaic, N. J. Cable. 1,900,041; Mar. 7.
Brodhun, Carl P., Wilkes-Barre, Pa., assignor to The Okonite Company, Passaic, N. J. Noninductive cable. 1,900,792; Mar. 7.
Brofelth, Gustav E., assignor to Aktiebolaget Malcus Holmquist, Halmstad, Sweden. Wadding for whale guns. 1,899,925; Mar. 7.
Broughton, Horatio D., Woodcliff, N. J. Cabinet. 1,900,793; Mar. 7.
Brown, Creston L., Dalles, Oreg. Splash guard for motor vehicles. 1,899,937; Mar. 7.
Brown, Lee R., East Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Calculating machine. 1,900,042; Mar. 7.
Brown, Norman B. (See Lowe, R. E., Brown, and Bjorkstedt.)
Brownstein, Louis, Brooklyn, assignor to Monopulse Teletype Corporation, New York, N. Y. One-wire electrical selecting apparatus. 1,900,095; Mar. 7.
Bruce, Thomas J., Wichita, Kans. Piston ring milling machine. 1,900,755; Mar. 7.
Bruckner, Robert E., Easton, Pa., assignor to Doherty Research Company, New York, N. Y. Three-cylinder tandem engine. 1,900,858; Mar. 7.
Brun, Albert, Paris, France. Safety device for locks. 1,900,794; Mar. 7.
Brunsviga Maschinenwerke Grimme, Natalis & Co., Aktiengesellschaft. (See Haase, Richard, assignor.)
Buchanan, Stephen N., New York, N. Y., assignor to The Thomas & Betts Co., Elizabeth, N. J. Ground wire coupler. 1,900,329; Mar. 7.
Büchner, Carl, assignor of one-half to Papyrus A. G., Mannheim-Waldorf, Germany. Apparatus for sorting transparent or translucent papers, film foils, and the like. 1,900,633; Mar. 7.
Budnik, John. (See Skrlec, P., and Budnik.)
Buelow, George. (See Buelow, Henry W. and G.)
Buelow, Henry W., Royal Oak, and G. Buelow, Detroit, Mich. Structural element. 1,900,541; Mar. 7.
Buenger, Clarence O., assignor to Hills-McCanna Company, Chicago, Ill. Tank car outlet valve. 1,899,938; Mar. 7.
Buhrle, Paul, Bronx, assignor to United Metal Goods Mfg. Co. Inc., Brooklyn, N. Y. Combined clock case and lamp. Des. 89,422; Mar. 7.
Burdick Corporation, The. (See Torrisi, Samuel S., assignor.)
Burke, Stephen P., Morgantown, W. Va., assignor to Surface Combustion Corporation, Toledo, Ohio. Furnace. 1,899,926; Mar. 7.
Burke, Stephen P., Elizabeth, N. J., assignor to Surface Combustion Corporation, Toledo, Ohio. Firing reheating furnaces. 1,900,223; Mar. 7.
Burns, James E., Bridgeport, Conn., assignor to Remington Arms Company, Inc. Ammunition. 1,900,157; Mar. 7.
Büsdorf, Johann, and F. Löfund, Offenbach-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Substituted amino-diphenylamine. 1,900,426; Mar. 7.
Bush, Philip M. (See Hart, T. S., and Bush.)
Bushbeck, Werner, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Arrangement for radio circuits. 1,899,939; Mar. 7.
Bushong, Harry F., assignor, by mesne assignments, to Free Wheeling Patents Corporation, South Bend, Ind. Transmission. 1,900,096; Mar. 7.
Busse, Edwin G., and H. W. Ekholm, assignors to Chicago Railway Equipment Company, Chicago, Ill. Safety guard for brake rods. 1,900,224; Mar. 7.
Butler, John D., Washington, D. C. Razor blade sharpener. 1,900,158; Mar. 7.
Butterworth, William J., Tutbury, assignor to Qualcast Limited, Derby, England. Washing machine. 1,900,795; Mar. 7.
Butts, George W., Wynnewood, Pa., assignor to Pennsylvania Railroad Company. Assembling and transporting stacked articles. 1,900,756; Mar. 7.
Byk-Guldenwerke Chemische Fabrik Aktiengesellschaft. (See Mengele, Hans, assignor.)
Byron-Jackson Co. (See Smith, Nelson K., assignor.)
Cady, Sherman W. (See Benjamin, B. R., and Cady.)
Cady, Sherman W., Canton, Ill., assignor to International Harvester Company. Tractor cultivator. 1,899,940; Mar. 7.
Cain, William E. (See Gotthardt, H. R., and Cain.)
Calco Chemical Company. (See Berry, G. A., Linville, and Beardsley, assignors.)
California Packing Corporation. (See Youman, Burt C., assignor.)
Camel Company. (See Nystrom, Karl F., assignor.)
Cameron Machine Company. (See Johnstone, Robert M., assignor.)
Campbell, Allan, Bridgeport, Conn., assignor to Remington Arms Company, Inc. Ammunition. 1,900,159; Mar. 7.
Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Air brake. 1,900,043; Mar. 7.
Capper, Arthur, trustee. (See Poirot, Eugene M., assignor.)
Card, John L., Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Hat lubricating machine. 1,900,634; Mar. 7.
Card, William C., jr., Winthrop, Mass., assignor to Compo Shoe Machinery Corporation, New York, N. Y. Sole cementing machine. 1,899,941; Mar. 7.
Carlson, Ernest J., Reading, Pa. Adjustable milk bottle holder for cribs and the like. 1,900,691; Mar. 7.
Carlson, George, Bridgeport, Conn., assignor to General Electric Company. Wiring device. 1,900,542; Mar. 7.
Carpenter, E. W., Manufacturing Company, The. (See Carpenter, Edward W., assignor.)
Carpenter, Edward W., Fairfield, assignor to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn. Making shears. 1,900,413; Mar. 7.
Carson Pirie Scott & Company. (See Gottstein, Lewis, assignor.)
Carter, Daniel G. and G. G., Highland Park, Mich. Device for cleaning waste and drain pipes. 1,900,275; Mar. 7.
Carter, Guy G. (See Carter, Daniel G. and G. G.)
Carter, Pauline F., Brookline, Mass. Clothes drier. 1,900,796; Mar. 7.
Casper, Louis H., et al. (See Manvell, Edwin H., assignor.)
Caswell, Geo. W., Co. (See Quinn, Joseph F., assignor.)
Cawood, Richard L., East Liverpool, Ohio. Apparatus for producing various kinds of pottery. 1,900,797; Mar. 7.
Celanese Corporation of America. (See Dreyfus, C., and Platt, assignors.)
Celanese Corporation of America. (See Dreyfus, C., and Rivat, assignors.)
Celanese Corporation of America. (See Ellis, G. H., Olpin, and Storey, assignors.)
Centeno V., Melchor, New York, N. Y. Television apparatus. Re18,761; Mar. 7.
Cerf, Barry, trustee. (See Hedeen, A., and Holifer.)
Certain-teed Products Corporation. (See Doyon, Eugene T., assignor.)
Certain-teed Products Corporation. (See Otis, Edward C., assignor.)
Chadeloid Chemical Company. (See Root, Frank B., assignor.)
Chambers, Berin, Quinlan Company. (See Cooper, Earl E., assignor.)
Chapin, Herbert L., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lip turning machine. 1,900,044; Mar. 7.
Chappell, Reginald J., Brooklyn, N. Y. Game appliance. 1,900,798; Mar. 7.
Charlotte Chemical Laboratories, Inc. (See Raffoer, Emil, assignor.)

Chartrand, John B., Cleveland, Ohio, assignor to Line Material Company, South Milwaukee, Wis. Lighting fixture. 1,900,330; Mar. 7.
Chemical Construction Corporation. (See Hechenbleikner, Ingenuin, assignor.)
Chemische Fabrik Kalk G. m. b. H. (See Oehme, Hermann, assignor.)
Chesley, Walter R., Somerville, assignor to Persons-Majestic Manufacturing Company, Worcester, Mass. Splash guard holder for vehicle fenders. 1,900,225; Mar. 7.
Chicago Bridge and Iron Company. (See Williams, Djalma D., assignor.)
Chicago Railway Equipment Company. (See Busse, E. G., and Ekholm, assignors.)
Chicago Railway Equipment Company. (See Ekholm, Herbert W., assignor.)
Chilton, Roland, Ridgewood, assignor to Eclipse Aviation Corporation, East Orange, N. J. Engine starting mechanism. 1,900,799; Mar. 7.
Chipman Knitting Mills. (See Beacham, Edwin B., assignor.)
Christenson, John L., assignor of one-half to Earl M. Boughtin and C. Wagenius, Edmonton, Alberta, Canada. Automatic door, window, or gate operating device. 1,900,009; Mar. 7.
Church, Harold D., assignor to The White Motor Company, Cleveland, Ohio. Heavy duty automobile construction. 1,900,484; Mar. 7.
Church, Lewis H., Westfield, assignor to The Thomas & Betts Co., Elizabeth, N. J. Grounding fitting. 1,900,485; Mar. 7.
Cincinnati Ball Crank Company, The. (See Harris, Cleo, assignor.)
Cipko, Joseph, New York, N. Y. Wire shaping machine. 1,900,160; Mar. 7.
Claflin Products Incorporated. (See Claflin, William B., jr., assignor.)
Claflin, William B., jr., assignor to Claflin Products Incorporated, New Canaan, Conn. Trouser hanger. 1,899,942; Mar. 7.
Clapp, Albert L., Danvers, Mass. Manufacture of fibrous articles. 1,900,427; Mar. 7.
Clarin, Werner E., Chicago, Ill. Folding chair. 1,900,486; Mar. 7.
Clark, Harry A., Detroit, Mich. Necktie construction. 1,900,800; Mar. 7.
Clark, Peter. (See Weidhaas, G. A., Clark and Harding, assignors.)
Clark, William T., Boston, Mass. Rain and sun shield for vehicles. 1,900,097; Mar. 7.
Clarke, Alex A., Chicago, Ill., assignor to T. B. Bennett, Muskegon, Mich., and himself jointly. Wood surfacing machine. 1,900,331; Mar. 7.
Clay Equipment Corporation. (See Clay, J. B., and Wilson, assignors.)
Clay, Joseph B., Cedar Heights, and L. R. Wilson, Waterloo, assignors to Clay Equipment Corporation, Cedar Falls, Iowa. Window device. 1,899,943; Mar. 7.
Claybourn Process Corporation. (See Dennis, William C., assignor.)
Clayton and Lambert Manufacturing Company. (See Lambert, Charles F., assignor.)
Clements Mfg. Co. (See Clements, William J., assignor.)
Clements, William J., assignor to Clements Mfg. Co., Chicago, Ill. Vacuum cleaner. 1,900,692; Mar. 7.
Close, Lowell B. (See Huber, W. I., and Close.)
Cobb, Thomas S., Fort Lauderdale, Fla. Mattress. 1,900,801; Mar. 7.
Cochran, Ralt S., assignor to Surface Combustion Corporation, Toledo, Ohio. Conveyer for furnaces. 1,900,428; Mar. 7.
Cochrane, Charles H., New York, N. Y. Combined ink drying and neutralizing device. 1,900,543; Mar. 7.
Coddington, Harry W., Roanoke, Va. Control valve for low water alarms. 1,900,379; Mar. 7.
Cohan, Morris J., Brooklyn, N. Y. Spot welding. 1,900,161; Mar. 7.
Cohen, Benjamin, Brooklyn, N. Y. Foundation for animal head and body. 1,900,487; Mar. 7.
Cohen, Solomon, Leavenworth, Kans. Spring mattress. 1,900,802; Mar. 7.
Cold Control Corporation. (See Aylsworth, George A., assignor.)
Cole, Clarence, et al. (See Oster, C. B., and Rainey, assignors.)
Cole, Dale S. (See Leece, B. M., and Cole.)
Coleman, Gerald H., assignor to The Dow Chemical Company, Midland, Mich. Preparation of ethylidene chloride. 1,900,276; Mar. 7.
Colombo, Carlo A., assignor to Soc. Ital. Transfers Albini, S. I. T. A., Milan, Italy. Printing transfers. 1,900,635; Mar. 7.
Colorado Fuel and Iron Company, The (See Bailey, William H., assignor.)
Compo Shoe Machinery Corporation. (See Card, William C., jr., assignor.)
Conant, David J., Memphis, Tenn. Well reamer. 1,900,226; Mar. 7.
Connolly, Gerald C., and E. B. Miller, assignor to The Silica Gel Corporation, Baltimbre, Md. Making gels. 1,900,859; Mar. 7.
Cook, C. Lee, Manufacturing Company. (See Durham, Fred D., assignor.)
Cook, Charles C., Baltimore, Md. End ballast tamper. 1,899,944; Mar. 7.
Cook Electric Company. (See Wilkins, Albert M., assignor.)
Coolidge, Cole, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Metal salts of half acid esters of fatty hydroxylated oil and making them. 1,900,693; Mar. 7.
Cooper, Earl E., assignor to Chambers, Bering, Quinlan Company, Decatur, Ill. Protecting cap. 1,900,098; Mar. 7.
Cooperstein, Abraham, et al. (See Cooperstein, Irving and A., and Levitt.)
Cooperstein, Irving and A., Brooklyn, and A. Levitt, New York, N. Y. Candelabrum. Des. 89,423; Mar. 7.
Coradi, Oswald, Zurich, and W. Leemann, Ruschlikon, near Zurich, Switzerland. Tracing device for instruments such as integraphs and the like. 1,900,332; Mar. 7.
Corlett, Edwin H., assignor to Fairchild Aerial Surveys, Inc., New York, N. Y. Measuring and computing instrument. 1,900,757; Mar. 7.
Cornell Electric Manufacturing Co. (See Blake, O., and Beyer, assignors.)
Cornillac, André. (See Coupeau, M., and Delaville, assignors.)
Cottrell, Roy H., Ogden, Utah. Centrifugal thickener. 1,900,394; Mar. 7.
Coupeau, Marc., Paris, and M. Delaville St.-Maurice, assignors of one-third to A. Cornillac, Paris, France. Apparatus for the removal of alcohol from wine, cider, beer, and other alcoholic products. 1,900,094; Mar. 7.
Courtaulds Limited. (See Hegan, H. J., and Hazeley, assignors.)
Crabbe, Lindsay T., assignor to Phoenix Metal Cap Co., Inc., Chicago, Ill. Jar and closure therefor. 1,900,803; Mar. 7.
Craig, Frank E., assignor of one-fourth to J. W. Lovell, Astorio, Oreg. Lifeboat hook. 1,900,227; Mar. 7.
Craig, William D., Meadville, Pa., assignor to Hookless Fastener Company. Playing ball. 1,900,544; Mar. 7.
Crane, Theodore D., Council Bluffs, Iowa. Parachute mounting for aeroplanes. 1,900,891; Mar. 7.
Creveling, John L., White Plains, assignor, by mesne assignments, to Simplex Equipment Company, Inc., New York, N. Y. Electric regulation. 1,900,277; Mar. 7.
Creveling, John L., Tucson, Ariz., assignor, by mesne assignments, to Simplex Equipment Company, Inc., New York, N. Y. Electric system. 1,900,278; Mar. 7.
Crilly, F. Leo. (See Adams, Arthur H., assignor.)
Crisson, George. (See Hamilton, H. S., and Crisson.)
Crisson, George, East Orange, N. J., assignor to American Telephone and Telegraph Company. Two-way negative resistance repeater. 1,900,045; Mar. 7.
Cronwell, Magnus. (See Ellberg, J., and Cronwell.)
Crowe, James H., Lakewood, assignor to The Midland Steel Products Company, Cleveland, Ohio. Brake drum or member. 1,900,804; Mar. 7.
Crown Cork & Seal Company. (See Kramer, Eric B., assignor.)
Cudney, Harry J. (See Wiley, W. K., and Cudney.)
Cudney, Harry J., Buffalo, assignor to Flexlume Corporation, Tonawanda, N. Y. Illuminated sign. 1,900,768; Mar. 7.
Cunning, Harry F., Roanoke, Va. Lubricating device. 1,900,429; Mar. 7.
Cunningham, James, Son & Company. (See Fergusson, David, assignor.)
Curtin-Howe Co poration. (See Curtin, Leo P., assignor.)
Curtin, Leo P., Cranbury, N. J., assignor to Curtin-Howe Corporation, New York, N. Y. Zino-meta-arsenite. 1,900,162; Mar. 7.
Curtis, Arthur R., assignor to Superior Carbon Products, Incorporated, Cleveland, Ohio. Method of and machine for binding cables. 1,900,695; Mar. 7.
Curtis, William H., assignor to National Pumps Corporation, Dayton, Ohio. Pump cabinet. Des. 89,386; Mar. 7.
Curtis, William H., assignor to National Pumps Corporation, Dayton, Ohio. Pressure controlling device for a liquid dispensing apparatus. 1,900,333; Mar. 7.
Cuthbert, William R. (See Sheaffer, C. R., and Cuthbert.)
Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)
Cutting, Clark T. (See Taylor, W. J., and Cutting.)
Dahlquist, Reuben A., Chicago, Ill. Game board. Des. 89,387; Mar. 7.
Dain Manufacturing Company of Iowa. (See Miller, Paul P., assignor.)
Dana, Charles A., et al., receivers. (See Maynard, Charles E., assignor.)
Dana, Drexler, Santa Barbara, and F. A. Morgan, Beverley Hills, Calif. Method and apparatus for drilling oil wells. 1,900,163; Mar. 7.
Daneke, Dietrich. (See Bracket, E. M., and Daneke.)
Dangerlite Corporation of America. (See Scott, Ernest E., assignor.)
Daniels, Rupert S., Newark, N. J., assignor to Bakelite Corpo ation, New York, N. Y. Water repellent abrasive. 1,900,430; Mar. 7.
Darby, Robert F., assignor to American Steel Foundries, Chicago, Ill. Grate. 1,999,945; Mar. 7.
Darienzo, Anthony, Amsterdam, N. Y., assignor to Bigelow-Sanford Co., Inc., Thompsonville, Conn. Filling stop motion for looms. 1,900,545; Mar. 7.

Dasenbrook, Charles H., assignor to Thayer Action Company, Rockford, Ill. Piano action. 1,900,488; Mar. 7.
Davidson, William D., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif. Kelly bushing. 1,899,946; Mar. 7.
Davis, Charles H., Hawkins, Wis. Attachment for ladders. 1,900,636; Mar. 7.
Davis, Clarke F., Short Hills, N. J. Metal edged gypsum lumber. 1,900,805; Mar. 7.
Dawson, Elma N. (See Dawson, James C., assignor.)
Dawson, James C., assignor to E. N. Dawson, Webster Groves, Mo. Loose leaf binder. 1,900,334; Mar. 7.
Dawson, James C., Webster Groves, Mo. Loose leaf binder. 1,900,431; Mar. 7.
Day, George J., Buffalo, N. Y. Oven thermometers. 1,900,696; Mar. 7.
Day, J. H., Company, The. (See Schiff, Sigmund, assignor.)
Dean Brothers Co. (See Dean, Stuart, assignor.)
Dean, Stuart, assignor to Dean Brothers Co., Indianapolis, Ind. Pump construction. 1,900,228; Mar. 7.
Dean, Wilbur J., Kansas City, Mo. Bead forming machine. 1,899,947; Mar. 7.
Decker, James W., New York, N. Y. Stock quotation projecting machine. 1,900,010; Mar. 7.
De Coriolis, Ernest G., Toledo, and P. Q. Williams, Ottawa Hills, assignors to Surface Combustion Corporation, Toledo, Ohio. Glass melting apparatus. 1,900,432; Mar. 7.
Deere & Company. (See Silver, Walter H., assignor.)
Delsch, Noel J. (See Baumgarten, E., Gosnell, and Delsch.)
Delaville, Maurice. (See Coupeau, M., and Delaville.)
Delco Products Corporation. (See Aseltine, Fred E., assignor.)
Del Vecchio, Ambrogio, Hawthorne, N. Y. Collapsible tent and frame. 1,900,335; Mar. 7.
De Monge, Gérard, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli Societa Anonima, Milan, Italy. Power transmission mechanism. 1,900,165; Mar. 7.
Dennis, William C., assignor to Claybourn Process Corporation, Milwaukee, Wis. Safety device for pressure systems. 1,900,229; Mar. 7.
Denzer, Ludwig, Hamburg, Germany. Type pad for typewriters. 1,900,046; Mar. 7.
De Orlow, Stephen, Lansing, Mich. Liquid level indicator. 1,900,433; Mar. 7.
Derby, Ira H., assignor to P. C. Reilly, Indianapolis, Ind. Distilling fluent materials and producing coke. 1,900,047; Mar. 7.
Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Cutter for extruding machines. 1,900,434; Mar. 7.
Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire building method. 1,900,435; Mar. 7.
Desimone, Anthony J. (See Koretsky, H., Horowitz, and Desimone.)
Detroit Show Case Company. (See McDonald, Angus N., assignor.)
De Vilbiss Company, The. (See Roselund, Harold A., assignor.)
Devol, Lee, Wilkinsburg, assignor to The Union Switch & Signal Company, Pittsburgh, Pa. Electric control system. 1,900,406; Mar. 7.
Dexdale Hosiery Mills. (See Berger, Emil J., assignor.)
Dickens, James C., Goose Creek assignor of one-half to W. C. Thomas, Houston, Tex. Releasable packer. 1,900,230; Mar. 7.
Dictograph Products Co. (See Ring, Fred, assignor.)
Dill & Collins Co. (See Schwalbe, Hellmuth C., assignor.)
Dix, Lawton A., New York, N. Y. Drier head. 1,900,166; Mar. 7.
Doherty Research Company. (See Bruckner, Robert E., assignor.)
Doherty Research Company. (See Lowe, R. E., Brown, and Bjorkstedt assignors.)
Dohner, Donald R., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Refrigerator cabinet or similar article. Des. 89,388; Mar. 7.
Dohner, Donald R., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Cover of a refrigerator cabinet or similar article. Des. 89,389; Mar. 7.
Dole, Myron W., Belmont, and M. Silverman, Brookline, Mass. Feed water heater for locomotives. 1,900,697; Mar. 7.
Doughnut Machine Corporation. (See Arge, Hans C., assignor.)
Dourgnon, Jean T., Paris, France. System of indirect lighting of all spaces. 1,900,436; Mar. 7.
Dovell Dudley K., El Paso, Tex., assignor to Sullivan Machinery Company. Drill steel retainer. 1,900,860; Mar. 7.
Dow Chemical Company, The. (See Barstow, Edwin O., assignor.)
Dow Chemical Company, The. (See Coleman, Gerald H., assignor.)
Dow Chemical Company, The. (See Grether, Ernest F., assignor.)
Dow, Dewey M. (See Riebel, F., and Dow.)
Doyon, Eugene T., assignor, by mesne assignments, to Certain-teed Products Corporation. Roofing manufacture. 1,900,598; Mar. 7.
Drake Rollin L., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Capping machine. 1,900,637; Mar. 7.
Draper Corporation. (See O'Brien, Daniel N., assignor.)
Drexler, Dana, Santa Barbara, and F. A. Morgan, Beverly Hills, Calif. Method and apparatus for drilling oil wells. 1,900,164; Mar. 7.
Dreyfus, Camille, New York, N. Y., and G. Rivat, Paterson, N. J., assignors to Celanese Corporation of America. Differentially coloring fabric and product thereof. 1,900,167; Mar. 7.
Dreyfus, Camille, New York, N. Y., and H. Platt, Cumberland, Md., assignors to Celanese Corporation of America. Dyeing of textile material with vat dyes. 1,900,168; Mar. 7.
Drying Systems, Inc. (See Russell, B. B., and Uhlhorn, assignors.)
Duduletz, John, Tregarva, Saskatchewan, assignor of one-half to Stephen Duduletz, Tregarva, Canada. Breast wrench. 1,900,169; Mar. 7.
Duduletz, Stephen. (See Dudulest, John, assignor.)
Duplate Corporation. (See Zola, John C., assignor.)
Du Pont, E. I., de Nemours & Company. (See Coolidge, Cole, assignor.)
Du Pont, E. I., de Nemours & Company. (See Graves, George D., assignor.)
Du Pont, E. I., de Nemours & Company. (See Gubelmann, I., and Rintelman, assignors.)
Du Pont, E. I., de Nemours & Company. (See Lewers, W. W., and Schwartz, assignors.)
Du Pont, E. I., de Nemours & Company. (See Rintelman, William L., assignor.)
Du Pont, E. I., de Nemours & Company. (See Ulich, L., and Goodrich, assignors.)
Du Pont Film Manufacturing Corporation. (See Moyse, Hollis W., assignor.)
Du Pont Film Manufacturing Corporation. (See Sease, Virgil B., assignor.)
Durham, Fred D., assignor to C. Lee Cook Manufacturing Company, Louisville, Ky. Rod wiping mechanism. 1,900,437; Mar. 7.
Durham, Harold L., Everett, Wash. Corrosion preventing attachment for boats. 1,900,011; Mar. 7.
Eastman Kodak Company. (See Hickman, Kenneth C. D., assignor.)
Eastman Kodak Company. (See Hopkins, Roy S., assignor.)
Eastman Kodak Company. (See Jones, John G., assignor.)
Eastman Kodak Company. (See Seymour, Merrill W., assignor.)
Eastman Kodak Company. (See Staud, C. J., and Webber, assignors.)
Eastman Kodak Company. (See Taylor, E. R., and Smith, assignors.)
Eastman Kodak Company. (See Van Derhoef, Henry E., assignor.)
Eastman Kodak Company. (See Wittel, Otto, assignor.)
Eclipse Aviation Corporation. (See Chilton, Roland, assignor.)
Eclipse Aviation Corporation. (See Lansing, Raymond P., assignor.)
Ede, George A., Cobden, Ill. Measuring device. 1,900,231; Mar. 7.
Edghill, Frederick A., assignor to Rayner Decalcomania Company, Chicago, Ill. Decalcomania transfer. 1,900,048; Mar. 7.
Edminston, Hugh C. (See Goddard, John V., assignor.)
Egan, John J., San Francisco, Calif. Woodworking machinery. 1,900,336; Mar. 7.
Egli, Firm H. W. A. G. (See Suter, Heinrich, assignor.)
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for converting oils. 1,900,170; Mar. 7.
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for converting oils. 1,900,171; Mar. 7.
Eisenberg, George, Brooklyn, N. Y. Musical instrument of the violin type. 1,900,489; Mar. 7.
Ekholm, Herbert W. (See Busse, E. G., and Ekholm.)
Ekholm, Herbert W., assignor to Chicago Railway Equipment Company, Chicago, Ill. Wheel stop. 1,900,232; Mar. 7.
Electrolux Servel Corporation. (See Knight, Donald B., assignor.)
Electrolux Servel Corporation. (See Munters, Carl G., assignor.)
Electrolux Servel Corporation. (See Taylor, Robert S., assignor.)
Eley, Alonzo, Hendon, England, assignor to Addressograph Company, Chicago, Ill. Addressing machine and other similar printing machines. 1,900,279; Mar. 7.
Elgin National Watch Company. (See Howard, Edward, assignor.)
Eliassen, Fred B. (See Thoresen, C. B., and Eliassen.)
Ellberg, John, New York, and M. Cronwall, assignors to A. Schrader's Son, Inc., Brooklyn, N. Y. Fluid pressure gauge. 1,900,414; Mar. 7.
Elliott Company. (See Rodgers, James P., assignor.)
Ellis, Carleton, Montclair, N. J. Composition containing a resinous complex. 1,900,638; Mar. 7.

Ellis, George H., H. C. Olpin, and R. C. Storey, Spondon, near Derby, England, assignors to Celanese Corporation of America. Treatment of textile and other materials. 1,900,172; Mar. 7.
Ellis, George H., St. Paul, assignor to The Insulite Company, Minneapolis, Minn. Insulating body. 1,900,698; Mar. 7.
Ellis, George H., St. Paul, assignor to The Insulite Company, Minneapolis, Minn. Waterproof insulating body. 1,900,699; Mar. 7.
Ellison, Harry C., Lakewood, Ohio, assignor, by mesne assignments, to Republic Steel Corporation. U-bolt and making the same. 1,900,049; Mar. 7.
Elöd, Egon, Karlsruhe, Germany. Production of cellulose formates. 1,900,599; Mar. 7.
Emanueli, Luigi, Milan, Italy, assignor to Società Italiana Pirelli. High tension electric cable. 1,900,600; Mar. 7.
Emerson Electric Mfg. Co., The. (See Persons, Lawrence M., assignor.)
Emmons, Arthur N., assignor to The Porter-Cable Machine Company, Syracuse, N. Y. Tailstock for lathes and the like. 1,900,233; Mar. 7.
Emsco Derrick & Equipment Company. (See Davidson, William D., assignor.)
Emsco Derrick & Equipment Company. (See Goeser, Edwin W., assignor.)
Engstrom, Gustaf W. (See Walker, E. C., and Engstrom.)
Epstein, Albert A., New York, N. Y. Briquette and process of manufacture. 1,900,173; Mar. 7.
Equipment Specialties Company. (See O'Connor, Arthur F., assignor.)
Erickson, Everett, and G. J. Hoody, Omaha, Nebr. Collapsible luggage rack. 1,900,438; Mar. 7.
Ernst, Hans, assignor to Western Cartridge Company, East Alton, Ill. Process of and apparatus for making wads. 1,900,012; Mar. 7.
Ernst, Walter, assignor to The Hydraulic Press Manufacturing Company, Mount Gilead, Ohio. Hydraulic press platen travel equalizer. 1,900,050; Mar. 7.
Evans, Edwin R., Detroit, Mich. Brake construction. 1,900,546; Mar. 7.
Evenson, Arthur M., Spring Grove, Minn. Corn removing attachment. 1,900,806; Mar. 7.
Extrom, Victor E. (See Miller, P. J. N., and Extrom.)
F. & N. Lawn Mower Company, The. (See Kenyon, M. G., and Kluter, assignors.)
Fabrica Italiana Magneti Merelli, Societe Anonima. (See de Monge, Gérard, assignor.)
Fahrenwald, Frank A., Chicago, Ill., Chain link and integral head articulating pintle. 1,899,948; Mar. 7.
Fahrney, Emery H., Chicago, Ill. Lubricating means for high pressure pump pistons. 1,899,949; Mar. 7.
Fairbanks, Morse & Co. (See Goldberg, M. J., and Teufl, assignors.)
Fairbanks, Morse & Co. (See Harstick, William H., assignor.)
Fairchild Aerial Surveys, Inc. (See Corlett, Edwin H., assignor.)
Fairchild, Oscar H., assignor to Universal Oil Products Company, Chicago, Ill. Hydrocarbon oil conversion. 1,900,174; Mar. 7.
Falk Corporation, The. (See Ledeen, Hyman, assignor.)
Famous, Earl M., Upper Darby, Pa. Reversible necktie. 1,900,490; Mar. 7.
Farrelly, Patrick, San Francisco, Calif. Collar shaper. 1,900,547; Mar. 7.
Fedders Manufacturing Company. (See Moore, Samuel, assignor.)
Fedders Manufacturing Company. (See Slagel, Franklin G., assignor.)
Fegley, Thomas J., and G. O. Leopold, assignors to North Bro's M'f'g Co., Philadelphia, Pa. Christmas tree holder. 1,900,807; Mar. 7.
Fehlberg, Chester H., assignor, by mesne assignments, to Free Wheeling Patents Corporation, South Bend, Ind. Free Wheeling transmission. 1,899,950; Mar. 7.
Felder, Abraham, New York, N. Y. Loose leaf book. 1,900,601; Mar. 7.
Felten, Abram V. A. (See Mahlstedt, John F., and Felten.)
Ferguson, Harry, Belfast, Northern Ireland. Cultivator. 1,900,440; Mar. 7.
Ferguson, John E., Edgewood, R. I., assignor to Westinghouse Lamp Company. Securing contact pins in radio-tube bases. 1,900,099; Mar. 7.
Ferguson, Warren T., Brookline, assignor to Ajax Spring Stabilizer Company, Cambridge, Mass. Metal spring cover. 1,900,051; Mar. 7.
Fergusson, David, assignor to James Cunningham, Son & Company, Rochester, N. Y. Motor vehicle. 1,900,439; Mar. 7.
Fien, Alphonsus, assignor to S. H. Pomeroy Company, New York, N. Y. Metal window. 1,900,175; Mar. 7.
Fien, Alphonsus, assignor to S. H. Pomeroy Company, New York, N. Y. Metal window. 1,900,177; Mar. 7.
Finkelstein, Hans, Uerdingen (Niederrhein), assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Cellulose nitrate lacquer. 1,900,700; Mar. 7.
Firebar Corporation. (See Thompson, James S., assignor.)
Fire King Co., The. (See Snavely, Earl R., assignor.)
Fischer, Heinrich. (See Schmidt, O., Treppenhauer, Grosskinsky, and Fischer.)
Fisher, David, Paden City, W. Va. Saucer. Des. 89,390; Mar. 7.
Fisher, David, Paden City, W. Va. Cup. Des. 89,391; Mar. 7.
Fisher, Guy B., Blandlake, Tex. Plow. 1,900,701; Mar. 7.
Fisher, Guy B., Blandlake, Tex. Saw. 1,900,702; Mar. 7.
Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)
Fisk Rubber Company, The. (See Labine, Roland A., assignor.)
Fisk Rubber Company. (See Maynard, Charles E., assignor.)
Fisk Rubber Company. (See Mead, George J., assignor.)
Fitzgerald Mfg. Company, The. (See Fitzgerald, Patrick J., assignor.)
Fitzgerald, Patrick J., assignor to The Fitzgerald Mfg. Company, Torrington, Conn. Casing for a rotary cutting implement. Des. 89,424; Mar. 7.
Fitzpatrick, John B., East Orange, N. J., assignor to Westinghouse Lamp Company. Welding metals. 1,900,100; Mar. 7.
Fletcher Works, Incorporated. (See Bartholomew, Robert J., assignor.)
Flewell, Walter H., Sioux City, Iowa. Dual door control. 1,900,176; Mar. 7.
Flexlume Corporation. (See Cudney, Harry J., assignor.)
Flexlume Corporation. (See Wiley, W. K., and Cudney, assignors.)
Floyd, William M. (See Latou, William L., assignor.)
Folmer Graflex Corporation, The. (See Petit, W. H., and Hineline, assignors.)
Fonseca, Edward L. (See Hunt, Edward M., and Fonseca.)
Food Machinery Corporation. (See McDill, R. D., assignor.)
Foster, John L., New York, N. Y. Garment safety pocket. 1,900,639; Mar. 7.
Foster Wheeler Corporation. (See Wallis, John S., assignor.)
Fox Case Corporation. (See Sponable, Earl I., assignor.)
Frank, Frederick C., assignor to Bendix Brake Company, South Bend, Ind. Wheel. 1,900,101; Mar. 7.
Frank, Frederick C., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,900,178; Mar. 7.
Frank, Leonard, St. Paul, Minn. Vegetable slicing mechanism. 1,900,491; Mar. 7.
Franklin Valveless Engine Company. (See Kahr, Martin, assignor.)
Frederickson, Otto A., Ben Avon, Pa., assignor to National Electric Products Corporation, New York, N. Y. Armored cable. 1,900,492; Mar. 7.
Freeman, Benjamin W., Cincinnati, Ohio. Making shoes. 1,900,441; Mar. 7.
Free Wheeling Patents Corporation. (See Bushong, Harry F., assignor.)
Free Wheeling Patents Corporation. (See Fehlberg, Chester H., assignor.)
Freeman, Horace. (See Wagner, C. L., and Freeman.)
Freudenberg, Ernest W., Larchmont, N. Y. Embroidered textile fabric or a similar article. Des. 89,392; Mar. 7.
Friedrichs, Frederick M., Summerville, S. C. Radio secretary. 1,900,493; Mar. 7.
Frigidaire Corporation. (See Maccabee, David E., assignor.)
Frink, Carl H., Clayton, N. Y. Snowplow. 1,900,703; Mar. 7.
Fuchs, Leo, Cameron, Tex. Glare shield. 1,900,337; Mar. 7.
Fuller Company. (See Morrow, Joseph H., assignor.)
Fuller Lehigh Company. (See Bailey, Ervin G., assignor.)
Fuller Lehigh Company. (See Harter, Isaac, assignor.)
Fuller Lehigh Company. (See Jacobus, D. S., and Kerr, assignors.)
Fullerton, George A., Clarendon, Pa. Power take-off for motor vehicles. 1,900,415; Mar. 7.
Gade, Harcourt F. (See Ranney, L., and Gade.)
Galassi, Pasquale, New York, N. Y. Dividing strip for terazzo and like floors. 1,900,704; Mar. 7.
Galassi, Pasquale, New York, N. Y. Bimetallic flanged dividing strip. 1,900,705; Mar. 7.
Galloway, Otis W., Minneapolis, Minn. Box car construction. 1,900,548; Mar. 7.
Garrett, Francis A., assignor to Ransomes, Sims & Jeffries, Limited, Ipswich, England. Cardan shaft. 1,900,052; Mar. 7.
Gasstrom, Herman M., Mount Vernon, N. Y. Yielding joint for extension rules. 1,900,640; Mar. 7.
Gattoni, John, Union City, assignor to Seederer-Kohlbusch, Inc., Jersey City, N. J. Magnetic damper for precision balance. 1,900,641; Mar. 7.
Gay, Frazer W., Newark, N. J. Power transmission system. 1,900,494; Mar. 7.
Gay, Frazer W., Newark, N. J. Capacitor protector. 1,900,495; Mar. 7.
Gay, Frazer W., Newark, N. J. Network of midtapped transformers. 1,900,496; Mar. 7.
Gebhard, Louis A., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Protective system for fluid cooled tubes. 1,900,013; Mar. 7.
Geiger, William A., assignor to W. H. Miner, Inc., Chicago, Ill. Coupler and yoke connection. 1,900,549; Mar. 7.

Geist, Joseph, Kraiburg-on-the-Inn, Germany. Grab. 1,900,179; Mar. 7.
General Aniline Works, Inc. (See Büsdorf, J., and Lösund, assignors.)
General Aniline Works, Inc. (See Kranzlein, G., and Ochwat, assignors.)
General Aniline Works, Inc. (See Laska, L., and Zitscher, assignors.)
General Aniline Works, Inc. (See Marx, K., and Lehmann, assignors.)
General Aniline Works, Inc. (See Rietz, E., and Hoffmann, assignors.)
General Aniline Works, Inc. (See Wahl, Ottmar, assignor.)
General Electric Company. (See Adams, Lester V., assignor.)
General Electric Company. (See Bedford, Burnice D., assignor.)
General Electric Company. (See Carlson, George, assignor.)
General Electric Company. (See Heisler, Charles L., assignor.)
General Electric Company. (See Hull, Albert W., assignor.)
General Electric Company. (See Junggren, Oscar, assignor.)
General Electric Company. (See McArthur, Elmer D., assignor.)
General Electric Company. (See Moore, Daniel M., assignor.)
General Electric Company. (See Pipkin, Marvin, assignor.)
General Electric Company. (See Reed, Walter C., assignor.)
General Electric Company. (See Seeley, Harold T., assignor.)
General Electric Company. (See Wade, Raymond B., assignor.)
General Electric Company. (See Watson, George O., assignor.)
General Electric Company. (See Weber, Louis J., assignor.)
General Electric Company. (See Whitney, C. F., assignor.)
General Plate Company. (See Payette, Joseph A., assignor.)
Gerhardt, Jacob J. (See Pearson, A. L., and Gerhardt.)
Gerlach, Frits, Berlin-Tempelhof, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Ventilating device for subterranean spaces. 1,900,642; Mar. 7.
Gervasi, Paul, Waterbury, Conn. Burner. 1,899,951; Mar. 7.
Gessler, Harry C., Brooklyn N. Y. Self closing sugar bowl mounting. 1,900,643; Mar. 7.
Gibson, Oliver E. (See Manske, F. A., Odenwaldt, and Gibson.)
Giesecke, Fred O., Evanston, Ill., assignor to International Patents Development Company, Wilmington, Del. Apparatus for making gelatinized starch products. 1,889,952; Mar. 7.
Gilbert & Barker Manufacturing Company. (See Logan, Joseph A., assignor.)
Gilbert, William S., Detroit, Mich., assignor to Morgan & Wright. Tire. Des. 89,393; Mar. 7.
Giles, H. R., et al. (See Pippin, John W., assignor.)
Giles, William R. (See Pasternack, R., and Giles.)
Gillen, George A., Bronx, N. Y. Combined switch casing and mounting bracket or similar article. Des. 89,394; Mar. 7.
Gillette Safety Razor Company. (See Muros, Joseph, assignor.)
Gilmer, George W., Tacony, Pa. Pad or packing with fastening means. 1,900,280; Mar. 7.
Gitt, Harry N., 2d, Hanover, Pa. Hand ball gloves. 1,900,395; Mar. 7.
Gitzendanner, Fred, New York, N. Y. Shock absorber. 1,900,497; Mar. 7.
Glatthar, George E., University Heights and F. Wening, South Euclid, Ohio. Lighting fixture. Des. 89,395; Mar. 7.
Glidden, Harvey L., Lexington, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Back. 1,900,053; Mar. 7.
Globe Automatic Sprinkler Company. (See Rowley, Arthur C., assignor.)
Globe Machinery and Supply Company. (See Bristol, Cyrus J., assignor.)
Goddard, John V., Trentham, England, assignor to H. C. Edmiston, New York, N. Y. Covered dish or similar article. Des. 89,396; Mar. 7.
Godsey, Frank W., jr., New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Vehicle Driving apparatus and system. 1,900,706; Mar. 7.
Godsey, Frank W., jr., New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Regulation of alternating current circuits. 1,900,707; Mar. 7.
Goeser, Edwin W., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif. Rotary draw works with adjustable jack shaft. 1,899,958; Mar. 7.
Going, George G., Middletown, Conn., assignor, by mesne assignments, to Remington Typewriter Company. Typewriting machine. 1,900,102; Mar. 7.
Goldberg, Morris J., and F. C. Teufl, Beloit, Wis., assignors to Fairbanks, Morse & Co., Chicago, Ill. Reversing and control mechanism for internal combustion engines. 1,900,054; Mar. 7.
Golliwitzer, Walter T., Chicago, Ill, assignor to Addressograph Company, Wilmington, Del. Addressing machine. 1,900,281; Mar. 7.
Goodman Manufacturing Company. (See Vodos, Frederick W., assignor.)
Goodrich, Robert E. (See Ulich, L., and Goodrich.)
Gookin, Sylvester L., Quincy, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener supplying apparatus. 1,900,055; Mar. 7.
Gosnell, Charles W. (See Baumgarten, E., Gosnell, and Deisch.)
Gotthardt, Henry R., Louisville, Ky., and W. E. Cain, Jeffersonville, Ind., assignors to Logan Co., Inc., Louisville, Ky. Switching conveyor. 1,900,602; Mar. 7.
Gotthardt, Henry R., Louisville, Ky., and W. E. Cain, Jeffersonville, Ind., assignors to Logan Co., Inc., Louisville, Ky. Automatic conveying apparatus. 1,900,603; Mar. 7.
Gottlieb, Joseph, Jersey City, N. J. Combined clock case and lamp or similar article. Des. 89,397; Mar. 7.
Gottstein, Lewis, assignor of one-half to Carson Pirie Scott & Company, Chicago, Ill. Display stand. 1,899,954; Mar. 7.
Gould Storage Battery Corporation. (See Snyder, Almond H., assignor.)
Goulds Pumps, Incorporated. (See Pomeroy, William D., assignor.)
Graham, William S. (See Benjamin, B. R., and Graham.)
Grant, Albert E., New York, and S. W. Vanderbeek, Manhasset, N. Y. Thermostat switch. 1,899,955; Mar. 7.
Graubner, Herman G. (See Jones, H. W., and Graubner.)
Graves, George D., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Anti-freeze composition. 1,900,014; Mar. 7.
Gray, Max, Minneapolis, Minn. Hanger for fur. 1,900,550; Mar. 7.
Greenawalt, John E., New York, N. Y. Copling sintered material. 1,900,234; Mar. 7.
Greenley, Jay H., Buffalo, N. Y. Speed and time recorder. 1,899,956; Mar. 7.
Greider, Harold W., Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company. Magnesium carbonate and manufacturing process thereof. 1,900,235; Mar. 7.
Grether, Ernest F., assignor to The Dow Chemical Company, Midland, Mich. Acyl derivatives of 4,4'-diamino diphenyl oxide. 1,900,442; Mar. 7.
Griffith, Charles A., Knoxville, Tenn. Drop bottom car. 1,900,056; Mar. 7.
Grigsby-Grunow Company. (See Haimbaugh, Raymond C., assignor.)
Grigsby-Grunow Company. (See Lewis, Robert O., assignor.)
Grondahl, Lars O., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for the control of train brakes. 1,900,403; Mar. 7.
Grondahl, Lars O., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for the control of vehicle brakes. 1,900,404; Mar. 7.
Grondahl, Lars O., and A. J. Sorensen, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,900,407; Mar. 7.
Grondahl, Lars O., and A. J. Sorensen, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,900,411; Mar. 7.
Grosskinsky, Otto. (See Schmidt, O., Treppenhauer, Grosskinsky, and Fischer.)
Grulich, Anton, Glen Ridge, N. J. Textile fabric or the like. Des. 89,398; Mar. 7.
Gubelmann, Ivan, South Milwaukee, and W. L. Rintelman, Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Preparing anthraquinone sulphonic acids. 1,899,957; Mar. 7.
Gubelmann, William S., Buffalo, N. Y. Calculating machine. 1,900,103; Mar. 7.
Gunnison, Raymond M., Scarsdale, N. Y. Book. 1,899,958; Mar. 7.
Gustafson, Andrew F., Clarinda, Iowa. Stock watering apparatus. 1,900,604; Mar. 7.
Guth, Edwin F., Webster Groves, Mo. Lighting unit for reflected illumination. 1,900,551; Mar. 7.
Guth, Edwin F., Webster Groves, Mo. Lighting fixture. 1,900,552; Mar. 7.
Haase, Richard, assignor to Brunsviga-Maschinenwerke Grimme, Natalis & Co., Aktiengesellschaft, Brunswick, Germany. Carrying mechanism for calculating machines and the like. 1,900,808; Mar. 7.
Hageman, Aaron M., Bloomfield, and A. F. Lindstrom, Nutley, N. J., assignors to Westinghouse Lamp Company. Method and apparatus for coating the interior wall of hollow bodies. 1,900,104; Mar. 7.
Haimbaugh, Raymond C., assignor to Grigsby-Grunow Company, Chicago, Ill. Refrigeration apparatus. 1,900,644; Mar. 7.
Halbach, Paul, Remscheid, assignor to the Firm Bergische Stahl-Industrie, Dusseldorf-Oberkassel, Germany. Mechanical brake for railway motor cars. 1,900,282; Mar. 7.

Hale, Reuben B., San Francisco, Calif. Lighting fixture. 1,900,380; Mar. 7.
Hall, Arthur, Oak Park, assignor to Yaxley Manufacturing Company, Chicago, Ill. Electric switch. 1,900,236; Mar. 7.
Hall, W. F., et al. (See Pippin, John W., assignor.)
Halle, Hiram J., New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating hydrocarbons. 1,900,105; Mar. 7.
Hamant, Edward W. (See von Webern, G., and Hamant.)
Hamilton, Harold S., White Plains, N. Y., and G. Crisson, East Orange, N. J., assignors to American Telephone and Telegraph Company. Bridging connection for program circuits. 1,900,106; Mar. 7.
Hammerly, Fred V., assignor of one-half to C. B. Abbott and one-half to G. A. Hammerly, Berkeley, Calif. Sewage purification system. 1,900,809; Mar. 7.
Hammerly, Georgia A., et al. (See Hammerly, Fred V., assignor.)
Hammond, John H., jr., Gloucester, Mass. Selective radio reception. 1,900,283; Mar. 7.
Hampton, George E., Pittsburgh, Pa., assignor to The Syntron Company. Portable motor driven saw. 1,900,553; Mar. 7.
Handler, Harris L., Vallejo, Calif. Cushion pad for shoe counters. 1,900,107; Mar. 7.
Hannoversche Maschinenbau-Actien-Gesellschaft vormals Georg Egestorff Hanomag. (See Schargorodsky, Lazar, assignor.)
Hansen, Hans P., Syracuse, N. Y. Mortuary record container. 1,900,708; Mar. 7.
Hansen, Mahlin S., assignor to P. C. Reilly, Indianapolis, Ind. Froth-flotation process for slime-containing ore pulps. 1,900,850; Mar. 7.
Hansen, Waldemar C., Westfield, N. J., assignor to American Cyanamid Company, New York, N. Y. System for producing gypsum. 1,900,381; Mar. 7.
Hauson, Walter M., assignor to American Seating Company, Grand Rapids, Mich. Drawer construction. 1,900,338; Mar. 7.
Happ, Willard C., assignor to The Studebaker Corporation, South Bend, Ind. Abrasive disk. 1,899,959; Mar. 7.
Harding, Howard V. (See Weidhaas, G. A., (Clark, and Harding, assignors.)
Hargroves, Willis W., Portsmouth, Va. Basket cover fastener. 1,900,810; Mar. 7.
Harnsberger, Audley E., assignor to The Pure Oil Company, Chicago, Ill. Treating an oil-gas. 1,900,057; Mar. 7.
Harrell, Billington C., San Antonio, Tex. Firefly. 1,900,339; Mar. 7.
Harris, Cleo, assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio. Grease gun casing. Des. 89,399; Mar. 7.
Harris-Seybold-Potter Company. (See Pritchard, Carl G., assignor.)
Harshberger, Norman P., Chicago, Ill., assignor to Bakelite Building Products Co. Inc., New York, N. Y. Roofing material. 1,900,861; Mar. 7.
Harshman, Vern S., Detroit, Mich. Dental cement and making dental cement. 1,900,237; Mar. 7.
Harstick, William H., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Power plant. 1,900,058; Mar. 7.
Hart & Hutchinson Company, The. (See Hart, T. S., and Bush, assignors.)
Hart Glass Manufacturing Company. (See McDonald, Harry R., assignor.)
Hart, Theodore S., New Britain, and P. M. Bush, Bloomfield, assignors to The Hart & Hutchinson Company, New Britain, Conn. Combined radiator and humidifier. 1,900,554; Mar. 7.
Harter, Isaac, New York, N. Y., assignor to The Fuller Lehigh Company, Fullerton, Pa. Furnace wall. 1,900,443; Mar. 7.
Hartford-Empire Company. (See Mulholland, Vergil, assignor.)
Hartford-Empire Company. (See Mulholland, V., and Hunter, assignors.)
Hartmann, Paul E., Hillside Township, Union County, assignor to J. E. Mergott Company, Newark, N. J. Hand bag. 1,899,960; Mar. 7.
Hartsborn, Joseph, Fort Des Moines, Iowa. Animal trap. 1,900,645; Mar. 7.
Harvey, James W., Winthrop, Me. Motor boat installation. 1,900,180; Mar. 7.
Harvey, Leo M., Los Angeles, Calif. Flat band tying machine. 1,900,238; Mar. 7.
Hayes, Harvey C., Washington, D. C. Method and apparatus for sound ranging. 1,900,015; Mar. 7.
Hayne, C. C., et al. (See Hayne, Ernest S., assignor.)
Hayne, Ernest S., assignor of one-third to J. T. Large and one-third to C. C. Hayne, Birmingham, Ala. Draft regulator. 1,900,340; Mar. 7.
Hayter, Bernie S., Waco, Tex. Changeable exhibitor. 1,900,059; Mar. 7.
Hazel-Atlas Glass Company. (See Smith, Frasier, assignor.)
Haseley, Edward. (See Hegan, H. J., and Hazeley.)
Heat Treating Company. (See Laird, Wilbur G., assignor.)
Hechenbleikner, Ingenuin, assignor to Chemical Construction Corporation, Charlotte, N. C. Manufacturing SO_2 gas. 1,900,239; Mar. 7.

Hedeen, Arthur, J. G. Hollfer, and V. S. Landess, assignors to Barry Cerf, Portland, Oreg., trustee. Coaster wagon. 1,900,108; Mar. 7.
Hegan, Horace J., and E. Hazeley, Coventry, assignors to Courtaulds Limited, London, England. Production of artificial threads and the like from viscose and in apparatus therefor. 1,900,811; Mar. 7.
Heinke, Alfred J., Towaco, N. J., assignors to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 89,400; Mar. 7.
Heinrich, Walter A., St. Louis, Mo. Earth anchor. 1,900,498; Mar. 7.
Heisler, Charles L., Schenectady, N. Y., assignor to General Electric Company. Combined motion picture-sound reproducer. 1,900,555; Mar. 7.
Hellman, Carl B., assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,401; Mar. 7.
Hemmingsen, Trokild V., Copenhagen, Denmark. Controlling pistons of internal combustion engines. 1,900,605; Mar. 7.
Hempy-Cooper Manufacturing Company. (See Mattern, Herman T., assignor.)
Henderson, James E., Lee, England. Gyroscopic navigational instrument. 1,900,709; Mar. 7.
Hendry, William F., Ossining, N. Y., assignor, by mesne assignments, to Manhattan Electrical Supply Company, Inc., Jersey City, N. J. High intensity gaseous discharge tube. 1,900,109; Mar. 7.
Henke, Clyde O., South Milwaukee, Wis., assignor, by mesne assignments, to Newport Industries, Inc. Hydrogenated rosin product. 1,899,961; Mar. 7.
Henkensiefken, Clara G., et al. (See Henkensiefken, John A., assignor.)
Henkensiefken, Frederick, et al. (See Henkensiefken, John A., assignor.)
Henkensiefken, Frieda, et al. (See Henkensiefken, John A., assignor.)
Henkensiefken, John A., assignor of one-fourth to C. G. Henkensiefken, one-fourth to F. Henkensiefken, and one-fourth to F. Henkensiefken, Philadelphia, Pa. House or building construction. 1,900,812; Mar. 7.
Henry, Skelton D., Houston, Tex. Protecting earthen dams, river levees, etc. 1,900,341; Mar. 7.
Hershey, Harry E., Oak Park, assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Selective signaling system. 1,900,499; Mar. 7.
Herthel, Eugene C., Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbons. 1,900,110; Mar. 7.
Hertner Electric Company. (See Hertner, John H., assignor.)
Hertner, John H., Lakewood, assignor to The Hertner Electric Company, Cleveland, Ohio. Insulator. 1,900,710; Mar. 7.
Herzmark, Nicolas, Paris, France. Air compressor. 1,900,284; Mar. 7.
Hess, Julius H., Chicago, Ill. Infant incubator. 1,900,342; Mar. 7.
Heuer, Josef, Grune, Germany. Traffic signal apparatus. 1,900,060; Mar. 7.
Heuser, Herman, Evanston, Ill. Preserved egg and making same. 1,900,444; Mar. 7.
Hickman, Kenneth C. D., assignor to Eastman Kodak Company, Rochester, N. Y. Non-halation motion picture film. 1,900,877; Mar. 7.
Hickman, Kenneth C. D., assignor to Eastman Kodak Company, Rochester, N. Y. Automatic silver recovery control. 1,900,893; Mar. 7.
Hicks, Chester W., Hampton, Va. Sound amplifier. 1,900,111; Mar. 7.
Higginbotham, Luther J., Dallas, Tex. Illuminated changeable display device and producing the same. 1,899,962; Mar. 7.
Hile, Leslie M., Benton Harbor, Mich. Basket handle machine. 1,900,181; Mar. 7.
Hile, Leslie M., Benton Harbor, Mich. Making a downwardly tapered container. 1,900,646; Mar. 7.
Hile, Leslie M., Benton Harbor, Mich. Machine for making and inserting basket handles. 1,900,712; Mar. 7.
Hill, Earl Vernon, Chicago, Ill., assignor to E. Vernon Hill Company. Psychrometer. 1,900,813; Mar. 7.
Hills-McCanna Company. (See Buenger, Clarence O., assignor.)
Hills-McCanna Company. (See Noyes, Albert H., assignor.)
Hinckelmann, Werner, Philadelphia, Pa. Adjustable arc. 1,900,500; Mar. 7.
Hineline, Edson S. (See Petit, W. H., and Hineline.)
Hines, Claude M., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 1,900,713; Mar. 7.
Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Roll for molten glass and cooling the same. 1,900,556; Mar. 7.
Hoern, Joseph H., Saginaw, Mich., assignor to Wilcox-Rich Corporation. Grinding machine. 1,900,112; Mar. 7.
Hoffman, Martin. (See Maul, P. J., and Hoffman.)
Hoffmann, Wilhelm. (See Rietz, E. and Hoffmann.)
Hogan, John G. (See Radley, Alton A., jr., assignor.)
Holcombe, George A., San Diego, Calif. Exhibiting apparatus. 1,900,557; Mar. 7.

Hollifer, John G. (See Hedeen, A., Hollifer, and Landess.)
Holley, Walter P., Montgomery, Ala. Storage bag. 1,900,814; Mar. 7.
Holzwarth Gas Turbine Co. (See Holzwarth, Hans, assignor.)
Holzwarth, Hans, Dusseldorf, Germany, assignor to Holzwarth Gas Turbine Co., San Francisco, Calif. Explosion turbine plant for ships. 1,899,963; Mar. 7.
Holzwarth, Hans, Dusseldorf, Germany, assignor to Holzwarth Gas Turbine Co., San Francisco, Calif. Nozzle channel construction for explosion turbines. 1,900,558; Mar. 7.
Holzwarth, Hans, Dusseldorf, Germany, assignor to Holzwarth Gas Turbine Co., San Francisco, Calif. Explosion turbine. 1,900,815; Mar. 7.
Hoody, George J. (See Erickson, E., and Hoody.)
Hookless Fastener Company. (See Craig, William D., assignor.)
Hoopes, Ernest A., Des Moines, Iowa. Electric switch. 1,900,647; Mar. 7.
Hoover Company, The. (See Ballou, Harry R., assignor.)
Hoover Company, The. (See Becker Bernard C., assignor.)
Hoover Company, The. (See Kitto, William H., assignor.)
Hoover Company, The. (See Sellers, William D., assignor.)
Hoover Company, The. (See Smellie, Donald G., assignor.)
Hopkins, Roy S., assignor to Eastman Kodak Company, Rochester, N. Y. Document photographing apparatus. 1,900,878; Mar. 7.
Horner, Clyde H., Palmyra, N. J. Powder box. Des. 89,425; Mar. 7.
Horney, Fred. (See Lysholm, A., Horney, and Wahlsten.)
Horowitz, Max. (See Koretzky, H., Horowitz, and Desimone.)
Howard, Bloomfield H., Washington, D. C. Feeder for ingot molds. 1,900,816; Mar. 7.
Howard, Edward, Elgin, assignor, by mesne assignments, to Elgin National Watch Comany, Chicago, Ill. Watch. 1,900,343; Mar. 7.
Howard, James E., Jeffersonville, Ind. Sheet metal vessel construction. 1,900,711; Mar. 7.
Howard, William R., Washington, D. C., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 1,900,113; Mar. 7.
Huber, W. I., Inc. (See Huber, Ward I., assignor.)
Huber, W. I., Inc. (See Huber, W. I., and Close, assignors.)
Huber, Ward I., assignor to W. I. Huber, Inc., Cleveland, Ohio. Sphygmomanometer. 1,900 285; Mar. 7.
Huber, Ward I., and L. B. Close, assignors to W. I. Huber, Inc., Cleveland, Ohio. Sphygmomanometer. 1,900,286; Mar. 7.
Huff, Wilbert J. (See Lusby, Oscar W., assignor.)
Hughes, Edward P., assignor of sixty per cent to W. A. Wood, Detroit, Mich. Liquid level gauge. 1,900,851; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender and head lamp casing for vehicles. Des. 89,426; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender, head lamp casing, parking lamp casing, and horn casing. Des. 89,427; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender, head lamp casing, and combined parking lamp and horn casing. Des. 89,428; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender, head lamp, parking lamp, and horn casing, Des. 89,429; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender, head lamp casing, parking lamp casing, and horn casing. Des. 89,430; Mar. 7.
Hughes, James R., South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Combined fender, head lamp casing, and parking lamp casing. Des. 89,431; Mar. 7.
Hughes, James R., assignor to The Studebaker Corporation, South Bend, Ind. Head lamp lens. 1,899,964; Mar. 7.
Hull, Albert W., Schenectady, N. Y., assignor to General Electric Company. Electron discharge device. 1,900,559; Mar. 7.
Humason, Granville A., and W. A. Raymond, Houston, Tex. Tubing head. 1,900,714; Mar. 7.
Hund, Frans, Cleveland, Ohio. Advertising device. 1,900,061; Mar. 7.
Hunt, Edward M., Montclair, and E. L. Fonseca, assignors to The Wilcolator Company, Newark, N. J. Air conditioning apparatus. 1,900,501; Mar. 7.
Hunter, Alfred R. (See Mulholland, V., and Hunter.)
Hydraulic Press Manufacturing Company, The. (See Ernst, Walter, assignor.)
Hyslop, Joseph F., Falkirk, Scotland. Checker brickwork construction for regenerators. 1,900,817; Mar. 7.
I. G. Farbenindustrie Aktiengesellschaft. (See Baehr, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Finkelstein, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pohl, Franz, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Schmidt, O., Treppenhauer, Grosskinsky, and Fischer, assignors.)
Industrial Development Corporation. (See Wilkins, Richard A., assignor.)
Ingersoll-Rand Company. (See Kirgan, John, assignor.)
Insulite Company, The. (See Ellis, George H., assignor.)
International Harvester Company. (See Benjamin, B. R., and Cady, assignors.)
International Harvester Company. (See Benjamin, B. R., and Graham, assignors.)
International Harvester Company. (See Cady, Sherman W., assignor.)
International Harvester Company. (See Walker, E. C., and Engstrom, assignors.)
International Nickel Company, Inc., The. (See Merica, P. D., Vanick, and Wickenden, assignors.)
International Patents Development Company. (See Giesecke, Fred O., assignor.)
Irgens, Finn T., Wauwatosa, assignor to Outboard Motors Corporation, Milwaukee, Wis. Ignition timer breaker mechanism, 1,899,965; Mar. 7.
Ishidate, Morizo. (See Tamura, K., Kihara, Asahina, and Ishidate.)
Isley, George H., and G. A. Merkt, assignors to Morgan Construction Company, Worcester, Mass. Furnace construction and operation. 1,900,396; Mar. 7.
Isley, George H., assignor to Morgan Construction Company, Worcester, Mass. Operation of regenerative furnaces. 1,900,397; Mar. 7.
Iversen, Lorenz, assignor to Mesta Machine Company, Pittsburgh, Pa. Roll mounting. 1,900,344; Mar. 7.
Izbicki, Adolph, Cambridge, Mass. Rotary pump. 1,900,416; Mar. 7.
Jackson, Daniel D., Brooklyn, N. Y., assignor to Remington Arms Company. Metallic Alloy. 1,900,182; Mar. 7.
Jackson, James P., Chicago, Ill., assignor to Addressograph Company, Wilmington, Del. Printing device. 1,900,845; Mar. 7.
Jacobsen Manufacturing Co. (See Krenzke, William F., assignor.)
Jacobson, David L., Pittsburgh, Pa., assignor to The Koppers Company of Delaware. Removal of hydrogen sulphide from gases. 1,900,398; Mar. 7.
Jacobus, David S., Montclair, and H. J. Kerr, Westfield, N. J., assignors, by mesne assignments, to Fuller Lehigh Company. Water cooled furnace wall. 1,900,445; Mar. 7.
Jaeger, Alphons O., Crafton, assignor, by mesne assignments, to The Selden Research and Engineering Corporation, Pittsburgh, Pa. Carrying out exothermic catalytic vapor phase reactions. 1,900,715; Mar. 7.
Jaeger, Alphons O., Crafton, assignor to The Selden Company, Pittsburgh, Pa. Catalytic apparatus. 1,900,382; Mar. 7.
Jaeger, Alphons O., Crafton, assignor to The Selden Company, Pittsburgh, Pa. Catalytic side chain oxidation of aromatic compounds. 1,900,648; Mar. 7.
Jaeger, Alphons O., Mount Lebanon, assignor to The Selden Company, Pittsburgh, Pa. Contact sulphuric acid process. 1,900,383; Mar. 7.
Jaeger, Alphons O., Mount Lebanon, assignor to The Selden Company, Pittsburgh, Pa. Purification of crude dicarboxylic acids. 1,900,649; Mar. 7.
Jäger, Franz, Suhl, Germany. Repeating firearm with bolt action and case magazine. 1,900,818; Mar. 7.
Janer, Andre, Flushing, assignor to The A. J. & K. Company, Incorporated, New York, N. Y. Anchoring means. 1,900,560; Mar. 7.
Jarvis, Frank W. (See Jarvis, Walter D., assignor.)
Jarvis, Walter D., assignor of one-half to F. W. Jarvis, Pittsburgh, Pa. Roof and floor structure. 1,900,346; Mar. 7.
Jeffrey Manufacturing Company, The. (See Bakstad, Johan R., assignor.)
Jenkins, Charles F., assignor to Jenkins Laboratories, Washington, D. C. Resistor cell circuit. Re18,756; Mar. 7.
Jenkins Laboratories. (See Jenkins, Charles F., assignor.)
Jennings, Willis A., Chicago, Ill. Soap dispenser. 1,900,819; Mar. 7.
Jensen, Paul E. G., Grantwood, N. J., assignor to Radio Corporation of America. Sound pick-up device. 1,899,966; Mar. 7.
Johnson, Erling, assignor to the Firm Odda Smelt Werk A/S. Odda, Norway. Producing alumina and phosphorus or phosphoric acid. 1,900,287; Mar. 7.
Johnstone, Robert McC., Short Hills, N. J., assignor to Cameron Machine Company, Brooklyn, N. Y. Slitting device. 1,900,183; Mar. 7.
Jones, Emory E., assignor to Winding Gulf Collieries, Bluefield, W. Va. Coal briquetting equipment. 1,900,347; Mar. 7.
Jones, Frank A., University City, Mo., assignor to Shell Petroleum Corporation. Vehicle trailer tank. 1,900,114; Mar. 7.
Jones, Harrie, et. al. (See Oster, C. B., and Rainey, assignors.)
Jones, Homer W., Williamsville, N. Y., and H. G. Graubner, Lakewood, Ohio, assignors to National Carbon Company, Inc. Flashlight. 1,900,348; Mar. 7.
Jones, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Light tight photographic film cartridge. 1,900,879; Mar. 7.

Jordhoy, Hans C., North Plainfield, N. J., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Folding cylinder. 1,900,288; Mar. 7.
Joy Bros., Inc. (See Joy, Joseph F., assignor.)
Joy, Joseph F., assignor to Joy Bros., Inc., Marion, Ohio. Device for breaking down coal. 1,900,446; Mar. 7.
Jnergens, Gustav H., St. Louis, Mo., assignor to Mississippi Glass Company, New York, N. Y. Wire glass manufacture. 1,900,716; Mar. 7.
Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Conduit connection. 1,900,561; Mar. 7.
Junkers, Hugo, Dessau, Germany. Aircraft. 1,900,502; Mar. 7.
Kahr, Martin, assignor to Franklin Valveless Engine Company, Franklin, Pa. Power plant for drilling apparatus. 1,900,384; Mar. 7.
Kahr, Martin, assignor to Franklin Valveless engine Company, Franklin, Pa. Fuel feeding means. 1,900,385; Mar. 7.
Kane, James M., Berkeley, Calif. Signaling system. 1,900,016; Mar. 7.
Kane, Thomas A., McMinnville, Oreg. Direction signal. 1,900,240; Mar. 7.
Kanolt, Clarence W., New York, N. Y. Depthograph camera stand. 1,900,562; Mar. 7.
Kanolt, Clarence W., New York, N. Y. Depthograph plate holder. 1,900,566; Mar. 7.
Kantor, James, assignor to The Liquid Carbonic Corporation, Chicago, Ill. Filler valve for bottle fillers. 1,900,447; Mar. 7.
Keller, Henry C., Syracuse, N. Y., and M. Van Billiard, Philadelphia, Pa., assignors to The Lamson Company, Syracuse, N. Y. Conveyer. 1,900,563; Mar. 7.
Kelly, Joseph E., and J. A. Arasim, Scranton, Pa. Lost motion mechanical linkage. 1,900,289; Mar. 7.
Kemp, Irving, assignor, by mesne assignments, to Kemp Lock, Inc., New York, N. Y. Lock. 1,900,503; Mar. 7.
Kemp Lock Inc. (See Kemp, Irving, assignor.)
Kendrick, Carrol C. (See Lewis, George K., assignor.)
Kennedy, Krafton S., Dayton, Ohio. Apparatus for disconnecting threaded members. 1,900,017; Mar. 7.
Kenyon, Melville G., and M. H. Kluter, assignors to The F. & N. Lawn Mower Company, Richmond, Ind. Shipping containers. 1,900,820; Mar. 7.
Kerr, Howard J. (See Jacobus, D. S., and Kerr.)
Keuffel & Esser Co. (See Kraft, Eugene W., assignor.)
Kiessling, Max, Waterbury, Conn. Slide fastener tape. 1,900,564; Mar. 7.
Kihara, Gyokujo. (See Tamura, K., Kihara, Asahina, and Ishidate.)
Kilbourne, Kenneth A., Elizabeth, N. J., assignor to American Cyanamid Company, New York, N. Y. Cyanide applicator. 1,900,717; Mar. 7.
King, Harold A., Birmingham, Mich. Automobile accessory. 1,900,448; Mar. 7.
Kipper, Ewald, Brackwede, Germany. Medicine package. 1,900,606; Mar. 7.
Kircher, Ralph N., assignor to West Bend Aluminum Company, West Bend, Wis. Cooking utensil handle. 1,900,565; Mar. 7.
Kirgan, John, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Condensing apparatus. 1,900,504; Mar. 7.
Kitto, William H., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,887; Mar. 7.
Kitto, William H., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,888; Mar. 7.
Kliesrath, Victor W. (See Bragg, C. S., and Kliesrath.)
Kline, Joseph E., Alpena, Mich. Oil filter and cooler. 1,900,821; Mar. 7.
Klingbeil, Walter G., Portland, Oreg. Thermostatic mixing valve. 1,900,349; Mar. 7.
Kluter, Marlowe H. (See Kenyon, M. G., and Kluter.)
Knight, Donald B., Brooklyn, assignor to Electrolux Servel Corporation, New York, N. Y. Absorption refrigerating apparatus. 1,900,650; Mar. 7.
Koch, Victor. (See Schutzniedrig, Ewald, assignor.)
Koenig, Lloyd R., Webster Groves, and F. B. Wolf, Clayton, Mo. Mask. 1,900,651; Mar. 7.
Kohr, Robert F., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,899,967; Mar. 7.
König, Albert, assignor to Firm Carl Zeiss, Jena, Germany. Reversing prism system affording parallel vision. 1,900,241; Mar. 7.
Konishi, Koji. (See Owada, Tokujiro, assignor.)
Koppers Company of Delaware, The. (See Becker, Joseph, assignor.)
Koppers Company of Delaware, The. (See Jacobson, David L., assignor.)
Koretzky, Harry, Jersey City, N. J., M. Horowitz, Brooklyn, N. Y., and A. J. Desimone, Lyndhurst, assignors to Bright Star Battery Company, Hoboken, N. J. Flash light. 1,900,505; Mar. 7.
Kraft, Eugene W., Chicago, Ill., assignor to Keuffel & Esser Co., Hoboken, N. J. Stadia transit. 1,900,567; Mar. 7.
Kramer, Eric B., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md. Process and apparatus for manufacture of screw caps. 1,900,880; Mar. 7.
Kramer, Eric B., assignor to Crown Cork & Seal Company, Baltimore, Md. Screw cap. 1,900,881; Mar. 7.
Krantz, Joseph A., assignor to The Reeves Manufacturing Company, Dover, Ohio. Stovepipe. 1,900,750; Mar. 7.
Kränzlein, Georg, and P. Ochwat, Frankfort-on-the-Main-Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the anthracene series. 1,900,350; Mar. 7.
Kremmling, Aribert, Hamersleben, near Oschersleben, Germany. Machine for feeding plastic material such as dough through dies or like apertures. 1,900,607; Mar. 7.
Krenzke, William F., assignor to Jacobsen Manufacturing Co., Racine, Wis. Power mower. 1,900,062; Mar. 7.
Krollpfeiffer, Friedrich, Marburg-on-the-Lahn, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Pharmaceutical preparation. 1,900,449; Mar. 7.
Krug, Harold F., Grosse Pointe Park, Mich. Pneumatic tube. 1,900,568; Mar. 7.
Kudo, Haroid, Dubuque, Iowa. Doughnut pan. 1,900,290; Mar. 7.
Kühner, Otto, Goppingen, Germany. Sheet metal drawing press. 1,900,291; Mar. 7.
Kumler, Ralph W., Wilmington, Del. Destructively distilling black liquor. 1,900,506; Mar. 7.
Kupferhütte Ertel, Bieber & Co., Firm, et al. (See Behrens, Hans C. A., assignor.)
Kuppersmith, Fred W., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill. Jig and fixture lock. 1,900,852; Mar. 7.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,899,968; Mar. 7.
Kurtz, Stewart S., jr., Merion, assignor to The Atlantic Refining Company, Philadelphia, Pa. Refining hydrocarbon oil. 1,899,969; Mar. 7.
Kuzmick, Joseph N., assignor of one-half to The Manhattan Rubber Manufacturing Division of Raybestos-Manhattan, Inc., Passaic, N. J., and one-half to J. S. Stokes, Spring Valley Farms, Pa. Abrasive product and making the same. 1,900,386; Mar. 7.
Labinc, Roland A., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Applying covering material to tire patches. 1,900,450; Mar. 7.
Lacy, Rollo G. (See Simning, Roy B., assignor.)
Laird, Wilbur G., assignor to Heat Treating Company, New York, N. Y. Refining oils. 1,900,862; Mar. 7.
Lakehurst, Albert, Brooklyn, N. Y., assignor to Lakewood Comet Aero Advertising Company, Lakewood, N. J. Parachute projecting device for airplanes. 1,900,399; Mar. 7.
Lakewood Comet Aero Advertising Company. (See Lakehurst, Albert, assignor.)
La Lux Manufacturing Company. (See Underwood, Western, assignor.)
Lambert, Charles F., Grosse Pointe Farms, assignor to Clayton and Lambert Manufacturing Company, Detroit, Mich. Spare wheel and tire cover assembly. 1,900,822; Mar. 7.
Lamson Company, The. (See Keller, H. C., and Van Billiard, assignors.)
Lamson Company, The. (See Taylor, W. J., and Cutting, assignors.)
Lancaster Iron Works. (See Walker, Charles E., assignor.)
Land, Charles H., Grosse Pointe, and W. H. Wilson, Detroit, Mich. Fifth wheel for connecting tractors to different types of trailers. 1,900,115; Mar. 7.
Landess, Victor S. (See Hedeen, A., Holifer, and Landess.)
Lang, Albion S., Roslindale, Mass. Combined carrying case and holder for musical instruments. 1,900,718; Mar. 7.
Lang, Arno, Treuenbritzen, assignor to the Firm Dr. Martin Böhme, Berlin, Germany. Differential pressure gauge for measuring flow of fluids in conduits. 1,900,823; Mar. 7.
Lansing, Raymond P., Montclair, assignor to Eclipse Aviation Corporation, East Orange, N. J. Engine starting mechanism. 1,900,063; Mar. 7.
La Pierre, Camille. (See Brien, Joseph R., assignor.)
Large, John T., et al. (See Hayne, Ernest S., assignor.)
Larsen, Martin I., Chicago, Ill. Water heater. 1,900,451; Mar. 7.
Laska, Leopold, and A. Zitscher, Offenbach-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. New azodyestuffs. 1,900,351; Mar. 7.
Latou, William L., assignor of two-fifths to W. M. Floyd, Toronto, Ontario, Canada. Locking mechanism for handcuffs. 1,900,242; Mar. 7.
Layer, Frank C., Algonquin, Ill. Brick hacking apparatus. 1,900,243; Mar. 7.
Ledeen, Hyman, Los Angeles, Calif., assignor to The Falk Corporation, Milwaukee, Wis. Driving means for oil well equipment. 1,900,452; Mar. 7.
Lederer, Herbert H., Cleveland, Ohio. Apparatus for handling merchandise. 1,900,569; Mar. 7.
Leece, Bennett M., Cleveland, and D. S. Cole, Cleveland Heights, assignors to The Leece-Neville Company, Cleveland, Ohio. Generator regulation. 1,900,719; Mar. 7.
Leece-Neville Company. (See Leece, B. M., and Cole.)
Leemann, Walter. (See Coradi, O., and Leemann.)
Lehmann, Erich. (See Marx, K., and Lehmann.)

Leib, August, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Direction finder apparatus. 1,900,222; Mar. 7.
Leiman Bros. Inc. (See Leiman, George W., assignor.)
Leiman Bros. Inc. (See Leiman, Gustave, assignor.)
Leiman, George W., assignor to Leiman Bros. Inc., Newark, N. J. Liquid feeding device. 1,900,571; Mar. 7.
Leiman, Gustave, New York, N. Y., assignor to Leiman Bros. Inc., Newark, N. J. Furnace. 1,900,570; Mar. 7.
Leitz, Ernst, Optische Werke G. m. b. H. (See Berek, Max, assignor.)
Lenk, Wilhelm. (See Bochmann, O., and Lenk.)
Leopold, George O. (See Fegley, T. J., and Leopold.)
Lester, Nathan, assignor to P. & B. Tool Company, Worcester, Mass. Die casting machine. 1,900,863; Mar. 7.
Lester, Roy A., El Paso, Tex. Trigger mechanism. 1,900,606; Mar. 7.
Levitt, Abe, et al. (See Cooperstein, I. and A., and Levitt.)
Lewers, William W., Flint, Mich., and G. L. Schwartz, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulose ether composition. 1,900,507; Mar. 7.
Lewis, Arthur J., Stratford, assignor to The Baird Machine Company, Bridgeport, Conn. Chucking machine. 1,900,387; Mar. 7.
Lewis, Florence N., New York, N. Y. Fitted traveling bag. 1,900,508; Mar. 7.
Lewis, George K., assignor to C. C. Kendrick, Chicago, Ill. Molding construction for composite panels. 1,900,824; Mar. 7.
Lewis, Robert O., assignor to Grigsby-Grunow Company, Chicago, Ill. Condenser and making the same. 1,900,352; Mar. 7.
Liberman, Alexander I., Paris, France. Photographic developing apparatus. 1,900,825; Mar. 7.
Liftschiffbau Zeppelin Gesellschaft mit beschrankter Haftung. (See Strobl, Hans, assignor.)
Lilienfeld, Julius E., Brooklyn, N. Y. Device for controlling electric current. 1,900,018; Mar. 7.
Lindemann, Frederick W., St. Paul, assignor to The Unipress Company, Incorporated, Minneapolis, Minn. Buck structure for laundry presses. 1,900,720; Mar. 7.
Lindsay, John C., Brooklyn, N. Y. Clothes hanger. 1,900,826; Mar. 7.
Lindstrom, Albert F. (See Hageman, A. M., and Lindstrom.)
Line Material Company. (See Chartrand, John B., assignor.)
Linville, Clarence P. (See Berry, G. A., Linville, and Beardsley.)
Liptak, Michael, St. Paul, Minn. Mud drum seal. 1,900,019; Mar. 7.
Liquid Carbonic Corporation. (See Kantor, James, assignor.)
Lloyd, Harold B., Sioux City, Iowa. Nonsubstituting container. Re18,759; Mar. 7.
Löflund, Fritz. (See Büsdorf, J., and Löflund.)
Logan Co. (See Goddhardt, H. R., and Cain, assignors.)
Logan, Joseph A., assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Liquid dispensing apparatus. 1,900,652; Mar. 7.
Logwood, Charles V., Providence, R. I., assignor to Radio Corporation of America, New York, N. Y. Increasing the selectivity of tuned radio frequency systems. 1,900,293; Mar. 7.
Long, George A., assignor to the Long Security Lock Company, Hartford, Conn. Lock. 1,900,185; Mar. 7.
Long Security Lock Company. (See Long, George A., assignor.)
Loomis, Crawford C., Ilion, N. Y., assignor to Remington Arms Company, Inc. Firearm. 1,900,184; Mar. 7.
Loomis, Nathaniel E., Westfield, and A. H. Tomlinson, Elizabeth, N. J., assignors to Standard Oil Development Company. Process and apparatus for cracking oil. 1,900,116; Mar. 7.
Loria, Francesco, Rome, Italy. Sundial. 1,900,117; Mar. 7.
Louder, Earl A., Greenville, Ill., assignor to Pet Milk Company, St. Louis, Mo. Sterilization of liquids. 1,900,509; Mar. 7.
Lovatt, George N., Holliston, Mass. Waxed paper and making the same. 1,900,294; Mar. 7.
Love, Josie. (See Love, William F., assignor.)
Love, William F., assignor to Josie Love, Trenton, Fla. Dibble. 1,900,827; Mar. 7.
Lovell, James W. (See Craig, Frank E., assignor.)
Low, John W., Mill Valley, Calif. Box making machine. 1,900,892; Mar. 7.
Lowe, Russell E., New York, N. B. Brown, St. Albans, and W. Bjorkstedt, Jamaica, assignors to Doherty Research Company, New York, N. Y. Refractory porous diaphragm. 1,900,864; Mar. 7.
Lowrey, George, et al. (See Pippin, John W., assignor.)
Lubin, Harry, South Orange, N. J. Box. 1,900,828; Mar. 7.
Ludowici-Celadon Company. (See Mooney, Thomas F., assignor.)
Luftschiffbau Zeppelin Gesellschaf mit beschränkter Haftung. (See Strobl, Hans., assignor.)
Luplow, Ronald C., Seligman, Ariz. Humidifier. 1,900,453; Mar. 7.
Lusby, Oscar W., Baltimore, Md. Catalysts for the production of oxygenated organic compounds. 1,900,829; Mar. 7.
Lusby, Oscar W., assignor to W. J. Huff, Baltimore, Md. Catalysts for the removal of organic sulphur compounds from gases. 1,900,882; Mar. 7.
Lusby, Oscar W., assignor to W. J. Huff, Baltimore, Md. Purifying gas. 1,900,883; Mar. 7.
Lusby, Oscar W., assignor to W. J. Huff, Baltimore, Md. Apparatus for the control of combustion. 1,900,884; Mar. 7.
Lyman, Charles E., Waterbury, Conn. Tubular rivet machine. 1,900,572; Mar. 7.
Lyons, Robert L., Waltham, Mass. Button sewing machine. 1,900,388; Mar. 7.
Lysholm, Alf J. R., assignor to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden. Hydraulic variable speed power transmission. 1,900,118; Mar. 7.
Lysholm, Alf., Fred Horney, and Gösta Wahlsten, assignors to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden. Variable speed power transmission. 1,900,119; Mar. 7.
Lysholm, Alf., Fred Horney and Gösta Wahlsten, assignors to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden. Variable speed power transmission. 1,900,120; Mar. 7.
Maarsen, Isidor, New York, N. Y. Transfer table rear guide. 1,900,064; Mar. 7.
MacArthur Concrete Pile Corporation. (See Talmadge, Richard E., assignor.)
Maccabee, David E., assignor to Frigidaire Corporation, Dayton, Ohio. Refrigerating apparatus. 1,900,510; Mar. 7.
Madden, Edward J., Bridgeport, Conn. Brake operating tube. 1,900,511; Mar. 7.
Madden, Edward J., Bridgeport, Conn. Brake cable tube. 1,900,512; Mar. 7.
Mahannah, Alva, Sedgwick, Kans. Grain door. 1,900,244; Mar. 7.
Mahlstedt, John F., New Rochelle, N. Y., and A. V. A. Felten, Pittsfield, Mass. Cedar board. 1,900,830; Mar. 7.
Mallinson, H. R., & Co. (See Heinke, Alfred J., assignor.)
Malluk, Assad M., New York, and F. W. Allen, Sea Cliff, Long Island, N. Y. Fuel control apparatus for automobiles. 1,900,245; Mar. 7.
Manhattan Electrical Supply Company. (See Hendry, William F., assignor.)
Manhattan Rubber Manufacturing Division of Raybestos-Manhattan, Inc., The, et al. (See Kusmick, Joseph N., assignor.)
Manske, Fred A., E. W. Odenwaldt, and O. E. Gibson, assignors to United States Gypsum Company, Chicago, Ill. Roof and floor construction. 1,900,721; Mar. 7.
Manske, Fred A., E. W. Odenwaldt, and O. E. Gibson, assignors to United States Gypsum Company, Chicago, Ill. Method of and machine for forming metal plates. 1,900,722; Mar. 7.
Mantle Lamp Company of America, The. (See Schwarz, Eugene, assignor.)
Manvell, Edwin H., et al. (See Manvell, Edwin H., assignor.)
Manvell, Edwin H., assignor to E. H. Manvell and L. Casper, Brooklyn, N. Y. Tape moistening and affixing device. 1,900,121; Mar. 7.
Marchetti, Christoph, Chicago, Ill. Toy. 1,900,353; Mar. 7.
Marchisella, Vincenzo, New York, N. Y. Shoe booth foot rest. 1,900,653; Mar. 7.
Marks, Isidore J., New York, N. Y., assignor to E. S. Mendelson & Co., Inc. Textile fabric or similar article. Des. 89,402; Mar. 7.
Marling, William L., Weimar, Calif. Lawn mower sharpener. 1,900,186; Mar. 7.
Marsch, Nicholas W. (See Scott, V. L., and Marsch.)
Marsh, Lucien A., Mill Valley, Calif. Score pad displaying and supporting device for card tables. 1,900,513; Mar. 7.
Marter, Ezra B., 3d., Burlington, N. J., assignor to A. Edmond Pausser, Philadelphia, Pa. Electrical control system for permanent hair-waving apparatus. 1,900,831; Mar. 7.
Martin, Earl L., Des Moines, Iowa. Supporting a separating hopper as applied to portable mills. 1,900,354; Mar. 7.
Martin, Ira T., San Francisco, Calif. Draft control and dust separator. 1,900,065; Mar. 7.
Martin, Marshall D., New Orleans, La. Fish lure. 1,900,832; Mar. 7.
Martin, Otto V., San Springs, Okla., assignor to The Texaco Salt Products Company, New York, N. Y. Recovery of salts and other products from oil field brines. 1,900,246; Mar. 7.
Martin, Otto V., assignor to Texaco Salt Products Company, Tulsa, Okla. Recovery of salts and other products from oil field brines. 1,900,247; Mar. 7.
Marx, Karl, Dessau in Anhalt, and E. Lehmann, Wolfen, near Bitterfeld, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Dyeing furs, hairs, feathers, and similar articles. 1,900,454; Mar. 7.
Mason, Francis C., assignor to Sears, Roebuck & Company, Chicago, Ill. Apparatus for cleaning. 1,900,122; Mar. 7.
Masterench Corporation. (See Mead, Homer A., assignor.)
Mather Spring Company, The. (See Nilsson, Robert W., assignor.)

Mathesius, Walther, Chicago, Ill. Hot top for ingot molds. 1,900,066; Mar. 7.
Mathews Conveyer Company. (See Anderson, Martin J., assignor.)
Mathews, Milton, Sedalia, Mo. Device for extracting metal members. 1,900,654; Mar. 7.
Mathieu, Laurence M. (See Nuttall, Fred D., assignor.)
Matter, Gustave O., Portland, Oreg. Advertising device. 1,900,187; Mar. 7.
Mattern, Herman T., assignor to Hempy-Cooper Manufacturing Company, Kansas City, Mo. Chuck. 1,900,188; Mar. 7.
Mattison, Willsie M. (See Stromberg, Pehr W., assignor.)
Maul, Peter J., Detroit, Mich., and M. Hoffman, Chicago, Ill. Coated concrete. 1,900,833; Mar. 7.
Maurer, William, Queens Village, N. Y. Method and apparatus for making ice cream bars, sticks, or the like. 1,900,355; Mar. 7.
Maxwell, William H. (See Baash, L. F., and Maxwell.)
Mayer, Daniel J., Belleville, assignor to Metal Textile Corporation, West Orange, N. J. Machine for fabricating scouring devices, mop heads, and similar articles. 1,900,356; Mar. 7.
Maynard, Charles E., Northampton, assignor to R. W. Boyden and C. A. Dana as receivers of The Fisk Rubber Company, Chicopee Falls, Mass. Automatic mold closing apparatus. 1,900,455; Mar. 7.
McAdoo, William G. (See Noyes, Hazlehurst R., assignor.)
McArthur, Elmer D., Schenectady, N. Y., assignor to General Electric Company. Electric heating apparatus. 1,900,573; Mar. 7.
McBerty, Fred P., Warren, Ohio. Electric welding machine. 1,900,834; Mar. 7.
McCandless, Byron, U. S. Navy. Portable camera apparatus. 1,900,020; Mar. 7.
McClintock, O. B., Company. (See Popp, Sylvan R., assignor.)
McCollum, Burton, assignor to McCollum Geological Explorations, Inc., Houston, Tex. Seismic exploration of geologic formations. 1,899,970; Mar. 7.
McCollum Geological Explorations, Inc. (See McCollum, Burton, assignor.)
McCormick, George, Redwood City, and F. E. Russell, Alameda, Calif. Boiler drop-plug. 1,900,357; Mar. 7.
McDill, Rex D., Riverside, assignor to Food Machinery Corporation, San Jose, Calif. Treating fruit for the market. 1,900,295; Mar. 7.
McDonald, Angus N., assignor to Detroit Show Case Company, Detroit, Mich. Store front sash. 1,900,248; Mar. 7.
McDonald, Eugene G., assignor to Bendix Brake Company, South Bend, Ind. Brake operating connection. 1,900,123; Mar. 7.
McDonald, Harry R., assignor to Hart Glass Manufacturing Company, Dunkirk, Ind. Glass jar. Des. 89,403; Mar. 7.
McDonough, Martin V., Brooklyn, N. Y. Toilet article. 1,900,609; Mar. 7.
McGhee, Robert J., Virginia, Minn. Scraper. 1,900,189; Mar. 7.
McLean, William A., assignor to C. Schnackel's Son, Inc., Rochester, N. Y. Automatic valve. 1,900,514; Mar. 7.
McNichol, Forrest C. (See Van Valkenburg, H. L., and McNichol.)
Mead, George J., Milwaukee, Wis., assignor to The Fish Rubber Company, Chicopee Falls, Mass. Tire vulcanizer. 1,900,456; Mar. 7.
Mead, Homer A., assignor to Masterench Corporation, Turlock, Calif. Adjustable jaw wrench. 1,900,358; Mar. 7.
Meader, Russell G., Detroit, Mich., assignor to Scovill Manufacturing Company, Waterbury, Conn. Fastening device for inherently resilient articles. 1,900,574; Mar. 7.
Meehan, John P., Los Angeles, Calif. Making colored signs. 1,899,971; Mar. 7.
Megros, Georges, Bronxville, N. Y. Textile fabric or the like. Des. 89,404; Mar. 7.
Meier, William G., Manaroneck, N. Y. Embroidered textile fabric or the like. Des. 89,432; Mar. 7.
Mendelson, E. S., & Co. (See Marks, Isidore J., assignor.)
Meng, Harry E., Oak Park, assignor to W. D. Allen Manufacturing Company, Chicago, Ill. Sprinkler head. 1,900,124; Mar. 7.
Mengele, Hans, Wiesbaden, assignor to Byk-Guldenwerke Chemische Fabrik Aktiengesellschaft, Berlin, Germany. Toning silver pictures. 1,899,972; Mar. 7.
Mentkow, Abraham, Brooklyn, assignor to B. Blumenthal & Co., Inc., New York, N. Y. Buckle. Des. 89,405; Mar. 7.
Menzies, William C., Scranton, Pa. Method of and apparatus for separating materials of different specific gravities. 1,900,190; Mar. 7.
Meredith, Jaquelin M., assignor of one-fourth to B. F. Yost, Norfolk, Va. Tire and rim construction. 1,900,835; Mar. 7.
Mergott, J. E., Company. (See Hartmann, Paul E., assignor.)
Merica, Paul D., Westfield, J. S. Vanick, Elizabeth, and T. H. Wickenden, Roselle, N. J., assignors, by mesne assignments, to The International Nickel Company, Inc., New York, N. Y. Gray iron alloy. 1,900,125; Mar. 7.
Merkt, Gustav A. (See Isley, G. H., and Merkt.)
Merritt, Vernon, Montgomery, Ala. Method of and apparatus for preventing the bursting of liquid containers subjected to freezing temperature. 1,900,836; Mar. 7.
Mertes, Robert G., Catonsville, Md., assignor to The Pittsburgh Plate Glass Company, Pittsburgh, Pa. Making cup brushes. 1,900,575; Mar. 7.
Messerschmitt, Willy, Augsburg, Germany. Spar for airplanes. 1,900,067; Mar. 7.
Mesta Machine Company. (See Iverson, Lorens, assignor.)
Metal Textile Corporation. (See Mayer, Daniel J., assignor.)
Metropolitan Device Corporation. (See Oesterreicher, Sandor I., assignor.)
Metropolitan Engineering Company. (See Murray, T. E., jr., and Phelps, assignors.)
Metropolitan Engineering Company. (See Smith, Albert A., assignor.)
Metzger, Floyd J., assignor to Air Reduction Company, New York, N. Y. Separation of acetylene. 1,900,655; Mar. 7.
Meyer, George J., Cudahy, Wis. Oil feed mechanism. 1,899,973; Mar. 7.
Midland Steel Products Company. (See Crowe, James H., assignor.)
Midwest Manufacturing Company. (See Wittemeier, Hans assignor.)
Miller, Charles, Long Island City, N. Y. Shoe. 1,900,515; Mar. 7.
Miller, Dale O., Detroit, Mich. Traffic signal. 1,900,723; Mar. 7.
Miller, Ernest B. (See Connolly, G. C., and Miller.)
Miller, Harry L., Chester, Pa. Milk weighing apparatus. 1,900,359; Mar. 7.
Miller, Paul P., assignor to Dain Manufacturing Company of Iowa, Ottumwa, Iowa. Rake tooth for hay loaders. 1,900,724; Mar. 7.
Miller, Peter J. N., and V. E. Extrom, Minneapolis, Minn. Electric toaster. 1,900,249; Mar. 7.
Miller, Walter R., Mansfield, Ohio. Building block. 1,900,457; Mar. 7.
Mills, Henry J., Kinderhook, N. Y. Spraying apparatus. 1,900,837; Mar. 7.
Miner, W. H., Inc. (See Geiger, William A., assignor.)
Mingus, Fred B., Oshkosh, Wis. Lawn mowing machine. 1,900,838; Mar. 7.
Minto, Wallace M., Jersey City, N. J. Propeller. 1,900,839; Mar. 7.
Mississippi Glass Company. (See Juergens, Gustav H., assignor.)
Mitchell, Leonard O. (See Mitchell, Ossian K. and L. O.)
Mitchell, Ossian K. and L. O., Oak Park, Ill. Vertically and horizontally adjustable table. 1,900,250; Mar. 7.
Mock, Frank C., East Orange, N. J., assignor to Bendix Aviation Corporation, South Bend, Ind. Charge forming device. 1,900,191; Mar. 7.
Moffett, Frank E., Maywood, Ill., assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Release mechanism. 1,900,725; Mar. 7.
Mohawk Carpet Mills, Inc. (See Shuttleworth, Howard L., assignor.)
Mohler, Valentine J., River Forest, Ill., assignor to Addressograph Company, Wilmington, Del. Printing device frame blank. 1,900,296; Mar. 7.
Mohler, Valentine J., River Forest, Ill., assignor to Addressograph Company, Wilmington, Del. Printing device. 1,900,297; Mar. 7.
Möller, Waldemar, Berlin-Charlottenburg, assignor to Askania-Werke Aktiengesellschaft, Berlin-Friedenau, Germany. Steering apparatus for aircraft. 1,900,516; Mar. 7.
Monopulse Teletype Corporation. (See Brownstein, Louis, assignor.)
Monroe Calculating Machine Company. (See Bricken, John, assignor.)
Monroe Calculating Machine Company. (See Brown, Lee R., assignor.)
Mooney, Thomas F., New Lexington, Ohio, assignor to Ludowici-Celadon Company, Chicago, Ill. Machine for manufacturing ceramic objects. 1,899,974; Mar. 7.
Moore, Chadwick H., London, England. Loose leaf binder. 1,900,840; Mar. 7.
Moore, Charles A., Edina, Minn. Refrigerator. 1,900,576; Mar. 7.
Moore, Charles A., Edina, Minn. Refrigerator. 1,900,579; Mar. 7.
Moore, Charles A., Edina, Minn. Ventilated refrigerator. 1,900,580; Mar. 7.
Moore, Daniel M., East Orange, N. J., assignor to General Electric Company. Gaseous conduction lamp. 1,900,577; Mar. 7.
Moore, Daniel M., East Orange, N. J., assignor to General Electric Company. Gaseous discharge device. 1,900,578; Mar. 7.
Moore, Ida L., Long Beach, Calif. Table support for reading matter. 1,900,251; Mar. 7.
Moore, Samuel, assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Condenser unit for refrigerating apparatus. 1,900,865; Mar. 7.
Moorhouse, William R., assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Dyeing process. 1,899,975; Mar. 7.

Morgan Construction Company. (See Isley, George H., assignor.)
Morgan Construction Company. (See Isley, G. H., and Merkt, assignors.)
Morgan Construction Company. (See Morgan, Myles, assignor.)
Morgan, Frank A. (See Dana, D., and Morgan.)
Morgan, Myles, assignor to Morgan Construction Company, Worcester, Mass. Controlling the shearing of metal bars while in motion. 1,900,252; Mar. 7.
Morgan & Wright. (See Gilbert, William S., assignor.)
Morris, Fred C., San Francisco, Calif. Making bushings. 1,900,298; Mar. 7.
Morris, Thomas W., Chicago, Ill. Trimming apparatus. 1,900,000; Mar. 7.
Morrow, Joseph H., Hokendanqua, Pa., assignor to Fuller Company. Roll feeder. 1,900,458; Mar. 7.
Morse Chain Company. (See Morse, Frank L., assignor.)
Morse, Frank L., assignor to Morse Chain Company, Ithaca, N. Y. Duplex link belt. 1,900,192; Mar. 7.
Mount, Morris B., Lynchburg, Va. Preparation of caustic liquor. 1,900,253; Mar. 7.
Moyer, Amos F., assignor to Toro Manufacturing Company, Minneapolis, Minn. Lawn mower. 1,900,726; Mar. 7.
Moyse, Hollis W., New Brunswick, N. J., assignor to Du Pont Film Manufacturing Corporation, Wilmington, Del. Multipack negative system. 1,900,459; Mar. 7.
Mueller, John, Chicago, Ill. Hair curler. 1,900,360; Mar. 7.
Mueller, Richard P., New York, N. Y. Control mechanism for aircraft. 1,900,068; Mar. 7.
Mulford, Roland H. (See Wallace, Donald J., assignor.)
Mulholland, Vergil, West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Forehearth for molten glass. 1,900,362; Mar. 7.
Mulholland, Vergil, West Hartford, and A. B. Hunter, assignors to Hartford-Empire Company, Hartford, Conn. Forehearth for molten glass. 1,900,361; Mar. 7.
Müller, Friederich, Elisabeth, N. J., assignor to The Whitney Mfg. Co., Hartford, Conn. Automatic chain assembling means. 1,899,976; Mar. 7.
Mullins, William H., South Boston, Va. Adjustable display stand. 1,900,610; Mar. 7.
Multigraph Company. (See Osborn, Henry C., assignor.)
Munters, Carl G., Stockholm, Sweden, assignor, by mesne assignments, to Electrolux Servel Corporation, New York, N. Y. Heat pump. 1,900,656; Mar. 7.
Muros, Joseph, Belmont, assignor to Gillette Safety Razor Company, Boston, Mass. Safety razor. 1,900,069; Mar. 7.
Murphy, Andrew W., Norwich, N. Y. Apparatus for saving radiator alcohol. 1,900,727; Mar. 7.
Murphy, Edward D., Louisville, Ky. Bicycle newspaper bag rack. 1,900,070; Mar. 7.
Murphy, Francis, New York, N. Y., assignor to Bigelow Sanford Carpet Co., Inc. Carpet. Des. 89,406; Mar. 7.
Murray Corporation, The. (See Radecky, Edward H., assignor.)
Murray, John F., et al. (See Bennett, Irving T., assignor.)
Murray, Joseph B., et al. (See Bennett, Irving T.)
Murray, Thomas E. (See Bennett, Irving T., assignor.)
Murray, Thomas E., jr., et al. (See Bennett, Irving T., assignor.)
Murray, Thomas E., jr., Brooklyn, N. Y., and G. H. Phelps, Warehouse Point, Conn., assignors, by direct and mesne assignments, to Metropolitan Engineering Company. Heating system. 1,899,977; Mar. 7.
National Aniline & Chemical Company. (See Moorhouse, William R., assignor.)
National Aniline & Chemical Co. Inc. (See Payne, Ralph B., assignor.)
National Carbon Company, Inc. (See Jones, H. W., and Graubner, assignors.)
National Electric Products Corporation. (See Frederickson, Otto A., assignor.)
National Foam System, Inc. (See Boyd, Fisher L., assignor.)
National Malleable and Steel Castings Company. (See Moffett, Frank E., assignor.)
National Pneumatic Company. (See Paul, Abram F., assignor.)
National Pumps Corporation. (See Curtis, William H., assignor.)
Nearing, George G., Chadds Ford, Pa. Promoting plant growth. 1,900,193; Mar. 7.
New England Lime Co. (See Stump, Horace E., assignor.)
Newhouse, Walter F., Benton Harbor, Mich. Feed belt guide construction. 1,900,657; Mar. 7.
New Idea Spreader Company, The. (See Oppenheim, Theodore H., assignor.)
Newmark, Morris, New York, N. Y. Lubricating device. 1,900,021; Mar. 7.
Newport Industries, Inc. (See Henke, Clyde O., assignor.)
New York Air Brake Company, The (See Campbell, Charles A., assignor.)
Ney, Eugene J., New York, N. Y. Window ventilator. 1,900,611; Mar. 7.
Nicosia, Vincent N., Houston, Tex. Hair waving or curling rod. 1,900,126; Mar. 7.
Niedecken, Edward F., Milwaukee, Wis. Shower stall. 1,900,658; Mar. 7.
Niemi, Matti, Seattle, Wash. Hoisting block. 1,900,194; Mar. 7.
Nilsson, Robert W., assignor to The Mather Spring Company, Toledo, Ohio. Spring construction. 1,900,841; Mar. 7.
North American Chemical Company. (See Avery, Alfred H., assignor.)
North American Chemical Company. (See Thoma, Andrew, assignor.)
North Bro's M'f'g Co. (See Fegley, T. J., and Leopold, assignors.)
Northrup, Edwin F., near Princeton, assignor to Ajax Electrothermic Corporation, Trenton, N. J. Heater for rods and tubes. 1,900,842; Mar. 7.
Northrup, Edwin F., Princeton, assignor to Ajax Electrothermic Corporation, Ajax Park, Trenton, N. J. Heater for rods and tubes. 1,900,843; Mar. 7.
Norton, Raymond J., Washington, D. C., assignor to Bendix Brake Company, South Bend, Ind. Brake drum. 1,900,844; Mar. 7.
Noyes, Albert H., assignor to Hills-McCanna Company, Chicago, Ill. Tank outlet valve. 1,899,978; Mar. 7.
Noyes, Hazelhurst R., assignor to W. G. McAdoo, Los Angeles, Calif. Razor blade package. 1,899,979; Mar. 7.
Nuberg, Matthys, assignor to American Seating Company, Grand Rapids, Mich. Joint construction. 1,900,460; Mar. 7.
Nuttall, Fred D., assignor of one-fourth to Laurence M. Mathieu, Richmond, Va. High tension ignition system. 1,900,022; Mar. 7.
Nystrom, Karl F., Milwaukee, Wis., assignor to Camel Company, Chicago, Ill. Latch mechanism. 1,900,254; Mar. 7.
O'Brien, Daniel N., Ashton, R. I., assignor to Draper Corporation, Hopedale, Mass. Harness mechanism for a loom. 1,900,659; Mar. 7.
Ochwat, Paul. (See Kranstein, G., and Ochwat.)
O'Connor, Arthur F., assignor to Equipment Specialties Company, Chicago, Ill. Support construction. 1,899,980; Mar. 7.
Odda Smelteverk A/S, the Firm. (See Johnson, Erling, assignor.)
Odenwaldt, Eugene W. (See Manske, F. A., Odenwaldt, and Gibson.)
Oehme, Hermann, assignor to Chemische Fabrik Kalk G. m. b. H., Cologne-Kalk, Germany. Vulcanized rubber composition and vulcanizing rubber. 1,900,728; Mar. 7.
Oesterreicher, Sandor I., assignor to Metropolitan Device Corporation, Brooklyn, N. Y. Protective inclosure for reactors and similar apparatus. 1,899,981; Mar. 7.
Offutt, James S., assignor to United States Gypsum Company, Chicago, Ill. Acoustical plaster. 1,900,866; Mar. 7.
Ohta, Joe Yoneo, Terminal Island, Calif. Signal. 1,900,845; Mar. 7.
Okonite Company, The. (See Brodhun, Carl P., assignor.)
Olds, Marshall, Mountainside, N. J. Container and handling cargo by such containers. 1,900,867; Mar. 7.
Oliver, Campbell H., Hibbing, Minn. Brake testing instrumentality. 1,900,581; Mar. 7.
Oliver Farm Equipment Company. (See Altgelt, Herman E., assignor.)
Oliver Farm Equipment Company. (See Altgelt, Herman E. and R. J., assignors.)
Oliver Farm Equipment Company. (See Schoenrock, Otto A., assignor.)
Olpin, Henry C. (See Ellis, G. H., Olpin, and Storey.)
Olson, Axel E., Brainerd, Minn. Clamp clothespin. 1,899,982; Mar. 7.
Olson, Carl G., assignor to Shakeproof Lock Washer Company, Chicago, Ill. Screw locking element. 1,900,195; Mar. 7.
O'Neill, William T., Pittsburgh, Pa. Game. 1,900,071; Mar. 7.
Opdyke, Vernice G. (See Paden, M. W., and Opdyke, assignors.)
Oppenheim, Charles, assignor to Sears, Roebuck and Co., Chicago, Ill. Watch-fob. Des. 89,407; Mar. 7.
Oppenheim, Theodore H., assignor to The New Idea Spreader Company, Coldwater, Ohio. Attachment for fertilizer distributors. 1,900,299; Mar. 7.
Orem, William H., Baltimore, Md. Milk bottle hood. 1,900,127; Mar. 7.
Ormsbee, Arnold L., Lodi, Calif. Flushing system for operating tables. 1,900,255; Mar. 7.
Osborn, Henry C., Cleveland, Ohio, assignor to Multigraph Company, Wilmington, Del. Printing form. 1,900,023; Mar. 7.
Oster, Cornelius B., and H. Rainey, assignors of one-fourth to H. Jones, Rushville, and one-fourth to C. Cole, Indianapolis, Ind. Milk bottle receiver. 1,900,729; Mar. 7.
Osuch, Francis J., Detroit, Mich. Index to be used with telephone directories and other books. 1,900,461; Mar. 7.
Osuch, Francis J., Detroit, Mich. Index for bound volumes. 1,900,462; Mar. 7.
Otis, Edward C., Chicago, Ill., assignor, by mesne assignments, to Certain-teed Products Corporation. Roofing. 1,900,597; Mar. 7.
Otis Manufacturing Co. (See Strausser, H. S., and Reynolds, assignors.)
Outboard Motors Corporation. (See Irgens, Finn T., assignor.)

Owada, Tokujiro, Sukegawa-Cho, assignor of one-half to Koji Konishi, Tokio, Japan. Apparatus for testing watches. 1,900,612; Mar. 7.
Owen, William, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for case hardening glass sheets. 1,900,582; Mar. 7.
Owen, William, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for case hardening glass sheets. 1,900,583; Mar. 7.
Oxford Varnish Corporation. (See Von Webern, G., and Hamant, assignors.)
P. & R. Tool Company. (See Lester, Nathan, assignor.)
Pack, William E., Oakland, Calif. Roofer's gauge. 1,900,196; Mar. 7.
Pack, William E., Oakland, Calif. Pitch gauge. 1,900,197; Mar. 7.
Paden, Matthew W., and V. G. Opdyke, Rockford, Ill. Valve control apparatus for dry pipe sprinkler systems. 1,900,300; Mar. 7.
Page, Blin W. (See Tewksbury, Allen M., assignor.)
Page, Charles E., Los Angeles, Calif. Handle for coffee makers. Des. 89,408; Mar. 7.
Papyrus, A. G. (See Buchner, Carl, assignor.)
Parent, Emile J., Hartford, assignor to The Whitlock Coil Pipe Company, West Hartford, Conn. Heat exchange apparatus. 1,900,363; Mar. 7.
Parker, Chester James, Carson City, Nev. Clamp for holding dressing in fowls and the like. 1,900,613; Mar. 7.
Pasternack, Richard, Brooklyn, and W. R. Giles, Richmond Hill, assignors to Charles Pfizer & Company, Brooklyn, N. Y. Highly soluble calcium gluconate and making same. 1,900,517; Mar. 7.
Paul, Abram F., Llanerch, Pa., assignor to National Pneumatic Company, New York, N. Y. Stanchion switch. 1,900,198; Mar. 7.
Pausser, A. Edmond. (See Marter, Ezra B., 3d., assignor.)
Pawlitschko, Anton R., Little Ferry, N. J., assignor to Western Newspaper Union. Matrix board for stereotyping. 1,900,660; Mar. 7.
Payette, Joseph A., assignor to General Plate Company, Attleboro, Mass. Electrical contact and the manufacture thereof. 1,900,256; Mar. 7.
Payne, Ralph B., Elma, assignor to National Aniline & Chemical Co., Inc., New York, N. Y. Production of azo dye. 1,900,417; Mar. 7.
Pearson, Amel L., and J. J. Gerhardt, Madison, Wis. Self-adjusting valve lifter, or tappet. 1,900,518; Mar. 7.
Peel, Arthur, London, England. Indexing device. 1,900,073; Mar. 7.
Peltier, Frank D., Evansville, Ind., assignor, by mesne assignments, to Servel, Inc., New York, N. Y. Conduit connection for compressors. 1,900,661; Mar. 7.
Pendleton, Eldridge M., Vicksburg, Miss. Folding support. 1,900,760; Mar. 7.
Pennsylvania Railroad Company. (See Butts, George W., assignor.)
Penny, Ira W., Phoenix, Ariz. Vending machine. 1,900,074; Mar. 7.
Perkins, Benjamin F., assignor to American Tissue Mills, Holyoke, Mass. Making articles of paper. 1,900,257; Mar. 7.
Perry, Horace W., Oak Park, assignor to Reliable Electric Company, Chicago, Ill. Wire clamp. 1,899,983; Mar. 7.
Persons, Lawrence M., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo. Resilient support for electric motors. 1,900,128; Mar. 7.
Persons-Majestic Manufacturing Company. (See Chesley, Walter R., assignor.)
Pet Milk Company. (See Louder, Earl A., assignor.)
Peters, Frank J., assignor of one-half to I. J. Boyce, Portland, Oreg. Toy coast defense gun. 1,900,024; Mar. 7.
Peterson, Oscar R., Brooklyn, N. Y. Safety razor. 1,900,662; Mar. 7.
Petit, William H., and E. S. Hineline, assignors to The Folmer Graflex Corporation, Rochester, N. Y. Camera back. 1,900,730; Mar. 7.
Pfizer, Charles, & Company. (See Pasternack, R., and Giles, assignors.)
Phelps, George H. (See Murray, T. E., jr., and Phelps.)
Philip Carey Manufacturing Company, The. (See Greider, Harold W., assignor.)
Phoenix Metal Cap Co. (See Crabbe, Lindsay T., assignor.)
Piani, Fred, New York, N. Y. Alarmed cash register. 1,900,519; Mar. 7.
Pickett, Angelo C., Riverside, Calif. Insect trap. 1,900,199; Mar. 7.
Pickup, George E., assignor to The Wehrle Company, Newark, Ohio. Cabinet type oil burning heater. 1,900,520; Mar. 7.
Pierce-Arrow Motor Car Company, The. (See Hughes, James R., assignor.)
Pipkin, Marvin, Cleveland Heights, Ohio, assignor to General Electric Company. Bulb and coloring the same. 1,900,463; Mar. 7.
Pippin, John W., Corpus Christi, assignor of one-half to H. R. Giles, Nueces County, and one-half to W. F. Hall and George Lowrey, Harris County, Tex. Well plunger. 1,900,731; Mar. 7.
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Plate Glass Company. (See Mertes, Robert G., assignor.)
Pittsburgh Plate Glass Company. (See Owen, William, assignor.)
Place, Willard P., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical rectifier. 1,900,732; Mar. 7.
Platt, Herbert. (See Dreyfus, C., and Platt.)
Plauson, Hermann, assignor, by mesne assignments, to Radiochemisches Forschungs-Institut, G. m. b. H., Darmstadt, Germany. Manufacture of caoutchouc lacquers or varnishes. 1,900,663; Mar. 7.
Pneuman, James I., Camillus, N. Y. Animal trap. 1,900,733; Mar. 7.
Pohn, Franz, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of driers for varnishes, lacquers, oil paints, and the like. 1,900,734; Mar. 7.
Poirot, Eugene M., Poirot Farms, Mo., assignor to Arthur Capper, trustee, Kansas. Preparing artificial manures. 1,900,614; Mar. 7.
Poirot, Eugene M., Poirot Farms, Mo., assignor to Arthur Capper, trustee, Kansas. Machine for preparing artificial manures. 1,900,615; Mar. 7.
Pollak, Joseph. (See Averill, William H., assignor.)
Pomeroy, S. H., Company. (See Flen, Alphonsus, assignor.)
Pomeroy, William D., assignor to Goulds Pumps, Incorporated, Seneca Falls, N. Y. Lubricating system. 1,900,735; Mar. 7.
Popp, Sylvan R., assignor to O. B. McClintock Company, Minneapolis, Minn. Gun port for bullet-resisting structures. 1,900,364; Mar. 7.
Porter, Alexander W., Atlantic City, N. J. Building front. Des. 89,409; Mar. 7.
Porter-Cable Machine Company, The. (See Emmons, Arthur N., assignor.)
Porter, Sidney C., East Liverpool, Ohio. Preventing reverse movement. 1,900,025; Mar. 7.
Poth, George H., Cincinnati, Ohio. Electromagnetic reciprocating device. 1,900,464; Mar. 7.
Pouchain, Adolfo, Turin, Italy. Electric accumulator. 1,900,616; Mar. 7.
Powell, James D., Stoyestown, Pa. Shaving brush. 1,899,984; Mar. 7.
Poyer, Guy R., Wichita, Kans. Supercharger. 1,900,200; Mar. 7.
Price, James H., Grand Rapids, Mich. Piston head guard. 1,900,521; Mar. 7.
Pritchard, Carl G., Hiram, assignor to Harris-Seybold-Potter Company, Cleveland, Ohio. Printing press. 1,900,664; Mar. 7.
Proteau, Elizabeth, Vancouver, British Columbia, Canada. Egg poacher. 1,900,761; Mar. 7.
Prussing, Walter, assignor to Victor Metal Products Corporation, Brooklyn, N. Y. Die for extruding collapsible tubes. 1,900,665; Mar. 7.
Prussing, Walter, assignor to Victor Metal Products Corporation, Brooklyn, N. Y. Stripper for collapsible tube forming machines. 1,900,666; Mar. 7.
Pure Oil Company, The. (See Harnsberger, Audley E., assignor.)
Qualcast Limited. (See Butterworth, William J., assignor.)
Quinn, Joseph F., Burlingame, assignor to Geo. W. Caswell Co., San Francisco, Calif. Coffee roasting process. 1,900,072; Mar. 7.
Radecky, Edward H., Detroit, Mich., assignor to The Murray Corporation of America. Muffler for internal combustion engines. 1,900,026; Mar. 7.
Radecky, Edward H., Detroit, Mich., assignor to The Murray Corporation of America. Muffler for internal combustion engines. 1,900,027; Mar. 7.
Radioschemisches Forschungs-Institute, G. m. b. H. (See Plauson, Hermann, assignor.)
Radio Corporation of America. (See Jensen, Paul E. G., assignor.)
Radio Corporation of America. (See Logwood, Charles V., assignor.)
Radio Corporation of America. (See Whitaker, Alfred, assignor.)
Radio-Keith-Orpheum Corporation. (See Spotts, Ralph K., assignor.)
Radley, Alton A., jr., assignor of one-fourth to John G. Hogan, Whitefish, Mont. Valve and valve-seat refinishing tool. 1,900,075; Mar. 7.
Raffloer, Emil, Duisburg, Germany, assignor to Charlotte Chemical Laboratories, Charlotte, N. C. Desulphurizing gases. 1,900,667; Mar. 7.
Rainey, Harry. (See Oster, C. B., and Rainey.)
Rand, James H., jr., and J. A. Zellers, Buffalo, assignors to Remington Rand Inc., New York, N. Y. Top or cover plate for typewriting machines. Des. 89,410; Mar. 7.
Rand, James H., jr., and J. A. Zellers, Buffalo, assignors to Remington Rand Inc., New York, N. Y. Frame for typewriting machines. Des. 89,411; Mar. 7.
Ranney, Leo, New York, and H. F. Gade, Brooklyn, N. Y.; said Gade assignor to said Ranney. Toy. 1,900,419; Mar. 7.
Ransomes, Sims & Jeffries Limited. (See Garrett, Francis A., assignor.)

CARNEGIE LIBRARY OF ATLANTA

Raymond Concrete Pile Company. (See Schroeder, F. A., and Twist, assignors.)
Raymond, William A. (See Humason, G. A., and Raymond.)
Rayner Decalcomania Company. (See Edghill, Frederick A., assignor.)
Rea, James C., Oakland, Calif. Switch operator. 1,900,584; Mar. 7.
Read, Henry, Tulsa, Okla. Concrete floor joist form construction. 1,900,301; Mar. 7.
Redlich, Rudolph, jr., Chicago, Ill. Table or similar article. Des. 89,412; Mar. 7.
Reece Button Hole Machine Company, The. (See Reece, Franklin A., assignor.)
Reece, Franklin A., Brookline, assignor to The Reece Button Hole Machine Company, Boston, Mass. Buttonhole sewing machine. 1,900,076; Mar. 7.
Reed, James H., Marblehead, Mass. Package. 1,900,389; Mar. 7.
Reed, Walter C., Dalton, Mass., assignor to General Electric Company. Terminal for electrical conductors. 1,900,585; Mar. 7.
Reeves Manufacturing Company, The. (See Krantz, Joseph A., assignor.)
Reeves Manufacturing Company, The. (See Sladky, Alexander C., assignor.)
Reilly, Peter C. (See Derby, Ira H., assignor.)
Reilly, Peter C. (See Hansen, Mablin S., assignor.)
Reimann, Arthur A., Oakland, Calif. Internal combustion engine. 1,900,762; Mar 7.
Reliable Electric Company. (See Perry, Horace W., assignor.)
Remington Arms Company, Inc. (See Burns, James E., assignor.)
Remington Arms Company, Inc. (See Campbell, Allan assignor.)
Remington Arms Company, Inc. (See Jackson, Daniel D., assignor.)
Remington Arms Company, Inc. (See Loomis, Crawford C., assignor.)
Remington Arms Company, Inc. (See Seiler, Richard J., assignor.)
Remington Rand Inc. (See Rand, J. H., jr., and Zellers, assignors.)
Remington Typewriter Company. (See Barney, Edwin E., assignor.)
Remington Typewriter Company. (See Going, George G., assignor.)
Republic Steel Corporation. (See Ellisonk, Harry C., assignor.)
Respats, Inc. (See Respess, Roland B., assignor.)
Respess, Roland B., Wickford, assignor to Respats Inc., Cranston, R. I. Fibrous product and manufacture of same. 1,899,985; Mar. 7.
Reumelin, Richard, Milwaukee, Wis. Air drier. 1,899,988; Mar. 7.
Reynolds' Henry T. (See Strausser, H. S., and Reynolds.)
Ricardo, Harry R., London, England. Self-aligning spherical joint or bearing. 1,900,617; Mar. 7.
Richard, Grant M. (See Briggs, O. B., and Richard.)
Richardson, Maurice F., Berwyn, Pa. Valve. 1,900,736; Mar. 7.
Richter, Elmer F., Park Ridge, Ill., assignor to Addressograph Company, Wilmington, Del. Printing device. 1,900,302; Mar. 7.
Richter, Elmer F., Park Ridge, Ill., assignor to Addressograph Company, Wilmington, Del. Printing device. 1,900,303; Mar. 7.
Riebel, Frederick, jr., assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio. Vacuum cleaner. 1,900,465; Mar. 7.
Riebel Frederick, jr., and D. M. Dow, assignors to Air-Way Electric Appliance Corporation, Toledo, Ohio. Bag coupling. 1,900,366; Mar. 7.
Rietz, Erich, and W. Hoffman, Elberfeld, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Condensation product from aliphatic aldehydes and bases of the naphthalene series. 1,900,365; Mar. 7.
Riffe, Raymond F., Greensburg, Pa. Adjustable door catch. 1,900,077; Mar. 7.
Ring, Fred, assignor to Dictograph Products Co., Inc., New York, N. Y. Woman's undergarment. 1,900,129; Mar. 7.
Rintelman, William L. (See Gubelmann, I., and Rintelman.)
Rintelman, William L., Milwaukee, Wis., assignor, by mesne assignments to E. I. du Pont de Nemours & Company. 1, 5-dichloro-2, 6-diamino-anthraquinone-3, 7-disulphonic acid and producing same. 1,899,986; Mar. 7.
Rintelman, William L., Milwaukee, Wis., assignor, by mesne assignments, to E. I. du pont de Nemours & Company. Preparing 1, 5-dichloro-2, 6-diamino-anthraquinone. 1,899,987; Mar. 7.
Rippe, John B., Fresno, Calif. Cooling systems. 1,900,586; Mar. 7.
Ritchie, Frank E., Chippewa Falls, Wis. Animal feeder. 1,900,868; Mar. 7.
Rivat, George. (See Dreyfus, C., and Rivat.)
Riverbank Laboratories. (See Sabine, Paul E., assignor.)
Robichaux Sosthene, Saratoga, Tex. Sample taking device. 1,900,618; Mar. 7.
Rodgers, James P., assignor to Elliott Company, Pittsburgh, Pa. Tube cleaner. 1,900,130; Mar. 7.
Roe, Emil W. K., assignor to The Aldon Company, Chicago, Ill. Saw operating mechanism. 1,900,304; Mar. 7.
Roebling's, John A., Sons Company. (See Sunderland, Charles C., assignor.)
Rohne, Even J., assignor to Waters-Genter Company, Minneapolis, Minn. Toaster. 1,900,737; Mar. 7.
Root, Frank B., East Orange, N. J., assignor to Chadeloid Chemical Company, New York, N. Y. Rugous coating composition and making same. 1,900,131; Mar. 7.
Roselund, Harold A., assignor to The De Vilbiss Company, Toledo, Ohio. Liquid gun. 1,900,668; Mar. 7.
Rosenstein, Ludwig, San Francisco, Calif. Process of refining. 1,900,132; Mar. 7.
Ross, J. O., Engineering Corporation. (See Wagner, C. L., and Freeman, assignors.)
Rowe, Thomas A., Red Creek, N. Y. Silo. 1,900,763; Mar. 7.
Rowley, Arthur C., assignor to Globe Automatic Sprinkler Company, Philadelphia, Pa. Sealing and release device for carbon dioxide fire systems. 1,900,764; Mar. 7.
Rowley, Arthur C., assignor to Globe Automatic Sprinkler Company, Philadelphia, Pa. Heat responsive device. 1,900,765; Mar. 7.
Rud, Otto Meyer, Firm, et al. (See Behrens, Hans C. A., assignor.)
Russell, Buford B., Chicago, and W. J. Uhlhorn, Oak Park, assignors to Drying Systems, Inc., Chicago, Ill. Apparatus for and method of drying. 1,900,846; Mar. 7.
Russell, Frank E. (See McCormick, G., and Russell.)
Ruthsaccumulator A. B. (See Ruths, Johannes, assignor.)
Ruths, Johannes, Djursholm, Sweden, assignor to Ruthsaccumulator A. B., Berlin, Germany. Steam power plant. 1,900,766; Mar. 7.
Ryan, Augustus M., Madison, N. J. Wall brace and reenforcement. 1,900,767; Mar. 7.
Sabine, Paul E., assignor of one-half to Riverbank Laboratories, Geneva, Ill. Sound absorbent material and producing it. 1,900,522; Mar. 7.
Safety Belt Lacer Company. (See Briggs, O. B., and Richard, assignors.)
Safety Car Heating & Lighting Company, The. (See Godsey, Frank W., jr., assignor.)
Sager, Solomon M., Evanston, Ill. Eye cup. 1,900,201; Mar. 7.
Sauter, Friedrich, Weingarten, Germany. Letter box. 1,900,078; Mar. 7.
Schaeffers, Joseph, Philadelphia, Pa. Internal combustion engine. 1,900,133; Mar. 7.
Schargorodsky, Lazar, assignor to the Firm Hannoversche Maschinenbau-Actien-Gesellschaft vormals Georg Eystorff. Hanomag, Hannover, Linden, Germany. Starting internal combustion engines. 1,900,367; Mar. 7.
Scheibell, Gordon B., Newark, N. J. Film apparatus. 1,900,738; Mar. 7.
Schemmel, Robert C., Union City, Ind. Finishing welt. 1,900,768; Mar. 7.
Schemmel, Robert C., Union City, Ind. Molding. 1,900,769; Mar. 7.
Schiff, Sigmund, assignor to The J. H. Day Company, Cincinnati, Ohio. Locking device for bayonet slot construction. 1,900,258; Mar. 7.
Schlenker, Louis F., and M. Wuerthner, Jackson, Mich., assignors to said Schlenker and said Wuerthner, as joint tenants with right of survivorship. Combined heating and ventilating apparatus. 1,900,770; Mar. 7.
Schlotz, Elmer E., Denver, Colo. Railway car. 1,900,134; Mar. 7.
Schmidt, Otto, Ludwigshafen-on-the-Rhine, M. Treppenhauer, Mannheim, and O. Grosskinsky and Heinrich Fischer, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of olefines and diolefines. 1,900,739; Mar. 7.
Schmierer, Eugene, assignor to Baker Perkins Company, Inc., Saginaw, Mich. Packing gland. 1,900,523; Mar. 7.
Schnackel's, C., Son, Inc. (See McLean, William A., assignor.)
Schoenrock, Otto R., Chicago, Ill., assignor to Oliver Farm Equipment Company. Clutch coupling. 1,900,305; Mar. 7.
Schrader's, A., Son, Inc. (See Elbert, J., and Cronwall, assignors.)
Schroeder, Frederick A., Rochelle Park, and A. E. Twist, Rutherford, N. J., assignors to Raymond Concrete Pile Company, New York, N. Y. Pile shell. 1,900,524; Mar. 7.
Schroeder, Henry R., Omaha, Nebr. Internal combustion motor. 1,900,466; Mar. 7.
Schumacher, Karl. (See Zimmermann, Max E., assignor.)
Schutzniedrig, Ewald, assignor to Victor Koch, Detroit, Mich. Diesel engine. 1,900,587; Mar. 7.
Schwalbe, Hellmuth C., assignor to Dill & Collins Co., Philadelphia, Pa. Treating cellulose fiber pulp. 1,899,989; Mar. 7.
Schwartz, George L. (See Lewers, William W., and Schwartz.)
Schwartz, Eugene, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill. Lamp shade. Des. 89,413; Mar. 7.

Schwarz, Eugene, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill. Lamp shade. Des. 89,414; Mar. 7.
Schwarz, Eugene, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill. Lamp shade. Des. 89,415; Mar. 7.
Schwarz, Eugene, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill. Lamp shade. Des. 89,416; Mar. 7.
Scott, Bernard H., Glendale, Calif. Liquid counter-balanced pumping system. 1,900,588; Mar. 7.
Scott, Ernest E., assignor to The Dangerlite Corporation of America, Denver, Colo. Reflector. 1,900,202; Mar. 7.
Scott-Ross and Company. (See Yungling, Paul F., assignor.)
Scott, Victor L., Ottumwa, Iowa, and N. W. Marsch, Troy, S. Dak. Renewable threaded liner for coal drill boxings. 1,900,740; Mar. 7.
Scott, Walter J., Woonsocket, R. I. Stop motion for gill boxes. 1,900,400; Mar. 7.
Scovill Manufacturing Company. (See Meader, Russell G., assignor.)
Scruggs, Clarence H., Brooklyn, N. Y. Jewelry display device. 1,900,467; Mar. 7.
Sculley, William J., Palmyra, N. J. Apparatus for making a belt splice. 1,900,402; Mar. 7.
Scully, Rees T., Pittsburgh, Pa. Scoring device. 1,900,401; Mar. 7.
Sears, Roebuck & Company. (See Mason, Francis C., assignor.)
Sears, Roebuck and Co. (See Oppenheim, Charles, assignor.)
Sease, Virgil B., Parlin, N. J., assignor to Du Pont Film Manufacturing Corporation, Wilmington, Del. Multipack negative system. 1,900,468; Mar. 7.
Seederer, Jacob E., assignor to Seederer-Kohlbusch, Inc., Jersey City, N. J. Beam scale. 1,900,418; Mar. 7.
Seederer-Kohlbusch, Inc. (See Gattoni, John, assignor.)
Seederer-Kohlbusch, Inc. (See Seederer, Jacob E., assignor.)
Seeley, Harold T., Yeadon, Pa., assignor to General Electric Company. Control system. 1,900,589; Mar. 7.
Sehring, Frank, Brooklyn, N. Y. Hair curler or hair wave winder. 1,900,373; Mar. 7.
Seiler, Richard J., Ilion, N. Y., assignor to Remington Arms Company, Inc. Checkering machine. 1,900,203; Mar. 7.
Selden Company, The. (See Jaeger, Alphons O., assignor.)
Selden Company, The. (See Witzel, Heinrich W., assignor.)
Selden Research & Engineering Corporation, The. (See Jaeger, Alphons O., assignor.)
Sellers, William D., Oak Park, Ill., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,890; Mar. 7.
Servel, Inc. (See Peltier, Frank D., assignor.)
Sevison, Harry D., Elkhart, Ind., assignor to The Adlake Company, Chicago, Ill. Curtain roller construction. 1,900,259; Mar. 7.
Seymour, Merrill W., assignor to Eastman Kodak Company, Rochester, N. Y. Color photographic material. 1,900,869; Mar. 7.
Seymour, Merrill W., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic color process. 1,900,870; Mar. 7.
Shaffer, William D., Brea, Calif. Multicap casing head. 1,900,260; Mar. 7.
Shakeproof Lock Washer Company. (See Olson, Carl G., assignor.)
Sharp, Jefferson M., Oil City, Pa. Coupler for toy railway cars. 1,900,204; Mar. 7.
Sharpsville Boiler Works, Co. (See Swank, Rehl W., assignor.)
Sheaffer, Craig R., and W. R. Cuthbert, assignors to W. A. Sheaffer Pen Co., Fort Madison, Iowa. Pencil. 1,900,669; Mar. 7.
Sheaffer, W. A., Pen Co. (See Sheaffer, C. R., and Cuthbert, assignors.)
Sheldon Machinery Corporation. (See Sheldon, Waldo, assignor.)
Sheldon, Roscoe V., Riverside, Calif. Price marker. 1,900,136; Mar. 7.
Sheldon, Waldo, South Norwalk, Conn., assignor to Sheldon Machinery Corporation, New York, N. Y. Well drilling apparatus. 1,900,135; Mar. 7.
Shell Petroleum Corporation. (See Jones, Frank A., assignor.)
Sherrill, Clarence O., Cincinnati, Ohio. Earthwork and making same. 1,900,205; Mar. 7.
Shiffer, Harry R., Brownstown, Pa. Lubricant retainer. 1,900,868; Mar. 7.
Shirley, Roswell R., Rockford, Ill. Dairy products refrigerator. 1,900,306; Mar. 7.
Shrader, William T., assignor to The American Hat Co. Inc., Norwalk, Conn. Hat box. 1,900,420; Mar. 7.
Shuttleworth, Howard L., assignor to Mohawk Carpet Mills, Inc., Amsterdam, N. Y. Manufacture of pile fabrics. 1,899,990; Mar. 7.
Sickel, Louis C. (See Ackerman, Michael H., assignor.)
Sidav, William E., Richmond, England. Collapsible seat, stool, or chair with receptacle for holding articles. 1,900,847; Mar. 7.
Siegel, Charles. (See Siegel, Myer, assignor.)
Siegel, Myer, assignor of one-half to Charles Siegel, New York, N. Y. Dishwasher. 1,900,771; Mar. 7.
Siemens-Schuckertwerke Aktiengesellschaft. (See Gerlach, Fritz, assignor.)
Siers, John A. H., Jersey City, N. J. Separable fastener. 1,900,390; Mar. 7.
Silberstein, Isidor, Berlin, Germany. Electric resistance. 1,900,206; Mar. 7.
Silica Gel Corporation. (See Connolly, G. C., and Miller, assignors.)
Silver, Walter H., assignor to Deere & Company, Moline, Ill. Tractor guide. 1,900,525; Mar. 7.
Silverman, Mortimer. (See Dole, M. W., and Silverman.)
Simning, Roy B., assignor of one-fourth to Rollo G. Lacy, Duluth, Minn. Vehicle. 1,900,590; Mar. 7.
Simplex Equipment Company. (See Creveling, John L., assignor.)
Simplex Valve & Meter Company. (See Borden, Moro M., assignor.)
Sinclair Refining Company. (See Herthel, Eugene C., assignor.)
Skrlec, Paul, and J. Budnik, Hamtramck, Mich. Bowling ball rack. 1,900,469; Mar. 7.
Sladky, Alexander C., Milwaukee, Wis., assignor, by mesne assignments, to The Reeves Manufacturing Company, Dover, Ohio. Lock joint for metal pipes. 1,900,749; Mar. 7.
Slagel, Franklin G., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Control mechanism for evaporators. 1,900,526; Mar. 7.
Slagel, Franklin G., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Ice pan. 1,900,741; Mar. 7.
Slagel, Franklin G., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Evaporator. 1,900,742; Mar. 7.
Slanger, Leopold, Brooklyn, N. Y. Sleeve construction. 1,900,391; Mar. 7.
Smart, James H., Shanghai, China. Automatic secret telegraph system. 1,900,772; Mar. 7.
Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,885; Mar. 7.
Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,900,886; Mar. 7.
Smith, Albert A., Riverdale, N. J., assignor to Metropolitan Engineering Company, Brooklyn, N. Y. Electric welding apparatus. 1,899,991; Mar. 7.
Smith, Frasier, Zanesville, Ohio, assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Jar. Des. 89,420; Mar. 7.
Smith, H. B., Company, The. (See Smith, Stanley K., assignor.)
Smith, Henry B. (See Taylor, E. R., and Smith.)
Smith, Herbert C., Los Angeles, Calif. Building construction. 1,900,369; Mar. 7.
Smith, Herbert P., Emsworth, Pa. Automotive system. 1,900,470; Mar. 7.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,900,527; Mar. 7.
Smith, Nelson K., Los Angeles, assignor to Byron Jackson Co., West Berkeley, Calif. Tongs. 1,900,370; Mar. 7.
Smith, Nelson K., assignor to Byron-Jackson Co., Los Angeles, Calif. Tubing catcher. 1,900,371; Mar. 7.
Smith, Stanley K., assignor to The H. B. Smith Company, Westfield, Mass. Door construction. 1,900,079; Mar. 7.
Snavely, Earl R., Roselle, assignor to The Fire King Co., Inc., Union, N. J. Mercury switch. 1,900,080; Mar. 7.
Snelling, Walter O., Allentown, Pa. Foundry flask. 1,900,137; Mar. 7.
Snider, Herbert B., Ellensburg, Wash. Manicuring method and means. 1,900,028; Mar. 7.
Snyder, Almond H., Lancaster, assignor, by mesne assignments, to Gould Storage Battery Corporation, Depew, N. Y. Storage battery. 1,900,307; Mar. 7.
Snyder, Almond H., Lancaster, assignor, by mesne assignments, to Gould Storage Battery Corporation, Depew, N. Y. Storage battery cell. 1,900,308; Mar. 7.
Snyder, Henry C., Kis-Lyn, Pa. Cooking utensil. 1,900,619; Mar. 7.
Soc. Ital. Transfer Albini, S. I. T. A. (See Colombo, Carlo A., assignor.)
Società Italiana Pirelli. (See Emanueli, Luigi, assignor.)
Sohn, Erwin, Oak Park, Ill. Rack for electroplating. 1,899,992; Mar. 7.
Sommerville, William E., Coal City, Ill. Twisting and reeling mechanism for wire rope making machines. 1,900,309; Mar. 7.
Sommerville, William E., Coal City, Ill. Twister or strander. 1,900,310; Mar. 7.
Sorensen, Andrew J. (See Grondahl, L. O., and Sorensen.)
Sorensen, Andrew J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,900,408; Mar. 7.
Sorensen, Andrew J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,900,409; Mar. 7.
Sorensen, Andrew J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,900,410; Mar. 7.

Spear, Walter A., assignor to Victor Electric Products, Inc., Cincinnati, Ohio. Clock. 1,900,311; Mar. 7.
Specialty Insulation Manufacturing Company. (See Willey, Llewellyn M., assignor.)
Speidel, Edwin F. M. (See Augenstien, Karl C., assignor.)
Spencer, George M., Chicago, Ill. Fluid cleaner. 1,899,993; Mar. 7.
Sponable, Earl I., assignor to Fox Case Corporation, New York, N. Y. Apparatus for printing from a negative sound record to a positive. 1,900,853; Mar. 7.
Spotts, Ralph K., Los Angeles, Calif., assignor to Radio-Keith-Orpheum Corporation. Conversion of sound into electrical impulses. 1,899,994; Mar. 7.
Square D Company. (See Van Valkenburg, H. L., and McNicol, assignors.)
Stålhane, Otto, Stockholm, Sweden. Cement or materials containing cement. 1,900,670; Mar. 7.
Standard Oil Company. (See Arveson, Maurice H., assignor.)
Standard Oil Development Company. (See Loomis, N. E., and Tomlinson, assignors.)
Staniewicz, Willy, assignor to Automobilwerke H. Büssing, Aktiengesellschaft, Brunswick, Germany. Motor vehicle. 1,900,773; Mar. 7.
Star, Richard, Brooklyn, N. Y. Tank gauge. 1,900,774; Mar. 7.
Star, Richard, Brooklyn, N. Y. Tank gauge. 1,900,775; Mar. 7.
Statz, Robert, assignor to Walker Manufacturing Company, Racine, Wis. Jack. 1,900,528; Mar. 7.
Stauber, Georg, Berlin, Germany. Rotary mechanical apparatus. 1,900,620; Mar. 7.
Staud, Cyril J., and C. S. Webber, assignors to Eastman Kodak Company, Rochester, N. Y. Double alpha ketonic acid cellulose esters and making the same. 1,900,871; Mar. 7.
Stetson Shoe Company, The. (See Brady, Walter L., assignor.)
Stokes, John S., et al. (See Kuzmick, Joseph N., assignor.)
Storey, Ralph C. (See Ellis, G. H., Olpin, and Storey.)
Storm, Adolph, and T. Thorsen, assignors to Storm Manufacturing Co., Inc., Minneapolis, Minn. Lathe dead center actuating device. 1,900,261; Mar. 7.
Storm, Adolph, and T. Thorsen, assignors to Storm Manufacturing Co., Inc., Minneapolis, Minn. Clutch. 1,900,312; Mar. 7.
Storm Manufacturing Co. (See Storm, A., and Thorsen, assignors.)
Storm Manufacturing Company. (See Thorsen, Thor, assignor.)
Stratford, Herbert R., assignor to The Stratmore Company, Cleveland, Ohio. Surfacing. 1,900,313; Mar. 7.
Stratmore Company, The. (See Stratford, Herbert R., assignor.)
Strauchauer, Frederick W. (See Baxter, G. L., Strachauer, and Twogood.)
Strausser, Herbert S., Chicago, and H. T. Reynolds, Lombard, assignors to Otis Manufacturing Co., Chicago, Ill. Pocket lighter. 1,900,207; Mar. 7.
Strobl, Hans, Berlin-Tempelhof, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Bodensee, Germany. Airship. 1,900,743; Mar. 7.
Strobl, Hans, Berlin-Tempelhof, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschrankter Haftung, Friedrichshafen, Bodensee, Germany. Airship. 1,900 744; Mar. 7.
Strobridge, William, Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Operator's bench. 1,900,621; Mar. 7.
Strom, William S., Seattle, Wash. Sheet metal clamp. 1,900,314; Mar. 7.
Stromberg, Pehr W., Somerville, Mass., assignor of one-half to Willsie M. Mattison, Ogdensburg, N. Y. Air conditioning apparatus. 1,899,995; Mar. 7.
Studebaker Corporation, The. (See Ackerman, Albert H., assignor.)
Studebaker Corporation, The. (See Allee, Herbert D., assignor.)
Studebaker Corporation, The. (See Happ, Willard C., assignor.)
Studebaker Corporation, The. (See Hughes, James R., assignor.)
Studebaker Corporation, The. (See Kohr, Robert F., assignor.)
Studebaker Corporation, The. (See Sullivan, Perry W., assignor.)
Stump, Horace E., Lakeville, Conn., assignor to New England Lime Co., Pittsfield, Mass. Obtaining magnesium sulphate. 1,900, 392; Mar. 7.
Sukete Investment Company. (See Sutter, Erwin, L., assignor.)
Sullivan Machinery Company. (See Dovell, Dudley K., assignor.)
Sullivan, Perry W., assignor to The Studebaker Corporation, South Bend, Ind. Doorlock handle. 1,899,996; Mar. 7.
Sullivan, Perry W., assignor to The Studebaker Corporation, South Bend, Ind. Doorlock handle. 1,899,997; Mar. 7.
Sunderland, Charles C., New Brunswick, assignor to John A. Roebling's Sons Company, Trenton, N. J. Method and apparatus for spinning bridge cables. 1,899,998; Mar. 7.
Superior Carbon Products, Incorporated. (See Curtis, Arthur R., assignor.)
Surface Combustion Corporation. (See Burke, Stephen P., assignor.)
Surface Combustion Corporation. (See Cochran, Ralf S., assignor.)
Surface Combustion Corporation. (See De Croiolis, E. G., and Williams, assignors.)
Suter, Heinrich, assignor to Firm H. W. Egli A. G., Zurich, Switzerland. Calculating machine comprising axially displaceable setting wheels. 1,900,776; Mar. 7.
Sutter, Erwin L., assignor to The Sukete Investment Company, St. Paul, Minn. Progressive distributing lubricator. 1,900,745; Mar. 7.
Swank, Rehl W., assignor to Sharpsville Boiler Works Co., Sharpsville, Pa. Coupling. 1,900,208; Mar. 7.
Sweeney Lithograph Co. (See Watson, John, assignor.)
Swerer, Millard F., Jamestown, Calif. Adjustable door hinge. 1,900,081; Mar. 7.
Syntron Company, The. (See Hampton, George E., assignor.)
Tada, Renzo, Tokyo-Fu, Japan. Apparatus for forming concrete piles. 1,900,622; Mar. 7.
Talmadge, Richard E., Nutley, N. J., assignor to MacArthur Concrete Pile Corporation, New York, N. Y. Composite pile. 1,900,673; Mar. 7.
Tamura, Kenzo, Iriarai-Cho, G. Kihara, Suna-Machi, Y. Asahina, Tozuka-Cho, and M. Ishidate, Suginami-Cho, Japan. Manufacturing pure para-hydroxycamphor. 1,900,209; Mar. 7.
Tatham, Robert L., Chicago, Ill. Dishwasher. 1,900,529; Mar. 7.
Tatum, Will S., Hattiesburg, Miss. Drop frame body for trailers. 1,900,778; Mar. 7.
Taylor, Ernest R., and H. B. Smith, assignors to Eastman Kodak Company, Rochester, N. Y. Recovering cellulosic derivative scrap. 1,900,872; Mar. 7.
Taylor, Halsey W., Warren, Ohio. Drinking fountain. 1,900,591; Mar. 7.
Taylor, Robert S., Evansville, Ind., assignor to Electrolux Servel Corporation, New York, N. Y. Two-temperature evaporator. 1,900,674; Mar. 7.
Taylor, Steadman O. (See Alcott, James R., assignor.)
Taylor, Thomas G., Roswell, N. Mex. Well drilling apparatus. 1,900,029; Mar. 7.
Taylor, William J., and C. T. Cutting, assignors to The Lamson Company, Syracuse, N. Y. Pneumatic dispatch system. 1,900,592; Mar. 7.
Technicolor, Inc. (See Ball, Joseph A., assignor.)
Technicolor, Inc. (See Tuttle, Bertha S., assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Buschbeck, Werner, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Leib, August, assignor.)
Tell, R. P. (See Aikman, Burton S., assignor.)
Temple, John J., New York, assignor to Victor Metal Products Corporation, Brooklyn, N. Y. Machine for inserting corks into caps for collapsible tubes. 1,900,671; Mar. 7.
Teufl, Franz C. (See Goldberg, M. J., and Teufl.)
Tewksbury, Allen M., assignor of one-third to Blin W. Page, Skowhegan, Me. Method and apparatus for producing sound waves. 1,900,623; Mar. 7.
Texaco Salt Products Company. (See Martin, Otto V., assignor.)
Texas Company, The. (See Drake, Rollin L., assignor.)
Thayer Action Company. (See Dasenbrook, Charles H., assignor.)
Thoma, Andrew, Cambridge, assignor to North American Chemical Company, Boston, Mass. Filling shoes. 1,900,316; Mar. 7.
Thoma, Andrew, assignor to North American Chemical Company, Cambridge, Mass. Filling shoes. 1,900,317; Mar. 7.
Thomas & Betts Co., The. (See Buchanan, Stephen N., assignor.)
Thomas & Betts Co. (See Church, Lewis H., assignor.)
Thomas, W. C. (See Dickens, James C., assignor.)
Thompson, James S., New Rochelle, N. Y., assignor to Firebar Corporation, Cleveland, Ohio. Grate. 1,900,530; Mar. 7.
Thompson, Lawson, et al. (See Weir, William E., assignor.)
Thompson, Ralph, et al. (See Weir, William F., assignor.)
Thoresen, Carl B., Richmond Hill, and F. B. Eliassen, Brooklyn, N. Y. Automatic hood lock for vehicles. 1,900,777; Mar. 7.
Thorsen, Thor. (See Storm, A., and Thorsen.)
Thorsen, Thor, Plymouth Township, Hennepin County, assignor to Storm Manufacturing Company, Minneapolis, Minn. Babbitting device. 1,900,746; Mar. 7.
Thwing, Charles B., assignor to Thwing Instrument Company, Philadelphia, Pa. Pyrometer. 1,900,779; Mar. 7.
Thwing Instrument Company. (See Thwing, Charles B., assignor.)
Ties, Fred M., Brodhead, Wis. Rod and pipe grapple. 1,900,471; Mar. 7.

Told, Arnold H., Chicago, Ill. Wheel stop. 1,900,210; Mar. 7.
Toledo Metal Furniture Company, The. (See Uhl, Clement R., assignor.)
Tomlinson, Albert H. (See Loomis, N. E., and Tomlinson.)
Toro Manufacturing Company. (See Moyer, Amos F., assignor.)
Torrisi, Samuel S., Philadelphia, Pa., assignor to The Burdick Corporation, Milton, Wis. Therapeutic lamp. 1,900,138; Mar. 7.
Tosterud, Martin, Arnold, Pa., assignor, by mesne assignments, to Aluminum Colors Incorporated, Indianapolis, Ind. Coating on aluminum. 1,900,472; Mar. 7.
Tracy, Homer D., Ridgewood, N. J. Blade sharpener and the like. 1,900,374; Mar. 7.
Trans-Lux Daylight Picture Screen Corporation. (See Unkles, Edward H., assignor.)
Tregoning, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Attachment plug cap and making the same. 1,900,139; Mar. 7.
Treppenhauer, Max. (See Schmidt, O., Treppenhauer, Grosskinsky, and Fisher.)
Trout, Walter C., Lufkin, Tex. Pumping power. 1,900,675; Mar. 7.
Tully, Hugh C., New York, N. Y. Airplane. 1,900,473; Mar. 7.
Tuttle, Bertha S., Boston, Mass., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y. Imbibition printing with pure primary colors and product. 1,900,140; Mar. 7.
Twist, Albert E. (See Schroeder, F. A., and Twist.)
Twogood, Ralph S. (See Baxter, G. L., Strachauer, and Twogood.)
Tyden, Emil. Hastings, Mich. Pressure venting device for dry pipe sprinkler systems. 1,900,262; Mar. 7.
Uhl, Clement R., assignor to The Toledo Metal Furniture Company, Toledo, Ohio. Caster. 1,900,672; Mar. 7.
Uhlhorn, Walter J. (See Russell, B. B., and Uhlhorn.)
Uhlich, Erich, and Walter Ballentin, genannt Mielke, Berlin-Hirschgarten, Germany. Sun and planet wheel gear. 1,899,999; Mar. 7.
Uhrig, Anna K. (See Uhrig, Katherine E. and A. K.)
Uhrig, Katherine E. and A. K., Dayton, Ohio. Arm sling. Des. 89,417; Mar. 7.
Ulich, Lynne, Racine, and R. J. Goodrich, South Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Purifying an anthraquinone body. 1,900,001; Mar. 7.
Ulrey, Clayton T., East Orange, N. J., assignor to Westinghouse Lamp Company. Electrical discharge device. Des. 89,418; Mar. 7.
Underwood Elliott Fisher Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Elliott Fisher Company. (See Smith, Jesse A. B.)
Underwood, Western, Santa Monica, assignor to La Lux Manufacturing Company, Los Angeles, Calif. Core for molds. 1,900,372; Mar. 7.
Union Steel Products Company. (See Bitney, Dewey H., assignor.)
Union Switch & Signal Company, The. (See Bossart, Paul N., assignor.)
Union Switch & Signal Company, The. (See Devol, Lee, assignor.)
Union Switch & Signal Company, The. (See Grondahl, Lars O., assignor.)
Union Switch & Signal Company, The. (See Grondahl, L. O. and Sorensen, assignors.)
Union Switch & Signal Company, The. (See Hines, Claude M., assignor.)
Union Switch & Signal Company, The. (See Place, Willard P., assignor.)
Union Switch & Signal Company, The. (See Sorensen, Andrew J., assignor.)
Unipress Company, The. (See Lindemann, Frederick W., assignor.)
Unipress Company, The. (See Wilhelm, Fred C., assignor.)
United Metal Goods Mfg. Co. (See Buhrle, Paul, assignor.)
United Shoe Machinery Corporation. (See Chapin, Herbert L., assignor.)
United Shoe Machinery Corporation. (See Glidden, Harvey L., assignor.)
United Shoe Machinery Corporation. (See Gookin, Sylvester L., assignor.)
United States Gypsum Company. (See Manske, F. A., Odenwaldt, and Gibson, assignors.)
United States Gypsum Company. (See Offutt, James S., assignor.)
United States Hoffman Machinery Corporation. (See Card, John L., assignor.)
United States Hoffman Machinery Corporation. (See Strobridge, William, assignor.)
United States Wind Engine & Pump Company. (See Wenberg, Oscar A., assignor.)
Universal Oil Products Company. (See Bergman, Donald J., assignor.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Universal Oil Products Company. (See Fairchild, Oscar H., assignor.)
Universal Oil Products Company. (See Halle, Hiram J., assignor.)
Universal Oil Products Company. (See Howard, William R., assignor.)
Universal Oil Products Company. (See Van Heeden, Arthur P., assignor.)
Unkles, Edward H., Weehawken, N. J., assignor to Trans-Lux Daylight Picture Screen Corporation, New York, N. Y. Tape puller. 1,900,421; Mar. 7.
Vadset, Johan G., Stavanger, Norway. Rudder for seagoing vessels. 1,900,848; Mar. 7.
Vallquette, Joseph E., Webbwood, Ontario, Canada. Motor sled. 1,900,315; Mar. 7.
Van Billiard, Maynard. (See Keller, H. C., and Van Billiard, assignors.)
Vanderbeek, Samuel W. (See Grant, A. E., and Vanderbeek.)
Van Derhoef, Henry E., assignor to Eastman Kodak Company, Rochester, N. Y. Making cellulose nitrate film and similar products. 1,900,873; Mar. 7.
Van Heeden, Arthur P., assignor to Universal Oil Products Company, Chicago, Ill. Making producer gas. 1,900,141; Mar. 7.
Vanick, James S. (See Merica, P. D., Vanick, and Wickenden.)
Van Valkenburg, Hermon L., Wauwatosa, and F. C. McNicol, Milwaukee, Wis., assignors to Square D Company, Detroit, Mich. Resistor construction. 1,900,318; Mar. 7.
Varell, Anna D., New York, N. Y. Wrinkle eradicator. 1,900,002; Mar. 7.
Vermeulen, Aurèle, Los Angeles, Calif. Structural device. 1,900,319; Mar. 7.
Victor Electric Products, Inc. (See Spear, Walter A., assignor.)
Victor Metal Products Corporation. (See Prussing, Walter, assignor.)
Victor Metal Products Corporation. (See Temple, John J., assignor.)
Vitu, James E., assignor to Well Pump Company, Chicago, Ill. Multistage centrifugal pump. 1,900,531; Mar. 7.
Vodoz, Frederick W., Wilmette, assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,900,780; Mar. 7.
Von Webern, Guido, and E. W. Hamant, Dayton, Ohio, assignors to Oxford Varnish Corporation, Detroit, Mich. Surface decorating machine. 1,900,030; Mar. 7.
Voortmann, Walter, Dortmund, Germany. Safety device for blasting charges employed in mining and similar work. 1,900,624; Mar. 7.
Wade, Raymond B., Swampscott, Mass., assignor to General Electric Company. Shaft bearing. 1,900,593; Mar. 7.
Wagenius, C., et al. (See Christensen, John L., assignor.)
Wagner, Charles L., Boonton, N. J., and H. Freeman, Shawinigan Falls, Quebec, Canada, assignors to J. O. Ross Engineering Corporation, New York, N. Y. Recovering chemicals from waste liquors. 1,900,320; Mar. 7.
Wahl, Ottmar, Leverkusen, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Dyestuff derived from indoline bases and preparing same. Re18,758; Mar. 7.
Wahlsten, Gösta. (See Lysholm, A., Horney, and Wahlsten.)
Waksmöncki, Joseph, Mosinee, Wis. Animal stanchion. 1,900,676; Mar. 7.
Walker, Charles E., Catskill, N. Y., assignor to Lancaster Iron Works, Lancaster, Pa. Pallet feeding device. 1,900,625; Mar. 7.
Walker, Earl C., Chicago, and G. W. Engstrom, Riverside, Ill., assignors to International Harvester Company. Burner. 1,900,003; Mar. 7.
Walker Manufacturing Company. (See Stutz, Robert, assignor.)
Wallace, Charles F., Westfield, assignor to Wallace & Tiernan Products, Inc., Belleville, N. J. Apparatus for feeding solutions. 1,900,142; Mar. 7.
Wallace, Charles F., Westfield, assignor to Wallace & Tiernan Products, Inc., Belleville, N. J. Apparatus for feeding solutions. 1,900,143; Mar. 7.
Wallace, Donald J., assignor of one-half to R. H. Mulford, Long Beach, Calif. Entrance control. 1,900,422; Mar. 7.
Wallace, James D., Washington, D. C. High frequency measuring apparatus. 1,900,082; Mar. 7.
Wallace & Tiernan Products, Inc. (See Wallace, Charles F., assignor.)
Waller, John A., Beverley Hills, assignor to Waller Manufacturing Corporation, Ltd., Los Angeles, Calif. Saw setting device. 1,900,083; Mar. 7.
Waller, John A., Beverley Hills, assignor to Waller Manufacturing Corporation, Ltd., Los Angeles, Calif. Saw filing device. 1,900,084; Mar. 7.
Waller Manufacturing Corporation Ltd. (See Waller, John A., assignor.)
Wallgren, August G. F., assignor to Aktiebolaget Nomy, Stockholm, Sweden. Bearing. 1,900,874; Mar. 7.
Wallgren, August G. F., assignor to Aktiebolaget Nomy, Stockholm, Sweden. Bearing. 1,900,875; Mar. 7.
Wallis, John Samuel, assignor to Foster Wheeler Corporation, New York, N. Y. Oil fractionation. 1,900,085; Mar. 7.
Ward, Clarence E. (See Andres, W. J., and Ward.)
Wardley, Thomas, Greenford, England. Manufacture of glassware. 1,900,781; Mar. 7.
Waters-Genter Company. (See Rohne, Even J., assignor.)

Watson, George O., Rugby, England, assignor to General Electric Company. Electric ship propulsion. 1,900,594; Mar. 7.
Watson, John, Passaic, assignor to Sweeney Lithograph Co., Inc., Belleville, N. J. Easel. 1,900,375; Mar. 7.
Watson, Joseph R., assignor to V. L. Watson, San Francisco, Calif. Fire resistant and preservative composition. 1,900,211; Mar. 7.
Watson, Joseph R., assignor to V. L. Watson, San Francisco, Calif. Fire resistant and preservative composition and making same. 1,900,212; Mar. 7.
Watson, Virginia L. (See Watson, Joseph R., assignor.)
Way, Chester M., Burlington, Vt. Light plug. 1,900,782; Mar. 7.
Webber, Charles S. (See Staud, C. J., and Webber.)
Weber, Louis J., Schenectady, N. Y., assignor to General Electric Company. Circuit controlling and protective device. 1,900,595; Mar. 7.
Wehrle Company, The. (See Pickup, George E., assignor.)
Weidhaas, Gustav A., Bronxville, P. Clark, Great Neck, and H. V. Harding, New York, N. Y.; said Clark and said Harding assignors to said Weidhaas. Curtain and controlling means therefor. 1,900,677; Mar. 7.
Well Pump Company. (See Vitu, James E., assignor.)
Weir, Fred W., Pittsburgh, Pa. Apparatus for welding tubes. 1,900,376; Mar. 7.
Weir, William F., assignor to R. and L. Thompson, Holden, W. Va. Engine. 1,900,086; Mar. 7.
Weiss, John F., Philadelphia, Pa. Holder for paraffin fluid containers. 1,900,783; Mar. 7.
Welsh, Ezra C., Grimsby, Ontario, Canada. Traffic regulator. 1,900,532; Mar. 7.
Wenberg, Oscar A., assignor to United States Wind Engine & Pump Company, Batavia, Ill. Grain handling device. 1,900,213; Mar. 7.
Wening, Frederick. (See Glatthar, G. E., and Wening.)
Wesnigk, Erwin. (See Zagorski, J., and Wesnigk.)
West Bend Aluminum Company. (See Kircher, Ralph N., assignor.)
Wester, Stefan, Easton, Pa. One-piece coat. 1,900,678; Mar. 7.
Western Cartridge Company. (See Ernst, Hans, assignor.)
Western Newspaper Union. (See Pawlitschko, Anton R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Dohner, Donald R., assignor.)
Westinghouse Lamp Company. (See Ferguson, John E., assignor.)
Westinghouse Lamp Company. (See Hageman, A. M., and Lindstrom, assignors.)
Westinghouse Lamp Company. (See Ulrey, Clayton T., assignor.)
Whitaker, Alfred, West Drayton, England, assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Sound recording system. 1,900,679; Mar. 7.
White, Clarence L., Cuyahoga Falls, Ohio. Shoe sole. Des. 89,419; Mar. 7.
White, George E., San Diego, Calif. Binder ring. 1,900,321; Mar. 7.
White Motor Company, The. (See Church, Harold D., assignor.)
White, William M., Milwaukee, Wis. Hydraulic machine. 1,900,144; Mar. 7.
Whiting, William A., Huntington Park, Calif., assignor to American Concrete Pipe Company. Precaulked extensible joint for pipes. 1,900,145; Mar. 7.
Whitlock Coil Pipe Company, The. (See Parent, Emile J., assignor.)
Whitney, Chancy F., Scotia, N. Y., assignor to General Electric Company. Electric control system. 1,900,596; Mar. 7.
Whitney Mfg. Co., The. (See Müller, Friederick, assignor.)
Whitworth, Stanley, assignor to Bendix Brake Company, South Bend, Ind. Forming brake shoes and blanks therefor. 1,900,004; Mar. 7.
Wickenden, Thomas H. (See Merica, P. D., Vanick, and Wickenden.)
Wilcolator Company, The. (See Hunt, Edward Mc.K., and Fonesca, assignors.)
Wilcox, Leland J., Adel, Iowa. Automatic pressure release gauge. 1,900,533; Mar. 7.
Wilcox & Rich Corporation. (See Hoern, Joseph H., assignor.)
Wiley, Wallace K., and H. J. Cudney, Buffalo, assignors to Flexlume Corporation, Tonawanda, N. Y. Illuminated sign. 1,900,747; Mar. 7.
Wilhelm, Fred C., assignor to The Unipress Company, Inc., Minneapolis, Minn. Pressing pad ventilating apparatus. 1,900,748; Mar. 7.
Wilkins, Albert M., assignor to Cook Electric Company, Chicago, Ill. Draft controller. 1,900,214; Mar. 7.
Wilkins, Richard A., Beverly Farms, assignor to Industrial Development Corporation, Salem, Mass. Electrolytic apparatus. 1,900,534; Mar. 7.
Willey, Llewellyn M., assignor to Specialty Insulation Manufacturing Company, Inc., Hoosick Falls, N. Y. Handle. 1,900,423; Mar. 7.
Willhelm, William, Co. (See Hellman, Carl R., assignor.)
Williams, Djalma D., Dallas, Tex., assignor to Chicago Bridge and Iron Company, Chicago, Ill. Wrecking device. 1,900,031; Mar. 7.
Williams, Gladys R. T., Cleveland, Ohio. Electric butter churn. 1,900,626; Mar. 7.
Williams Oil-O-Matic Heating Corporation. (See Kupersmith, Fred W., assignor.)
Williams, Percy Q. (See De Coriolis, E. G., and Williams.)
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank dome closure. 1,900,627; Mar. 7.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank dome closure. 1,900,628; Mar. 7.
Wilson, Chester C., Alexandria, Ind. Voltage transforming apparatus for direct current. 1,900,215; Mar. 7.
Wilson, Lancelot R. (See Clay, J. B., and Wilson.)
Wilson, Lawrence B., Tucson, Ariz. Two part couch. 1,900,474; Mar. 7.
Wilson, William H. (See Land, Charles H., and Wilson.)
Winding Gulf Collieries. (See Jones, Emory E., assignor.)
Winkler, Bruno E., Detroit, Mich. Lock for screw fastening members. 1,900,146; Mar. 7.
Winquist, Victor H., Seattle, Wash. Sleeve valve two cycle engine. 1,900,475; Mar. 7.
Winthrop Chemical Company, Inc. (See Krollpfeiffer, Friedrich, assignor.)
Wired Radio, Inc. (See Gebhard, Louis A., assignor.)
Wirth, Dorsey M., Bucyrus, Ohio. Belt buckle. 1,900,147; Mar. 7.
Witt, Joshua C., Chicago, Ill. Coloring material. 1,900,216; Mar. 7.
Wittel, Otto, assignor to Eastman Kodak Company, Rochester, N. Y. Motion picture film feeding device. 1,900,876; Mar. 7.
Wittemeier, Hans, Berlin-Grunewald, Germany, assignor to Midwest Manufacturing Company, Inc., Louisville, Ky. Filtering apparatus. 1,900,476; Mar. 7.
Wittemeier, Hans, Berlin-Grunewald, Germany, assignor to Midwest Manufacturing Company, Inc., Louisville, Ky. Optical gas tester. 1,900,477; Mar. 7.
Witzel, Heinrich W., Ingram, assignor to The Selden Company, Pittsburgh, Pa. Purification of crude maleic acids. 1,900,680; Mar. 7.
Wolf, Frederick B. (See Koenig, L. R., and Wolf.)
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Inking mechanism for printing presses. 1,900,263; Mar. 7.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Web splicing apparatus. 1,900,264; Mar. 7.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Machine for casting stereotype printing plates. 1,900,265; Mar. 7.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Fountain roll cleaner. 1,900,266; Mar. 7.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Method of and apparatus for feeding paper to printing presses. 1,900,535; Mar. 7.
Wood Newspaper Machinery Corporation. (See Jordboy, Hans C., assignor.)
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, Richard V., Louisville, Ky. Device for stabilizing cards, files, etc., in filing drawers or boxes. 1,900,148; Mar. 7.
Wood, Walter A. (See Hughes, Edward P., assignor.)
Woodbury, Eugene, Lincoln Park, N. J. Electrical testing. 1,900,424; Mar. 7.
Worthington, Warren, Pittsburgh, Pa. Bar mill. 1,900,032; Mar. 7.
Wuerfel, Robert P., Ann Arbor, Mich. Radio circuit. 1,900,629; Mar. 7.
Wuerthner, Martin. (See Schlenker, L. F., and Wuerthner.)
Yasuda, Seiichi, Osaka-Fu, Japan. Playboard. 1,900,005; Mar. 7.
Yaxley Manufacturing Company. (See Hall, Arthur, assignor.)
Yoder, Carl M., Lakewood, Ohio. Machine for and process of forming metal into shapes. Re18,760; Mar. 7.
Yost, B. F. (See Meredith, Jacquelin M., assignor.)
Youman, Burt C., assignor to California Packing Corporation, San Francisco, Calif. Fish auger. 1,900,267; Mar. 7.
Yungling, Paul F., assignor to Scott-Ross and Company, Los Angeles, Calif. Valve mechanism. 1,900,268; Mar. 7.
Zagorski, Johann, Frankfort-on-the-Main, and E. Wesnigk, Berlin, Germany. Rolling mill. 1,900,630; Mar. 7.
Zeiss, Firm, Carl. (See König, Albert, assignor.)
Zellers, John A. (See Rand, J. H., jr., and Zellers.)
Zimmermann, Max E., assignor of one-half to K. Schumacher, Los Angeles, Calif. Cover gripping device. 1,900,478; Mar. 7.
Zint, George, Wapakoneta, Ohio. Rotary steam engine. 1,900,784; Mar. 7.
Zitscher, Arthur. (See Laska, L., and Zitscher.)
Zola, John C., Tarentum, Pa., assignor to Duplate Corporation. Laminated glass. 1,900,536; Mar. 7.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive product and making the same. J. N. Kuzmick. 1,900,386; Mar. 7.
Abrasive, Water repellent. R. S. Daniels. 1,900,430; Mar. 7.
Acetylene, Separation of. F. J. Metzger. 1,900,655; Mar. 7.
Acid and producing same, 1,5-dichloro-2,6-diamino-anthraquinone-3,7-disulphonic. W. L. Rintelman. 1,899,986; Mar. 7.
Acid cellulose esters and making the same, Double alpha-ketonic. C. J. Staud and C. S. Webber. 1,900,871; Mar. 7.
Acid process, Contact sulphuric. A. O. Jaeger. 1,900,383; Mar. 7.
Acids, Preparing anthraquinone sulphonic. I. Gubelmann and W. L. Rintelman. 1,899,957; Mar. 7.
Acids, Purification of crude dicarboxylic. A. O. Jaeger. 1,900,649; Mar. 7.
Acids, Purification of crude maleic. H. W. Witzel. 1,900,680; Mar. 7.
Acyl derivatives of 4,4'-diamino diphenyl oxide. E. F. Grether. 1,900,442; Mar. 7.
Addressing machine. W. T. Gollwitzer. 1,900,281; Mar. 7.
Addressing machine and other similar printing machines. A. Eley. 1,900,279; Mar. 7.
Advertising device. F. Hund. 1,900,061; Mar. 7.
Advertising device. G. O. Matter. 1,900,187; Mar. 7.
Air brake. C. A. Campbell. 1,900,043; Mar. 7.
Air compressor. N. Herzmark. 1,900,284; Mar. 7.
Air conditioning apparatus. E. M. Hun and E. L. Fonseca. 1,900,501; Mar. 7.
Air conditioning apparatus. P. W. Stromberg. 1,899,995; Mar. 7.
Aircraft. H. Junkers. 1,900,502; Mar. 7.
Aircraft, Control mechanism for. R. P. Mueller. 1,900,068; Mar. 7.
Air drier. R. Reumelin. 1,899,988; Mar. 7.
Airplane. F. G. Baum. 1,900,689; Mar. 7.
Airplane. H. C. Tully. 1,900,473; Mar. 7.
Airplane wing. F. G. Baum. 1,900,688; Mar. 7.
Airplanes, Spar for. W. Messerschmitt. 1,900,067; Mar. 7.
Airship. H. Strobl. 1,900,743–4; Mar. 7.
Alcohol, Apparatus for saving radiator. A. W. Murphy. 1,900,727; Mar. 7.
Alcohol from wine, cider, beer, and other alcoholic products, Apparatus for the removal of. M. Conpeau and M. Delaville. 1,900,694; Mar. 7.
Alimentary product forming device. H. C. Arge. 1,900,854; Mar. 7.
Alloy, Gray iron. P. D. Merica, J. S. Vanick, and T. H. Wickenden. 1,900,125; Mar. 7.
Alloy, Metallic. D. D. Jackson. 1,900,182; Mar. 7.
Alumina and phosphorus or phosphoric acid, Producing. E. Johnson. 1,900,287; Mar. 7.
Amino-diphenylamine, Substituted. J. Büsdorf and F. Löfund. 1,900,426; Mar. 7.
Ammunition. J. E. Burns. 1,900,157; Mar. 7.
Ammunition. A. Campbell. 1,900,159; Mar. 7.
Anchor, Earth. W. A. Heinrich. 1,900,498; Mar. 7.
Anchoring means. A. Janer. 1,900,560; Mar. 7.
Animal feeder. F. R. Ritchie. 1,900,868; Mar. 7.
Animal trap. V. Bailey. 1,900,219; Mar. 7.
Animal trap. J. Hartshorn. 1,900,645; Mar. 7.
Animal trap. J. I. Pneuman. 1,900,733; Mar. 7.
Antifreeze composition. G. D. Graves. 1,900,014; Mar. 7.
Applicator, Cyanide. K. A. Kilbourne. 1,900,717; Mar. 7.
Arc, Adjustable. W. Hinckelmann. 1,900,500; Mar. 7.
Aromatic compounds, Catalytic side chain oxidation of. A. O. Jaeger. 1,900,648; Mar. 7.
Assembling and transporting stacked articles. G. W. Butts. 1,900,756; Mar. 7.
Atomizer. L. V. Aronson. 1,900,087; Mar. 7.
Auger, Fish. B. C. Youman. 1,900,267; Mar. 7.
Automatic valve. W. A. McLean. 1,900,514; Mar. 7.
Automobile accessory. H. A. King. 1,900,448; Mar. 7.
Automobile construction, Heavy duty. H. D. Church. 1,900,484; Mar. 7.
Automobile table. F. Bayman and R. C. Brennesholtz. 1,900,325; Mar. 7.
Automotive system. H. P. Smith. 1,900,470; Mar. 7.
Azodyestuffs, New. L. Laska and A. Zitscher. 1,900,351; Mar. 7.
Babbitting device. T. Thorsen. 1,900,746; Mar. 7.
Bag: *See*—
Fitted traveling bag. Storage bag.
Hand bag.
Bag coupling. F. Riebel, jr., and D. M. Dow. 1,900,366; Mar. 7.

Bag rack. Bicycle newspaper. E. D. Murphy. 1,900,070; Mar. 7.
Ballast tamper, End. C. C. Cook. 1,899,944; Mar. 7.
Band tying machine, Flat. L. M. Harvey. 1,900,238; Mar. 7.
Bar mill. W. Worthington. 1,900,082; Mar. 7.
Bars while in motion, Controlling the shearing of metal. M. Morgan. 1,900,252; Mar. 7.
Basket handle machine. L. M. Hile. 1,900,181; Mar. 7.
Battery: *See*—
Storage battery.
Battery cell, Storage. A. H. Snyder. 1,900,308; Mar. 7.
Bead forming machine. W. J. Dean. 1,899,947; Mar. 7.
Bearing: *See*—
Shaft bearing.
Bearing. A. G. F. Wallgren. 1,900,874–5; Mar. 7.
Belt, Duplex link. F. L. Morse. 1,900,192; Mar. 7.
Belt guide construction, Feed. W. F. Newhouse. 1,900,657; Mar. 7.
Belt splice, Apparatus for making a. W. J. Sculley. 1,900,402; Mar. 7.
Bench, Operator's. W. Strobridge. 1,900,621; Mar. 7.
Binder, Loose leaf. J. C. Dawson. 1,900,334; Mar. 7.
Binder, Loose leaf. J. C. Dawson. 1,900,431; Mar. 7.
Binder, Loose leaf. C. H. Moore. 1,900,840; Mar. 7.
Binder ring. G. E. White. 1,900,321; Mar. 7.
Block: *See*—
Building block. Hoisting block.
Furnace block.
Blow-out preventing attachment for casing heads. L. J. Black. 1,899,922; Mar. 7.
Board: *See*—
Cedar board.
Boat installation. Motor. J. W. Harvey. 1,900,180; Mar. 7.
Boats, Corrosion preventing attachment for. H. L. Durham. 1,900,011; Mar. 7.
Book. R. M. Gunnison. 1,899,958; Mar. 7.
Book, Loose leaf. A. Felder. 1,900,601; Mar. 7.
Bottle hood, Milk. W. H. Orem. 1,900,127; Mar. 7.
Bottle receiver, Milk. C. B. Oster and H. Rainey. 1,900,729; Mar. 7.
Bow for hat bands or the like, Decorative. S. F. Bauwens. 1,900,481; Mar. 7.
Bowling ball rack. P. Skrlec and J. Budnik. 1,900,469; Mar. 7.
Box: *See*—
Fire box. Letter box.
Hat box.
Box. H. Lubin. 1,900,828; Mar. 7.
Box making machine. J. W. Low. 1,900,892; Mar. 7.
Brake: *See*—
Air brake.
Brake. F. C. Frank. 1,900,178; Mar. 7.
Brake. R. F. Kohr. 1,899,967; Mar. 7.
Brake adjuster, Automatic. H. E. Brice. 1,900,791; Mar. 7.
Brake cable tube. E. J. Madden. 1,900,512; Mar. 7.
Brake construction. E. R. Evans. 1,900,546; Mar. 7.
Brake drum. R. J. Norton. 1,900,844; Mar. 7.
Brake drum or member. J. H. Crowe. 1,900,804; Mar. 7.
Brake for airplanes, Air. G. M. Bellanca. 1,900,631; Mar. 7.
Brake for railway motor cars, Mechanical. P. Halbach. 1,900,282; Mar. 7.
Brake mechanism. C. S. Bragg and V. W. Kilesrath. 1,900,155; Mar. 7.
Brake mechanism for conveyers. M. J. Anderson. 1,900,149; Mar. 7.
Brake operating tube. E. J. Madden. 1,900,511; Mar. 7.
Brake shoes and blanks therefor, Forming. S. Whitworth. 1,900,004; Mar. 7.
Brake testing instrumentality. C. H. Oliver. 1,900,581; Mar. 7.
Brakes, Apparatus for the control of train. L. O. Grondahl. 1,900,403; Mar. 7.
Brakes, Apparatus for the control of vehicle. L. O. Grondahl. 1,900,404; Mar. 7.
Breast wrench. J. Dudulets. 1,900,169; Mar. 7.
Brick backing apparatus. F. C. Layer. 1,900,243; Mar. 7.
Brickwork construction for regenerators, Checker. J. F. Hyslop. 1,900,817; Mar. 7.
Briquette and process of manufacture. A. A. Epstein. 1,900,173; Mar. 7.
Brush, shaving. J. D. Powell. 1,899,984; Mar. 7.
Brushes, Making cup. R. G. Mertes. 1,900,575; Mar. 7.
Buck structure for laundry presses. F. W. Lindemann. 1,900,720; Mar. 7.

Buckle. A. Mentkow. Des. 89,405; Mar. 7.
Buckle, Belt. D. M. Wirth. 1,900,147; Mar. 7.
Building block. W. R. Miller. 1,900,457; Mar. 7.
Building construction. H. C. Smith. 1,900,869; Mar. 7.
Building front. A. W. Porter. Des. 89,409; Mar. 7.
Bulb and coloring the same. M. Pipkin. 1,900,468; Mar. 7.
Burner: *See*—
Gas burner.
Burner. P. Gervasi. 1,899,951; Mar. 7.
Burner. E. C. Walker and G. W. Engstrom. 1,900,003; Mar. 7.
Bushing, Kelly. W. D. Davidson. 1,899,946; Mar. 7.
Bushings, Making. F. C. Morris. 1,900,298; Mar. 7.
Buttonhole sewing machine. F. A. Reece. 1,900,076; Mar. 7.
Cabinet. H. D. Broughton. 1,900,793; Mar. 7.
Cabinet, Pump. W. H. Curtis. Des. 89,386; Mar. 7.
Cable. C. P. Brodhun. 1,900,041; Mar. 7.
Cable, Armored. O. A. Frederickson. 1,900,492; Mar. 7.
Cable, High tension electric. L. Emanuel. 1,900,600; Mar. 7.
Cable, Noninductive. C. P. Brodhun. 1,900,792; Mar. 7.
Cables, Method and apparatus for spinning bridge. C. C. Sunderland. 1,899,998; Mar. 7.
Cables, Method of and machine for binding. A. B. Curtis. 1,900,695; Mar. 7.
Calcium gluconate and making same, Highly soluble. R. Pasternack and W. R. Giles. 1,900,517; Mar. 7.
Calculating machine. L. R. Brown. 1,900,042; Mar. 7.
Calculating machine. W. S. Gubelmann. 1,900,103; Mar. 7.
Calculating machine comprising axially displaceable setting wheels. H. Suter. 1,900,776; Mar. 7.
Calculating machines and the like, Carrying mechanism for. R. Haase. 1,900,808; Mar. 7.
Camera apparatus, Portable. B. McCandless. 1,900,020; Mar. 7.
Camera back. W. H. Petit and E. S. Hineline. 1,900,730; Mar. 7.
Camera stand, Depthograph. C. W. Kanolt. 1,900,562; Mar. 7.
Camphor, Manufacturing pure para-hydroxy. K. Tamura, G. Kihara, Y. Asahina, and M. Ishidate. 1,900,209; Mar. 7.
Candelabrum. I. Cooperstein and A. Levitt. Des. 89,423; Mar. 7.
Cap, protecting. E. E. Cooper. 1,900,098; Mar. 7.
Capacitor protector. F. W. Gay. 1,900,495; Mar. 7.
Capping machine. R. L. Drake. 1,900,637; Mar. 7.
Car bolsters, Reclaiming. J. B. Alcott. 1,900,682; Mar. 7.
Car construction, Box. O. W. Galloway. 1,900,548; Mar. 7.
Car, Drop bottom. C. A. Griffith. 1,900,056; Mar. 7.
Car outlet valve, Tank. C. O. Buenger. 1,899,938; Mar. 7.
Car, Railway. E. E. Schlotz. 1,900,134; Mar. 7.
Cardan shaft. F. A. Garrett. 1,900 052; Mar. 7.
Cards, files, etc., in filing drawers or boxes, Device for stabilizing. R. V. Wood. 1,900,148; Mar. 7.
Carpet. F. Murphy. Des. 89,406; Mar. 7.
Case: *See*—
Vanity case.
Case and holder for musical instruments, Combined carrying. A. S. Lang. 1,900,718; Mar. 7.
Casing for rotary cutting implement. P. J. Fitzgerald. Des. 89,424; Mar. 7.
Casing head, Multicap. W. D. Shaffer. 1,900,260; Mar. 7.
Cash register, Alarmed. F. Piani. 1,900,519; Mar. 7.
Caster. C. R. Uhl. 1,900,672; Mar. 7.
Catalysts for the production of oxygenated organic compounds. O. W. Lusby. 1,900,829; Mar. 7.
Catalysts for the removal of organic sulphur compounds from gases. O. W. Lusby. 1,900,882; Mar. 7.
Catalytic apparatus. A. O. Jaeger. 1,900,382; Mar. 7.
Catch, Adjustable door. R. F. Rime. 1,900,077; Mar. 7.
Cedar board. J. F. Mahlstedt and A. V. A. Felten. 1,900,830; Mar. 7.
Cellulose ether composition. W. W. Lewers and G. L. Schwartz. 1,900,507; Mar. 7.
Cellulose fiber pulp, Treating. H. C. Schwalbe. 1,899,989; Mar. 7.
Cellulose formates, Production of. E. Elöd. 1,900,599; Mar. 7.
Cellulose nitrate film and similar products, Making. H. E. Van Derhoef. 1,900,873; Mar. 7.
Cellulosic derivative scrap, Recovering. E. R. Taylor and H. B. Smith. 1,900,872; Mar. 7.
Cement and making dental cement, Dental. V. S. Harshman. 1,900,237; Mar. 7.
Cement or materials containing cement. O. Stälhane. 1,900,670; Mar. 7.
Cementing composition. L. V. Adams. 1,900,587; Mar. 7.
Centrifugal pump, Multistage. J. E. Vitu. 1,900,581; Mar. 7.
Chain: *See*—
Ornamental chain.
Chain assembling means, Automatic. F. Müller. 1,899,976; Mar. 7.
Chain link and integral head articulating pintle. F. A. Fahrenwald. 1,899,948; Mar. 7.
Chair: *See*—
Folding chair.
Changeable exhibitor. B. S. Hayter. 1,900,059; Mar. 7.
Charge forming device. F. E. Aseltine. 1,900,685; Mar. 7.
Charge forming device. F. C. Mock. 1,900,191; Mar. 7.
Checkering machine. R. J. Seiler. 1,900,203; Mar. 7.
Chemicals from waste liquors, Recovering. C. L. Wagner and H. Freeman. 1,900,820; Mar. 7.
Chloride, Preparation of ethylidene. G. H. Coleman. 1,900,276; Mar. 7.
Christmas tree holder. T. J. Fegley and G. O. Leopold. 1,900,807; Mar. 7.
Chuck. H. T. Mattern. 1,900,188; Mar. 7.
Chucking machine. A. J. Lewis. 1,900,387; Mar. 7.
Churn, Electric butter. G. R. T. Williams. 1,900,626; Mar. 7.
Circuit controlling and protective device. L. J. Weber. 1,900,595; Mar. 7.
Circuit, Resistor cell. C. F. Jenkins. Re18,756; Mar. 7.
Circuits, Phase shifting. B. D. Bedford. 1,900,538; Mar. 7.
Circuits, Regulation of alternating current. F. W. Godsey, jr. 1,900,707; Mar. 7.
Clamp: *See*—
Sheet metal clamp. Wire clamp.
Clamp for holding dressing in fowls and the like. C. J. Parker. 1,900,613; Mar. 7.
Clasp for collars, etc. W. H. Averill. 1,900,686; Mar. 7.
Cleaner: *See*—
Fluid cleaner. Tube cleaner.
Roll cleaner. Vacuum cleaner.
Suction cleaner.
Cleaning, Apparatus for. F. C. Mason. 1,900,122; Mar. 7.
Clock. W. A. Spear. 1,900,311; Mar. 7.
Clock case and lamp, Combined. P. Buhrle. Des. 89,422; Mar. 7.
Clock case and lamp or similar article, combined. J. Gottlieb. Des. 89,397; Mar. 7.
Closure, Tank dome. V. Willoughby. 1,900,627–8; Mar. 7.
Clothes drier. P. F. Carter. 1,900,796; Mar. 7.
Clothes hanger. J. C. Lindsay. 1,900,826; Mar. 7.
Clothespin, Clamp. A. E. Olson. 1,899,982; Mar. 7.
Clutch. A. Storm and T. Thorsen. 1,900,812; Mar. 7.
Clutch coupling. O. R. Schoenrock. 1,900,305; Mar. 7.
Coal briquetting equipment. E. E. Jones. 1,900,347; Mar. 7.
Coal, Device for breaking down. J. F. Joy. 1,900,446; Mar. 7.
Coat, One-piece. S. Wester. 1,900,678; Mar. 7.
Coating composition and making same, Rugous. F. B. Root. 1,900,181; Mar. 7.
Coatings on aluminum. M. Tosterud. 1,900,472; Mar. 7.
Coffee roasting process. J. F. Quinn. 1,900,072; Mar. 7.
Collar shaper. P. Farrelly. 1,900,547; Mar. 7.
Color cinematographic apparatus. J. A. Ball. 1,900,034; Mar. 7.
Coloring material. J. C. Witt. 1,900,216; Mar. 7.
Combustion, Apparatus for the control of. O. W. Lusby. 1,900,884; Mar. 7.
Composition containing a resinous complex. C. Ellis. 1,900,638; Mar. 7.
Concrete, Coated. P. J. Maul and M. Hoffman. 1,900,833; Mar. 7.
Condensation products from aliphatic aldehydes and bases of the naphthalene series. E. Rietz and W. Hoffmann. 1,900,365; Mar. 7.
Condenser and making the same. R. O. Lewis. 1,900,352; Mar. 7.
Condenser and making the same, Fixed. O. Blake and H. Beyer. 1,900,093; Mar. 7.
Condenser unit for refrigerating apparatus. S. Moore. 1,900,865; Mar. 7.
Condensing apparatus. J. Kirgan. 1,900,504; Mar. 7.
Conduit. V. Bendix. 1,900,091; Mar. 7.
Conduit connection. O. Junggren. 1,900,561; Mar. 7.
Conduit connection for compressors. F. D. Peltier. 1,900,661; Mar. 7.
Connection, Brake operating. E. G. McDonald. 1,900,123; Mar. 7.
Connection, Coupler and yoke. W. A. Geiger. 1,900,549; Mar. 7.
Connection for program circuits, Bridging. H. S. Hamilton and G. Crisson. 1,900,106; Mar. 7.
Contact pins in radiotube bases, Securing. J. E. Ferguson. 1,900,099; Mar. 7.
Container: *See*—
Mortuary record container. Shipping container.
Nonsubstituting container.
Container and handling cargo by such containers. M. Olds. 1,900,867; Mar. 7.
Container and sealing closure therefor, Covered. C. S. Baron. 1,899,921; Mar. 7.
Container, Making a downwardly tapered. L. M. Hile. 1,900,646; Mar. 7.
Containers subjected to freezing temperature, Method of and apparatus for preventing the bursting of liquid. V. Merritt. 1,900,836; Mar. 7.
Control mechanism for evaporators. F. G. Slagel. 1,900,526; Mar. 7.
Control system. H. T. Seeley. 1,900,589; Mar. 7.
Controlling device for controlling pistons of internal combustion engines. T. V. Hemmingsen. 1,900,605; Mar. 7.
Conveyer. H. C. Keller and M. Van Billiard. 1,900,563; Mar. 7.
Conveyer for furnaces. R. S. Cochran. 1,900,428; Mar. 7.

Conveyer, Switching. H. R. Gotthardt and W. E. Cain. 1,900,602; Mar. 7.
Conveying apparatus, Automatic. H. R. Gotthardt and W. E. Cain. 1,900,603; Mar. 7.
Conveying system. M. J. Anderson. 1,900,150; Mar. 7.
Cooling sintered material. J. E. Greenawalt. 1,900,234; Mar. 7.
Cooling system. J. R. Rippe. 1,900,586; Mar. 7.
Core for molds. W. Underwood. 1,900,372; Mar. 7.
Corn removing attachment. A. M. Evenson. 1,900,806; Mar. 7.
Cottonseed hulls, Method and apparatus for defibrating. G. L. Blanchard. 1,900,154; Mar. 7.
Couch, Two part. L. B. Wilson. 1,900,474; Mar. 7.
Coupler for toy railway cars. J. M. Sharp. 1,900,204; Mar. 7.
Coupler, Ground wire. S. N. Buchanan. 1,900,329; Mar. 7.
Coupling: *See*—
Bag coupling. Clutch coupling.
Coupling. R. W. Swank. 1,900,208; Mar. 7.
Coupling or clutch for coaxial shafts. J. Baugnée. 1,900,787; Mar. 7.
Cover: *See*—

Drawer construction. W. M. Hanson. 1,900,338; Mar. 7.
Drawing press, Sheet metal. O. Kübner. 1,900,291; Mar. 7.
Drier: *See*—
Air drier. Clothes drier.
Drier head. L. A. Dix. 1,900,166; Mar. 7.
Driers for varnishes, lacquers, oil paints, and the like, Production of. F. Pohl. 1,900,734; Mar. 7.
Drinking fountain. H. W. Taylor. 1,900,591; Mar. 7.
Driving apparatus and system, Vehicle. F. W. Godsey, jr. 1,900,706; Mar. 7.
Driving means for oil well equipment. H. Iedeen. 1,900,452; Mar. 7.
Drying, Apparatus for and method of. B. B. Russell and W. J. Uhlhorn. 1,900,846; Mar. 7.
Dye, Production of azo. E. B. Payne. 1,900,417; Mar. 7.
Dyeing of textile material with vat dyes. C. Dreyfus and H. Platt. 1,900,168; Mar. 7.
Dyeing process. W. R. Moorhouse. 1,899,975; Mar. 7.
Dyestuff derived from indoline bases and preparing same. O. Wahl. Re18,758; Mar. 7.
Dyestuffs of the anthracene series, Vat. G. Kränslein and P. Ochwat. 1,900,350; Mar. 7.
Earthwork and making same. C. O. Sherrill. 1,900,205; Mar. 7.
Easel. J. Watson. 1,900,375; Mar. 7.
Egg and making same, Preserved. H. Heuser. 1,900,444; Mar. 7.
Electric accumulator. A. Pouchain. 1,900,616; Mar. 7.
Electric control system. L. Devol. 1,900,406; Mar. 7.
Electric control system. L. O. Grondahl and A. J. Sorensen. 1,900,407; Mar. 7.
Electric control system. L. O. Grondahl and A. J. Sorensen. 1,900,411; Mar. 7.
Electric control system. A. J. Sorensen. 1,900,408–10; Mar. 7.
Electric control system. C. F. Whitney. 1,900,596; Mar. 7.
Electric heater. I. T. Bennett. 1,899,933; Mar. 7.
Electric heating apparatus. E. D. McArthur. 1,900,573; Mar. 7.
Electric regulation. J. L. Creveling. 1,900,277; Mar. 7.
Electric resistance. I. Silberstein. 1,900,206; Mar. 7.
Electric ship propulsion. G. O. Watson. 1,900,594; Mar. 7.
Electric switch. A. Hall. 1,900,236; Mar. 7.
Electric switch E. A. Hoopes. 1,900,647; Mar. 7.
Electric system. J. L. Creveling. 1,900,278; Mar. 7.
Electric welding apparatus. A. A. Smith. 1,899,991; Mar. 7.
Electric welding machine. F. P. McBerty. 1,900,834; Mar. 7.
Electrical contact and the manufacture thereof. J. A. Payette. 1,900,256; Mar. 7.
Electrical discharge device. C. T. Ulrey. Des. 89,418; Mar. 7.
Electrical rectifier. W. P. Place. 1,900,782; Mar. 7.
Electrical selecting apparatus, One-wire. L. Brownstein. 1,900,095; Mar. 7.
Electrical testing. E. Woodbury. 1,900,424; Mar. 7.
Electrolytic apparatus. R. A. Wilkins. 1,900,534; Mar. 7.
Electromagnetic reciprocating device. G. H. Poth. 1,900,464; Mar. 7.
Electron discharge device. A. W. Hull. 1,900,559; Mar. 7.
Engine: *See*—
Diesel engine. Steam engine.
Internal combustion engine. Three-cylinder tandem engine.
Sleeve valve two cycle engine.
Engine. W. F. Weir. 1,900,086; Mar. 7.
Engine starting mechanism. R. Chilton. 1,900,799; Mar. 7.
Engines, Reversing and control mechanism for internal combustion. M. J. Goldberg and F. C. Teufl. 1,900,054; Mar. 7.
Engines, Starting internal combustion. L. Schargorodsky. 1,900,367; Mar. 7.
Entrance control. D. J. Wallace. 1,900,422; Mar. 7.
Evaporator. F. G. Siegel. 1,900,742; Mar. 7.
Evaporator, Two-temperature. R. S. Taylor. 1,900,674; Mar. 7.
Exhibiting apparatus. G. A. Holcombe. 1,900,557; Mar. 7.
Eye cup. S. M. Sager. 1,900,201; Mar. 7.
Fabric: *See*—
Pile fabric.
Fabric and product thereof, Differentially coloring. C. Dreyfus and G. Rivat. 1,900,167; Mar. 7.
Fastener. *See*—
Cover fastener. Separable fastener.
Safety removable fastener.
Fastener supplying apparatus. S. L. Gookin. 1,900,055; Mar. 7.
Fastening device for inherently resilient articles. R. G. Meader. 1,900,574; Mar. 7.
Feeder: *See*—
Animal feeder.
Feeder for ingot molds. B. H. Howard. 1,900,816; Mar. 7.
Fender and headlamp casing for vehicles, Combined. J. R. Hughes. Des. 89,426; Mar. 7.
Fender, head lamp casing, and combined parking lamp and horn casing, Combined. J. R. Hughes. Des. 89,428; Mar. 7.
Fender, head lamp casing, and parking lamp casing, Combined. J. R. Hughes. Des. 89,431; Mar. 7.
Fender, head lamp casing, parking lamp, and horn casing, Combined. J. R. Hughes. Des. 89,429; Mar. 7.

Fender, head lamp casing, parking lamp casing, and horn casing, Combined. J. R. Hughes. Des. 89,427; Mar. 7.
Fender, head lamp casing, parking lamp casing, and horn casing, Combined. J. R. Hughes. Des. 90,430; Mar. 7.
Fibrous articles, Manufacture of. A. L. Clapp. 1,900,427; Mar. 7.
Filing or recording device. Z. Auerbach. 1,900,479; Mar. 7.
Film apparatus. G. B. Scheibell. 1,900,788; Mar. 7.
Film cartridge, Light tight photographic. J. G. Jones. 1,900,879; Mar. 7.
Film feeding device, Motion picture. O. Wittel. 1,900,876; Mar. 7.
Film, Nonhalation motion picture. K. C. D. Hickman. 1,900,877; Mar. 7.
Films, Reenforcing cinematograph. A. H. Adams. 1,900,681; Mar. 7.
Filter and cooler, Oil. J. E. Kline. 1,900,821; Mar. 7.
Filtering apparatus. H. Wittemeier. 1,900,476; Mar. 7.
Finishing welt. R. C. Schemmel. 1,900,768; Mar. 7.
Firearm. C. C. Loomis. 1,900,184; Mar. 7.
Firearm with bolt action and case magazine, Repeating. F. Jäger. 1,900,818; Mar. 7.
Fire box, Locomotive. G. L. Baxter, F. W. Strachauer, and R. S. Twogood. 1,900,824; Mar. 7.
Fire extinguishing foam, Apparatus for producing. F. L. Boyd. 1,900,482; Mar. 7.
Firefly. B. C. Harrell. 1,900,339; Mar. 7.
Fire resistant and preservative composition. J. R. Watson. 1,900,211; Mar. 7.
Fire resistant and preservative composition and making same. J. R. Watson. 1,900,212; Mar. 7.
Fish lure. M. D. Martin. 1,900,832; Mar. 7.
Fitted traveling bag. F. N. Lewis. 1,900,508; Mar. 7.
Fitting, Grounding. L. H. Church. 1,900,485; Mar. 7.
Flash light. H. W. Jones and H. G. Graubner. 1,900,348; Mar. 7.
Flash light. H. Koretzky, M. Horowitz, and A. J. Desimone. 1,900,505; Mar. 7.
Flash-light cap and hanger, Combined. G. H. Barber. Des. 89,421; Mar. 7.
Flask, Foundry. W. O. Snelling. 1,900,137; Mar. 7.
Flour diluent, Wheat. R. M. Bohn. 1,900,094; Mar. 7.
Flow controller. M. M. Borden. 1,900,273; Mar. 7.
Fluid cleaner. G. M. Spencer. 1,899,993; Mar. 7.
Fluid pressure gauge. J. Ellberg and M. Cronwall. 1,900,414; Mar. 7.
Flushing system for operating tables. A. L. Ormsbee. 1,900,255; Mar. 7.
Fly holder. H. M. Beck. 1,900,035; Mar. 7.
Folding chair. W. E. Clarin. 1,900,486; Mar. 7.
Folding support. E. M. Pendleton. 1,900,760; Mar. 7.
Foot rests, Shoe booth. V. Marchisella. 1,900,653; Mar. 7.
Forehearth for molten glass. V. Mulholland and A. R. Hunter. 1,900,361–2; Mar. 7.
Form construction, Concrete floor joist. H. Read. 1,900,301; Mar. 7.
Form, Printing. H. C. Osborn. 1,900,023; Mar. 7.
Foundation for animal head and body. B. Cohen. 1,900,487; Mar. 7.
Fountain: *See*—
Drinking fountain.
Frame blank, Printing device. V. J. Mohler. 1,900,296; Mar. 7.
Frame body for trailers, Drop. W. S. Tatum. 1,900,778; Mar. 7.
Frame for typewriting machines. J. H. Rand, jr., and J. A. Zellers. Des. 89,411; Mar. 7.
Fruit for the market, Treating. R. D. McDill. 1,900,295; Mar. 7.
Fuel control apparatus for automobiles. A. M. Malluk and F. W. Allen. 1,900,245; Mar. 7.
Fuel feeding means. M. Kahr. 1,900,885; Mar. 7.
Furnace. E. G. Bailey. 1,900,006; Mar. 7.
Furnace. S. P. Burke. 1,899,926; Mar. 7.
Furnace. G. Leiman. 1,900,570; Mar. 7.
Furnace block. E. G. Bailey. 1,900,007; Mar. 7.
Furnace construction and operation. G. H. Isley and G. A. Merkt. 1,900,396; Mar. 7.
Furnace control. M. G. Benjamin. 1,900,036; Mar. 7.
Furnace, Firing reheating. S. P. Burke. 1,900,223; Mar. 7.
Furnace wall. I. Harter. 1,900,443; Mar. 7.
Furnace wall, Water cooled. D. S. Jacobus and H. J. Kerr. 1,900,445; Mar. 7.
Furnaces, Operation of regenerative. G. H. Isley. 1,900,397; Mar. 7.
Furs, hairs, feathers, and similar articles, Dyeing. K. Marx and E. Lehmann. 1,900,454; Mar. 7.
Game. W. T. O'Neill. 1,900,071; Mar. 7.
Game appliance. R. J. Chappell. 1,900,798; Mar. 7.
Game board. E. A. Dahlquist. Des. 89,387; Mar. 7.
Gas burner. E. C. Adams. 1,900,217; Mar. 7.
Gas, Making Producer. A. P. Van Heeden. 1,900,141; Mar. 7.
Gas, Manufacturing SO_3. I. Hechenbleikner. 1,900,239; Mar. 7.
Gas, Purifying. O. W. Lusby. 1,900,883; Mar. 7.
Gas tester, Optical. H. Wittemeier. 1,900,477; Mar. 7.
Gaseous-discharge device. E. H. Moore. 1,900,578; Mar. 7.
Gaseous discharge tube, High intensity. W. F. Hendry. 1,900,109; Mar. 7.
Gases, Apparatus for use in the catalytic oxidation of. G. A. Berry, C. P. Linville and A. P. Beardsley. 1,900,857; Mar. 7.
Gases, Desulphurizing. E. Raffloer. 1,900,667; Mar. 7.
Gases, Purification of. H. Baehr. 1,900,751; Mar. 7.
Gauge: *See*—
Fluid pressure gauge. Pressure release gauge.
Liquid level gauge. Roofer's gauge.
Pitch gauge. Tank gauge.
Gauge for measuring flow of fluids in conduits, Differential pressure. A. Lang. 1,900,823; Mar. 7.
Gear: *See*—
Wheel gear.
Gels, Making. G. C. Connolly and E. B. Miller. 1,900,859; Mar. 7.
Generator: *See*—
Oscillation generator.
Generator regulation. B. M. Leece and D. S. Cole. 1,900,719; Mar. 7.
Glass jar. H. R. McDonald. Des. 89,403; Mar. 7.
Glass, Laminated. J. C. Zola. 1,900,536; Mar. 7.
Glass manufacture, Wire. G. H. Juergens. 1,900,716; Mar. 7.
Glass melting apparatus. E. G. de Coriolis and P. Q. Williams. 1,900,432; Mar. 7.
Glass sheets, Apparatus for case hardening. W. Owen. 1,900,582–3; Mar. 7.
Glassware, Manufacture of. T. Wardley. 1,900,781; Mar. 7.
Glove, Hand ball. H. N. Gitt. 1,900,395; Mar. 7.
Grab. J. Geist. 1,900,179; Mar. 7.
Grain handling device. O. A. Wenberg. 1,900,218; Mar. 7.
Grapple, Rod and pipe. F. M. Tiea. 1,900,471; Mar. 7.
Grate. R. F. Darby. 1,899,945; Mar. 7.
Grate. J. S. Thompson. 1,900,530; Mar. 7.
Grease insoluble in gasoline. M. H. Arveson. 1,900,759; Mar. 7.
Grenade. E. W. Brandt. 1,900,790; Mar. 7.
Grinding machine. J. H. Hoern. 1,900,112; Mar. 7.
Guard for brake rods, Safety. E. G. Busse and H. W. Ekholm. 1,900,224; Mar. 7.
Guard for motor vehicles, Splash. C. L. Brown. 1,899,937; Mar. 7.
Gun casing, Grease. C. Harris. Des. 89,399; Mar. 7.
Gun, Liquid. H. A. Roselund. 1,900,668; Mar. 7.
Gun port for bullet-resisting structures. S. R. Popp. 1,900,364; Mar. 7.
Gypsum, System for producing. W. C. Hansen. 1,900,381; Mar. 7.
Gyroscopic navigational instrument. J. B. Henderson. 1,900,709; Mar. 7.
Hair curler. J. Mueller. 1,900,360; Mar. 7.
Hair curler or hair wave winder. F. Sehring. 1,900,373; Mar. 7.
Hair-waving apparatus, Electrical control system for permanent. E. B. Marter, 3d. 1,900,831; Mar. 7.
Hair waving or curling rod. V. N. Nicosia. 1,900,126; Mar. 7.
Hand bag. P. R. Hartmann. 1,899,960; Mar. 7.
Hand stitching tool. H. G. Allen. 1,900,683; Mar. 7.
Handle: *See*—
Doorlock handle. Utensil handle.
Handle. L. M. Willey. 1,900,423; Mar. 7.
Handle for coffee makers. C. E. Page. Des. 89,408; Mar. 7.
Hanger: *See*—
Clothes hanger. Trouser hanger.
Hanger for fur. M. Gray. 1,900,550; Mar. 7.
Harvester. H. E. and R. J. Altgelt. 1,900,269; Mar. 7.
Hat box. W. T. Shrader. 1,900,420; Mar. 7.
Hat lubring machine. J. L. Card. 1,900,634; Mar. 7.
Headlamp lens. J. R. Hughes. 1,899,984; Mar. 7.
Heat exchange apparatus. E. J. Parent. 1,900,363; Mar. 7.
Heat pump. C. G. Munters. 1,900,656; Mar. 7.
Heat responsive device. A. C. Rowley. 1,900,765; Mar. 7.
Heater: *See*—
Electric heater. Water heater.
Oil burning heater.
Heater for locomotives, Feed water. M. W. Dole and M. Silverman. 1,900,697; Mar. 7.
Heater for rods and tubes. E. F. Northrup. 1,900,842; Mar. 7.
Heater for rods and tubes. E. F. Northrup. 1,900,843; Mar. 7.
Heating and ventilating apparatus, Combined. L. F. Schlenker and M. Wuerthner. 1,900,770; Mar. 7.
Heating system. T. E. Murray, jr., and G. H. Phelps. 1,899,977; Mar. 7.
High frequency measuring apparatus. J. D. Wallace. 1,900,082; Mar. 7.
Hinge: *See*—
Door hinge.
Holsting block. M. Niemi. 1,900,194; Mar. 7.
Holder: *See*—
Christmas tree holder. Plate holder.
Fly holder.
Holder for cribs and the like, Adjustable milk bottle. E. J. Carlson. 1,900,691; Mar. 7.
Holder for paraffin fluid containers. J. F. Weiss. 1,900,783; Mar. 7.
Holder for vehicle fenders, Splash guard. W. R. Chesley. 1,900,225; Mar. 7.

Hooks, Method and apparatus for making belt lacing. O. B. Briggs and G. M. Richard. 1,900,156; Mar. 7.
Hosiery. E. B. Beacham. Re18,757; Mar. 7.
Hosiery. E. J. Berger. Des. 89,383; Mar. 7.
House or building construction. J. A. Henkensiefken. 1,900,812; Mar. 7.
Humidifier. R. C. Luplow. 1,900,453; Mar. 7.
Hydraulic machine. W. M. White. 1,900,144; Mar. 7.
Hydrocarbons, Cracking. E. C. Herthel. 1,900,110; Mar. 7.
Hydrocarbons, Process and apparatus for treating. H. J. Halle. 1,900,105; Mar. 7.
Hydrocarbons. Treatment of. W. R. Howard. 1,900,113; Mar. 7.
Hydrogen sulphide from gases, Removal of. D. L. Jacobson. 1,900,398; Mar. 7.
Ice cream bars, sticks, or the like, Method and apparatus for making. W. Maurer. 1,900,355; Mar. 7.
Ice cream wrappers, Apparatus for forming removable. R. Anders. 1,900,033; Mar. 7.
Ice-remover for windshields. J. H. Broderick. 1,900,540; Mar. 7.
Ignition system, High tension. F. D. Nuttall. 1,900,022; Mar. 7.
Ignition timer breaker mechanism. F. T. Irgens. 1,899,965; Mar. 7.
Illuminated sign. H. J. Cudney. 1,900,758; Mar. 7.
Illuminating sign. W. K. Wiley and H. J. Cudney. 1,900,747; Mar. 7.
Inclosure for reactors and similar apparatus, Protective. S. I. Oesterreicher. 1,899,981; Mar. 7.
Incubator, Infant. J. H. Hess. 1,900,342; Mar. 7.
Index for bound volumes. F. J. Osuch. 1,900,462; Mar. 7.
Index to be used with telephone directories and other books. F. J. Osuch. 1,900,461; Mar. 7.
Indexing device. A. Peel. 1,900,073; Mar. 7.
Indicator: *See*—
Liquid level indicator.
Ink drying and neutralizing device, Combined. C. H. Cochrane. 1,900,543; Mar. 7.
Inking device. H. D. Black. 1,900,092; Mar. 7.
Inking mechanism for printing presses. H. A. W. Wood. 1,900,263; Mar. 7.
Insect trap. A. C. Pickett. 1,900,199; Mar. 7.
Insulating body. G. H. Ellis. 1,900,698; Mar. 7.
Insulating body, Waterproof. G. H. Ellis. 1,900,699; Mar. 7.
Insulator. J. H. Hertner. 1,900,710; Mar. 7.
Internal combustion engine. A. A. Reimann. 1,900,762; Mar. 7.
Internal combustion engine. J. Schaeffers. 1,900,153; Mar. 7.
Internal combustion motor. H. R. Schroeder. 1,900,466; Mar. 7.
Jack. R. Statz. 1,900,528; Mar. 7.
Jar. F. Smith. Des. 89,420; Mar. 7.
Jar and closure therefor. L. T. Crabbe. 1,900,803; Mar. 7.
Jaw wrench, Adjustable. H. A. Mead. 1,900,358; Mar. 7.
Jewelry, Article of. P. Benjamin. 1,900,425; Mar. 7.
Jewelry display device. C. H. Scruggs. 1,900,467; Mar. 7.
Jig and fixture lock. F. W. Kuppersmith. 1,900,852; Mar. 7.
Joint construction. M. Nuberg. 1,900,460; Mar. 7.
Joint for extension rules, Yielding. H. M. Gasstrom. 1,900,640; Mar. 7.
Joint for metal pipes, Lock. A. C. Sladky. 1,900,749; Mar. 7.
Joint for pipes, Precaulked extensible. W. A. Whiting. 1,900,145; Mar. 7.
Joint or bearing, Self-aligning spherical. H. R. Ricardo. 1,900,617; Mar. 7.
Lacquer, Cellulose nitrate. H. Finkelstein. 1,900,700; Mar. 7.
Lacquers or varnishes, Manufacture of caoutchouc. H. Plauson. 1,900,663; Mar. 7.
Ladders, Attachment for. C. H. Davis. 1,900,636; Mar. 7.
Lamp, Gaseous conduction. D. McF. Moore. 1,900,577; Mar. 7.
Lamp, Reading. C. T. Brady. 1,900,539; Mar. 7.
Lamp, The apeutic. S. S. Torrisi. 1,900,138; Mar. 7.
Latch mechanism. K. F. Nystrom. 1,900,254; Mar. 7.
Lathe dead center actuating device. A. Storm and T. Thorsen. 1,900,261; Mar. 7.
Letter box. F. Sauter. 1,900,078; Mar. 7.
Lever. W. J. Andres and C. E. Ward. 1,900,151; Mar. 7.
Lifeboat hook. F. E. Craig. 1,900,227; Mar. 7.
Lift for vehicles, Hydraulic. C. J. Bristol. 1,900,483; Mar. 7.
Lifter: *See*—
Valve lifter.
Light: *See*—
Flash light.
Light plug. C. M. Way. 1,900,782; Mar. 7.
Lighter construction. L. V. Aronson. 1,900,684; Mar. 7.
Lighter, Pocket. H. S. Strausser and H. T. Reynolds. 1,900,207; Mar. 7.
Lighting fixture. J. B. Chartrand. 1,900,330; Mar. 7.
Lighting fixture. G. E. Glatthar. Des. 89,395; Mar. 7.
Lighting fixture. E. F. Guth. 1,900,552; Mar. 7.
Lighting fixture. R. B. Hale. 1,900,380; Mar. 7.
Lighting of all spaces, System of indirect. J. T. Dourgnon. 1,900,436; Mar. 7.
Lighting unit for reflected illumination. E. F. Guth. 1,900,551; Mar. 7.
Liner for coal drill boxings, Renewable threaded. V. L. Scott and N. W. Marsch. 1,900,740; Mar. 7.
Linkage, Lost motion mechanical. J. E. Kelly and J. A. Arasim. 1,900,289; Mar. 7.
Lip turning machine. H. L. Chapin. 1,900,044; Mar. 7.
Liquid dispensing apparatus. J. A. Logan. 1,900,652; Mar. 7.
Liquid feeding device. G. W. Leiman. 1,900,571; Mar. 7.
Liquid level gauge E. P. Hughes. 1,900,851; Mar. 7.
Liquid level indicator. S. De Orlow. 1,900,433; Mar. 7.
Liquids, Sterilization of. E. A. Louder. 1,900,509; Mar. 7.
Liquor, Destructively distilling black. R. W. Kumler. 1,900,506; Mar. 7.
Liquor, Preparation of caustic. M. B. Mount. 1,900,253; Mar. 7.
Lock: *See*—
Jig and fixture lock.
Lock. I. Kemp. 1,900,503; Mar. 7.
Lock. G. A. Long. 1,900,185; Mar. 7.
Lock for screw fastening members. B. E. Winkler. 1,900,146; Mar. 7.
Lock for vehicles, Automatic hood. C. B. Thoresen and F. B. Eliassen. 1,900,777; Mar. 7.
Locking device for bayonet slot construction. S. Schiff. 1,900,258; Mar. 7.
Locking mechanism for handcuffs. W. L. Latou. 1,900,242; Mar. 7.
Loom, Harness mechanism for a. D. N. O'Brien. 1,900,659; Mar. 7.
Looms, Filling stop motion for. A. Darienzo. 1,900,545; Mar. 7.
Lubricant retainer. H. R. Shiffer. 1,900,368; Mar. 7.
Lubricating system. F. C. Blanchard. 1,900,754; Mar. 7.
Lubricating device. H. F. Cunning. 1,900,429; Mar. 7.
Lubricating device. M. Newmark. 1,900,021; Mar. 7.
Lubricating means for high pressure pump pistons. E. H. Fahrney. 1,899,949; Mar. 7.
Lubricating system. W. D. Pomeroy. 1,900,735; Mar. 7.
Lubricator: *See*—
Distributing lubricator.
Luggage rack, Collapsible. E. Erickson and G. J. Hoody. 1,900,438; Mar. 7.
Lumber, Metal edged gypsum. C. F. Davis. 1,900,805; Mar. 7.
Machine for and process of forming metal into shapes. C. M. Yoder. Re18,760; Mar. 7.
Machine for casting stereotype printing plates. H. A. W. Wood. 1,900,265; Mar. 7.
Machine for fabricating scouring devices, mop heads, and similar articles. D. J. Mayer. 1,900,356; Mar. 7.
Machine for feeding plastic material such as dough through dies or like apertures. A. Kremmling. 1,900,607; Mar. 7.
Machine for graining lithographic plates. C. A. Beckett. 1,900,090; Mar. 7.
Machine for inserting corks into caps for collapsible tubes. J. J. Temple. 1,900,671; Mar. 7.
Machine for making and inserting basket handles. L. M. Hile. 1,900,712; Mar. 7.
Machine for manufacturing ceramic objects. T. F. Mooney. 1,899,974; Mar. 7.
Machine for preparing artificial manures. E. M. Poirot. 1,900,615; Mar. 7.
Magnesium carbonate and manufacturing process thereof. H. W. Greider. 1,900,235; Mar. 7.
Magnesium sulphate, Obtaining. H. E. Stump. 1,900,392; Mar. 7.
Manicuring method and means. H. B. Snider. 1,900,028; Mar. 7.
Manifold, Intake. W. J. Bliffert. 1,900,272; Mar. 7.
Manures, Preparing artificial. E. M. Poirot. 1,900,614; Mar. 7.
Marker, Price. R. V. Sheldon. 1,900,136; Mar. 7.
Mask. L. R. Koenig and F. B. Wolf. 1,900,651; Mar. 7.
Material, Color photographic. M. W. Seymour. 1,900,869; Mar. 7.
Materials and producing coke, Distilling fluent. I. H. Derby. 1,900,047; Mar. 7.
Materials of different specific gravities, Method of and apparatus for separating. W. C. Menzies. 1,900,190; Mar. 7.
Matrix board for stereotyping. A. R. Pawlitschko. 1,900,660; Mar. 7.
Mattress. T. S. Cobb. 1,900,801; Mar. 7.
Mattress, Spring. S. Cohen. 1,900,802; Mar. 7.
Measuring and computing instrument. E. H. Corlett. 1,900,757; Mar. 7.
Measuring device. G. A. Ede. 1,900,231; Mar. 7.
Mechanical apparatus, Rotary. G. Stauber. 1,900,620; Mar. 7.
Medicine package. E. Kipper. 1,900,606; Mar. 7.
Merchandise, Apparatus for handling. H. H. Lederer. 1,900,569; Mar. 7.
Mercury switch. E. R. Snavely. 1,900,080; Mar. 7.
Metal members, device for extracting. M. Mathews. 1,900,654; Mar. 7.
Metal plates, Method of and machine for forming. F. A. Manske, E. W. Odenwaldt, and O. E. Gibson. 1,900,722; Mar. 7.
Metal salts of half acid esters of fatty hydroxylated oil and making them. C. Coolidge. 1,900,693; Mar. 7.
Metal spring cover. W. T. Ferguson. 1,900,051; Mar. 7.

Metals, such as magnesium, Production of light. E. O. Barstow. 1,900,220; Mar. 7.
Metals, Welding. J. B. Fitzpatrilk. 1,900,100; Mar. 7.
Milk weighing apparatus. H. L. Miller. 1,900,859; Mar. 7.
Mill: *See*—
Bar mill. Rolling mill.
Mining machine. F. W. Vodoz. 1,900,780; Mar. 7.
Mixing device, Thermostatically controlled. E. O. Beardsley. 1,900,221; Mar. 7.
Mixing valve, Thermostatic. W. G. Klingbeil. 1,900,349; Mar. 7.
Mold closing apparatus, Automatic. C. E. Maynard. 1,900,455; Mar. 7.
Molding. R. C. Schemmel. 1,900,769; Mar. 7.
Molding construction for composite panels. G. K. Lewis. 1,900,824; Mar. 7.
Money handling machine. E. J. Brandt. 1,900,039; Mar. 7.
Mortuary record container. H. P. Hansen. 1,900,708; Mar. 7.
Motion, Traverse. R. J. Bartholomew. 1,900,480; Mar. 7.
Motor: *See*—
Internal combustion motor.
Mounting, Roll. L. Iversen. 1,900,344; Mar. 7.
Mounting, Self-closing sugar bowl. H. C. Gessler. 1,900,643; Mar. 7.
Mower, Lawn. A. F. Moyer. 1,900,726; Mar. 7.
Mower, Power. W. F. Krenske. 1,900,062; Mar. 7.
Mowing machine, Lawn. F. B. Mingus. 1,900,838; Mar. 7.
Muffler for internal combustion engines. E. H. Radecky. 1,900,026–7; Mar. 7.
Musical instrument of the violin type. G. Eisenberg. 1,900,489; Mar. 7.
Necktie construction. H. A. Clark. 1,900,800; Mar. 7.
Necktie, Reversible. E. M. Famous. 1,900,490; Mar. 7.
Negative system, Multipack. H. W. Moyse. 1,900,459; Mar. 7.
Negative system, Multipack. V. B. Sease. 1,900,468; Mar. 7.
Nonsubstituting container. H. B. Lloyd. Re18,759; Mar. 7.
Nozzle channel construction for explosion turbines. H. Holzwarth. 1,900,558; Mar. 7.
Oil burning heater, Cabinet type. G. E. Pickup. 1,900,520; Mar. 7.
Oil conversion, Hydrocarbon. O. H. Fairchild. 1,900,174; Mar. 7.
Oil feed mechanism. G. J. Meyer. 1,899,973; Mar. 7.
Oil fractionation. J. S. Wallis. 1,900,085; Mar. 7.
Oil gas, Treating an. A. E. Harnsberger. 1,900,057; Mar. 7.
Oil, Process and apparatus for cracking. N. E. Loomis and A. H. Tomlinson. 1,900,116; Mar. 7.
Oil, Refining hydrocarbon. S. S. Kurtz, jr. 1,899,969; Mar. 7.
Oil wells, Method and apparatus for drilling. D. Dana and F. A. Morgan. 1,900,163–4; Mar. 7.
Oils, Process and apparatus for converting. G. Egloff. 1,900,170; Mar. 7.
Oils, Process and apparatus for converting. G. Egloff. 1,900,171; Mar. 7.
Oils, Refining. W. G. Laird. 1,900,862; Mar. 7.
Oils, Treatment of hydrocarbon. D. J. Bergman. 1,900,153; Mar. 7.
Olefines and diolefines, Production of. O. Schmidt, M. Treppenhauer, O. Gorsskinsky, and H. Fischer. 1,900,739; Mar. 7.
1,5-dichloro-2,6-diamino anthraquinone, Preparing. W. L. Rintelman. 1,899,987; Mar. 7.
Opener, Automatic door. B. B. Ashbrook. 1,900,785; Mar. 7.
Ornamental chain. K. C. Augenstein. 1,900,377; Mar. 7.
Oscillation generator. W. E. Bower. 1,900,038; Mar. 7.
Oven, Coking retort. J. Becker. 1,900,752; Mar. 7.
Ovens, Charging coking retort. J. Becker. 1,900,753; Mar. 7.
Package. J. H. Reed. 1,900,389; Mar. 7.
Packer, Releasable. J. C. Dickens. 1,900,230; Mar. 7.
Packing gland. B. Schmierer. 1,900,523; Mar. 7.
Pad for shoe counters, Cushion. H. L. Handler. 1,900,107; Mar. 7.
Pad for typewriters, Type. L. Denzer. 1,900,046; Mar. 7.
Pad or packing with fastening means. G. W. Gilmer. 1,900,280; Mar. 7.
Pallet feeding device. C. E. Walker. 1,900,625; Mar. 7.
Pan, Doughnut. H. Kudo. 1,900,290; Mar. 7.
Pan, Ice. F. G. Siegel. 1,900,741; Mar. 7.
Paper and making the same, Waxed. G. N. Lovatt. 1,900,294; Mar. 7.
Paper cutting and trimming machine and clamping and shock-absorbing mechanism therefor. E. M. Brackett and D. Daneke. 1,899,923; Mar. 7.
Paper, Making articles of. B. F. Perkins. 1,900,257; Mar. 7.
Paper to printing presses, Method of and apparatus for feeding. H. A. W. Wood. 1,900,535; Mar. 7.
Papers, film foils, and the like, Apparatus for sorting transparent or translucent. C. Büchner. 1,900,633; Mar. 7.
Parachute mounting for aeroplanes. T. D. Crane. 1,900,891; Mar. 7.
Parachute projecting device for airplanes. A. Lakehurst. 1,900,399; Mar. 7.
Pencil. C. R. Sheaffer and W. R. Cuthbert. 1,900,669; Mar. 7.
Pharmaceutical preparation. F. Krollpfeiffer. 1,900,449; Mar. 7.
Photographic color process. M. W. Seymour. 1,900,870; Mar. 7.
Photographic developing apparatus. A. I. Liberman. 1,900,825; Mar. 7.
Piano action. C. H. Dasenbrook. 1,900,488; Mar. 7.
Picture-sound reproducer, Combined motion. C. L. Heisler. 1,900,555; Mar. 7.
Pictures, Toning silver. H. Mengele. 1,899,972; Mar. 7.
Pile, Composite. R. E. Talmadge. 1,900,673; Mar. 7.
Pile fabrics, Manufacture of. H. L. Shuttleworth. 1,899,990; Mar. 7.
Pile shell. F. A. Schroeder and A. E. Twist. 1,900,524; Mar. 7.
Piles, Apparatus for forming concrete. R. Tada. 1,900,622; Mar. 7.
Pipes, Device for cleaning waste and drain. D. G. and G. G. Carter. 1,900,275; Mar. 7.
Piston head guard. J. H. Price. 1,900,521; Mar. 7.
Piston ring milling machine. T. J. Bruce. 1,900,755; Mar. 7.
Pitch gauge. W. E. Pack. 1,900,197; Mar. 7.
Plant growth, Promoting. G. G. Nearing. 1,900,193; Mar. 7.
Planter, Tractor. B. R. Benjamin and W. S. Graham. 1,899,931; Mar. 7.
Plaster, Acoustical. J. S. Offutt. 1,900,866; Mar. 7.
Plate holder, Depthograph. C. W. Kanolt. 1,900,566; Mar. 7.
Platen travel equalizer, Hydraulic press. W. Ernst. 1,900,050; Mar. 7.
Playboard. S. Yasuda. 1,900,005; Mar. 7.
Play pen and sun bath, Collapsible. H. I. Brockie. 1,900,274; Mar. 7.
Playing ball. W. D. Craig. 1,900,544; Mar. 7.
Plow. G. B. Fisher. 1,900,701; Mar. 7.
Plug: *See*—
Drop plug. Light plug.
Plug, Boiler drop. G. McCormick. 1,900,357; Mar. 7.
Plug cap and making the same, Attachment. W. C. Tregoning. 1,900,139; Mar. 7.
Pneumatic dispatch system. W. J. Taylor and C. T. Cutting. 1,900,592; Mar. 7.
Pneumatic tube. H. F. Krug. 1,900,568; Mar. 7.
Poacher, Egg. E. Proteau. 1,900,761; Mar. 7.
Pocket, Garment safety. J. L. Foster. 1,900,639; Mar. 7.
Pottery, Apparatus for producing various kinds of. R. L. Cawood. 1,900,797; Mar. 7.
Powder box. C. H. Horner. Des. 89,425; Mar. 7.
Power plant. W. H. Harstick. 1,900,058; Mar. 7.
Power plant for drilling apparatus. M. Kahr. 1,900,884; Mar. 7.
Power, Pumping. W. C. Trout. 1,900,675; Mar. 7.
Power take-off for motor vehicles. G. A. Fulerton. 1,900,415; Mar. 7.
Power Transmission, Hydraulic variable speed. A. J. R. Lysholm. 1,900,118; Mar. 7.
Power transmission mechanism. G. DeMonge. 1,900,165; Mar. 7.
Power transmission system. W. F. Gay. 1,900,494; Mar. 7.
Power Transmission, variable speed. A. Lysholm, F. Horney, and G. Wahlsten. 1,900,119–20; Mar. 7.
Press: *See*—
Drawing press. Stamping press.
Printing press.
Pressing and ventilating apparatus. F. C. Wilhelm. 1,900,748; Mar. 7.
Pressure controlling device for a liquid dispensing apparatus. W. H. Curtis. 1,900,383; Mar. 7.
Pressure release gauge, Automatic. L. J. Wilcox. 1,900,533; Mar. 7.
Pressure venting device for dry pipe sprinkler systems. E. Tyden. 1,900,262; Mar. 7.
Printing device. J. P. Jackson. 1,900,345; Mar. 7.
Printing device. V. J. Mohler. 1,900,297; Mar. 7.
Printing device. E. F. Richter. 1,900,302; Mar. 7.
Printing from negative sound record to a positive, Apparatus for. E. I. Sponable. 1,900,853; Mar. 7.
Printing press. C. G. Pritchard. 1,900,664; Mar. 7.
Printing with pure primary colors and product, Imbibition. B. S. Tuttle. 1,900,140; Mar. 7.
Prism system affording parallel vision, Reversing. A. Konig. 1,900,241; Mar. 7.
Product and manufacture of same, Fibrous. R. B. Respess. 1,899,985; Mar. 7.
Propeller. W. M. Minto. 1,900,889; Mar. 7.
Protective system for fluid cooled tubes. L. A. Gebhard. 1,900,013; Mar. 7.
Protector. *See*—
Capacitor protector.
Psychrometer. E. V. Hill. 1,900,813; Mar. 7.
Puller: *See*—
Tape puller.
Pulley, Grooved. R. H. Bowen. 1,900,222; Mar. 7.
Pulps, Froth flotation process for slime-containing ore. M. S. Hansen. 1,900,850; Mar. 7.
Pump: *See*—
Centrifugal pump. Rotary pump.
Heat pump.
Pump construction. S. Dean. 1,900,228; Mar. 7.

Pumping system, Liquid counter-balanced. B. H. Scott. 1,900,588; Mar. 7.
Purifying an anthraquinone body. L. Ulich and R. E. Goodrich. 1,900,001; Mar. 7.
Pyrometer. C. B. Thwing. 1,900,779; Mar. 7.
Rack: *See*—
Bag rack. Display rack.
Bowling ball rack. Luggage rack.
Rack. H. L. Glidden. 1,900,053; Mar. 7.
Rack for electroplating. E. Sohn. 1,899,992; Mar. 7.
Radiator and humidifier. Combined. T. S. Hart and P. M. Bush. 1,900,554; Mar. 7.
Radio circuit. R. P. Wuerfel. 1,900,629; Mar. 7.
Radio circuits, Arrangement for. W. Bushbeck. 1,899,939; Mar. 7.
Radio frequency systems, Increasing the selectivity of tuned. C. V. Logwood. 1,900,293; Mar. 7.
Radio reception, Selective. J. H. Hammond, jr. 1,900,283; Mar. 7.
Rake, dump. H. E. Altgelt. 1,900,270; Mar. 7.
Rake tooth for hay loaders. P. P. Miller. 1,900,724; Mar. 7.
Razor blade package. H. R. Noyes. 1,899,979; Mar. 7.
Razor, Safety. J. Muros. 1,900,069; Mar. 7.
Razor, Safety. O. R. Peterson. 1,900,662; Mar. 7.
Recorder: *See*—
Speed and time recorder.
Refining. L. Rosenstein. 1,900,132; Mar. 7.
Reflector. E. E. Scott. 1,900,202; Mar. 7.
Refrigerating apparatus. D. E. Maccabee. 1,900,510; Mar. 7.

Direction signal. Traffic signal.
Signal. J. Y. Ohta. 1,900,845; Mar. 7.
Signal apparatus, Traffic. J. Heuer. 1,900,060; Mar. 7.
Signaling system. J. M. Kane. 1,900,016; Mar. 7.
Signaling system, Selective. H. E. Hershey. 1,900,499; Mar. 7.
Signs, Making colored. J. P. Meehan. 1,899,971; Mar. 7.
Silo. T. A. Rowe. 1,900,763; Mar. 7.
Silver recovery control, Automatic. K. C. D. Hickman. 1,900,893; Mar. 7.
Skate. J. R. Brien. 1,900,040; Mar. 7.
Sled, Motor. J. E. Valiquette. 1,900,315; Mar. 7.
Sleeve construction. L. Slanger. 1,900,391; Mar. 7.
Sleeve valve two cycle engine. V. H. Winquist. 1,900,475; Mar. 7.
Sling, Arm. K. E. and A. K. Uhrig. Des. 89,417; Mar. 7.
Slitting device. R. McC. Johnstone. 1,900,183; Mar. 7.
Snowplow. C. H. Frink. 1,900,703; Mar. 7.
Soap dispenser. W. A. Jennings. 1,900,819; Mar. 7.
Sole cementing machine. W. C. Card, jr. 1,899,941; Mar. 7.
Sole, Shoe. C. L. White. Des. 89,419; Mar. 7.
Solutions, Apparatus for feeding. C. F. Wallace. 1,900,142–3; Mar. 7.
Sound absorbent material and producing it. P. E. Sabine. 1,900,522; Mar. 7.
Sound amplifier. C. W. Hicks. 1,900,111; Mar. 7.
Sound amplifying device. C. N. Andrews. 1,899 929; Mar. 7.
Sound into electrical impulses, Conversion of. R. K. Spotts. 1,899,994; Mar. 7.
Sound pick-up device. P. E. G. Jensen. 1,899,966; Mar. 7.
Sound ranging, Method and apparatus for. H. C. Hayes. 1,900,015; Mar. 7.
Sound recording system. A. Whitaker. 1,900,679; Mar. 7.
Sound waves, Method and apparatus for producing. A. M. Tewksbury. 1,900,623; Mar. 7.
Sphygmomanometer. W. I. Huber. 1,900,285; Mar. 7.
Sphygmomanometer. W. I. Huber and L. B. Close. 1,900,286; Mar. 7.
Spot welding. M. J. Cohan. 1,900,161; Mar. 7.
Speed and time recorder. J. H. Greenley. 1 899,956; Mar. 7.
Spraying apparatus. H. J. Mills. 1,900,837; Mar. 7.
Spring construction. R. W. Nilsson. 1,900,841; Mar. 7.
Sprinkler head. H. E. Meng. 1,900,124; Mar. 7.

Sprinkler valve, Fire extinguishing. A. E. Boardman. 1,900,632; Mar. 7.
Stadia transit. E. W. Kraft. 1,900,567; Mar. 7.
Stamping press. E. Baumgarten, C. W. Gosnell, and N. J. Delsch. 1,900,008; Mar. 7.
Stanchion, Animal. J. Waksmoncki. 1,900,676; Mar. 7.
Stanchion switch. A. F. Paul. 1,900,198; Mar. 7.
Stand: *See*—
Camera stand. Display stand.
Starch products Apparatus for making gelatinized. F. O. Giesecke. 1,899,952; Mar. 7.
Starting mechanism, Engine. R. P. Lansing. 1,900,063; Mar. 7.
Steam engine, Rotary. G. Zint. 1,900,784; Mar. 7.
Steam power plant. J. Ruths. 1,900,766; Mar. 7.
Steel retainer, Drill. D. K. Dovell. 1,900,860; Mar. 7.
Steering apparatus for aircraft. W. Möller. 1,900,516; Mar. 7.
Steering device. B. S. Aikman. 1,900,218; Mar. 7.
Stock quotation projecting machine. J. W. Decker. 1,900,010; Mar. 7.
Stock watering apparatus. A. F. Gustafson. 1,900,604; Mar. 7.
Stop motion for gill boxes. W. J. Scott. 1,900,400; Mar. 7.
Stop, Wheel. H. W. Ekholm. 1,900,232; Mar. 7.
Stop, Wheel. A. H. Told. 1,900,210; Mar. 7.
Storage bag. W. P. Holley. 1,900,814; Mar. 7.
Storage battery. A. H. Snyder. 1,900,307; Mar. 7.
Stovepipe. J. A. Krantz. 1,900,750; Mar. 7.
Strip, Bimetallic flanged dividing. P. Galassi. 1,900,705; Mar. 7.
Strip for terrazzo and like floors, Dividing. P. Galassi. 1,900,704; Mar. 7.
Stripper for collapsible tube forming machines. W. Prussing. 1,900,666; Mar. 7.
Structural devices. A. Vermeulen. 1,900,319; Mar. 7.
Structural element. H. W. and G. Buelow. 1,900,541; Mar. 7.
Structural unit. D. H. Bitney. 1,900,327; Mar. 7.
Suction cleaner. H. R. Ballou. 1,900,271; Mar. 7.
Suction cleaner. B. C. Becker. 1,900,889; Mar. 7.
Suction cleaner. W. H. Kitto. 1,900,887; Mar. 7.
Suction cleaner. W. H. Kitto. 1,900,888; Mar. 7.
Suction cleaner. W. D. Sellers. 1,900,890; Mar. 7.
Suction cleaner. D. G. Smellie. 1,900,885; Mar. 7.
Suction cleaner. D. G. Smellie. 1,900,886; Mar. 7.
Sundial. F. Loria. 1,900,117; Mar. 7.
Supercharger. G. R. Poyer. 1,900,200; Mar. 7.
Support: *See*—
Folding support.
Support construction. A. F. O'Connor. 1,899,980; Mar. 7.
Support for electric motors, Resilient. L. M. Persons. 1,900,128; Mar. 7.
Support for reading matter, Table. I. L. Moore. 1,900,251; Mar. 7.
Supporting a separating hopper as applied to portable mills. E. L. Martin. 1,900,354; Mar. 7.
Surface decorating machine. G. von Webern and E. W. Hamant. 1,900,030; Mar. 7.
Surfacing. H. R. Stratford. 1,900,313; Mar. 7.
Switch: *See*—
Electric switch. Stanchion switch.
Mercury switch. Thermostat switch.
Switch. T. B. Bash. 1,900,687; Mar. 7.
Switch casing and mounting bracket or similar article, Combined. G. A. Gillen. Des. 89,394; Mar. 7.
Switch operator. J. C. Rea. 1,900,584; Mar. 7.
Table: *See*—
Automobile table. Vertically and horizontally adjustable table.
Table or similar article. R. Redlich, jr. Des. 89,412; Mar. 7.
Table rear guide, Transfer. I. Maarsen. 1,900,064; Mar. 7.
Tailstock for lathes and the like. A. N. Emmons. 1,900,233; Mar. 7.
Tank: *See*—
Trailer tank.
Tank gauge. R. Star. 1,900,774–5; Mar. 7.
Tank outlet valve. A. H. Noyes. 1,899,978; Mar. 7.
Tape moistening and affixing device. E. H. Manvell. 1,900,121; Mar. 7.
Tape puller. E. H. Unkles. 1,900,421; Mar. 7.
Tape, Slide fastener. M. Kiessling. 1,900,564; Mar. 7.
Telegraph system, Automatic secret. J. H. Smart. 1,900,772; Mar. 7.
Television apparatus. M. Centeno V. Re18,761; Mar. 7.
Tent and frame, Collapsible. A. Del Vacchio. 1,900,335; Mar. 7.
Terminal for electrical conductors. W. C. Reed. 1,900,585; Mar. 7.
Textile and other materials, Treatment of. G. H. Ellis, H. C. Olpin, and R. C. Storey 1,900,172; Mar. 7.
Textile fabric or a similar article, Embroidered. E. W. Freudenberg. Des. 89,392; Mar. 7.
Textile fabric or similar article. C. R. Hellman. Des. 89,401; Mar. 7.
Textile fabric or similar article. I. J. Marks. Des. 89,402; Mar. 7.
Textile fabric or similar article of manufacture. A. J. Heinke. Des. 89,400; Mar. 7.
Textile fabric or the like. A. Grulich. Des. 89,398; Mar. 7.
Textile fabric or the like. G. Megroz. Des. 89,404; Mar. 7.
Textile fabric or the like, Embroidered. W. G. Meier. Des. 89,432; Mar. 7.
Thermometer, Oven. G. J. Day. 1,900,696; Mar. 7.
Thermostat switch. A. E. Grant and S. W. Vanderbeek. 1,899,955; Mar. 7.
Thickener, Centrifugal. R. H. Cottrell. 1,900,394; Mar. 7.
Thread tensions for twisting devices, Device for equalizing the. O. Bochmann and W. Lenk. 1,900,037; Mar. 7.
Threads and the like from viscose and in apparatus therefor, Production of artificial. H. J. Hegan and E. Hazeley. 1,900,811; Mar. 7.
Threaded members, Apparatus for disconnecting. G. S. Kennedy. 1,900,017; Mar. 7.
Three-cylinder tandem engine. R. E. Bruckner. 1,900,858; Mar. 7.
Tire. W. S. Gilbert. Des. 89,393; Mar. 7.
Tire and rim construction. J. M. Meredith. 1,900,835; Mar. 7.
Tire building method. C. H. Desautels. 1,900,435; Mar. 7.
Tire vulcanizer. G. J. Mead. 1,900,456; Mar. 7.
Toaster. E. J. Rohne. 1,900,737; Mar. 7.
Toaster, Electric. P. J. N. Miller and V. E. Extrom. 1,900,249; Mar. 7.
Toilet article. M. V. McDonough. 1,900,609; Mar. 7.
Tongs. L. F. Baash and W. H. Maxwell. 1,900,378; Mar. 7.
Tongs. N. K. Smith. 1,900,370; Mar. 7.
Tool: *See*—
Hand stitching tool.
Toothbrush, Fountain. J. W. Beresford. 1,900,326; Mar. 7.
Top for ingot molds, Hot. W. Mathesius. 1,900,066; Mar. 7.
Top or cover plate for typewriting machines. J. H. Rand, jr., and J. A. Zellers. Des. 89,410; Mar. 7.
Toy. C. Marchetti. 1,900,353; Mar. 7.
Toy. L. Ranney and H. F. Gade. 1,900,419; Mar. 7.
Toy coast defense gun. F. J. Peters. 1,900,024; Mar. 7.
Tracing device for instruments such as integraphs and the like. O. Coradi and W. Leeman. 1,900,332; Mar. 7.
Track crossing construction, Railway. E. W. Bayes. 1,900,788; Mar. 7.
Tractor guide. W. H. Silver. 1,900,525; Mar. 7.
Traffic controlling apparatus, Railway. C. M. Hines. 1,900,713; Mar. 7.
Traffic regulator. E. C. Welsh. 1,900,532; Mar. 7.
Traffic signal. D. O. Miller. 1,900,723; Mar. 7.
Trailer tank, Vehicle. F. A. Jones. 1,900,114; Mar. 7.
Train signaling system, Electric. P. N. Bossart. 1,900,405; Mar. 7.
Train signaling system, Electric. P. N. Bossart. 1,900,412; Mar. 7.
Transfers, Printing. C. A. Colombo. 1,900,635; Mar. 7.
Transformers, Network of midtapped. F. W. Gay. 1,900,496; Mar. 7.
Transmission. H. D. Allee. 1,899,928; Mar. 7.
Transmission. H. F. Bushong. 1,900,096; Mar. 7.
Transmission, Free wheeling. C. H. Fehlberg. 1,899,950; Mar. 7.
Trap: *See*—
Animal trap. Insect trap.
Trigger mechanism. R. A. Lester. 1,900,608; Mar. 7.
Trimming apparatus. T. W. Morris. 1,900,000; Mar. 7.
Trouser hanger. W. B. Claflin, jr. 1,899,942; Mar. 7.
Tube: *See*—
Brake cable tube. Gaseous discharge tube.
Brake operating tube. Pneumatic tube.
Tube cleaner. J. P. Rodgers. 1,900,130; Mar. 7.
Tubes, Apparatus for welding. F. W. Weir. 1,900,376; Mar. 7.
Tubing catcher. N. K. Smith. 1,900,371; Mar. 7.
Tubing head. G. A. Humason and W. A. Raymond. 1,900,714; Mar. 7.
Turbine, Explosion. H. Holzwarth. 1,900,815; Mar. 7.
Turbine plant for ships, Explosion. H. Holzwarth. 1,899,963; Mar. 7.
Twister or strander. W. E. Sommerville. 1,900,310; Mar. 7.
Twisting and reeling mechanism for wire rope making machines. W. E. Sommerville. 1,900,309; Mar. 7.
Typewriter, Power driven. H. Benzing. 1 900,690; Mar. 7.
Typewriting and calculating machine. J. Bricken. 1,899,936; Mar. 7.
Typewriting machine. E. E. Barney. 1,900,088; Mar. 7.
Typewriting machine. G. G. Going. 1,900,102; Mar. 7.
Typewriting machine. A. G. F. Kurowski. 1,899,968; Mar. 7.
Typewriting machine. J. A. B. Smith. 1,900,527; Mar. 7.
U-bolts and making the same. H. C. Ellison. 1,900,049; Mar. 7.
Ultralight intensive objective. M. Berek. 1,899,984; Mar. 7.
Undergarment, Woman's. F. Ring. 1,900,129; Mar. 7.
Utensil, Cooking. H. C. Synder. 1,900,619; Mar. 7.
Utensil handle, Cooking. R. N. Kircher. 1,900,565; Mar. 7.
Vacuum cleaner. W. J. Clements. 1,900,692; Mar. 7.
Vacuum cleaner. F. Riebel, jr. 1,900,465; Mar. 7.

Valve: *See*—
Automatic valve. Sprinkler valve.
Car outlet valve. Tank outlet valve.
Mixing valve.

Valve. M. F. Richardson. 1,900,736; Mar. 7.
Valve and valve-seat refinishing tool. A. A. Radley, jr. 1,900,075; Mar. 7.
Valve control apparatus for dry pipe sprinkler systems. M. W. Paden and V. G. Opdyke. 1,900,300; Mar. 7.
Valve for bottle fillers, Filler. J. Kantor. 1,900,447; Mar. 7.
Valve for low water alarms, Control. H. W. Coddington. 1,900,379; Mar. 7.
Valve lifter, or tappet, Self-adjusting. A. L. Pearson and J. J. Gerhardt. 1,900,518; Mar. 7.
Valve mechanism. P. F. Youngling. 1,900,268; Mar. 7.
Vanity case. H. Batchelor. 1,900,089; Mar. 7.
Vapor phase reactions, Carrying out exothermic. A. O. Jaeger. 1,900,715; Mar. 7.
Vegetable slicing mechanism. L. Frank. 1,900,491; Mar. 7.
Vehicle. R. B. Simning. 1,900,590; Mar. 7.
Vehicle, Motor. D. Fergusson. 1,900,439; Mar. 7.
Vehicle, Motor. W. Staniewicz. 1,900,773; Mar. 7.
Vehicle seat. A. H. Ackerman. 1,899,927; Mar. 7.
Vending machine. I. W. Penny. 1,900,074; Mar. 7.
Ventilating device for subterranean spaces. F. Gerlach. 1,900,642; Mar. 7.
Ventilating means for refrigerators. G. A. Aylsworth. 1,900,855; Mar. 7.
Vertically and horizontally adjustable table. O. K. and L. O. Mitchell. 1,900,250; Mar. 7.
Vessel construction, Sheet metal. J. E. Howard. 1,900,711; Mar. 7.
Voltage transforming apparatus for direct current. C. C. Wilson. 1,900,215; Mar. 7.
Ventilator: *See*—
Window ventilator.
Wadding for whale guns. G. E. Brofelth. 1,899,925; Mar. 7.
Wads, Process of and apparatus for making. H. Ernst. 1,900,012; Mar. 7.
Wagon, Coaster. A. Hedeen, J. G. Holifer, and V. S. Landess. 1,900,108; Mar. 7.
Wall brace and reenforcement. A. M. Ryan. 1,900,767; Mar. 7.
Wall of hollow bodies, Method and apparatus for coating the interior. A. M. Hageman and A. F. Lindstrom. 1,900,104; Mar. 7.
Washing machine. W. J. Butterworth. 1,900,795; Mar. 7.
Watch. E. Howard. 1,900,343; Mar. 7.
Watch-fob. C. Oppenheim. Des. 89,407; Mar. 7.
Watches, Apparatus for testing. T. Owada. 1,900,612; Mar. 7.
Water heater. M. I. Larsen. 1,900,451; Mar. 7.
Web splicing apparatus. H. A. W. Wood. 1,900,264; Mar. 7.
Well drilling apparatus. W. Sheldon. 1,900,135; Mar. 7.
Well drilling apparatus. T. G. Taylor. 1,900,029; Mar. 7.
Well plunger. J. W. Pippin. 1,900,731; Mar. 7.
Well reamer. D. J. Conant. 1,900,226; Mar. 7.
Wheel. F. C. Frank. 1,900,101; Mar. 7.
Wheel for connecting tractors to different types of trailers, Fifth. C. H. Land and W. H. Wilson. 1,900,115; Mar. 7.
Wheel gear, Sun and planet. E. Uhlich and W. Ballentine, gennant Mielke. 1,899,999; Mar. 7.
Window device. J. B. Clay and L. R. Wilson. 1,899,943; Mar. 7.
Window, Metal. A. Fien. 1,900,175; Mar. 7.
Window, Metal. A. Fien. 1,900,177; Mar. 7.
Window ventilator. E. J. Ney. 1,900,611; Mar. 7.
Wire clamp. H. W. Perry. 1,899,983; Mar. 7.
Wire shaping machine. J. Cipko. 1,900,160; Mar. 7.
Wiring device. G. Carlson. 1,900,542; Mar. 7.
Wood surfacing machine. A. A. Clarke. 1,900,331; Mar. 7.
Woodworking machinery. J. J. Egan. 1,900,336; Mar. 7.
Wrecking device. D. D. Williams. 1,900,031; Mar. 7.
Wrench: *See*—
Breast wrench. Jaw wrench.
Wrinkle eradicator. A. D. Varell. 1,900,002; Mar. 7.
Zinc-meta-arsenite. L. P. Curtin. 1,900,162; Mar. 7.

CLASSIFICATION OF PATENTS

ISSUED MARCH 7, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

1—	50: 1,900,683	23—	185: 1,900,253	51—	72: 1,900,158	73—	44: 1,900,285	95—	37: 1,900,566	119—	78: 1,900,604
2—	19: 1,900,395		225: 1,900,398		106: 1,900,112		1,900,286		49: 1,900,730		148: 1,900,676
	65: 1,900,487		233: 1,900,882		176: 1,900,331		54: 1,900,774		75: 1,900,853	120—	18: 1,900,669
	93: 1,900,391		273: 1,900,247		195: 1,899,959		1,900,775		88: 1,899,972	121—	32: 1,900,860
	1,900,678		288: 1,900,382		1,900,374		1,900,851		94: 1,900,825		41: 1,900,165
	146: 1,900,490		1,900,857		278: 1,900,313		82: 1,900,433	97—	47: 1,899,932		77: 1,900,784
	150: 1,900,800	24—	73: 1,900,560		1,900,439		111: 1,900,414		1,899,940		164: 1,900,268
	179: 1,900,481		81: 1,900,686		280: 1,900,386		119: 1,900,696		1,900,440	122—	6: 1,900,007
	250: 1,900,129		126: 1,899,983	52—	4: 1,900,157		167: 1,900,823		49: 1,900,525		1,900,443
	254: 1,900,639		137: 1,899,982	53—	1: 1,900,761		1,900,151		52: 1,900,701		1,900,445
	278: 1,899,990		163: 1,900,147		5: 1,900,249	74—	5: 1,900,151		1,900,928		159: 1,900,451

LIST OF PRINTS

Favorite Feeds. For Turkey Feeds. Page Milling Co. 14,069; Mar. 14.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbotts Dairies, Inc. (See Kennedy, Ridgway R., assignor.)
Abel, Frank J., Massapequa, assignor to H. Hyman, Brooklyn, N. Y. Clock case. Des. 89,459; Mar. 14.
Abel, Frank J., Massapequa, assignor to H. Hyman, Brooklyn, N. Y. Clock case. Des. 89,460; Mar. 14.
Abercrombie, James S., Houston, Tex. Whipstock. 1,901,854; Mar. 14.
Acme Machine Tool Company, The. (See Meier, C., and Wettig, assignors.)
Acme Shear Company, The. (See Conway, John J., assignor.)
Acro Aktiengesellschaft. (See Baur, Ottmar, assignor.)
Adams, Peter P., Turkey River, Iowa. Motor vehicle differential gear drive and guide in four wheels, combined with triple differential and brake in one unit. 1,901,276; Mar. 14.
Adkins, Frank A. (See Malm, John F., assignor.)
Aermotor Company. (See Scholes, Daniel E., assignor.)
Air Reduction Company, Incorporated. (See Anderson, James L., assignor.)
Air-Way Electric Appliance Corporation. (See Riebel, F., jr., and Dow, assignors.)
Aktiebolaget Gerh. Arehns Mekaniska Verkstad. (See Johnson, Bror A. E., assignor.)
Aktiebolaget Separator. (See Lindgren, Hans O., assignor.)
Aktiebolaget Svenska Fläktfabriken. (See Olsson, J. G. and Stenfors, assignors.)
Alco Products Incorporated. (See Harcourt, Guy N., assignor.)
Aldeen, Gedor W., assignor to American Cabinet Hardware Corp., Rockford, Ill. Hinge. 1,901,072; Mar. 14.
Alexander, Egbert, Los Angeles, Calif. Dispensing device. 1,901,487; Mar. 14.
Alexander, Sidney H. (See Peroni, J. H., and Alexander, assignors.)
Alimena, Samuel, and W. Naumann, Scranton, Pa. Sliding hair and wave clip. 1,900,970; Mar. 14.
Allen-Bradley Company. (See Wilms, Gustav O., assignor.)
Allen, William D., Evansville, Ind. Angle detector. 1,901,793; Mar. 14.
Allen, William O., Glendale, Ky. Display device. 1,901,717; Mar. 14.
Alley, John D., Pittsburgh, Pa., assignor to The American Brake Shoe and Foundry Company, Wilmington, Del. Lining for casting mold cavities. 1,901,427; Mar. 14.
Allinson, John J. (See Davis, L. L., Henriksen, and Allinson.)
Allis-Chalmers Manufacturing Company. (See Becker, G. D., and Newhouse, assignors.)
Allis-Chalmers Manufacturing Company. (See McClintock, William E., assignor.)
Allis-Chalmers Manufacturing Company. (See Newhouse, Ray C., assignor.)
Allis-Chalmers Manufacturing Company. (See Nye, Henry V., assignor.)
Allis-Chalmers Manufacturing Company. (See Pfau, Arnold, assignor.)
Allis-Chalmers Manufacturing Company. (See Ring, Joseph J., assignor.)
Allis-Chalmers Manufacturing Company. (See Winograd, Harold, assignor.)
Alsaker, Alfred, W. O. Hampton, and C. A. Koerner, assignors to The Delta-Star Electric Company, Chicago, Ill. Horisontal break disconnecting switch. 1,901,688; Mar. 14.
Alsaker, Alfred, W. O. Hampton, and C. A. Koerner, assignors to The Delta Star Electric Company, Chicago, Ill. Switch. 1,901,689; Mar. 14.
Altenkirch, Edmund, Neuenhagen, near Berlin, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Absorption refrigerating machine. 1,901,794; Mar. 14.
Altvater, Arthur W., St. Louis County, Mo. Cutting and ornamenting die. 1,901,575; Mar. 14.
Aluminum Company of America. (See Cook, M. F., and Breisch, assignors.)
Ambler Asbestos Shingle & Sheathing Company. (See Kinney, Harmon C., assignor.)
American Blower Corp. (See Morse, C. T., and Hogan, assignors.)
American Brake Shoe and Foundry Company, The. (See Alley, John D., assignor.)
American Brake Shoe and Foundry Company, The. (See Poe, Fred M., assignor.)
American Cabinet Hardware Corp. (See Aldeen, Gedor W., assignor.)
American Engineering Company. (See Bowden, William I., assignor.)
American Flange & Manufacturing Company. (See Shera, John W., assignor.)
American Glanzstoff Corporation. (See Carter, Ralph H., assignor.)
American Lurgi Corporation. (See Maier, Werner, assignor.)
American Rolling Mill Company, The. (See Hudson, Edwin B., assignor.)
American Rolling Mill Company, The. (See McCutcheon, Kenneth C., assignor.)
American Ship Building Company, The. (See Bradley, Charles H., assignor.)
American Telephone and Telegraph Company. (See Carpe, A., and Leibe, assignors.)
American Telephone and Telegraph Company. (See McCann, Thomas A., assignor.)
American Welding & Manufacturing Co., The. (See Meyer, Frank H., assignor.)
Ammerman, Clinton P. (See Pasternack, B., and Ammerman.)
Amspacher, Lemmet L., Glasco, Kans. Egg case carrier. 1,901,277; Mar. 14.
Anders, Erich. (See Eule, M., and Anders.)
Anderson, James L., Tenafly, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Cutting metal by means of gases. 1,901,428; Mar. 14.
Anderson, Oscar M. (See Jnenust, F. W., and Anderson.)
Andres, William J., South Bend, Ind., assignor, by mesne assignments, to Bendix Aviation Corporation, New York, N. Y. Drum-grinding machine. 1,901,690; Mar. 14.
Antrim, William D., Gloucester, N. J., assignor to Roberts & Mander Stove Company, Philadelphia, Pa. Gas burner. 1,901,716; Mar. 14.
Applegate, Lindsay M., Seattle, Wash. Electric circuit protective system. 1,901,488; Mar. 14.
Arcade Manufacturing Company. (See Firestone, Vance S., assignor.)
Archea, Walter D., assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Machine tool. 1,901,489; Mar. 14.
Archea, Walter D., assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machine. 1,901,490; Mar. 14.
Ardco Manufacturing Company. (See Feeley, M. R., and Stern, assignors.)
Armstrong Cork Company. (See Humphreys, Charles F., assignor.)
Ashbaugh, John H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,901,621; Mar. 14.
Ashford, Ernest, Charlton, London, England. Apparatus for cutting glass tubing. 1,900,971; Mar. 14.
Associated Electric Laboratories, Inc. (See Levy, Oscar C., assignor.)
Associated Electric Laboratories, Inc. (See Wicks, John, assignor.)
Associated Telephone and Telegraph Company. (See Gillings, C., and Belas, assignors.)
Atwell, Harold V., Whiting, Ind., assignor to Standard Oil Company, Chicago, Ill. Prevention of evaporation losses. 1,901,576; Mar. 14.
Aufsesser, Gates B., assignor to Mohawk Brush Company, Albany, N. Y. Brush. Des. 89,433; Mar. 14.
Aufsesser, Gates B., assignor to Mohawk Brush Company, Albany, N. Y. Brush. Des. 89,461; Mar. 14.
Aull, Jerome J., assignor to The Lunkenheimer Company, Cincinnati, Ohio. Wick oiler. 1,901,691; Mar. 14.
Automatic Bread Baking Company Limited, et al. (See Muller, Wilhelm, assignor.)
Austin, Gilbert, J. C. and W. A. Macfarlane, Glasgow, Scotland. Constant current variable voltage electric generating systems. 1,901,218; Mar. 14.
Austin, John T., assignor to The Austin Organ Company, Hartford, Conn. Combination organ stop action. 1,901,622; Mar. 14.
Austin, John T., assignor to The Austin Organ Company, Hartford, Conn. Combination organ stop mechanism. 1,901,623; Mar. 14.
Austin Organ Company, The. (See Austin, John T., assignor.)
Autogiro Company of America. (See Stanley, Paul H., assignor.)
Automatic Food Machinery Corporation. (See Hall, Charles G., assignor.)
Automatic Lighting Company. (See Vincent, Sidney C., assignor.)
Bacharach Industrial Instrument Company. (See Reinhardt, G. A., and Burich, assignors.)
Bacharach Industrial Instrument Company. (See Vayda, Louis L., assignor.)

Baddiley, James, Manchester, and J. Hill, Glastonbury, assignors to Imperial Chemical Industries Limited, Westminster, England. Secondary disazo dyestuffs. 1,901,278; Mar. 14.

Badenhausen Corporation. (See Kuhner, Max H., assignor.)

Bagley, Edward S., Hartford, Conn. Garage door control device. 1,900,901; Mar. 14.

Baguley, Eric. (See Hughes, R. L., and Baguley.)

Bailey, Agard H., Altadena, Calif. Fireplace screen. 1,901,073; Mar. 14.

Bainbridge, Kenneth T., New York, N. Y., assignor to General Electric Company. Photo-electric tube. 1,901,577; Mar. 14.

Bainbridge, Kenneth T., Swarthmore, Pa., assignor to General Electric Company. Preparing photo-electric tubes. 1,901,578; Mar. 14.

Baker, George, assignor to Oversewing Machine Company, Los Angeles, Calif. Book sectioner. 1,901,137; Mar. 14.

Baldwin, James L., Chicago, Ill. Package carrier. 1,901,279; Mar. 14.

Ballenberg, Adolf G. (See Powell, H. K., and Ballenberg.)

Barber, Benjamin R., Jacksonville, Fla. Making latches for rail switches and blanks for the same. 1,901,718; Mar. 14.

Barber, Sherman, Maywood, Ill. Chuck for nut tapping machines. 1,901,579; Mar. 14.

Barclay, Gustaf I., assignor to Detroit Steel Products Company, Detroit, Mich. Radiator support. 1,901,074; Mar. 14.

Barge Electric Shoe Cement Press, Inc. (See Barge, George H., assignor.)

Barge, George H., Brooklyn, N. Y., assignor to Barge Electric Shoe Cement Press, Inc. Shoe bottom attaching apparatus. 1,901,546; Mar. 14.

Barger, Paul, Greenfield, Mass. Wick. 1,901,834; Mar. 14.

Barks, Frank S., St. Louis, Mo. Coupling. 1,900,902; Mar. 14.

Barlow, William N., Yonkers, N. Y. Sound correction in an electric circuit. 1,901,429; Mar. 14.

Barnes, George L., and H. D. Chapman, Los Angeles, Calif., said Chapman assignor to said Barnes. Ground connecter. 1,900,894; Mar. 14.

Barnes, Gladeon M., Hastings, Mich. Muzzle brake and gas collector. 1,901,138; Mar. 14.

Barnholdt, Harold L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Rotor construction. 1,901,280; Mar. 14.

Baroni, Sante, Philadelphia, Pa. Measuring device. 1,901,719; Mar. 14.

Barrett Company, The. (See Harshberger, Norman P., assignor.)

Bartholet, John C., Tacoma, Wash. Expansion joint anchor. 1,900,895; Mar. 14.

Bartlett & Snow Company, The. (See Snow, Karl F., assignor.)

Barton, Melvin C., Yuba City, Calif. Brush. 1,901,139; Mar. 14.

Bärwinkel, Moritz, Ohrdruf, Germany. Upholstering spring. 1,901,720; Mar. 14.

Bateholts, Clinton, assignor to Specialty Insulation Manufacturing Company, Inc., Hoosick Falls, N. Y. Plate surface. 1,901,837; Mar. 14.

Bates, Arthur, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Method of and machine for sole fitting. 1,901,140; Mar. 14.

Battelle, Grant, Long Beach, Calif. Subterranean automatic oil well control. 1,901,141; Mar. 14.

Baum, Isaac A., Chicago, Ill. Reenforced metal jamb. 1,901,624; Mar. 14.

Baur, Adolphe F. J., assignor to Baur-Steinkamp & Company, Inc., Indianapolis, Ind. Carnation. Pl. Pt. 56; Mar. 14.

Baur, Ottmar, Stuttgart, Germany, assignor to Acro Aktiengesellschaft, Kuesnacht-on-Rigi, Switzerland. Piston for internal combustion engines. 1,901,838; Mar. 14.

Baur-Steinkamp & Company. (See Baur, Adolphe F. J., assignor.)

Bausch & Lomb Optical Company. (See McCabe, Joseph J., assignor.)

Baxter, Harold G., Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,901,692; Mar. 14.

Beal, Fay, assignor to Kingston Products Corporation, Kokomo, Ind. Automobile doorlocking system. 1,901,548; Mar. 14.

Beal, Fay, assignor to Kingston Products Corporation, Kokomo, Ind. Electric doorlock. 1,901,721; Mar. 14.

Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Changeable rotary press. 1,901,075; Mar. 14.

Bechman, Henry F., by City National Bank & Trust Company, administrator, assignor to Duplex Printing Press Company, Battle Creek, Mich. Changeable rotary press. 1,901,076; Mar. 14.

Becker, Ernst, Berlin-Charlottenburg, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Air-cooled cylinder. 1,901,693; Mar. 14.

Becker, George D., West Allis, and R. C. Newhouse, Wauwatosa, assignors to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Packing structure. 1,901,722; Mar. 14.

Becker, Walter, Feudenheim, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Purifying benzanthrone. 1,900,972; Mar. 14.

Bedford, Burnice D., Schenectady, N. Y., assignor to General Electric Company. Phase shifting circuits. 1,901,694; Mar. 14.

Beecher, Eugene L., East Cleveland, assignor to The Gabriel Company, Cleveland, Ohio. Shock absorber. 1,901,839; Mar. 14.

Beeson, Theodore S., Hamilton, assignor, by mesne assignments, to Libbey-Owens-Ford-Glass Company, Toledo, Ohio. Glass machinery. 1,901,491; Mar. 14.

Belas, Francis T. (See Gillings, C., and Belas.)

Belcher, Joseph L., Long Beach, Calif. Breathing apparatus. 1,901,219; Mar. 14.

Bell, Mike, Kansas City, Kans. Curtain and shade fixture. 1,901,796; Mar. 14.

Bell Telephone Laboratories, Incorporated. (See Burchett, George W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Garvin, John S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Hoge, Joseph F. D., assignor.)

Bell Telephone Laboratories, Incorporated. (See Marrison, Warren A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Murphy, Paul B., assignor.)

Bellanca, Giuseppe M., New Castle, Del. Airplane landing gear. 1,901,795; Mar. 14.

Beller, Hans. (See Luther, M., and Beller.)

Belyavin, Paul, London, England. Internal combustion engine. 1,901,723; Mar. 14.

Bendix Aviation Corporation. (See Andres, William J., assignor.)

Bendix Brake Company. (See Bendix, Vincent, assignor.)

Bendix Brake Company. (See La Brie, Ludger E., assignor.)

Bendix Brake Company. (See Mahoney, John P., assignor.)

Bendix Brake Company. (See Poehlman, Herbert W., assignor.)

Bendix-Cowdrey Brake Tester, Inc. (See Graham, Leon L., assignor.)

Bendix, Vincent, Chicago, Ill., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,901,695; Mar. 14.

Bennett, Norman G., London, England. Measuring appliance. 1,901,724; Mar. 14.

Bennett, W. H., Dr., et al. (See McCorquodale, Wilmer E., assignor.)

Bennington, Earl T., Cleveland Heights, assignor to The Cleveland Crane & Engineering Company, Wickliffe, Ohio. Carrier for ovens, furnaces or the like. 1,900,903; Mar. 14.

Bergé, Julien, assignor to Raffinerie Tirlemontoise, Société Anonyme, Tirlemont, Belgium. Preliminary treatment of raw sugar and the like. 1,901,142; Mar. 14.

Berger, Edward H., Manville, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Flexible wear-resisting sealing fabric and making the same. 1,900,904; Mar. 14.

Bergman, Hyman W., Kansas City, Mo. Vaporizer or similar article. Des. 89,462; Mar. 14.

Berry, Charles F., Boston, Mass. Combined rubber and leggin. 1,901,492; Mar. 14.

Bertsch, Heinrich, assignor to H. Th. Böhme A. G., Chemnitz, Germany. Phosphoric acid esters. 1,900,973; Mar. 14.

Bethea, Peter H., Washington, D. C. Sign. 1,900,896; Mar. 14.

Bethlehem Steel Company. (See Reed, Claude D., assignor.)

Bieber, Clarence G., Huntington, W. Va., assignor to The International Nickel Company, Inc., New York, N. Y. Treatment of magnetic alloys and products, resulting therefrom. 1,901,018; Mar. 14.

Bierce, Fred N., Cincinnati, Ohio. Guy shield. 1,901,550; Mar. 14.

Big Rock Ranch Company. (See Seise, William H., assignor.)

Bigelow-Sanford Carpet Co., Inc. (See Cooper, W. B., and Phoenix, assignors.)

Bilde, Tord E. D. (See Engberg, A. O., and Bilde.)

Birdseye, Clarence, Gloucester, Mass., assignor, by mesne assignments, to Frosted Foods Company, Inc., Dover, Del. Fish scaling device. 1,901,625; Mar. 14.

Birkenmaier, Theodore, assignor to W. N. Matthews Corporation, St. Louis, Mo. Guy guard. 1,901,220; Mar. 14.

Birtman Electric Company. (See Rankin, William A., assignor.)

Björkman, George E., Djursholm, Sweden. Hair winding mechanism. 1,901,480; Mar. 14.

Black, Russell, assignor to Commercial Patents Development Company, Huntington, W. Va. Ejector. 1,901,797; Mar. 14.

Blayney, Wilson L., assignor to Marshall Field & Company, Chicago, Ill. Scarf. 1,901,725; Mar. 14.

Bleser, Joseph F. (See Schafer, J. C. F., and Bleser.)

Bliss, E. W. Company. (See Dieter, William, assignor.)

Blunt, James G., Schenectady, N. Y. Brake mechanism. 1,901,919; Mar. 14.

Bodine, Alfred V., Fairfield, Conn., assignor to Raybestos-Manhattan, Incorporated, Passaic, N. J. Brake block and means of attaching. 1,901,698; Mar. 14.

Boecking, Ewald. (See Frappier, L. S., and Boecking.)

Boenning, William M., Manitowoc, Wis., assignor to Ferguson Brothers Manufacturing Company, Hoboken, N. J. Table leg support. 1,901,697; Mar. 14.

Böhme, H. Th., A. G. (See Bertsch, Heinrich, assignor.)

Bond, Lewis A., Los Angeles, assignor to Shell Oil Company, San Francisco, Calif. Method of and apparatus for determining true rock temperature in rotary drilled wells. 1,901,481; Mar. 14.

Bonnet, Clement, Menominee, Ill. Scaffold. 1,901,726; Mar. 14.

Bontempi, Giuseppe. (See Guidetti, F., and Bontempi.)

Boomer, Frank, Berkeley, Calif. Nut hulling machine. 1,901,798; Mar. 14.

Booth, Charles F., Anniston, Ala., assignor to Swann Research, Incorporated. Preparation of pure phosphates. 1,901,020; Mar. 14.

Booth, William N., assignor to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Vehicle wheel. 1,901,077; Mar. 14.

Borglin, Joseph N., Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del. Refining rosin. 1,901,626; Mar. 14.

Borland, Charles W., Maywood, Ill. Valve spring retainer tool. 1,901,727; Mar. 14.

Borsigwerk Aktiengesellschaft. (See Gorschlueter, F., and Pohl, assignors.)

Bosch, Robert, Aktiengesellschaft. (See Klaiber, Erich, assignor.)

Bott, George R., assignor to Norma-Hoffmann Bearings Corporation, Stamford, Conn. Antifriction bearing. 1,901,580; Mar. 14.

Bourdon, Pierre M., Paris, assignor to Michelin et Cie., Clermont-Ferrand, France. Vehicle wheel. 1,901,078; Mar. 14.

Bowden, William L., assignor to American Engineering Company, Philadelphia, Pa. Boat hoist. 1,900,905; Mar. 14.

Bower, James A., assignor to The National Tile Company, Anderson, Ind. Tile feeder. 1,901,281; Mar. 14.

Bowie, Augustus J., San Francisco, Calif. Switch contact. 1,901,493; Mar. 14.

Bowman, Oliver S., Colorado Springs, Colo. Grate. 1,901,698; Mar. 14.

Boynton, Arthur J., assignor, by mesne assignments, to Open Hearth Combustion Company, Chicago, Ill Open hearth furnace. 1,901,079; Mar. 14.

Bozarth, William H., Vineland, N. J., assignor to Osborn Products, Inc., E. B. Grosscup, receiver. Dehydrating vegetables and the like. 1,900,974; Mar. 14.

Brackett, Tracy F., Highland Park, Mich. Portable abrading and polishing machine. 1,901,627; Mar. 14.

Bradley, Charles H., University Heights, assignor to The American Ship Building Company, Cleveland, Ohio. Self-unloading ship. 1,901,549; Mar. 14.

Bradley, Robert W., Aldwych, London, England, assignor to Western Electric Company, New York, N. Y. Pressure leak indicator. 1,901,482; Mar. 14.

Bradley, Theodore P., Westfield, N. J., assignor to Chadeloid Chemical Company, New York, N. Y. Finish remover. 1,901,728; Mar. 14.

Bradner, Donald E., Oxford, assignor to The Champion Coated Paper Company, Hamilton, Ohio. Wiper mechanism for coating machines and process. 1,901,080; Mar. 14.

Brady, James H., Louisville, Ky. Whirl whistle. 1,901,547; Mar. 14.

Brainard, Maurice W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Undervoltage device. 1,901,628; Mar. 14.

Brandt Automatic Cashier Company. (See Brandt, Edward J., assignor.)

Brandt, Edward J., assignor to Brandt Automatic Cashier Company, Watertown, Wis. Money handling machine. 1,901,081; Mar. 14.

Breisch, George T. (See Cook, M. F., and Breisch.)

Brewer, John F., Ossining, assignor of one-half to Arthur Greenfield, New York, N. Y. Lifter. 1,901,729; Mar. 14.

Bridgeport Metal Goods Manufacturing Company, The. (See Fullmer, Giles C., assignor.)

Briggs, Norman E. (See Halsted, H. J., and Briggs.)

British Dyestuffs Corporation, Limited. (See Davidson, A., and Shepherdson, assignors.)

Broekhuysen, Willem C., New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Electrical system of distribution. 1,901,628; Mar. 14.

Bromley, John, & Sons, Incorporated. (See Grundy, J. A., and Payne, assignors.)

Brooke, Harold L. (See Jandus, H. S., and Brooke.)

Brooks, Buford M., Dover, N. J. Beller. 1,901,730; Mar. 14.

Brooks, James H., and J. Goldstone, assignors of one-fourth to F. W. Taplin and one-fourth to D. Richards, Portland, Oreg. Preservative composition. 1,901,799; Mar. 14.

Brown Company. (See Richter, G. A., Van Arsdel, and Hill, assignors.)

Brown, Le Roy O., assignor to Justrite Manufacturing Company, Chicago, Ill. Portable electric illuminating apparatus. 1,900,906; Mar. 14.

Brown, William R. (See Crobin, Elbert A., jr., assignor.)

Brunner, Albert, assignor to Wagner Electric Corporation, St. Louis, Mo. Hose fitting. 1,901,143; Mar. 14.

Brunner, John, Chicago, Ill. Rail joint. 1,900,975; Mar. 14.

Brunswig, Marguerite, Los Angeles, Calif. Dial for timepieces. Des. 89,434; Mar. 14.

Bryans, William A. (See Williams, Harry S., assignor.)

Buckeye Aluminum Company, The. (See Porter, Kirk E., assignor.)

Budd Wheel Company. (See Kelley, G. L., and Budd, assignors.)

Buerger, Leo, New York, N. Y. Cystoscope and the like. 1,901,731; Mar. 14.

Buffalo Brake Beam Company. (See Crone, Seth A., assignor.)

Buff, Edward G. (See Kelley, G. L., and Budd.)

Bullwinkel, John T., Brooklyn, assignor to The Phosphate Mining Co., New York, N. Y. Mining and treatment of phosphate-rock. 1,901,221; Mar. 14.

Bullwinkel, John T., Brooklyn, assignor to The Phosphate Mining Co., New York, N. Y. Treatment of phosphate rock. 1,901,222; Mar. 14.

Burchett, George W., Peekskill, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Artificial larynx. 1,901,483; Mar. 14.

Burger, Frederick W., Niles, assignor to Clark Equipment Company, Buchanan, Mich. Dual wheel. 1,901,629; Mar. 14.

Burket, Elias G., Altoona, Pa. Billboard construction. 1,901,282; Mar. 14.

Burnham, George A., Saugus, assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass. Circuit interrupter. 1,901,363; Mar. 14.

Burpee Can Sealer Company. (See Burpee, Frank W., assignor.)

Burpee, Frank W., Wilmette, assignor to Burpee Can Sealer Company, Chicago, Ill. Cover clamp for pressure cooking vessels. 1,901,699; Mar. 14.

Burtnett, Everett R., San Marino, Calif. Transmission mechanism. 1,901,283; Mar. 14.

Bush, Lester C., Columbus, Ohio. Automobile robe or blanket. 1,901,228; Mar. 14.

Bushey, Francis S., Brooklyn, N. Y. Welded construction. 1,901,800; Mar. 14.

Bushnell, James E., North Plainfield, and J. C. Lukachovic, assignors to Ransome Concrete Machinery Company, Plainfield, N. J. Concrete mixing and distributing apparatus. Re15,764; Mar. 14.

Buse, Bernhard G., Golden, Ill. Locking catch. 1,901,021; Mar. 14.

Bussinger, Selma B., San Leandro, Calif. Piston ring compressor. 1,901,224; Mar. 14.

Butler, Francis D., special administrator. (See Holt, G. J., Hocking, Matson, and Knickerbocker.)

Butler, John H., Berkshire township, Delaware county, Ohio. Lawn sprinkler. 1,901,225; Mar. 14.

Butterfield, Charles, Norwood, assignor to Harold W. Nichols, Cincinnati, Ohio. Liner. 1,900,897; Mar. 14.

Butterfield, Vernon J., assignor to Tropic-Aire, Incorporated, Minneapolis, Minn. Heating apparatus for automotive vehicles. 1,901,082; Mar. 14.

Buxton, Herman A., Cleveland Heights, Ohio, assignor to The Chase Bag Company, New York, N. Y. Bag filling apparatus. 1,900,907; Mar. 14.

Byrkit, Rollin J., jr., Marshallton, assignor to Hercules Powder Company, Wilmington, Del. Hydrogenating Abietic Acid Ester. 1,901,630; Mar. 14.

Cade, Arthur R., and H. O. Halverson, Minneapolis, Minn. Germicidal and detergent substances. 1,901,494; Mar. 14.

Caloroil Burner Corporation. (See Klasman, Gordon, assignor.)

Calvert, Burnell M., Terre Haute, Ind. Automobile door. Des. 89,435; Mar. 14.

Camel Company. (See Lute, Carl, assignor.)

Campbell, John G. and L. A., Kansas City, Mo. Garment hanger. 1,900,908; Mar. 14.

Campbell, Lawrence A. (See Campbell, J. G. and L. A.)

Carey, Philip, Manufacturing Company, The. (See Fischer, Albert C., assignor.)

Carting Tool & Machine Company. (See Snelerson, S. L., and Gale, assignors.)

Carlisle, Richard W., Oaklyn, N. J., and R. W. Nye, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Diaphragms. 1,901,631; Mar. 14.

Carlson, Edwin G., Riverside, assignor to Speidel Chain Co., Providence, R. I. Chain connecting link. 1,901,845; Mar. 14.

Carlson, Eric S., assignor to Turnstedt Manufacturing Company, Detroit, Mich. Outside door handle or similar article for an automotive vehicle. Des. 89,436; Mar. 14.

Carlson, Frank P., Astoria, N. Y. Printing press. 1,901,284; Mar. 14.

Carnahan, Glen C., assignor to James B. Clow & Sons, Chicago, Ill. Radiator. 1,900,909; Mar. 14.

Carpe, Allen, New York, N. Y., and F. A. Leibe, Dunellen, N. J., assignors to American Telephone and Telegraph Company. Concentric conductor system. 1,900,976; Mar. 14.

Carpenter, David, Cherryville, N. C. Auxiliary tread for tractors. 1,900,910; Mar. 14.

Carpenter, Edward W., Fairfield, assignor to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn. Shrub protector. 1,901,700; Mar. 14.

Carpenter, E. W., Manufacturing Company, The. (See Carpenter, Edward W., assignor.)
Carroll, Stewart J. (See Smith, H. B., and Carroll.)
Carter, Ralph H., Johnson City, Tenn., assignor to American Glanzstoff Corporation, New York, N. Y. Flanged spool and holder therefor. 1,901,226; Mar. 14.
Cattaneo, Charles, South Norwalk, Conn. Proportional divider. 1,901,801; Mar. 14.
Cavanagh, James, Cohasset, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel. 1,901,144; Mar. 14.
Chadeloid Chemical Company. (See Bradley, Theodore F., assignor.)
Chain Belt Company. (See Shafer, Samuel, jr., assignor.)
Chain Belt Company. (See Steindorf, Robert T., assignor.)
Chamberlain, Alfred J., Milwaukee, Wis. Closure for containers. 1,901,581; Mar. 14.
Chamberlain, Clark W., East Lansing, Mich. Interferometer. 1,901,632; Mar. 14.
Champion Coated Paper Company. (See Bradner, Donald B., assignor.)
Chance Brothers and Co. Limited. (See Forster, Alfred L., assignor.)
Chandonia, Elmer H., assignor to The Lockwood Manufacturing Company, Cincinnati, Ohio. Multiple bake pan. 1,901,022; Mar. 14.
Chapman, Frank D., Berlin, Wis. Heat treating edible substances. 1,901,083; Mar. 14.
Chapman, Frank D., Berlin, Wis. Treating material. 1,901,084; Mar. 14.
Chapman, Howard D. (See Barnes, G. L., and Chapman.)
Chase Bag Company, The. (See Buxton, Herman A., assignor.)
Chase Companies Incorporated, The. (See Pope, Elton A., assignor.)
Chemical Engineering Corporation. (See Jones, Louis C., assignor.)
Chemical Works, formerly Sandos. (See von Allmen, Samuel, assignor.)
Chemipulp Process, Incorporated. (See Dunbar, Thomas L., assignor.)
Chicago-Cleveland Car Roofing Company. (See Swanson, Earl E., assignor.)
Chicago Pneumatic Tool Company. (See Coates, Charles B., assignor.)
Christensen, Peter C., East Orange, N. J. Composition and the production thereof. 1,901,145; Mar. 14.
Christian, David A., assignor to Siemens Brothers & Company Limited, London, England. Telephone system. 1,900,911; Mar. 14.
Christian, David A., assignor to Siemens Brothers & Company Limited, London, England. Electromagnetic switch. 1,900,912; Mar. 14.
Christian, Frank T., assignor to Eclipse Machine Company, Elmira, N. Y. Automatic starting mechanism for internal combustion engines. 1,901,285; Mar. 14.
Christie, Neil, Larder Lake, Ontario, Canada. Rotary engine. 1,900,898; Mar. 14.
Christman, John M., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle transmission mechanism. 1,901,712; Mar. 14.
Cincinnati Ball Crank Co., The. (See Munday, Richard B., assignor.)
Cincinnati Milling Machine Company, The. (See Archea, Walter D., assignor.)
Cincinnati Milling Machine Company, The. (See De Haas, M., and Sassen, assignors.)
Cincinnati Milling Machine Company. (See Einstein, S., and Nenninger, assignors.)
Cippitelli, Cesare, assignor to the Firm Voigt & Haeffner A. G., Frankfort-on-the-Main, Germany. Contact device. 1,900,977; Mar. 14.
Cipullo, Anthony H., assignor to Eaton Manufacturing Company, Cleveland, Ohio. Closure. 1,901,551; Mar. 14.
Clapp, F. H., Rubber Company. (See Sleeper, Myron O., assignor.)
Clapp, George A., et al. (See Sleeper, Myron O., assignor.)
Clark, Edward A., Saline, Mich. Folding game table. 1,901,732; Mar. 14.
Clark Equipment Company. (See Burger, Frederick W., assignor.)
Clark, Eugene F., Damariscotta, Me., assignor to Marshall Field Mills Corporation, Philadelphia, Pa. Tuft yarn frame for looms for weaving tufted pile fabric. 1,901,435; Mar. 14.
Clark, George F. (See Stanley, H. H. V., and Clark.)
Clark, Jeddiah B., assignor to Indiana Glass Company, Dunkirk, Ind. Jar. Des. 89,437; Mar. 14.
Clark Manufacturing Company, The. (See Strong, Leslie P., assignor.)
Clarke Chapman & Company. (See Woodeson, William A., assignor.)
Clemmons, Herbert D., Sturgis, Mich., assignor to Scovill Manufacturing Company, Waterbury, Conn. Ball-cock. 1,901,633; Mar. 14.
Clerc, Reinhard. (See Schoeller, W., Jordan, and Clerc.)
Cleveland Crane & Engineering Company, The. (See Bennington, Earl T., assignor.)
Cleveland Graphite Bronze Company, The. (See Kerrulish, Edward P., assignor.)
Cleveland Welding Company. (See Krans, H. W., Holden, and Uber, assignors.)
Climax Engineering Company. (See Waters, H. H., and Gagg, assignors.)
Clingestein, Heinrich. (See Wiedemann, K., and Clingestein.)
Clouse, William L., assignor to The National Machinery Company, Tiffin, Ohio. Delivery mechanism for nut tappers. 1,901,146; Mar. 14.
Clow, James B., & Sons. (See Carnahan, Glen C., assignor.)
Cluff, William R., New York, N. Y. Game board. Des. 89,438; Mar. 14.
Coates, Charles B., Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Duplex equalizing apparatus. 1,901,436; Mar. 14.
Coe, George B., Montclair, N. J., assignor, by mesne assignments, to Tube Reducing Corporation, Wilmington, Del. Rod coupling. 1,901,286; Mar. 14.
Coffey, W. H. (See Kuhn, Herman L., assignor.)
Cohn, David D., Camden, N. J., assignor to General Electric Company. Transformer fault detector. 1,901,701; Mar. 14.
Coleman, Clyde, Passaic, N. J., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Vulcanization of rubber. 1,901,582; Mar. 14.
Coleman, John P., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical coupling device. 1,900,913; Mar. 14.
Colonial Trust Company, executors. (See Kirk, Henry C.)
Colorado Fuel and Iron Company, The. (See Thompson, George S., assignor.)
Colson Company, The. (See Roe, De Forest, assignor.)
Combustion Utilities Corporation. (See Schumann, Theodor E. W., assignor.)
Commercial Patents Development Company. (See Black, Russell, assignor.)
Communication Patents, Inc. (See Nicolson, Alexander M., assignor.)
Condit Electrical Manufacturing Corporation. (See Burnham, George A., assignor.)
Conn, Joseph C., Boonton, N. J. Indicator device. 1,901,346; Mar. 14.
Continental Oil Company. (See Davis, L. L., Henriksen, and Allinson, assignors.)
Continental Oil Company. (See Henriksen, Alfred, assignor.)
Continental Oil Company. (See Lincoln, Bert H., assignor.)
Continental Oil Company. (See Moran, Daniel J., assignor.)
Conway, John J., assignor to The Acme Shear Company, Bridgeport, Conn. Shipping and display cabinet for shears. 1,901,583; Mar. 14.
Cook, Mark F., and G. T. Breisch, Niagara Falls, N. Y., assignors to Aluminum Company of America, Pittsburgh, Pa. Work handling mechanism. 1,901,702; Mar. 14.
Cooper, Grover C., Collingswood, N. J., assignor to Union Special Machine Company, Chicago, Ill. Uncurler guide for sewing machines. 1,901,733; Mar. 14.
Cooper, Wellesley B., and E. T. Phoenix, Amsterdam, N. Y., assignors to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn. Reversible tuft pile carpet or rug. 1,901,840; Mar. 14.
Coots, Frank J., jr., and G. Seid, Hollywood, Calif. Sound track printing attachment for motion picture printers. 1,901,147; Mar. 14.
Corell, Martin, et al. (See Kraenzlein, G., Vollman, and Corell.)
Corkran, Ceylon C., San Francisco, Calif. Fluid injecting device. 1,901,085; Mar. 14.
Cornet, Manuel G., Madrid, Spain. System for preventing the derailment of screw-driven vehicles. 1,900,914; Mar. 14.
Corriveau, Aloysius W., West Springfield, Mass. Adjustable spring and axle wedge. 1,901,287; Mar. 14.
Cossaiter, Frank M., Goldbar, Wash. Vehicle bumper. 1,901,227; Mar. 14.
Costello, William F., assignor to The New Britain Machine Company, New Britain, Conn. Wrench set. 1,900,915; Mar. 14.
Cotroumpas, Stephanos, Brooklyn, assignor, by mesne assignments, to C. H. Sullivan, Northport, N. Y. Aircraft. 1,901,734; Mar. 14.
Cotton Harvester Corporation of America. (See Wirth, Louis E., assignor.)
Court, Frank T. (See White, C. H., and Court.)
Courtner, W. H., et al. (See Tedford, Julian P., assignor.)
Cox, Frederick J., Tufnell Park, London, England. Gas burner. 1,901,086; Mar. 14.
Crane Co. (See Olson, Charles A., assignor.)
Creamer Package Mfg. Company, The. (See Wallis, George E., assignor.)
Creveling, John L., near Tucson, Ariz., assignor to The Lubrication Corporation, South Bend, Ind. Lubricating means. 1,901,148; Mar. 14.
Crobin, Elbert A., jr., Gradyville, assignor of one-half to W. R. Brown, Philadelphia, Pa. Single deck bus with superimposed seats. 1,901,023; Mar. 14.
Croker Fire Prevention Corp. (See Lund, Rudolph O., assignor.)
Cromar Company, The. (See Dittmar, Elmer C., assignor.)

Crone, Seth A., East Orange, N. J., assignor to Buffalo Brake Beam Company, New York, N. Y. Brake beam adjuster and release device. 1,901,437; Mar. 14.
Crossley, Alfred, Washington, D. C., assignor, by mesne assignments, to Wired Radio, Inc., New York, N. Y. Piezo electric crystal system. 1,901,735; Mar. 14.
Crowley, Henry L., East Orange, assignor to Henry L. Crowley & Company, Inc., West Orange, N. J. Insulating spacer. 1,901,703; Mar. 14.
Crowley, Henry L., & Company. (See Crowley, Henry L., assignor.)
Crown Cork & Seal Company, Inc. (See Warth, Albin H., assignor.)
Crumpacker James W., Hutchinson, Kans. Drive shaft and pinion assembly puller. 1,901,736; Mar. 14.
Cummings, Edmund O., High Point, N. C. Making basic metal sulphates and recovery of metal from waste metallic compounds. 1,901,364; Mar. 14.
Currivan, John F., Forest Hills, N. Y., assignor to Good-Ad, Inc. Dial operator. 1,900,916; Mar. 14.
Cutler-Hammer, Inc. (See Kuhn, Clarence W., assignor.)
Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)
Dahlstrom Metallic Door Company. (See Jacobson, Ludwig G., assignor.)
Dailey, Manvel C. (See Randel, W. S., and Dailey.)
Dailey, Manvel C., Maywood, assignor to United States Gypsum Company, Chicago, Ill. Composition for molding investment inlays. 1,901,052; Mar. 14.
Dailey, Manvel C., Maywood, assignor to United States Gypsum Company, Chicago, Ill. Dental investment composition. 1,901,053; Mar. 14.
Dailey, Manvel C., assignor to United States Gypsum Company, Chicago, Ill. Dental model stone composition. 1,901,054; Mar. 14.
Daley, James C., assignor to Jefferson Electric Company, Chicago, Ill. Making core laminæ. 1,901,584; Mar. 14.
Dalheimer, Walther, Eindhoven, Netherlands, assignor to Radio Corporation of America. Apparatus for mechanically mounting electrodes of thermionic tubes. 1,901,087; Mar. 14.
Dillenbach, Walter, Zurich, Switzerland. Leading-in device for metallic vacuum-discharge containers. 1,901,802; Mar. 14.
Dancer, Ben, Houston, Tex. Burial vault. 1,901,149; Mar. 14.
Daniels, Claude H., Newton Center, Mass. Jewelled shoe and making same. 1,901,494; Mar. 14.
Dargis, Christopher C., Atlantic City, N. J. Combination box for electro-pneumatic pipe organs. 1,901,552; Mar. 14.
Davidson, Alfred, and A. Shepherdson, assignors to British Dyestuffs Corporation Limited, Blackley, Manchester, England. Manufacture of vat dyestuffs and of intermediate products relating thereto. 1,901,288; Mar. 14.
Davidson, Walter C., North Canton, Ohio, assignor to The Hoover Company. Filtering material. 1,901,488; Mar. 14.
Davies, Gilbert H., Ebbw Vale, Wales. Rotary coupling for steam and other pressure fluid supply circuits. 1,900,899; Mar. 14.
Davis, Lawrence, Walpole, Mass. Label. 1,901,495; Mar. 14.
Davis, Lloyd L., A. Henriksen, and J. J. Allinson, assignors to Continental Oil Company, Ponca City, Okla. Removal of impurities from crude petroleum. 1,901,228; Mar. 14.
Davis, William T., Huntington Park, Calif. Decarbonising oil refining apparatus. 1,901,803; Mar. 14.
Davis, William T., Southgate, and C. B. Rhein, San Francisco, Calif., assignors to The Linde Air Products Company. Removing carbon from tubes. 1,901,804; Mar. 14.
Dawkins, Don G., Huntington Park, Calif. Removable chill ring. 1,901,634; Mar. 14.
Deakin, Gerald, New York, N. Y., and L. J. J. Schreiber, Antwerp, Belgium, assignor to International Standard Electric Corporation, New York, N. Y. Selector switch suitable for use in telephone systems. 1,900,917; Mar. 14.
Dean, John N. (See Smith, W. S., Garnett, and Dean.)
Deere & Company. (See McKahin, Herbert B., assignor.)
Deere & Company. (See Strandlund, Carl G., assignor.)
Deere & Company. (See White, C. H., and Court, assignors.)
De Haas, Max, and B. Sassen, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machine. 1,901,295; Mar. 14.
De La Mare, Thomas, Salt Lake City, Utah. Constructing and maintaining crude oil conductors. 1,900,978; Mar. 14.
De La Quintana, Raul O., Buenos Aires, Argentina. Automatic braking device for phonographs and the like. 1,901,553; Mar. 14.
Delles, William J., Schenectady, N. Y., assignor to General Electric Company. Manufacturing blade ring structures. 1,901,704; Mar. 14.
Delta Star Electric Company, The. (See Alsaker, A., Hampton, and Kerner, assignors.)
Delta Star Electric Company, The. (See Rah, Joseph, assignor.)
De Ment, Olive M., Decatur, Ill. Lingerie strap holder. 1,900,979; Mar. 14.
Detroit Steel Products Company. (See Barclay, Gustaf L., assignor.)
Deubener, Walter H. (See Fischer, Howard L., assignor.)
Devine, J. P., Manufacturing Company. (See Sleeper, Oliver S., assignor.)
De Vout, Anson W., and R. W. Regensburger, assignors, by mesne assignments, to Industrial Patents Corporation, Chicago, Ill. Egg tray. 1,901,705; Mar. 14.
De Wilde, Frederick P., Sheboygan, Wis. Safety control for motor vehicles. 1,901,554; Mar. 14.
Dick, Burns, Ferguson, assignor to Wagner Electric Corporation, St. Louis, Mo. Making hose connections. 1,901,088; Mar. 14.
Diesel, William F., assignor to Sargent & Greenleaf, Inc., Rochester, N. Y. Multiple key lock. 1,901,229; Mar. 14.
Dieter, William, Newark, N. J., assignor to E. W. Bliss Company. Can testing machine. 1,900,918; Mar. 14.
Dina, Augusto, Jersey City, N. J., assignor to International Projector Corporation, New York, N. Y. Combined ventilating and fire shutter for motion picture projection machines. 1,900,919; Mar. 14.
Dina, Augusto, Jersey City, N. J., assignor to International Projector Corporation, New York, N. Y. Gate for motion picture machines. 1,900,920; Mar. 14.
Disporsious Process, Inc. (See Mitchell, John K., assignor.)
Dittmar, Elmer C., assignor to The Cromar Company, Williamsport, Pa. Method of and apparatus for bundling flooring. 1,900,980; Mar. 14.
Dömmler, Karl, Leverkusen-on-the-Rhine, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Rendering carbon disulphide soluble in water. 1,900,981; Mar 14.
Doherty-Brehm Company. (See Doherty, George D., assignor.)
Doherty, George D., Evanston, Ill., assignor to Doherty-Brehm Company, Minneapolis, Minn. Humidifying apparatus. Re18,762; Mar. 14.
Doherty Research Company. (See Gordon, Philip C., assignor.)
Dorogi, Dr., & Co. Rubber Goods Factory Limited. (See Dorogi, István and L., assignors.)
Dorogi, István and L., assignors of one-half to Dr. Dorogi & Co. Rubber Goods Factory Limited, Budapest, Hungary. Inflatable figure toy. 1,901,150; Mar. 14.
Dorogi, Lajos. (See Dorogi, István and L.)
Dow Chemical Company, The. (See Stroeacker, C. J., Kennedy, and Pelton, assignors.)
Dow, Dewey M. (See Riebel, F., jr., and Dow.)
Dowd, Bernard J., West Hartford, Conn., assignor to Royal Typewriter Company, Inc., New York, N. Y. Hinge. 1,901,289; Mar. 14.
Drake, Harcourt C., Hempstead, assignor, by mesne assignments, to Sperry Products, Inc., Brooklyn, N. Y. Purifying molten metal. 1,901,585; Mar. 14.
Draper Corporation. (See Stimpson, Wallace L., assignor.)
Drew, James F., assignor to Macwhyte Company, Kenosha, Wis. Sling and making the same. 1,901,439; Mar. 14.
Dreyer, Paul, Stavanger, Norway. Typewriter and like machine. 1,900,982; Mar. 14.
Druckenmiller, Joseph H., Edge Hill, Pa. Bathroom fixture. 1,901,151; Mar. 14.
Duey, Harold P., Los Angeles, Calif. Toothbrush. 1,901,280; Mar. 14.
Dunbar, Thomas L., assignor to Chemipulp Process, Incorporated, Watertown, N. Y. Production of pulp. 1,901,706; Mar. 14.
Dunker, John G., Chicago, Ill., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Calculating machine. 1,901,152; Mar. 14.
Dunker, John G., Chicago, Ill., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Bookkeeping machine. 1,901,153; Mar. 14.
Dunlap, Charles K., assignor to Conoco Products Company, Hartsville, S. C. Spool. 1,901,737; Mar. 14.
Dunlop, James, Park Ridge, Ill., assignor to Westinghouse Electric Elevator Company. Slack cable take-up device. 1,901,635; Mar. 14.
Dunn, John J. (See Hoffman, Otto C., assignor.)
Dunn, Louise M., and W. H. Mills, Cleveland, Ohio. Toy. 1,901,707; Mar. 14.
Duplex Printing Press Company. (See Bechman, Henry F., assignor.)
Du Pont, E. I. de Nemours & Company. (See Heake, C. O., and Etsel, assignors.)
Du Pont, Mark S., Darby, assignor to Kellett Autogiro Corporation, Philadelphia, Pa. Aerial banner. 1,901,855; Mar. 14.
Du Pont Rayon Company. (See Ladrette, Jean, assignor.)
Durdin, Augustus C., jr., Chicago, Ill. Vacuum condensation pump. 1,901,154; Mar. 14.
Dustmann, Friedrich W. (See Heine, A., and Dustmann.)
Dunck, Josias D., Sequim, Wash. Hog feeder. 1,901,089; Mar. 14.
Early, Rupert N., assignor to Electric Machinery Manufacturing Company, Minneapolis, Minn. Dynamo-electric machine. 1,901,586; Mar. 14.
Early, Rupert N., assignor to Electric Machinery Manufacturing Company, Minneapolis, Minn. Electric motor starting system. 1,901,636; Mar. 14.
Eastman Kodak Company. (See Smith, Henry B., assignor.)

Eastman Kodak Company. (See Smith, H. B., and Carroll, assignors.)
Eastham, Melville, assignor to General Radio Company, Cambridge, Mass. Electric instrument. 1,901,343; Mar. 14.
Eaton Manufacturing Company. (See Cipullo, Anthony H., assignor.)
Eaton Manufacturing Company. (See Veale, George W., assignor.)
Eau de Cologne & Jarfümerie-Fabrik "Glockengasse No. 4711" Gegenüber der Pferdepost von Ferd. Mühleus. (See Kahn, Leopold, assignor.)
Eaves, Elmer, Batesville, Miss. Barber mug. 1,901,738; Mar. 14.
Eberlein, John B., and G. R. Steere, Detroit, Mich., assignors, by mesne assignments, to Semet-Solvay Engineering Corporation, New York, N. Y. Gas manufacture. 1,900,958; Mar. 14.
Eckstein, Reuben, New York, N. Y. Electric current tapping device. 1,901,587; Mar. 14.
Eckstein, Reuben, New York, N. Y. Battery. 1,901,588; Mar. 14.
Eclipse Machine Company. (See Christian, Frank T., assignor.)
Eclipse Machine Company. (See Sekella, Youston, assignor.)
Economic Machinery Company. (See Holm, Carl, assignor.)
Edge, Jacob, Downingtown, Pa., assignor, by mesne assignments, to United States Gypsum Company, Wilmington, Del. Making plastic material. 1,901,024; Mar. 14.
Edland, Ingval, Monitor, Oreg. Feed mixer. Re18,768; Mar. 14.
Eger, Ernst, assignor to Morgan & Wright, Detroit, Mich. Interchangeable tire valves. 1,901,637; Mar. 14.
Egry Register Company, The. (See Pfeiffer, Frank E., assignor.)
Einstein, Sol, and L. F. Nenninger, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machine. 1,901,290; Mar. 14.
Elder, Donald, Berkeley, Calif. Sprinkler flow timing apparatus. 1,901,496; Mar. 14.
Electric Machinery Manufacturing Company. (See Early, Rupert N., assignor.)
Electrolux Servel Corporation. (See Lenning, Alvar.)
Ellingson, William M., Fargo, N. Dak., assignor to Westinghouse Electric & Manufacturing Company. Invar relay. 1,901,708; Mar. 14.
Elliott, George R. (See Warner, H. K., and Elliott.)
Emerson Electric Mfg. Co. (See Rodgers, James A., assignor.)
Emsco Derrick & Equipment Company. (See Stevenson, Edward E., assignor.)
Endsley, William H., Henderson, Tex. Apparatus for guiding and steadying drill stem and drill pipe. 1,900,921; Mar. 14.
Engberg, Axel O., and T. E. D. Bilde, Stockholm, Sweden, assignors to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland. Floor polisher. 1,901,497; Mar. 14.
Engel, Karl, New York, N. Y. Attachment for shears. 1,901,739; Mar. 14.
Ensign Carburetor Co. (See Ensign, Orville H., assignor.)
Ensign, Orville H., Pasadena, Calif., assignor, by mesne assignments, to Ensign Carburetor Co., Ltd., Huntington Park, Calif. Carburetor. Re18,767; Mar. 14.
Erickson, Ellis O. (See Vedder, E. H., and Erickson.)
Ernest, Albert, Chicago, Ill. Furniture. 1,901,638; Mar. 14.
Ernest, Walter, assignor to Hydraulic Press Manufacturing Company, Mount Gilead, Ohio. Hydraulic press. 1,901,291; Mar. 14.
Erren, Rudolf, Berlin, Germany. Driving internal combustion engines. 1,901,709; Mar. 14.
Eschholz, Otto H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Vacuum circuit breaker. 1,901,639; Mar. 14.
Esseltine, Alfred B., assignor to Goodman Manufacturing Company, Chicago, Ill. Snatch block. 1,901,498; Mar. 14.
Ettinger, Joe J., assignor to Zimmer Manufacturing Company, Warsaw, Ind. Hospital bed. 1,901,841; Mar. 14.
Etzel, Gastao. (See Henke, C. O., and Etzel.)
Eule, Martin, Berlin-Spandau, and E. Anders, Berlin-Charlottenburg, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Multiple heat exchange coil. 1,901,090; Mar. 14.
Eurich, Richard H. (See Reinhardt, G. A., and Eurich.)
Evans, Harold A., assignor to Parco Specialty Co., Lynn, Mass. Ornamental ribbon and making the same. 1,900,900; Mar. 14.
Evans, Leigh R., assignor to Morrison Machine Products, Inc., Elmira, N. Y. Gripping face for chucks and making the same. 1,900,922; Mar. 14.
Evans, Wilmot R., trustee. (See Wolfe, Walter G., assignor.)
Everitt, George E., Decatur, Ga. Display stand and shipping case. 1,900,983; Mar. 14.
Fahrenwold, Frank A., Chicago, Ill. Electric furnace. 1,901,499; Mar. 14.
Fallert, Fritz, Bern, Switzerland. Printing press. 1,900,928; Mar. 14.
Farber, S. W., Inc. (See Farber, Simon W., assignor.)
Farber, Simon W., assignor to S. W. Farber, Inc., Brooklyn, N. Y. Receptacle for liquids. 1,901,155; Mar. 14.
Faries Manufacturing Company. (See Flynn, James J., assignor.)
Farr, Leon N., et al. (See Tedford, Julian P., assignor.)
Farrell Company, The. (See Young, Wilson T., assignor.)
Fawcett, John R., assignor to William Hall & Company Limited, Studley, England. Fishing reel. 1,901,091; Mar. 14.
Feeley, Matthew R., Scranton, Pa., and C. Stern, Jersey City, assignors to Ardco Manufacturing Company, Hoboken, N. J. Bellows checked cylinder cock. 1,901,740; Mar. 14.
Feeley, Matthew R., Scranton, Pa., and C. Stern, Jersey City, N. J. Bellows operated safety cylinder cock. 1,901,805; Mar. 14.
Fellows Gear Shaper Company, The. (See Miller, Edward W., assignor.)
Ferguson Brothers Manufacturing Company. (See Boenning, William M., assignor.)
Ferranti Inc. (See Norris, Eric D. T., assignor.)
Ferris, Walter, assignor to The Oilgear Company, Milwaukee, Wis. Broaching machine. 1,901,500; Mar. 14.
Ferris, Walter, assignor to The Oilgear Company, Milwaukee, Wis. Pump. 1,901,501; Mar. 14.
Fessenden, Reginald A., Chestnut Hill, Mass. Light modulators and constructing the same. 1,901,502; Mar. 14.
Fessenden, Reginald A., Chestnut Hill, Mass. Rotary brush. 1,901,503; Mar. 14.
Fetsch, Joseph T., jr., Washington, D. C. High frequency voltmeter. 1,901,741; Mar. 14.
Fichtel & Sachs A. G. et al. (See Goldschmidt, Max, assignor.)
Field, James H., Newark, N. J. Filing device. 1,901,365; Mar. 14.
Field, Marshall, & Company. (See Blayney, Wilson L., assignor.)
Firestone, Vance S., assignor to Arcade Manufacturing Company, Freeport, Ill. Mechanically-operated bucket. 1,901,555; Mar. 14.
Firth, Rowland V. D., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Oiling device for bearings. 1,900,924; Mar. 14.
Firtion, Harold L., Warehouse Point, assignor to The Montgomery Company, Windsor Locks, Conn. Mop. 1,901,842; Mar. 14.
Fischer, Albert C., Chicago, Ill., assignor to The Philip Carey Manufacturing Company. Constructional material. Re18,765; Mar. 14.
Fischer, Howard L., assignor to W. H. Deubener, St. Paul, Minn. Bag and making the same. 1,901,858; Mar. 14.
Fisher, Albert H., East Cleveland, Ohio, assignor to Kex Company, Incorporated, St. Louis, Mo. Tire casing repair apparatus. 1,901,231; Mar. 14.
Fisk, Henry D., assignor, by mesne assignments, to Gleaner Harvester Corporation, Independence, Mo. Corn harvesting machine. 1,901,092; Mar. 14.
Fitzgerald Manufacturing Company, The. (See Reichold, Ludwig, assignor.)
Fitzhugh, Champe G., Washington, D. C. Container. 1,901,742; Mar. 14.
Flaherty, Mark, Haddon Heights, N. J., assignor to General Electric Company. Stop means for rotary shafts. 1,901,710; Mar. 14.
Flanigan, John J., Oak Park, assignor to Vivid, Incorporated, Chicago, Ill. Duplicating machine. 1,901,440; Mar. 14.
Fleischhauer, Richard, and C. Schultis, Frankfort-on-the-Main-Fechenheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Black azodyestuffs and making same. 1,901,890; Mar. 14.
Flüga Aktien-Gesellschaft. (See Heylandt, Christian W. P., assignor.)
Flynn, James J., Camden, N. J., assignor to Faries Manufacturing Company, Decatur, Ill. Screwless holder. 1,901,366; Mar. 14.
Food Machinery Corporation. (See Fulton, Thomas J., assignor.)
Forberg, Christian, St. Thomas, Ontario, Canada. Combination washer. 1,901,891; Mar. 14.
Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Closure operating and locking device. 1,901,711; Mar. 14.
Forster, Alfred L., Glasgow, Scotland, assignor to Chance Brothers and Co., Limited, West Smethwick, England. Manufacture of wired glass. 1,901,743; Mar. 14.
Fränkel, Stefan, Berlin, Germany. Making photographic silver salt emulsions. 1,901,441; Mar. 14.
Franklin, Charles S., Buckhurst Hill, England, assignor to Radio Corporation of America. Aerial. 1,901,025; Mar. 14.
Franklin Railway Supply Company. (See Vincent, Harry S., assignor.)
Frappier, Louis S., and E. Boecking, Brooklyn, assignors to International Projector Corporation, New York, N. Y. Compound film gate. 1,900,925; Mar. 14.
Fraser, Hugh J. (See Owens, R. J., and Fraser.)
Frederick, John S., Emaus, Pa. Concrete form. 1,901,392; Mar. 14.
Freedlander, Abraham L., Dayton, Ohio. Manufacturing belts. 1,901,442; Mar. 14.
French Oil Mill Machinery Co. (See Stacy, Thomas F., assignor.)

Friesel, Adolph J., Chicago, Ill. Combination plug and fuse. 1,900,926; Mar. 14.
Frosted Foods Company, Inc. (See Birdseye, Clarence, assignor.)
Fuller, Bert F., Burlingame, Calif., assignor to Westinghouse Electric & Manufacturing Company. Theater switch panel. 1,901,640; Mar. 14.
Fuller, Frederick L., West Orange, N. J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,901,093; Mar. 14.
Fuller Lehigh Company. (See Jacobus, David S., assignor.)
Fuller, Rufus W., Deerfield, assignor to Production Machine Company, Greenfield, Mass. Centerless grinding or polishing machine. 1,900,984; Mar. 14.
Fullmer, Giles C., assignor to The Bridgeport Metal Goods Manufacturing Company, Bridgeport, Conn. Pick-up candle light. 1,901,589; Mar. 14.
Fulton, Paul D., assignor to The Huffman Manufacturing Company, Dayton, Ohio. Liquid dispensing can. 1,901,504; Mar. 14.
Fulton Sylphone Company, The. (See Giesler, Jean V., assignor.)
Fulton, Thomas J., Fresno, assignor to Food Machinery Corporation, San Jose, Calif. Atomizer. 1,901,806; Mar. 14.
Furness Corporation. (See Furness, William H., assignor.)
Furness, William H., National Park, N. J., assignor, by mesne assignments, to Furness Corporation, Philadelphia, Pa. Silk manufacture. 1,901,590; Mar. 14.
Gabosen, John, Chicago, Ill., assignor to The Kendall Company, Boston, Mass. Adhesive tape. 1,901,094; Mar. 14.
Gabriel Company, The. (See Beecher, Eugene L., assignor.)
Gagg, Rudolph F. (See Waters, H. H., and Gagg.)
Gaisman, Henry J., New York, N. Y., assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass. Metal aligning device. 1,901,829; Mar. 14.
Gaisman, Henry J., New York, N. Y., assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass. Blade clip. 1,901,830; Mar. 14.
Gale, Eiffel B. (See Snelerson, S. L., and Gale.)
Galusha, Albert L., Caldwell, N. J. Gas producer. 1,901,807; Mar. 14.
Garda, Enrico. (See Trinchero, Ferrucci, assignor.)
Garnett, Henry J. (See Smith, W. S., Garnett, and Dean.)
Garvin, John S., Bogota, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Signaling device. 1,901,443; Mar. 14.
Gas Krakker Corporation. (See Rawers, William B., assignor.)
Geigy, J. R., S. A., Firm. (See Schafer, Josef, assignor.)
General Aniline Works, Inc. (See Becker, Walter, assignor.)
General Aniline Works, Inc. (See Fleischhauer, R., and Schultis, assignors.)
General Aniline Works, Inc. (See Gleitenberg, Eugen, assignor.)
General Aniline Works, Inc. (See Hentrich, W., Ossenbeck, and Tietze, assignors.)
General Aniline Works, Inc. (See Kraenzlein, G., Vollmann, and Corell, assignors.)
General Aniline Works, Inc. (See Kunz, M. A., and Koeberle, assignors.)
General Aniline Works, Inc. (See Munz, Ferdinand, assignor.)
General Aniline Works, Inc. (See Neelmeier, W., Rimele, and Glietenberg, assignors.)
General Aniline Works, Inc. (See Wiedemann, K., and Clingenstein, assignors.)
General Electric Company. (See Bainbridge, Kenneth T., assignor.)
General Electric Company. (See Bedford, Burnice D., assignor.)
General Electric Company. (See Coffin, David D., assignor.)
General Electric Company. (See Delles, William J., assignor.)
General Electric Company. (See Flaherty, Mark, assignor.)
General Electric Company. (See Heine, A., and Dustmann, assignors.)
General Electric Company. (See Hull, John I., assignor.)
General Electric Company. (See Kempton, Leslie A., assignor.)
General Electric Company. (See Kerr, Thomas, assignor.)
General Electric Company. (See McArthur, Elmer D., assignor.)
General Electric Company. (See Setter, Joseph A., assignor.)
General Electric Company. (See Turner, Harry W., assignor.)
General Electric Company. (See Uebermuth, Werner, assignor.)
General Electric Company. (See Whiting, Max A., assignor.)
General Electric Company. (See Woods, William J., assignor.)
General Machinery Company. (See Sutton, G. C., and Witschge, assignors.)
General Radio Company. (See Eastham, Melville, assignor.)
General Radio Company. (See Herton, Joseph W., assignor.)
General Radio Company. (See Lamson, Horatio W., assignor.)
General Railway Signal Company. (See Howe, Winthrop K., assignor.)
General Railway Signal Company. (See Leake, Richard C., assignor.)
General Spring Bumper Corporation. (See Jandus, H. S., and Brooke, assignors.)
General Tire & Rubber Company, The. (See Maranville, Alger G., assignor.)
General Zeolite Co. (See Kean, Robert H., assignor.)
Gettings, Edwin G., Los Angeles, Calif. Clothes cleaning machine. 1,900,927; Mar. 14.
Gibson, Alexander J. (See Huttger, Edward P., assignor.)
Giesler, Jean V., assignor to The Fulton Sylphon Company, Knoxville, Tenn. Pressure responsive vessel. 1,900,985; Mar. 14.
Gietz, Peter, Johannisberg-on-the-Rhine, assignor to Maschinenfabrik Johannisberg G. m. b. H., Geisenheim-on-the-Rhine, Germany. Device for the clamping of flexible printing blocks or sterens on the form-cylinder of copper-plate or intaglio printing machine. 1,900,986; Mar. 14.
Gillette Safety Razor Company. (See Gaisman, Henry J., assignor.)
Gillings, Charles, and F. T. Belas, Liverpool, England, assignors to Associated Telephone and Telegraph Company, Chicago, Ill. Telephone system. 1,901,156; Mar. 14.
Giordano, Michael G., Cranston, R. I. Joint connection. 1,901,026; Mar. 14.
Gleaner Harvester Corporation. (See Fisk, Henry D., assignor.)
Gleaner Harvester Corporation. (See Hale, Stephen H., assignor.)
Glietenberg, Eugen. (See Neelmeier, W., Rimele, and Glietenberg.)
Glietenberg, Eugen, Leverkusen-I. G.-Werk, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Polyazodyestuffs. 1,901,893; Mar. 14.
Globe Machine & Stamping Company, The. (See Green, Lee B., assignor.)
Glover, Edward G., Pineville, N. [illegible] Nut lock. 1,901,744; Mar. 14.
Glowacki, John B., Chicago, Ill. Drop card protector. 1,901,232; Mar. 14.
Glowacki, John B., Chicago, Ill. Drop cord and canopy supporting bridge. 1,901,233; Mar. 14.
Glowacki, John B., Chicago, Ill. Fixture and canopy support. 1,901,234; Mar. 14.
Glowacki, John B., Chicago, Ill. Fixture bridge. 1,901,235; Mar. 14.
Godshalk, Clarence A., Ardmore, Pa. Safety razor. 1,190,591; Mar. 14.
Goff, Jennie H., Lisbon Falls, Me. Wall paper. 1,900,987; Mar. 14.
Goldblatt, Louis E., Brooklyn, N. Y. Stretcher. 1,901,641; Mar. 14.
Goldschmidt, Max, Frankfort-on-the-Main, assignor to the Firm Fichtel & Sachs A. G., Schweinfort-on-the-Main, and Mecano Gesellschaft mit beschrankter Haftung, Frankfort-on-the-Main, Germany. Adjustable disk clutch. 1,901,856; Mar. 14.
Goldstone, Jacob. (See Brooks, J. H., and Goldstone.)
Goldthwait, Charles F., Mount Lebanon Township, Allegheny County, Pa., assignor, by mesne assignments, to Textile Machinery Corporation. Modified cotton. 1,901,095; Mar. 14.
Golladay, Lawrence R. (See Wagner, C. F., and Golladay.)
Gongaware, William F., Santa Monica, Calif. Firecracker tube rolling machine. 1,900,928; Mar. 14.
Good-Ad, Inc. (See Currivan, John F., assignor.)
Goodman Manufacturing Company. (See Esseltine, Alfred B., assignor.)
Gordon, Philip C., assignor to Doherty Research Company, New York, N. Y. Coupling device. 1,901,843; Mar. 14.
Gordon, Samuel, Boston, Mass. Display stand. Des. 89,463; Mar. 14.
Gorin, Frederick P., Seattle, assignor to Gorin Shocklesspeed Tabulator Company, King County, Wash. Tabulator rebound trap. 1,901,896; Mar. 14.
Gorin, Frederick P., assignor to Gorin Shocklesspeed Tabulator Company, Seattle, Wash. Typewriting machine. 1,901,157; Mar. 14.
Gorin Shocklesspeed Tabulator Company. (See Gorin, Frederick P., assignor.)
Gorschlüter, Fritz, and E. Pohl, assignors to Borsigwerk Aktiengesellschaft, Borsigwerk, Germany. Steel vessel and producing same. 1,900,988; Mar. 14.
Gottschalk, Lionel J., New Orleans, La. Refrigerator. 1,901,556; Mar. 14.
Graham, Leon L., Chicago, Ill., assignor to Bendix-Cowdrey Brake Tester, Inc., South Bend, Ind. Brake throw measuring device. 1,901,292; Mar. 14.
Grattan, David, Los Angeles, Calif. Force feed lubricating apparatus. 1,901,027; Mar. 14.

Gravely, Benjamin F., Dunbar, W. Va. Mowing device. 1,901,293; Mar. 14.
Gray Processes Corporation, The. (See Gray, Thomas T., assignor.)
Gray, Thomas T., Elisabeth, assignor to The Gray Processes Corporation, Newark, N. J. Refining hydrocarbons. 1,901,158; Mar. 14.
Green, Charles W., Ilion, N. Y., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,901,097; Mar. 14.
Green, Lee B., Lakewood, assignor to The Globe Machine & Stamping Company, Cleveland, Ohio. Water heater for coffee making. 1,901,028; Mar. 14.
Greene, Fred E., Escalon, assignor to A. B. Humphrey Company, Mayhews, Calif. Apparatus for precooling refrigerator cars. 1,901,505; Mar. 14.
Greenfield, Arthur. (See Brewer, John F., assignor.)
Greiner, Edward E. (See Johnson, Ben P., assignor.)
Gritt, Frank A., and F. Stewart, assignors to Gritt, Incorporated, Indianapolis, Ind. Animated imitation hearth fire. 1,901,294; Mar. 14.
Gritt, Incorporated. (See Gritt, F. A., and Stewart, assignors.)
Grosscup, Edward E., receiver. (See Bozarth, William H., assignor.)
Gruber, Max. (See Wurster, C., and Gruber.)
Grundy, James A., and W. M. Payne, assignors to John Bromley & Sons, Incorporated, Philadelphia, Pa. Tube frame. 1,901,444; Mar. 14.
Guenther, Fritz, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustire Aktiengesellschaft, Frankfort-on-the-Main, Germany. Mixtures of sulphonated alkylated nondyeing aromatic carbocyclic compounds and their salts. 1,901,507; Mar. 14.
Guest, William W., Los Angeles, Calif. Shear pin for crushing machines. 1,901,159; Mar. 14.
Guhl, Maclyn, Forest Hills, assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,429; Mar. 14.
Guhl, Maclyn, Forest Hills, assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,440; Mar. 14.
Guidetti, Ferruccio, Elmhurst, and G. Bontempi, assignors to The Watairway Manufacturing Corporation, New York, N. Y. Sanitary water closet attachment. 1,901,160; Mar. 14.
Guild, Waldo J., assignor to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,901,236; Mar. 14.
Guinness, Edward E., Rednal, near Birmingham, assignor of one-eighth to Hubert Humphreys, Birmingham, England. Variable speed device. 1,901,098; Mar. 14.
Günther, Fritz, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Wetting agent. 1,901,506; Mar. 14.
Gustafsson, Em. I G. T., Stockholm, Sweden. Producing metals and metal alloys low in carbon. 1,901,367; Mar. 14.
Gutberlet, Charles J., Philadelphia, Pa. Telephone ticket distribution system. 1,901,508; Mar. 14.
Gyro Process Company. (See Harnsberger, A. E., and Smith, assignors.)
H. L. G. Company. (See Humphrey, Herbert S., assignor.)
Haag, Leonhard, Frankfort-on-the-Main, Germany. Electric switch. 1,900,929; Mar. 14.
Haggstrom, Arthur C., Rockford, Ill., assignor to E. H. Scott. Radiocabinet. Des. 89,441; Mar. 14.
Haglund, Hakon H., Flushing, assignor to The Western Union Telegraph Company, New York, N. Y. Multiplex telegraph system. 1,901,296; Mar. 14.
Hale, Stephen H., Kansas City, assignor, by mesne assignments, to Gleaner Harvester Corporation, Independence, Mo. Cutter mechanism for corn harvesters. 1,901,099; Mar. 14.
Hall, Charles G., assignor to Automatic Food Machinery Corporation, Boise, Idaho. Combination tray heating and refrigerating cabinet. 1,901,509; Mar. 14.
Hall, Elbert J. (See Winslow, C. A., and Hall.)
Haller, Harvey H., assignor to The Wehr Motor Company, Los Angeles, Calif. Valve construction. 1,901,237; Mar. 14.
Halsted, Hobart J., and N. R. Briggs, Buffalo, N. Y. Coin controlled dispensing apparatus. 1,900,989; Mar. 14.
Halvorson, Halvor O. (See Cade, A. R., and Halvorson, assignors.)
Hamann, Henry J., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Edging apparatus. 1,901,510; Mar. 14.
Hammer, Samuel, Brooklyn, N. Y. Waste receptacle. 1,901,808; Mar. 14.
Hampton, Weldon O. (See Alsaker, A., Hampton, and Koerner.)
Handy, Le Roy L., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Coupler for glass supporting tables. 1,901,511; Mar. 14.
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. Signaling. 1,901,642; Mar. 14.
Hansen, Christian J., Essen-on-the-Ruhr, Germany, assignor, by mesne assignments, to The Koppers Company of Delaware, Pittsburgh, Pa. Treating thiocyanates. 1,901,844; Mar. 14.
Harcourt, Guy N., Larchmont, assignor, by mesne assignments, to Alco Products Incorporated, New York, N. Y. Recovering drip oil from certain residuums. 1,901,238; Mar. 14.
Harnsberger, Audley E., and C. L. Smith, Chicago, Ill., assignors to Gyro Process Company, Detroit, Mich. Heating oil. 1,901,592; Mar. 14.
Harnsberger, Audley E., and C. L. Smith, Chicago, Ill., assignors to Gyro Process Company, Detroit, Mich. Converting heavy hydrocarbons into lighter hydrocarbons. 1,901,593; Mar. 14.
Harrington, George G., assignor to Reed Roller Bit Company, Houston, Tex. Drill bit. 1,901,643; Mar. 14.
Harris, Ford W., assignor to Patco, Inc., Los Angeles, Calif. Reclosing circuit interrupter. 1,901,512; Mar. 14.
Harris, Ford W., assignor to Patco, Inc., Los Angeles, Calif. Rotary jar. 1,901,513; Mar. 14.
Harshberger, Norman P., Scarsdale, assignor to The Barrett Company, New York, N. Y. Shingle. 1,901,161; Mar. 14.
Harsin, Clarence W., Pasadena, Calif. Duplex picture hanger. 1,901,644; Mar. 14.
Haskell, Harry, et al. (See Phelps, Benjamin B., assignor.)
Hassell, Bert R. J., Rockford, Ill. Ice cream confection bar. 1,901,894; Mar. 14.
Hauk, Joseph, assignor to Hauk Manufacturing Company, Milwaukee, Wis. Can covering apparatus. 1,901,594; Mar. 14.
Hauk, Joseph, Shorewood, assignor to P. C. Read, Milwaukee, Wis. Can washing machine. 1,901,595; Mar. 14.
Hauk, Joseph, Shorewood, assignor to P. C. Read, Milwaukee, Wis. Bottle handling machine. 1,901,596; Mar. 14.
Hauk, Joseph, Shorewood, assignor to P. C. Read, Milwaukee, Wis. Clutch control mechanism. 1,901,597; Mar. 14.
Hauk Manufacturing Company. (See Hauk, Joseph, assignor.)
Hauser, Oscar, Ozone Park, assignor to Kollmorgen Optical Corporation, Brooklyn, N. Y. Portable magnifier. 1,900,930; Mar. 14.
Havill, Owen A., assignor to H. O. Schundler, New York, N. Y. Airship. 1,901,809; Mar. 14.
Hawkins, Francis, et al. (See Muller, Wilhelm, assignor.)
Hazard-Flamand, Maurice, Douai, France. Liquefying and rectifying air. 1,901,389; Mar. 14.
Heald Machine Company, The. (See Guild, Waldo J., assignor.)
Health-O-Meter Company, The. (See Weber, Mathias J., assignor.)
Heide, William A., Detroit, Mich. Air controlling means for carburetors. 1,901,810; Mar. 14.
Heilhecker, Eugene C. (See Smith, M. C., jr., and Heilhecker.)
Hein, George N., San Francisco, Calif. Enclosed body for automobiles. 1,901,239; Mar. 14.
Heine, Adolf, Berlin-Lichtenberg, and F. W. Dustmann, Berlin, Germany, assignors to General Electric Company. Film printing machine. 1,901,645; Mar. 14.
Heinits, Woldemar, assignor to Schubert & Salzer Maschinenfabrik Aktiengesellschaft, Chemnitz, Germany. Row counter for flat knitting machines. 1,901,745; Mar. 14.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co., New York, N. Y. Textile fabric or the like. Des. 89,442; Mar. 14.
Heise, William H., assignor to Big Rock Ranch Company, Los Angeles, Calif. Self-leveling platform of a tilted body. 1,901,029; Mar. 14.
Hellman, Carl R., assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,464; Mar. 14.
Helmond, William F., West Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,901,162; Mar. 14.
Hendrick, Otto E. (See Streeter, R. S., and Hendrick.)
Henke, Clyde O., South Milwaukee, Wis., and G. Etsel, Penns Grove, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparing camphene. 1,901,746; Mar. 14.
Henriksen, Alfred. (See Davis, L. L. Henriksen, and Allinson.)
Henriksen, Alfred, assignor to Continental Oil Company, Ponca City, Okla. Dewaxing oils. 1,901,240; Mar. 14.
Hentrich, Winfrid, Erlangen, A. Oessenbeck, Cologne-Mulheim, and E. Tietze, Cologne-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Diarylsulphone-azodyestuffs. 1,901,515; Mar. 14.
Hercules Powder Company. (See Borglin, Joseph N., assignor.)
Hercules Powder Company. (See Byrkit, Rollin J., jr., assignor.)
Hercules Powder Company. (See Langmeier, Arthur, assignor.)
Hercules Powder Company. (See Piccard, Jean, assignor.)
Herman, William, and W. H. Sommer, Peoria, Ill. Producing wire rods. 1,901,514; Mar. 14.
Herzog, John L., assignor to John L. Herzog Co., Saginaw, Mich. Machine for making panel core stock from mill clippings and the like. 1,901,596; Mar. 14.
Herzog, John L., Co. (See Herzog, John L., assignor.)

Heylandt, Christian W. P., Lankwitz, Germany, assignor to Filiga-Aktien-Gesellschaft, St. Moritz, Switzerland. Apparatus for transferring and storing liquefied gases. 1,901,445; Mar. 14.
Heylandt, Christian W. P., Lankwitz, Germany, assignor to Filiga-Aktien-Gesellschaft, St. Moritz, Switzerland. Conserving liquefied gases. 1,901,446; Mar. 14.
Heylandt, Christian W. P., Berlin-Britz, Germany, assignor to Filiga Aktiengesellschaft, St. Moritz, Switzerland. Apparatus for preparing pressure gases. 1,901,447; Mar. 14.
Hicks, Harry W., Brookline, Mass. Toothbrush. 1,901,646; Mar. 17.
Higby, Willard C. (See Higby, Willis O., and W. C.)
Higby, Willis O., West Leyden, and W. C. Higby, Ithaca, N. Y. Hydraulic clutch. 1,901,241; Mar. 14.
High, Carl F., Madison, Wis. Internal combustion engine. 1,901,448; Mar. 14.
Hildebrand, David A., assignor of one-half to John A. Rolph, Oakland, Calif. Built-in tables. 1,901,347; Mar. 14.
Hill, James. (See Baddiley, J., and Hill.)
Hill, Roger B. (See Richter, G. A., Van Arsdel, and Hill.)
Himmel Brothers Company, The. (See Himmel, Fred and I., assignors.)
Himmel, Fred and I., assignors to The Himmel Brothers Company, New Haven, Conn. Store front construction. 1,901,369; Mar. 14.
Himmel, Isidore. (See Himmel, Fred, and I.)
Hinrichs, Carl G., St. Louis, Mo. Treating emulsions. 1,901,163; Mar. 14.
Hipwell, Harry H. (See Hipwell, Harry T. and H. H.)
Hipwell, Harry T. and H. H., Pittsburgh, Pa. Flashlamp. 1,900,931; Mar. 14.
Hirvonen, Eric J., Worcester, Mass. Valve casing. Des. 89,443; Mar. 14.
Hochstatter, Charles, Ozone Park, N. Y. Measuring and dispensing device for containers. 1,901,811; Mar. 14.
Hocking, Richard O. (See Holt, G. J., Hocking, Matson, and Knickerbocker.)
Hoffman, Otto C., assignor of one-half to J. J. Dunn, Buffalo, N. Y. Registering bank. 1,901,030; Mar. 14.
Hoffrits, Charles W., Los Angeles, Calif. Illuminated pump dial. 1,901,100; Mar. 14.
Hogan, Edward L. (See Morse, C. T., and Hogan.)
Hoge, Joseph F. D., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Multicontact switch. 1,901,449; Mar. 14.
Hogg, William J., assignor to The National Acme Company, Cleveland, Ohio. Circular chaser grinding gauge. 1,901,242; Mar. 14.
Holden, Charles S. (See Kraus, H. W., Holden, and Uber.)
Hollestelle, Jan H., assignor to The Kennedye Corporation, St. Louis, Mo. Rotary well drilling bit control. 1,900,932; Mar. 14.
Holm, Carl, assignor to Economic Machinery Company, Worcester, Mass. Label picking mechanism. 1,901,101; Mar. 14.
Holt, Grover J., Crosby, E. O. Hocking, Nashwauk, A. E. Matson, Hibbing, and A. K. Knickerbocker, deceased, by F. D. Butler, special administrator, assignors to The Reclamation Company, St. Paul, Minn. Ore conditioning process. 1,901,102; Mar. 14.
Holt, William A., Mebane, N. C. Helical connecter. 1,901,747; Mar. 14.
Homer, John W., Greencastle, assignor to T. B. Wood's Sons Company, Chambersburg, Pa. Belt tightener. 1,901,557; Mar. 14.
Hookless Fastener Company. (See Norton, Samuel H., assignor.)
Hookless Fastener Company. (See Poux, Roland J., assignor.)
Hoover Company, The. (See Davidson, Walter C., assignor.)
Hopkins, Robert K., St. George, assignor to The M. W. Kellogg Company, New York, N. Y. Method and machine for rolling fins on tubes. 1,901,516; Mar. 14.
Horton, Joseph W., assignor to General Radio Company, Cambridge, Mass. Power-level indicator. 1,901,244; Mar. 14.
Horwitt, Paul H., Springfield, Mass., assignor to The Menasha Products Company, Chicago, Ill. Dispenser. 1,901,243; Mar. 14.
Howald, Werner T., E. H. Klingelfuss, and F. P. Kenny, Brooklyn, N. Y. Cleaning machine. 1,901,647; Mar. 14.
Howard, Frank E., assignor to James L. Howard & Company, Hartford, Conn. Door hanger. 1,901,648; Mar. 14.
Howard, James L., & Company. (See Howard, Frank E., assignor.)
Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Interlocking system for railroads. 1,901,748; Mar. 14.
Huber, Orlando E., Milwaukee, Wis. Valve. 1,901,649; Mar. 14.
Hudson, Edwin B., Butler, Pa., assignor to The American Rolling Mill Company, Middletown, Ohio. Automatic gauge for sheet metal shears. 1,900,985; Mar. 14.
Hudson, Thomas J., assignor to The Warner & Swasey Company, Cleveland, Ohio. Chuck. 1,900,984; Mar. 14.
Huey, Helen T., Stonehurst, Pa. Dishwashing tool and spray. 1,901,812; Mar. 14.
Huffman Manufacturing Company, The. (See Fulton, Paul D., assignor.)
Huffman Manufacturing Company, The. (See Vahle, Edgar W., assignee.)
Hughes, Richard L., and E. Baguley, Aldwych, London, England, assignors to International Standard Electric Corporation, New York, N. Y. Loading structure for a signaling conductor. 1,900,935; Mar. 14.
Hull, Foster J., Hagerstown, Md., assignor to Pangborn Corporation. Sand blast machine for applying pressure to abrasive. 1,901,450; Mar. 14.
Hull, John I., Swampscott, Mass., assignor to General Electric Company. Speed control. 7,901,650; Mar. 14.
Humason, Granville A., Houston, Tex. Pumping apparatus. 1,901,031; Mar. 14.
Humphrey, A. B., Company. (See Greene, Fred E., assignor.)
Humphrey, Herbert S., assignor to H. L. G. Company, Kalamazoo, Mich. Valve casing. Des. 89,465; Mar. 14.
Humphreys, Charles F., assignor to Armstrong Cork Company, Lancaster, Pa. Surface covering such as linoleum. 1,901,550; Mar. 14.
Humphreys, Hubert. (See Guinness, Edward E., assignor.)
Hund, August, West Orange, N. J., assignor to Wired Radio, Inc., New York, N. Y. Cascade amplifier. 1,901,558; Mar. 14.
Hurt, Frank B., La Grande, Oreg. Aggregate spreader and truck body. 1,901,297; Mar. 14.
Husted, H. A., Company, The. (See Husted, Harry A., assignor.)
Husted, Harry A., Cleveland, Ohio, assignor to The H. A. Husted Company, Detroit, Mich. Steering wheel. 1,901,599; Mar. 14.
Huttger, Edward P., assignor of one-half to A. J. Gibson, Philadelphia, Pa. Window fastener. 1,900,936; Mar. 14.
Hydraulic Press Manufacturing Company. (See Brast, Walter, assignor.)
Hyman, Henry. (See Abel, Frank J., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Guenther, Fritz, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Günther, Fritz, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Kramer, Oskar, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Luther, M., and Beller, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Meisenburg, Kurt, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schmidt, Otto, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schmidt, O., Schnell, and Meyer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Stuhlmann, Hans C., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Wurster, C., and Gruber, assignors.)
Imperial Chemical Industries Limited. (See Baddiley, J., and Hill, assignors.)
Indiana Glass Company. (See Clark, Jeddiah B., assignor.)
Industrial Patents Corporation. (See De Vout, A. W., and Regensburger, assignors.)
Industries of America, Inc. (See Robinson, Harry G., assignor.)
Ingersoll-Rand Company. (See Firth, Rowland V. D., assignor.)
International Nickel Company. (See Bieber, Clarence G., assignor.)
International Nickel Company, The. (See Owens, R. J., and Fraser, assignor.)
International Projector Corporation. (See Dia, Augusta, assignor.)
International Projector Corporation. (See Frappier, L. S., and Boecking.)
International Standard Electric Corporation. (See Deakin, G., and Schreiber, assignors.)
International Standard Electric Corporation. (See Hughes, R. L., and Baguley, assignors.)
International Standard Electric Corporation. See Sandeman, Edward K., assignor.)
International Standard Electric Corporation. (See Vesey, John R., assignor.)
International Standard Electric Corporation. (See Wright, Esmond P. G., assignor.)
Intertype Corporation. (See Turner, Ransom H., assignor.)
Inventia Patent-Verwertungs-Gesellschaft. (See Engberg, A. O., and Bilde, assignees.)
Jackson, Harry G., Jenkintown, Pa. Gauge. 1,901,451; Mar. 14.
Jackson, John G., assignor to Square D Company, Detroit, Mich. Fuse panel board. 1,901,164; Mar. 14.
Jackson, John G., assignor to Square D Company, Detroit, Mich. Reenforced block structure for electric fixtures. 1,901,165; Mar. 14.
Jacobson, Ludwig G., assignor to Dahlstrom Metallic Door Company, Jamestown, N. Y. Swing door inclosure interlock. 1,901,517; Mar. 14.
Jacobson, Parker A., Winona, Minn. Sausage linking machine. 1,901,452; Mar. 14.

Jacobus, David S., Jersey City, N. J., assignor, by mesne assignments, to Fuller Lehigh Company. Sectional furnace wall. 1,901,560; Mar. 14.
James, George S., Battle Creek, Mich., assignor, by mesne assignments, to James Neon Double Electrode Corporation, Chicago, Ill., Gas-tube, electrode, etc. 1,901,600; Mar. 14.
James Neon Double Electrode Corporation. (See James, George S., assignor.)
Jandus, Herbert S., and H. L. Brooke, assignors to General Spring Bumper Corporation, Detroit, Mich. Bumper with cushioned ends. 1,901,601; Mar. 14.
Jefferson Electric Company. (See Daley, James C., assignor.)
Jewell Electrical Instrument Company. (See Simpson, Ray, assignor.)
Jewell, Howard W., Los Angeles, Calif. Apparatus for automatically flushing sewers. 1,901,244; Mar. 14.
Johns-Manville Corporation. (See Berger, Edward H., assignor.)
Johnsen-Stephens & Shinkle Shoe Company. (See Mattler, Peter, assignor.)
Johnson, Albert, New York, N. Y. Valve controlling means for fluid distributing devices. 1,901,749; Mar. 14.
Johnson, Alvin L., Worcester, Mass. Direction signal. 1,901,395; Mar. 14.
Johnson, Ben P., assignor to E. E. Greiner, Springfield, Ohio. Seeding machine. 1,901,298; Mar. 14.
Johnson, Ben P., assignor to E. E. Greiner, Springfield, Ohio. Mulching wheel for seeding machines. 1,901,299; Mar. 14.
Johnson, Ben P., assignor to E. E. Greiner, Springfield, Ohio. Double run force feed grain distributor. 1,901,300; Mar. 14.
Johnson, Ben P., assignor to E. E. Greiner, Springfield, Ohio. Combined grain and fertilizer distributor. 1,901,301; Mar. 14.
Johnson, Bror A. E., Alsten, assignor to Aktiebolaget Gerh. Arehns Mekaniska Verkstad, Stockholm, Sweden. Machine for manufacturing boxes. 1,901,750; Mar. 14.
Johnson, Leonard W., Batavia, Ill. Cleaning device. 1,901,518; Mar. 14.
Johnson-Matthey & Company Limited. (See Powell, A. H., and Scott, assignors.)
Johnson, Sven A., Brooklyn, N. Y. Rotary plunger pump. 1,901,602; Mar. 14.
Johnson, Tomlinson F., Atlanta, Ga. Connecter. 1,901,990; Mar. 14.
Johnston, George W., and S. Muchnik, St. Joseph, Mo.; said Johnston assignor to said Muchnik. Sled brake. 1,901,302; Mar. 14.
Johnston, Mordica O., Glendale, assignor of one-third to G. M. Jones, and one-third to F. C. Van Deinse, Los Angeles, Calif. Oil well testing device. 1,901,813; Mar. 14.
Jones, Frank N., Chicago, Ill. Interchangeable holding member for projection machines. 1,901,245; Mar. 14.
Jones, Gilson M., et al. (See Johnston, Mordica O., assignor.)
Jones, Lester L., Oradell, N. J. Transformer. 1,901,368; Mar. 14.
Jones, Louis C., Greenwich, Conn., assignor to Chemical Engineering Corporation, New York, N. Y. Purifying the nitrogen-hydrogen mixture in the synthesis of ammonia. Re18,766; Mar. 14.
Jones, Thomas H., Woodthorpe, England. Knitting machine sinker. 1,901,751; Mar. 14.
Jordan, Hans. (See Scheeller, W., Jordan, and Clerc.)
Jordon, Newbury L., Princeton, N. J. Handle support. 1,901,166; Mar. 14.
Jorgensen, Jacob C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fastenings. 1,901,167; Mar. 14.
Judd, Irving H., Detroit, assignor to Whitehead & Kales Company, River Rouge, Mich. Transporting vehicles and the like. 1,901,103; Mar. 14.
Juengst, Fred W., and O. M. Anderson, assignors to Landers Frary & Clark, New Britain, Conn. Electric toaster. 1,901,603; Mar. 14.
Junkers, Hugo, Dessau, Germany. Fuel injection devices for internal combustion engines. 1,901,814; Mar. 14.
Justrite Manufacturing Company. (See Brown, Le Roy O., assignor.)
Kahlerth, Charles W., Newark, N. J. Hoisting engine. 1,900,937; Mar. 14.
Kahn, Leopold, Mannheim, assignor to P. P. Muelhens, doing business as Eau de Cologne- & Parfümerie-Fabrik "Glockengasse No. 4711" Gegenüber der Pferdepost von Ferd. Mülhens, Cologne-on-the-Rhine, Germany. Non-refillable container for powder. 1,901,651; Mar. 14.
Kalben, Max, San Diego, Calif. Sectional rod coupling. 1,901,168; Mar. 14.
Kallam, Floyd L., South Gate, Calif. Fluid flow control device. 1,901,032; Mar. 14.
Kallam, Floyd L., South Gate, Calif. Condenser control apparatus. 1,901,104; Mar. 14.
Kambara, Shinichiro, Yokohama, Japan. Automatic regulating and controlling gate. 1,901,396; Mar. 14.
Kapuczin, Dave, Los Angeles, Calif. Fluid dispenser or meter. 1,901,848; Mar. 14.
Karle, John D., Roselle Park, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing machine presser-foot. 1,901,752; Mar. 14.
Karolus, August, Leipzig, Germany, assignor to Radio Corporation of America. Recording and reproducing phonofilms. 1,901,033; Mar. 14.
Karolus, August, Leipzig, Germany, assignor to Radio Corporation of America. Recording and reproducing phonofilms. 1,901,034; Mar. 14.
Karrick, Lewis C., Salt Lake City, Utah. Distillation of solid carbonaceous material. 1,901,169; Mar. 14.
Karrick, Lewis C., Salt Lake City, Utah. Gasification of carbonaceous material. 1,901,170; Mar. 14.
Kauffman, Thomas J., Grosse Pointe Village, assignor to Square D Company, Detroit, Mich. Steering wheel attachment. 1,901,171; Mar. 14.
Kaufmann, Phillip H., Cleveland Heights, Ohio. Book, pad, and tablet, and line ruler therefor. 1,901,246; Mar. 14.
Kean, Robert H., assignor to General Zeolite Co., Chicago, Ill. Liquid purification. 1,901,652; Mar. 14.
Keil, Francis, & Son, Inc. (See Keil, Henry F., assignor.)
Keil, Henry F., Scarsdale, N. Y., assignor to Francis Keil & Son, Inc. Attachment for doors. 1,901,803; Mar. 14.
Keith, David F., Cleveland Heights, assignor to Perfection Stove Company, Cleveland, Ohio. Thermal shield for the freezing space of refrigeration apparatus. 1,901,845; Mar. 14.
Keith, Henry M., Harrisburg, Ill. Vacuum cleaner. 1,901,519; Mar. 14.
Keith, Henry M., Harrisburg, Ill. Oil and liquor dispensing device. 1,901,815; Mar. 14.
Kellett Autogiro Corporation. (See Du Pont, Mark S., assignor.)
Kelley, George L., and E. G. Budd, assignors to Budd Wheel Company, Philadelphia, Pa. Making cold rolled disks. 1,901,035; Mar. 14.
Kellogg, M. W., Company, The. (See Hopkins, Robert K., assignor.)
Kelly, Laurence C., Beverly Hills, Calif. Whipstock. 1,901,453; Mar. 14.
Kelly, Laurence C., Beverly Hills, Calif. Cementing whipstocks in well bores. 1,901,454; Mar. 14.
Kelly, William J., et al. (See Phelps, Benjamin B., assignor.)
Kelsey-Hayes Wheel Corporation. (See Booth, William N., assignor.)
Kelsey-Hayes Wheel Corporation. (See Sinclair, Charles W., assignor.)
Kempton, Leslie A., Bridgeport, Conn., assignor to General Electric Company. Electric switch. 1,901,653; Mar. 14.
Kendall Company, The. (See Gabosch, John, assignor.)
Kennedy, Chester C. (See Strosacker, C. J., Kennedy, and Pelton.)
Kennedy, Ridgway R., assignor to Abbotts Dairies, Inc., Philadelphia, Pa. Apparatus for washing fruits. 1,901,455; Mar. 14.
Kennedye Corporation, The. (See Hollestelle, Jan H., assignor.)
Kenny, Frederick P. (See Howald, W. T., Klingelfuss, and Kenny.)
Kerr, Samuel L., Philadelphia, Pa., assignor to I. P. Morris & De La Vergne, Incorporated. Governor. 1,901,831; Mar. 14.
Kerr, Thomas, Schenectady, N. Y., assignor to General Electric Company. Cutting tool and making it. 1,901,654; Mar. 14.
Kerruish, Edward P., assignor to The Cleveland Graphite Bronze Company, Cleveland, Ohio. Making lined bearings. 1,900,938; Mar. 14.
Kex Company. (See Fisher, Albert H., assignor.)
Keys, John H., Dayton, Ohio. Lawn sprinkler. 1,901,655; Mar. 14.
Kiesling, Le Roy H., Brooklyn, N. Y. Elevator track mounting. 1,901,520; Mar. 14.
Kilborn-Sauer Company, The. (See Sauer, Henry J., assignor.)
King, Lyman M., jr. (Stine, Walter H., assignor.)
King, Patrick F., assignor to The Stanley Works, New Britain, Conn. Sliding door arrangement. 1,901,304; Mar. 14.
Kingsbury, Harry T., Keene, N. H. Combined fender and tail-light socket for toy automobiles. Des. 89,444; Mar. 14.
Kingston Products Corporation. (See Beal, Fay, assignor.)
Kingston Products Corporation. (See Ulrich, Carl J., assignor.)
Kinkead, William S., Chicago, Ill. Carton. 1,901,036; Mar. 14.
Kinney, Harmon C., Ambler, Pa., assignor, by mesne assignments, to Ambler Asbestos Shingle & Sheathing Company. Apparatus for shaping molding. 1,900,939; Mar. 14.
Kinsman, Gordon, Jersey City, N. J., assignor to Caloroil Burner Corporation. Oil burner. 1,901,456; Mar. 14.
Kinzbach, Frank, Houston, Tex. Pipe cleaning machine. 1,901,247; Mar. 14.
Kirk, Henry C., Baltimore, Md.; Colonial Trust Company executors of said H. C. Kirk, deceased. Oil treatment process and apparatus therefor. 1,901,172; Mar. 14.
Kirschbraun, Lester, Leonia, N. J., assignor, by mesne assignments, to The Patent Licensing Corporation, Boston, Mass. Roofing and making same. 1,900,940; Mar. 14.
Klaiber, Erich, assignor to Robert Bosch Aktiengesellschaft Stuttgart, Germany. Ignition device for aircraft engines. 1,901,846; Mar. 14.

Klingelfuss, Eugene H. (See Howald, W. T., Klingelfuss, and Kenny.)
Knickerbocker, Arthur K. (See Holt, G. J., Hocking, Matson, and Knickerbocker.)
Knowles, Albert, San Francisco, Calif. Concrete mixer blade. 1,901,305; Mar. 14.
Knowlton, George H., Westbrook, Me. Vulcanizing or drying apparatus. 1,901,306; Mar. 14.
Koberling, Joseph, San Francisco, Calif. Fireplace damper construction. 1,901,753; Mar. 14.
Koeberle, Karl. (See Kuns, M. A., and Koeberle.)
Koerner, Charles A. (See Alsaker, A., Hampton, and Koerner.)
Kolb, Louis J. (See Worrall, Arthur G., assignor.)
Kolbede, Karl H., San Andreas, Calif. Electrical valve control for packing machines. 1,901,521; Mar. 14.
Kollmorgen Optical Corporation. (See Hauser, Oscar, assignor.)
Koppers Company, The. (See Hansen, Christian J., assignor.)
Kovats, John, Fairfield, assignor to The Leg-O-Matic Company, Bridgeport, Conn. Folding table. 1,901,105; Mar. 14.
Kovats, John, assignor to The Leg-O-Matic Company, Bridgeport, Conn. Folding table. 1,901,106; Mar. 14.
Kovats, John, assignor to The Leg-O-Matic Company, Bridgeport, Conn. Folding table. 1,901,107; Mar. 14.
Kraenslein, Georg, H., Vollmann and M. Correll, Frankfort-on-the-Main-Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Halogenated vat dyestuffs of the 3.4.8.9-and 4.5.8.9-dibenzpyrenequinone series and preparing them. 1,901,307; Mar. 14
Kramer, Oskar, Oppau, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Stable suspensions. 1,901,656; Mar. 14.
Krans, Harry W., C. S. Holden, and H. R. Uber, Lakewood, assignors to The Cleveland Welding Company, Cleveland, Ohio. Apparatus for making wire wheels. 1,901,457; Mar. 14.
Kuhlman, Edward H., Dayton, Ohio. Welding electrodes. 1,900,941; Mar. 14.
Kuhn, Clarence W., North Milwaukee, assignor, by mesne assignments, to Cutler-Hammer, Inc., Milwaukee, Wis. Driving mechanism for valves and other devices. 1,901,397; Mar. 14.
Kuhn, Herman L., Union, assignor of fifty per cent to W. H. Coffey, Ludlow, Miss. Dirigible-airplane. 1,901,173; Mar. 14.
Kuhner, Max H., assignor to Badenhausen Corporation, Cornwells Heights, Pa. Dust separating and collecting device. 1,901,370; Mar. 14.
Kuns, Max A., Mannheim, and K. Koeberle, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the isodibenzanthrone series and making them. 1,901,308; Mar. 14.
Kusterle, Frank, Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Hospital table. 1,901,174; Mar. 14.
LaBrie, Ludger E., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,901,657; Mar. 14.
Lack, Arnold, Beloit, Wis., assignor to H. H. Shockey, Chicago, Ill. Crank shaft. 1,901,175; Mar. 14.
Ladrette, Jean, Peage de Roussillon, France, assignor to Du Pont Rayon Company, New York, N. Y. Treating spinnerets. 1,901,658; Mar. 14.
Lamson, Horatio W., Arlington, assignor to General Radio Company, Cambridge, Mass. Sound ranging system. 1,901,342; Mar. 14.
Landaw, Osk, assignor to Mutschler Bros. Co., Nappanee, Ind. Table. 1,901,108; Mar. 14.
Landers Frary & Clark. (See Juengst, F. W., and Anderson, assignors.)
Landsiedel, Harry, Norwood, Ohio, assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Calculating machine. 1,901,372; Mar. 14.
Lange, Edward H., Baltimore, Md. Automobile clutch control system. 1,901,371; Mar. 14.
Langmeier, Arthur, Dover, N. J., assignor to Hercules Powder Company, Wilmington, Del. Dehydrating nitrocellulose and the product thereof. 1,901,561; Mar. 14.
Lapp Insulator Company. (See Lapp, John S., assignor.)
Lapp, John S., Leroy, N. Y., assignor to Lapp Insulator Company, Inc. 270° clamp. 1,901,849; Mar. 14.
Larack, Frank A., New York, N. Y. Instep protector. 1,901,659; Mar. 14.
Larrowe-Suzuki Company. (See Masuda, Reisuke, assignor.)
Larsen, Edith A., Chicago, Ill. Device for eliminating facial wrinkles. 1,901,248; Mar. 14.
Lawson, Gottfrid C., assignor to The United Metal Products Company, Canton, Ohio. Welding. 1,901,176; Mar. 14.
Leake, Richard C., assignor to General Railway Signal Company, Rochester, N. Y. Train control system. 1,901,754; Mar. 14.
Lee-O-Matic Company, The. (See Kovats, John, assignor.)
Leibe, Frank A. (See Carpe, A., and Leibe.)
Lely, Dirk, Eindhoven, Netherlands, assignor to Radio Corporation of America. Electric discharge device. 1,901,037; Mar. 14.
Lemmon, Rees H. (see Yerkes, J. A., and Lemmon.)
Le Moon, Axel R., Chicago, Ill. Four-wheel vehicle drive construction. 1,901,309; Mar. 14.
Leaning, Alvar, Jackson Heights, assignor to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 1,901,458; Mar. 14.
Lents, Lawrence E., Harrisburg, Pa., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,901,398; Mar. 14.
Le Sueur, Claude D., Richmond, England. Means for use in navigating and like operations. 1,901,755; Mar. 14.
Levy, Maurice L., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Radio-signaling system. 1,901,350; Mar. 14.
Levy, Oscar C., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Multi-office telephone system. 1,901,177; Mar. 14.
Lewis, Arthur J., Stratford, Conn., assignor to A. Schrader's Son, Inc., New York, N. Y. Machine for making and assembling a valve pin and valve gasket support. 1,901,459; Mar. 14.
Lewis, Robert B., assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa. Drop testing machine. 1,901,460; Mar. 14.
Lewis, William J., Clarksdale, Miss. Stalk-cutting machine. 1,901,310; Mar. 14.
Libbey-Owens-Ford Glass Company. (See Beesor, Theodore, assignor.)
Libbey-Owens-Ford Glass Company. (See Louviaux, Raoul J., assignor.)
Libbey-Owens-Ford Glass Company. (See Hamann, Henry J., assignor.)
Libbey-Owens-Ford Glass Company. (See Handy, Le Roy L., assignor.)
Libby, McNeill & Libby. (See Robbins, Frank, assignor.)
Liebel, John G. H., Cincinnati, Ohio, assignor, by mesne assignments, to The Union Switch & Signal Company. Alternating current rectifying element. 1,901,756; Mar. 14.
Lieberknecht, Karl R., assignor to Karl Lieberknecht G. m. b. H., Oberlungwitz, Germany. Making full fashioned stockings. 1,901,757; Mar. 14.
Lieberknecht, Karl, G. m. b. H. (See Lieberknecht, Karl R., assignor.)
Linaker, Frederick W., Brooklyn, N. Y. Boiler cleaner. 1,901,804; Mar. 14.
Lincoln, Bert H., assignor to Continental Oil Company, Ponca City, Okla. Method and apparatus for converting hydrogen sulphide into sulphur. 1,901,249; Mar. 14.
Lincoln Electric Company, The. (See Osborne, Samuel C., assignor.)
Linde Air Products Company, The. (See Davis, W. T., and Rhein, assignors.)
Lindgren, Hans O., Appelviken, assignor to Aktiebolaget Separator, Stockholm, Sweden. Centrifugal separator machine. 1,901,461; Mar. 14.
Linsell, Harry K., LaGrange, assignor to United States Gypsum Company, Chicago, Ill. Mastic flooring, composition, and preparing. 1,901,053; Mar. 14.
Lionne, Ernest, Swampscott, Mass. Urea-formaldehyde condensation product and process. 1,901,373; Mar. 14.
Liptak, Michael, St. Paul, Minn. Mud-drum seal. 1,901,462; Mar. 14.
Lloyd, Fred, Wilkes-Barre, Pa. Antiskid device. 1,901,311; Mar. 14.
Lockwood Manufacturing Company, The. (See Chandonia, Elmer H., assignor.)
Loewe, Siegmund, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company. Multiple booster or multiple vibration generator. 1,901,605; Mar. 14.
Lonza Elektrizitatswerke und Chemische Fabriken Aktiengesellschaft. (See Luscher, Emil, assignor.)
Louviaux, Raoul J., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Apparatus for handling glass sheets. 1,901,463; Mar. 14.
Lubrication Corporation, The. (See Creveling, John L., assignor.)
Lucas, Georges D. (See Salone, J. C. G., and Lucas.)
Lucas, William J., Oklahoma City, Okla. Piston construction. 1,901,312; Mar. 14.
Lukachovic, Joseph C. (See Bushnell, J. E., and Lukachovic.)
Lund, Rudolph O., assignor to Croker Fire Prevention Corp., New York, N. Y. Hose reel. 1,901,660; Mar. 14.
Lunkenheimer Company, The. (See Aull, Jerome J., assignor.)
Lüscher, Emil, assignor to the Firm Lonza Elektrizitätswerke und Chemische Fabriken Aktiengesellschaft, Basel, Switzerland. Absorption of oxides of nitrogen. 1,901,816; Mar. 14.
Lute, Carl, Hammond, Ind., assignor to Camel Company, Chicago, Ill. Door elevating arrangement. 1,901,758; Mar. 14.
Luther, Martin, Mannheim, and H. Beller, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of masses resembling linoxyn. 1,901,374; Mar. 14.
Lyman, Charles E., jr., assignor to The Lyman Gun Sight Corporation, Middlefield, Conn. Sight. 1,901,859; Mar. 14.
Lyman Gun Sight Corporation, The. (See Lyman, Charles E., jr., assignor.)

Lyon, George A., assignor to Lyon Incorporated, Asbury Park, N. J. Combination spare tire cover side member and spare wheel hub closure for a tire cover or similar article. Des. 89,466; Mar. 14.
Lyon Incorporated. (See Lyon, George A., assignor.)
Macallen Company, The. (See McCarthy, Louis, assignor.)
Macallen Company, The. (See Tracy, Elwyn B., assignor.)
MacCourt, Winthrop D., T. F. Walsh, and F. H. Rasmussen, assignors to Magill-Weinsheimer Company, Chicago, Ill. Reflective display device. 1,901,661; Mar. 14.
Macfarlane, James C. (See Austin, G., Macfarlane, J. C. and W. A.)
Macfarlane, William A. (See Austin, G., Macfarlane, J. C. and W. A.)
Macwhyte Company. (See Drew, James F., assignor.)
Magill-Weinsheimer Company. (See MacCourt, W. D., Walsh, and Rasmussen, assignors.)
Magnavox Company, The. (See Pridham, Edwin S., assignor.)
Magnesium Development Corporation. (See Moschel, Wilhelm, assignor.)
Magnetic Signal Co. (See Newton, Burkett D., assignor.)
Mahoney, John P., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,901,662; Mar. 14.
Maier, Werner, Baden-Baden, Germany, assignor to American Lurgi Corporation, New York, N. Y. Production of starch. 1,901,109; Mar. 14.
Main, Norman S., Linlithgow, Scotland. Golf club. 1,901,562; Mar. 14.
Mallinson, H. R., & Co. (See Heinke, Alfred J., assignor.)
Malm, John F., assignor of one-half to F. A. Adkins, Chicago, Ill. Liquid dispensing meter. 1,901,178; Mar. 14.
Mammes, Raymond J., Los Angeles, assignor to Metro-Goldwyn-Mayer Corporation, Culver City, Calif. Reversible mat. 1,901,110; Mar. 14.
Mann, Leo, assignor to H. D. Peck, Providence, R. I. Heat-producing compound. 1,901,313; Mar. 14.
Maranville, Alger G., assignor to The General Tire & Rubber Company, Akron, Ohio. Airplane landing wheel. 1,901,759; Mar. 14.
March Construction Co. (See Wirt, Harry M., assignor.)
Marrison, Warren A., Maplewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Harmonic analyser. 1,901,400; Mar. 14.
Marsh, Charles W., Muskegon, Mich. Oil seal. 1,901,606; Mar. 14.
Marshall, David S., San Diego, Calif. Electric heater. 1,901,038; Mar. 14.
Marshall Field Mills Corporation. (See Clark, Eugene F., assignor.)
Martin, Elmer G., East Lampeter Township, Pa. Educational chart. Des. 89,467; Mar. 14.
Martin, George F., jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Copper oxide rectifier. 1,901,563; Mar. 14.
Marx, Frank A., assignor, by mesne assignments, to The Richardson Taylor-Globe Corporation, Cincinnati, Ohio. Dummy display box. 1,901,351; Mar. 14.
Maschinenfabrik Johannisberg G. m. b. H. (See Gietz, Peter, assignor.)
Masuda, Reisuke, Toledo, Ohio, assignor to Larrowe-Suzuki Company, Detroit, Mich. Antifreezing solution. 1,901,111; Mar. 14.
Matheson, Axel C., Minneapolis, Minn. Piston. 1,900,991; Mar. 14.
Mathias, Maximilian, Berlin, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt near Berlin, Germany. Automatic telephone system. 1,901,179; Mar. 14.
Matson, Amel E. (See Holt, G. J., Hocking, Matson, and Knickerbocker.)
Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor support. 1,901,401; Mar. 14.
Matthews, George A., Detroit, Mich., assignor to Westinghouse Electric & Manufacturing Company, Pittsburgh, Pa. Outdoor switch contact. 1,901,607; Mar. 14.
Matthews, W. N., Corporation. (See Birkenmaier, Theodore, assignor.)
Mattler, Peter, assignor to Johnson-Stephens & Shinkle Shoe Company, St. Louis, Mo. Method and apparatus for weaving. 1,901,250; Mar. 14.
Maurer, Rufus H., Brookline, assignor to Spencer Thermostat Company, Cambridge, Mass. Ignition system for gas burners. 1,901,251; Mar. 14.
Maxmoor Corporation. (See Moore, Arlington, assignor.)
McArdle, Michael W., Chicago, Ill. Griddle. 1,901,314; Mar. 14.
McArthur, Elmer D., Scheuectady, N. Y., assignor to General Electric Company. Signal transmitting means. 1,901,112; Mar. 14.
McBride, Octave O., McKinney, Tex. Electric head lamp. 1,901,180; Mar. 14.
McCabe, Ira E., Chicago, Ill. Motor operated mechanism. 1,901,402; Mar. 14.
McCabe, Joseph J., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Toric lens generating machine. 1,901,181; Mar. 14.
McCandless, Byron, U. S. Navy. Portable display screen. 1,901,182; Mar. 14.
McCann, Thomas A., East Orange, N. J., assignor to American Telephone and Telegraph Company. Impulse transmission system. 1,900,993; Mar. 14.
McCarthy, Louis, assignor to The Macallen Company, Boston, Mass. Machine for making composite sheets. 1,901,352; Mar. 14.
McCarty, Harvey V., Canton, Ohio. Carburetor. 1,901,564; Mar. 14.
McCarty, Roy A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fabricated frame. 1,901,315; Mar. 14.
McClintock, William H., Bellevue, Pa., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Clamping device. 1,901,760; Mar. 14.
McCorquodale, Wilmer E., assignor to Mrs. Gladys McCorquodale Ready, Orange, and Dr. W. H. Bennett, Humble, Tex. Hot water heater attachment. 1,901,761; Mar. 14.
McCrosky Tool Corporation. (See Skeel, L., and Miller, assignors.)
McCutcheon, Kenneth C., Ashland, Ky., assignor to The American Rolling Mill Company, Middletown, Ohio. Open hearth furnace construction. 1,900,942; Mar. 14.
McKahin, Herbert B., assignor to Deere & Company, Moline, Ill. Transport truck for disk harrows. 1,901,183; Mar. 14.
McKey Company, The. (See Wells, Merritt R., assignor.)
Mead-Morrison Manufacturing Company. (See Snow, Frederick O., jr., assignor.)
Mead, Richard R., Queens Village, N. Y., assignor to Mergenthaler Linotype Company. Slug casting machine. 1,901,118; Mar. 14.
Mecano Gesellschaft mit beschrankter Haftung, et al. (See Goldschmidt, Max, assignor.)
Meerwein, Hans, Marburg-on-the-Lahn, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Preparing trybromoethylalcohol. 1,901,316; Mar. 14.
Meginniss, Francis R., Albany, N. Y. Switch. 1,901,252; Mar. 14.
Meginniss, Francis R., Albany, N. Y. Clamp and support for flash-lights. 1,901,253; Mar. 14.
Meier, Charles, and T. A. Wettig, assignors to The Acme Machine Tool Company, Cincinnati, Ohio. Machine tool construction. 1,901,522; Mar. 14.
Meiselbach, August D., Chicago, Ill. Ventilator. 1,901,114; Mar. 14.
Meisenburg, Kurt, Leverkusen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Mixed rubber-like masses and preparing the same. 1,901,354; Mar. 14.
Menasha Products Company, The. (See Horwitt, Paul H., assignor.)
Mercier, Daniel, Annonay, France. Hide and leather dressing machine. 1,901,317; Mar. 14.
Mergenthaler Linotype Company. (See Mead, Richard R., assignor.)
Messer, Adolf, Frankfort-on-the-Main, Germany. Cutting mechanism. 1,901,254; Mar. 14.
Metro-Goldwyn-Mayer Corporation. (See Mammes, Raymond J., assignor.)
Meyer, Egon. (See Schmidt, O., Schnell, and Meyer.)
Meyer, Frank H., Warren, assignor to The American Welding & Manufacturing Co., Trumbull, Ohio. Bending apparatus. 1,901,762; Mar. 14.
Michaels, Frank L., Fort Thomas, Ky. Grave marker. Des. 89,445; Mar. 14.
Michaels, Frank L., Fort Thomas, Ky. Grave marker. Des. 89,446; Mar. 14.
Michelin et Cie. (See Bourdon, Pierre M., assignor.)
Middlemiss, Austin O., Portland, Oreg. Cream skimmer. 1,900,993; Mar. 14.
Miller, Edward M. (See Nirdlinger, Patrick A. and C. D., and Miller.)
Miller, Edward W., assignor to The Fellows Gear Shaper Company, Springfield, Vt. Truing means for formed gear grinding wheels. 1,900,943; Mar. 14.
Miller, Frank P. (See Skeel, L., and Miller.)
Millet, Eugène J. N., Paris, France. Automatically loading machine for distributing sand, gravel, and the like. 1,901,523; Mar. 14.
Mills, Winifred H. (See Dunn, L. M., and Mills.)
Milmoe, Michael J., assignor to F. B. Redington Co., Chicago, Ill. Starter mechanism for feeding blanks or the like. 1,901,832; Mar. 14.
Milnor, Joseph W., Maplewood, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Balancing cables equipped with a long sea-earth. 1,901,318; Mar. 14.
Minkler, William A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control system. 1,901,668; Mar. 14.
Mitchell, John K., Philadelphia, Pa., assignor to Dispersions Process, Inc., Dover, Ill. Recovery of fibrous material and rubber from waste rubber stock. 1,900,944; Mar. 14.
Mitchie, Jean G., assignor to Stephenson Laboratories Trust, Boston, Mass. Arch support. 1,901,353; Mar. 14.
Mohawk Brush Company. (See Aufsesser, Gates B., assignor.)
Moloney, William, Hamilton Beach, N. Y. Foot rest device. 1,901,184; Mar. 14.

Montgomery Company, The. (See Firtion, Harold L., assignor.)
Montgomery, H. B. (See Tatro, Lysle G., assignor.)
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Intake manifold. 1,901,763; Mar. 14.
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Supplying and mixing charges for internal combustion engines. 1,901,847; Mar. 14.
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Charge forming apparatus for internal combustion engines. 1,901,848; Mar. 14.
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Fueling internal combustion engines. 1,901,849; Mar. 14.
Moore, Clarence W., Roslyn, Pa., assignor to Ritter Dental Manufacturing Company, Rochester, N. Y. Fountain cuspidor. 1,901,319; Mar. 14.
Moran, Daniel J., assignor to Continental Oil Company, Ponca City, Okla. Gate valve. 1,901,255; Mar. 14.
Morgan & Wright. (See Eger, Ernst, assignor.)
Morgan, John R., Birmingham, and W. Schnell, Detroit, Mich., assignors to Ternstedt Manufacturing Company, Detroit, Mich. Automobile radiator ornament or similar article. Des. 89,447; Mar. 14.
Morits, John A., Crawfordsville, Ind. Insulating zinc spelter baths and for effecting their practice. 1,901,464; Mar. 14.
Morris, I. P. & De La Vergne, Incorporated. (See Kerr, Samuel L., assignor.)
Morris Paper Mills. (See Powell, H. K., and Ballenberg, assignors.)
Morrison Machine Products, Inc. (See Evans, Leigh R., assignor.)
Morse, Clark T., and E. L. Hogan, assignors to American Blower Corp., Detroit, Mich. Cooling coil, storage tank, and cooling the water in the tank. 1,901,664; Mar. 14.
Mortenson, Gustav M., Warren, Pa. Electric switch. 1,901,320; Mar. 14.
Mosca, John, Brooklyn, N. Y. Hat brim trimming tool. 1,901,764; Mar. 14.
Moschel, Wilhelm, Bitterfeld, Germany, assignor, by mesne assignments, to Magnesium Development Corporation. Chlorinating apparatus. 1,901,524; Mar. 14.
Moschel, Wilhelm, Bitterfeld, Germany, assignor, by mesne assignments, to Magnesium Development Corporation. Apparatus for performing reactions between molten substances and gases. 1,901,525; Mar. 14.
Muchnik, Samuel. (See Johnston, G. W., and Muchnik.)
Muelhens, Paul P. (See Kahn, Leopold, assignor.)
Muhlfeld, John E., Scarsdale, N. Y. Steam boiler structure. 1,901,465; Mar. 14.
Müller, Johannes, assignor to "Sachtleben" Aktiengesellschaft für Bergbau und Chemische Industrie, Mombergon-the-Lower-Rhine, Germany. Purifying of natural heavy spar. 1,900,994; Mar. 14.
Muller, Wilhelm, Enfield, near Sydney, New South Wales, assignor of one-third to Automatic Bread Baking Company Limited and one-third to Francis Hawkins, Sydney, Australia. Preparation of bread and the like for wrapping. 1,901,115; Mar. 14.
Munday, Richard B., Dayton, assignor, by mesne assignments, to The Cincinnati Ball Crank Co., Cincinnati, Ohio. Non-decanting liquid measure. 1,901,256; Mar. 14.
Münz, Ferdinand, Frankfort-on-the-Main-Fechenheim, Germany, assignor to General Aniline Works Inc., New York, N. Y. Rendering harmless the precipitates formed by hard water. 1,901,321; Mar. 14.
Murphy, Paul B., Nyack, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,901,403; Mar. 14.
Murray Corporation of America, The. (See Northrup, Amos E., assignor.)
Mutscheller, Arthur, New York, N. Y., assignor to Wappler Electric Company, Inc. Synchronously operated timing device. 1,901,526; Mar. 14.
Mutschler Bros. Co. (See Landaw, Oak, assignor.)
Myers, Edmund T. D. jr., Richmond, Va. Road marker. 1,900,945; Mar. 14.
National Acme Company, The. (See Hogg, William J., assignor.)
National Acme Company, The. (See Trobeck, Olof E., assignor.)
National Aniline & Chemical Co. (See Tumim, Herbert R., assignor.)
National Aniline & Chemical Company. (See Wood, Robert O., assignor.)
National Bank and Trust Company (administrator). (See Bachman, Henry F., assignor.)
National Bank of Hungary. (See Von Heinrich, Friedrich, assignor.)
National Cash Register Company. (See Dunker, John G., assignor.)
National Cash Register Company, The. (See Fuller, Frederick L., assignor.)
National Cash Register Company, The. (See Green, Charles W., assignor.)
National Cash Register Company. (See Shipley, Bernis M., assignor.)
National Machinery Company, The. (See Clouse, William L., assignor.)
National Pneumatic Company. (See Forman, Paris R., assignor.)
National Tile Company, The. (See Bower, James A., assignor.)
Naugatuck Chemical Company, The. (See Coleman, Clyde, assignor.)
Naumann, William. (See Alimena, S., and Naumann.)
Nas-Dar Company. (See Rempen, William R., assignor.)
Needham, John T., North Plainfield, N. J., assignor, by mesne assignments, to Pneumatic Tube Supply Co. of Delaware. Pneumatic dispatch tube apparatus. 1,900,946; Mar. 14.
Neelmeier, Wilhelm, E. Eimele, and B. Glietenberg, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Monoacylated 2,5-diaminohydroquinoneethers. 1,901,322; Mar. 14.
Neidl, Georg, Berlin, Germany. Compressor. 1,901,817; Mar. 14.
Nelson, Paul R., Fort Totten, N. Y., assignor to the Secretary of War, in behalf of the United States. Submarine mine control. 1,901,185; Mar. 14.
Nenninger, Lester F. (See Einstein, S., and Nenninger.)
Newall, William F., Wimsford, England. Coin exchanging mechanism. 1,901,323; Mar. 14.
Newberry, Sidney H., Philadelphia, Pa. Drum head tightener. 1,901,765; Mar. 14.
New Britain Machine Company, The. (See Costello, William F., assignor.)
New England Pressed Steel Company. (See Somersall, William W., assignor.)
Newhouse, Ray C. (See Becker, G. D., and Newhouse.)
Newhouse, Ray C., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Packing. 1,901,766; Mar. 14.
Newton, Burkett D., Los Angeles, Calif., assignor to Magnetic Signal Co. Out-of-order signal. 1,901,404; Mar. 14.
Newton, Frank E., Hartford, Conn. Machine for shaving and slotting screws. 1,901,405; Mar. 14.
Nichols, Harold W. (See Butterfield, Charles, assignor.)
Nichols, Marion F., assignor of one-half to Campbell Wallace, Knoxville, Tenn. Treating liquids. 1,900,995; Mar. 14.
Nicolson, Alexander McL., assignor to Communication Patents, Inc., New York, N. Y. Color television. 1,901,116; Mar. 14.
Nirdlinger, Clarence D. (See Nirdlinger, Patrick A. and C. D., and Miller.)
Nirdlinger, Patrick A. and C. D., and E. M. Miller, Chicago, Ill., assignors, by mesne assignments, to Operay Laboratories, Inc., Madison, Wis. Universal joint and supporting structure for illuminating devices. 1,901,527; Mar. 14.
Noltin, Fred, Berwyn, assignor to The Oscar C. Rixson Co., Chicago, Ill. Self aligning interfitting spindle and socket element. 1,901,855; Mar. 14.
Norma-Hoffmann Bearings Corporation. (See Bott, George R., assignor.)
Norris, Eric D. T., Hollinwood, England, assignor to Ferranti Inc., New York, N. Y. Lightning or surge absorber. 1,901,767; Mar. 14.
Norris, Eric D. T., Hollinwood, England, assignor to Ferranti Inc., New York, N. Y. Regulation of the voltage of an alternating current circuit. 1,901,768; Mar. 14.
Northrup, Amos E., Pleasant Ridge, assignor to The Murray Corporation of America, Detroit, Mich. Automobile body. Des. 89,448; Mar. 14.
Norton, Samuel H., Meadville, Pa., assignor to Hookless Fastener Company. Lock slider. 1,901,257; Mar. 14.
Norworth, Jack, New York, N. Y. Apparatus for testing photopaper. 1,901,180; Mar. 14.
Nottage, Stanley G., Murrysville, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control system. 1,901,608; Mar. 14.
Novotny, Emil E., Philadelphia, assignor to J. S. Stokes, Huntingdon Valley, Pa. Abrasive body and making the same. 1,901,824; Mar. 14.
Novotny, Emil E., Philadelphia, assignor to J. S. Stokes, Huntingdon Valley, Pa. Abrasive body and making the same. 1,901,825; Mar. 14.
Nye, Henry V., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Circuit breaker control system. 1,901,406; Mar. 14.
Nye, Roland W. (See Carlisle, E. W., and Nye.)
Oakes Products Corporation. (See Smith, Frederick A assignor.)
Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)
Oil Country Specialties Mfg. Co. (See Stanley, Fred D., assignor.)
Oilgear Company, The. (See Ferris, Walter, assignor.)
Okerberg, Luther C., Elk City, Okla. Printing pipes roller. 1,901,818; Mar. 14.
Olsen, Henry, Minneapolis, Minn. Bottle receiving and coin dispensing device. 1,901,528; Mar. 14.
Olsen, Henry, Minneapolis, Minn. Coin handling machine. 1,901,529; Mar. 14.
Olson, Charles A., Geneva, assignor to Crane Co., Chicago, Ill. Sectional boiler. 1,900,947; Mar. 14.
Olsson, Johan G., Lidingon, and F. I. E. Stenfors, Alsten, assignors to Aktiebolaget Svenska Flaktfabriken, Stockholm, Sweden. Drying device. 1,901,826; Mar. 14.

Open Hearth Combustion Company. (See Boynton, Arthur J., assignor.)
Operay Laboratories, Inc. (See Nirdlinger, Patrick A., and C. D., and Miller.)
Osborg, Hans, Frankfort-on-the-Main, Germany. Electrolytic process for producing alloys of lithium. 1,901,407; Mar. 14.
Osborn Products Inc. (See Bosarth, William H., assignor.)
Osborn, Robert T., Warren, Ohio. Air operated horn. 1,901,187; Mar. 14.
Osborne, Samuel C., Cleveland Heights, assignor to The Lincoln Electric Company, Cleveland, Ohio. Welding apparatus. 1,901,466; Mar. 14.
Oschwald, Alfred, Zurich, Switzerland. Projector comprising automatic picture changing means. 1,901,819; Mar. 14.
Ossenbeck, Anton. (See Hentrich, W., Ossenbeck, and Tietse.)
Otto, Carl, Essen-Bredeney, Germany. Vacuum cleaning apparatus. 1,901,467; Mar. 14.
Oversewing Machine Company. (See Baker, George, assignor.)
Owens, Robert J., and H. J. Frarer, Huntington, W. Va., assignors to The International Nickel Company, Inc., New York, N. Y. Bright annealing steels and alloys. 1,901,039; Mar. 14.
Packard Motor Car Company. (See Christman, John M., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Palmaer, Knut W., Stockholm, Sweden. Removing one or more of the metals of the iron group from solutions containing salts of one or more of the said metals. 1,900,996; Mar. 14.
Pangborn Corporation. (See Hull, Foster J., assignor.)
Parco Specialty Co. (See Evans, Harold A., assignor.)
Parker, Arthur H. (See Sebell, Harry, assignor.)
Parker, Arthur L., Cleveland, Ohio. Solder fittings and method of soldering. 1,901,820; Mar. 14.
Parker, Clara B., executrix. (See Twomley, Herbert E., assignor.)
Parker, George D. (See Twomley, Herbert E., assignor.)
Parker Pen Company. (See Parker, Russell C., assignor.)
Parker, Russell C., assignor to Parker Pen Company, Janesville, Wis. Fountain pen. Des. 89,449; Mar. 14.
Parker, Samuel P., Franklinton, N. C. Loom. 1,901,769; Mar. 14.
Parkhurst, Karl C., Wichita, Kans. Traffic sign. 1,901,333; Mar. 14.
Pasternack, Richard, and C. P. Ammerman, assignors to Charles Pfizer & Company, Brooklyn, N. Y. Amides of d-gluconic acid. 1,901,565; Mar. 14.
Pateo, Inc. (See Harris, Ford W., assignor.)
Patent Button Company, The. (See Peterson, Frederick H., assignor.)
Patent Button Company, The. (See White, Franklin R., assignor.)
Patent and Licensing Corporation, The. (See Kirschbraun, Lester, assignor.)
Patent and Licensing Corporation. (See Plunkett, John H., assignor.)
Paullin, Amos R., Newton, Iowa. Hedge trimmer. 1,901,327; Mar. 14.
Payne, William M. (See Grundy, J. A., and Payne.)
Pearson, Axel A., Kansas City, Mo. Producing photogravure plates. 1,901,468; Mar. 14.
Peck, Harry D. (See Mann, Leo, assignor.)
Pellymounter, Otis A., San Francisco, Calif. Shipping container. 1,901,530; Mar. 14.
Pelton, Earl L. (See Strosacker, C. J., Kennedy, and Pelton.)
Pennsylvania Powder Company. (See Schless, Robert, assignor.)
Perfection Store Company. (See Keith, David F., assignor.)
Perkins, B. F., & Son, Inc. (See Senna, Samuel N., assignor.)
Peroni, John H., Freeport, N. Y., and S. H. Alexander, Englewood, N. J. Separable weatherproof plug. 1,901,040; Mar. 14.
Peroni, John H., Freeport, N. Y., and S. H. Alexander, Englewood, N. J. One-piece plug and receptacle. 1,901,041; Mar. 14.
Peterson, Eugene, assignor to Western Electric Company, Incorporated, New York, N. Y. Bilateral modulator circuit. 1,901,408; Mar. 14.
Peterson, Frederick H., Watertown, assignor to The Patent Button Company, Waterbury, Conn. Button attaching machine. 1,901,375; Mar. 14.
Peterson, Harold O., Riverhead, N. Y., assignor to Radio Corporation of America. Receiving system. 1,901,117; Mar. 14.
Petsch, Herman, assignor to the Firm: Carl Still, Recklinghausen, Germany. Gas-fired furnace. 1,901,770; Mar. 14.
Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Hydraulic turbine control system. 1,901,771; Mar. 14.
Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Fluid pressure servo-motor for tilting propeller blades. 1,901,772; Mar. 14.
Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Propeller blade adjusting system. 1,901,773; Mar. 14.
Pfeifer, Frank E., assignor to The Ezry Register Company, Dayton, Ohio. Autographic register. 1,901,258; Mar. 14.
Pfizer, Charles, & Company. (See Pasternack, R., and Ammerman, assignors.)
Phelps, Benjamin B., assignor of one-third to W. J. Kelly and one-third to H. Haskell, Minneapolis, Minn. Lawn mower sharpening tool. 1,901,328; Mar. 14.
Phillips, John E. (See Phillips, Joseph D., assignor.)
Phillips, Joseph D., assignor of one-half to J. E. Phillips, Helena, Mont. Rumble seat window appliance. 1,901,329; Mar. 14.
Phillips, Louis A., Tenafly, N. J. Display card. 1,901,188; Mar. 14.
Phoenix, Ernest T. (See Cooper, W. B., and Phoenix.)
Phosphate Mining Co., The. (See Bullwinkel, John T., assignor.)
Piccard, Jean, Marshallton, assignor to Hercules Powder Company, Wilmington, Del. Blasting cap. 1,901,469; Mar. 14.
Pittman, Ralph E., Pine Bluff, Ark. Arc interrupter. 1,901,609; Mar. 14.
Pixley, Merritt E., Clackamas County, Oreg. Guide for saw blades in wood sawing. 1,901,376; Mar. 14.
Pizzi, Decio, Barcelona, Spain. Burner for heavy oil. 1,901,610; Mar. 14.
Plibrico Jointless Firebrick Company. (See Wiley, Roger F., assignor.)
Pliske, Bert H., Cleveland, Ohio. Electrical socket device. 1,901,470; Mar. 14.
Plunkett, John H., Beverly Hills, Calif., assignor to The Patent and Licensing Corporation, Boston, Mass. Rool roofing package. 1,901,856; Mar. 14.
Pneumatic Tire Inflating Devices Corporation. (See White, Ellis E., assignor.)
Pneumatic Tube Supply Co. of Delaware. (See Needham, John T., assignor.)
Poberejsky, Jacques, Bois-Colombe, France, assignor to "Superflexit." Fluid-conductive hose. 1,901,330; Mar. 14.
Poe, Fred M., Suffern, assignor to The American Brake Shoe and Foundry Company, New York, N. Y. Coating material for casting molds. 1,901,409; Mar. 14.
Poegel, Emil, Newark, N. J. Coating for buildings and making same. 1,901,410; Mar. 14.
Poehlman, Herbert W., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,901,668; Mar. 14.
Pohl, Ernst. (See Gorschlueter, F., and Pöhl.)
Pope, Elton A., Oakville, assignor to The Chase Companies, Incorporated, Waterbury, Conn. Waste and overflow fitting. 1,901,118; Mar. 14.
Porter, Kirk E., assignor to The Buckeye Aluminum Company, Worcester, Ohio. Drip coffee maker. 1,901,611; Mar. 14.
Portteus, James G., Toledo, Ohio. Container and roller of cigarettes. 1,901,259; Mar. 14.
Potthoff, Kurt T., Brooklyn, N. Y. Rotary conveyer system and apparatus therefor. 1,901,471; Mar. 14.
Potthoff, Kurt T., Brooklyn, N. Y. Method and apparatus for tilting tray conveyer systems. 1,901,948; Mar. 14.
Poux, Roland J., assignor to Hookless Fastener Company, Meadville, Pa. Forming separable fastener sliders. 1,901,189; Mar. 14.
Powell, Alan R., and A. W. Scott, assignors to Johnson-Matthey & Company, Limited, London, England. Electrodeposition of platinum. 1,901,531; Mar. 14.
Powell, Henry K., and A. G. Ballenberg, assignors to Morris Paper Mills, Chicago, Ill. Folding carton. 1,901,532; Mar. 14.
Powers Regulator Company, The. (See Snediker, Morton O., assignor.)
Powers, Robert E., New York, N. Y. Dump car. 1,901,260; Mar. 14.
Pratt & Whitney Aircraft Company, The. (See Ryder, Earle A., assignor.)
Precision Moderne. (See Ricordel, Auguste L., assignor.)
Preidey, George H., San Francisco, Calif. Filing receptacle. 1,901,533; Mar. 14.
Prentice, George E., Berlin, Conn. Slider for fasteners. 1,900,949; Mar. 14.
Presbrey, Otis F., Brooklyn, N. Y. Article handling device. 1,901,566; Mar. 14.
Pressed Steel Car Company. (See Sundholm, Frans J., assignor.)
Pridham, Edwin S., assignor to The Magnavox Company, Oakland, Calif. Electrodynamic loud-speaker. 1,901,331; Mar. 14.
Prodorite, S. A. (See Zimmermann, Georg, assignor.)
Production Machine Company. (See Fuller, Rufus W., assignor.)
Provincial, Firmin, Woonsocket, R. I. Furnace construction. 1,901,821; Mar. 14.
Pryor, Leo E., Delano, Calif. Automobile jack. 1,901,332; Mar. 14.
Puls, Erich F., assignor to the Firm Pulsgetriebe Gesellschaft mit beschrankter Haftung, Eisenach, Germany. Brake band apparatus. 1,901,774; Mar. 14.
Pulsgetriebe Gesellschaft mit beschrankter Haftung, the Firm. (See Puls, Erich F., assignor.)

Putnam, Walter, Pasadena, Calif. Flush valve. 1,901,119; Mar. 14.
Rabe, Frederick W., St. Louis, Mo. Refrigerating apparatus. 1,901,190; Mar. 14.
Radio Corporation of America. (See Dalheimer, Walther, assignor.)
Radio Corporation of America. (See Franklin, Charles S., assignor.)
Radio Corporation of America. (See Hansell, Clarence W., assignor.)
Radio Corporation of America. (See Karolus, August, assignor.)
Radio Corporation of America. (See Lely, Dirk, assignor.)
Radio Corporation of America. (See Peterson, Harold O., assignor.)
Radio Corporation of America. (See Wolff, Irving, assignor.)
Radio-Keith-Orpheum Corporation. (See Spotts, Ralph K., assignor.)
Raffinerie Tirlemontoise, Société Anonyme. (See Bergé, Julien, assignor.)
Rah, Joseph, assignor to The Delta-Star Electric Company, Chicago, Ill. Flexible connecter for cable terminators. 1,901,665; Mar. 14.
Rah, Joseph, assignor to The Delta-Star Electric Company, Chicago, Ill. Cable terminator cap assembly. 1,901,666; Mar. 14.
Rah, Joseph C., assignor to The Delta Star Electric Company, Chicago, Ill. Cable terminator. 1,901,667; Mar. 14.
Rah, Joseph, assignor to The Delta-Star Electric Company, Chicago, Ill. Cable terminator provided with means for insulating ends of cable sheaths. 1,901,669; Mar. 14.
Ramage, Alexander S., assignor, by mesne assignments, to M. Wiley and O. L. Smith, trustees, Detroit, Mich. Conversion of gaseous paraffin or olefine hyd ocarbon into liquid aromatic hydrocarbons. 1,900,997; Mar. 14.
Ramos, Sebastião K., Lagoa Vermelha, Brazil. Automobile extractor. 1,901,261; Mar. 14.
Randel, Wilbur S., Farnams, Mass., assignor to United States Gypsum Company, Chicago, Ill. Model plaster. 1,901,056; Mar. 14.
Randel, Wilbur S., and M. C. Dailey, assignors to United States Gypsum Company, Chicago, Ill. High strength calcined gypsum and manufacturing same. 1,901,051; Mar. 14.
Randle, O. R., et al. (See Tedford, Julian P., assignor.)
Rankin, William A., Rock Island, assignor to Birtman Electric Company, Chicago, Ill. Swivel base construction. 1,901,120; Mar. 14.
Ransome Concrete Machinery Company. (See Bushnell, J. E., and Lukachovic, assignors.)
Rasmussen, Frank H. (See MacCourt, W. D., Walsh, and Rasmussen.)
Raulerson, Felder J. and H. H., Jacksonville, Fla. Speed boat. 1,901,357; Mar. 14.
Raulerson, Hardy H. (See Raulerson, Felder J. and H. H.)
Rawers, William B., assignor, by mesne assignments, to Gas Krakker Corporation, Chicago, Ill. Gas and air mixer for hydrocarbon engines. 1,901,191; Mar. 14.
Raybestos-Manhattan, Incorporated. (See Bodine, Alfred V., assignor.)
Raymond Bag Company, The. (See Sharkey, William E., assignor.)
Raymond, Lambert L., Minneapolis, Minn. Reflector for Christmas trees. 1,901,472; Mar. 14.
Raytheon Inc. (See Smith, Charles G., assignor.)
Read, Philip C. (See Hauk, Joseph, assignor.)
Ready, Gladys M., et al. (See McCorquodale, Wilmer E., assignor.)
Reclamation Company, The. (See Holt, G. J., Hocking, Matson, and Knickerbocker, assignors.)
Redfield, Clyde S., Shortsville, N. Y. Combination lunch box and bottle. 1,901,534; Mar. 14.
Redington, F. B., Co. (See Milmoe, Michael J., assignor.)
Reed, Claude D., Lebanon, Pa., assignor to Bethlehem Steel Company. Apparatus for forming ladders. 1,901,334; Mar. 14.
Reed Roller Bit Company. (See Harrington, George G., assignor.)
Regensburger, Richard W. (See De Vout, A. W., and Regensburger.)
Rehor, Joseph E., Shaker Heights, assignor to The Rotor Air Tool Company, Cleveland, Ohio. Fluid pressure motor. 1,900,950; Mar. 14.
Reichhardt, Herman C., Evanston, assignor to Star-Brite Corporation, Chicago, Ill. Combined casing or frame and bracket for light reflector signal. Des. 89,468; Mar. 14.
Reichhardt, Herman C., Evanston, assignor to Star-Brite Corporation, Chicago, Ill. Vehicle rear light casing. Des. 89,469; Mar. 14.
Reichold, Ludwig, assignor to The Fitzgerald Manufacturing Company, Winsted, Conn. Thermostatic switch unit. 1,901,775; Mar. 14.
Reiner, Robert, New York, N. Y. Knitting machinery. 1,901,857; Mar. 14.
Reinhardt, Gustav A., and R. H. Eurich, Youngstown, Ohio, assignors to Bacharach Industrial Instrument Company, Pittsburgh, Pa. Apparatus for measuring temperatures of moving bodies. 1,901,192; Mar. 14.
Reisinger, George, Rochester, N. Y. Fountain brush. 1,901,822; Mar. 14.
Reiss, William, Bronx, N. Y. Bracelet. Des. 89,450; Mar. 14.
Remington Rand Inc. (See Landsiedel, Harry, assignor.)
Renault, Louis. (See Salves, Léon, assignor.)
Reo Motor Car Company. (See Thomas, Horace T., assignor.)
Respess, William R., Grassmere, N. Y., assignor to Nas-Dar Company, Chicago, Ill. Stenciling machine. 1,901,473; Mar. 14.
Reynolds, Adolph R., Columbia, S. C. Bottle filling machine. 1,901,335; Mar. 14.
Rhein, Charles E. (See Davis, W. T., and Rhein.)
Rhode Island Warp Stop Equipment Company. (See Smith, Edwin C., assignor.)
Rich, Clarence A., Lynn, Mass. Signaling traffic by a hand device. 1,901,411; Mar. 14.
Richards, Donald, et al. (See Brooks, J. H., and Goldstone, assignors.)
Richardson, Arthur W., Shell Haven, Thames Haven, assignor to Shell-Mex, Limited, London, England. Burner. 1,900,998; Mar. 14.
Richardson Company, The. (See Stevenson, Earl P., assignor.)
Richardson Taylor-Globe Corporation, The. (See Marx, Frank A., assignor.)
Richter, George A., W. B. Van Arsdel, and R. B. Hill, assignors to Brown Company, Berlin, N. H. Manufacture of rubber-impregnated products. 1,900,951; Mar. 14.
Richter, William A., New York, N. Y. Lock. 1,901,412; Mar. 14.
Ricordel, Auguste L., assignor to Precision Moderne, Paris, France. Filing device for demountable machine-guns. 1,900,999; Mar. 14.
Riddle, George W., et al. (See Tedford, Julian P., assignor.)
Riebel, Frederick, jr., and D. M. Dow, assignors to Air-Way Electric Appliance Corporation, Toledo, Ohio. Floor polisher. 1,901,670; Mar. 14.
Riebel, Frederick, jr., and D. M. Dow, assignors to Air-Way Electric Appliance Corporation, Toledo, Ohio. Electric switch. 1,901,671; Mar. 14.
Riggs, Alger S., North Bergen Township, Hudson County, N. J. Radio receiving system. 1,901,121; Mar. 14.
Rimele, Eugen. (See Neelmeier, W., Rimele, and Glienenberg.)
Ring, Joseph J., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Turbine control system. 1,901,776; Mar. 14.
Rink, Ross J., Staples, Minn. Garment hanger. 1,901,777; Mar. 14.
Ritter Dental Manufacturing Company. (See Moore, Clarence W., assignor.)
Rixson, Oscar C., Company, The. (See Noltin, Fred, assignor.)
Robbins, Frank, Sacramento, assignor of one-half to Libby, McNeill & Libby, San Francisco, Calif. Fruit pitting machine. 1,901,042; Mar. 14.
Robe, Walter B., Towson, Md., assignor to Thermal Control Corporation. Heat transferrer for controlling solid CO_2 for refrigeration purposes. 1,901,000; Mar. 14.
Roberts & Mander Stove Company. (See Antrim, William D., assignor.)
Robideau, Eli, Malone, N. Y. Dust collector. 1,901,262; Mar. 14.
Robins Conveying Belt Company. (See Robins, Samuel D., assignor.)
Robins, Samuel D., Hewlett, N. Y., assignor to Robins Conveying Belt Company, Passaic, N. J. Vibrator for screens and other apparatus. 1,901,122; Mar. 14.
Robinson, Harry G., Waterbury, Conn., assignor to Industries of America, Inc. Compensating let-off mechanism. 1,900,952; Mar. 14.
Robinson, Malcolm B., Woodbridge, Conn. Collapsible tube closure. 1,901,823; Mar. 14.
Rodgers, James A., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo. Motor support. 1,901,474; Mar. 14.
Roe, De Forest Elyria, assignor to The Colson Company, Cleveland, Ohio. Buffer. 1,901,377; Mar. 14.
Rogats, Henry, Amarillo, Tex. Apparatus for surveying drill holes. 1,901,567; Mar. 14.
Rogers, Paul H., Hartsville, S. C. Manufacture of paperboard. 1,901,378; Mar. 14.
Rohleder, Frederick, Vauxhall, N. J. Lathering device. 1,901,001; Mar. 14.
Rolph, John A. (See Hildebrand, David A., assignor.)
Roos, Carlisle K., Wheaton, assignor to United States Gypsum Company, Chicago, Ill. Acoustic corrective material. 1,901,057; Mar. 14.
Roosenstein, Hans O., assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany. Oscillation generator. 1,901,043; Mar. 14.
Roselle, Walter A., New York, N. Y. Valve construction for containers. 1,901,413; Mar. 14.
Rosen, Shy, Bloomington, assignor, by mesne assignments, to Shellmar Products Company, Chicago, Ill. Package forming method. 1,900,953; Mar. 14.
Ross, William, Surbiton, England. Device for feeding and controlling the flow of materials. 1,901,002; Mar. 14.
Rotor Air Tool Company. (See Rehor, Joseph E., assignor.)

Rowley, Lancelot C., Grand Rapids Township, Kent County, Mich. Glare eliminator for vehicle headlights. 1,901,058; Mar. 14.

Royal Typewriter Company, Inc. (See Dowd, Bernard J., assignor.)

Royle, Vernon, Paterson, N. J. Gear casing for tubing machines. 1,901,569; Mar. 14.

Ruth Company, The. (See Ruth, Joseph P., jr., assignor.)

Ruth, Joseph P., jr., assignor to The Ruth Company, Denver, Colo. Flotation machine. 1,901,128; Mar. 14.

Ruud, Otto S., Oslo, Norway. Internal combustion engine. 1,901,263; Mar. 14.

Ryder, Earle A., West Hartford, assignor to The Pratt & Whitney Aircraft Company, East Hartford, Conn. Crank shaft. 1,901,358; Mar. 14.

San, Robert, Auburn, Calif. Adjustable shade roller mounting. 1,901,535; Mar. 14.

"Sachtleben" Aktiengesellschaft für Bergbau und Chemische Industrie. (See Müller, Johannes, assignor.)

Saeger, Charles M., jr., Bowmanstown, Pa. Process and product for coating molds and cores. 1,901,124; Mar. 14.

Safety Car Heating & Lighting Company. (See Broekhuysen, Willem C., assignor.)

Sager, Solomon M., Evanston, Ill. Combination fountain pen and pencil. 1,901,414; Mar. 14.

St. Joseph Lead Company. (See Weaton, George F., assignor.)

Saives, Léon, assignor to L. Renault, Billancourt, France. System for the central lubrication of vehicles. 1,901,379; Mar. 14.

Salerni, Piero M., Westminster, London, England. Power transmission mechanism. 1,901,193; Mar. 14.

Salerni, Piero M., Westminster, London, England. Power transmission mechanism. 1,901,194; Mar. 14.

Salisbury, William, Toledo, Ohio. Tile manufacture. 1,901,195; Mar. 14.

Salone, Jacques C. G., and G. D. Lucas, assignors to Société Salone, Ing. E. C. P. & Lucas, Paris, France. Parachute equipment. 1,901,380; Mar. 14.

Saltzman, Eli J., Philadelphia, Pa. Window ventilator. 1,901,568; Mar. 14.

Sandeman, Edward K., Aldwych, London, England, assignor to International Standard Electric Corporation, New York, N. Y. Distributor for use in telegraphy or the like. 1,900,954; Mar. 14.

Sargent & Greenleaf, Inc. (See Diesel, William F., assignor.)

Sassen, Bernard. (See De Haas, M., and Sassen.)

Sauer, Henry J., assignor to The Kilborn-Sauer Company, Fairfield, Conn. Automobile signal lamp. Des. 89,451; Mar. 14.

Schafer, John C. F. Mount Pulaski, and J. F. Bleser, Springfield, Ill.; said Bleser assignor to said Schafer. Damper. 1,901,125; Mar. 14.

Schäfer, Josef, assignor to the Firm J. R. Geigy, S. A., Basel, Switzerland. Manufacture of tanning substances. 1,901,536; Mar. 14.

Scheibell, Gordon B., Newark, N. J., assignor to Wired Radio, Inc., New York, N. Y. System of electrical distribution. 1,901,059; Mar. 14.

Schenkel, Moritz, Berlin-Charlottenberg, Germany, assignor to Westinghouse Electric & Manufacturing Company. Mercury arc rectifier. 1,901,612; Mar. 14.

Schering-Kahlbaum Aktiengesellschaft. (See Schoeller, W., Jordan, and Clerc, assignors.)

Schindler, Robert B., Spring City, Pa. Stocking. Des. 89,470; Mar. 14.

Schlag, Hiram P., Fortuna, Calif. Hoe. 1,901,778; Mar. 14.

Schless, Robert, assignor to Pennsylvania Powder Company, Emporium, Pa. Explosive composition. 1,901,126; Mar. 14.

Schlotterbose, Conrad, Wesermunde-Wulsdorf, Germany. Producing animal food. 1,901,264; Mar. 14.

Schmid, Arnold, Vienna, Austria; H. Schmid and I. Schmid, administrators of said Arnold Schmid, deceased, assignors to Karl Schmid, Mannheim, Germany. Washing nitroglycerine and similar esters. 1,901,003; Mar. 14.

Schmid, Hans, et al., administrators. (See Schmid, Arnold.)

Schmid, Irma, et al., administrators. (See Schmid, Arnold.)

Schmid, Karl. (See Schmid, Arnold, assignor.)

Schmidt, Ommo, assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany. Antenna. 1,901,060; Mar. 14.

Schmidt, Otto, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of foils. 1,901,045; Mar. 14.

Schmidt, Otto, and B. Schnell, Ludwigshafen-on-the-Rhine, and E. Meyer, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of artificial masses. 1,901,044; Mar. 14.

Schneider, Frank A., San Francisco, Calif. Atomizer. 1,901,415; Mar. 14.

Schneider, Heinrich, Beloit, Wis. Transmission. 1,901,265; Mar. 14.

Schnell, Berthold. (See Schmidt, O., Schnell, and Meyer.)

Schnell, William. (See Morgan, J. R., and Schnell.)

Schnell, William, assignor to Ternstedt Manufacturing Company, Detroit, Mich. Outside door handle or similar article for an automotive vehicle. Des. 89,452; Mar. 14.

Schnell, William, assignor to Ternstedt Manufacturing Company, Detroit, Mich. Automobile radiator ornament or similar article. Des. 89,453; Mar. 14.

Schoeller, Walter, Berlin-Charlottenburg, H. Jordan, Berlin-Steglitz, and E. Clerc, Berlin, Germany, assignors to the Firm Schering-Kahlbaum Aktiengesellschaft. Production of phenolic compounds. 1,901,824; Mar. 14.

Scholes, Daniel R., Oak Park, assignor to Aermotor Company, Chicago, Ill. Pump. 1,901,061; Mar. 14.

Schrader's, A., Son, Inc. (See Lewis, Arthur J., assignor.)

Schreiber, Louis J. J. (See Deakin, G., and Schreiber.)

Schroeder, Max, Berlin, Germany. Production of gaseous mixtures containing sulphur dioxide. 1,901,416; Mar. 14.

Schubert & Saezer Maschinenfabrik Aktiengesellschaft. (See Heinitz, Woldemar, assignor.)

Schulte, William H., Trenton, N. J. Drinking fountain. 1,901,046; Mar. 14.

Schultis, Caritheo. (See Fleischhauer, R., and Schultis.)

Schumann, Theodor E. W., Elisabeth, N. J., assignor to Combustion Utilities Corporation, New York, N. Y. Carbonizing coal. 1,901,476; Mar. 14.

Schundler, Hans O. (See Havill, Owen A., assignor.)

Schweizer, Jack, Rye, N. Y. Textile fabric or the like. Des. 89,454; Mar. 14.

Scott, Arthur W. (See Powell, A. B., and Scott.)

Scott, E. H. (See Haggstrom, Arthur C., assignor.)

Scovill Manufacturing Company. (See Clemmons, Herbert D., assignor.)

Sebell, Harry, Boston, assignor to Arthur H. Parker, Lexington, Mass. Machine for sealing cans 1,901,266; Mar. 14.

Secretary of War, in behalf of the United States. (See Nelson, Paul R., assignor.)

Seibert, Carl F., Hamilton, and E. J. Seibert, Cincinnati, Ohio. Applicator for treating surfaces. 1,901,825; Mar. 14.

Seibert, Carl F., Hamilton, and E. J. Seibert, Cincinnati, Ohio. Applicator for treating surfaces. 1,901,826; Mar. 14.

Seibert, Elmer J. (See Seibert, Carl F. and E. J.)

Seibt, Georg, Berlin-Schoneberg, Germany. Electric glow discharge tube. 1,901,004; Mar. 14.

Seid, George. (See Coots, F. J., jr., and Seid.)

Sekella, Youston, Elmira Heights, assignor to Eclipse Machine Company, Elmira, N. Y. Starting mechanism for internal combustion engines. 1,901,267; Mar. 14.

Semet-Solvay Engineering Corporation. (See Eberlein, J. B., and Steere, assignors.)

Semet-Solvay Engineering Corporation. (See Steere, George R., assignor.)

Semet-Solvay Engineering Corporation. (See Tenney, Charles I., assignor.)

Senna, Samuel N., Chicopee, assignor to B. F. Perkins & Son, Inc., Holyoke, Mass. Testing apparatus. 1,901,359; Mar. 14.

Setter, Joseph A., Schenectady, N. Y., assignor to General Electric Company. Motor control system. 1,901,672; Mar. 14.

Shafer, Samuel, jr., assignor to Chain Belt Company, Milwaukee, Wis. Trolley conveyor. 1,901,850; Mar. 14.

Shank, Edwin A., New Rochelle, N. Y. Folding tire display holder. 1,901,475; Mar. 14.

Sharkey, William E., assignor to The Raymond Bag Company, Middletown, Ohio. Counting and bunching device. 1,901,062; Mar. 14.

Shaw, Wesley J., Haverhill, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Guard for wood heel turning machines. 1,901,063; Mar. 14.

Sheindelman, Samuel, Lawrence, N. Y. Sweater. 1,901,537; Mar. 14.

Shell Development Company. (See Voogt, George, assignor.)

Shell-Mex, Limited. (See Richardson, Arthur W., assignor.)

Shell Oil Company. (See Bond, Lewis A., assignor.)

Shellmar Products Company. (See Rosen, Shy, assignor.)

Shepherdson, Arnold. (See Davidson, A., and Shepherdson.)

Shera, John W., assignor to American Flange & Manufacturing Company, Chicago, Ill. Closure device. 1,901,196; Mar. 14.

Shindel, Harry F., assignor to Willson Products, Inc., Reading, Pa. Goggle ventilator. 1,900,955; Mar. 14.

Shipley, Bernis M., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 1,901,064; Mar. 14.

Shockey, H. H. (See Lack, Arnold, assignor.)

Siemens Brothers & Company Limited. (See Christian, David A., assignor.)

Siemens & Halske, Aktiengesellschaft. (See Becker, Ernst, assignor.)

Siemens & Halske Aktiengesellschaft. (See Mathias, Maximilian, assignor.)

Siemens & Halske Aktiengesellschaft of Wernerwerk. (See Stich, Johannes, assignor.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Altenkirch, Edmund, assignor.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Eule, M., and Anders, assignors.)

Simmons Company. (See Kusterle, Frank, assignor.)

Simmons, Leon E., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,901,127; Mar. 14.

Simpson, Ray, River Forest, Ill., assignor, by mesne assignments, to Jewell Electrical Instrument Company. Electrical measuring instrument. 1,901,197; Mar. 14.

Sinclair, Charles W., assignor to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Wheel. Des. 89,455; Mar. 14.

Singer Manufacturing Company, The. (See Karle, John D., assignor.)

Skeel, Lewis, and F. P. Miller, assignors to McCrosky Tool Corporation, Meadville, Pa. Power hammer. 1,901,779; Mar. 14.

Slavik, Josef, Brunn, Czechoslovakia. Measuring arrangement of ratio of transformation and phase angles of voltage and current transformers. 1,901,336; Mar. 14.

Sleeper, Milton B., New York, N. Y., assignor, by mesne assignments, to Television Products, Inc. Electrical controlling apparatus. 1,901,673; Mar. 14.

Sleeper, Myron O., Hanson, assignor to G. A. Clapp, Brookline, and C. F. Woods, Winchester, receivers of E. H. Clapp Rubber Company, Boston, Mass. Weatherstrip. 1,901,780; Mar. 14.

Sleeper, Myron O., Hanson, assignor to George A. Clapp, Brookline, and C. F. Woods, Winchester, receivers of E. H. Clapp Rubber Company, Boston, Mass. Making shoe welting. 1,901,781; Mar. 14.

Sleeper, Oliver S., assignor to J. P. Devine Manufacturing Company, Mount Vernon, Ill. Pump. 1,901,417; Mar. 14.

Slobotkin, Nathan, Brooklyn, N. Y. Adjustable mounting for window shades. 1,901,674; Mar. 14.

Smith, Charles G., Medford, assignor to Raytheon Inc., Cambridge, Mass. Electric lamp. 1,901,128; Mar. 14.

Smith, Clyde L. (See Harnsberger, A. E., and Smith.)

Smith, Edwin C., Providence, R. I., assignor to Rhode Island Warp Stop Equipment Company, Portland, Me. Timing device for loom stop-motions. 1,901,418; Mar. 14.

Smith, Frederick A., assignor to Oakes Products Corporation, North Chicago, Ill. Spare wheel carrier and lock. 1,901,613; Mar. 14.

Smith, Garfield P., Brooklyn, N. Y. Gas engine muffler and supercharger. 1,901,851; Mar. 14.

Smith, Henry B., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose organic derivative composition of matter containing a BB'-dialkoxy diethyl adipate. 1,901,130; Mar. 14.

Smith, Henry B., and S. J. Carroll, assignors to Eastman Kodak Company, Rochester, N. Y. Cellulosic composition of matter containing phenyl stearate. 1,901,129; Mar. 14.

Smith, Maurice C., jr., and E. C. Heilbecker, Bristol, R. I.; said Heilbecker assignor to said Smith. Shoe and making same. 1,901,782; Mar. 14.

Smith, Ora L. (See Ramage, Alexander S., assignor.)

Smith, Willoughby S., Benchams, N. Poppleford, and H. J. Garnett, Lymne, Soledelda, Sevenoaks, and J. N. Dean, Orpington, England. Manufacture of loaded electric signaling conductors. 1,901,005; Mar. 14.

Snediker, Morton O., assignor to The Powers Regulator Company, Chicago, Ill. Water mixer. 1,901,268; Mar. 14.

Snelerson, Samuel L., Roxbury, and Eiffel B. Gale, Auburndale, Mass., assignors, by mesne assignments, to Carling Tool & Machine Company, Hartford, Conn. Canopy switch. 1,901,337; Mar. 14.

Snow, Earl H., Sleepy Eye, Minn. Incubator. 1,901,614; Mar. 14.

Snow, Frederick O., jr., Winchester, assignor to Mead-Morrison Manufacturing Company, East Boston, Mass. Track laying tractor. 1,901,269; Mar. 14.

Snow, Karl F., Brecksville, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Apparatus for handling cylindrical articles and the like. 1,901,360; Mar. 14.

Societe Salone, Ing. E. C. P. & Lucas. (See Salone, J. C. G., and Lucas, assignors.)

Somersall, William W., assignor to New England Pressed Steel Company, Natick, Mass. Portable heater. 1,900,956; Mar. 14.

Sommer, William H. (See Herman, W., and Sommer.)

Sonoco Products Company. (See Dunlap, Charles K., assignor.)

Sorensen, Andrew J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric control system. 1,901,047; Mar. 14.

Sorensen, John T., assignor to Zenith Heater Company, Chicago, Ill. Unit heater. 1,901,338; Mar. 14.

Soulary, Paul, Bruay-en-Artois, France. Apparatus for the pneumatic separation of materials of different densities. 1,901,783; Mar. 14.

Southwick, William S., assignor to Thomson-Gibb Electric Welding Company, Lynn, Mass. Fabric welding machine. 1,901,477; Mar. 14.

Spain, Charles W., Hartford, Conn. Paper dispensing receptacle. 1,901,006; Mar. 14.

Specialty Insulation Manufacturing Company. (See Batcholts, Clinton, assignor.)

Speidel Chain Co. (See Carlson, Edwin G., assignor.)

Spencer, Owen H., Indianapolis, Ind. Cylinder port control. 1,901,198; Mar. 14.

Spencer Thermostat Company. (See Maurer, Rufus H., assignor.)

Sperry Products, Inc. (See Drake, Harcourt C., assignor.)

Spotts, Ralph K., Los Angeles, Calif., assignor to Radio-Keith-Orpheum Corporation. Microphone windshield. 1,901,065; Mar. 14.

Square D Company. (See Jackson, John G., assignor.)

Square D Company. (See Kaufman, Thomas J., assignor.)

Stacy, Thomas F., assignor to The French Oil Mill Machinery Co., Piqua, Ohio. Valve device. 1,901,181; Mar. 14.

Standard Oil Company. (See Atwell, Harold V., assignor.)

Stanley, Fred D., assignor to The Oil Country Specialties Mfg. Co., Coffeyville, Kans. Driving mechanism. 1,901,270; Mar. 14.

Stanley, Harold H. V., Hayes, and G. F. Clark, West Drayton, England. Free-wheel coupling. 1,900,957; Mar. 14.

Stanley, Paul H., Glenside, assignor to Autogiro Company of America, Philadelphia, Pa. Rotary-winged aircraft. 1,901,182; Mar. 14.

Stanley Works, The. (See King, Patrick F., assignor.)

Star-Brite Corporation. (See Reichhardt, Herman C., assignor.)

Steere, George R. (See Eberlein, J. B., and Steere.)

Steere, George R., Larchmont, assignor to Semet-Solvay Engineering Corporation, New York, N. Y. Gas manufacture. 1,900,959; Mar. 14.

Steindorf, Robert T., assignor to Chain Belt Company, Milwaukee, Wis. Scraper for shaft bearings. 1,901,851; Mar. 14.

Steinert, Marie H., Chemnitz, Germany. Tooth-cleaner. 1,901,419; Mar. 14.

Stenfors, Frans I. E. (See Olsson, J. G., and Stenfors.)

Stephenson Laboratories Trust. (See Mitchie, Jean G., assignor.)

Stern, Charles. (See Feeley, M. R., and Stern, assignors.)

Sternaman, John R., Springfield, Ill. Pipe structure. 1,901,420; Mar. 14.

Stevenson, Earl P., Newton, Mass., assignor to The Richardson Company, Lockland, Ohio. Fibrous composition containing filler and binder substances and making them. 1,901,882; Mar. 14.

Stevenson, Edward E., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif. Sucker-rod elevator. 1,901,339; Mar. 14.

Stewart, Fenton, et al. (See Gritt, F. A., and Stewart.)

Stich, Johannes, Berlin-Siemensstadt, assignor to Siemens & Halske Aktiengesellschaft of Wernerwerk, Siemensstadt, near Berlin, Germany. Automatic telephone system. 1,901,133; Mar. 14.

Still, Firm Carl. (See Petsch, Herman, assignor.)

Stimpson, Wallace I., assignor to Draper Corporation, Hopedale, Mass. Bobbin and bobbin clutching spindle. 1,901,538; Mar. 14.

Stine, Walter H., assignor of one-half to Lyman M. King, jr., Los Angeles, Calif. Piston and ring therefor. 1,901,199; Mar. 14.

Stokes, James B. (See Stokes, Robert H. and J. B.)

Stokes, John S. (See Novotny, Emil E., assignor.)

Stokes, Robert H. and J. B., Lufkin, Tex. Pumping unit. 1,901,827; Mar. 14.

Stolfa, Hermann, and R. Zwerina, Vienna, Austria. Rocket. 1,901,852; Mar. 14.

Strandlund, Carl G., assignor to Deere & Company, Moline, Ill. Automatic depth control for plows. 1,901,134; Mar. 14.

Streeter, Richard S., Oakland, and O. E. Hendrick, Alameda, Calif. Roofing. Des. 89,471; Mar. 14.

Streich, A., & Bro. Company. (See Streich, Frederick A., assignor.)

Streich, Frederick A., assignor to A. Streich & Bro. Company, Oshkosh, Wis. Track laying device. 1,901,421; Mar. 14.

Stromberg-Carlson Telephone Manufacturing Company, The. (See Levy, Maurice L., assignor.)

Strong, Leslie P., Lakewood, assignor to The Clark Manufacturing Company, Cleveland, Ohio. Steam trap. 1,901,200; Mar. 14.

Strong, Leslie P., assignor to The Clark Manufacturing Company, Cleveland, Ohio. Steam trap. 1,901,833; Mar. 14.

Stroeacker, Charles J., C. C. Kennedy, and E. L. Pelton, assignors to The Dow Chemical Company, Midland, Mich. Preparing brom-isatin. 1,901,615; Mar. 14.

Stuhlmann, Hans C., Premnitz, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Treating artificial fibers. 1,901,007; Mar. 14.

Suez, Edward, Philadelphia, Pa. Cigarette box and display. 1,901,784; Mar. 14.

Sullivan, Charles H. (See Cotroumpas, Stephanos, assignor.)

Sullivan Machinery Company. (See Simmons, Leon E., assignor.)

Sundholm, Frans J., Bellevue, assignor to Pressed Steel Car Company, Pittsburgh, Pa. Side bearing. 1,901,675; Mar. 14.

Sundstrand Corporation. (See Sundstrand, Oscar J., assignor.)

Sundstrand, Oscar J., Rockford, Ill., assignor to Sundstrand Corporation, Wilmington, Del. Carriage-return mechanism. 1,901,135; Mar. 14.

Sunnen, Joseph, Kirkwood, Mo. Honing device for cylinders. Re18,763; Mar. 14.

"Superflexit." (See Poberejsky, Jacques, assignor.)

Sutton, Grover C., and P. H. Witschge, assignors to General Machinery Company, Spokane, Wash. Compressor and valve therefor. 1,901,478; Mar. 14.

Swann Research, Incorporated. (See Booth, Charles F., assignor.)

Swanson, Earl R., assignor to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Railway car. 1,901,008; Mar. 14.

Swanson, Earl R., assignor to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Railway car. 1,901,009; Mar. 14.

Sweetland, Ernest J., Piedmont, Calif. Apparatus for reconditioning used oil. 1,901,010; Mar. 14.

Swindin, Norman, Acton, London, England. Apparatus comprising siphons. 1,901,785; Mar. 14.

Taber, George H., Binghamton, N. Y. Cover for use in testing vehicle wheels for misalignment. 1,901,786; Mar. 14.

Taft Oil Burner Company. (See Taft, William E., assignor.)

Taft, William E., assignor to Taft Oil Burner Company, Athol, Mass. Liquid fuel burner. 1,901,271; Mar. 14.

Takeda, Kenjiro, Osaka, Japan. Decorating metal surfaces. 1,900,960; Mar. 14.

Taplin, Fred W., et al. (See Brooks, J. H., and Goldstone, assignors.)

Tapp, John W., Glendale, Ariz. Agricultural machine. 1,901,539; Mar. 14.

Tatro, Lysle G., assignor to H. B. Montgomery, Decorah, Iowa. Coordinated battery construction. 1,901,272; Mar. 14.

Taylor, Arthur K., Baltimore, Md. Material forwarding mechanism. 1,901,677; Mar. 14.

Taylor, Arthur K., assignor to United States Printing and Lithograph Co., Baltimore, Md. Paper cutter. 1,901,676; Mar. 14.

Taylor, Gordon A., Camden, N. J. Heel for ladies' shoes. 1,901,340; Mar. 14.

Taylor, James F., South Bethlehem, Pa. Silk cleaner. 1,901,273; Mar. 14.

Taylor, James H., Oak Park, Ill. Forming and reenforcing flanged apertures in hollow bodies. 1,901,201; Mar. 14.

Tedford, Julian P., Oklahoma City, Okla., assignor to L. N. Farr, O. R. Randle, W. H. Courtner, and G. W. Riddle. Antiglare device for automobiles. 1,901,011; Mar. 14.

Telefunken Gesellschaft fur Drahtlose Telegraphie, m. b. H. (See Roosenstein, Hans O., assignor.)

Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H. (See Schmidt, Ommo, assignor.)

Television Products, Inc. (See Sleeper, Milton B., assignor.)

Tenney, Charles I., Newton, Iowa., assignor, by mesne assignments, to Semet-Solvay Engineering Corporation, New York, N. Y. Gas making apparatus. 1,900,961; Mar. 14.

Ternstedt Manufacturing Company. (See Carlson, Eric S., assignor.)

Ternstedt Manufacturing Company. (See Morgan, J. R., and Schnell, assignors.)

Ternstedt Manufacturing Company. (See Schnell, William, assignor.)

Textile Machinery Corporation. (See Goldthwait, Charles F., assignor.)

Thermal Control Corporation. (See Robe, Walter B., assignor.)

Thomas, Adolph A., New York, N. Y. Electrostatic loudspeaker. 1,901,202; Mar. 14.

Thomas, Horace T., Lansing, Mich., assignor to Reo Motor Car Company. Fuel feed mechanism. 1,901,835; Mar. 14.

Thompson, George S., Pueblo, assignor to The Colorado Fuel and Iron Company, Denver, Colo. Coal feeder. 1,901,203; Mar. 14.

Thomson-Gibb Electric Welding Company. (See Southwick, William S., assignor.)

Tietze, Ernst. (See Hentrich, W., Ossenbeck, and Tietze.)

Tilliard, Gilbert V., Jackson Heights, N. Y. Textile fabric or the like. Des. 89,456; Mar. 14.

Tinius Olsen Testing Machine Company. (See Lewis, Robert B., assignor.)

Tinnerman, Albert H., Cleveland, Ohio. Stove panel assembly. Des. 89,457; Mar. 14.

Told, Arnold H., Chicago, Ill. Wheel atop. 1,901,204; Mar. 14.

Tourriol, Jean, Paris, France. Headlight for vehicles. 1,901,012; Mar. 14.

Tracy, Elwyn B., Littleton, assignor of one-half to The Macallen Company, Boston, Mass. Safety device for motor vehicles. 1,901,361; Mar. 14.

Travis, John M., St. Louis, Mo. Faucet. 1,901,479; Mar. 14.

Tregoning, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Apparatus for molding insulating articles. 1,901,205; Mar. 14.

Trein, Norman O., Los Angeles, Calif. Time control mechanism. 1,901,862; Mar. 14.

Tribune Company, The. (See von der Horst, Frederick, assignor.)

Trinchero, Ferruccio, Genoa, assignor to Enrico Garda, Turin, Italy. Controlling means for electric lighting installation of railway cars. 1,901,274; Mar. 14.

Trobeck, Olof E., Berlin, Germany, assignor to The National Acme Company, Cleveland, Ohio. Multiple-spindle metal working machine. 1,901,206; Mar. 14.

Tropic-Aire, Incorporated. (See Butterfield, Vernon J., assignor.)

Tube Reducing Corporation. (See Coe, George B., assignor.)

Tumim, Herbert B., Buffalo, assignor to National Aniline & Chemical Co., Inc., New York, N. Y. Mixing device. 1,901,207; Mar. 14.

Turner, Harry W., Schenectady, N. Y., assignor to General Electric Company. Making textile material permanently flexible, weatherproof, and fire resistant. 1,901,678; Mar. 14.

Turner, Ransom H., Auburndale, assignor to Intertype Corporation, Brooklyn, N. Y. Typographical mold. 1,901,836; Mar. 14.

Twomley, Herbert E., Riverside, Calif., assignor to C. B. Parker, executrix of G. D. Parker, deceased. Conveyer system. 1,901,066; Mar. 14.

Uber, Harold R. (See Krans, H. W., Holden, and Uber.)

Uebermuth, Werner, Oberschoneweide, Germany, assignor to General Electric Company. Gas blast circuit breaker. 1,901,679; Mar. 14.

Uher, Edmond, jr., Budapest, Hungary, assignor to Uhertype Aktiengesellschaft, Glarus, Switzerland. Process and apparatus for photographic type composing. 1,901,013; Mar. 14.

Uhertype Aktiengesellschaft. (See Uher, Edmond, jr., assignor.)

Ulrich, Carl J., Minneapolis, Minn., assignor, by mesne assignments, to Kingston Products Corporation, Kokomo, Ind. Doorlock actuating mechanism. 1,901,541; Mar. 14.

Underwood Elliott Fisher Company. (See Helmond, William F., assignor.)

Underwood Elliott Fisher Company. (See Lentz, Lawrence E., assignor.)

Union Special Machine Company. (See Cooper, Grover C., assignor.)

Union Switch & Signal Company, The. (See Coleman, John P., assignor.)

Union Switch & Signal Company, The. (See Liebel, John G. H., assignor.)

Union Switch & Signal Company, The. (See Sorensen, Andrew J., assignor.)

United Metal Products Company, The. (See Lawson, Gottfrid C., assignor.)

United Shoe Machinery Corporation. (See Bates, Arthur, assignor.)

United Shoe Machinery Corporation. (See Cavanagh, James, assignor.)

United Shoe Machinery Corporation. (See Jorgensen, Jacob C., assignor.)

United Shoe Machinery Corporation. (See Shaw, Wesley J., assignor.)

United States Gypsum Company. (See Dailey, Manvel C., assignor.)

United States Gypsum Company. (See Edge, Jacob, assignor.)

United States Gypsum Company. (See Linzell, Harry K., assignor.)

United States Gypsum Company. (See Randel, Wilbur S., assignor.)

United States Gypsum Company. (See Randel, W. S., and Dailey, assignors.)

United States Gypsum Company. (See Roos, Carlisle K., assignor.)

United States Printing and Lithograph Co. (See Taylor, Arthur K., assignor.)

Vahle, Edgar W., assignor to The Huffman Manufacturing Company, Dayton, Ohio. Liquid dispensing apparatus. 1,901,480; Mar. 14.

Van Arsdel, Wallace B. (See Richter, G. A., Van Arsdel, and Hill.)

Van Deinse, Francis C., et al. (See Johnston, Mordica O., assignor.)

Van Schaack Bros. Chemical Works, Inc. (See Van Schaack, Robert H., jr., assignor.)

Van Schaack, Robert H., jr., Evanston, assignor to Van Schaack Bros. Chemical Works, Inc., Chicago, Ill. Distributor for liquids. 1,901,481; Mar. 14.

Varchetta, George, Brooklyn, N. Y. Balanced railroad crossing gate. 1,901,680; Mar. 14.

Vaughan, Victor G., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Automatic cooking device. 1,901,616; Mar. 14.

Vayda, Louis L., Aspinwall, Pa., assignor to Bacharach Industrial Instrument Company. Process and apparatus for measuring temperatures of moving bodies. 1,901,208; Mar. 14.

Vayda, Louis L., Aspinwall, Pa., assignor to Bacharach Industrial Instrument Company. Apparatus for measuring temperatures of moving bodies. 1,901,209; Mar. 14.

Veale, George W., Cleveland Heights, assignor to Eaton Manufacturing Company, Cleveland, Ohio. Bumper. 1,901,540; Mar. 14.

Vedder, Edwin H., and E. O. Erickson, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company. Smoke indicator. 1,901,570; Mar. 14.

Vezey, John B., London, England, assignor to International Standard Electric Corporation, New York, N. Y. Continuously loaded telegraph cable. 1,900,962; Mar. 14.

Vicensi, John J., Boston, Mass. Floor surfacing machine. 1,901,681; Mar. 14.

Vickers, Harry F., Detroit, Mich. Machine for cutting metal bars and the like. 1,901,067; Mar. 14.

Vickers, James S., Alexander City, Ala. Animal trap. 1,901,210; Mar. 14.

Vincent, Harry S., Ridgewood, N. J., assignor to Franklin Railway Supply Company, New York, N. Y. Steam engine. 1,901,571; Mar. 14.

Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Transmission mechanism. 1,901,713; Mar. 14.

Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Clutch mechanism. 1,901,714; Mar. 14.

Vincent, Sidney C., assignor to The Automatic Lighting Company, Baltimore, Md. Reflector unit for signs. 1,901,341; Mar. 14.

Vivid, Incorporated. (See Flanigan, John J., assignor.)

Vogelman, Philip A., assignor to William Wilhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,472; Mar. 14.

Voigt & Haeffner A. G. (See Cippitelli, Cesare, assignor.)

Vollmann, Heinrich, et al. (See Kraenzlein, G., Vollmann, and Corell.)

Von Allmen, Samuel, assignor to Chemical Works, formerly Sandoz, Basel, Switzerland. Preparation of new dyestuffs of the anthraquinone series. 1,901,048; Mar. 14.

Von der Horst, Frederick, assignor to The Tribune Company, Chicago, Ill. Roll handling device. 1,901,482; Mar. 14.

Von Heinrich, Friedrich, assignor of one-half to National Bank of Hungary, Budapest, Hungary. Production of genuine watermark papers without using relief molds. 1,901,049; Mar. 14.

Voogt, George, Hamburg, Germany, assignor to Shell Development Company, San Francisco, Calif. Recovering the oil-soluble sulphonic compounds formed in the acid refining of mineral oils. 1,901,383; Mar. 14.

Voorhees, John S., Derby, Conn. Reeling means. 1,901,050; Mar. 14.

Wagenhorst, James H., Detroit, Mich. Cabinet for arc lamps. 1,901,384; Mar. 14.

Wagner, Charles F., Swissvale, and L. R. Golladay, East Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. Transmission-line device. 1,901,572; Mar. 14.

Wagner Electric Corporation. (See Brunner, Albert, assignor.)

Wagner Electric Corporation. (See Dick, Burns, assignor.)

Wallace, Campbell. (See Nichols, Marion F., assignor.)

Wallis, George E., Evanston, assignor to The Creamery Package Mfg. Company, Chicago, Ill. Milk cooling and storing apparatus. 1,901,014; Mar. 14.

Walsh, Tom F. (See MacCourt, Walsh, and Rasmussen.)

Walter, Frederick B., Wabash, Ind. Refectory table. 1,901,015; Mar. 14.

Wansor, William B., Locust Valley, N. Y. Brush. 1,901,542; Mar. 14.

Wappler Electric Company. (See Mutscheller, Arthur, assignor.)

Ward, Patrick C., Homeville, Pa. Time limit relay. 1,901,617; Mar. 14.

Ware, John H., jr., Oxford, Pa. Display box. 1,901,488; Mar. 14.

Warnell Patents Limited. (See Warner, H. K., and Elliott, assignors.)

Warner, Archibald A., Dearborn, Mich. Vibration damper. 1,901,853; Mar. 14.

Warner, Horace K., and G. R. Elliott, assignors to Warnell Patents Limited, Auckland, New Zealand. Electric iron. 1,901,385; Mar. 14.

Warner & Swasey Company, The. (See Hudson, Thomas J., assignor.)

Warth, Albin H., Baltimore, Md., assignor to Crown Cork & Seal Company, Inc., New York, N. Y. Bottle closure. 1,900,963; Mar. 14.

Warth, Albin H., Baltimore, Md., assignor to Crown Cork & Seal Company, Inc., New York, N. Y. Bottle closure. 1,901,682; Mar. 14.

Watairway Manufacturing Corporation, The. (See Guidetti, F., and Bontempi, assignors.)

Waters, Harry H., and R. F. Gagg, Clinton, Iowa, assignor to Climax Engineering Company, Chicago, Ill. Internal combustion engine. 1,901,618; Mar. 14.

Weaton, George F., Beaver, Pa., assignor to St. Joseph Lead Company, New York, N. Y. Metallurgical condenser. 1,901,543; Mar. 14.

Weber, Matthias J., assignor to The Health-O-Meter Company, Chicago, Ill. Scale. 1,900,964; Mar. 14.

Wehr Motor Company, The. (See Haller, Harvey H., assignor.)

Weidman, John H., Marcellus, N. Y. Mechanical dishwasher. 1,901,683; Mar. 14.

Weinerth, George S., Reading, Pa. Controlling mechanism for full fashion textile machines. 1,901,422; Mar. 14.

Weisker, Ellis, New York, N. Y. Combined focusing screen and retaining member for sensitised material. 1,901,423; Mar. 14.

Weiss, Frank, Revere, Mass. Illuminated razor. 1,900,965; Mar. 14.

Wells, Merritt R., Cleveland Heights, Ohio, assignor, by mesne assignments, to The McKay Company, Pittsburgh, Pa. Electric welding machine. 1,901,211; Mar. 14.

Wells, Merritt R., Cleveland Heights, Ohio, assignor, by mesne assignments, to The McKay Company, Pittsburgh, Pa. Electric welding machine. 1,901,212; Mar. 14.

Wells, Merritt R., Cleveland Heights, Ohio, assignor, by mesne assignments, to The McKay Company, Pittsburgh, Pa. Making tire chains. 1,901,213; Mar. 14.

Welsford, William M., Meringur, Victoria, Australia. Traction wheel. 1,901,544; Mar. 14.

West, Ernst. (See West, Frederick J. and E.)

West, Frederick J. and E., assignors to West's Gas Improvement Company, Limited, Manchester, England. Coke discharger for retorts for the carbonization of coal and the like. 1,901,016; Mar. 14.

Western Electric Company. (See Bradley, Robert W., assignor.)

Western Electric Company, Incorporated. (See Peterson, Eugene, assignor.)

Western Union Telegraph Company. (See Haglund, Hakon H., assignor.)

Western Union Telegraph Company, The. (See Milnor, Joseph W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Ashbaugh, John H., assignor.)

Westinghouse Electric & Manufacturing Company. (See Barnholdt, Harold L., assignor.)

Westinghouse Electric & Manufacturing Company. (See Baxter, Harold G., assignor.)

Westinghouse Electric & Manufacturing Company. (See Brainard, Maurice W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Carlisle, R. W., and Nye, assignors.)

Westinghouse Electric & Manufacturing Company. (See Dunlop, James, assignor.)

Westinghouse Electric & Manufacturing Company. (See Ellington, William M., assignor.)

Westinghouse Electric & Manufacturing Company. (See Eschholz, Otto H., assignor.)

Westinghouse Electric & Manufacturing Company. (See Fuller, Bert F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Loewe, Siegmund, assignor.)

Westinghouse Electric & Manufacturing Company. (See Martin, George F., jr., assignor.)

Westinghouse Electric & Manufacturing Company. (See Matthews, George A., assignor.)

Westinghouse Electric & Manufacturing Company. (See McCarty, Roy A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Minkler, William A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Nottage, Stanley G., assignor.)

Westinghouse Electric & Manufacturing Company. (See Schenkel, Moritz, assignor.)

Westinghouse Electric & Manufacturing Company. (See Vaughan, Victor G., assignor.)

Westinghouse Electric & Manufacturing Company. (See Vedder, E. H., and Erickson, assignors.)

Westinghouse Electric & Manufacturing Company. (See Wagner, C. F., and Golladay, assignors.)

West's Gas Improvement Company. (See West, Frederick J. and E., assignors.)

Wettig, Theodore A. (See Meier, C., and Wettig.)

Whelan, James W., Washington, D. C. Toy windwheel. Des. 89,473; Mar. 14.

White, Charles H., and F. T. Court, assignors to Deere & Company, Moline, Ill. Cultivator. 1,901,684; Mar. 14.

White, Ellis E., assignor to Pneumatic Tire Inflating Devices Corporation, Los Angeles, Calif. Automatic tire inflator for vehicles. 1,901,017; Mar. 14.

White, Ernest A., Belton, Tex. Internal combustion rotary motor. 1,901,787; Mar. 14.

White, Franklin R., assignor to The Patent Button Company, Waterbury, Conn. Button attaching machine. 1,901,886; Mar. 14.

Whitehead & Kales Company. (See Judd, Irving H., assignor.)

Whiting, Max A., Schenectady, N. Y., assignor to General Electric Company. Control system. 1,901,685; Mar. 14.

Wicks, John, Oak Park, assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Multioffice telephone system. 1,901,068; Mar. 14.

Wiedemann, Karl, Leverkusen-I. G. Werk, and H. Clingestein, Cologne-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Asodyestuffs. 1,901,387; Mar. 14.

Wilcox, William D., Lawrence, Kans. Dissociating hydrocarbon gases and vapors to produce a mixture of nitrogen and hydrogen in determined proportions. 1,901,136; Mar. 14.

Wiley, Merlin. (See Ramage, Alexander S., assignor.)

Wiley, Roger F., Denver, Colo., assignor to Plibrico Jointless Firebrick Company, Chicago, Ill. Lining anchoring means. 1,901,424; Mar. 14.
Willems, Edgar, Chenes-Bougeries, Geneva, Switzerland. Movable key device for musical instruments having keys. 1,901,214; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,458; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,474; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,475; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,476; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,477; Mar. 14.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,478; Mar. 14.
Willheim, William, Co. (See Guhl, Maclyn, assignor.)
Willheim, William, Co. (See Hellman, Carl R., assignor.)
Willheim, William, Co. (See Vogelman, Philip A., assignor.)
William Hall & Company Limited. (See Fawcett, John R., assignor.)
Williams, Francis C., Detroit, Mich. Speed reduction transmission and adjustable bearings therefor. 1,901,619; Mar. 14.
Williams, Harrison R., New York, N. Y. Paper-marking machine. 1,901,425; Mar. 14.
Williams, Harry S., assignor to W. A. Bryans, Denver, Colo. Collapsible fountain syringe. 1,901,069; Mar. 14.
Williams, Robert T., Quincy, Ill. Motor operated valve. 1,901,070; Mar. 14.
Willis, James M., Scotia, N. Y. Lawn trimmer. 1,901,788; Mar. 14.
Wilms, Gustav O., assignor, by mesne assignments, to Allen-Bradley Company, Milwaukee, Wis. Electric switch. 1,901,573; Mar. 14.
Wilson, Lyndon F., Chicago, Ill. Apparatus for conditioning boiler feed water. 1,901,215; Mar. 14.
Wilson, Lyndon F., Chicago, Ill. Feed water conditioner. 1,901,216; Mar. 14.
Wilson Products, Inc. (See Shindel, Harry F., assignor.)
Wimberley, Calvin H., New Braunfels, Tex. Rod. 1,901,789; Mar. 14.
Winograd, Harold, Collingwood, N. J., assignor, by mesne assignments, to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Rectifier cooling system control. 1,901,071; Mar. 14.
Winslow, Charles A., Vallejo, and E. J. Hall, Berkeley, Calif. Oil filter. 1,901,484; Mar. 14.
Winthrop Chemical Company, Inc. (See Dobmaier, Karl, assignor.)
Winthrop Chemical Company. (See Meerwein, Hans, assignor.)
Wired Radio, Inc. (See Crossley, Alfred, assignor.)
Wired Radio, Inc. (See Hund, August, assignor.)
Wired Radio, Inc. (See Scheibell, Gordon B., assignor.)
Wirt, Harry M., Spokane, Wash., assignor to March Construction Co. Tractor scoop structure. 1,901,485; Mar. 14.
Wirth, Louis E., Pittsburgh, Pa., assignor to Cotton Harvester Corporation of America. Cotton harvesting machine. 1,901,686; Mar. 14.
Witschge, Peter H. (See Sutton, G. C., and Witschge.)
Wolfe, Walter G., Greenwood, assignor to Wilmot R. Evans, trustee, Boston, Mass. Projection apparatus. 1,900,966; Mar. 14.
Wolff, Irving, Merchantville, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Method and apparatus for eliminating the effect of cabinet resonance. 1,901,388; Mar. 14.
Wolfram, Gerhard, Dessau, Germany. Portable work bench. 1,901,790; Mar. 14.
Wood, Frank S., Quincy, Mass. Safety paper. 1,900,967; Mar. 14.
Wood, John M., Carrollton, Ky. Boat. 1,901,545; Mar. 14.
Wood, Robert O., Hamburg, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Preparing dye paste for printing and dyeing. 1,901,275; Mar. 14.
Woodeson, William A., assignor to Clarke Chapman & Company, Limited, Gateshead-on-Tyne, England. Removing dust such as from plant fired by pulverulent fuel. 1,901,791; Mar. 14.
Woods, Carl F., et al. (See Sleeper, Myron O., assignor.)
Wood's, T. B., Sons Company. (See Homer, John W., assignor.)
Woods, William J., Schenectady, N. Y., assignor to General Electric Company. Hydraulic operator. 1,901,620; Mar. 14.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,900,968; Mar. 14.
Worrall, Arthur G., assignor to L. J. Kolb, Philadelphia, Pa. Making laminated glass. 1,901,574; Mar. 14.
Wright, Esmond P. G., Aldwych, London, England, assignor to International Standard Electric Corporation, New York, N. Y. Automatic or semiautomatic telephone exchange system. 1,900,969; Mar. 14.
Wurster, Carl, Ludwigshafen-on-the-Rhine, and M. Gruber, Mannheim assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Pure anhydrous aluminium chloride. 1,901,486; Mar. 14.
Yerkes, John A., and R. H. Lemmon, Long Beach, Calif. Inserted guide and bumper for blind cages. 1,901,217; Mar. 14.
Young, John, Welland, Ontario, Canada. Arc furnace control apparatus. 1,901,426; Mar. 14.
Young, Wilson T., Oakmont, Pa., assignor to The Farrell Company. Coin counting and wrapping machine. 1,901,715; Mar. 14.
Zenith Heater Company. (See Sorensen, John T., assignor.)
Zimmer Manufacturing Company. (See Ettinger, Joe J., assignor.)
Zimmermann, Georg, Mannheim-Rheinau, Germany, assignor to Prodorite S. A., Geneva, Switzerland. Bituminous and like compositions. 1,901,792; Mar. 14.
Zook, Dott E., Chicago, Ill. Machine for measuring body volume. 1,901,687; Mar. 14.
Zwerina, Rudolf. (See Stolfa, H., and Zwerina.)

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrading and polishing machine, Portable. T. F. Brackett. 1,901,627; Mar. 14.
Abrasive body and making the same. E. E. Novotny. 1,901,324-5; Mar. 14.
Acid, Amides of d-gluconic. R. Pasternack and C. P. Ammerman. 1,901,565; Mar. 14.
Acid ester, Hydrogenating abietic. R. J. Byrkit, jr. 1,901,630; Mar. 14.
Acid esters, Phosphoric. H. Bertsch. 1,900,973; Mar. 14.
Acoustic corrective material. C. K. Roos. 1,901,057; Mar. 14.
Aerial. C. S. Franklin. 1,901,025; Mar. 14.
Aggregate spreader and truck body. F. B. Hurt. 1,901,297; Mar. 14.
Agricultural machine. J. W. Tapp. 1,901,539; Mar. 14.
Air controlling means for carburetors. W. A. Heide. 1,901,810; Mar. 14.
Aircraft. S. Cotroumpas. 1,901,784; Mar. 14.
Aircraft, Rotary-winged. P. H. Stanley. 1,901,132; Mar. 14.
Air, Liquefying and rectifying. M. Hasard-Flamand. 1,901,389; Mar. 14.
Airplane landing gear. G. M. Bellanca. 1,901,795; Mar. 14.
Airplane landing wheel. A. G. Maranville. 1,901,759; Mar. 14.
Airship. O. A. Havill. 1,901,809; Mar. 14.
Alloys and products resulting therefrom, Treatment of magnetic. C. G. Bieber. 1,901,018; Mar. 14.
Aluminium chloride, Pure anhydrous. C. Wurster. 1,901,486; Mar. 14.
Amplifier, Cascade. A. Hund. 1,901,558; Mar. 14.
Anchor, Expansion joint. J. C. Bartholet. 1,900,895; Mar. 14.
Angle detector. W. D. Allen. 1,901,793; Mar. 14.
Animal trap. J. S. Vickers. 1,901,210; Mar. 14.
Antenna. O. Schmidt. 1,901,060; Mar. 14.
Antifreezing solution. R. Masuda. 1,901,111; Mar. 14.
Antifriction bearing. G. R. Bott. 1,901,580; Mar. 14.
Antiglare device for automobiles. J. P. Tedford. 1,901,011; Mar. 14.
Antiskid device. F. Lloyd. 1,901,311; Mar. 14.
Apertures in hollow bodies, Forming and reenforcing flanged. J. H. Taylor. 1,901,201; Mar. 14.
Applicator for treating surfaces. C. F. and E. J. Seibert. 1,901,825-6; Mar. 14.
Arc interrupter. R. R. Pittman. 1,901,609; Mar. 14.
Arch support. J. G. Mitchie. 1,901,353; Mar. 14.
Article handling device. O. F. Presbrey. 1,901,566; Mar. 14.
Atomizer. T. J. Fulton. 1,901,806; Mar. 14.
Atomizer. F. A. Schneider. 1,901,415; Mar. 14.
Automobile body. A. E. Northrup. Des. 89,445; Mar. 14.
Automobile extractor. S. K. Ramos. 1,901,261; Mar. 14.
Automobile jack. L. E. Pryor. 1,901,332; Mar. 14.
Azodyestuffs. K. Wiedemann and H. Clingestein. 1,901,357; Mar. 14.
Azodyestuffs and making same, Black. R. Fleischhauer and C. Schultis. 1,901,390; Mar. 14.
Azodyestuffs, Diarylsulphone. W. Hentrich, A. Ossenbeck, and E. Tietze. 1,901,515; Mar. 14.
Bag and making the same. H. L. Fischer. 1,901,858; Mar. 14.
Bag filling apparatus. H. A. Buxton. 1,900,907; Mar. 14.
Bank, Registering. O. C. Hoffman. 1,901,030; Mar. 14.
Banner, Aerial. M. S. Du Pont. 1,901,855; Mar. 14.
Bar: *See*—
Confection bar.
Base construction, Swivel. W. A. Rankin. 1,901,120; Mar. 14.
Bathroom fixture. J. E. Bruckenmiller. 1,901,151; Mar. 14.
Battery. R. Eckstein. 1,901,588; Mar. 14.
Battery construction, Coordinated. L. G. Tatro. 1,901,272; Mar. 14.
Bearing: *See*—
Antifriction bearing. Side bearing.
Bearings, Making lined. E. P. Kerruish. 1,900,938; Mar. 14.
Bed, Hospital. J. J. Ettinger. 1,901,841; Mar. 14.
Belt tightener. J. W. Homer. 1,901,557; Mar. 14.
Belts, Manufacturing. A. L. Freedlander. 1,901,442; Mar. 14.
Bench, Portable work. G. Wolfram. 1,901,790; Mar. 14.
Bending apparatus. F. H. Meyer. 1,901,762; Mar. 14.
Bensanthrone, Purifying. W. Becker. 1,900,972; Mar. 14.
Billboard construction. E. G. Burket. 1,901,282; Mar. 14.
Bit: *See*—
Drill bit.
Bit control, Rotary well drilling. J. H. Hollestelle. 1,900,932; Mar. 14.
Bituminous and like compositions. G. Zimmermann. 1,901,792; Mar. 14.
Blade clip. H. J. Gaisman. 1,901,880; Mar. 14.
Blade ring structure, Manufacturing. W. J. Delles. 1,901,704; Mar. 14.
Block: *See*—
Snatch block.
Block structure for electric fixtures, Reenforced. J. G. Jackson. 1,901,165; Mar. 14.
Board: *See*—
Fuse panel board.
Boat. J. M. Wood. 1,901,545; Mar. 14.
Boat hoist. W. I. Bowden. 1,900,905; Mar. 14.
Boat, Speed. F. J. and H. H. Raulerson. 1,901,357; Mar. 14.
Bobbin and bobbin clutching spindle. W. I. Stimpson. 1,901,538; Mar. 14.
Body for automobiles, Inclosed. G. N. Hein. 1,901,289; Mar. 14.
Boiler: *See*—
Sectional boiler.
Boiler. B. M. Brooks. 1,901,730; Mar. 14.
Boiler cleaner. F. W. Linaker. 1,901,604; Mar. 14.
Boiler structure, Steam. J. E. Muhlfeld. 1,901,465; Mar. 14.
Bookkeeping machine. J. G. Dunker. 1,901,153; Mar. 14.
Book, pad, and tablet, and line ruler therefor. P. H. Kaufmann. 1,901,246; Mar. 14.
Book sectioner. G. Baker. 1,901,137; Mar. 14.
Bottle closure. A. H. Warth. 1,900,963; Mar. 14.
Bottle closure. A. H. Warth. 1,901,682; Mar. 14.
Bottle handling machine. J. Hauk. 1,901,596; Mar. 14.
Bottle filling machine. A. R. Reynolds. 1,901,835; Mar. 14.
Bottle receiving and coin dispensing device. H. Olsen. 1,901,528; Mar. 14.
Box: *See*—
Display box. Dummy display box.
Box and bottle, Combination lunch. C. S. Redfield. 1,901,534; Mar. 14.
Box and display, Cigarette. E. Suez. 1,901,784; Mar. 14.
Bracelet. W. Reiss. Des. 89,450; Mar. 14.
Brake: *See*—
Sled brake.
Brake. V. Bendix. 1,901,695; Mar. 14.
Brake. L. E. La Brie. 1,901,657; Mar. 14.
Brake. J. P. Mahoney. 1,901,662; Mar. 14.
Brake. H. W. Poehlman. 1,901,668; Mar. 14.
Brake and gas collector, Muzzle. G. M. Barnes. 1,901,138; Mar. 14.
Brake band apparatus. E. F. Puls. 1,901,774; Mar. 14.
Brake beam adjuster and release device. S. A. Crone. 1,901,437; Mar. 14.
Brake block and means of attaching. A. V. Bedine. 1,901,696; Mar. 14.
Brake mechanism. J. G. Blunt. 1,901,019; Mar. 14.
Brake throw measuring device. L. L. Graham. 1,901,292; Mar. 14.
Bread and the like for wrapping, Preparation of. W. Muller. 1,901,115; Mar. 14.
Break disconnecting switch, Horizontal. A. Alsaker, W. O. Hampton, and C. A. Koerner. 1,901,688; Mar. 14.
Breathing apparatus. J. L. Belcher. 1,901,219; Mar. 14.
Bridge, Drop cord and canopy supporting. J. B. Glowacki. 1,901,233; Mar. 14.
Bridge, Fixture. J. B. Glowacki. 1,901,235; Mar. 14.
Broaching machine. W. Ferris. 1,901,500; Mar. 14.
Brom-isatin, Preparing. C. J. Stroeacker, C. C. Kennedy, and E. L. Pelton. 1,901,615; Mar. 14.
Brush. G. B. Aufmesser. Des. 89,433; Mar. 14.
Brush. G. B. Aufmesser. Des. 89,461; Mar. 14.
Brush. M. C. Barton. 1,901,129; Mar. 14.
Brush. W. B. Wansor. 1,901,542; Mar. 14.
Brush, Fountain. G. Reisinger. 1,901,822; Mar. 14.
Brush, Rotary. R. A. Fessenden. 1,901,503; Mar. 14.
Bucket, Mechanically-operated. V. S. Firestone. 1,901,555; Mar. 14.
Buffer. D. Roe. 1,901,877; Mar. 14.
Built-in table. D. A. Hildebrand. 1,901,847; Mar. 14.
Bumper. G. W. Veale. 1,901,540; Mar. 14.
Bumper, Vehicle. F. M. Cossaiter. 1,901,227; Mar. 14.
Bumper with cushioned ends. H. S. Jandus and H. L. Brooks. 1,901,601; Mar. 14.
Burner: *See*—
Gas burner. Oil burner.
Liquid fuel burner.
Burner. A. W. Richardson. 1,900,996; Mar. 14.
Burner for heavy oil. D. Pinsl. 1,901,610; Mar. 14.

Bus with superimposed seats, Single deck. E. A. Corbin. 1,901,023; Mar. 14.
Button attaching machine. F. H. Peterson. 1,901,375; Mar. 14.
Button attaching machine. F. R. White. 1,901,386; Mar. 14.
Cabinet, Combination tray heating and refrigerating. C. G. Hall. 1,901,509; Mar. 14.
Cabinet for arc lamps. J. H. Wagenhorst. 1,901,384; Mar. 14.
Cabinet for shears, Shipping and display. J. J. Conway. 1,901,583; Mar. 14.
Cable, Continuously loaded telegraph. J. R. Vezey. 1,900,962; Mar. 14.
Cable take-up device, Slack. J. Dunlop. 1,901,635; Mar. 14.
Cable terminator. J. C. Rah. 1,901,667; Mar. 14.
Cable terminator cap assembly. J. Rah. 1,901,666; Mar. 14.
Cable terminator provided with means for insulating ends of cable sheaths. J. Rah. 1,901,669; Mar. 14.
Cables equipped with a long sea-earth, Balancing. J. W. Milnor. 1,901,318; Mar. 14.
Calculating machine. J. G. Dunker. 1,901,152; Mar. 14.
Calculating machine. H. Landsiedel. 1,901,372; Mar. 14.
Camphene, Preparing. C. O. Henke and G. Etsel. 1,901,746; Mar. 14.
Can: *See*—
Liquid dispensing can.
Can covering apparatus. J. Hauk. 1,901,594; Mar. 14.
Can testing machine. W. Dieter. 1,900,918; Mar. 14.
Can washing machine. J. Hauk. 1,901,595; Mar. 14.
Candle light, Pick-up. G. C. Fullmer. 1,901,589; Mar. 14.
Canopy switch. S. L. Snelerson and E. B. Gale. 1,901,337; Mar. 14.
Cap, Blasting. J. Piccard. 1,901,469; Mar. 14.
Car, Dump. R. E. Powers. 1,901,260; Mar. 14.
Car, Railway. E. R. Swanson. 1,901,008–9; Mar. 14.
Cars, Apparatus for precooling refrigerator. F. E. Greene. 1,901,505; Mar. 14.
Carbon disulphide soluble in water, Rendering. K. Döbmaier. 1,900,981; Mar. 14.
Carbon from tubes, Removing. W. T. Davis and C. E. Rhein. 1,901,804; Mar. 14.
Carbonaceous material, Distillation of solid. L. C. Karrick. 1,901,169; Mar. 14.
Carburetor. O. H. Ensign. Re18,767; Mar. 14.
Carburetor. H. V. McCarty. 1,901,564; Mar. 14.
Card, Display. L. A. Phillips. 1,901,188; Mar. 14.
Carnation. A. F. J. Baur. Pl. Pat. 56; Mar. 14.
Carpet or rug, Reversible tuft-pile. W. B. Cooper and E. T. Phoenix. 1,901,840; Mar. 14.
Carriage return mechanism. O. J. Sundstrand. 1,901,135; Mar. 14.
Carrier: *See*—
Egg case carrier. Package carrier.
Carrier and lock, Spare wheel. F. A. Smith. 1,901,613; Mar. 14.
Carrier for ovens, furnaces, or the like. E. T. Bennington. 1,900,908; Mar. 14.
Carton. W. S. Kinkead. 1,901,036; Mar. 14.
Carton, Folding. H. K. Powell and A. G. Ballenberg. 1,901,532; Mar. 14.
Cash register. F. L. Fuller. 1,901,093; Mar. 14.
Cash register. C. W. Green. 1,901,097; Mar. 14.
Cash register. B. M. Shipley. 1,901,064; Mar. 14.
Casing for tubing machines, Gear. V. Royle. 1,901,569; Mar. 14.
Casing or frame and bracket for light reflector signal, Combined. H. C. Reichhardt. Des. 89,468; Mar. 14.
Catch, Locking. B. G. Buss. 1,901,021; Mar. 14.
Cellulose organic derivative composition of matter containing BB'-dialkoxy diethyl adipate. H. B. Smith. 1,901,130; Mar. 14.
Centerless grinding or polishing machine. R. W. Fuller. 1,900,984; Mar. 14.
Centrifugal separator machine. H. O. Lindgren. 1,901,461; Mar. 14.
Chain connecting link. E. G. Carlson. 1,901,345; Mar. 14.
Chains, Making tire. M. R. Wells. 1,901,213; Mar. 14.
Charge forming apparatus for internal combustion engines. A. Moore. 1,901,848; Mar. 14.
Charges for internal combustion engines, Supplying and mixing. A. Moore. 1,901,847; Mar. 14.
Chart, Educational. E. G. Martin. Des. 89,467; Mar. 14.
Chill ring, Removable. D. G. Dawkins. 1,901,634; Mar. 14.
Chlorinating apparatus. W. Moschel. 1,901,524; Mar. 14.
Chuck. T. J. Hudson. 1,900,034; Mar. 14.
Chuck for nut tapping machines. S. Barber. 1,901,579; Mar. 14.
Circuit, Bilateral modulator. E. Peterson. 1,901,408; Mar. 14.
Circuit breaker. H. G. Baxter. 1,901,692; Mar. 14.
Circuit breaker control system. H. V. Nye. 1,901,406; Mar. 14.
Circuit breaker, Gas blast. W. Uebermuth. 1,901,679; Mar. 14.
Circuit breaker, Vacuum. O. H. Eschholz. 1,901,630; Mar. 14.
Circuit interrupter. G. A. Burnham. 1,901,363; Mar. 14.
Circuit interrupter. Reclosing. F. W. Harris. 1,901,512 Mar. 14.
Circuit protective system, Electric. L. M. Applegate. 1,901,488; Mar. 14.
Circuits, Phase shifting. B. D. Bedford. 1,901,694; Mar. 14.
Clamp: *See*—
270° clamp.
Clamp and support for flash-lights. F. R. Meginniss. 1,901,253; Mar. 14.
Clamp for pressure cooking vessels, Cover. F. W. Burpee. 1,901,699; Mar. 14.
Clamping device. W. E. McClintock. 1,901,760; Mar. 14.
Clamping of flexible printing blocks or stereos on the form-cylinder of copper-plate or intaglio printing machines, Device for the. P. Gietz. 1,900,986; Mar. 14.
Cleaner: *See*—
Boiler cleaner. Tooth-cleaner.
Silk cleaner. Vacuum cleaner.
Cleaning device. L. W. Johnson. 1,901,518; Mar. 14.
Cleaning machine. W. T. Howald, E. H. Klingelfuss, and F. P. Kenny. 1,901,647; Mar. 14.
Clip: *See*—
Blade clip. Hair and wave clip.
Clock case. F. J. Abel. Des. 89,459–60; Mar. 14.
Closet attachment, Sanitary water. F. Guidetti and G. Bontempi. 1,901,160; Mar. 14.
Closure. A. H. Cipullo. 1,901,551; Mar. 14.
Closure device. J. W. Shera. 1,901,196; Mar. 14.
Closure for containers. A. J. Chamberlain. 1,901,581; Mar. 14.
Closure operating and locking device. P. R. Forman. 1,901,711; Mar. 14.
Clothes cleaning machine. E. G. Gettings. 1,900,927; Mar. 14.
Clutch control mechanism. J. Hauk. 1,901,597; Mar. 14.
Clutch control system, Automobile. E. H. Lange. 1,901,371; Mar. 14.
Clutch mechanism. J. G. Vincent. 1,901,714; Mar. 14.
Coal, Carbonizing. T. E. W. Schumann. 1,901,476; Mar. 14.
Coal feeder. G. S. Thompson. 1,901,203; Mar. 14.
Coating for buildings and making same. E. Poegel. 1,901,410; Mar. 14.
Coating material for casting molds. F. M. Poe. 1,901,409; Mar. 14.
Cock, Ball. H. D. Clemmons. 1,901,633; Mar. 14.
Cock, Bellows checked cylinder. M. R. Feeley and C. Stern. 1,901,740; Mar. 14.
Cock, Bellows operated safety cylinder. M. R. Feeley and C. Stern. 1,901,805; Mar. 14.
Coffee maker, Drip. K. E. Porter. 1,901,611; Mar. 14.
Coil, Multiple heat exchange. M. Eule and E. Anders. 1,901,090; Mar. 14.
Coil, storage tank, and cooling the water in the tank, Cooling. C. T. Morse and E. L. Hogan. 1,901,664; Mar. 14.
Coin counting and wrapping machine. W. T. Young. 1,901,715; Mar. 14.
Coin exchanging mechanism. W. F. Newall. 1,901,323; Mar. 14.
Coin handling machine. H. Olsen. 1,901,529; Mar. 14.
Coke discharger for retorts for the carbonization of coal and the like. F. J. and E. West. 1,901,016; Mar. 14.
Combination washer. C. Forberg. 1,901,391; Mar. 14.
Compensating let-off mechanism. H. G. Robinson. 1,900,952; Mar. 14.
Composition and the production thereof. P. C. Christensen. 1,901,145; Mar. 14.
Composition for molding investment inlays. M. C. Dailey. 1,901,052; Mar. 14.
Composition of matter containing phenyl stearate, Cellulosic. H. B. Smith and S. J. Carroll. 1,901,129; Mar. 14.
Compound film gate. L. S. Frappier and E. Boecking. 1,900,925; Mar. 14.
Compressor. G. Neidl. 1,901,817; Mar. 14.
Compressor and valve therefor. G. C. Sutton and P. H. Witschge. 1,901,478; Mar. 14.
Concrete mixing and distributing apparatus. J. E. Bushneil and J. C. Lukachovic. Re18,764; Mar. 14.
Condenser: *See*—
Metallurgical condenser.
Condenser control apparatus. F. L. Kallam. 1,901,104; Mar. 14.
Conductor support. S. S. Matthes. 1,901,401; Mar. 14.
Conductor system, Concentric. A. Carpe and F. A. Leibe. 1,900,976; Mar. 14.
Conductors, Manufacture of loaded electric signaling. W. S. Smith, H. J. Garnett, and J. N. Dean. 1,901,005; Mar. 14.
Confection bar, Ice cream. B. R. J. Hassell. 1,901,894; Mar. 14.
Connecter: *See*—
Ground connecter. Helical connecter.
Connecter. T. F. Johnson. 1,900,990; Mar. 14.
Connecter for cable terminators, Flexible. J. Rah. 1,901,665; Mar. 14.
Connection, Joint. M. G. Giordano. 1,901,026; Mar. 14.
Contact device. C. Cippitelli. 1,900,977; Mar. 14.
Container: *See*—
Shipping container.
Container. C. G. Fitzhugh. 1,901,742; Mar. 14.

Container and roller of cigarettes. J. G. Portteus. 1,901,259; Mar. 14.
Container for powder, Nonrefillable. L. Kahn. 1,901,651; Mar. 14.
Containers, Leading-in device for metallic vacuum-discharge. W. Dallenbach. 1,901,802; Mar. 14.
Control system. W. A. Minkler. 1,901,683; Mar. 14.
Control system. S. G. Nottage. 1,901,608; Mar. 14.
Control system. M. A. Whiting. 1,901,685; Mar. 14.
Controlling means for electric lighting installation of railway cars. F. Trinchero. 1,901,274; Mar. 14.
Conveyer system. H. E. Twomley. 1,901,066; Mar. 14.
Conveyer system and apparatus therefor, Rotary. K. T. Potthoff. 1,901,471; Mar. 14.
Conveyer, Trolley. S. Shafer, jr. 1,901,850; Mar. 14.
Cooking device, Automatic. V. G. Vaughan. 1,901,616; Mar. 14.
Copper oxide rectifier. G. F. Martin, jr. 1,901,563; Mar. 14.
Core laminæ, Making. J. C. Daley. 1,901,584; Mar. 14.
Corn harvesting machine. H. D. Fisk. 1,901,092; Mar. 14.
Cotton harvesting machine. L. E. Wirth. 1,901,686; Mar. 14.
Cotton, Modified. C. F. Goldthwait. 1,901,095; Mar. 14.
Counting and bunching device. W. E. Sharkey. 1,901,062; Mar. 14.
Coupler for glass supporting tables. L. L. Handy. 1,901,511; Mar. 14.
Coupling: *See*—
Free-wheel coupling. Rod coupling.
Coupling. F. S. Barks. 1,900,902; Mar. 14.
Coupling device. P. C. Gordon. 1,901,843; Mar. 14.
Coupling for steam and other pressure fluid supply circuits, Rotary. G. H. Davies. 1,900,899; Mar. 14.
Cover for use in testing vehicle wheels for misalignment. G. H. Taber. 1,901,786; Mar. 14.
Covering such as linoleum, Surface. C. F. Humphreys. 1,901,559; Mar. 14.
Crank shaft. A. Lack. 1,901,175; Mar. 14.
Crank shaft. E. A. Ryder. 1,901,358; Mar. 14.
Crossing gate, Balanced railroad. G. Varchetta. 1,901,680; Mar. 14.
Cultivator. C. H. White and F. T. Court. 1,901,684; Mar. 14.
Current rectifying element, Alternating. J. G. H. Liebel. 1,901,756; Mar. 14.
Current tapping device, Electric. R. Eckstein. 1,901,587; Mar. 14.
Curtain and shade fixture. M. Bell. 1,901,796; Mar. 14.
Cuspidor, Fountain. C. W. Moore. 1,901,319; Mar. 14.
Cutter: *See*—
Paper cutter.
Cutter mechanism for corn harvesters. S. H. Hale. 1,901,099; Mar. 14.
Cutting and ornamenting die. A. W. Altvater. 1,901,575; Mar. 14.
Cutting mechanism. A. Messer. 1,901,254; Mar. 14.
Cylinder, Air-cooled. E. Becker. 1,901,603; Mar. 14.
Cylinder port control. O. H. Spencer. 1,901,198; Mar. 14.
Cystoscope and the like. L. Buerger. 1,901,731; Mar. 14.
Damper. J. C. F. Schafer and J. F. Bieser. 1,901,125; Mar. 14.
Damper construction, Fireplace. J. Koberling. 1,901,753; Mar. 14.
Damper, Vibration. A. A. Warner. 1,901,853; Mar. 14.
Delivery mechanism for nut tappers. W. L. Clouse. 1,901,146; Mar. 14.
Dental investment composition. M. C. Dailey. 1,901,053; Mar. 14.
Dental model stone composition. M. C. Dailey. 1,901,054; Mar. 14.
Dial for timepieces. M. Brunswig. Des. 89,434; Mar. 14.
Dial operator. J. F. Currivan. 1,900,916; Mar. 14.
Diaphragm. R. W. Carlisle and R. W. Nye. 1,901,631; Mar. 14.
Die: *See*—
Cutting and ornamenting die.
Direction signal. A. L. Johnson. 1,901,395; Mar. 14.
Dirigible-airplane. H. L. Kuhn. 1,901,173; Mar. 14.
Discharge tube, Electric glow. G. Seibt. 1,901,004; Mar. 14.
Dishwasher, Mechanical. J. H. Weidman. 1,901,683; Mar. 14.
Disk clutch, Adjustable. M. Goldschmidt. 1,901,856; Mar. 14.
Disks, Making cold rolled. G. L. Kelley and E. G. Budd. 1,901,035; Mar. 14.
Dispenser. P. H. Horwitt. 1,901,243; Mar. 14.
Dispenser or meter, Fluid. D. Kapuczin. 1,901,348; Mar. 14.
Dispensing apparatus, Coin controlled. H. J. Halsted and N. R. Briggs. 1,900,989; Mar. 14.
Dispensing device. E. Alexander. 1,901,487; Mar. 14.
Dispensing receptacle, Paper. C. W. Spain. 1,901,006; Mar. 14.
Display box. J. H. Ware, jr. 1,901,483; Mar. 14.
Display device. W. O. Allen. 1,901,717; Mar. 14.
Display device, Reflective. W. D. MacCourt, T. F. Walsh, and F. H. Rasmussen. 1,901,661; Mar. 14.
Display screen, Portable. B. McCandless. 1,901,182; Mar. 14.
Display stand. S. Gordon. Des. 89,463; Mar. 14.

Door hanger. F. B. Howard. 1,901,648; Mar. 14.
Doorlock actuating mechanism. C. J. Ulrich. 1,901,541; Mar. 14.
Doorlock, Electric. F. Beal. 1,901,721; Mar. 14.
Doorlocking system, Automobile. F. Beal. 1,901,548; Mar. 14.
Doors, Attachment for. H. F. Keil. 1,901,303; Mar. 14.
Drill bit. G. G. Harrington. 1,901,643; Mar. 14.
Drill holes, Apparatus for surveying. H. Regats. 1,901,567; Mar. 14.
Drill stem and drill pipe, Apparatus for guiding and steadying. W. H. Endsley. 1,900,921; Mar. 14.
Drinking fountain. W. H. Schulte. 1,901,646; Mar. 14.
Drive and guide in four wheels, combined with triple differential and brake in one unit, Motor vehicle differential gear. P. P. Adams. 1,901,276; Mar. 14.
Drive construction, Four-wheel vehicle. A. R. Le Moon. 1,901,809; Mar. 14.
Drive shaft and pinion assembly puller. J. W. Crumpacker. 1,901,736; Mar. 14.
Driving mechanism. F. D. Stanley. 1,901,270; Mar. 14.
Driving mechanism for valves and other devices. C. W. Kuhn. 1,901,397; Mar. 14.
Drop cord protector. J. B. Glowacki. 1,901,282; Mar. 14.
Drop testing machine. R. B. Lewis. 1,901,460; Mar. 14.
Drum-grinding machine. W. J. Andres. 1,901,690; Mar. 14.
Drum head tightener. S. H. Newberry. 1,901,765; Mar. 14.
Drying device. J. G. Olsson and F. I. E. Stenfors. 1,901,326; Mar. 14.
Dual wheel. F. W. Burger. 1,901,629; Mar. 14.
Dummy display box. F. A. Marx. 1,901,851; Mar. 14.
Duplex equalizing apparatus. C. B. Coates. 1,901,496; Mar. 14.
Duplicating machine. J. J. Flanigan. 1,901,440; Mar. 14.
Dust collector. E. Robideau. 1,901,362; Mar. 14.
Dust separating and collecting device. M. H. Kuhner. 1,901,370; Mar. 14.
Dust such as from plant fired by pulverulent fuel, Removing. W. A. Woodeson. 1,901,791; Mar. 14.
Dye paste for printing and dyeing, Preparing. E. O. Wood. 1,901,275; Mar. 14.
Dyestuffs and of intermediate products relating thereto, Manufacture of vat. A. Davidson and A. Shepherdson. 1,901,288; Mar. 14.
Dyestuffs of the anthraquinone series, Preparation of new. S. von Allmen. 1,901,048; Mar. 14.
Dyestuffs of the isodibenzanthrone series and making them, Vat. M. A. Kunz and K. Koeberle. 1,901,806; Mar. 14.
Dyestuffs of the 3.4.3.9.- and 4.5.8.9.-dibenzpyrenequinone series and preparing them. G. Kraenzlein, H. Vollmann, and M. Corell. 1,901,307; Mar. 14.
Dyestuffs, Secondary diazo. J. Baddiley and J. Hill. 1,901,278; Mar. 14.
Edible substances, Heat treating. F. D. Chapman. 1,901,085; Mar. 14.
Edging apparatus. H. J. Hamann. 1,901,510; Mar. 14.
Egg case carrier. L. L. Amspacker. 1,901,277; Mar. 14.
Ejector. R. Black. 1,901,797; Mar. 14.
Electric crystal system, Pieso-. A. Crossley. 1,901,735; Mar. 14.
Electric discharge device. D. Lely. 1,901,037; Mar. 14.
Electric furnace. F. A. Fahrenwald. 1,901,499; Mar. 14.
Electric generating system, Constant current variable voltage. G. Austin, J. C. and W. A. Macfarlane. 1,901,218; Mar. 14.
Electric heater. D. S. Marshall. 1,901,035; Mar. 14.
Electric illuminating apparatus, Portable. L. O. Brown. 1,900,906; Mar. 14.
Electric instrument. M. Eastham. 1,901,343; Mar. 14.
Electric machine, Dynamo-. R. N. Early. 1,901,366; Mar. 14.
Electric switch. L. Haag. 1,900,929; Mar. 14.
Electric switch. L. A. Kempton. 1,901,658; Mar. 14.
Electric switch. G. M. Mortenson. 1,901,320; Mar. 14.
Electric switch. F. Riebel, jr., and D. M. Dow. 1,901,671; Mar. 14.
Electric switch. G. O. Wilms. 1,901,573; Mar. 14.
Electric welding machine. M. R. Wells. 1,901,211–12; Mar. 14.
Electrical control system. A. J. Sorensen. 1,901,047; Mar. 14.
Electrical controlling apparatus. M. B. Sleeper. 1,901,673; Mar. 14.
Electrical coupling device. J. P. Coleman. 1,900,918; Mar. 14.
Electrical distribution system. G. B. Scheibell. 1,901,689; Mar. 14.
Electrical measuring instrument. B. Sippean. 1,901,197; Mar. 14.
Electrical socket device. B. H. Pliske. 1,901,470; Mar. 14.
Electrical system of distribution. W. C. Brookhuyser. 1,901,828; Mar. 14.

Electrodes of thermionic tubes, Apparatus for mechanically mounting. W. Dalheimer. 1,901,087; Mar. 14.
Electrodes, Welding. E. H. Kuhlman. 1,900,941; Mar. 14.
Electromagnetic switch. D. A. Christian. 1,900,912; Mar. 14.
Elevator: *See*—
Sucker-rod elevator.
Emulsions, Treating. C. G. Hinrichs. 1,901,163; Mar. 14.
Engine: *See*—
Hoisting engine. Rotary engine.
Internal-combustion engine. Steam engine.
Engines, Driving internal combustion. R. Erren. 1,901,709; Mar. 14.
Engines, Fueling internal combustion. A. Moore. 1,901,849; Mar. 14.
Evaporation losses, Prevention of. H. V. Atwell. 1,901,576; Mar. 14.
Explosive composition. R. Schless. 1,901,126; Mar. 14.
Extractor: *See*—
Automobile extractor.
Fabric and making the same, Flexible wear-resisting sealing. E. H. Berger. 1,900,904; Mar. 14.
Fabric welding machine. W. S. Southwick. 1,901,477; Mar. 14.
Fabricated frame. R. A. McCarty. 1,901,315; Mar. 14.
Fastener: *See*—
Window fastener.
Fastener sliders, Forming separable. R. J. Poux. 1,901,189; Mar. 14.
Faucet. J. M. Travis. 1,901,479; Mar. 14.
Feed mixer. I. Edland. Re18,768; Mar. 14.
Feeder: *See*—
Coal feeder. Tile feeder.
Hog feeder.
Fibers, Treating artificial. H. C. Stuhlmann. 1,901,007; Mar. 14.
Fibrous compositions containing filler and binder substances and making them. E. P. Stevenson. 1,901,382; Mar. 14.
Filing device. J. H. Field. 1,901,365; Mar. 14.
Filing receptacle. G. H. Preddey. 1,901,533; Mar. 14.
Film printing machine. A. Heine and F. W. Dustmann. 1,901,645; Mar. 14.
Filter: *See*—
Oil filter.
Filtering material. W. C. Davidson. 1,901,438; Mar. 14.
Finish remover. T. F. Bradley. 1,901,728; Mar. 14.
Fins on tubes, Method and machine for rolling. R. K. Hopkins. 1,901,516; Mar. 14.
Fire, Animated imitation hearth. F. A. Gritt and F. Stewart. 1,901,294; Mar. 14.
Firecracker tube rolling machine. W. F. Gongaware. 1,900,928; Mar. 14.
Fireplace screen. A. H. Bailey. 1,901,073; Mar. 14.
Firing-device for demountable machine-guns. A. L. Ricordel. 1,900,999; Mar. 14.
Fish scaling device. C. Birdseye. 1,901,625; Mar. 14.
Fishing reel. J. R. Fawcett. 1,901,091; Mar. 14.
Fitting, Waste and overflow. E. A. Pope. 1,901,118; Mar. 14.
Fixture and canopy support. J. B. Glowacki. 1,901,234; Mar. 14.
Floor surfacing machine. J. J. Vicenzi. 1,901,681; Mar. 14.
Flooring, composition, and preparing, Mastic. H. K. Linsell. 1,901,055; Mar. 14.
Flooring, Method of and apparatus for bundling. E. C. Dittmar. 1,900,980; Mar. 14.
Flotation machine. J. P. Ruth, jr. 1,901,123; Mar. 14.
Fluid flow control device. F. L. Kallam. 1,901,032; Mar. 14.
Fluid injecting device. C. C. Corkran. 1,901,085; Mar. 14.
Fluid pressure motor. J. E. Rehor. 1,900,950; Mar. 14.
Flush valve. W. Putnam. 1,901,119; Mar. 14.
Foils, Production of. O. Schmidt. 1,901,045; Mar. 14.
Folding table. J. Kovats. 1,901,105; Mar. 14.
Folding table. J. Kovats. 1,901,106–7; Mar. 14.
Food, Producing animal. C. Schlotterbose. 1,901,264; Mar. 14.
Foot rest device. W. Moloney. 1,901,184; Mar. 14.
Form, Concrete. J. S. Frederick. 1,901,392; Mar. 14.
Fountain: *See*—
Drinking fountain.
Frame: *See*—
Fabricated frame. Tube frame.
Free-wheel coupling. H. H. V. Stanley and G. F. Clark. 1,900,957; Mar. 14.
Fruit pitting machine. F. Robbins. 1,901,042; Mar. 14.
Fruits, Apparatus for washing. R. R. Kennedy. 1,901,455; Mar. 14.
Fuel feed mechanism. H. T. Thomas. 1,901,835; Mar. 14.
Fuel injection device for internal combustion engines. H. Junkers. 1,901,814; Mar. 14.
Furnace: *See*—
Electric furnace. Open hearth furnace.
Gas-fired furnace.
Furnace construction. F. Provincial. 1,901,821; Mar. 14.
Furnace construction, Open hearth. K. C. McCutcheon. 1,900,942; Mar. 14.
Furnace control apparatus, Arc. J. Young. 1,901,426; Mar. 14.
Furnace wall, Sectional. D. S. Jacobus. 1,901,560; Mar. 14.
Furniture. A. Ernest. 1,901,638; Mar. 14.
Fuse panel board. J. G. Jackson. 1,901,164; Mar. 14.
Game board. W. R. Cluff. Des. 89,488; Mar. 14.
Game table, Folding. E. A. Clark. 1,901,782; Mar. 14.
Garment hanger. J. G. and L. A. Campbell. 1,900,908; Mar. 14.
Garment hanger. R. J. Rink. 1,901,777; Mar. 14.
Gas burner. W. D. Antrim. 1,901,716; Mar. 14.
Gas burner. F. J. Cox. 1,901,086; Mar. 14.
Gas-fired furnace. H. Petsch. 1,901,770; Mar. 14.
Gas making apparatus. C. I. Tenney. 1,900,961; Mar. 14.
Gas manufacture. J. B. Eberlein and G. R. Steere. 1,900,958; Mar. 14.
Gas manufacture. G. R. Steere. 1,900,959; Mar. 14.
Gas producer. A. L. Galusha. 1,901,807; Mar. 14.
Gaseous mixtures containing sulphur dioxide, Production of. M. Schroeder. 1,901,416; Mar. 14.
Gases and vapors to produce a mixture of nitrogen and hydrogen in determined proportions, Dissociating hydrocarbon. W. D. Wilcox. 1,901,136; Mar. 14.
Gases, Apparatus for preparing pressure. C. W. P. Heylandt. 1,901,447; Mar. 14.
Gases, Apparatus for transferring and storing liquefied. C. W. P. Heylandt. 1,901,445; Mar. 14.
Gases, Conserving liquefied. C. W. P. Heylandt. 1,901,446; Mar. 14.
Gate: *See*—
Compound film gate. Regulating and controlling gate.
Crossing gate.
Gate for motion picture machines. A. Dina. 1,900,920; Mar. 14.
Gate valve. D. J. Moran. 1,901,255; Mar. 14.
Gauge: *See*—
Grinding gauge.
Gauge. H. G. Jackson. 1,901,451; Mar. 14.
Gauge for sheet metal shears, Automatic. E. B. Hudson. 1,900,933; Mar. 14.
Gear: *See*—
Airplane landing gear.
Generator: *See*—
Multiple booster or multiple vibration generator. Oscillation generator.
Germicidal and detergent substances. A. R. Cade and H. O. Halvorson. 1,901,434; Mar. 14.
Glare eliminator for vehicle headlights. L. C. Rowley. 1,901,058; Mar. 14.
Glass machinery. T. S. Beeson. 1,901,491; Mar. 14.
Glass, Making laminated. A. G. Worrall. 1,901,574; Mar. 14.
Glass, Manufacture of wired. A. L. Forster. 1,901,743; Mar. 14.
Glass sheets, Apparatus for handling. R. J. Louviaux. 1,901,463; Mar. 14.
Goggle ventilator. H. F. Shindel. 1,900,955; Mar. 14.
Golf club. N. S. Main. 1,901,562; Mar. 14.
Governor. S. L. Kerr. 1,901,831; Mar. 14.
Grain and fertilizer distributor, Combined. B. P. Johnson. 1,901,301; Mar. 14.
Grain distributor, Double run force feed. B. P. Johnson. 1,901,300; Mar. 14.
Grate. O. S. Bowman. 1,901,698; Mar. 14.
Griddle. M. W. McArdle. 1,901,314; Mar. 14.
Grinding gauge, Circular chaser. W. J. Hogg. 1,901,242; Mar. 14.
Grinding machine. W. J. Guild. 1,901,236; Mar. 14.
Gripping face for chucks and making the same. L. R. Evans. 1,900,922; Mar. 14.
Ground connecter. G. L. Barnes and H. D. Chapman. 1,900,894; Mar. 14.
Guard for wood heel turning machines. W. J. Shaw. 1,901,063; Mar. 14.
Guard, Guy. T. Birkenmaier. 1,901,220; Mar. 14.
Guide and bumper for blind cages, Inserted. J. A. Yerkes and R. H. Lemmon. 1,901,217; Mar. 14.
Guide for saw blades in wood sawing. M. E. Pixley. 1,901,376; Mar. 14.
Gypsum and manufacturing same, High strength calcined. W. S. Randel and M. C. Dailey. 1,901,051; Mar. 14.
Hair and wave clip, Sliding. S. Allmena and W. Neumann. 1,900,970; Mar. 14.
Hair winding mechanism. G. E. Björkman. 1,901,430; Mar. 14.
Hammer, Power. L. Skeel and F. P. Miller. 1,901,779; Mar. 14.
Handle or similar article for an automotive vehicle, Outside door. E. S. Carlson. Des. 89,436; Mar. 14.
Handle or similar article for an automotive vehicle, Outside door. W. Schnell. Des. 89,452; Mar. 14.
Handle support. N. L. Jordon. 1,901,166; Mar. 14.
Handling cylindrical articles and the like, Apparatus for. K. F. Snow. 1,901,860; Mar. 14.
Hanger: *See*—
Door hanger. Picture hanger.
Garment hanger.
Harmonic analyzer. W. A. Marrison. 1,901,400; Mar. 14.
Hat brim trimming tool. J. Mosca. 1,901,764; Mar. 14.
Headlight for vehicles. J. Tourriol. 1,901,012; Mar. 14.
Heat-producing compound. L. Mann. 1,901,318; Mar. 14.

Heat transferrer for controlling solid CO_2 for refrigeration purposes. W. B. Robe. 1,901,000; Mar. 14.
Heater: *See*—

Loom stop-motions, Timing device for. E. C. Smith. 1,901,418; Mar. 14.
Looms for weaving tufted pile fabrics, Tuft yarn frame for. E. F. Clark. 1,901,435; Mar. 14.
Loud-speaker, Electrodynamic. E. S. Pridham. 1,901,831; Mar. 14.
Loud-speaker, Electrostatic. A. A. Thomas. 1,901,202; Mar. 14.
Lubricating apparatus, Force feed. D. Grattan. 1,901,027; Mar. 14.
Lubricating means. J. L. Creveling. 1,901,148; Mar. 14.
Lubrication of vehicles, System for the central. L. Saives. 1,901,379; Mar. 14.
Machine for cutting metal bars and the like. H. F. Vickers. 1,901,067; Mar. 14.
Machine for distributing sand, gravel, and the like, Automatically loading. E. J. N. Millet. 1,901,523; Mar. 14.
Machine for inserting fastenings. J. C. Jorgensen. 1,901,167; Mar. 14.
Machine for making and assembling a valve pin and valve gasket support. A. J. Lewis. 1,901,459; Mar. 14.
Machine for making composite sheets. L. McCarthy. 1,901,352; Mar. 14.
Machine for making panel cork stock from mill clippings and the like. J. L. Hersog. 1,901,598; Mar. 14.
Machine for manufacturing boxes. B. A. E. Johnson. 1,901,750; Mar. 14.
Machine for measuring body volume. D. E. Zook. 1,901,687; Mar. 14.
Machine for sealing cans. H. Sebell. 1,901,266; Mar. 14.
Machine for shaving and slotting screws. F. E. Newton. 1,901,405; Mar. 14.
Machine tool. W. D. Archea. 1,901,489; Mar. 14.
Magnifier, Portable. O. Hauser. 1,900,930; Mar. 14.
Manifold, Intake. A. Moore. 1,901,768; Mar. 14.
Marker, Grave. F. L. Michaels. Des. 89,445–6; Mar. 14.
Marker, Road. E. T. D. Myers, jr. 1,900,945; Mar. 14.
Masses, Production of artificial. O. Schmidt, B. Schnell, and E. Meyer. 1,901,044; Mar. 14.
Masses resembling linoxyn, Production of. M. Luther and H. Beller. 1,901,374; Mar. 14.
Mat, Reversible. E. J. Mammes. 1,901,110; Mar. 14.
Material and rubber from waste rubber stock, Recovery of fibrous. J. K. Mitchell. 1,900,944; Mar. 14.
Material, Constructional. A. C. Fischer. Re18,765; Mar. 14.
Material forwarding mechanism. A. K. Taylor. 1,901,677; Mar. 14.
Material, Gastification of carbonaceous. L. C. Karrick. 1,901,170; Mar. 14.
Material, Treating. F. D. Chapman. 1,901,084; Mar. 14.
Materials, Device for feeding and controlling the flow of. W. Ross. 1,901,002; Mar. 14.
Materials of different densities, Apparatus for the pneumatic separation of. P. Soulary. 1,901,783; Mar. 14.
Measuring and dispensing device for containers. C. Hochstatter. 1,901,811; Mar. 14.
Measuring appliance. N. G. Bennett. 1,901,724; Mar. 14.
Measuring arrangement for measurement of ratio of transformation and phase angles of voltage and current transformers. J. Slavik. 1,901,336; Mar. 14.

Measuring device. S. Baroni. 1,901,719; Mar. 14.
Mercury arc rectifier. M. Schenkel. 1,901,612; Mar. 14.
Metal aligning device. H. J. Gaisman. 1,901,829; Mar. 14.
Metal by means of gases, Cutting. J. L. Anderson. 1,901,428; Mar. 14.
Metal jamb, Reenforced. I. A. Baum. 1,901,624; Mar. 14.
Metal, Purifying molten. H. C. Drake. 1,901,585; Mar. 14.
Metal sulphates and recovery of metal from waste metallic compounds, Making basic. E. O. Cummings. 1,901,364; Mar. 14.
Metal surfaces, Decorating. K. Takeda. 1,900,960; Mar. 14.
Metal working machine, Multiple spindle. O. E. Trobeck. 1,901,206; Mar. 14.
Metallurgical condenser. G. F. Weaton. 1,901,543; Mar. 14.
Metals and metal alloys low in carbon, Producing. E. G. T. Gustafsson. 1,901,367; Mar. 14.
Metals of the iron group from solutions containing salts of one or more of the said metals, Removing one or more of the. K. W. Palmaer. 1,900,996; Mar. 14.
Meter: *See*—
Liquid dispensing meter.
Milk cooling and storing apparatus. G. E. Wallis. 1,901,014; Mar. 14.
Milling machine. W. D. Arches. 1,901,490; Mar. 14.
Milling machine. M. De Haas and B. Sassen. 1,901,295; Mar. 14.
Milling machine. S. Einstein and L. F. Nenninger. 1,901,290; Mar. 14.
Mining machine. L. E. Simmons. 1,901,127; Mar. 14.
Mixer: *See*—
Feed mixer. Water mixer.
Mixer blade, Concrete. A. Knowles. 1,901,305; Mar. 14.
Mixer for hydrocarbon engines, Gas and air. W. B. Hawers. 1,901,191; Mar. 14.
Mixing device. H. R. Tumim. 1,901,207; Mar. 14.
Mixtures of sulphonated alkylated neodyeing aromatic carbocyclic compounds and their salts. F. Guenther. 1,901,507; Mar. 14.
Mold: *See*—
Typographical mold.
Molds and cores, Process and product for coating. C. M. Saeger, jr. 1,901,124; Mar. 14.
Molding, Apparatus for shaping. H. C. Kinney. 1,900,939; Mar. 14.
Molten substances and gases, Apparatus for performing reactions between. W. Moschel. 1,901,525; Mar. 14.
Money handling machine. E. J. Brandt. 1,901,081; Mar. 14.
Mop. H. L. Firtion. 1,901,842; Mar. 14.
Motor: *See*—
Fluid pressure motor. Rotary motor.
Motor control system. J. A. Setter. 1,901,672; Mar. 14.
Motor for tilting propeller blades, Fluid pressure servo. A. Pfau. 1,901,772; Mar. 14.
Motor operated mechanism. I. E. McCabe. 1,901,402; Mar. 14.
Motor operated valve. R. T. Williams. 1,901,070; Mar. 14.
Motor starting system, Electric. R. N. Early. 1,901,636; Mar. 14.
Motor support. J. A. Rodgers. 1,901,474; Mar. 14.
Mounting for window shades, Adjustable. N. Slobotkin. 1,901,674; Mar. 14.
Mowing device. B. F. Gravely. 1,901,293; Mar. 14.
Muffler and supercharger, Gas engine. G. P. Smith. 1,901,381; Mar. 14.
Mug, Barber. E. Eaves. 1,901,738; Mar. 14.
Multicontact switch. J. F. D. Hoge. 1,901,449; Mar. 14.
Multiple booster or multiple vibration generator. S. Loewe. 1,901,605; Mar. 14.
Navigating and like operations, Means for use in. C. de V. Le Sueur. 1,901,755; Mar. 14.
Nitrocellulose and the product thereof, Dehydrating. A. Langmeier. 1,901,561; Mar. 14.
Nitrogen-hydrogen mixture in the synthesis of ammonia, Purifying the. L. C. Jones. Re18,766; Mar. 14.
Nitroglycerine and similar esters, Washing. A. Schmid. 1,901,003; Mar. 14.
Nut hulling machine. F. Boomer. 1,901,798; Mar. 14.
Nut lock. E. G. Glover. 1,901,744; Mar. 14.
Oil and liquid dispensing device. H. M. Keith. 1,901,815; Mar. 14.
Oil, Apparatus for reconditioning used. E. J. Sweetland. 1,901,010; Mar. 14.
Oil burner. G. Kinsman. 1,901,456; Mar. 14.
Oil conductors, Constructing and maintaining crude. T. de la Mare. 1,900,978; Mar. 14.
Oil filter. C. A. Winslow and E. J. Hall. 1,901,484; Mar. 14.
Oil from certain residuums, Recovering drip. G. N. Harcourt. 1,901,238; Mar. 14.
Oil, Heating. A. E. Harnsberger and C. L. Smith. 1,901,592; Mar. 14.
Oil refining apparatus, Decarbonizing. W. T. Davis. 1,901,803; Mar. 14.
Oil treatment process and apparatus therefor. H. C. Kirk. 1,901,172; Mar. 14.
Oil well control, Subterranean automatic. G. Battelle. 1,901,141; Mar. 14.
Oil well testing device. M. O. Johnston. 1,901,813; Mar. 14.
Oiling device for bearings. R. V. D. Firth. 1,900,924; Mar. 14.
Oils, Dewaxing. A. Henriksen. 1,901,240; Mar. 14.
Open hearth furnace. A. J. Boynton. 1,901,079; Mar. 14.
Ore conditioning process. G. J. Holt, R. O. Hocking, A. E. Matson, and A. K. Knickerbocker. 1,901,102; Mar. 14.
Organ stop action, Combination. J. T. Austin. 1,901,622; Mar. 14.
Organ stop mechanism, Combination. J. T. Austin. 1,901,623; Mar. 14.
Organs, Combination box for electropneumatic pipe. C. C. Dargis. 1,901,552; Mar. 14.
Ornament or similar article, Automobile radiator. J. R. Morgan and W. Schnell. Des. 89,447; Mar. 14.
Ornament or similar article, Automobile radiator. W. Schnell. Des. 89,453; Mar. 14.
Oscillation generator. H. O. Roosenstein. 1,901,043; Mar. 14.
Out-of-order signal. B. D. Newton. 1,901,404; Mar. 14.
Oxides of nitrogen, Absorption of. E. Lüscher. 1,901,816; Mar. 14.
Package carrier. J. L. Baldwin. 1,901,279; Mar. 14.
Package forming method. S. Rosen. 1,900,953; Mar. 14.
Packing. R. C. Newhouse. 1,901,766; Mar. 14.
Packing structure. G. D. Becker and R. C. Newhouse. 1,901,722; Mar. 14.
Pan, Multiple bake. E. H. Chandonia. 1,901,022; Mar. 14.
Panel, Theater switch. B. F. Fuller. 1,901,640; Mar. 14.
Paper-board, Manufacture of. P. H. Rogers. 1,901,378; Mar. 14.
Paper cutter. A. K. Taylor. 1,901,676; Mar. 14.
Paper-marking machine. H. R. Williams. 1,901,425; Mar. 14.
Paper, Safety. F. S. Wood. 1,900,967; Mar. 14.
Paper, Wall. J. H. Goff. 1,900,987; Mar. 14.
Papers without using relief molds, Production of genuine watermark. F. von Heinrich. 1,901,049; Mar. 14.
Parachute equipment. J. C. G. Salone and G. D. Lucas. 1,901,380; Mar. 14.
Paraffin or olefin hydrocarbon into liquid aromatic hydrocarbons, Conversion of gaseous. A. S. Ramage. 1,900,997; Mar. 14.
Pen and pencil, Combination fountain. S. M. Sager. 1,901,414; Mar. 14.
Pen, Fountain. R. C. Parker. Des. 89,449; Mar. 14.
Petroleum, Removal of impurities from crude. L. L. Davis, A. Henriksen, and J. J. Allinson. 1,901,228; Mar. 14.
Phenolic compounds, Production of. W. Schoeller, H. Jordan, and R. Clerc. 1,901,824; Mar. 14.
Phonofilms, Recording and reproducing. A. Karolus. 1,901,033–4; Mar. 14.
Phonographs and the like, Automatic braking device for. R. O. de la Quintana. 1,901,553; Mar. 14.
Phosphate-rock, Mining and treatment of. J. T. Bullwinkel. 1,901,221; Mar. 14.
Phosphates, Preparation of pure. C. F. Booth. 1,901,020; Mar. 14.
Photo-electric tube. K. T. Bainbridge. 1,901,577; Mar. 14.
Photo-electric tubes, Preparing. K. T. Bainbridge. 1,901,578; Mar. 14.
Photogravure plates, Producing. A. A. Pearson. 1,901,468; Mar. 14.
Photopaper, Apparatus for testing. J. Norworth. 1,901,186; Mar. 14.
Picture hanger, Duplex. C. W. Harsin. 1,901,644; Mar. 14.
Picture projection machines, Combined ventilating and fire shutter for motion. A. Dina. 1,900,919; Mar. 14.
Pipe cleaning machine. F. Kinsbach. 1,901,247; Mar. 14.
Pipe structure. J. R. Sternsman. 1,901,420; Mar. 14.
Piston. A. C. Matheson. 1,900,991; Mar. 14.
Piston and ring therefor. W. H. Stine. 1,901,199; Mar. 14.
Piston construction. W. J. Lucas. 1,901,312; Mar. 14.
Piston for internal combustion engines. O. Baur. 1,901,838; Mar. 14.
Piston ring compressor. S. B. Bussinger. 1,901,224; Mar. 14.
Plaster, Model. W. S. Randel. 1,901,056; Mar. 14.
Plastic material, Making. J. Edge. 1,901,024; Mar. 14.
Plate surface. C. Batcholts. 1,901,837; Mar. 14.
Platform of a tilted body, Self-leveling. W. H. Heise. 1,901,029; Mar. 14.
Platinum, Electrodisposition of. A. R. Powell and A. W. Scott. 1,901,531; Mar. 14.
Plows, Automatic depth control for. C. G. Strandlund. 1,901,184; Mar. 14.
Plug: *See*—
Weatherproof plug.
Plug and fuse, Combination. A. J. Friesel. 1,900,926; Mar. 14.
Plug and receptacle, One-piece. J. H. Peroni and S. H. Alexander. 1,901,041; Mar. 14.
Polisher, Floor. A. O. Engberg and T. E. D. Bilde. 1,901,497; Mar. 14.
Polisher, Floor. F. Riebel, jr., and D. M. Dow. 1,901,670; Mar. 14.
Polyazodyestuffs. E. Glietenberg. 1,901,393; Mar. 14.

Portable heater. W. W. Somersall. 1,900,956; Mar. 14.
Power-level indicator. J. W. Horton. 1,901,344; Mar. 14.
Power transmission mechanism. P. M. Salerni. 1,901,193; Mar. 14.
Power transmission mechanism. P. M. Salerni. 1,901,194; Mar. 14.
Precipitates formed by hard water, Rendering harmless the., F. Münz. 1,901,321; Mar. 14.
Preservative composition. J. H. Brooks and J. Goldstone. 1,901,799; Mar. 14.
Press: *See*—
Hydraulic press. Rotary press.
Printing press.
Printing press. F. P. Carlson. 1,901,284; Mar. 14.
Printing press. F. Failert. 1,900,923; Mar. 14.
Printing press roller. L. C. Okerberg. 1,901,818; Mar. 14.
Projection apparatus. W. G. Wolfe. 1,900,906; Mar. 14.
Projector comprising automatic picture changing means. A. Oschwald. 1,901,819; Mar. 14.
Propeller blade adjusting system. A. Pfau. 1,901,773; Mar. 14.
Protector: *See*—
Drop cord protector. Shrub protector.
Instep protector.
Pulp, Production of. T. L. Dunbar. 1,901,706; Mar. 14.
Pump: *See*—
Rotary plunger pump. Vacuum condensation pump.
Pump. W. Ferris. 1,901,501; Mar. 14.
Pump. D. R. Scholes. 1,901,061; Mar. 14.
Pump. O. S. Sleeper. 1,901,417; Mar. 14.
Pump dial, Illuminated. C. W. Hoffrits. 1,901,100; Mar. 14.
Pumping apparatus. G. A. Humason. 1,901,031; Mar. 14.
Pumping unit. R. H. and J. B. Stokes. 1,901,827; Mar. 14.
Radiator. G. C. Carnahan. 1,900,909; Mar. 14.
Radiator support. G. I. Barclay. 1,901,074; Mar. 14.
Radiocabinet. A. C. Haggstrom. Des. 89,441; Mar. 14.
Radio receiving system. A. S. Riggs. 1,901,121; Mar. 14.
Radio signaling system. M. L. Levy. 1,901,350; Mar. 14.
Rail joint. J. Brunner. 1,900,975; Mar. 14.
Razor, Illuminated. F. Weiss. 1,900,965; Mar. 14.
Razor, Safety. C. A. Godshalk. 1,901,591; Mar. 14.
Receiving system. H. O. Peterson. 1,901,117; Mar. 14.
Receptacle: *See*—
Dispensing receptacle. Filing receptacle.
Receptacle for liquids. S. W. Farber. 1,901,155; Mar. 14.
Rectifier cooling system control. H. Winograd. 1,901,071; Mar. 14.
Reel: *See*—
Fishing reel. Hose reel.
Reeling. J. S. Voorhees. 1,901,050; Mar. 14.
Refectory table. F. B. Walter. 1,901,015; Mar. 14.
Reflector for Christmas trees. L. L. Raymond. 1,901,472; Mar. 14.
Refrigerating apparatus. F. W. Rabe. 1,901,190; Mar. 14.
Refrigerating machine, Absorption. E. Altenkirch. 1,901,794; Mar. 14.
Refrigeration. A. Lenning. 1,901,458; Mar. 14.
Refrigerator. L. J. Gottschalk. 1,901,556; Mar. 14.
Register, Autographic. F. E. Pfeiffer. 1,901,258; Mar. 14.
Regulating and controlling gate, Automatic. S. Kambara. 1,901,396; Mar. 14.
Regulator system. J. H. Ashbaugh. 1,901,021; Mar. 14.
Relay, Invar. W. N. Ellingson. 1,901,708; Mar. 14.
Resonance, Method and apparatus for eliminating the effect of cabinet. I. Wolff. 1,901,388; Mar. 14.
Ribbon and making same, Ornamental. H. A. Evans. 1,900,900; Mar. 14.
Robe or blanket, Automobile. L. C. Bush. 1,901,223; Mar. 14.
Rock, Treatment of phosphate. J. T. Bullwinkel. 1,901,222; Mar. 14.
Rocket. H. Stolfa and R. Zwerina. 1,901,852; Mar. 14.
Rod. C. H. Wimberley. 1,901,789; Mar. 14.
Rod, Coupling. G. B. Coe. 1,901,286; Mar. 14.
Rod coupling, Sectional. M. Kalben. 1,901,168; Mar. 14.
Rods, Producing wire. W. Herman and W. H. Sommer. 1,901,514; Mar. 14.
Roll handling device. F. von der Horst. 1,901,482; Mar. 14.
Roller: *See*—
Printing press roller.
Roller mounting, Adjustable shade. R. Saa. 1,901,535; Mar. 14.
Roofing. R. S. Streeter and O. E. Hendrick. Des. 89,471; Mar. 14.
Roofing and making same. L. Kirschbraun. 1,900,940; Mar. 14.
Roofing package, Roll. J. H. Plunkett. 1,901,356; Mar. 14.
Rosin, Refining. J. N. Borglin. 1,901,626; Mar. 14.
Rotary engine. N Christie 1,900,898; Mar. 14.
Rotary motor, Internal combustion. E. A. White. 1,901,787; Mar. 14.
Rotary plunger pump. S. A. Johnson. 1,901,602; Mar. 14.
Rotary press, Changeable. H. F. Bechman. 1,901,075–6; Mar. 14.
Rotor construction. H. L. Barnholdt. 1,901,280; Mar. 14.
Rubber and legging, Combined. C. F. Berry. 1,901,492; Mar. 14.
Rubber-impregnated products, Manufacture of. G. A. Richter, W. B. Van Arsdel, and R. B. Hill. 1,900,951; Mar. 14.
Rubber-like masses and preparing same, Mixed. K. Meisenburg. 1,901,354; Mar. 14.
Rubber vulcanization. C. Coleman. 1,901,582; Mar. 14.
Safety control for motor vehicles. F. P. De Wilde. 1,901,554; Mar. 14.
Safety device for motor vehicles. E. B. Tracy. 1,901,361; Mar. 14.
Sand blast machine for applying pressure to abrasive. F. J. Hull. 1,901,450; Mar. 14.
Sausage linking machine. P. A. Jacobson. 1,901,452; Mar. 14.
Scaffold. C. Bonnet. 1,901,726; Mar. 14.
Scale. M. J. Weber. 1,900,964; Mar. 14.
Scarf. W. L. Blayney. 1,901,725; Mar. 14.
Scraper for shaft bearings. R. T. Steindorf. 1,901,851; Mar. 14.

Display screen. Fireplace screen.
Screen and retaining member for sensitised material, Combined focusing. E. Weisker. 1,901,423; Mar. 14.
Screwless holder. J. J. Flynn. 1,901,866; Mar. 14.
Seal, Mud-drum. M. Liptak. 1,901,462; Mar. 14.
Seal, Oil. C. W. Marsh. 1,901,606; Mar. 14.
Sectional boiler. C. A. Olson. 1,900,947; Mar. 14.
Seeding machine. B. P. Johnson. 1,901,298; Mar. 14.
Sewers, Apparatus for automatically flushing. H. W. Jewell. 1,901,244; Mar. 14.
Sewing machine presser-foot. J. D. Karle. 1,901,752; Mar. 14.
Sewing machines, Uncurler guide for. G. C. Cooper. 1,901,733; Mar. 14.
Sharpening tool, Lawn mower. B. B. Phelps. 1,901,328; Mar. 14.
Shear pin for crushing machines. W. W. Guest. 1,901,159; Mar. 14.
Shears, Attachment for. K. Engel. 1,901,739; Mar. 14.
Shield for the freezing space of refrigeration apparatus, Thermal. D. F. Keith. 1,901,845; Mar. 14.
Shield, Guy. F. N. Bierce. 1,901,550; Mar. 14.
Shingle. N. P. Harshberger. 1,901,161; Mar. 14.
Ship, Self-unloading. C. H. Bradley. 1,901,549; Mar. 14.
Shipping container. O. A. Pellymounter. 1,901,530; Mar. 14.
Shock absorber. E. L. Beecher. 1,901,839; Mar. 14.
Shoe and making same. M. C. Smith, jr., and E. C. Hellhecker. 1,901,782; Mar. 14.
Shoe and making same, Jeweled. C. H. Daniels. 1,901,494; Mar. 14.
Shoe bottom attaching apparatus. G. H. Barge. 1,901,546; Mar. 14.
Shoe welting, Making. M. O. Sleeper. 1,901,781; Mar. 14.
Shrub protector. E. W. Carpenter. 1,901,700; Mar. 14.
Side-bearing. F. J. Sundholm. 1,901,675; Mar. 14.
Sight. C. E. Lyman, jr. 1,901,899; Mar. 14.
Sign: *See*—
Traffic sign.
Sign. P. H. Bethea. 1,900,896; Mar. 14.
Signs, Reflector unit for. S. C. Vincent. 1,901,341; Mar. 14.
Signal: *See*—
Direction signal. Out-of-order signal.
Signal transmitting means. E. D. McArthur. 1,901,112; Mar. 14.
Signaling. C. W. Hansell. 1,901,642; Mar. 14.
Signaling device. J. S. Garvin. 1,901,443; Mar. 14.
Signaling traffic by a hand device. C. A. Rich. 1,901,411; Mar. 14.
Silk cleaner. J. F. Taylor. 1,901,273; Mar. 14.
Silk manufacture. W. H. Furness. 1,901,590; Mar. 14.
Silver salt emulsions, Making photographic. S. Frankel. 1,901,441; Mar. 14.
Siphons, Apparatus comprising. N. Swindin. 1,901,785; Mar. 14.
Skimmer, Cream. A. O. Middlemiss. 1,900,993; Mar. 14.
Sled brake. G. W. Johnston and S. Muchnik. 1,901,902; Mar. 14.
Slider for fasteners. G. E. Prentice. 1,900,949; Mar. 14.
Sling and making the same. J. F. Drew. 1,901,439; Mar. 14.
Slug casting machine. R. R. Mead. 1,901,113; Mar. 14.
Smoke indicator. E. H. Vedder and E. O. Erickson. 1,901,570; Mar. 14.
Snatch block. A. B. Esseltine. 1,901,498; Mar. 14.
Socket for toy automobiles, Combined fender and tail light. H. T. Kingsbury. Des. 89,444; Mar. 14.
Solder fittings and method of soldering. A. L. Parker. 1,901,820; Mar. 14.
Sole fitting, Method of and machine for. A. Bates. 1,901,140; Mar. 14.
Sound correction in an electric circuit. W. N. Barlow. 1,901,429; Mar. 14.
Sound ranging system. H. W. Lamson. 1,901,342; Mar. 14.
Sound track printing attachment for motion picture printers. F. J. Cootz, jr., and G. Seid. 1,901,147; Mar. 14.
Spar, Purifying of natural heavy. J. Müller. 1,900,894; Mar. 14.

Speed control. J. 1. Hull. 1,901,650; Mar. 14.
Speed device, Variable. E. E. Guinness. 1,901,098; Mar. 14.
Spindle and socket element, Self aligning interfitting. F. Noltin. 1,901,355; Mar. 14.
Spinnerets, Treating. J. Ladrette. 1,901,658; Mar. 14.
Spool. C. K. Dunlap. 1,901,737; Mar. 14.
Spool and holder therefor, Flanged. R. H. Carter. 1,901,226; Mar. 14.
Spring: *See*—
Upholstering spring.
Spring and axle wedge, Adjustable. A. W. Corriveau. 1,901,287; Mar. 14.
Sprinkler, Lawn. J. H. Butler. 1,901,225; Mar. 14.
Sprinkler, Lawn. J. H. Keys. 1,901,655; Mar. 14.
Stable suspensions. O. Kramer. 1,901,656; Mar. 14.
Stalk-cutting machine. W. J. Lewis. 1,901,310; Mar. 14.
Stand and shipping case, Display. G. E. Everitt. 1,900,983; Mar. 14.
Starch, Production of. W. Maier. 1,901,109; Mar. 14.
Starter mechanism for feeding blanks or the like. M. J. Milmoe. 1,901,832; Mar. 14.
Starting mechanism for internal combustion engines. Y. Sekella. 1,901,267; Mar. 14.
Starting mechanism for internal combustion engines, Automatic. F. T. Christian. 1,901,285; Mar. 14.
Steam engine. H. S. Vincent. 1,901,571; Mar. 14.
Steam trap. L. P. Strong. 1,901,200; Mar. 14.
Steam trap. L. P. Strong. 1,901,833; Mar. 14.
Steels and alloys, Bright annealing. R. J. Owens and H. J. Fraser. 1,901,039; Mar. 14.
Steering wheel. H. A. Husted. 1,901,599; Mar. 14.
Steering wheel attachment. T. J. Kauffman. 1,901,171; Mar. 14.
Stenciling machine. W. R. Respess. 1,901,473; Mar. 14.
Stocking. R. B. Schindler. Des. 89,470; Mar. 14.
Stockings, Making full fashioned. K. R. Lieberknecht. 1,901,757; Mar. 14.
Stop means for rotary shafts. M. Flaherty. 1,901,710; Mar. 14.
Store-front construction. F. and I. Himmel. 1,901,369; Mar. 14.
Stove panel assembly. A. H. Tinnerman. Des. 89,457; Mar. 14.
Strap holder, Lingerie. O. M. De Ment. 1,900,979; Mar. 14.
Stretcher. L. E. Goldblatt. 1,901,641; Mar. 14.
Submarine mine control. P. R. Nelson. 1,901,185; Mar. 14.
Sucker-rod elevator. E. E. Stevenson. 1,901,339; Mar. 14.
Sugar and the like, Preliminary treatment of raw. J. Berg. 1,901,142; Mar. 14.
Sulphonic compounds formed in the acid refining of mineral oils, Recovering the oil-soluble. G. Voogt. 1,901,383; Mar. 14.
Support: *See*—
Arch support. Motor support.
Conductor support. Open hearth support.
Fixture and canopy support. Radiator support.
Handle support. Table leg support.
Sweater. S. Sheindelman. 1,901,537; Mar. 14.
Switch: *See*—
Break disconnecting switch. Electromagnetic switch.
Canopy switch. Multicontact switch.
Electric switch.
Switch. A. Alsaker, W. O. Hampton, and C. A. Koerner. 1,901,689; Mar. 14.
Switch. F. R. Meginniss. 1,901,252; Mar. 14.
Switch contact. A. J. Bowie. 1,901,493; Mar. 14.
Switch contact, Outdoor. G. A. Matthews. 1,901,607; Mar. 14.
Switch suitable for use in telephone systems, Selector. G. Deakin and L. J. J. Schreiber. 1,900,917; Mar. 14.
Switch unit, Thermostatic. L. Reichold. 1,901,775; Mar. 14.
Syringe, Collapsible fountain. H. S. Williams. 1,901,069; Mar. 14.
Table: *See*—
Built-in table. Hospital table.
Folding table. Refectory table.
Game table.
Table. O. Landaw. 1,901,108; Mar. 14.
Table leg support. W. M. Boenning. 1,901,697; Mar. 14.
Tabulator rebound trap. F. P. Gorin. 1,901,096; Mar. 14.
Tanning substances, Manufacture of. J. Schäfer. 1,901,536; Mar. 14.
Tape, Adhesive. J. Gabosch. 1,901,094; Mar. 14.
Telegraph system, Multiplex. H. H. Haglund. 1,901,296; Mar. 14.
Telephone exchange system, Automatic or semiautomatic. E. P. G. Wright. 1,900,969; Mar. 14.
Telephone system. D. A. Christian. 1,900,911; Mar. 14.
Telephone system. C. Gillings and F. T. Belas. 1,901,156; Mar. 14.
Telephone system. P. B. Murphy. 1,901,403; Mar. 14.
Telephone system, Automatic. M. Mathias. 1,901,179; Mar. 14.
Telephone system, Automatic. J. Stich. 1,901,133; Mar. 14.
Telephone system, Multioffice. O. C. Levy. 1,901,177; Mar. 14.
Telephone system, Multioffice. J. Wicks. 1,901,068; Mar. 14.
Television, Color. A. M. Nicolson. 1,901,116; Mar. 14.
Temperature in rotary drilled wells, Method of and apparatus for determining true rock. L. A. Bond. 1,901,431; Mar. 14.
Temperatures in moving bodies, Process and apparatus for measuring. L. L. Vayda. 1,901,208; Mar. 14.
Temperatures of moving bodies, Apparatus for measuring. G. A. Reinhardt and R. H. Eurich. 1,901,192; Mar. 14.
Temperatures of moving bodies, Apparatus for measuring. L. L. Vayda. 1,901,209; Mar. 14.
Testing apparatus. S. N. Senna. 1,901,359; Mar. 14.
Textile fabric or similar article. M. Guhl. Des. 89,439–40; Mar. 14.
Textile fabric or similar article. C. R. Hellman. Des. 89,464; Mar. 14.
Textile fabric or similar article. P. A. Vogelman. Des. 89,472; Mar. 14.
Textile fabric or similar article. W. Willheim. Des. 89,458; Mar. 14.
Textile fabric or similar article. W. Willheim. Des. 89,474–8; Mar. 14.
Textile fabric or the like. A. J. Heinke. Des. 89,442; Mar. 14.
Textile fabric or the like. J. Schweizer. Des. 89,454; Mar. 14.
Textile fabric or the like. G. V. Tilliard. Des. 89,456; Mar. 14.
Textile machines, Controlling mechanism for full fashion. G. S. Weinerth. 1,901,422; Mar. 14.
Textile material permanently flexible, weatherproof, and fire resistant, Making. H. W. Turner. 1,901,678; Mar. 14.
Thiocyanates, Treating. C. J. Hansen. 1,901,844; Mar. 14.
Ticket distribution system, Telephone. C. J. Gutberlet. 1,901,508; Mar. 14.
Tile feeder. J. A. Bower. 1,901,281; Mar. 14.
Tile manufacture. W. Salisbury. 1,901,195; Mar. 14.
Time control mechanism. N. O. Trein. 1,901,362; Mar. 14.
Time limit relay. P. C. Ward. 1,901,617; Mar. 14.
Timing apparatus, Sprinkler flow. D. Elder. 1,901,496; Mar. 14.
Timing device, Synchronously operated. A. Mutscheller. 1,901,526; Mar. 14.
Tire casing repair apparatus. A. H. Fisher. 1,901,231; Mar. 14.
Tire cover side member and spare wheel hub closure for a tire cover or similar article, Combination spare. G. A. Lyon. Des. 89,466; Mar. 14.
Tire display holder, Folding. E. A. Shank. 1,901,475; Mar. 14.
Tire inflater for vehicles, Automatic. E. E. White. 1,901,017; Mar. 14.
Tire valve, Interchangeable. E. Eger. 1,901,687; Mar. 14.
Toaster, Electric. F. W. Juengst and O. M. Anderson. 1,901,603; Mar. 14.
Tool: *See*—
Hat brim trimming tool. Sharpening tool.
Machine tool. Valve spring retainer tool.
Tool and making it, Cutting. T. Kerr. 1,901,654; Mar. 14.
Tool and spray, Dishwashing. H. T. Huey. 1,901,812; Mar. 14.
Tool construction, Machine. C. Meier and T. A. Wettig. 1,901,522; Mar. 14.
Toothbrush. H. P. Duey. 1,901,230; Mar. 14.
Toothbrush. H. W. Hicks. 1,901,646; Mar. 14.
Tooth-cleaner. M. H. Steinert. 1,901,419; Mar. 14.
Toy. L. M. Dunn and W. H. Mills. 1,901,707; Mar. 14.
Toy, Inflatable figure. I. and L. Dorogi. 1,901,150; Mar. 14.
Toy windwheel. J. W. Whelan. Des. 89,473; Mar. 14.
Track laying device. F. A. Streich. 1,901,421; Mar. 14.
Track mounting, Elevator. L. H. Kiesling. 1,901,520; Mar. 14.
Traction wheel. W. M. Welsford. 1,901,544; Mar. 14.
Tractor scoop structure. H. M. Wirt. 1,901,485; Mar. 14.
Tractor, Tracklaying. F. O. Snow, jr. 1,901,269; Mar. 14.
Traffic sign. K. C. Parkhurst. 1,901,833; Mar. 14.
Train control system. R. C. Leake. 1,901,754; Mar. 14.
Transformer. L. L. Jones. 1,901,368; Mar. 14.
Transformer fault, Detector. D. D. Comin. 1,901,701; Mar. 14.
Transmission. H. Schneider. 1,901,265; Mar. 14.
Transmission and adjustable bearings therefor, Speed reduction. F. C. Williams. 1,901,619; Mar. 14.
Transmission line device. C. F. Wagner and L. R. Golladay. 1,901,572; Mar. 14.
Transmission mechanism. E. R. Burtnett. 1,901,283; Mar. 14.
Transmission mechanism. J. G. Vincent. 1,901,713; Mar. 14.
Transmission mechanism, Motor vehicle. J. M. Christman. 1,901,712; Mar. 14.
Trap: *See*—
Animal trap. Tabulator rebound trap.
Steam trap.
Tray conveyer systems, Method and apparatus for tilting. K. T. Potthoff. 1,900,948; Mar. 14.

Tray, Egg. A. W. De Vout and R. W. Regensburger. 1,901,705; Mar. 14.
Tread for tractors, Auxiliary. D. Carpenter. 1,900,910; Mar. 14.
Tribromoethylalcohol, Preparing. H. Meerwein. 1,901,316; Mar. 14.
Trimmer, Lawn. J. M. Willis. 1,901,788; Mar. 14.
Truck for disk harrows, Transport. H. B. McKahin. 1,901,183; Mar. 14.
Truing means for formed gear grinding wheels. E. W. Miller. 1,900,943; Mar. 14.
Tube: *See*—
Discharge tube. Photo-electric tube.
Tube apparatus, Pneumatic dispatch. J. T. Needham. 1,900,946; Mar. 14.
Tube closure, Collapsible. M. B. Robinson. 1,901,823; Mar. 14.
Tube, electrode, etc., Gas. G. S. James. 1,901,600; Mar. 14.
Tube frame. J. A. Grundy and W. McK. Payne. 1,901,444; Mar. 14.
Tubing, Apparatus for cutting glass. E. Ashford. 1,900,971; Mar. 14.
Turbine control system. J. J. Ling. 1,901,776; Mar. 14.
Turbine control system, Hydraulic. A. Pfau. 1,901,771; Mar. 14.
2.5-diaminohydroquinoneethers, Monoacylated. W. Neelmeier. 1,901,822; Mar. 14.
270° clamp. J. S. Lapp. 1,901,849; Mar. 14.
Type-composing, Process and apparatus for photographic. E. Uber, jr. 1,901,018; Mar. 14.
Typewriter and like machine. P. Dreyer. 1,900,982; Mar. 14.
Typewriting machine. F. P. Gorin. 1,901,157; Mar. 14.
Typewriting machine. W. F. Helmond. 1,901,162; Mar. 14.
Typewriting machine. L. E. Lents. 1,901,398; Mar. 14.
Typographical mold. R. H. Turner. 1,901,836; Mar. 14.
Undervoltage device. M. W. Brainard. 1,901,628; Mar. 14.
Unit heater. J. T. Sorensen. 1,901,338; Mar. 14.
Upholstering spring. M. Barwinkel. 1,901,720; Mar. 14.
Urea-formaldehyde condensation product and process. E. Lionne. 1,901,373; Mar. 14.
Vacuum cleaner. H. M. Keith. 1,901,519; Mar. 14.
Vacuum cleaning apparatus. C. Otto. 1,901,467; Mar. 14.
Vacuum condensation pump. A. C. Durdin, jr. 1,901,154; Mar. 14.
Valve: *See*—
Flush valve. Motor operated valve.
Gate valve. Tire valve.
Valve. O. B. Huber. 1,901,649; Mar. 14.
Valve casing. E. J. Hirvonen. Des. 89,443; Mar. 14.
Valve casing. H. S. Humphrey. Des. 89,465; Mar. 14.
Valve construction. H. H. Haller. 1,901,237; Mar. 14.
Valve construction for containers. W. A. Boselle. 1,901,413; Mar. 14.
Valve control for packing machines, Electrical. K. H. Kolhede. 1,901,521; Mar. 14.
Valve controlling means for fluid distributing devices. A. Johnson. 1,901,749; Mar. 14.
Valve device. T. F. Stacy. 1,901,131; Mar. 14.
Valve spring retainer tool. C. W. Borland. 1,901,727; Mar. 14.
Vaporizer or similar article. H. W. Bergman. Des. 89,462; Mar. 14.
Vault, Burial. B. Dancer. 1,901,149; Mar. 14.
Vegetables and the like, Dehydrating. W. H. Boxarth. 1,900,974; Mar. 14.
Vehicle wheel. W. N. Booth. 1,901,077; Mar. 14.
Vehicle wheel. P. M. Bourdon. 1,901,078; Mar. 14.
Vehicles and the like, Transporting. I. H. Judd. 1,901,103; Mar. 14.
Vehicles, System for preventing the derailment of screw-driven. M. G. Cornet. 1,900,914; Mar. 14.
Ventilator: *See*—
Goggle ventilator. Window ventilator.
Ventilator. A. D. Meiselbach. 1,901,114; Mar. 14.
Vessel and producing same, Steel. F. Gorschlueter and E. Pohl. 1,900,988; Mar. 14.
Vessel, Pressure responsive. J. V. Giesler. 1,900,985; Mar. 14.
Vibrator for screens and other apparatus. S. D. Robins. 1,901,122; Mar. 14.
Voltage of an alternating current circuit, Regulation of the. E. D. T. Norris. 1,901,768; Mar. 14.
Voltmeter, High frequency. J. T. Fetsch, jr. 1,901,741; Mar. 14.
Vulcanizing or drying apparatus. G. H. Knowlton. 1,901,806; Mar. 14.
Washer: *See*—
Combination washer.
Waste receptacle. S. Hammer. 1,901,808; Mar. 14.
Water, Apparatus for conditioning boiler feed. L. F. Wilson. 1,901,215; Mar. 14.
Water conditioner, Feed. L. F. Wilson. 1,901,216; Mar. 14.
Water mixer. M. O. Snediker. 1,901,268; Mar. 14.
Weatherproof plug, Separable. J. H. Peroni and S. H. Alexander. 1,901,040; Mar. 14.
Weather strip. M. O. Sleeper. 1,901,780; Mar. 14.
Weaving, Method and apparatus for. P. Mattler. 1,901,250; Mar. 14.
Welded construction. F. S. Bushey. 1,901,800; Mar. 14.
Welding. G. C. Lawson. 1,901,176; Mar. 14.
Welding apparatus. S. C. Osborne. 1,901,466; Mar. 14.
Wetting agent. F. Günther. 1,901,506; Mar. 14.
Wheel: *See*—
Airplane landing wheel. Traction wheel.
Dual wheel. Vehicle wheel.
Steering wheel.
Wheel. C. W. Sinclair. Des. 89,455; Mar. 14.
Wheel for seeding machines, Mulching. B. P. Johnson. 1,901,299; Mar. 14.
Wheel stop. A. H. Told. 1,901,204; Mar. 14.
Wheels, Apparatus for making wire. H. W. Kraus, C. S. Holden, and H. R. Uber. 1,901,457; Mar. 4.
Whipstock. J. S. Abercrombie. 1,901,854; Mar. 14.
Whipstock. L. C. Kelly. 1,901,453; Mar. 14.
Whipstocks in well bores, Cementing. L. C. Kelly. 1,901,454; Mar. 14.
Whistle, Whirl. J. H. Brady. 1,901,547; Mar. 14.
Wick. P. Barger. 1,901,834; Mar. 14.
Wick oiler. J. J. Aull. 1,901,691; Mar. 14.
Window appliance, Rumble seat. J. D. Phillips. 1,901,329; Mar. 14.
Window fastener. E. P. Huttger. 1,900,936; Mar. 14.
Window ventilator. E. J. Saltsman. 1,901,568; Mar. 14.
Windshield, Microphone. R. K. Spotts. 1,901,065; Mar. 14.
Wiper mechanism for coating machines and process. D. B. Bradner. 1,901,080; Mar. 14.
Work handling mechanism. M. F. Cook and G. T. Breisch. 1,901,702; Mar. 14.
Wrench set. W. F. Costello. 1,900,915; Mar. 14.
Wrinkles, Device for eliminating facial. E. A. Larsen. 1,901,248; Mar. 14.
Zinc spelter baths and effecting their practice, Insulating. J. A. Moritz. 1,901,464; Mar. 14.

CLASSIFICATION OF PATENTS

ISSUED MARCH 14, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

1— 13. 1: 1,901,167
2— 14: 1,900,955
61: 1,901,689
88: 1,901,223
90: 1,901,537
271: 1,901,777
3— 1: 1,901,433
4— 7: 1,901,160
146: 1,901,151
208: 1,901,118
5— 82: 1,901,641
269: 1,901,747
8— 20: 1,901,095
9— 2: 1,901,545
20: 1,901,219
22: 1,900,905
10— 3: 1,901,405
133: 1,901,579
139: 1,901,146
12— 27: 1,901,140
33: 1,901,546
142: 1,901,782
146: 1,901,353
1,901,781
13— 12: 1,901,426
20: 1,901,524
23: 1,901,526
25: 1,901,499
15— 13: 1,901,467
17: 1,901,519
21: 1,901,647
23: 1,901,503
49: 1,901,497
1,901,670
97: 1,901,526
103: 1,901,526
104. 19: 1,901,518
128: 1,901,812
136: 1,901,522
167: 1,901,230
1,901,646
171: 1,901,542
210: 1,901,419
228: 1,901,842
16— 98: 1,901,648
99: 1,901,758
172: 1,901,972
177: 1,901,280
17— 5: 1,901,625
34: 1,901,452
18— 42: 1,901,205
47: 1,901,064
52: 1,900,944
53: 1,901,582
54: 1,901,007
1,901,890
1,901,658
55: 1,901,044
57: 1,901,045
20— 19: 1,901,304
39: 1,901,388
56. 4: 1,901,380
22— 188: 1,901,052
1,901,053
189: 1,901,134
1,901,409

They call it the world's finest coffee . . . and here is the reason. For Coffee. Hills Bros. 14,101; Mar. 21.
They call it the world's finest coffee . . . and here is the reason. For Coffee. Hills Bros. 14,112; Mar. 21.
When You Taste Hills Bros Coffee, You'll Realize The Importance Of Perfect Roasting. For Coffee. Hills Bros. 14,080; Mar. 21.
When you taste Hills Bros Coffee, you'll realise the importance of perfect roasting. For Coffee. Hills Bros. 14,091; Mar. 21.
When you taste Hills Bros Coffee, you'll realise the importance of perfect roasting. For Coffee. Hills Bros. 14,114; Mar. 21.
When You Taste Hills Bros Coffee, You're Tasting a Flavor No Other Coffee Has. For Coffee. Hills Bros. 14,074; Mar. 21.
When you taste Hills Bros Coffee, you're tasting a flavor no other coffee has. For Coffee. Hills Bros. 14,088; Mar. 21.
When you taste Hills Bros Coffee, you're tasting a flavor no other coffee has. For Coffee. Hills Bros. 14,098; Mar. 21.
When you taste Hills Bros Coffee, you're tasting a flavor no other coffee has. For Coffee. Hills Bros. 14,109; Mar. 21.
Why Hills Bros Coffee has and holds so many friends. For Coffee. Hills Bros. 14,087; Mar. 21.
You'll Never Know What "Matchless, Uniform Flavor" Means, Until You Use Hills Bros Coffee. For Coffee. Hills Bros. 14,077; Mar. 21.
You'll never know what "matchless, uniform flavor" means until you use Hills Bros Coffee. For Coffee. Hills Bros. 14,089; Mar. 21.
You'll never know what "matchless, uniform flavor" means until you use Hills Bros Coffee. For Coffee. Hills Bros. 14,100; Mar. 21.
You'll never know what "matchless, uniform flavor" means until you use Hills Bros Coffee. For Coffee. Hills Bros. 14,111; Mar. 21.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 21ST DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abatgis, George, et al. (See Davison, Goliat, assignor.)
Abramson, Alexander, Prague, Czechoslovakia. Device for turning piston rings. 1,901,942; Mar. 21.
Acheson, Marcus A., Schenectady, N. Y., assignor to General Electric Company. Electron discharge device. 1,902,481; Mar. 21.
Acheson, Marcus A., and J. L. Zehner, Schenectady, N. Y., assignors to General Electric Company. Electron discharge apparatus. 1,902,482; Mar. 21.
Actiengesellschaft C. P. Goerz Optische Anstalt Actiova spolecnost K. P. Goerz Opticky ustav. (See von Hoft, C., and Schier, assignors.)
Adam, Frederick B., St. Louis, Mo. Lighting control apparatus. 1,901,886; Mar. 21.
Adell, John A., Orange, Mass. Junction box. 1,901,943; Mar. 21.
Aktiebolaget Gerh. Arehns Mekaniska Verkstad. (See Johnson, Bror A. E., assignor.)
Aktiengesellschaft Brown Boveri & Cie. (See Keller, Robert, assignor.)
Aktiengesellschaft Brown Boveri & Cie. (See Kern, Erwin, assignor.)
Aktiengesellschaft Brown Boveri & Cie. (See Urich, Moritz, assignor.)
Aktiengesellschaft für Stickstoffdünger. (See Geis, Wilhelm T., assignor.)
Albertson & Company. (See Albertson, Frans O., assignor.)
Albertson, Frans O., assignor to Albertson & Company, Inc., Sioux City, Iowa. Valve seat tool. 1,902,207; Mar. 21.
Albrecht, Christian A., Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y. Wiping mechanism for matrix composing and line casting machines. 1,902,482; Mar. 21.
Alex, Max, Alhambra, Calif., assignor to York Water Corporation, Ltd. Stand for bottled water or the like. Des. 89,526; Mar. 21.
Allen, Clarence. (See Melin, Otto, assignor.)
Allen, Lawrence H., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,901,944; Mar. 21.
Allerding, Cletus N., Metropolis, Ill. Folding table. 1,901,887; Mar. 21.
Allis-Chalmers Manufacturing Company. (See Grow, John H., assignor.)
Allis-Chalmers Manufacturing Company. (See Newhouse, Ray C., assignor.)
Allis-Chalmers Manufacturing Company. (See Nichols, Louis C., assignor.)
Allis-Chalmers Manufacturing Company. (See Sprado, Carl G., assignor.)
Amburgen Construction Company. (See Burroughs, Edgar H., assignor.)
American Bemberg Corporation. (See Meyer-Gaus, Karl, assignor.)
American Chain Company. (See Nalle, John M., assignor.)
American Dairy Supply Company, The. (See Thomas, Sherman O., assignor.)
American Floor Surfacing Machine Company, The. (See Myers, Harry L., assignor.)
American Glanzstoff Corporation. (See Krause, Alfons, assignor.)
American Glanzstoff Corporation. (See Schmidt, Kurt, assignor.)
American Glanzstoff Corporation. (See Stöckly, J. J., and Witte, assignors.)
American Optical Company. (See Gunning, William A., assignor.)
American Telephone and Telegraph Company. (See Holden, William H. T., assignor.)
American Windsor Glass Company. (See Clark, Henry F., assignor.)
Amsler-Morton Company, The. (See Geer, Paul L., assignor.)
Anciens Etablissements R. Cornely & Cie (Societe Anonyme.) (See Morel, Felix, assignor.)
Anderson, Arvid E., Lansdowne, Pa., assignor to General Electric Company. Automatic reclosing circuit breaker system. 1,902,488; Mar. 21.
Anderson, Carl O. (See Davis, S. H., Anderson, Smith, and Hanley.)
Anderson, Felix F., Oslo, Norway. Pneumatic tire. 1,901,862; Mar. 21.
Anderson, Gustaf E., Brockton, Mass. Machine for attaching ornaments to shoes. 1,902,605; Mar. 21.
Anderson, Louis W., Elizabeth, N. J., assignor to Gillette Safety Razor Company, Boston, Mass. Strip supporting mechanism. 1,902,010; Mar. 21.
Anderson, Maurice, Mason City, Iowa. Life preserver suit. 1,901,859; Mar. 21.
Anderson, Maurice, Edgewood, R. I., assignor to Levy, Anderson Co., Inc. Foldable buckle. 1,902,585; Mar. 21.
Andrew, Fred. W., Philadelphia, Pa., assignors to Briggs & Stratton Corp., Milwaukee, Wis. Making a spring cover. 1,902,606; Mar. 21.
Andrews, Paul D., Schenectady, N. Y., assignor to General Electric Company. Regulating means for high power electric discharge amplifiers. 1,902,484; Mar. 21.
Anetsberger, Frank A. and W., Chicago, Ill. Humidifying apparatus. 1,901,888; Mar. 21.
Anetsberger, William. (See Anetsberger, Frank A. and W.)
Anklam, Otto, Minneapolis, Minn. Street lamp cable securing device. Re18,760; Mar. 21.
Appleton Electric Company. (See Goetzelman, William, assignor.)
Arkenburgh, Weber H., Schenectady, N. Y., assignor to General Electric Company. Electrical control system. 1,902,485; Mar. 21.
Armstrong Cork Company. (See Farmer, J. A., and Fichter, assignors.)
Armstrong Cork Company. (See Halliwell, Robert G., assignor.)
Armstrong Cork Company. (See Pieper, E. J., Smith, and Vogt, assignors.)
Arnest, Howard P. (See Brooks, Linzy W., assignor.)
Ashby, John T. (See Welch, S. A., Guyler, Ashby, and Boaler.)
Asser, Erich, Wandsbek, Germany. Treating drying oils. 1,902,684; Mar. 21.
Associated Electric Laboratories, Inc. (See Saunders, Norman H., assignor.)
Atlantic Carton Corporation. (See Whitehead, Earl B., assignor.)
Austin, Arthur O., near Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Transmission line. 1,901,880; Mar. 21.
Austin, Arthur O., near Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Conductor clamp. 1,902,008; Mar. 21.
Austin, Arthur O., near Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Conductor attachment. 1,902,009; Mar. 21.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Electrostatic condenser. 1,902,152; Mar. 21.
Austin, Dwight E., Los Angeles, Calif. Automobile stage body. 1,902,607; Mar. 21.
Automatic Safe-Start Company. (See Knapp, Arthur S., assignor.)
Automatic Water Softener Company. (See Dotterweich, Andrew J., assignor.)
Avery, Edward S., East Hampton, N. Y. Cushioning device. 1,901,945; Mar. 21.
Avery, Henry C., New Brunswick, and L. Kirschbraun, Leonia, N. J., assignors, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Roofing and building material. 1,902,298; Mar. 21.
Avery Power Machinery Co. (See Mentor, E. W., and Scranton, assignors.)
Avery Power Machinery Co. (See Reynolds, J. N., and Scranton, assignors.)
Babcock & Wilcox Company, The. (See Kerr, Howard J., assignor.)
Bachhuber, Philip. (See Dorst, J., and Bachhuber.)
Bachrach, Joseph. (See Nilsson, O. F., and Bachrach.)
Back, Robert, and G. A. Cooper, Chicago, Ill., assignors, by mesne assignments, to Pen Desk Set Company. Desk pen holder. 1,902,208; Mar. 21.
Badgley, Laurie C., assignor of one-half to R. C. Chattin, Boise, Idaho. Windrowing machine. 1,901,889; Mar. 21.
Baird, Cliff, and W. E. Robertson, Eugene, Oreg. Attaching means for fishing reels. 1,902,749; Mar. 21.
Bakelite Building Products Company. (See Harshberger, Norman P., assignor.)
Baker, Ida S., Indianapolis, Ind. Artist's kit. 1,901,861; Mar. 21.
Baker, William H., Montreal, Quebec, Canada. Warp-stop motion for looms. 1,902,518; Mar. 21.
Baldwin, Nathaniel, East Mill Creek, Utah. Combination tongs and poker device for fire grates and fireplaces. 1,902,685; Mar. 21.
Ballard, Milton H., and D. G. McLean, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Press. 1,902,664; Mar. 21.
Baltzley, Louis E., Glen Ridge, and F. Goertz, Newark, N. J. Glass holder. 1,902,606; Mar. 21.
Barden, William S. (See Beers, G. L., and Barden.)

Bark, Walter, Annaburg, Germany. Tree-planer for cutting or working out resin-passages in trees. 1,901,946; Mar. 21.

Barks, Frank S., St. Louis, Mo. Dispensing apparatus. 1,902,750; Mar. 21.

Barnes, Frank J., St. Louis, Mo. Stiffener pin for soft collars. 1,902,153; Mar. 21.

Barnhart, George E., New Brighton, and H. E. Pfaff, Warren, assignors to J. M. Guthrie and W. B. Wharton, trustees, Pittsburgh, Pa. Cementitious composition. 1,901,890; Mar. 21.

Barrington, Arthur H., et al. (See Foss, Leland L., assignor.)

Barrows, Donald S., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging. 1,902,299; Mar. 21.

Barrows, Donald S., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging backstop. 1,902,300; Mar. 21.

Bartholomew, Tracy, Pittsburgh, Pa. Treatment of slag. 1,901,891; Mar. 21.

Bates, Albert J., assignor to Ditto Incorporated, Chicago, Ill. Duplicating apparatus. 1,902,278; Mar. 21.

Bauman, Frank, Honesdale, Pa. Spindle. 1,902,751; Mar. 21.

Baumann, Paul, H. Schilling, and A. Fischer, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Treating carbonaceous materials with electric arcs. 1,902,351; Mar. 21.

Baumgärtel, Carl, Zeulenroda, Germany. Straight bar knitting machine. 1,902,752; Mar. 21.

Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Blowing device for rock drills. 1,902,536; Mar. 21.

Beanblossom, Emmett M., Corydon, Ind. Foliage trimmer. 1,902,114; Mar. 21.

Beardsley, Edwin W., and D. M. Evans, Texas City, Tex., assignor to Petroleum Conversion Corporation, New York, N. Y. Distilling mineral oils. 1,901,863; Mar. 21.

Beaver, David J., Elizabeth, N. J., assignor to General Atlas Carbon Company, Dover, Del. Method of and apparatus for producing carbon black. 1,902,753; Mar. 21.

Bechler, André, Moutier, Switzerland. Automatic lathe for high speed work. 1,902,754; Mar. 21.

Beerbower, Russell D., Fort Wayne, Ind. Mechanical toy. 1,902,154; Mar. 21.

Beers, George L., East Pittsburgh, and W. S. Barden, North Braddock, Pa., assignors to Westinghouse Electric and Manufacturing Company. Loud speaker mounting. 1,902,609; Mar. 21.

Behimer, Otto, Chicago, Ill., assignor to The Texas Company, New York, N. Y. Treating hydrocarbon oils. 1,902,056; Mar. 21.

Bell, Forrest F., assignor to Curtis Companies, Incorporated, Clinton, Iowa. Window frame construction. 1,902,209; Mar. 21.

Bell, John W., Chicago, Ill. Coffee dispenser. Des. 89,479; Mar. 21.

Bell Telephone Laboratories, Incorporated. (See Allen, Lawrence H., assignor.)

Bell Telephone Laboratories, Incorporated. (See Bescherer, Edwin A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Clarke, Harry R., assignor.)

Bell Telephone Laboratories, Incorporated. (See Dixon, J. B., and Honan, assignors.)

Bell Telephone Laboratories, Incorporated. (See Gooderham, John W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Means, Winthrop J., assignor.)

Bell Telephone Laboratories, Incorporated. (See Peterson, Eugene, assignor.)

Bell Telephone Laboratories, Incorporated. (See Tinus, William C., assignor.)

Bellanca, Giuseppe M., Wilmington, Del. Aeroplane wing construction. 1,901,864; Mar. 21.

Beluche, Fernand E. (See Brace, W. F., and Beluche.)

Bendix Aviation Corporation. (See Evans, William F., assignor.)

Bendix Aviation Corporation. (See Wilson, Wesley, assignor.)

Bendix Brake Company. (See La Brie, Ludger E., assignor.)

Bendix Brake Company. (See McDonald, Eugene G., assignor.)

Bendix Brake Company. (See Norton, Raymond J., assignor.)

Bendix Brake Company. (See Sanford, Roy S., assignor.)

Bendix Brake Company. (See Thomas, George J., assignor.)

Bernaud, Felicie E. A. W., Paris, France. Case for lipsticks. 1,902,537; Mar. 21.

Berkheimer, Jesse H., Tacoma, Wash. Interlocking shingle. 1,902,155; Mar. 21.

Bernstein, Max. (See Parker, Clark W., assignor.)

Berry, Herbert H., London, England. Electric imitation fire. 1,902,274; Mar. 21.

Bescherer, Edwin A., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Supporting device. 1,901,947; Mar. 21.

Bessy, Peter F., Detroit, Mich. Windshield wiper. 1,902,610; Mar. 21.

Beste, Ernst A., Kohler, Wis. Drilling machine. 1,902,055; Mar. 21.

Better Packages, Incorporated. (See Krueger, Theodore H., assignor.)

Bigelow, George E., et al. (See Weis, Arthur E., assignor.)

Bigga, John L., Chicago, Ill., assignor to Queen Anne Candy Company, Hammond, Ind. Confection machine. 1,902,755; Mar. 21.

Binlek, Georg, Berlin, assignor to Telephon-Apparat Fabrik E. Zwietusch and Company, Charlottenburg, Berlin, Germany. Pay station apparatus. 1,902,210; Mar. 21.

Bins, Arthur, Berlin, and C. Rith, Rangdorf, Germany. Heterocyclic arseno-compounds and purifying same. 1,902,756; Mar. 21.

Birdsey, Charles R., Oak Park, and H. W. Reel, Hinsdale, assignors to United States Gypsum Company, Chicago, Ill. Ceiling construction. 1,902,796; Mar. 21.

Bishop, Leon C., Binghamton, and S. E. Swick, assignors to International Time Recording Company of New York, Endicott, N. Y. Card rack. 1,902,156; Mar. 21.

Bjorklund, Henry L., Minneapolis, Minn. Hair collecting device. 1,902,211; Mar. 21.

Bjorkman, George E., Djursholm, Sweden, and J. Geloso, New York, N. Y. Hair curler. 1,901,892; Mar. 21.

Blackman, Earl P. and L. D., Battle Creek, Mich.; said Earl P. Blackman assignor to said Leon D. Blackman. Carrier for cable and wire reels. 1,902,611; Mar. 21.

Blackman, Leon D. (See Blackman, Earl P. and L. D.)

Bloedel, Henry A., Pittsburgh, Pa. Combination cabinet and seat construction. 1,902,819; Mar. 21.

Blomstrom, Charles, Minneapolis, Minn. Measuring and dispensing device for receptacles. 1,902,157; Mar. 21.

Blossom, Carl W., Cleveland, and W. H. Staples, Cleveland Heights, Ohio. Vending machine. 1,902,612; Mar. 21.

Blue, Edward B., executor. (See Blue, Louis V.)

Blue, Louis V., deceased, Pittsburgh, Pa., Edward B. Blue, executor. Automatic closer for windows and the like. 1,902,392; Mar. 21.

Blumberg, Gustav, Berlin-Spandau, assignor to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Fuse. 1,902,613; Mar. 21.

Boaler, William H. (See Welch, S. A., Guyler, Ashby, and Boaler.)

Bock, William E., West Palm Beach, Fla. Folding golf tee. 1,901,948; Mar. 21.

Bohn Aluminum & Brass Corporation. (See Fiegel, William J., assignor.)

Boley, Roy A., Indianapolis, Ind., assignor to J. B. Colt Company. Acetylene generator. 1,902,757; Mar. 21.

Boljahn, Adolf W. C., Jersey City, N. J., assignor to Wired Radio, Inc., New York, N. Y. Radio receiving system. 1,902,352; Mar. 21.

Bonce, Fred, Seattle, Wash. Towing device. 1,902,212; Mar. 21.

Bonicot Corporation of America. (See Herrmann, Karl, assignor.)

Borgeson, Charles A., San Francisco, Calif. Gas saver. 1,902,275; Mar. 21.

Bosch, Alberto, Habana, Cuba. Anchor for boats. 1,902,393; Mar. 21.

Bouwers, Albert, assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. X-ray installation. 1,901,865; Mar. 21.

Bower, Harry A., Los Angeles, Calif. Control mechanism for vibra harps. 1,902,614; Mar. 21.

Bowman, A. B. (See Brockway, John P., assignor.)

Bowser, S. F., & Company. (See Brace, W. F., and Beluche, assignors.)

Bowser, S. F., & Company. (See Warner, Joseph R., assignor.)

Boyce, William S., Chicago, Ill. Rail support and fastening means. 1,902,615; Mar. 21.

Brace, William F., and F. E. Beluché, Buffalo, N. Y., assignors to S. F. Bowser & Company, Inc., Fort Wayne, Ind. Distilling apparatus. 1,902,538; Mar. 21.

Brauer, Carl F., Stettin, Germany. Stencil. 1,902,589; Mar. 21.

Braun, Gustav F. (See Smith, B. M., Langley, and Braun.)

Brehmer, Gebruder. (See Kleinschmit, Oscar, assignor.)

Brenaman, Harry A. (See Schmidt, V. P., and Brenaman.)

Brennan, Daniel A., Chicago, Ill. Fastener. Re18,770; Mar. 21.

Brewer, Chas. A., & Sons. (See Brewer, Kenneth E., assignor.)

Brewer, Kenneth E., assignor to Chas. A. Brewer & Sons, Chicago, Ill. Collapsible holder. 1,902,011; Mar. 21.

Bridgwater Machine Company, The. (See Kraft, Herman T., assignor.)

Briggs & Stratton Corp. (See Andrew, Fred W., assignor.)

Bristol Nurseries, Inc. (See Cumming, Alexander, jr., assignor.)

Britton, John G. (See Hopkinson, H., and Britton.)

Brockway, John P., Coronado, assignor to A. B. Bowman, San Diego, Calif. Reproducing images on metallic surfaces. 1,902,213; Mar. 21.

Brodie, George H., Riverside, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical protector device. 1,901,893; Mar. 21.

Brodsky, Michel, Paris, France, assignor to William Willhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,480; Mar. 21.

Brooks, Linzy W., assignor of one-third to H. P. Arnest, Portland, Oreg. Shoe heel. 1,902,686; Mar. 21.

Brooks, Manley E. (See Plant, R. A., and Brooks.)

Brown, Cicero C., Houston, Tex. Well control device. 1,902,540; Mar. 21.

Brown Company. (See Burke, Edmund, assignor.)

Brown, Franklin, assignor to General Health Corporation, Philadelphia, Pa. Nipple. 1,902,483; Mar. 21.

Brown, George G., and M. Souders, jr., Ann Arbor, Mich. Method and apparatus for igniting combustible mixtures. 1,902,541; Mar. 21.

Brown, Robert N., assignor to Packard Motor Car Company, Detroit, Mich. Machine tool. 1,902,012; Mar. 21.

Brump, Herbert L., F. O., and F. E. Gray, assignors to General Motors Radio Corporation, Dayton, Ohio. Automatic phonograph. 1,902,158; Mar. 21.

Brungardt, Alphonse O., Scituate, F. H. Morehead, Brookline, and J. W. Morrissey, Medford, Mass. Portable pipe cutter. 1,902,616; Mar. 21.

Brush Laboratories Company, The. (See Sawyer, Charles B., assignor.)

Bryan, Hamilton V., U. S. Navy. Toothbrush. 1,901,866; Mar. 21.

Bryce, James W., Bloomfield, N. J., assignor to The Tabulating Machine Company, Endicott, N. Y. Controlling devic for record-controlled machines. 1,902,013; Mar. 21.

Buckeye Steel Castings Company, The. (See Murphy, George M., assignor.)

Budd Wheel Company. (See Ekserdjian, Carolus L., assignor.)

Budd Wheel Company. (See Ragsdale, Earl J. W., assignor.)

Buettner, Raymond J., and R. A. Found, West Allis, Wis., J. M. Muntner, Chicago, and J. J. Neits, Naperville, Ill., and Frank C. Zansig, Milwaukee, Wis., assignors to Dudley Lock Corporation, Chicago, Ill. Self-closing combination lock. 1,902,214; Mar. 21.

Bull, Charles S., Colton, Calif. Gauge for low temperature fluids. 1,902,276; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,482; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,483; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,484; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,485; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,486; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,487; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,488; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Coffee pot or similar article. Des. 89,489; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,490; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,490; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,491; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,492; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,493; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,494; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,495; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,496; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,497; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,498; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,499; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,500; Mar. 21.

Buma, Yukio, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 89,501; Mar. 21.

Burd High Compression Ring Company. (See Haegg, Rudolph A., assignor.)

Burke, Edmund, Portland, Me., assignor to Brown Company, Berlin, N. H. Fuse cut-out. 1,901,894; Mar. 21.

Burke, Stephen P., New York, N. Y., assignor to General Atlas Chemical Company, Dover, Del. Carbon black process and apparatus. 1,902,797; Mar. 21.

Burnham, Walter E. (See Rawdon, H., and Burnham.)

Burr, Gordon A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. High-voltage bushing device. 1,902,617; Mar. 21.

Burroughs, Edgar H., Scarsdale, assignor to Ambursen Construction Company, Inc., New York, N. Y. Dam. 1,902,353; Mar. 21.

Burt, F. N., Company, Ltd. (See Breux, Alexander H., assignor.)

Burt, Harold A., St. Albans, N. Y., assignor to Mergenthaler Linotype Company. Knife wiper. 1,902,424; Mar. 21.

Burtnett, Everett R., Pasadena, Calif. Transmission mechanism. 1,902,618; Mar. 21.

Burton, Henry, Gardena, Calif. Selective system. 1,901,867; Mar. 21.

Burton, Stuart M., Burnham, England. Heat exchanger. 1,902,220; Mar. 21.

Busse, Edwin G., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake beam support bracket. 1,902,215; Mar. 21.

Butler, Henry E., East Orange, N. J., and C. J. Young, Ardmore, Pa., assignors to General Electric Company. Picture transmission. 1,902,496; Mar. 21.

Battress, Joseph A., South Pasadena, Calif., assignor of one-half to George Parker, Jackson, Miss. Exterior gripping device. 1,902,216; Mar. 21.

Bunnaird, Raleigh R., Washington, D. C. Sheet of paper. Des. 89,481; Mar. 21.

Calkins, Elmer H. (See Miller, L. M., Greene, Miller, and Calkins.)

Calvert, Francis V., Madison, Me., assignor to General Electric Company. Oil-filled high tension cable. 1,902,487; Mar. 21.

Camerpta, Louis A., Burlington, N. J., assignor to Walter Wood, Philadelphia, Pa. Chuck for centrifugal casting machines. 1,902,301; Mar. 21.

Campbell, Arthur W., Stow, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 1,902,115; Mar. 21.

Campbell, Guy O., West Grinstead, Horsham, England. Ash tray. 1,902,014; Mar. 21.

Campbell, William B., Nashville, Tenn. Flush-tank lever. 1,902,758; Mar. 21.

Cane, Gordon F., assignor, by mesne assignments, to T. Thompson, San Francisco, Calif. Counterbalancing means for foldable beds. 1,902,619; Mar. 21.

Cape, William H., Cumberland Mills, Me., assignor to S. D. Warren Company, Boston, Mass. Paper making apparatus. 1,902,796; Mar. 21.

Capps, Frank L., Milford, assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Wire stylus and feeding same. 1,902,087; Mar. 21.

Carbon Monoxide Eliminator Corporation. (See Fraser, J. C. W., and Kassel, assignor.)

Carlson, George, Bridgeport, Conn., assignor to General Electric Company. Outlet box. 1,902,488; Mar. 21.

Carpenter, Charles H., Chicago, Ill. Doughnut machine and the like. 1,902,058; Mar. 21.

Carrier Engineering Corporation. (See Lewis, Leo L., assignor.)

Carteret, Paul A., Neuilly-sur-Seine, France. Suspension spring. 1,902,394; Mar. 21.

Case, J. I., Company. (See Huddle, Edwin F., assignor.)

Castle, Wilmot V., assignor to Wilmot Castle Co., Rochester, N. Y. Sterilizing apparatus. 1,902,687; Mar. 21.

Castlen, Robert C., assignor to Palm Beach Garment Company, West Palm Beach, Fla. Waist band construction. 1,902,116; Mar. 21.

Catarau, Jules, Seattle, Wash. Fish-bait adjusting device. 1,902,217; Mar. 21.

Cataudella, Alfred S., Bridgeport, Conn. Brake band signaling device. 1,902,759; Mar. 21.

Caterpillar Tractor Co. (See Wickersham, Elmer H., assignor.)

Celanese Corporation of America. (See Moss, William H., assignor.)

Celanese Corporation of America. (See Moss, W. H., and White, assignors.)

Celanese Corporation of America. (See Welch, S. A., Guyler, Ashby, and Boaler, assignors.)

Century Zinc Company, The. (See Davis, S. H., Anderson, Smith, and Hanley, assignors.)

Cesario, Mary, Kenosha, Wis. Mop wringer. 1,902,688; Mar. 21.

Champion Spring Company, The. (See Ianzy, Frank L., assignor.)

Chapman, Penrose E., St. Louis, Mo. Testing instrument and regulator. 1,902,542; Mar. 21.

Charlesworth, Ira L., Newton, Iowa. Tractor cultivator. 1,902,689; Mar. 21.

Chase Candy Company. (See Chase, Charles C., assignor.)

Chase, Charles C., assignor to Chase Candy Company, St. Joseph, Mo. Special package. 1,902,760; Mar. 21.

Chase, Curtis D., Boston, Mass., assignor to Chase Rights Corporation, Philadelphia, Pa. Printing of films. 1,902,277; Mar. 21.

Chase, Curtis D., Boston, Mass., assignor to Chase Rights Corporation, Philadelphia, Pa. 1,902,278; Mar. 21.

Chase Rights Corporation. (See Chase, Curtis D., assignor.)

Chatillon, John, & Sons. (See Reis, Leonard W., assignor.)

Chattin, Robert C. (See Bafgley, Laurie C., assignor.)

Cheatham Electric Switching Device Company. (See Richterkessing, Frank H., assignor.)

"Chemical Works formerly Sandoz." (See Kreis, Walter, assignor.)

Chemische Fabrik Pott & Co. (See Muller, Robert, assignor.)

Cheney, Sarah E., Los Angeles, Calif. (Packing frame for automobile trunks and suitcases. 1,901,895; Mar. 21.

Chicago, Bridge & Iron Company. (See Horton, George T., assignor.)

Chicago Pneumatic Tool Company. (See Nell, Gustave M., assignor.)

Chicago Railway Equipment Company. (See Busse, Edwin G., assignor.)

Chikuan Oil Tool Company. (See Ellingsen, Frank, assignor.)

Chiles, George S. (See Dreibuss, H. C., and Chiles.)
Christiance Harry C., Compton, Ill. Hay unloading apparatus. 1,902,761; Mar. 21.
Chrysler Corporation. (See Herreshoff, Alexander G., assignor.)
Chrysler Corporation. (See Lee, Roger K., assignor.)
Chrysler Corporation. (See Sanders, Rufus C., assignor.)
Clark, Edgar M., Greenwich, Conn., assignor to Standard-I. G. Company. (Method and apparatus for hydrogenation and distillation. 1,902,015; Mar. 21.
Clark, Frank M., Pittsfield, Mass., assignor to General Electric Company. Insulating composition. 1,902,489; Mar. 21.
Clark, George E., assignor to The George P. Clark Company, Windsor Locks, Conn. Fastening means for securing the ends of a length of material to a reel. 1,901,949; Mar. 21.
Clark, George P., Company, The. (See Clark, George E., assignor.)
Clark, Henry F., New Kensington, assignor to American Window Glass Company, Pittsburgh, Pa. Glass drawing apparatus. 1,901,896; Mar. 21.
Clark, Willard F., Chicago, Ill. Radiator cap ornament. Des. 89,502; Mar. 21.
Clarke, Harry R., Newark, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound translating device. 1,901,898; Mar. 21.
Clayton, Martin, M., Baden, Pa., assignor to National Electric Products Corporation, New York, N. Y. Elbow fitting for electrical systems. 1,901,897; Mar. 21.
Clute, Donald. (See Ferris, J. P., Clute, and Wiedmann.)
Cobb, Leland D., assignor to The New Departure Manufacturing Company, Bristol, Conn. Bearing and seal therefor. 1,902,620; Mar. 21.
Coleman, Howard D. (See Stewart, Duncan J., assignor.)
Collins & Aikman Corporation. (See Costello, Joseph P., assignor.)
Colt, J. B., Company. (See Boley, Roy A., assignor.)
Columbia Phonograph Company. (See Capps, Frank I., assignor.)
Comstock, Francis M., et al. (See Knight, Clarence F., assignor.)
Condit Electrical Manufacturing Corporation. (See Edsall, William S., assignor.)
Conlon, Bartholomew J., assignor to The Conlon Manufacturing Company, Bridgeport, Conn. Rivet drilling machine. 1,902,762; Mar. 21.
Conlon Manufacturing Company, The. (See Conlon, Bartholomew, J., assignor.)
Connelly, Lawrence E., Cleveland Heights, Ohio, assignor, by mesne assignments, to Foster Wheeler Corporation, New York, N. Y. Water tube boiler. 1,901,899; Mar. 21.
Conover Company, The. (See Hilpert, W. S., and Stoddard, assignors.)
Conover Company, The. (See Stoddard, Edgar S., assignor.)
Consortium fuer Elektrochemische Industrie, G. m. b. H. (See Hermann, W. O., and Deutsch.)
Continental Can Company. (See Punte, William F., assignor.)
Cook, Asa S., Company, The. (See Crosby, R. S., and Sponsel, assignors.)
Cook Electric Company. (See Persons, Lawrence M., assignor.)
Coomber, Louis L., Freeport, Ill. Wheel ramp. 1,902,218; Mar. 21.
Cooper, Glenn A. (See Back, R., and Cooper.)
Cooper, William, & Newphews Incorporated. (See Timson, Charles E., assignor.)
Copeland Products, Inc. (See Replogle, John B., assignor.)
Copeman Laboratories Company. (See Copeman, Lloyd G., assignor.)
Copeman, Lloyd G., assignor to Copeman Laboratories Company, Flint, Mich. Refrigerating apparatus. 1,902,016; Mar. 21.
Corke, Ruloff D., Yonkers and Frederik Hansen, White Plains, N. Y. Combination holder and cover for bottles. 1,902,354; Mar. 21.
Cornic, Emil, Paris, France. Umbrella. 1,902,395; Mar. 21.
Coronet Phosphate Company. (See Gooch, S. D., and Kerschbaum, assignors.)
Corporon, George J., Hooksett, N. H. Table leg brace. 1,902,690; Mar. 21.
Costello, Joseph P., assignor to Collins & Aikman Corporation, Philadelphia, Pa. Stop motion for looms. 1,902,302; Mar. 21.
Coty, Inc. (See Tourtois, Fernand, assignor.)
Covey, Clarence F., assignor to McAuley Automatic Trap Company, Pittsburgh, Pa. Steam trap. 1,902,219; Mar. 21.
Cox, Nostrand and Gunnison. (See Gallagher, Vincent J., assignor.)
Crago, Harry R., Schenectady, N. Y., assignor to General Electric Company. Electroresponsive latching mechanism. 1,902,490; Mar. 21.
Creamery Package Mfg. Company, The. (See Hippenmeyer, Irving R., assignor.)
Crews, Clarence S. (See Maxam, Leonard L., assignor.)
Critchett, James H., Douglaston, N. Y., assignor to Electro Metallurgical Company. Production of alloy surface castings. 1,902,059; Mar. 21.
Croft, Hiram D. (See Perkins, J. L., and Croft.)
Crosby, Reuben S., Hartford, and C. W. Sponsel, Wethersfield, assignors to The Asa S. Cook Company, Hartford, Conn. Screw making machine. 1,902,117; Mar. 21.
Crossman, Archibald K., Oakland, Calif. Nonglare reflector. 1,902,321; Mar. 21.
Cuming, George W., New York, N. Y., assignor to M. A. Cuming & Co. Inc. Machine for treating hat bodies. 1,902,118; Mar. 21.
Cuming, M. A., & Co. Inc. (See Cuming, George W., assignor.)
Cumming, Alexander, jr., assignor to Bristol Nurseries, Inc., Bristol, Conn. Chrysanthemum. Pl. Pt. 58; Mar. 21.
Curtis Companies. (See Bell, Forrest F., assignor.)
Curtiss Aeroplane & Motor Company. (See Hathorn, Charles E., assignor.)
Curtiss Aeroplane & Motor Company. (See Page, George A., jr., assignor.)
Curtiss Aeroplane & Motor Company. (See Pearson, Fred A. A., assignor.)
Curtiss Aeroplane & Motor Company. (See Trimbach, Clem G., assignor.)
Curtiss Aeroplane & Motor Company. (See Vaughn, Stanley I., assignor.)
Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)
Czapiewski, Frank M., Milwaukee, Wis. Wind indicator for airplane landing fields. 1,902,763; Mar. 21.
Dabrasky, August, Washington, D. C. Supplying cartridge belts to a feed mechanism. 1,901,868; Mar. 21.
Dahl, Otto, Berlin-Wilmersdorf, and J. Pfaffenberger, Berlin-Mariendorf, Germany, assignors to General Electric Company. Magnetic core. 1,902,491; Mar. 21.
Dahlstrom Metallic Door Company. (See Rose, Gustaf A., assignor.)
Daly, George F., and R. E. Page, assignors to The Tabulating Machine Company, Endicott, N. Y. Tabulating machine for nondecimal systems. 1,902,017; Mar. 21.
D'Andrea, Michael, assignor of one-half to E. J. Stieger, St. Paul, Minn. Stencil cabinet. 1,902,220; Mar. 21.
Dansboe, Harry H., Dallas, Tex., assignor to General Electric Company. Protective device for walking beam pumping rigs. 1,902,492; Mar. 21.
Dantsizen, Christian, Schenectady, N. Y., assignor to General Electric Company. Wire making process. 1,902,493; Mar. 21.
Daux, Gaston, Sevran, France, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure regulator. 1,901,900; Mar. 21.
David, Bruce W., Cleveland Heights, Ohio, assignor to The Moonbeam Manufacturing Company. Signal viewing attachment for automobiles. 1,902,322; Mar. 21.
Davis, Ernest, assignor to The Prosperity Company Inc., Syracuse, N. Y. Actuating mechanism for pressing machines. 1,902,018; Mar. 21.
Davis, Sidney H., and C. O. Anderson, Baxter Springs, Kans., W. N. Smith, Platteville, Wis., and H. R. Hanley, Rolla, Mo., assignors to The Century Zinc Company. Zinc coated article. 1,902,621; Mar. 21.
Davison, Goliat, assignor of one-third to J. Speroulias and one-third to G. Abatgis, St. Louis, Mo. Hanger for fur scarfs and the like. 1,902,622; Mar. 21.
Day, David E., Los Angeles, Calif. Purifying naphtha stocks. 1,902,221; Mar. 21.
Day, Levi, and W. van Ee, Long Beach, Calif. Tubing cutter. 1,902,355; Mar. 21.
Day, Salisbury M., assignor to General Railway Signal Company, Rochester, N. Y. Flashing light signal. 1,902,799; Mar. 21.
Dayton Air Compressor Company, The. (See Gurley, John W., assignor.)
Dayton Scale Company. (See Ford, Eugene A., assignor.)
Dayton Scale Company. (See Fuller, Frederick L., assignor.)
Dayton Scale Company. (See Reussenzehn, Ernst A., assignor.)
Dechêne, Peter, Berlin, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y. Printing mechanism. 1,902,060; Mar. 21.
Deere & Company. (See Johnson, Christian E., assignor.)
De Ferranti, Gertrude R. Z., legal representative. (See de Ferranti, Sebastian Z.)
De Ferranti, Sebastian Z., deceased, Hollinwood, by G. R. Z. de Ferranti, London, England, legal representative, assignor to Ferranti Inc., New York, N. Y. Prepayment electricity meter. 1,902,396; Mar. 21.
De Give, Henry L., executor. (See de Give, Julius L., assignor.)
De Give Julius L., deceased, Atlanta, Ga.; Henry L. de Give, executor. Mail bag. 1,902,764; Mar. 21.
Dehydro Company, The. (See Kaplan, Philip, assignor.)
Deitsch, Carl E., Marion, Ohio. Safety cut-out switch. 1,902,765; Mar. 21.
Delage & Cie. (See Eimer, Ernest, assignor.)
De Land, John Del Rea, Pico, Calif. Orchard protective system. 1,902,119; Mar. 21.
Dellinger, Martin C. (See Kulp, H. W., and Dellinger.)
De Loach, Bert H., et al. (See Foss, Leland L., assignor.)
Delta Manufacturing Company. (See Tate, James, assignor.)

De Monge, Gérard, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli, Societa Anonima, Milan, Italy. Chamber of variable volume. 1,902,823; Mar. 21.
De Monge, Gérard, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli, Societa Anonima, Milan, Italy. System for transmitting movement. 1,902,856; Mar. 21.
De Nio, Edgar, Woodford, N. Y. Scraping and cleaning implement. 1,902,766; Mar. 21.
Deppe, William P. (See Musso, Alfred, assignor.)
Detachable Bit Corporation of America. (See Rea, Walter C., assignor.)
Dettlebach, Samuel E., et al. (See Jaworowski, Joseph F., assignor.)
Deutsch, Hans. (See Herrmann, W. O., and Deutsch.)
De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 1,902,120; Mar. 21.
Diamond Power Specialty Corporation. (See Thomas, Willis P., assignor.)
Dickey, John H., Wenatchee, Wash., assignor to Stark Bro's. Nurseries & Orchards Company, Louisiana, Mo. Apple tree. Pl. Pt. 57; Mar. 21.
Dickson, George F., assignor to G. A. Pearson and L. Minter, Chicago, Ill. Marking containers for ice cream and the like. 1,902,543; Mar. 21.
Diefenbach, Ernst. (See Kraeuslein, G., and Diefenbach.)
Ditchfield, Frank, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. Grain door for cars. 1,902,544; Mar. 21.
Ditchfield, Frank, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. Grain door for cars. 1,902,545; Mar. 21.
Ditchfield, Frank, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. Metal door construction. 1,902,546. Mar. 21.
Ditto Incorporated. (See Bates, Albert J., assignor.)
Dixon, John B., Red Bank, and E. M. Honan, West Orange, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing of electrical contacts. 1,901,901; Mar. 21.
Doherty Research Company. (See Gordon, Philip C., assignor.)
Dorfan, Morton I., assignor to Pangborn Corporation, Hagerstown, Md. Pneumatic cleaning air treatment. 1,902,061; Mar. 21.
Dorst, James, and P. Bachhuber, Mayville, Wis. Freewheeling attachment. 1,902,623; Mar. 21.
Dortmunder, Vulkan A. G. (See Hegemann, Otto, assignor.)
Dotterweich, Andrew J., assignor to Automatic Water Softener Company, Pittsburgh, Pa. Valve mechanism. 1,902,624; Mar. 21.
Dougherty, Robert J., Ambler, assignor to John Wood Manufacturing Company, Conshohocken, Pa. Electrical controlling system for gas water heaters. 1,902,803; Mar. 21.
Dow Chemical Company, The. (See Harlow, I. F., Kenaga, and Dressel, assignors.)
Dow Chemical Company, The. (See Plant, R. A., and Brooks, assignors.)
Dow Chemical Company, The. (See Schwegler, Clarence C., assignor.)
Downie, Robert R., Beaver Falls, Pa. Excavating machine. 1,902,691; Mar. 21.
Downie, Robert R., Beaver Falls, Pa. Excavating machine. 1,902,692; Mar. 21.
Downie, Robert R., Beaver Falls, Pa. Excavating machine. 1,902,693; Mar. 21.
Doyle, Otis F., New Orleans, La. Sheet piling bulkheads. 1,902,397; Mar. 21.
Drapeau, Joseph E., jr. (See O'Brien, W. J., and Drapeau.)
Draper, Ernst E., Scarsdale, assignor to The Perser Corporation, New York, N. Y. Metal binding. 1,901,902; Mar. 21.
Dreibuss, Harry C., and G. S. Chiles, assignors to Scullin Steel Company, St. Louis, Mo. Truck side frame. 1,902,805; Mar. 21.
Dreibuss, Harry C., and G. S. Chiles, assignors to Scullin Steel Co., St. Louis, Mo. Truck bolster. 1,902,806. Mar. 21.
Dreibuss, Harry C., and G. S. Chiles, assignors to Scullin Steel Co., St. Louis, Mo. Reenforced truck bolster. 1,902,807; Mar. 21.
Dressel, Grayton F. (See Harlow, I. F., Kenaga, and Dressel.)
Dresser, S. R., Manufacturing Company. (See Whitaker, Louis P., assignor.)
Dreux, Alexander H., Buffalo, N. Y., assignor to F. N. Burt Company, Ltd., Toronto, Ontario, Canada. Sifter container. 1,902,324; Mar. 21.
Duart Manufacturing Co. Ltd. (See Moseley, Tomlinson I., assignor.)
Dubbs, Carhon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Apparatus for treating petroleum and other hydrocarbons. 1,901,950; Mar. 21.
Dube, Isadore H., Cincinnati, Ohio. Match box. 1,902,767; Mar. 21.
Dudley Lock Corporation. (See Buettner, R. J., Found, Muntner, Neits, and Zansig, assignors.)
Duer, Edward C., assignor of one-half to J. Harrah, Los Angeles, Calif. Rotary internal combustion engine. 1,902,768; Mar. 21.
Duesenberg, Frederick S., assignor to Duesenberg, Inc., Indianapolis, Ind. Damping device for crank shafts. 1,902,787; Mar. 21.
Duesenberg, Inc. (See Duesenberg, Frederick S., assignor.)
Duffy, Tom I., assignor, by mesne assignments, to Young Motor Trunk Company, Flint, Mich. Running board trim and securing means. 1,901,899; Mar. 21.
Dunham, Arthur L., Tomkinsville, N. Y. Method and apparatus for sterilizing. 1,902,825; Mar. 21.
Dunham, Carlton R., and A. H. Roche, Aldwych, London, England, assignors to Western Electric Company, Incorporated, New York, N. Y. Multiplex telegraph distributor. 1,901,951; Mar. 21.
Du Pont, E. I., de Nemours & Company. (See Kirst, William E., assignor.)
Du Pont, E. I., de Nemours & Company. (See Williams, I., and Neal, assignors.)
Duryea, O. C., Corporation. (See Duryea, Otho C., assignor.)
Duryea, Otho C., Waterbury, Conn., assignor to O. C. Duryea Corporation, Wilmington, Del. Car construction. 1,902,019; Mar. 21.
Edison, Thomas A., Incorporated. (See Smith, B. M., Langley, and Braun, assignors.)
Edsall, William S., Brookline, assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass. Circuit interruption. 1,902,357; Mar. 21.
Edwards, Reid A., Albert Lea, Minn. Gymnastic apparatus. 1,902,694; Mar. 21.
Edwards, Russell T., assignor to Signode Steel Strapping Company, Chicago, Ill. Sealing tool. 1,901,906; Mar. 21.
Edwards, Walter, Luton, England. Cartridge. 1,902,695; Mar. 21.
Eggen, Oscar E., Charles City, Iowa, assignor to Oliver Farm Equipment Company. Device for synchronizing the speed of a vehicle with the steering mechanism thereof. 1,902,626; Mar. 21.
Ehrlich, William, Chicago, Ill. Safe. 1,901,904; Mar. 21.
Eimer, Ernest, assignor to Delage & Cie., Courbevoie, France. Valve control gear for internal combustion engines. 1,902,696; Mar. 21.
Eisinger, Rudolph J. (See Reavis, A. B., and Isinger.)
Ekstergian, Carolus L., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Making wheel hubs. 1,902,222; Mar. 21.
Ekstergian, Carolus L., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Making hubs. 1,902,223; Mar. 21.
Ekstergian, Carolus L., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Making wheel hubs. 1,902,224; Mar. 21.
Elbogen, Paul, Mount Kisco, assignor of one-third to G. D. Kratz, Scarsdale, N. Y. Mold and making the same. 1,902,627; Mar. 21.
Elder, Willis G., West Somerville, Mass. Filter. 1,902,435; Mar. 21.
Electric Vacuum Cleaner Company, Inc. (See Tutsur, Julius, assignor.)
Electro Metallurgical Company. (See Critchett, James H., assignor.)
Electro Metallurgical Company. (See Norwood, Stanley M., assignor.)
Ellen, Samuel. (See Zullig, Emil G., assignor.)
Ellingsen, Frank, Brea, assignor to Chilsan Oil Tool Company, Fullerton, Calif. Coupling. 1,902,697; Mar. 21.
Emerson, Sam W., et al. (See Jaworowski, Joseph F., assignor.)
Emerson, Victor L., Philadelphia, Pa. Variable radius attachment for milling, planing, grinding, or scraping machines. 1,901,952; Mar. 21.
Emmet, William L. R., Schenectady, N. Y., assignor to General Electric Company. Cylinder head fastening means. 1,902,494; Mar. 21.
Endter, Waldemar A., Long Beach, Calif. Rotary belt doorlock. 1,902,547; Mar. 21.
Endter, Waldemar A., Long Beach, Calif. Doorlock. 1,902,628; Mar. 21.
Erfass, Ragnar. (See Ousbäck, Mats, G. H., assignor.)
Eschmann, Max. (See Steinbuch, E., Eschmann, and Schwammberger.)
Esdorn, John H., New Rochelle, N. Y. Store fixture display molding. 1,902,769; Mar. 21.
Evans, Benjamin. (See Sutton, H., Sidery, and Evans.)
Evans, Drue M. (See Beardsley, E. W., and Evans.)
Evans Elevator Equaliser Company. (See Frost, William P., assignor.)
Evans Flexible Reamer Corporation. (See Evans, William H., assignor.)
Evans, Harold, Niagara Falls, Ontario, Canada, assignor to Pollard Machinery Company, Niagara Falls, N. Y. Stone cutting machine. 1,902,279; Mar. 21.
Evans, Sylvester M., Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio. Manufacturing vulcanized rubber and products obtained thereby. 1,902,896; Mar. 21.
Evans, William F., South Bend, Ind., assignor, by mesne assignments, to Bendix Aviation Corporation, New York, N. Y. Drum truing machine. 1,902,629; Mar. 21.
Evans, William H., assignor to Evans Flexible Reamer Corporation, Chicago, Ill. Expansion reamer. 1,902,062; Mar. 21.
Ewing, Herbert O., Middleport, Ohio. Internal combustion engine. 1,902,020; Mar. 21.

Fabrica Italiana Magneti Marelli, Societa Anonima. (See de Monge, Gérard, assignor.)
Faigle, Carl. (See Faigle, Friedrich and C.)
Faigle, Friedrich and C., Hard, near Bregenz, Austria. Apparatus for the multiple or multicolor dyeing of hanks of yarn. 1,902,358; Mar. 21.
Fair, Frank. (See Morgen, R. A., and Fair.)
Fairchild, Alice M., assignor, by mesne assignments, to The Mantle Lamp Company of America, Chicago, Ill. Ceramic catalyzer. 1,902,630; Mar. 21.
Falulah Paper Company. (See Lowe, Joseph A., assignor.)
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 1,901,905; Mar. 21.
Farmer, John A., Lancaster, and H. A. Fichter, Pittsburgh, assignors to Armstrong Cork Company, Lancaster, Pa. Life preserver. 1,901,906; Mar. 21.
Felt & Tarrant Mfg. Company, (See Turck, Joseph A. V., assignor.)
Fenwick, Francis F., jr., East Orange, N. J. Water carrier and the like. 1,902,548; Mar. 21.
Ferranti Inc. (See de Ferranti, Sebastian Z., assignor.)
Ferrario, Achille, Milan, Italy. Propeller with automatic regulation. 1,901,963; Mar. 21.
Ferris, John P., assignor to The Oilgear Company, Milwaukee, Wis. Hydraulic drive. 1,902,487; Mar. 21.
Ferris, John P., Whitefish Bay, Wis., D. Clute, Detroit, Mich., and R. Wiedmann, assignors to The Oilgear Company, Milwaukee, Wis. Furnace operating mechanism. 1,902,063; Mar. 21.
Fiat Società Anonima. (See Pirinoli, Guglielmo, assignor.)
Fichter, Henry A. (See Farmer, J. A., and Fichter.)
Fiegel, William J., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich. Method and apparatus for tinning connecting rod bearings. 1,902,770; Mar. 21.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole laying machine. 1,902,325; Mar. 21.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole laying machine. 1,902,899; Mar. 21.
Firebar Corporation. (See Thompson, James S., assignor.)
Fischer, Albert. (See Baumann, P., Schilling, and Fischer.)
Fischer, Albert C., Chicago, Ill., assignor to the Philip Carey Manufacturing Company. Expansion joint. 1,901,870; Mar. 21.
Fitz Gerald, Alan S., Wynnewood, Pa., assignor to General Electric Company. Electric power converting apparatus. 1,902,495; Mar. 21.
Fitz Gerald, Alan S., Wynnewood, Pa., assignor to General Electric Company. High frequency measurement. 1,902,496; Mar. 21.
Flanagan, George J., Chicago, Ill., Earle C. Grannan, executor. Bookholder. 1,902,549; Mar. 21.
Flintermann, Gerhard, West Orange, N. J. Seat. 1,902,631; Mar. 21.
Flintermann, Gerhard, West Orange, N. J. Adjustably supported seat. 1,902,632; Mar. 21.
Flintkote Corporation, The. (See Kirschbraun, Lester, assignor.)
Flüga Aktiengesellschaft. (See Heylandt, Christian W. P., assignor.)
Foley, John R., New York, N. Y. Insulated article. 1,902,438; Mar. 21.
Foley, William J., West Somerville, Mass. Fountain pen. 1,902,633; Mar. 21.
Foote-Burte Company, The. (See Randles, George E., assignor.)
Forbes, Kingston, Flint, assignor to General Motors Corporation, Detroit, Mich. Radiator shutter. Des. 89,503; Mar. 21.
Ford, Eugene A., Scarsdale, N. Y., assignor to Dayton Scale Company, Dayton, Ohio. Slicing machine. 1,902,021; Mar. 21.
Ford, Eugene A., Scarsdale, assignor to The Tabulating Machine Company, Endicott, N. Y. Perforating machine. 1,902,064; Mar. 21.
Foreman, Robert A., Moores, Pa., assignor to Westinghouse Electric & Manufacturing Company. Furnace. 1,902,359; Mar. 21.
Forney Combustion Engineering Company. (See Forney, Ross H., assignor.)
Forney, Ross H., assignor to Forney Combustion Engineering Company, Dallas, Tex. Fuel burner. 1,902,225; Mar. 21.
Forrest, Henry O., Andover, Mass., and P. K. Frolich, Elizabeth, N. J., assignors to National Synthetic Corporation, Painesville, Ohio. Oxidising cyclic organic compounds. 1,902,550; Mar. 21.
Foss, Leland L., Statesboro, assignor of fourteen per cent to R. T. Skeffington, fourteen per cent to B. H. DeLoach, and three per cent to A. H. Barrington, Savannah, fourteen per cent to L. V. Graham, Chatham County, and five per cent to S. J. Foss, Statesboro, Ga. Flying worm steam motor. 1,902,439; Mar. 21.
Foss, Sam J., et al. (See Foss, Leland L., assignor.)
Foster, Walter W., Wichita Falls, Tex. Pump rod stuffing box mounting. 1,902,360; Mar. 21.
Found, Robert A. (See Buettner, R. J., Found, Muntner, Neita, and Zanzig.)
Fraser, Joseph C. W., Baltimore, Md., and L. S. Kassel; said Kassel assignor to Carbon Monoxide Eliminator Corporation, Pittsburgh, Pa. Using oxidation catalysts. 1,902,160; Mar. 21.
Fredrickson, Milton O., San Pedro, Calif. Wedge removing tool for electric motors and generators. 1,902,551; Mar. 21.
French Battery Company. (See Shannon, James L., assignor.)
Friedberger-Aaron Manufacturing Company. (See Goldsmith, Edwin M., assignor.)
Frigidaire Corporation. (See Hofferberth, George F., assignor.)
Frigidaire Corporation. (See Mann, Cecil A., assignor.)
Froelicher, Victor, Ridgewood, N. J., assignor to Textile Dyeing and Printing Co. of America, Inc. Weighted silk and weighting the same. 1,902,226; Mar. 21.
Frolich, Per K. (See Forrest, H. O., and Frolich.)
Foster Wheeler Corporation. (See Connelly, Lawrence E., assignor.)
Fox, Jonas H., Seattle, Wash. Boiler. 1,902,159; Mar. 21.
Frelin, Fritjof, Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Pump. 1,902,065; Mar. 21.
Frost, William J., Jackson Heights, N. Y., assignor to Evans Elevator Equaliser Company, Bedford, Ind. Suspension device for equalising the strain on elevator cables. 1,902,161; Mar. 21.
Fruth, Hal F., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Liquid spray device. 1,901,954; Mar. 21.
Fuller, Frederick L., West Orange, N. J., assignor to Dayton Scale Company, Dayton, Ohio. Computing scale. 1,902,066; Mar. 21.
Fuller, Frederick L., West Orange, N. J., assignor to International Time Recording Company, New York, N. Y. Time recorder. 1,902,067; Mar. 21.
Fulton, Otho, Bromley, England. Apparatus for picture transmission or the like. 1,902,552; Mar. 21.
Gaidos, Alonzo F., Redwood City, Calif. Practice cartridge. 1,902,771; Mar. 21.
Gaisman, Henry J., New York, N. Y., assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass. Metal sharpening machine. 1,902,022; Mar. 21.
Gallagher, Vincent J., Pelham, assignor to Cox, Nostrand and Gunnison, Brooklyn, N. Y. Shade holder for lighting fixtures. 1,902,023; Mar. 21.
Gallagher, Walter J., New York, N. Y. Advertising folder. 1,902,121; Mar. 21.
Garretson, Harry D., assignor to H. F. Waite, New York, N. Y. High potential current unidirectional system and method. 1,902,227; Mar. 21.
Garretson, Harry D., assignor to H. F. Waite, New York, N. Y. Impulse timer. 1,902,228; Mar. 21.
Gasser, Leonides J. (See Gasser, Victor E. and L. J.)
Gasser, Victor E. and L. J., Madison, Wis. Collapsible tube cap. 1,902,698; Mar. 21.
Gebhardt, Frank C., assignor to United Oil Manufacturing Company, Erie, Pa. Grease and making the same. 1,902,635; Mar. 21.
Geer, Paul L., Bellevue, assignor to The Amsler-Morton Company, Pittsburgh, Pa. Apparatus for annealing glassware. 1,902,326; Mar. 21.
Geiger, William A., assignor to W. H. Miner, Inc., Chicago, Ill. Railway draft rigging. 1,902,636; Mar. 21.
Geis, Wilhelm T., Knapsack, near Cologne-on-the-Rhine, assignor to Aktiengesellschaft für Stickstoffdünger, Cologne-on-the-Rhine, Germany. Highly active carbon and preparing it. 1,902,068; Mar. 21.
Geloso, John. (See Bjorkman, George E., and Geloso.)
General Aniline Works, Inc. (See Huismann, J., and Schweitzer, assignors.)
General Aniline Works, Inc. (See Kraenzlein, G., and Diefenbach, assignors.)
General Atlas Carbon Company. (See Beaver, David J., assignor.)
General Atlas Chemical Company. (See Burke, Stephen P., assignor.)
General Electric Company. (See Acheson, Marcus A., assignor.)
General Electric Company. (See Acheson, M. A., and Zebner, assignors.)
General Electric Company. (See Anderson, Arvid E., assignor.)
General Electric Company. (See Andrews, Paul D., assignor.)
General Electric Company. (See Arkenburgh, Weber H., assignor.)
General Electric Company. (See Butler, H. R., and Young, assignors.)
General Electric Company. (See Calvert, Francis V., assignor.)
General Electric Company. (See Carlson, George, assignor.)
General Electric Company. (See Clark, Frank M., assignor.)
General Electric Company. (See Crago, Harry R., assignor.)
General Electric Company. (See Dahl, O., and Pfaffenberger, assignors.)
General Electric Company. (See Dansboe, Harry H., assignor.)
General Electric Company. (See Dantsizen, Christian, assignor.)

General Electric Company. (See Emmet, William L. R., assignor.)
General Electric Company. (See Fitz Gerald, Alan S., assignor.)
General Electric Company. (See Green, Charles F., assignor.)
General Electric Company. (See Hall, Chester I., assignor.)
General Electric Company. (See Henshaw, Marshall D., assignor.)
General Electric Company. (See Hill, C. H., and Swerdlow, assignors.)
General Electric Company. (See Hobart, H. M., Stebbins, and Gettelman, assignors.)
General Electric Company. (See Hofmann, Walter, assignor.)
General Electric Company. (See Howe, Goodwin H., assignor.)
General Electric Company. (See Howell, Fred B., assignor.)
General Electric Company. (See Johnson, Wilfrid B., assignor.)
General Electric Company. (See Juhlin, Gustaf A., assignor.)
General Electric Company. (See Kearsley, William K., assignor.)
General Electric Company. (See McEachron, K. B., and Wade, assignors.)
General Electric Company. (See Mittag, Albert H., assignor.)
General Electric Company. (See Orr, Clark, assignor.)
General Electric Company. (See Palmer, Harry L., assignor.)
General Electric Company. (See Paul, William E., assignor.)
General Electric Company. (See Pratt, William H., assignor.)
General Electric Company. (See Ratkovsky, Ferencz, assignor.)
General Electric Company. (See Sabbah, Camil A., assignor.)
General Electric Company. (See Seede, John A., assignor.)
General Electric Company. (See Steenstrup, Christian, assignor.)
General Electric Company. (See Thomson, Elihu, assignor.)
General Electric Company. (See Ungelenk, A., and Hoffman, assignors.)
General Electric Company. (See Valentine, Irving R., assignor.)
General Electric Company. (See Walle, Ludwig S., assignor.)
General Electric Company. (See Warner, Donald F., assignor.)
General Electric Company. (See Warren, H. W. H., Newbound, and Ward, assignors.)
General Electric Company. (See Wiegand, Erich, assignor.)
General Electric Company. (See Woodruff, Henry S., assignor.)
General Electric Company. (See Woods, William J., assignor.)
General Health Corporation. (See Brown, Franklin, assignor.)
General Motors Corporation. (See Forbes, Kingston, assignor.)
General Motors Radio Corporation. (See Brump, H. L. and Frederick O. and F. E., Gray, assignors.)
General Railway Signal Company. (See Day, Salisbury M., assignor.)
General Railway Signal Company. (See Taylor, Herbert B., assignor.)
General Railway Signal Company. (See Willing, Joseph E., assignor.)
Georgoff, Jordan A., Harbin, China. Circulating system. 1,901,871; Mar. 21.
Gerjets, Harry H., Bellingham, Wash. Cigarette receptacle and roller. 1,902,699; Mar. 21.
Gerlach, Hugh. (See Gerlach (née Parker), B. E., and Gerlach.)
Gerlach (née Parker), Bessie E., and H. Gerlach, London, England. Type cleaning instrument. 1,902,024; Mar. 21.
Gesellschaft für Kohlentechnik mit beschränkter Haftung. (See Glund, Wilhelm, assignor.)
Gessner, Ernest, Aktiengesellschaft. (See Wensel, Emil, assignor.)
Gettelman, Arthur F. (See Hobart, H. M., Stebbins, and Gettelman.)
Gewerkschaft Wallram. (See Mentsch, Adolf, assignor.)
Giaimo, Charles V., Irvington, N. J., assignor to The Lionel Corporation, New York, N. Y. Making commutators. 1,901,955; Mar. 21.
Gilbert, Tilmon I., Mount Vernon, Ill. Weir structure. 1,901,956; Mar. 21.
Gill, Edwin R., jr., Yonkers, N. Y., assignor to Prismo Holding Corporation. Sign. 1,902,440; Mar. 21.
Gillette Safety Razor Company. (See Anderson, Louis W., assignor.)
Gillette Safety Razor Company. (See Gaisman, Henry J., assignor.)
Gillette Safety Razor Company. (See Schumacher, Conrad R., assignor.)
Gilpin, Garth G., Riverside, assignor to Railway Metal Products Company, Chicago, Ill. Railway car door fixture. 1,902,772; Mar. 21.
Gioiosa, Joseph, Milton, Mass. Machine for forming waterproof tubing around firework fuse material. 1,902,123; Mar. 21.
Girdwood, Kennet J., Montreal, Quebec, Canada. Revolving parachute. 1,901,957; Mar. 21.
Giuliano, Ronald, South Orange, N. J. Protective head covering. 1,902,441; Mar. 21.
Gluud, Wilhelm, assignor to Gesellschaft für Kohlentechnik mit beschränkter Haftung, Dortmund-Eving, Germany. Producing guanidine-thiocyanate. 1,902,400; Mar. 21.
Goddu, George, Winchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting machine. 1,902,162; Mar. 21.
Goerts, Frederick. (See Baltsley, L. E., and Goerts.)
Goetselman, William, Chicago, Ill., assignor to Appleton Electric Company. Pipe connector. 1,902,329; Mar. 21.
Goldsmith, Alfred N., and I. Welt, New York, N. Y., assignors to Radio Corporation of America. Sound reproducer. 1,902,442; Mar. 21.
Goldsmith, Edwin M., assignor to Friedberger-Aaron Manufacturing Company, Philadelphia, Pa. Buttonhole tape. 1,902,553; Mar. 21.
Gooch, Stapleton D., Lake Wales, and F. P. Kerschbaum, Winter Haven, Fla., assignors to Coronet Phosphate Company, New York, N. Y. Producing red phosphorus. 1,902,144; Mar. 21.
Gooderham, John W., Larchmont, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Substation circuit. 1,901,958; Mar. 12.
Goodman Manufacturing Company. (See Radius, Edward W., assignor.)
Goodman Manufacturing Company. (See Vodos, Frederick W., assignor.)
Goodrich, B. F., Company, The. (See Campbell, Arthur W., assignor.)
Goodrum, Charles L., Athens, Ga., assignor of one-half to L. G. Pacent, New York, N. Y. Control circuit for switches for automatic telephone systems. 1,902,123. Mar. 21.
Goodrum, Charles L., Athens, Ga., assignor of one-half to L. G. Pacent, New York, N. Y. Switch control mechanism for automatic telephone systems. 1,902,163; Mar. 21.
Gordon, Philip C., assignor to Doherty Research Company, New York, N. Y. Flexible transmission. 1,902,800; Mar. 21.
Goss, Byron C., Cleveland, Ohio. System for protecting banks, stores and the like, against robbery, by gas and smoke. 1,901,959; Mar. 21.
Goss, Byron C., Cleveland, Ohio. Insecticidal solution. 1,901,960; Mar. 21.
Gotteman, Joseph M., Paris, France, assignor to William Willhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,504; Mar. 21.
Graham, Lee V., et al. (See Foss, Leland L., assignor.)
Grannan, Earle C., executor. (See Flanagan, George J., assignor.)
Grant, William F., Newport News, Va., assignor to Newport News Shipbuilding and Dry Dock Company. Rotary valve. 1,901,961. Mar. 21.
Grauer, Solomon, Brooklyn, N. Y. Sadiron. 1,902,025; Mar. 21.
Gray, Floyd E. (See Brump, H. L., and Frederick O. and F. E. Gray.)
Gray, Frederick O. (See Brump, H. L., and Frederick O. and F. E. Gray.)
Gray & Prior Machine Company, The. (See Prior, George A., assignor.)
Grayson Heat Control Inc. (See Vaughn, Sidney P., assignor.)
Great Western Fuse Company. (See La Mar, Frank C., assignor.)
Green, Charles F., Schenectady, N. Y., assignor to General Electric Company. Indicating device. 1,902,497; Mar. 21.
Greene, Haskell M., Whittier, Calif. Device for indicating tension and length of lines in oil wells. 1,901,962; Mar. 21.
Greene, Lynn M. (See Miller, L. M., Greene, Miller, and Calkins.)
Grob, Hugo, Berlin, Germany. Voltage regulating apparatus. 1,902,554; Mar. 21.
Gross, Nathan A., assignor to W. Gross, Fords, N. J. Drop seat pajama. 1,902,624; Mar. 21.
Gross, William. (See Gross, Nathan A., assignor.)
Grow, John H., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Apparatus for treating objects. 1,902,687; Mar. 21.
Grumman, Fred C., Norwalk, Conn., assignor to Mergenthaler Linotype Company. Matrix cabinet. 1,902,443; Mar. 21.
Guhl, Maclyn, Forest Hills, assignor to William Willhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,505; Mar. 21.
Gühring, Eugen. (See Hagedorn, M. Reichert, and Gühring.)
Guiberson Diesel Engine Company. (See Thaheld, Paul A., assignor.)

Gundersen, Otto C. N., Spokane, Wash. Fire escape. 1,902,230; Mar. 21.
Gunning, William A., assignor to American Optical Company, Southbridge, Mass. Ophthalmological apparatus. 1,902,401; Mar. 21.
Gurley, John W., Miamisburg, assignor to The Dayton Air Compressor Company, Dayton, Ohio. Automatic unloading check valves. 1,902,281; Mar. 21.
Gustafsson, Emil G. T., Stockholm, Sweden. Melting metals in electric furnaces. 1,902,638; Mar. 21.
Guthrie, James M., et al. (See Barnhart, G. E., and Pfaff, assignors.)
Guyler, Albert F. (See Welch, S. A., Guyler, Ashby, and Boaler.)
Hadano, Rinjiro, Honolulu, Hawaii. Switch for direction indicators. 1,902,700; Mar. 21.
Haegg, Rudolph A., assignor to Burd High Compression Ring Company, Rockford, Ill. Piston ring snagging machine. 1,902,164; Mar. 21.
Haertel, Walter G., Minneapolis, Minn. Cleaner for furs and the like and cleaning. 1,902,232; Mar. 21.
Hagedorn, Max, O. Reichert, and G. Gühring, Dessau in Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Making mixed cellulose esters and cellulose ether esters. 1,902,280; Mar. 21.
Hahn, Edgar, et al. (See Jaworowski, Joseph E., assignor.)
Halbig, Paul, and F. Kaufler, Munich, assignor to Dr. Alexander Wacker Gesellschaft fur Elektrochemische Industrie, Munich, Germany. Alkoxyldehyde and production of same. 1,902,070; Mar. 21.
Hale, William J., Midland, Mich. Protecting granules of hygroscopic sugars and article produced thereby. 1,902,778; Mar. 21.
Halfvarson, Gustaf A., Verona, Pa., assignor to Westinghouse Electric & Manufacturing Company. Brake. 1,902,640; Mar. 21.
Hall, Chester I., Philadelphia, Pa., assignor to General Electric Company. Continuous heat regulator. 1,902,327; Mar. 21.
Hall, Chester I., Philadelphia, Pa., assignor to General Electric Company. Control device. 1,902,498; Mar. 21.
Hall, Nelson W., assignor to Pass & Seymour, Inc., Syracuse, N. Y. Reflector socket. 1,902,026; Mar. 21.
Haller, Hervey H., assignor to The Wehr Motor Company, Los Angeles, Calif. Valve construction. 1,902,069; Mar. 21.
Halliwell, Robert G., Wilmette, Ill., assignor to Armstrong Cork Company, Lancaster, Pa. Building insulation and applying same. 1,902,639; Mar. 21.
Halloran, John P., Mayfield Heights, Ohio. Air driven automobile. 1,902,124; Mar. 21.
Hamersley, Carl S., New York, N. Y. Cushioning pad. 1,902,861; Mar. 21.
Hamilton Foundry and Machine Company, The. (See McDaniel, Donald, assignor.)
Hanavan, William L., Montclair, N. J. Receptacle and closure therefor. 1,902,362; Mar. 21.
Hanley, Herbert B. (See Davis, S. H., Anderson, Smith, and Hanley.)
Hansen, Frank A., Fergus Falls, Minn. Washing machine. 1,902,165; Mar. 21.
Hansen, Frederik. (See Corke, Ruloff D., assignor.)
Hansen, John P., Elmhurst, N. Y. Support and stretching mechanism for motion picture screens. 1,901,963; Mar. 21.
Hanson Scale Company. (See Hanssen, Stan L., assignor.)
Hanssen, Stan L., assignor to Hanson Scale Company, Chicago, Ill. Weighing scale. 1,902,233; Mar. 21.
Harford, Charles G., Quincy, Mass., assignor to The Philadelphia & Reading Coal & Iron Company, Philadelphia, Pa. Coating and coating composition. 1,902,642; Mar. 21.
Harlow, Ivan F., I. A. Kenaga, and G. F. Dressel, assignors to The Dow Chemical Company, Midland, Mich. Continuous process of preparing liquid bromide. 1,902,801; Mar. 21.
Harrah, John. (See Duer, Edward C., assignor.)
Harrod, Horace H., Morris, Ill. Ice cream container. 1,902,072; Mar. 21.
Harshberger, Norman P., Scarsdale, N. Y., assignor to Bakelite Building Products Company, Inc., New York, N. Y. Shingle. Re18,772; Mar. 21.
Harter, Evan C., Sturgis, Mich. Caster mechanism for stands and the like. 1,902,166; Mar. 21.
Hartford-Empire Company. (See Peiler, Karl E., assignor.)
Hartford-Empire Company. (See Rowe, George E., assignor.)
Hartford-Empire Company. (See Smith, Algy J., assignor.)
Harwick-Etter Company. (See Struen, John A., assignor.)
Hastell, William B., Springfield, Mass. Playground device. 1,901,964; Mar. 21.
Hassell, Marian E., and M. A. Todd, Miami, Fla., assignors of one-third to Starke Hassell, Greeneville, N. C. Egg carton. 1,902,167; Mar. 21.
Hassell, Starke. (See Hassell, M. E., and Todd, assignors.)
Hathorn, Charles E., Hempstead, N. Y., assignor to Curtiss Aeroplane & Motor Company. Stabilizer adjusting mechanism. 1,902,071; Mar. 21.
Haupt, Hans, Berlin, Germany. Telescopic umbrella. 1,902,363; Mar. 21.
Haupt, Hans, Berlin-Wilmersdorf, Germany. Telescopic umbrella. 1,902,774; Mar. 21.
Haveles, Evangel A., Los Angeles, Calif. Restaurant check holder. 1,902,641; Mar. 21.
Hazel, Melvin R., et al. (See Knight, Clarence F., assignor.)
Heckel, Hermann, Cincinnati, assignor to The Twitchell Process Company, St. Bernard, Ohio. Flexible transparent gelatinous product. 1,902,304; Mar. 21.
Hegemann, Otto, assignor of one-half to Dortmunder Vulkan A. G., Dortmund, Germany. Ship drive-coupling mechanism. 1,902,701; Mar. 21.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 89,506; Mar. 21.
Heints & Kaufman, Ltd. (See Heints, Ralph M., assignor.)
Heints Manufacturing Company. (See Lambert, Albert L., assignor.)
Heints, Ralph M., Palo Alto, assignor to Heints & Kaufman, Ltd., San Francisco, Calif. Receiver for continuous waves. 1,902,234; Mar. 21.
Heints, Ralph M., Palo Alto, assignor to Heints & Kaufman, Ltd., San Francisco, Calif. Radioreceiver power supply. 1,902,235; Mar. 21.
Heints, Ralph M., Palo Alto, assignor to Heints & Kaufman, Ltd., San Francisco, Calif. Connecting plug receptacle. 1,902,236; Mar. 21.
Helms, Waters L., Brooklyn, N. Y., assignor to The New Photomaton, Inc., New York, N. Y. Feeding mechanism for photographic strips. 1,902,281; Mar. 21.
Henkel, Norman F., Sheboygan, Wis. Relief valve. 1,902,027; Mar. 21.
Henny, David C., Portland, Oreg. Concrete dam. 1,902,168; Mar. 21.
Henshaw, Marshall D., Erie, Pa., assignor to General Electric Company. Driving apparatus for self-propelled vehicles. 1,902,500; Mar. 21.
Hering, Herbert C., Cincinnati, Ohio. Curtain display hanger. 1,902,402; Mar. 21.
Herreshoff, Alexander G., Highland Park, assignor to Chrysler Corporation, Detroit, Mich. Vehicle body door stiffener. 1,902,499; Mar. 21.
Herrmann, Karl, Vienna, Austria, assignor, by mesne assignments, to Bonicot Corporation of America. Rendering nonpoisonous the tobacco fumes during smoking. 1,902,775; Mar. 21.
Herrmann, Willy O., and H. Deutsch, assignors to Consortium fuer Elektrochemische Industrie, G. m. b. H., Munich, Germany. Producing unsaturated ethers. 1,902,169; Mar. 21.
Hesselman, Knut J. E., Saltsjo-Storangen, Sweden. Internal combustion engine. 1,902,776; Mar. 21.
Hewitt, William R., New York, N. Y. Combination fuel pump and carburetor. 1,902,403; Mar. 21.
Heyer, Don, Los Angeles, Calif. Frame for a power unit. Des. 89,507; Mar. 21.
Heylandt, Christian W. P., Berlin-Britz, Germany, assignor to Flüga Aktiengesellschaft, St. Moritz, Switzerland. Transferring liquefied gases. Re18,774; Mar. 21.
Heywood, Rushie F., Fulton, Ky. Combination cigarette holder and ash tray. 1,902,028; Mar. 21.
Hiering, William C., assignor to J. E. Mergott Company, Newark, N. J. Check protector. 1,901,907; Mar. 21.
Hiering, William C., assignor to J. E. Mergott Company, Newark, N. J. Bag frame fastener. 1,901,965; Mar. 21.
Higburg, William, and P. C. Reilly; said Higburg assignor to said Reilly, Indianapolis, Ind. Treating tar and like oils. 1,901,872; Mar. 21.
High, Jurjen S., Oaklyn Manor, N. J., assignor to Westinghouse Electric & Manufacturing Company. Electrical translating device. 1,902,643; Mar. 21.
Hilcken, Valentin, Gersthofen, near Augsburg, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preparing fatty acid esters of borneol and isoborneol. 1,902,364; Mar. 21.
Hilger, Adam, Limited. (See Twyman, Frank, assignor.)
Hill, Charles H., Drexel Hill, and N. Swerdlow, Philadelphia, Pa., assignors to General Electric Company. Bus bar structure. 1,902,501; Mar. 21.
Hills, William M., Hartford, Conn. Water heater. 1,902,365; Mar. 21.
Hilpert, Willis S., Winnetka, and E. S. Stoddard, Berwyn, assignors to The Conover Company, Chicago, Ill. Dishwashing machine. 1,902,237; Mar. 21.
Hintze, Harry, Paterson, N. J. Weighting of natural and artificial silk fibers. 1,902,777; Mar. 21.
Hintze, Harry, Paterson, N. J. Weighting of natural and artificial silk fibers. 1,902,778; Mar. 21.
Hippenmeyer, Irving R., Waukesha, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill. Can washing machine. 1,902,238; Mar. 21.
Hobart, Henry M., Niskayuna, F. O. Stebbins, Schenectady, N. Y., and A. F. Gettelman, Duluth, Minn., assignors to General Electric Company. Operating polyphase alternating current motors. 1,902,444; Mar. 21.
Hobart Manufacturing Company, The. (See Johnston, H. L., and Meeker, assignors.)
Hobbs, John W., assignor to Mechanics Universal Joint Company, Rockford, Ill. Automotive vehicle with radio equipment. 1,902,802; Mar. 21.

Hockensmith Wheel & Mine Car Company. (See Ogilvie, George E., assignor.)
Hofferberth, George F., assignor to Frigidaire Corporation, Dayton, Ohio. Refrigerating apparatus. 1,902,445; Mar. 21.
Hoffman, Frank K., Dunkirk, N. Y. Making radiator elements. 1,902,779; Mar. 21.
Hoffman, Ragnar E., Elmwood Park, and C. Paulson, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Apparatus for gauging material. 1,901,966; Mar. 21.
Hofmann, Walter. (See Ungelenk, A., and Hofmann.)
Hofmann, Walter, Erlangen, Germany, assignor to General Electric Company. X-ray tube. 1,902,502; Mar. 21.
Hoge, Daniel W., assignor to C. W. Newbery, Los Angeles, Calif. Treating resins. 1,902,073; Mar. 21.
Hoge, Daniel W., assignor to C. W. Newbery, Los Angeles, Calif. Motor fuel. 1,902,125; Mar. 21.
Holbert, Glen C., San Diego, Calif. Pipe straightening apparatus. 1,902,029; Mar. 21.
Holden Knitting Co. (See Holden, R. M., and Roberts, assignors.)
Holden, Roger M., and J. F. Roberts, assignors to Holden Knitting Co., Worcester, Mass. Knitted lining for rubber footwear and making same. 1,902,780; Mar. 21.
Holden, William H. T., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Gain control apparatus. 1,902,030; Mar. 21.
Holden, William H. T., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Filtering apparatus. 1,902,031; Mar. 21.
Holdgrafer, Clem, Clinton, Iowa. Bread serving appliance. 1,902,239; Mar. 21.
Holinger, Emil F., assignor to Hudson Electrical Heating Corporation, New York, N. Y. Electric house heater. 1,902,074; Mar. 21.
Holland Furnace Company. (See Selby, Charles M., assignor.)
Holmes, George A., Newton, assignor to United-Carr Fastener Corporation, Cambridge, Mass. Pin fastener. 1,902,447; Mar. 21.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Mining apparatus. 1,902,446; Mar. 21.
Holswarth, Hans, Dusseldorf, Germany, assignor to Holswarth Gas Turbine Co., San Francisco, Calif. Multistage constant volume explosion process and apparatus. 1,901,873; Mar. 21.
Holswarth Gas Turbine Co. (See Holswarth, Hans, assignor.)
Honan, Edward M. (See Dixon, J. B., and Honan.)
Hookless Fastener Company. (See Norton, Samuel H., assignor.)
Hookless Fastener Company. (See Piebl, Henry J., assignor.)
Hoover, Ray B., Oak Park, assignor to Shafer Bearing Corporation, Chicago, Ill. Antifriction bearing. 1,901,967; Mar. 21.
Hopkinson, Harry, and J. G. Britton, Lansdowne, assignors of one-third to T. R. Williams, Scranton, Pa. Plastic composition. 1,902,803; Mar. 21.
Horine, Irving, assignor to The Mengel Company, Louisville, Ky. Method of and apparatus for making flexible veneer. 1,902,032; Mar. 21.
Horton, George T., assignor to Chicago Bridge & Iron Company, Chicago, Ill. Floating roof and sealing means therefor. 1,901,874; Mar. 21.
Horvath, Anthony, Wallingford, Conn. Lifting jack. 1,902,448; Mar. 21.
Hotchkiss, Clifford. (See Phelan, L. A. M., and Hotchkiss.)
Hotse, John K., St. Louis, Mo. Bowl shaped base for golf bags. 1,902,644; Mar. 21.
Howard, James H., assignor to J. H. McEvoy & Company, Houston, Tex. Tubing hanger. 1,902,075; Mar. 21.
Howe, Goodwin H., Scotia, N. Y., assignor to General Electric Company. Coating metals. 1,902,508; Mar. 21.
Howell, Fred B., Schenectady, N. Y., assignor to General Electric Company. Truck. 1,902,504; Mar. 21.
Howenstine, Charles D., North Charleroi, Pa. Machine for counting and delivering coins. 1,902,328; Mar. 21.
Hoyer, Henrik, New York, assignor to The Jacobs Bros. Co., Inc., Brooklyn, N. Y. Scale. Des. 89,503; Mar. 21.
Hoyos, Ernesto J., Boston, Mass., assignor to Hudson Motor Car Company, Detroit, Mich. Body striping. 1,901,908; Mar. 21.
Hubbard, Edward L., Piedmont, assignor to Water Works Supply Company, San Francisco, Calif. Liquid gauge. 1,902,329; Mar. 21.
Huddle, Edwin F., Rockford, Ill., assignor to J. I. Case Company, Racine, Wis. Pitman for agricultural implements. 1,901,968; Mar. 21.
Hudson Electrical Heating Corporation. (See Holinger, Emil F., assignor.)
Hudson Motor Car Company. (See Hoyos, Ernesto J., assignor.)
Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Hydrocarbon oil conversion. 1,901,969; Mar. 21.
Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Fluid heating apparatus. 1,901,970; Mar. 21.
Hughes, Frederick G., assignor to The New Departure Manufacturing Company, Bristol, Conn. Grinding machine. 1,902,505; Mar. 21.
Hughes, Hughey V., assignor of one-third to J. A. Weaver, Oakland, Calif. Combined positive drive with differential characteristics and free-wheeling. 1,902,449; Mar. 21.
Huismann, Johann, and H. Schweitzer, Wiesdorf, near Cologne-on-the-Rhine, Germany, assignors, by mesne assignments, to General Aniline Works, Inc., New York, N. Y. Reserving of animal fibers. 1,902,450; Mar. 21.
Hultgren, Charles R., assignor to S. Karpen & Bros., Chicago, Ill. Reversible seat or chair. 1,902,232; Mar. 21.
Humphreys, Austin G., Brighton, England. Assisting and testing the memory. 1,902,404; Mar. 21.
Hungerbühler, Paul, Oberwil, Switzerland, assignor to Landis & Gyr, A.-G. Horological mechanism. 1,902,126; Mar. 21.
Hunt, Herbert W. and P., Manchester, England. Machine for sharpening screwing taps and the like. 1,902,240; Mar. 21.
Hunt, Percy. (See Hunt, Herbert W. and P.)
Huseon, Emma V., Brooklyn, N. Y. Silencer mouthpiece for telephone transmitters. 1,902,556; Mar. 21.
I. G. Farbenindustrie Aktiengesellschaft. (See Baumann, P., Schilling, and Fischer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hagedorn, M., Reichert, and Gühring, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hilcken, Valentin, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Neubauer, Carl, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schmid, Otto, assignor.)
Ilgenfritz, Curtis B., York, assignor to United States Glass Company, Pittsburgh, Pa. Pitcher or similar article. Des. 89,525; Mar. 21.
Illinois Tool Works. (See Olson, Carl G., assignor.)
Imatomi, Shoichiro. (See Tanaka, H., and Imatomi.)
Ingalls, Elwin H., Aroma Park, Ill. Gas gun. 1,902,127; Mar. 21.
Ingersoll, Andrew J. (See Jackson, J. C., and Ingersoll.)
Ingersoll Milling Machine Company, The. (See Oberhoffken, Alexander, assignor.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Frelin, Fritjof, assignor.)
Ingersoll-Rand Company. (See Lear, Earl E., assignor.)
Ingersoll-Rand Company. (See McAllister, Raymond C., assignor.)
Ingersoll-Rand Company. (See Terry, Edward F., assignor.)
Ingram, Joseph R., Nitro, W. Va., assignor to The Rubber Service Laboratories Co., Akron, Ohio. Age resisting vulcanized rubber product and manufacturing same. 1,902,405; Mar. 21.
Inokuty, Haruhisa, Hongo-ku, Tokyo, and K. Nagaoka, Shitaya-ku, Tokyo, Japan. Motor for turbo-blowers, centrifugal pumps and the like. 1,902,406; Mar. 21.
Insulex Corporation. (See Nelson, William K., assignor.)
International Business Machines Corporation. (See Wood, George R., assignor.)
International Motor Company. (See Leipert, August H., assignor.)
International Motor Company. (See Matthews, Joseph L., assignor.)
International Printing Company. (See Rector, Frank J., assignor.)
International Time Recording Company of New York. (See Bishop, L. C., and Swick, assignors.)
International Time Recording Company of New York. (See Fuller, Frederick L., assignor.)
Iorio, Adrian J., Randolph, Mass. Fountain pen. 1,901,971; Mar. 21.
Isle, Cecil, London, England. Internal combustion engine. 1,902,761; Mar. 21.
Jackson, Joseph C., and A. J. Ingersoll, Wildwood, N. J. Tire tool. 1,902,283; Mar. 21.
Jacobs Bros. Co., The. (See Hoyer, Henrik, assignor.)
Jacobs, Earl, Brooklyn, N. Y. Combined bridge bid indicator and container. Des. 89,509; Mar. 21.
Jaisale, Gottlob, Feuerbach, near Stuttgart, Germany, assignor to Uhrenfabrik J. Kienzle, Komotau, Czechoslovakia. Escapement and pendulum mechanism. 1,902,366; Mar. 21.
James, Edmund D., assignor to Scovill Manufacturing Company, Waterbury, Conn. Snap fastener socket. 1,902,557; Mar. 21.
Jaworowski, Joseph F., assignor of one-third to S. E. Dettelbach and one-third to S. W. Emerson, Cleveland, Ohio. Pumping apparatus. 1,902,076; Mar. 21.
Jaworowski, Joseph F., assignor of five-eighteenths to S. E. Dettelbach, five-eighteenths to S. Emerson, and two-eighteenths to E. Hahn, Cleveland, Ohio. Pumping apparatus. 1,902,077; Mar. 21.
Jenkins, Ralph M., Orleans, Ind. Shotgun. 1,902,702; Mar. 21.
Jenks, Harry N., San Jose, Calif. Mixing device or sewage treatment plant. 1,902,078; Mar. 21.
Jensen, Louis, Chicago, Ill., assignor to United Autographic Register Co. Autographic register. 1,902,304; Mar. 21.
Jensen Salsbery Laboratories, Inc., The. (See Pilgrim, Ernest C., assignor.)

Jewell, Archer A., Peckham, London, England. Holder for containers. 1,902,285; Mar. 21.
Joachim, Herman L., Ridgefield Park, N. J. Method of and apparatus for stacking sheets. 1,902,486; Mar. 21.
Johns, Martha B., Norfolk, Va. Bag. 1,902,368; Mar. 21.
Johnson, Arthur A., Bridgeport, Conn. Manifolding. 1,902,128; Mar. 21.
Johnson, Arthur E., Oak Park, assignor to Wm. Wrigley Jr. Company, Chicago, Ill. Box wrapping machine. 1,902,079; Mar. 21.
Johnson, Bror A. E., Alsten, assignor to Aktiebolaget Gebr. Arehns Mekaniska Verkstad, Stockholm, Sweden. Winding device for the manufacturing of boxes, for instance the outer casings of push boxes and similar articles. 1,902,033; Mar. 21.
Johnson, Christian E., assignor to Deere & Company, Moline, Ill. Agricultural implement. 1,901,909; Mar. 21.
Johnson, Clayton R., Los Angeles, Calif. Apparatus for and method of localising and measuring by X-ray. 1,902,558; Mar. 21.
Johnson, Everard L., Patchogue, N. Y. Seat. 1,902,367; Mar. 21.
Johnson, Lane, Ingram, and J. A. Smitmans, Pittsburgh, Pa., assignors to United Engineering & Foundry Company. Shear. 1,901,910; Mar. 21.
Johnson, Roy W., Milwaukee, Wis., assignor, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Thermostatic switch for use with heaters. 1,902,451; Mar. 21.
Johnson, Roy W., Milwaukee, Wis., assignor, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Thermostatic switch. 1,902,452; Mar. 21.
Johnson, Wilfrid E., Schenectady, N. Y., assignor to General Electric Company. Flywheel. 1,902,505; Mar. 21.
Johnston, Herbert L., and D. A. Meeker, assignors to The Hobart Manufacturing Company, Troy, Ohio. Food handling apparatus. 1,902,506; Mar. 21.
Johnston, Horace G., Corsicana, Tex. Well drilling rotary. 1,902,242; Mar. 21.
Jones, Charles A., Campbell, Calif. Bird cage and utility hanger. 1,902,241; Mar. 21.
Jordan, Henry F., Lansdale, Pa. Combination hat. 1,902,080; Mar. 21.
Jugel, Ewald H., Goppingen, Germany. Soldering machine. 1,902,703; Mar. 21.
Juhlin, Gustaf A., Timperley, England, assignor to General Electric Company. Electric circuit interrupter. 1,902,507; Mar. 21.
Kadlec, Charles, assignor to Waite Carpet Company, Oshkosh, Wis. Tufting mechanism. 1,902,704; Mar. 21.
Kahn, Isaac T., Cleveland Heights, Ohio. Container sealing device. 1,901,911; Mar. 21.
Kaiser, Charles, Great Neck, N. Y., assignor to Morimura Bros. Inc., New York, N. Y. Casserole or similar article. Des. 89,527; Mar. 21.
Kaiser, Harry N., Washington, D. C. Eel grip. 1,902,453; Mar. 21.
Kaplan, Morris L., Hazelton, Pa. Collar-stretching machine. 1,902,330; Mar. 21.
Kaplan, Philip, Brooklyn, N. Y., assignor to The Dehydro Company, Tulsa, Okla. Breaking water in oil emulsions. 1,902,129; Mar. 21.
Karpen, S., & Bros. (See Huitgren, Charles R., assignor.)
Kassel, Louis S. (See Frazer, J. C. W., and Kassel.)
Kaufer, Felix. (See Halbig, P., and Kaufer.)
Kaupke, Lee H., assignor to The Rock Island Plow Company, Rock Island, Ill. Hay loader. 1,902,243; Mar. 21.
Kearsley, William K., Schenectady, N. Y., assignor to General Electric Company. Time switch. 1,902,508; Mar. 21.
Kee, William B., Atlanta, Ga. Hoe. 1,902,705; Mar. 21.
Keese, Frank E., jr., Iron River, Mich. Combination fuse holder and lighter. 1,902,706; Mar. 21.
Keister, James, Steubenville, Ohio. Internal combustion engine. 1,902,130; Mar. 21.
Keller, Robert, Ennetbaden, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Automatic parallel connecting system. 1,902,645; Mar. 21.
Kemp, Charles and E., Bloomfield, Ind. Renewable electric fuse. 1,902,707; Mar. 21.
Kemp, Ernest. (See Kemp, Charles and E.)
Kemp, William E., assignor to Kingston Products Corporation, Kokomo, Ind. Mold. 1,902,559; Mar. 21.
Kenaga, Ivan A. (See Harlow, I. F., Kenaga, and Dressel.)
Kern, Erwin, Ennetbaden, Switzerland, assignor to Aktiengesellschaft, Brown Boveri & Cie., Baden, Switzerland. Direct current motor commutating device. 1,902,131; Mar. 21.
Kerr, Howard J., Westfield, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam drum baffle. 1,901,912; Mar. 21.
Kerschbaum, Friedrich P. (See Gooch, S. D., and Kerschbaum.)
Kershaw, William E., Gwynedd Valley, and J. L. Woodbridge, Philadelphia, Pa. Counter-electromotive-force-cells. 1,902,081; Mar. 21.
Keyser, Hans, et al. (See Müller, Johan J., assignor.)
Keyston Bros. (See Keyston, Fredrick B., assignor.)
Keyston, Frederick B., San Mateo, assignor to Keyston Bros., San Francisco, Calif. Toy pistol. 1,902,708; Mar. 21.
Kilimnik, Philip, Middle Village, N. Y. Tube protector. 1,902,082; Mar. 21.
Kilpatrick, John J., San Francisco, Calif. Spinner. 1,902,560; Mar. 21.
Kimball, Vernon R., Palisades Park, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Dividing received intelligence into two or more groups. 1,902,170; Mar. 21.
King, Della, Louisville, Ky. Invalid's chair. 1,902,709; Mar. 21.
King, Joseph F., Burbank, assignor of one-half to L. C. King, Glendale, Calif. Egg candling machine. 1,902,244; Mar. 21.
King, Leo C. (See King, Joseph F., assignor.)
Kingston Products Corporation. (See Kemp, William E., assignor.)
Kinser, Vernon, Butterfield, Mo. Automatic transmission. 1,902,245; Mar. 21.
Kirschbraun, Leiter. (See Avery, H. C., and Kirschbraun.)
Kirschbraun, Lester, Leonia, N. J., assignor, by mesne assignments, to The Flintkote Corporation, Boston, Mass. Producing asphalt. 1,902,805; Mar. 21.
Kirst, William E., Woodbury, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Evaporation of nitric acid. 1,901,875; Mar. 21.
Kirton, Thomas A., assignor to Lanier-Kirton Co. Inc., Jacksonville, Fla. Self-locking bolt. 1,902,454; Mar. 21.
Kitchen, Francis A., Cleveland, Ohio. Air cooling. 1,902,246; Mar. 21.
Klapper, Benjamin A., assignor to Sprague, Warner & Company, Chicago, Ill. Display case. 1,902,132; Mar. 21.
Kleinschmit, Oscar, assignor to Gebruder Brehmer, Leipzig-Plagwitz, Germany. Method of and mechanism for extracting interconnecting threads between stitched books. 1,902,286; Mar. 21.
Klier, Pete, Bisbee, N. Dak. Static eliminator. 1,902,407; Mar. 21.
Klingloff, Andrew R., Shrewbury, Mass. Packing. 1,902,247; Mar. 21.
Knapp, Arthur S., Glendale, Calif., assignor to Automatic Safe-Start Company. Automatic starting system for internal combustion engines. 1,902,646; Mar. 21.
Knight, Clarence F., Warren, assignor of one-fourth to M. R. Hazel, Youngstown, and one-fourth to F. M. Comstock, Warren, Ohio. Roll for use in strip and sheet mills. 1,902,034; Mar. 21.
Knight, Raymond R., Toronto, Ontario, Canada. Process and apparatus for purification of sewage and trade wastes. 1,902,248; Mar. 21.
Kohut, Alexander, assignor to William Willhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,528; Mar. 21.
Koizumi, Yuko. (See Tamaru, S., and Koizumi.)
Kondo, Masaru, Puunene, Maui, Hawaii. Fuse refilling tool. 1,902,710; Mar. 21.
Kongsted, Ludvig P., Longmeadow, assignor to United American Bosch Corporation, Springfield, Mass. Display device. 1,902,331; Mar. 21.
Kopp, Charles A., Kansas City, Mo. Septic tank. 1,902,171; Mar. 21.
Korittke, Karl. (See Kuhnel, C., and Korittke.)
Kovács, Theodor, Berlin-Schoneberg, Germany. Writing, drawing, or ruling pen. 1,902,782; Mar. 21.
Kraenslein, George and E. Diefenbach, Frankfort-on-the-Main-Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Condensation products of the anthraquinone series. 1,902,083; Mar. 21.
Kraenslein, Georg and E. Diefenbach, Frankfort-on-the-Main-Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Acid dyestuffs of the anthraquinone series. 1,902,084; Mar. 21.
Kraft, Herman T., assignor to The Bridgewater Machine Company, Akron, Ohio. Tire building drum. 1,902,806; Mar. 21.
Kratz, George D. (See Elbogen, Paul, assignor.)
Krause, Alfons, Breslau-Cawallen, Giesche-Siedlung, Germany, assignor to American Glanzstoff Corporation, New York, N. Y. Artificial silk spinning machine attachment. 1,902,332; Mar. 21.
Kreidel, Hans, Wiesbaden, Germany. Wick oiler. 1,901,972; Mar. 21.
Kreis, Walter, Binningen, near Basel, assignor to "Chemical Works formerly Sandoz," Basel, Switzerland. Manufacture of new cardio-active glucosides of bulbus scillæ. 1,902,408; Mar. 21.
Kronenberger, Ferdinand, Brooklyn, N. Y. Flat and filler for egg holding cases. 1,901,913; Mar. 21.
Kruckenberg, Frans, and C. Stedefeld, Hanover, Germany. Side wind protection for railway systems. 1,902,783; Mar. 21.
Krueger, Theodore H., New York, N. Y., assignor to Better Packages, Incorporated, Shelton, Conn. Adhesive tape for fastening packages and for like purposes. 1,902,369; Mar. 21.
Kuhnel, Carl, and K. Korittke, Berlin-Charlottenburg, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Vacuum cleaner. 1,902,561; Mar. 21.
Kulp, Harry W., and M. C. Dellinger, Lancaster, Pa. Bushing remover. 1,902,711; Mar. 21.

Kunstdünger-Patent-Verwertungs-Aktiengesellschaft. (See Larsson, Markus, assignor.)
Kurlash Company, The. (See Tuttle, W. R., and Stickel, assignors.)
La Branch, Jefferson N., San Diego, Calif. Air venting device. 1,902,409; Mar. 21.
La Brie, Ludger E., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,902,455; Mar. 21.
La Brie, Ludger E., assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,902,647; Mar. 21.
Lafayette Instruments, Inc. (See Shuster, Carl N., assignor.)
Lake, Clair D., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Transfer mechanism. 1,902,035; Mar. 21.
Lakewood Manufacturing Co. (See Roberts, Edward W., assignor.)
La Mar, Frank C., assignor to Great Western Fuse Company, New York, N. Y. Fuse clip lock. 1,902,804; Mar. 21.
Lambert, Albert L., assignor to Heintz Manufacturing Company, Philadelphia, Pa. Latch for automobile doors. 1,902,172; Mar. 21.
Landis & Gyr, A.-G. (See Hunggerbühler, Paul, assignor.)
Landis & Gyr, A.-G. (See Mettler, Josef, assignor.)
Landis & Gyr, A.-G. (See Pudelko, Riccard, assignor.)
Landis Tool Company. (See Miner, Harry H., assignor.)
Langley, Sam G. (See Smith, B. M., Langley, and Braun.)
Lanier-Kirton Co. Inc. (See Kirton, Thomas A., assignor.)
Lansy, Frank L., assignor to The Champion Spring Company, Cleveland, Ohio. Adjustable back rest for beds. 1,902,249; Mar. 21.
Larkin, Fred V., Bethlehem, Pa. Testing device. 1,902,807; Mar. 21.
Larkin, Lester U., assignor to Larkin Refrigerating Corporation, Atlanta, Ga. Refrigeration system. 1,902,784; Mar. 21.
Larkin Refrigerating Corporation. (See Larkin, Lester U., assignor.)
Larson, John M., assignor to National Regulator Co., Chicago, Ill. Humidity controller. 1,902,173; Mar. 21.
Larsson, Markus, Berlin, Germany, assignor to Kunstdünger-Patent-Verwertungs-Aktiengesellschaft, Glarus, Switzerland. Leaching raw phosphate. 1,902,648; Mar. 21.
Larsson, Markus, Berlin, Germany, assignor to Kunstdünger-Patent-Verwertungs-Aktiengesellschaft, Glarus, Switzerland. Producing ammonium sulphate. 1,902,649; Mar. 21.
Lavandeira, Raul, Buenos Aires, Argentina. Supporting frame for winding mechanism. 1,902,370; Mar. 21.
Lavelle, Thomas B., Hempstead, N. Y. Aircraft control means. 1,902,133; Mar. 21.
Lear, Earl B., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Blowing device for pneumatic tools. 1,902,562; Mar. 21.
Leathers, Ward, Haworth, N. J., assignor to The Quadrex Corporation. Vacuum cleaner filter valve. 1,902,838; Mar. 21.
Lee, Fred L., Binghamton, N. Y., and B. H. Phillips, Montclair, N. J., assignors to The Tabulating Machine Company, Endicott, N. Y. Circuit closing device. 1,902,035; Mar. 21.
Lee, Roger K., assignor to Chrysler Corporation, Highland Park, Mich. Internal combustion engine mounting. 1,902,509; Mar. 21.
Legg, Joseph W., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Remote control system for oscillographs. 1,902,650; Mar. 21.
Lehde, Henry, Forks, N. Y. Method and apparatus for photographing magnetic curves. 1,901,876; Mar. 21.
Leipert, August H., College Point, assignor to International Motor Company, New York, N. Y. Chain drive. 1,902,712; Mar. 21.
Lemoine, Henry G. L., Perriers-sur-Andelle, France. Interchangeable toothbrush. 1,902,410; Mar. 21.
Levy-Anderson Co. (See Anderson, Maurice, assignor.)
Lewis, Goodrich Q., Wheaton, assignor to W. H. Miner, Inc., Chicago, Ill. Bumper. 1,902,651; Mar. 21.
Lewis, Leo L., Plainfield, assignor to Carrier Engineering Corporation, Newark, N. J. Apparatus for conditioning enclosures. 1,902,563; Mar. 21.
Lewis, Miles J., Long Beach, Calif. Well bore straightening tool. 1,902,174; Mar. 21.
Liljenroth, Frans G., Stockholm, Sweden. Producing mixed fertilizers. 1,902,652; Mar. 21.
Linde Air Products Company, The. (See Wall, Matthew J., assignor.)
Lindenberg, Theodore, Columbus, Ohio. Sound amplifier. 1,902,250; Mar. 21.
Lindenblad, Nils E., Port Jefferson, N. Y., assignor to Radio Corporation of America. Energizing antenna. 1,902,036; Mar. 21.
Lindgren, Charles F., Duluth, Minn. Meat chopper. 1,902,653; Mar. 21.
Lindhe, Eric G., Hastings upon Hudson, N. Y. Spring. 1,902,036; Mar. 21.
Lindhe, Eric G., Hastings upon Hudson, N. Y. Spring construction. 1,902,134; Mar. 21.
Linsert, Otto, Wuppertal-Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Crystalline antirachitically active product and preparing the same. 1,902,785; Mar. 21.
Lionel Corporation, The. (See Giaimo, Charles V., assignor.)
Livingston, John W., Kirkwood, assignor to Monsanto Chemical Works, St. Louis, Mo. Manufacture of maleic acid. 1,901,914; Mar. 21.
Lison, Michael. (See Toniewicz, I. E., and Lison.)
Lloyd, Lester T., assignor to W. G. Lloyd Company, Chicago, Ill. Loose-leaf binder. 1,902,786; Mar. 21.
Lloyd, W. G., Company. (See Lloyd, Lester T., assignor.)
Locher & Cie. (See Seger, Jacob, assignor.)
Locke Insulator Corporation. (See Plimpton, Bentley A., assignor.)
Loeffler, Edmund J., Glendale, Calif. Self opening and closing three-way mirror. 1,902,037; Mar. 21.
Loetscher, Emil C., Dubuque, Iowa. Reproducing surface inlays on panels of composite fibrous materials. 1,902,087; Mar. 21.
Log Cottage Company. (See Muffley, H. A., and McLees, assignor.)
Loughridge, Matthew H., Bogota, N. J. Lifting jack. 1,901,915; Mar. 21.
Lowe, Joseph A., assignor to Faluiah Paper Company, Fitchburg, Mass. Machine for pasting webs of paper together. 1,902,713; Mar. 21.
Lurie, Arnold N., Chicago, Ill. Article of manufacture. 1,902,175; Mar. 21.
Mabey, Charles W., assignor to Mabey Electric and Manufacturing Company, Indianapolis, Ind. Bun puncher and toaster. 1,902,564; Mar. 21.
Mabey Electric and Manufacturing Company. (See Mabey, Charles W., assignor.)
Macey, Eugene J., Rosbolt, S. Dak. Lubricator fitting. 1,901,973; Mar. 21.
Macy, Walter C., South Dartmouth, Mass. Sash latch. 1,901,974; Mar. 21.
Magnuson, Carl A., and C. H. Uggla, Minneapolis, Minn. Combination table. 1,901,975; Mar. 21.
Maier, Fred R., Kansas City, Mo. Boot tree. 1,902,251; Mar. 21.
Mallinson, H. R., & Co. Inc. (See Heinke, Alfred J., assignor.)
Mann, Cecil A., assignor to Frigidaire Corporation, Dayton, Ohio. Coating process and apparatus. 1,902,564; Mar. 21.
Mantle Lamp Company of America, The. (See Fairchild, Alice M., assignor.)
Marks, Herbert E., Sewickley, Pa., assignor to United States Gypsum Company, Chicago, Ill. Slab floor or roof construction. 1,902,565; Mar. 21.
Marsh, Harry V., Chicago, Ill. Display rack. 1,902,566; Mar. 21.
Martin, Jean A., Buffalo, N. Y. Awning of metal or like rigid material. 1,901,976; Mar. 21.
Martin, John F., assignor to United American Bosch Corporation, Springfield, Mass. Magneto timing indicator. 1,902,655; Mar. 21.
Martin, Lester B., Columbus, Ohio. Calendar and record. 1,902,567; Mar. 21.
Martin, Rhetberford B., Roselle, N. J. Supershock absorption. 1,902,714; Mar. 21.
Maschinenfabrik Oerlikon. (See Wellauer, Max, assignor.)
Matthews, Joseph L., New Brunswick, N. J., assignor to International Motor Company, New York, N. Y. Manufacturing gearing. 1,902,656; Mar. 21;
Matthews, William H., Fort Valley, Ga. Tank cover. 1,902,456; Mar. 21.
Maurer, Edward C., St. Paul, Minn. Laundry sorting machine. 1,902,088; Mar. 21.
Maxam, Lester L., Los Angeles, assignor of one-third to C. S. Crews, San Pedro, Calif. Fused electrical plug. 1,902,568; Mar. 21.
Maynard, George S., Newtonville, assignor to United-Carr Fastener Corporation, Cambridge, Mass. Pin fastener. 1,902,308; Mar. 21.
McAllister, Raymond C., Painted Post, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Connecter. 1,902,038; Mar. 21.
McAnley Automatic Trap Company. (See Covey, Clarence F., assignor.)
McArdle, Michael W., Chicago, Ill. Electric circuit connection. 1,901,977; Mar. 21.
McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,902,135; Mar. 21.
McCarthy, Joseph A., Richmond Hill, N. Y. Forced draft deflector for gas stoves. 1,902,411; Mar. 21.
McCauley, Joseph B., Charles Town, W. Va. Antifreeze composition for radiators and the like. 1,902,287; Mar. 21.
McCoy, Clarence E., Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Power transmission device. 1,901,916; Mar. 21.
McCune, Joseph C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Train pipe coupling. 1,901,917; Mar. 21.
McCune, Joseph C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Safety car equipment. 1,901,918; Mar. 21.

McDaniel, Donald, assignor to The Hamilton Foundry and Machine Company, Hamilton, Ohio. Post cap. 1,902,511; Mar. 21.
McDonald, Eugene G., assignor to Bendix Brake Company, South Bend, Ind. Operating device. 1,902,569; Mar. 21.
McEachern, John, Winnipeg, Manitoba, Canada. Combination grain dump. 1,902,252; Mar. 21.
McEachron, Karl B., and E. J. Wade, Pittsfield, Mass., assignors to General Electric Company. Electrical discharge device. 1,902,510; Mar. 21.
McEvoy, J. H., & Company. (See Howard, James H., assignor.)
McGinnis, Harry B., Chicago, Ill. Steam heating system. 1,902,288; Mar. 21.
McKee, Clarence A., Bronx, assignor, by mesne assignments, to Western Electric Company, Incorporated, New York, N. Y. Art of telephony signaling. 1,901,919; Mar. 21.
McLaughlin, John J., North Tonawanda, N. Y. Metal heating method and apparatus. 1,902,039; Mar. 21.
McLean, Donald G. (See Ballard, M. H., and McLean.)
McLeer, Edward F. (See Mufley, H. A., and McLeer.)
McMullan, Samuel, Downers Grove, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method and apparatus for drawing wire. 1,901,920; Mar. 21.
Means, Winthrop J., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electrical meter. 1,901,921; Mar. 21.
Mechanics Universal Joint Company. (See Hobbs, John W., assignor.)
Meeker, David A. (See Johnston, H. L., and Meeker.)
Mehl, Arthur J., Omaha, Nebr., assignor to Swift and Company, Chicago, Ill. Combination conveyer and scale. 1,902,512; Mar. 21.
Meier, Albert J., Glendale, Mo., assignor to The New Jersey Zinc Company, New York, N. Y. Manufacture of powders. 1,901,978; Mar. 21.
Mekler, Lev A., assignor to Universal Oil Products Company, Chicago, Ill. Furnace. 1,901,922; Mar. 21.
Melin, Otto, assignor of one-half to Clarence Allen, Livingston, Mont. Mechanical irrigator. 1,902,412; Mar. 21.
Mendelsohn, Albert, Painesdale, Mich. Apparatus for loading broken rock. 1,902,457; Mar. 21.
Mengel Company, The. (See Horine, Irving, assignor.)
Mentor, Earl W., and C. J. Scranton, jr., assignor to Avery Power Machinery Co., Peoria, Ill. Grain distributing means for combines. 1,902,289; Mar. 21.
Mergenthaler Linotype Company. (See Albrecht, Christian A., assignor.)
Mergenthaler Linotype Company. (See Burt, Harold A., assignor.)
Mergenthaler Linotype Company. (See Grumman, Fred C., assignor.)
Mergenthaler Linotype Company. (See Stouges, Anthony J., assignor.)
Mergott, J. E., Company. (See Hiering, William C., assignor.)
Merwin, George E., and F. W. Shoemaker, Port Arthur, Tex. Thread cutting attachment for lathes. 1,902,657; Mar. 21.
Mesta Machine Company. (See Trinks, Willibald, assignor.)
Mettler, Josef, Zug, Switzerland, assignor to Landis Gyr, A.-G. Time-controlled electric switch. 1,902,570; Mar. 21.
Meusy, Eugene E., assignor to Milwaukee Gas Specialty Company, Milwaukee, Wis. Gas cock. 1,901,979; Mar. 21.
Meutsch, Adolf, assignor to Gewerkschaft Wallram, Essen, Germany. Making and hardening steel tools provided with hard metal members. 1,902,513; Mar. 21.
Meyer-Gaus, Karl, Barmen, Germany, assignor to American Bemberg Corporation, New York, N. Y. Thread guide. 1,902,458; Mar. 21.
Meyer, Geo. J., Manufacturing Company. (See Meyer, George J., assignor.)
Meyer, George J., assignor to Geo. J. Meyer Manufacturing Company, Milwaukee, Wis. Washing apparatus. 1,902,253; Mar. 21.
Meyer, John F., Chicago, Ill. Amusement machine. 1,902,040; Mar. 21.
Middleditch, L., Company. (See Middleditch, Lyman, assignor.)
Middleditch, Lyman, assignor to L. Middleditch Company, New York, N. Y. Loose leaf assembly. 1,901,980; Mar. 21.
Midland Creosoting Company. (See Newton, Harold M., assignor.)
Mietzsch, Fritz. (See Schulemann, W., Mietzsch, and Wingler.)
Miller, Arthur F., Jackson, Mich., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa. Method of and apparatus for multiple stage grinding. 1,902,413; Mar. 21.
Miller, Herbert E., Allentown, Pa. Guy wire anchor connection. 1,902,459; Mar. 21.
Miller, Herbert E., assignor to Utilities Service Company, Inc., Allentown, Pa. Guy wire protector. 1,902,414; Mar. 21.
Miller, Joseph G. (See Miller, L. M., Greene, Miller, and Calkins.)
Miller, Lloyd M., Los Angeles, L. M. Greene, Whittier, J. G. Miller, Los Angeles, and E. E. Calkins, Whittier, Calif. Control for pump actuating mechanisms and the like. 1,902,371; Mar. 21.
Miller, Oscar W., Appleton, Wis. Car mover device. 1,902,658; Mar. 21.
Mills, Fred H., Fort Edward, N. Y. Toy building block. 1,902,186; Mar. 21.
Milwaukee Gas Specialty Company. (See Meusy, Eugene E., assignor.)
Miner, Harry H., Paris, France, assignor to Landis Tool Company, Waynesboro, Pa. Mandrel for hollow crank shafts. 1,902,176; Mar. 21.
Miner, W. H., Inc. (See Geiger, William A., assignor.)
Miner, W. H., Inc. (See Lewis, Goodrich J., assignor.)
Minerals Separation North American Corporation. (See Wright, Percy C., assignor.)
Minneapolis-Honeywell Regulator Company. (See Johnson, Roy W., assignor.)
Minneapolis-Honeywell Regulator Company. (See Phelan, L. A. M., and Hotchkiss, assignors.)
Mitchell, David F., Staten Island, N. Y. Apparatus for extracting tubes. 1,902,571; Mar. 21.
Mitchell, Orville, Dallas, Tex. Producing saws. 1,902,177; Mar. 21.
Mitsubishi Kogyo Kabushiki Kaisha. (See Tamaru, S., and Koisumi, assignors.)
Mittag, Albert H., Schenectady, N. Y., assignor to General Electric Company. Electric translating circuits. 1,902,460; Mar. 21.
Modine, Arthur B., assignor to Modine Manufacturing Company, Racine, Wis. Radiator. 1,902,572; Mar. 21.
Modine Manufacturing Company. (See Modine, Arthur B., assignor.)
Moloney, William J., Seattle, Wash. Log carrying barge. 1,901,877; Mar. 21.
Monitor Controller Company. (See Whittingham, George H., assignor.)
Monrad, Karl J., Little Falls, N. Y. Sweetened and flavored dessert made with rennin. 1,902,415; Mar. 21.
Monsanto Chemical Works. (See Livingston, John W., assignor.)
Moonbeam Manufacturing Company, The. (See David, Bruce W., assignor.)
Morehead, French H. (See Brungardt, A. C., Morehead, and Morrissey.)
Morehouse, Silas A., Los Angeles, Calif. Windshield cleaner device for airplanes. 1,902,254; Mar. 21.
Morel, Felix, Fayettas, par Rassac-sur-l'Isle, assignor to Anciens Etablissements R. Cornely & Cie (Societe Anonyme), Paris, France. Sewing machine. 1,902,041; Mar. 21.
Morgen, Ralph A., and F. Fair, Kansas City, Mo. Clarifying dry cleaning fluid. 1,902,514; Mar. 21.
Morimura Bros. Inc. (See Buma, Yukio, assignor.)
Morimura Bros. Inc. (See Kaiser, Charles, assignor.)
Morris Paper Mills. (See Powell, Henry K., assignor.)
Morrissey, James W. (See Brungardt, A. O., Morehead, and Morrissey.)
Moseley, Tomlinson I., assignor to Duart Manufacturing Co. Ltd., formerly Pacific Hair Goods Company Ltd., San Francisco, Calif. Hair drier. 1,902,334; Mar. 21.
Moss, William F., Upper Montclair, N. J. Casement window protection. 1,902,335; Mar. 21.
Moss, William H., Cumberland, Md., assignor to Celanese Corporation of America, New York, N. Y. Coating composition and film produced thereby. 1,902,256; Mar. 21.
Moss, William H., Cumberland, Md., assignor to Celanese Corporation of America. Derivative of cellulose composition. 1,902,257; Mar. 21.
Moss, William H., and B. B. White, Cumberland, Md., assignors to Celanese Corporation of America, New York, N. Y. Coating composition and film produced thereby. 1,902,255; Mar. 21.
Mosshart, Donald J., Lansdowne, Pa. assignor to Westinghouse Electric & Manufacturing Company. Combustion apparatus. 1,902,372; Mar. 21.
Motor and Plane Accessories, Inc. (See Stanley, Edgar C., assignor.)
Mueller, Hilmar, assignor to The Mueller Machine Company, Trenton, N. J. Apparatus for manufacturing ceramic articles. 1,901,928; Mar. 21.
Mueller Machine Company, The. (See Mueller, Hilmar, assignor.)
Mufley, Harry A., Minneapolis, Minn., and E. F. McLeer, Gordon, Wis., assignors to Log Cottage Company, Minneapolis, Minn. Log house. 1,902,809; Mar. 21.
Müller-Clemm, Hellmuth, assignor to the Firma Zellstoffabrik Waldhof, Mannheim-Waldhof, Germany. Apparatus for the continuous control of the properties of solid bodies dispersed in a liquid. 1,902,659; Mar. 21.
Muller, Franz G. D., assignor to The Staytite Company, Houston, Tex. Flame arrester. 1,902,258; Mar. 21.
Müller, Johann J., assignor to Dr. F. G. Schumacher, Basel, and Hans Keyser, Aarau, Switzerland. Machine for dyeing, bleaching, and the like of loose yarns or bobbins. 1,902,042; Mar. 21.
Muller, Robert, Pirna-Copitz, assignor to Chemische Fabrik Pott & Co., Dresden, Germany. Producing water-soluble condensation products and the products produced. 1,902,515; Mar. 21.
Muller, Rudolph G., Irvington, N. J. Hat making machine. 1,902,516; Mar. 21.

Muntner, Joseph M. (See Buettner, R. J., Pound, Muntner, Neits, and Zansig.)
Murphy, George M., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Car coupling. 1,902,043; Mar. 21.
Murray, Ralph L., Philadelphia, Pa. Balanced valve. 1,902,336; Mar. 21.
Musso, Alfred, East Orange, N. J., assignor of one-half to W. P. Deppe, New York, N. Y. Mineral reduction and metal extraction. 1,902,089; Mar. 21.
Musso, Alfred, East Orange, N. J., assignor of one-half to W. P. Deppe, New York, N. Y. Low temperature reduced pressure or partial vacuum reduction of metals. 1,902,090; Mar. 21.
Muter, Leslie, et al. (See Dickson, George F., assignor.)
Myers, Harry L., assignor to The American Floor Surfacing Machine Company, Toledo, Ohio. Rotary disk edging machine. Des. 89,511; Mar. 21.
N. V. Philips', Gloeilampenfabrieken. (See Bouwers, Albert, assignor.)
Nachman, Harold J., assignor to Washington Gas Light Company, Washington, D. C. Gas refrigerating apparatus. 1,902,715; Mar. 21.
Nagaoka, Zyunkiti. (See Inokuty, H., and Nagaoka.)
Nalle, John M., Fairfield, Conn., assignor to American Chain Company, Inc. Flexible joint. 1,901,924; Mar. 21.
Nathanson, Isidore. (See Rodstein, H., and Nathanson.)
National Electric Products Corporation. (See Clayton, Martin M., assignor.)
National Machine Products Company. (See Stoll, Albert, assignor.)
National Regulator Co. (See Larson, John M., assignor.)
National Rubber Machinery Company. (See Pfeiffer, Fred B., assignor.)
National Rubber Machinery Company. (See Shook, Florain J., assignor.)
National Synthetic Corporation. (See Forrest, H. O., and Frolich, assignors.)
National Transit Pump & Machine Company. (See Valentine, Warren P., assignor.)
Natural Gas Hydrogen Corporation. (See Yunker, James A., assignor.)
Natural Products Refining Co. (See Vetter, Joseph J., assignor.)
Neal, Arthur M. (See Williams, I., and Neal.)
Negbaur, H., & Co. (See Negbaur, Harry, assignor.)
Negbaur, Harry, New York, N. Y., assignor to H. Negbaur & Co., Inc. Cream pitcher or analogous article. Des. 89,529; Mar. 21.
Negbaur, Harry, New York, N. Y., assignor to H. Negbaur & Co., Inc. Match box holder or article of analogous nature. Des. 85,580; Mar. 21.
Negbaur, Harry, New York, N. Y., assignor to H. Negbaur & Co., Inc. Sugar bowl or article of analogous nature. Des. 89,531; Mar. 21.
Negbaur, Harry, New York, N. Y., assignor to H. Negbaur & Co., Inc. Smoker's tray or article of analogous nature. Des. 89,532; Mar. 21.
Neidich, Samuel A., Edgewater Park, N. J. Forming tubes of celluloid and the like. 1,902,573; Mar. 21.
Neits, John J. (See Buettner, R. J., Pound, Muntner, Neits, and Zansig.)
Nell, Gustave M., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Power feeding device. 1,902,574; Mar. 21.
Nelson, Edwin F., assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbons. 1,902,808; Mar. 21.
Nelson, Hans P., Grantwood, N. J. Pony polo mallet. 1,902,660; Mar. 21.
Nelson, Oscar W., Portland, Oreg. Grinding machine. 1,902,661; Mar. 21.
Nelson, William K., assignor, by mesne assignments, to Insulex Corporation, Chicago, Ill. Insulating block. 1,902,178; Mar. 21.
Neubauer, Carl, Mannheim, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of films, lacquers and the like. 1,902,837; Mar. 21.
Neuman, Harry T., Los Angeles, Calif. Game apparatus. 1,902,137; Mar. 21.
Neveling, Aloys, Chicago, Ill. Method of and apparatus for controlling dredges. 1,902,259; Mar. 21.
Newbery, Carlos W. (See Hoge, Daniell W., assignor.)
Newbound, Reginald. (See Warren, H. W. H., Newbound, and Ward.)
New Departure Manufacturing Company, The. (See Cobb, Leland D., assignor.)
New Departure Manufacturing Company, The. (See Hughes, Frederick G., assignor.)
Newhouse, Ray C., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Rotary cooler. 1,902,517; Mar. 21.
New Jersey Zinc Company, The. (See Meier, Albert J., assignor.)
New Photomaton, Inc., The. (See Helms, Waters L., assignor.)
Newport News Shipbuilding and Dry Dock Company. (See Grant, William F., assignor.)
Newton, Harold M., Clayton, Mo., assignor to Midland Creosoting Company, Toledo, Ohio. Flooring. 1,902,716; Mar. 21.
Nichols, Louis C., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Treating objects. 1,902,575; Mar. 21.
Nilsson, Oscar F., and J. Bachrach, assignors to L. E. Waterman Company, New York, N. Y. Inkstand. 1,902,091; Mar. 21.
Norristown Magnesia & Asbestos Company. (See Wilson, Grant V., assignor.)
Norton, Clifford, South Orange, N. J., assignor, by mesne assignments, to Otis Elevator Company. Mechanism for operating elevator doors. 1,902,188; Mar. 21.
Norton, Raymond J., Washington, D. C., assignor to Bendix Brake Company, South Bend, Ind. Friction surfaces. 1,902,576; Mar. 21.
Norton, Samuel H., Meadville, Pa., assignor to Hookless Fastener Company. Separable fastener. 1,902,416; Mar. 21.
Norwood, Stanley M., Flushing, N. Y., assignor to Electro Metallurgical Company. Production of castings with coatings composed of high-chromium alloys. 1,902,092; Mar. 21.
Novick, Abraham, Flushing, N. Y., assignor to United States Envelope Company, Worcester, Mass. Paper drinking cup. 1,902,717; Mar. 21.
Novotny, Emil E., Philadelphia, assignor to J. S. Stokes, Spring Valley Farms, Huntingdon Valley, Pa. Thermosetting resinous product and making the same. 1,902,461; Mar. 21.
Oakley, Edward C. F., Norbury, England. Nonreturn valve. 1,902,577; Mar. 21.
Oberhoffken, Alexander, assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Machine tool. 1,902,179; Mar. 21.
O'Brien, William J., Cleveland, Ohio, and J. B. Drapeau, jr., New York, N. Y., assignors to The Glidden Company, Cleveland, Ohio. Removing chlorine from zinc sulphate solutions. 1,901,925; Mar. 21.
Oehlsen, George W., jr., assignor to Stewart-Warner Corporation, Chicago, Ill. Radiocabinet. Des. 89,533; Mar. 21.
Ogilvie, George E., Westmoreland, Pa., assignor to Hockensmith Wheel & Mine Car Company. Dumping body. 1,902,093; Mar. 21.
Ohio Brass Company, The. (See Austin, Arthur O., assignor.)
Oilgear Company, The. (See Ferris, John P., assignor.)
Oilgear Company, The. (See Ferris, J. P., Clute, and Wiedmann, assignors.)
Oliver Farm Equipment Company. (See Eggen, Oscar E., assignor.)
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Hob grinding machine. 1,901,926; Mar. 21.
Olson, Carl G., assignor to Shakeproof Lock Washer Company, Chicago, Ill. Lock washer. 1,901,927; Mar. 21.
Olson, Samuel, Oak Park, assignor to Samuel Olson & Company, Chicago, Ill. Automatic spacer. 1,901,928; Mar. 21.
Olson, Samuel, & Company, Inc. (See Olson, Samuel, assignor.)
Optische Anstalt C. P. Goerz, Aktiengesellschaft, Akciova Spolecnost K. P. Goerz, Opticky Ustav. (See Schier, J., Petschenig, and Peinl, assignors.)
Orr, Clark, Fort Wayne, Ind., assignor to General Electric Company. Refrigerating machine. 1,902,518; Mar. 21.
Otis Elevator Company. (See Norton, Clifford, assignor.)
Ousbäck, Mats G. H., assignor to Ragnor Erfass, Stockholm, Sweden. Motor-driven mechanical hammer. 1,901,981; Mar. 21.
Overstrud, Orrin B. (See Thoen, Bennett E., assignor.)
Pacent, Louis G. (See Goodrum, Charles L., assignor.)
Pacific Hair Goods Company Ltd. (now Duart Manufacturing Co. Ltd.). (See Moseley, Tomlinson I., assignor.)
Pacific Pump Works et al. (See Weis, Arthur K., assignor.)
Packard Motor Car Company. (See Brown, Robert N., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Page, George A., jr., Freeport, N. Y., assignor, by mesne assignments, to Curtiss Aeroplane & Motor Company, Inc. Rudder pedal adjusting mechanism. 1,902,094; Mar. 21.
Page, Milton H., Cohoes, N. Y. Sound recording device. 1,902,290; Mar. 21.
Page, Ralph E. (See Daly, G. F., and Page.)
Palm Beach Garment Company. (See Castles, Robert C., assignor.)
Palmer, Harry L., Schenectady, N. Y., assignor to General Electric Company. Electrical control system. 1,902,462; Mar. 21.
Pangborn Corporation. (See Dorfan, Morton I., assignor.)
Pardue, John L., assignor of one-third to T. M. Pardue and one-third to W. A. Pardue, St. Louis County, Mo. Closure for receptacles. 1,901,982; Mar. 21.
Pardue, Theodore M., et al. (See Pardue, John L., assignor.)
Pardue, William A., et al. (See Pardue, John L., assignor.)
Parker, Clark W., assignor, by mesne assignments, to Max Bernstein, New York, N. Y. Apparatus for delivering lighted cigarettes and cigars. 1,902,291; Mar. 21.
Parker, George. (See Buttress, Joseph A., assignor.)
Parsons, Ben G., Houston, Tex. Blower and driving gear for engines. 1,902,095; Mar. 21.

Parsons, William M., Seattle, Wash. Circuit closer for an automatic signaling device. 1,902,578; Mar. 21.
Pass & Seymour, Inc. (See Hall, Nelson W., assignor.)
Patent and Licensing Corporation, The. (See Avery, Henry C., and Kirschbraun, assignors.)
Patterson, Thomas A., Clintonville, Wis. Brake testing device for vehicle wheels. 1,902,718; Mar. 21.
Paul, William E., Schenectady, N. Y., assignor to General Electric Company. Electric circuit breaker. 1,902,463; Mar. 21.
Paul, William E., Schenectady, N. Y., assignor to General Electric Company. Electric circuit breaker. 1,902,464; Mar. 21.
Paulson, Christian. (See Hoffman, H. E., and Paulson.)
Payton, Thomas, Rock Rapids, Iowa. Cleansing metering drums. 1,902,719; Mar. 21.
Pearson, Fred A. A., Valley Stream, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Propeller. 1,902,096; Mar. 21.
Pearson, George A., et al. (See Dickson, George F., assignor.)
Peller, Karl E., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Glass feeding apparatus and method. 1,902,788; Mar. 21.
Peinl, Anton. (See Schier, J., Petschenig, and Peinl.)
Pen Desk Set Company. (See Back, R., and Cooper, assignors.)
Penick, Arthur J. and K. T., Houston, Tex. Blowout-preventer. 1,902,097; Mar. 21.
Penick, Kirby T. (See Penick, Arthur J. and K. T.)
Perkins, Julian L., West Springfield, Mass. Wringer. 1,902,579; Mar. 21.
Perkins, Julian L., West Springfield, and H. D. Croft, Springfield, Mass. Wringer. 1,902,580; Mar. 21.
Perser Corporation, The. (See Draper, Ernest E., assignor.)
Persons, Lawrence M., Des Moines, Iowa, assignor to Cook Electric Company, Chicago, Ill. Heat motor. 1,902,260; Mar. 21.
Peterson, Christen J., Chicago, Ill. Oil burner. 1,901,983; Mar. 21.
Peterson, Eugene, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Voltage limiting system. 1,901,929; Mar. 21.
Petroleum Conversion Corporation. (See Beardsley, E. W., and Evans, assignors.)
Petschenig, Karl. (See Schier, J., Petschenig, and Peinl.)
Pfaff, Harry E. (See Barnhart, G. E., and Pfaff.)
Pfaffenberger, Joachim. (See Dahl, O., and Pfaffenberger.)
Pfeiffer, Fred B., assignor to National Rubber Machinery Company, Akron, Ohio. Method and apparatus for separating adhesively joined sheets. 1,902,139; Mar. 21.
Phelan, Louis A. M., Chicago, Ill., and C. Hotchkiss, Minneapolis, Minn., assignors, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Temperature control apparatus. Re18,771; Mar. 21.
Phelps, Arthur F., assignor to West Virginia Armature Co., Bluefield, W. Va. Packing ring for shaft bearings. 1,902,662; Mar. 21.
Phelps, Arthur F., assignor to West Virginia Armature Co., Bluefield, W. Va. Locomotive journal box. 1,902,720; Mar. 21.
Philadelphia & Reading Coal & Iron Company, The. (See Harford, Charles G., assignor.)
Philip Carey Manufacturing Company, The. (See Fischer, Albert C., assignor.)
Phillips, Burdett H. (See Lee, F. L., and Phillips.)
Phillips, Heman H., Charlemont, Mass. Trellis, arbor, and the like. 1,902,663; Mar. 21.
Piehl, Henry J., Hudson, Ohio, assignor to Hookless Fastener Company. Slide fastener. 1,902,417; Mar. 21.
Pieper, Ernest J., Lancaster, Pa., D. F. Smith, Pensacola, Fla., and C. C. Vogt, assignors to Armstrong Cork Company, Lancaster, Pa. Distributing binder over fibrous materials. 1,901,930; Mar. 21.
Pieper, Ernest J., D. F. Smith, and C. C. Vogt, Haddonfield, N. J., assignors to Armstrong Cork Company, Pittsburgh, Pa. Making heat insulating bodies. 1,901,984; Mar. 21.
Pilcher, Allen C. and L. C., Louisville, Ky., assignors to The Russ Manufacturing Company, Cleveland, Ohio. Sirup pump. 1,902,261; Mar. 21.
Pilcher, Lawrence C. (See Pilcher, Allen C. and L. C.)
Pilgrim, Ernest C., Okmulgee, Okla., assignor to The Jensen Salsbery Laboratories, Inc., Kansas City, Mo. Surgical instrument. 1,902,418; Mar. 21.
Pineo, Orrin W., Milo, Me., assignor to Sprague Specialties Co., North Adams, Mass. Portable screen. 1,902,373; Mar. 21.
Pirinoli, Guglielmo, assignor to Fiat Società Anonima, Turin, Italy. Reducing gear. 1,902,374; Mar. 21.
Pitter Trust. (See Pitter, Walter C., assignor.)
Pitter, Walter C., London, England, assignor to Pitter Trust. Clutch. 1,902,375; Mar. 21.
Plant, R. A., and M. E. Brooks, assignors to The Dow Chemical Company, Midland, Mich. Molding composition and treating. 1,902,419; Mar. 21.
Plimpton, Bentley A., assignor to Locke Insulator Corporation, Baltimore, Md. Making insulator caps. 1,902,310; Mar. 21.
Pollard Machinery Company. (See Evans, Harold, assignor.)
Pollock, Robert T., Cambridge, Mass., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating oils. 1,901,931; Mar. 21.
Pommer, Ernesto J., Moron, Argentina. Automobile radiator. 1,902,044; Mar. 21.
Powell, Henry K., assignor to Morris Paper Mills, Chicago, Ill. Foldable display carton. 1,902,262; Mar. 21.
Powelson, Wilfrid V. N., New York, N. Y., and W. Travell, San Bernardino, Calif. Airship. 1,902,519; Mar. 21.
Pratt, William H., Lynn, Mass., assignor to General Electric Company. Centralized meter recording. 1,902,465; Mar. 21.
Prior, George A., West Hartford, assignor to The Gray-Prior Machine Company, Hartford, Conn. Gauge for determining pitch of propeller blades. 1,902,180; Mar. 21.
Prismo Holding Corporation. (See Gill, Edwin R., jr., assignor.)
Prosperity Company Inc., The. (See Davis, Ernest, assignor.)
Pudelko, Riccard, Zug, Switzerland, assignor to Landis & Gyr, A.-G. Maximum and total demand meter. 1,902,045; Mar. 21.
Pulvis Aktiengesellschaft. (See Rudqvist, Carl A., assignor.)
Punte, William F., Syracuse, assignor to Continental Can Company, Inc., New York, N. Y. Metal container. 1,902,664; Mar. 21.
Purdin, Conn A., Chico, Calif. Food mixer. 1,902,376; Mar. 21.
Quadrex Corporation, The. (See Leathers, Ward, assignor.)
Queen Anne Candy Company. (See Biggs, John L., assignor.)
Radio Corporation of America. (See Goldsmith, A. N., and Wolff, assignors.)
Radio Corporation of America. (See Lindenblad, Nils E., assignor.)
Radio Corporation of America. (See Ranger, Richard H., assignor.)
Radius, Edward W., assignor to Goodman Manufacturing Company, Chicago, Ill. Cutter chain for mining machines. 1,902,420; Mar. 21.
Ragsdale, Earl J. W., assignor to Budd Wheel Company, Philadelphia, Pa. Self-adjusting brake mechanism. 1,902,181; Mar. 21.
Railway Metal Products Company. (See Gilpin, Garth G., assignor.)
Raines, Ewell A., Tulsa, Okla. Dispensing apparatus. 1,902,046; Mar. 21.
Randles, George E., assignor to The Foote-Burt Company, Cleveland, Ohio. Indexing mechanism for machine tools. 1,902,520; Mar. 21.
Ranger, Richard H., Newark, N. J., assignor to Radio Corporation of America. Electrical music system. 1,901,985; Mar. 21.
Ranger, Richard H., Newark, N. J., assignor to Radio Corporation of America. Electrical music system. 1,901,986; Mar. 21.
Rasp, John N., McKeesport, Pa. Curtain rod tip or curtain protector. 1,902,182; Mar. 21.
Räth, Curt. (See Bing, A., and Räth.)
Ratkovszky, Ferencz, Budapest, Hungary, assignor, by mesne assignments, to General Electric Company, Schenectady, N. Y. Apparatus for regulating alternating current circuits. 1,902,466; Mar. 21.
Rawdon, Herbert, and W. E. Burnham, Wichita, Kans., assignor to Travel Air Company. Shock absorber. 1,902,421; Mar. 21.
Rea, Walter C., assignor to Detachable Bit Corporation of America, New York, N. Y. Drill. 1,902,098; Mar. 21.
Reavis, Andrew B., Swarthmore, and R. J. Eisinger, Moores, Pa., assignors to Westinghouse Electric and Manufacturing Company. Governing mechanism. 1,902,311; Mar. 21.
Rector, Frank J., Pendleton, assignor to International Printing Company, Indianapolis, Ind. Gluing machine. 1,902,264; Mar. 21.
Reel, Herbert W. (See Birdsey, C. B., and Reel.)
Reel, Herbert W., Hinsdale, assignor to United States Gypsum Company, Chicago, Ill. Precast ceiling construction. 1,902,789; Mar. 21.
Reichert, Otto. (See Hagedorn, M., Reichert, and Gübring.)
Reid, James S., Shaker Heights, assignor to The Reid Products Company, Cleveland, Ohio. Glass run channel structure. 1,902,422; Mar. 21.
Reid Products Company, The. (See Reid, James S., assignor.)
Reilly, Peter C. (See Higburg, W., assignor, and Reilly.)
Reinhold, Frederick E., Los Angeles, Calif. Padlock. 1,902,665; Mar. 21.
Reis, Leonard W., Dumont, N. J., assignor to John Chatillon & Sons, New York, N. Y. Suspension ring for scale pans. 1,902,581; Mar. 21.
Remington Rand Inc. (See Wolters, Carl F., assignor.)
Reno, William E., Glendale, Calif. Heater. 1,902,099; Mar. 21.
Replogle, John R., Detroit, assignor to Copeland Products, Inc., Mount Clemens, Mich. Refrigerator cabinet. Des. 89,534; Mar. 21.

Replogle, John R., Detroit, assignor to Copeland Products, Inc., Mount Clemens, Mich. Refrigerator top. Des. 89,535; Mar. 21.
Replogle, John R., Detroit, assignor to Copeland Products, Inc., Mount Clemens, Mich. Refrigerator door. Des. 89,536; Mar. 21.
Reussenzehn, Ernest A., assignor to Dayton Scale Company, Dayton, Ohio. Weighing scale. 1,902,100; Mar. 21.
Reynolds, George A., Los Angeles, Calif. Rock crusher and separator. 1,902,721; Mar. 21.
Reynolds, James N., and C. J. Scranton, jr., assignors to Avery Power Machinery Co., Peoria, Ill. Accelerating feed roll. 1,902,292; Mar. 21.
Reynolds, Posey D., Rustburg, Va. Piston tool. 1,902,722; Mar. 21.
Riblet, Royal N., Spokane, Wash. Conveyer bucket. 1,902,582; Mar. 21.
Rice, Elmer V., Covina, Calif. Spiked sandal. 1,902,521; Mar. 21.
Richterkessing, Frank H., assignor to Cheatham Electric Switching Device Company, Louisville, Ky. Automatic electric switch control. 1,902,263; Mar. 21.
Rieber, Frank, San Francisco, Calif. System for receiving and recording vibrations. 1,902,183; Mar. 21.
Rieber, Frank, San Francisco, Calif. Vibration sensitive system. 1,902,184; Mar. 21.
Rieber, Frank, Berkeley, assignor to Frank Rieber, Inc., San Francisco, Calif. Electrical prospecting system. 1,902,265; Mar. 21.
Rieber, Frank, Inc. (See Rieber, Frank, assignor.)
Riley, Clarence E., South Pasadena, Calif. Photoengraver's glass dipping rack. 1,902,338; Mar. 21.
Ripp, Frank X., Madison, Wis. Operating mechanism for windows. 1,902,266; Mar. 21.
Ritzerfeld, Wilhelm, Berlin, Germany. Manifolding machine. 1,902,293. Mar. 21.
Robb, Lewis J., Rochester, N. Y. Combined vending and change making machine. 1,902,467; Mar. 21.
Robbins, Theodore J., New Egypt, N. J. Portable ice saw. 1,902,666; Mar. 21.
Roberts, Edward W., assignor to Lakewood Manufacturing Co., Chicago, Ill. Container. 1,902,728; Mar. 21.
Roberts, John F. (See Holden, R. M., and Roberts.)
Robertson, William R. (See Baird, C., and Robertson.)
Robinson, Edward A., Montreal, Quebec, Canada, assignor to Joseph Robinson, New York, N. Y. Bracket for connector heads. 1,902,101; Mar. 21.
Robinson, Joseph. (See Robinson, Edward A., assignor.)
Roche, Alleman H. (See Dunham, C. R., and Roche.)
Rock Island Plow Company, The. (See Kaupke, Lee H., assignor.)
Roderick, Thomas E., Bronx, N. Y. Hat protector. 1,901,987; Mar. 21.
Rodstein, Harry, and I. Nathanson, Brooklyn, N. Y. Footboard for a bedstead or similar article. Des. 89,537; Mar. 21.
Rodstein, Harry, and I. Nathanson, Brooklyn, N. Y. Footboard for a bedstead or similar article. Des. 89,538; Mar. 21.
Rodstein, Harry, and I. Nathanson, Brooklyn, N. Y. Footboard for a bedstead or similar article. Des. 89,539; Mar. 21.
Rodstein, Harry, and I. Nathanson, Brooklyn, N. Y. Footboard for a bedstead or similar article. Des. 89,540; Mar. 21.
Rose, Gustaf A., assignor to Dahlstrom Metallic Door Company, Jamestown, N. Y. Imitating wood graining. 1,902,522; Mar. 21.
Rose, Joseph P., jr., Wellfleet, Mass. Machine for making cement blocks. 1,902,523; Mar. 21.
Rosenberg, Paul, Berlin, assignor to W. Rosenberg, Berlin, Pankow, Germany. Flash light. 1,902,377; Mar. 21.
Rosenberg, Walter. (See Rosenberg, Paul, assignor.)
Rosenthal China Corporation, The. (See Wesp, George, assignor.)
Roth, Lester B., Prophetstown, Ill. Power lawn mower. 1,902,524; Mar. 21.
Rothe, Horst, Berlin, assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany. Coating electrodes of discharge tubes. 1,902,185; Mar. 21.
Rous, Bernard, Brooklyn, N. Y. Duplex roll of corrugated paper and making the same. 1,902,312; Mar. 21.
Rowe, George E., Wethersfield, assignor to Hartford-Empire Company, Hartford, Conn. Manufacture of hollow glassware. 1,902,140; Mar. 21.
Rowe, George E., West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn. Manufacture of hollow glassware. 1,902,141; Mar. 21.
Rowe, George E., Wethersfield, assignor to Hartford-Empire Company, Hartford, Conn. Manufacture of hollow glassware. 1,902,142; Mar. 21.
Rowley, Charles A., Los Angeles, Calif. Mixer. 1,902,525; Mar. 21.
Rubber Service Laboratories Company, The. (See Evans, Sylvester M., assignor.)
Rubber Service Laboratories Co., The. (See Ingram, Joseph E., assignor.)
Rubber Service Laboratories Co., The. (See Scott, Winfield, assignor.)
Rubovits, Walter I., Chicago, Ill. Container. 1,902,294; Mar. 21.
Ruby, Ernst L., Jenkintown, Pa. Switch heater. 1,902,339; Mar. 21.
Rudqvist, Carl A., Stockholm, Sweden, assignor to Pulvis Aktiengesellschaft, Glarus, Switzerland. Power transmission. 1,901,988; Mar. 21.
Rupert, Hughes T. (See Sanderson, Arthur E., assignor.)
Rupp, John L., Wilkinsburg, Pa., assignor, by mesne assignments, to Wubco Battery Corporation, Niagara Falls, N. Y. Storage battery separator. 1,902,267; Mar. 21.
Russ Manufacturing Company, The. (See Pilcher, Allen C. and L. C., assignors.)
Russel George J., Waltham, Mass. Lubricating system. 1,902,583; Mar. 21.
Sabbah, Camil A., Schenectady, N. Y., assignor to General Electric Company. Electric power converting apparatus. 1,902,468; Mar. 21.
Safety Car Heating & Lighting Company, The. (See Von Ohlsen, Louis H., assignor.)
Sager, Samuel N., Chicago, Ill. Pull-off legging. 1,902,584; Mar. 21.
Saladino, C. & Sons, Inc. (See Saladino, Frank, J., and S., assignors.)
Saladino, Frank, J., and S., assignors to C. Saladino & Sons, Inc., Chelsea, Mass. Composition for treating strings. 1,902,143; Mar. 21.
Saladino, Joseph. (See Saladino, Frank, J., and S.)
Saladino, Salvatore. (See Saladino, Frank, J., and S.)
Sample, Warren M., Muncie, Ind. Upright display rack. Des. 89,512; Mar. 21.
Sanders, Rufus C., assignor to Chrysler Corporation, Detroit, Mich. Accelerator pedal. 1,902,667; Mar. 21.
Sanderson, Arthur E., assignor of one-half to H. T. Rupert, San Pedro, Calif. Garment rack. 1,902,724; Mar. 21.
Sanford, Roy S., assignor to Bendix Brake Company, South Bend, Ind. Cable control. 1,902,585; Mar. 21.
Santini, Danilo. (See Williams, H. W., and Santini.)
Santos, Joseph A., Oakland, Calif. Chair. 1,902,586; Mar. 21.
Sargent & Company. (See Shaw, John H., assignor.)
Saunders, Norman H., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Automatic telephone system. 1,902,186; Mar. 21.
Saunders, Norman H., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone system. 1,902,187; Mar. 21.
Sawin, Kenneth A., Winthrop, assignor to Wheeler Reflector Company, Boston, Mass. Floodlight. 1,902,587; Mar. 21.
Sawyer, Charles B., Cleveland Heights, assignor to The Brush Laboratories Company, Cleveland, Ohio. Flow meter. 1,902,427; Mar. 21.
Sbicca, Frank, assignor to Sbicca-Method Shoes Incorporated, Philadelphia, Pa. Producing complementary insole-outsole combinations. 1,902,725; Mar. 21.
Sbicca-method Shoes Incorporated. (See Sbicca, Frank, assignor.)
Schacht, William F., Huntington, Ind. Caster roller. 1,902,726; Mar. 21.
Schantz, Henry, New Castle, Pa. Molding tool for molding machines. 1,902,047; Mar. 21.
Schaub, James B., Wilmette, Ill. Air current conveyer. 1,901,932; Mar. 21.
Scherer, Abe, Matewan, W. Va. Wearing apparel. 1,902,268; Mar. 21.
Schier, Johann. (See Von Hofe, C., and Schier.)
Schier, Johann, Karl Petschenig, and A. Peinl, Vienna, Austria, assignors to the Firm Optische Anstalt C. P. Goerz; Aktiengesellschaft, Akciova Spolecnost K. P. Goerz, Opticky Ustav, Bratislava, Czechoslovakia. Apparatus for determining the position of aircraft not visible to the naked eye. 1,902,727; Mar. 21.
Schiffman, Robert P., Chicago, Ill. Railroad crossing sign. 1,901,879; Mar. 21.
Schilling, Heinrich. (See Baumann, P., Schilling, and Fischer.)
Schmid, Otto, Rottweil-on-the-Neckar, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of viscose. 1,902,102; Mar. 21.
Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fluid pressure governing system. 1,902,340; Mar. 21.
Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Reduction gear. 1,902,341; Mar. 21.
Schmidt, Kurt, Wuppertal-Elberfeld-Grenze, Germany, assignor to American Glanzstoff Corporation, New York, N. Y. Filament treatment. 1,902,526; Mar. 21.
Schmidt, Paul, Munich, Germany. Conveying liquids at high pressure by means of ejectors. 1,902,728; Mar. 21.
Schmidt, Paul, Munich, Germany. Multistage liquid driven ejector for delivering liquids. 1,902,729; Mar. 21.
Schmidt, Victor P., and H. A. Brenaman, Altoona, Pa. Machine for grinding axles or the like. 1,902,188; Mar. 21.
Schneebeli, Hugo, Courbevoie, France. Carburetor. 1,902,378; Mar. 21.

Schönhöfer, Fritz, Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Manufacture of quinoline derivatives and the products. 1,902,103; Mar. 21.

Schulemann, Werner, Vohwinkel, near Elberfeld, F. Mietzsch, Elberfeld, Germany, and A. Wingler, Westfield, N. J., assignors to Winthrop Chemical Company, Inc., New York, N. Y. Compounds of the xanthene series. 1,902,104; Mar. 21.

Schullerman, Ludwig, Astoria, N. Y. Suspenders. 1,902,342; Mar. 21.

Schumacher, Conrad R., Lynbrook, N. Y., assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass. Metal sharpening machine. 1,902,527; Mar. 21.

Schumacher, F. G., et al. (See Müller, Johann J., assignor.)

Schutt, William A., Litchfield, Ill. Highway sign. 1,902,189; Mar. 21.

Schwammberger, Hans. (See Steinbuch, E., Eschmann, and Schwammberger.)

Schwantes, Everett J., Chicago, Ill. Protecting inscriptions. 1,901,989; Mar. 21.

Schwartz, Samuel A., St. Paul, Minn. Towel service apparatus. 1,902,588; Mar. 21.

Schwegler, Clarence C., assignor to The Dow Chemical Company, Midland, Mich. Electric furnace. 1,902,668; Mar. 21.

Schweitzer, Hugo. (See Huismann, J., and Schweitzer.)

Schweizer, Jack, assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,513; Mar. 21.

Schwenk, Ladislas W., Flushing, N. Y. Portable stand and filter for barrels and the like. 1,901,878; Mar. 21.

Scott, Howard, Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company. Bimetal thermostat. 1,902,589; Mar. 21.

Scott, Winfield, Nitro, W. Va., assignor to The Rubber Service Laboratories Co., Akron, Ohio. Age resisting rubber compound and making same. 1,902,379; Mar. 21.

Scovill Manufacturing Company. (See Janes, Edmund D., assignor.)

Scranton, Charles J., jr. (See Mentor, E. W., and Scranton.)

Scranton, Charles J., jr. (See Reynolds, J. N., and Scranton.)

Scullin Steel Co. (See Dreibuss, H. C., and Chiles.)

Seede, John A., Schenectady, N. Y., assignor to General Electric Company. Welding apparatus. 1,902,469; Mar. 21.

Seger, Jacob, assignor to the Firm Locher & Cie., Zurich, Switzerland. Annular dowel for timber bonds. 1,902,380; Mar. 21.

Selby, Charles M., hesignor to Holland Furnace Company, Holland, Mich. Thermostatic control. 1,902,105; Mar. 21.

Sell, Helmut, Berlin-Siemensstadt, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Microphone. 1,901,933; Mar. 21.

Seltzer, William H., Lehighton, Pa. Flower holding device. 1,902,423; Mar. 21.

Shafer Bearing Corporation. (See Hoover, Ray B., assignor.)

Shakeproof Lock Washer Company. (See Olson, Carl G., assignor.)

Shannon, James L., Longmeadow, Mass., assignor, by mesne assignments, to French Battery Company, Madison, Wis. Electric flash-light. 1,902,590; Mar. 21.

Shaw, Arthur W., Cambridge, Mass. Side arm cushion. 1,902,730; Mar. 21.

Shaw, John H., assignor to Sargent & Company, New Haven, Conn. Lock. 1,902,343; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,514; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,515; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,516; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,517; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,518; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. Des. 89,519; Mar. 21.

Sheindelman, Samuel, Lawrence, N. Y. Sweater or similar article. 89,520; Mar. 21.

Shepherd, Chester G., Freeport, Ill. Article delivery device. 1,902,669; Mar. 21.

Shepherd, Solomon W., Orlo Vista, Fla. Amusement device. 1,902,381; Mar. 21.

Sherman, Donald W., assignor to A. O. Smith Corporation, Milwaukee, Wis. Drafting table. 1,902,424; Mar. 21.

Sherman, Warren S., Oklahoma City, Okla. Locking cover. 1,902,731; Mar. 21.

Shields, Michael P., Quebec, Quebec, Canada. Method of and apparatus for economizing feed water. 1,902,732; Mar. 21.

Shoe Form Co. (See De Witt, William J., assignor.)

Shoemaker, Frank W. (See Merwin, G. E., and Shoemaker.)

Shoemaker, Fred G., Syracuse, N. Y. Spark plug ignition terminal. 1,902,882; Mar. 21.

Shook, Florain J., assignor to National Rubber Machinery Company, Akron, Ohio. Extruding machine. 1,902,296; Mar. 21.

Shuster, Carl N., West Orange, N. J., assignor to La Fayette Instruments, Inc., New York, N. Y. Device for determining altitudes and trigonometric functions thereof. 1,901,880; Mar. 21.

Sidery, Arthur J. (See Sutton, H., Sidery, and Evans.)

Siemens & Halske Aktiengesellschaft. (See Blumberg, Gustav, assignor.)

Siemens & Halske Aktiengesellschaft. (See Sell, Helmut, assignor.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Kühnel, C., and Korittke, assignors.)

Signode Steel Strapping Company. (See Edwards, Russell T., assignor.)

Simanek, Wenzel J., Racine, Wis. Advertising frame. 1,901,990; Mar. 21.

Simanek, Wenzel J., Racine, Wis. Frame. 1,901,991; Mar. 21.

Simmen, Oscar, Erlach, Switzerland, assignor to the Firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Water cooled internal combustion engine cylinder. 1,902,528; Mar. 21.

Sisnc, Julius, Torrington, Wyo. Tractor operated beet loader. 1,902,883; Mar. 21.

Skeffington, Edward T., et al. (See Foss, Leland L., assignor.)

Slemmer, William B., Malden, assignor to Warren Brothers Company, Cambridge, Mass. Apparatus designed for handling cement and like material. 1,902,145; Mar. 21.

Slotoroff, Abraham, Brooklyn, N. Y. Bathing garment. 1,902,190; Mar. 21.

Smestad, Hans M., Bainville, Mont. Grain treating and elevating device. 1,902,733; Mar. 21.

Smith, Algy J., Bloomfield, assignor to Hartford-Empire Company, Hartford, Conn. Forming parisons. 1,901,934; Mar. 21.

Smith, Alyson E., Ogden, Utah. Combined rack and utility table. 1,902,670; Mar. 21.

Smith, A. O., Corporation. (See Sherman, Donald W., assignor.)

Smith, A. O., Corporation. (See Stresau, Richard, assignor.)

Smith, Bruno M., West Orange, S. G. Langley, Maplewood, and G. F. Braun, Elizabeth, assignors to Thomas A. Edison, Incorporated, West Orange, N. J. Dictating machine cabinet. Des. 89,521; Mar. 21.

Smith, D. Montgomery, Portland, Oreg. Lawn edger and trimmer. 1,901,992; Mar. 21.

Smith, Dillon F. (See Pieper, E. J., Smith, and Vogt.)

Smith, Norman S., Eastaboga, Ala. Cultivator tractor. 1,901,993; Mar. 21.

Smith, William N. (See Davis, S. H., Anderson, Smith, and Hanley.)

Smitmans, John A. (See Johnson, L., and Smitmans.)

Smola, William H., sr., Central City, Iowa. Saw. 1,902,671; Mar. 21.

Society of Chemical Industry in Basle. (See Steinbuch, E., Eschmann, and Schwammberger, assignors.)

Soss, Joseph, Roselle, N. J. Covered joint hinge. 1,901,994; Mar. 21.

Souders, Mott, jr. (See Brown, G. G., and Souders.)

Sperber, Raymond L., Cheviot, Ohio, assignor to Wells & Richardson Company, Inc., Burlington, Vt. Color meter. 1,902,672; Mar. 21.

Speroulias, John, et al. (See Davison, Goliat, assignor.)

Sponsel, Charles W. (See Crosby, R. S., and Sponsel.)

Sprado, Carl G., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Grinding, refining, and mixing machine. 1,902,591; Mar. 21.

Sprague Specialties Co. (See Pineo, Orrin W., assignor.)

Sprague, Warner & Company. (See Klapper, Benjamin A., assignor.)

Standard-I. G. Company. (See Clark, Edgar M., assignor.)

Standard Radium Corporation of America. (See Tyrer, Alfred H., assignor.)

Stanley, Edgar C., Glen Cove, N. Y., assignor, by mesne assignments, to Motor and Plane Accessories, Inc., Detroit, Mich. Oiling system for motor cars. 1,902,592; Mar. 21.

Staples, William H. (See Blossom, C. W., and Staples.)

Stark Bro's. Nurseries & Orchards Company. (See Dickey, John H., assignor.)

Starrett, Henry F., Chicago, Ill. Panel-board and panel-board construction. 1,902,790; Mar. 21.

Staytite Company, The. (See Muller, Frans G. D., assignor.)

Stebbins, Frederick O. (See Hobart, H. M., Stebbins, and Gettelman.)

Stedefeld, Curt. (See Kruckenberg, F., and Stedefeld.)

Stegnstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Voltage compensated motor starter. 1,902,470; Mar. 21.

Steinbuch, Ewald, Basel, M. Eschmann and H. Schwammberger, Monthey, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Producing chemical reactions in gases and vapors with aid of a high tension electric arc. 1,902,384; Mar. 21.

Steiner Sales Company. (See Thompson, Charles W., assignor.)

Stemmons, Clarence H., Kansas City, Mo. Shoe. Des. 89,541; Mar. 21.

Sterling Products Company. (See Wilkinson, Arthur W., assignor.)

Stevenson, Horace N., Trenton, N. J. Adjustable springboard. 1,902,675; Mar. 21.

Stewart, Duncan J., assignor to H. D. Colman, Rockford, Ill. Control for heating systems. 1,901,995; Mar. 21.

Stewart-Warner Corporation. (See Oehlsen, George W., jr., assignor.)

Stickel, Charles W. (See Tuttle, W. B., and Stickel.)

Stieger, Ray J. (See D'Andrea, Michael, assignor.)

Stine, Ruby P., Shelbyville, Ind. Snath. 1,902,191; Mar. 21.

Stöckly, Johann J., Teltow, and E. Witte, Berlin-Lichterfelde, Germany, assignors, by mesne assignments, to American Glanzstoff Corporation, New York, N. Y. Artificial silk. 1,902,529; Mar. 21.

Stoddard, Edgar S. (See Hilpert, W. S., and Stoddard.)

Stoddard, Edgar S., Berwyn, assignor to The Conover Company, Chicago, Ill. Dishwashing machine. 1,902,192; Mar. 21.

Stoddard, Edgar S., Berwyn, assignor to The Conover Company, Chicago, Ill. Washing machine. 1,902,193; Mar. 21.

Stokes, John S. (See Novotny, Emil E., assignor.)

Stoll, Albert, assignor to National Machine Products Company, Detroit, Mich. Apparatus for making lock washers. 1,902,269; Mar. 21.

Stouges, Anthony J., Queens Village, N. Y., assignor to Mergenthaler Linotype Company. Matrix cabinet. 1,902,425; Mar. 21.

Strasser, Rosetta R., New York, N. Y. Smoker's finger glove. 1,902,426; Mar. 21.

Streng Bakery Appliance Company. (See Streng, Leo F., assignor.)

Streng, Leo F., assignor to Streng Bakery Appliance Company, Columbia, Mo. Bread wrapping machine. 1,902,734; Mar. 21.

Stressau, Richard, Wauwatosa, assignor to A. O. Smith Corporation, Milwaukee, Wis. Annealing vessels. 1,902,146; Mar. 21.

Streun, John A., assignor to Hardwicke-Etter Company, Sherman, Tex. Adjustable picker roller. 1,902,674; Mar. 21.

Streun, John A., assignor to Hardwicke-Etter Company, Sherman, Tex. Conveyer for cotton. 1,902,675; Mar. 21.

Struble, Mabel, New York, N. Y. Hat box. 1,902,313; Mar. 21.

Sullivan Machinery Company. (See Holmes, Morris P., assignor.)

Sulzer Freres Societe Anonyme. (See Simmen, Oscar, assignor.)

Sunnen, Joseph, St. Louis, Mo. Cylinder grinder. 1,902,194; Mar. 21.

Sutton, Hubert, A. J. Sidery, and B. Evans, South Farnborough, England. Hardening alloy steel. 1,902,676; Mar. 21.

Swahn, Adolph, Ellsworth, Wis. Locking system for strong boxes. 1,902,195; Mar. 21.

Swanson, Swan J., St. Louis, Mo. Rotary amusement device. 1,901,935; Mar. 21.

Swerdlow, Nathan. (See Hill, C. H., and Swerdlow.)

Swick, Seward E. (See Bishop, L. C., and Swick.)

Swift and Company. (See Mehl, Arthur J., assignor.)

Symington Company, The. (See Barrows, Donald S., assignor.)

Tabulating Machine Company, The. (See Bryce, James W., assignor.)

Tabulating Machine Company, The. (See Daly, G. F., and Page, assignors.)

Tabulating Machine Company, The. (See Dechêne, Peter, assignor.)

Tabulating Machine Company, The. (See Ford, Eugene A., assignor.)

Tabulating Machine Company, The. (See Lake, Clair D., assignor.)

Tabulating Machine Company, The. (See Lee, F. L., and Phillips, assignors.)

Talbot, George W., Bloomington, Ind. Vegetable and fruit shipping basket. 1,902,196; Mar. 21.

Tamarin, Bernard J., Philadelphia, Pa. Vacuum cleaner handle structure. 1,902,593; Mar. 21.

Tamaru, Setsuro, Kamakura Gun, Kanagawa Ken, and Y. Kolzumi, Ebara Gun, Tokyo Fu, assignors to Mitsubishi Kogyo Kabushiki Kaisha, Tokyo, Japan. Treating material containing tin. 1,902,735; Mar. 21.

Tanaka, Hiroshi, Komagome, Hongo-Ku, and S. Imatomi, Ikegami-Machi, Ebara-Gun, assignors to Zaidan Hojin Rikagaku Kenkyujo, Tokyo, Japan. Producing MgCl$_2$ containing chlorides of alkali metals or alkaline earth metals. 1,902,385; Mar. 21.

Tate, James, assignor to Delta Manufacturing Company, Milwaukee, Wis. Miter gauge. 1,902,270; Mar. 21.

Taylor, Eugene S., Montpelier, Ohio. Display table. 1,902,677; Mar. 21.

Taylor, George A., Hyde Park, Mass. Starting device for internal combustion engines. 1,901,996; Mar. 21.

Taylor, George A., Hyde Park, Mass. Engine starting device. 1,901,997; Mar. 21.

Taylor, Herbert B., assignor to General Railway Signal Company, Rochester, N. Y. Electrical plug coupler. 1,902,701; Mar. 21.

Teitelbaum, Maxwell, Brooklyn, N. Y. Adjustable hatrack. 1,902,147; Mar. 21.

Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H. (See Rothe, Horst, assignor.)

Telephon-Apparat Fabrik E. Zwietusch, and Company. (See Binick, Georg, assignor.)

Terry, Edward F., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Handle for rock drills. 1,902,530; Mar. 21.

Texas Company, The. (See Bekimer, Otto, assignor.)

Textile Dyeing and Printing Co. of America, Inc. (See Froelicher, Victor, assignor.)

Thabeld, Feri A., Dallas, Tex., assignor, by mesne assignments, to Guiberson Diesel Engine Company, Dover, Del. Fuel injector for engines. 1,902,197; Mar. 21.

Tharp, Charles W., Watsonville, Calif. Leveler. 1,901,936; Mar. 21.

Theobald, William M., Cleveland, Ohio. Apparatus for cleaning window shades. 1,902,344; Mar. 21.

Theodoropulos, Aristede A., New York, N. Y. Twin food mixer. 1,902,678; Mar. 21.

Thoen, Bennett E., assignor, by mesne assignments, of one-half to O. B. Ovestrud, Orfordville, Wis. Agitator. 1,901,998; Mar. 21.

Thomas & Betts Co., The. (See Thomas, George C., jr., assignor.)

Thomas, George C., jr., assignor to The Thomas & Betts Co., Elizabeth, N. J. Cable connecter. Re18,773; Mar. 21.

Thomas, George J., assignor to Bendix Brake Company, South Bend, Ind. Brake-lining testing. 1,902,594; Mar. 21.

Thomas, Mabel M., executrix. (See Thomas, Thomas H.)

Thomas, Sherman O., Washington, D. C., assignor to The American Dairy Supply Company, Augusta, Me. Matrix material for production of printing plates. 1,902,048; Mar. 21.

Thomas, Thomas H., deceased, Edgewood; Mabel M. Thomas, executrix, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 1,901,937; Mar. 21.

Thomas, Willis P., assignor to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,902,736; Mar. 21.

Thompson, Charles W., Wollaston, Mass., assignor, by mesne assignments, to Steiner Sales Company, Salt Lake City, Utah. Roll towel cabinet. 1,902,198; Mar. 21.

Thompson, George D. (See Willi, Christopher B., assignor.)

Thompson, James S., New Rochelle, N. Y., assignor to Firebar Corporation, Cleveland, Ohio. Grate bar. 1,902,595; Mar. 21.

Thomsen, Alfred M., San Francisco, Calif. Manufacturing paper pulp. 1,902,106; Mar. 21.

Thomson, Elihu, Swampscott, Mass., assignor to General Electric Company. Electromagnetic clutch. 1,902,471; Mar. 21.

Timson, Charles E., assignor to William Cooper & Nephews Incorporated, Chicago, Ill. Marker or tag. 1,902,531; Mar. 21.

Tinus, William C., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Tapping a conductor. 1,901,938; Mar. 21.

Todd, Malverin A. (See Hassell, M. E., and Todd.)

Toulewics, Isidore E., and M. Lison, Buffalo, N. Y. Tool holder guard. 1,902,679; Mar. 21.

Torrance, John R., Bitton, England. Mill for reducing paints, colors, and pigments. 1,902,680; Mar. 21.

Tourtois, Fernand, New York, N. Y., assignor to Coty, Inc., Wilmington, Del. Cosmetic container. 1,902,199; Mar. 21.

Travel Air Company. (See Rawdon, H., and Burnham, assignors.)

Travell, Warren. (See Powelson, W. V. N., and Travell.)

Traylor Engineering & Manufacturing Company. (See Miller, Arthur F., assignor.)

Traylor Engineering & Manufacturing Company. (See Traylor, Samuel W., jr., assignor.)

Traylor, Samuel W., jr., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa. Producing oil from wells, and apparatus therefor. 1,902,296; Mar. 21.

Traylor, Samuel W., jr., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa. Liquid pump. 1,902,386; Mar. 21.

Treconing, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Combined plug receptacle and warning light fixture. 1,902,596; Mar. 21.

Trimbach, Clem G., Hempstead, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Machine gun mount for aircraft. 1,902,107; Mar. 21.

Trinks, Willibald, assignor to Mesta Machine Company, Pittsburgh, Pa. Operating, pickling machines. 1,902,532; Mar. 21.

True, Robert A., Peterborough, England. Liquid meter. 1,902,049; Mar. 21.

Tsavaris, John E., Tarpon Springs, Fla. Vehicle signal switch. 1,902,737; Mar. 21.

Turck, Joseph A. V., Wilmette, assignor to Felt & Tarrant Manufacturing Company, Chicago, Ill. Calculating machine. 1,902,597; Mar. 21.
Turck, Joseph A. V., Wilmette, assignor to Felt & Tarrant Mfg. Company, Chicago, Ill. Calculating machine. 1,902,598; Mar. 21.
Tuteur, Julius, assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio. Handle for vacuum cleaners. 1,902,472; Mar. 21.
Tuttle, Henry W., Chicago, Ill. Machine for expressing fruit juices and the like. 1,902,738; Mar. 21.
Tuttle, William R., and C. W. Stickel, assignors to The Kuriash Company, Inc., Rochester, N. Y. Cosmetic compact. 1,902,681; Mar. 21.
Twitchell Process Company, The. (See Heckel, Hermann, assignor.)
Twogood, Ralph S., San Francisco, Calif. Cover for oil storage tanks. 1,902,108; Mar. 21.
Twyman, Frank, assignor to Adam Hilger, Limited, London, England. Method of and apparatus for quantitative spectrum analysis. 1,902,109; Mar. 21.
Tyrer, Alfred H., Toronto, Ontario, Canada, assignor to Standard Radium Corporation of America, New York, N. Y. Device for impregnating drinking water with radium emanation. 1,902,200; Mar. 21.
Uggla, Carl H. (See Magnuson, C. A., and Uggla.)
Uhrenfabrik J. Kiensle. (See Jaissle, Gottlob, assignor.)
Ungelenk, Alfred, and W. Hofmann, Thuringen, Germany, assignors to General Electric Company. Device for supporting metal parts within a vacuum tube. 1,902,473; Mar. 21.
Ungelenk, Alfred, and W. Hofmann, Thuringen, Germany, assignors to General Electric Company. Protective cover for X-ray tubes. 1,902,474; Mar. 21.
Union Switch & Signal Company, The. (See McCann, Ronald A., assignor.)
United American Bosch Corporation. (See Kongsted, Ludvig P., assignor.)
United American Bosch Corporation. (See Martin, John F., assignor.)
United Autographic Register Co. (See Jensen, Louis, assignor.)
United-Carr Fastener Corporation. (See Holmes, George A., assignor.)
United-Carr Fastener Corporation. (See Maynard, George S., assignor.)
United-Carr Fastener Corporation. (See Walker, William J., assignor.)
United Engineering & Foundry Company. (See Johnson, L., and Smitmans, assignors.)
United Oil Manufacturing Company. (See Gebhardt, Frank C., assignor.)
United Shoe Machinery Corporation. (See Ballard, M. H., and McLean, assignors.)
United Shoe Machinery Corporation. (See Finn, Sidney J., assignor.)
United Shoe Machinery Corporation. (See Goddu, George, assignor.)
United States Envelope Company. (See Novick, Abraham, assignor.)
United States Glass Company. (See Ilgenfritz, Curtis B., assignor.)
United States Gypsum Company. (See Birdsey, C. R., and Reel, assignors.)
United States Gypsum Company. (See Marks, Herbert E., assignor.)
United States Gypsum Company. (See Reel, Herbert W., assignor.)
Universal Oil Products Company. (See Dubbs, Carbon P., assignor.)
Universal Oil Products Company. (See Mekler, Lev A., assignor.)
Universal Oil Products Company. (See Nelson, Edwin F., assignor.)
Universal Oil Products Company. (See Pollock, Robert T., assignor.)
Universal Products Company. (See Huff, Lyman C., assignor.)
Upson, Charles A., assignor to The Upson Company, Lockport, N. Y. Insulating material and making the same. 1,901,999; Mar. 21.
Upson Company, The. (See Upson, Charles A., assignor.)
Upson Company, The. (See Winter, Otto R., assignor.)
Urich, Moritz, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Vapor discharge device. 1,902,110; Mar. 21.
Utilities Service Company. (See Miller, Herbert E., assignor.)
Valentine, Irving R., Erie, Pa., assignor to General Electric Company. Short cycle annealing process for producing malleable iron. 1,902,475; Mar. 21.
Valentine, Warren P., Line Lexington, assignor to National Transit Pump & Machine Company, Oil City, Pa. Fluid pressure pump. 1,902,345; Mar. 21.
Van Ee, Willem. (See Day, Levi, and van Ee.)
Van Sickle, Roswell C., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,902,314; Mar. 21.
Van Slyck, William, Brooklyn, N. Y. Mattress. 1,902,000; Mar. 21.
Vasselli, Anthony J., Newark, N. J. Synchronizing mechanism for talking motion pictures. 1,902,201; Mar. 21.
Vaughn, Sidney P., U. S. Navy, Ackerman, Miss., assignor to Grayson Heat Control Inc., Lynnwood, Calif. Thermostat. 1,901,881; Mar. 21.
Vaughn, Stanley I., Hempstead, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Metal joint and method of forming the same. 1,902,111; Mar. 21.
Vawter, John T., Los Angeles, Calif. Cement gun nozzle. 1,902,202; Mar. 21.
Vernet, Sergius, Brooklyn, N. Y. Cigarette dispensing and lighting machine. 1,902,599; Mar. 21.
Verstegen, Theodore A., Buffalo, N. Y. Cabin for aircraft and the like. 1,902,428; Mar. 21.
Verstoep, Dirk, The Hague, Netherlands. Apparatus for separating water from dredged material. 1,902,739; Mar. 21.
Vetter, Joseph J., Hackensack, assignor to Natural Products Refining Co., Jersey City, N. J. Producing chromates. 1,901,939; Mar. 21.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Lubricating means for automatic transmission mechanism. 1,902,050; Mar. 21.
Vock, William A., Long Beach, Calif. Bushing. 1,902,600; Mar. 21.
Vodos, Frederick W., Wilmette, assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,902,148. Mar. 21.
Vogt, Clarence C. (See Pieper, E. J., Smith, and Vogt.)
Vogt, Clarence W., assignor to Vogt Instant Freezers Incorporated, Louisville, Ky. Rotary pump. 1,902,315; Mar. 21.
Vogt, Clarence W., assignor to Vogt Instant Freezers Incorporated, Louisville, Ky. Rotary pump. 1,902,346; Mar. 21.
Vogt, Clarence W., and W. E. Zoeller, assignors to Vogt Instant Freezers, Incorporated, Louisville, Ky. Rotary gear pump. 1,902,347; Mar. 21.
Vogt Instant Freezers, Incorporated. (See Vogt, Clarence W., assignor.)
Vogt Instant Freezers, Incorporated. (See Vogt, C. W., and Zoeller, assignors.)
Von Bichowsky, Foord, Glendale, Calif. Preparing titanium dioxide. 1,902,203; Mar. 21.
Von Bichowsky, Foord, Glendale, Calif. Producing pigments containing titanium. 1,902,204; Mar. 21.
Von Hofe, Christian, and J. Schier, Vienna, Austria, assignor to Actiengesellschaft C. P. Goers Optische Anstalt Actiova Spolecnost K. P. Goers Opticky Ustav, Pressburg, Bratislava, Czechoslovakia. Box shaped water level. 1,902,387; Mar. 21.
Von Ohlsen, Louis H., New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. System and apparatus for electric regulation. 1,901,882; Mar. 21.
Vykoupil, Karel, Mariampol, Lithuania. Evaporator. 1,902,533. Mar. 21.
Wacker, Dr. Alexander, Gesellschaft fur Elektrochemische Industrie. (See Halbig, P., and Kaufler, assignors.)
Wade, Elmer J. (See McEachron, K. B., and Wade.)
Wagstaff, James W., Youngstown, Ohio. Checker brick and checker work formed therefrom. 1,902,348; Mar. 21.
Waite Carpet Company. (See Kadlec, Charles, assignor.)
Waite, Harry F. (See Garretson, Harry D., assignor.)
Walker, William J., Waterbury, Conn., assignor to United-Carr Fastener Corporation, Cambridge, Mass. Bag frame structure and fastener therefor. 1,902,297; Mar. 21.
Wall, Matthew J., Jersey City, N. J., assignor to The Linde Air Products Company. Heat retaining means for autogenous welding and welding. 1,902,051; Mar. 21.
Wallace, R., & Sons Manufacturing Company. (See Warren, William S., assignor.)
Walle, Ludwig S., Lansdowne, Pa., assignor to General Electric Company. Circuit controlling apparatus. 1,902,476; Mar. 21.
Walrath, Ernest L., Bend, Oreg. Golf tee positioning device. 1,902,682; Mar. 21.
Walter, Albert B., Elm Grove, W. Va. Combination jack and shock absorbing structure. 1,902,740; Mar. 21.
Wandling, Harry T., Alton, Ill. Stoker link. 1,902,149; Mar. 21.
Ward, Alfred T. (See Warren, H. W. H., Newbound, and Ward.)
Warner, Donald F., Lynn, Mass., assignor to General Electric Company. Packing. 1,902,792; Mar. 21.
Warner, Harry S., Joliet, Ill. Wall structure. 1,902,271; Mar. 21.
Warner, Joseph R., assignor to S. F. Bowser & Company, Fort Wayne, Ind. Automatic lubricator. 1,902,601; Mar. 21.
Warren Brothers Company. (See Slemmer, William B., assignor.)
Warren, Henry W. H., Coventry, R. Newbound, Rugby, and A. T. Ward, Derby, England, assignors to General Electric Company. Manufacture of synthetic resins. 1,902,477; Mar. 21.
Warren, S. D., Company. (See Cape, William H., assignor.)
Warren, William S., Meriden, Conn., assignor to R. Wallace & Sons Manufacturing Company, Wallingford, Conn. Spoon or similar article. Des. 89,542; Mar. 21.
Washington Gas Light Company. (See Nachman, Harold J., assignor.)

Wasserberg, Max, Brooklyn, N. Y. Ownership identification device. 1,902,001; Mar. 21.
Waterman, L. E., Company. (See Nilsson, O. F., and Bachrach, assignors.)
Water Works Supply Company. (See Hubbard, Edward L., assignor.)
Weaver, John A. (See Hughes, Hughey V., assignor.)
Weber, Carl, Jacksonville, Fla. Diversion dam. 1,902,741; Mar. 21.
Webster, James M., New York, N. Y. Hangar for aeroplanes and the like. 1,902,205; Mar. 21.
Wehr Motor Company, The. (See Haller, Harvey H., assignor.)
Weis, Arthur R., assignor of one-half to Pacific Pump Works and one-half to G. E. Bigelow, Huntington Park, Calif. Main bearing construction for turbine pumps. 1,902,150; Mar. 21.
Weis, Arthur R., assignor of one-half to Pacific Pump Works and one-fourth to G. E. Bigelow, Huntington Park, Calif. Deep-well turbine leakproof and sandproof upper main bearing. 1,902,431; Mar. 21.
Welch, Clifton, Pensacola, Fla. Combined cigarette case and ash tray. 1,902,888; Mar. 21.
Welch, Sidney A., A. F. Guyler, J. T. Ashby, and W. H. Boaler, Spondon, near Derby, England, assignors to Celanese Corporation of America. Knitting machine. 1,902,151; Mar. 21.
Wellauer, Max, Oerlikon, near Zurich, assignor to Maschinenfabrik Oerlikon, Oerlikon, Switzerland. Mercury vapor anode. 1,902,002; Mar. 21.
Wells & Richardson Company. (See Sperber, Raymond L., assignor.)
Wentink, Alfred N., Chicago, Ill. Insulation stripping device. 1,902,742; Mar. 21.
Wenzel, Emil, assignor to Ernst Gessner Aktiengesellschaft, Aue, Germany. Moistening cloth. 1,902,429; Mar. 21.
Werder, John F., Lakewood, Ohio. Discharge nozzle. 1,902,003; Mar. 21.
Wesp, George, assignor to The Rosenthal China Corporation, New York, N. Y. Plate or similar article. Des. 89,522; Mar. 21.
Western Electric Company. (See Brodie, George H., assignor.)
Western Electric Company. (See Dinham, C. R., and Roche, assignors.)
Western Electric Company. (See Fruth, Hal F., assignor.)
Western Electric Company. (See Hoffman, R. E., and Paulson, assignors.)
Western Electric Company. (See McCoy, Clarence E., assignor.)
Western Electric Company. (See McKee, Clarence A., assignor.)
Western Electric Company. (See McMullan, Samuel, assignor.)
Western Electric Company. (See Wright, Esmond P. G., assignor.)
Western Union Telegraph Company, The. (See Kimball, Vernon R., assignor.)
Westinghouse Air Brake Company, The. (See Daux, Gaston, assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See McCune, Joseph C., assignor.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Electric and Manufacturing Company. (See Beers, G. L., and Barden, assignors.)
Westinghouse Electric & Manufacturing Company. (See Burr, Gordon A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Foresman, Robert A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Halfvarson, Gustaf A., assignor.)
Westinghouse Electric & Manufacturing Company. (See High, Jurjen S., assignor.)
Westinghouse Electric & Manufacturing Company. (See Legg, Joseph W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mosshart, Donald J., assignor.)
Westinghouse Electric and Manufacturing Company. (See Reavis, A. B., and Isinger, assignors.)
Westinghouse Electric & Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Scott, Howard, assignor.)
Westinghouse Electric & Manufacturing Company. (See Van Sickle, Roswell C., assignor.)
Westinghouse Electric and Manufacturing Company. (See Williams, H. W., and Santini, assignors.)
West Virginia Armature Co. (See Phelps, Arthur F., assignor.)
Wharton, William B., et al. (See Barnhart, G. E., and Pfaff, assignors.)
Wheeler Reflector Company. (See Sawin, Kenneth A., assignor.)
Whitaker, Louis P., New York, N. Y., assignor to S. R. Dresser Manufacturing Company, Bradford, Pa. Making heat exchangers. 1,902,349; Mar. 21.
Whitaker, Louis P., New York, N. Y., assignor to S. R. Dresser Manufacturing Company, Bradford, Pa. Heat exchanger. 1,902,350; Mar. 21.
White and Wells Company. (See Wrigley, John R., assignor.)
White, Blanche B. (See Moss, W. H., and White.)
Whitehead, Earl B., assignor to Atlantic Carton Corporation, Norwich, Conn. Carton. 1,901,883; Mar. 21.
Whitlock Gas Process Company. (See Whitlock, Richard E., assignor.)
Whitlock, Richard E., Camarillo, Calif., assignor to Whitlock Gas Process Company, Inc., Dover, Del. Making oil gas. 1,902,004; Mar. 21.
Whittingham, George H., assignor to Monitor Controller Company, Baltimore, Md. Push button switch. 1,902,743; Mar. 21.
Wickersham, Elmer E., assignor, by mesne assignments, to Caterpillar Tractor Co., San Leandro, Calif. Harvester. 1,902,430; Mar. 21.
Wiedmann, Ernst. (See Ferris, J. P., Clute, and Wiedmann.)
Wiegand, Erich, Berlin-Waidmannslust, Germany, assignor to General Electric Company. Manufacture of hot cathodes for electric discharge devices. 1,902,478; Mar. 21.
Wielats, Fred, Chicago, Ill. Vacuum cleaning device. 1,902,534; Mar. 21.
Wildhaber, Ernest, Brooklyn, N. Y. Worm gearing. 1,902,683; Mar. 21.
Wilkinson, Arthur W., assignor to Sterling Products Company, Easton, Pa. Container. 1,902,816; Mar. 21.
Willheim, William, Co. (See Brodsky, Michel, assignor.)
Willheim, William, Co. (See Gottesman, Joseph M., assignor.)
Willheim, William, Co. (See Guhl, Maclyn, assignor.)
Willheim, William, Co. (See Kohut, Alexander, assignor.)
Willheim, William, Co. (See Schweiser, Jack, assignor.)
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,543; Mar. 21.
Willi, Christopher B., assignor of one-fourth to G. D. Thompson, Heber, Calif. Circuit controlling device. 1,902,744; Mar. 21.
Williams, Harold W., and D. Santini, East Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. Relay. 1,902,602; Mar. 21.
Williams, Ira, Woodstown, N. J., and A. M. Neal, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Preservation of rubber. 1,902,005; Mar. 21.
Williams, Tudor R. (See Hopkinson, H., and Britton, assignors.)
Willing, Joseph E., assignor to General Railway Signal Company, Rochester, N. Y. Thermal relay. 1,902,793; Mar. 21.
Willmann, Gustave, Paris, France. Wafer dosing, filling, and sealing machine. 1,902,272; Mar. 21.
Wilmot Castle Co. (See Castle, Wilmot V., assignor.)
Wilson, Grant V., Chicago, Ill., assignor to Norristown Magnesia & Asbestos Company, Norristown, Pa. Heat insulating covering. 1,902,794; Mar. 21.
Wilson, Wesley, Chicago, Ill., assignor to Bendix Aviation Corporation, South Bend, Ind. Automatic priming device. 1,902,603; Mar. 21.
Windaus, Adolf, Cottingen, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Antirachitically active product. 1,902,745; Mar. 21.
Wingler, August. (See Schulemann, W. Mietzsch, and Wingler.)
Winter, Otto R., Cincinnati, Ohio, assignor to The Upson Company, Lockport, N. Y. Sheet severing mechanism. 1,902,604; Mar. 21.
Winthrop Chemical Company. (See Linsert, Otto, assignor.)
Winthrop Chemical Company. (See Schönhöfer, Fritz, assignor.)
Winthrop Chemical Company. (See Schulemann, W., Mietzsch, and Wingler, assignors.)
Winthrop Chemical Company. (See Windaus, Adolf, assignor.)
Wired Radio, Inc. (See Boljahn, Adolf W. C., assignor.)
Witte, Erhard. (See Stöckly, J. J., and Witte.)
Wolf Brothers. (See Wolf, Howard A., assignor.)
Wolf, Gregor, Betzdorf-on-the-Sieg, Germany. Hand cultivator. 1,902,389; Mar. 21.
Wolf, Howard A., assignor to Wolf Brothers, Philadelphia, Pa. Dispenser. 1,902,052; Mar. 21.
Wolff, Irving. (See Goldsmith, A. N., and Wolff.)
Wolters, Carl F., Marietta, Ohio, assignor to Remington Rand Inc., Buffalo, N. Y. Drawer suspension. 1,902,795; Mar. 21.
Wood, George R., Toronto, Ontario, Canada, assignor to International Business Machines Corporation, New York, N. Y. Printing ribbon. 1,902,007; Mar. 21.
Wood, John, Manufacturing Company. (See Dougherty, Robert J., assignor.)
Wood, Walter. (See Camerota, Louis A., assignor.)
Woodbridge, Joseph L. (See Kershaw, W. E., and Woodbridge.)
Woodruff, Henry S., Schenectady, N. Y., assignor to General Electric Company. Refrigerator cabinet. 1,902,479; Mar. 21.
Woods, Charles L., Alton, Ill. Boat. 1,902,006; Mar. 21.
Woods, William J., Schenectady, N. Y., assignor to General Electric Company. Hydraulic operator. 1,902,480; Mar. 21.
Wormley, James C., New York, N. Y. Sterilising process. 1,902,390; Mar. 21.

Wright, Esmond P. G., Croydon, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone exchange system. 1,901,940; Mar. 21.
Wright, Percy C., Pittsburg, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y. Froth-flotation concentration of ores. 1,902,317; Mar. 21.
Wrigley, John R., Norwalk, assignor to White and Wells Company, Waterbury, Conn. Holder for transparent pie covers. 1,902,206; Mar. 21.
Wrigley, Wm., Jr. Company. (See Johnson, Arthur E., assignor.)
Wubco Battery Corporation. (See Rupp, John L., assignor.)
Wulf, Louis P., Lost Nation, Iowa. Air-mail pick-up and deposit mechanism. 1,902,391; Mar. 21.
York, Carl R., North Tonawanda, N. Y. Necktie display holder. 1,901,941; Mar. 21.
York Water Corporation, Ltd. (See Alex, Max, assignor.)
Young, Archer E., Pittsburgh, Pa. Measuring apparatus. 1,902,112; Mar. 21.
Young, Charles J. (See Butler, H. R., and Young, assignors.)
Young Motor Trunk Company. (See Duffy, Tom I., assignor.)
Youngstown Steel Door Company, The. (See Ditchfield, Frank, assignor.)
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Production of hydrogen-nitrogen gas mixtures. 1,901,884; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Manufacture of industrial hydrogen. 1,901,885; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Production of carbon black. 1,902,746; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Reforming natural gas. 1,902,747; Mar. 21.
Zaboransky, Anton, Todtnau, Germany. Brush making machine. 1,902,113; Mar. 21.
Zaidan Hojin Rikagaku Kenkyujo. (See Tanaka, H., and Imatomi, assignors.)
Zansig, Frank C. (See Buettner, R. J., Found, Muntner, Neits, and Zansig.)
Zehner, James L. (See Acheson, M. A., and Zehner.)
Zellstoffabrik Waldhof. (See Müller-Clemm, Hellmuth, assignor.)
Zide, Samuel, New York, N. Y. Shoe. 1,902,503; Mar. 21.
Ziehl, Gustav H., Rodenkirchen, Germany. Drawer guide. 1,902,748; Mar. 21.
Zoeller, Walter E. (See Vogt, C. W., and Zoeller.)
Zullig, Emil G., Bergenfield, N. J., assignor to Samuel Ellen, New York, N. Y. Embroidered textile fabric trimming. Des. 89,523; Mar. 21.
Zullig, Emil G., Bergenfield, N. J., assignor to S. Ellen, New York, N. Y. Embroidered textile fabric. Des. 89,524; Mar. 21.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21ST DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acetylene generator. R. A. Boley. 1,902,757; Mar. 21.
Acid esters of borneol and isoborneol, Preparing fatty. V. Hilcken. 1,902,364; Mar. 21.
Acid, Evaporation of nitric. W. E. Kirst. 1,901,875; Mar. 21.
Acid, Manufacture of maleic. J. W. Livingston. 1,901,914; Mar. 21.
Adjustably supported seat. G. Flintermann. 1,902,682; Mar. 21.
Advertising frame. W. J. Simanek. 1,901,990; Mar. 21.
Aeroplane wing construction. G. M. Bellanca. 1,901,864; Mar. 21.
Agitator. B. E. Thoen. 1,901,998; Mar. 21.
Agricultural implement. C. E. Johnson. 1,901,909; Mar. 21.
Air cooling. F. A. Kitchen. 1,902,246; Mar. 21.
Aircraft control means. T. B. Lavelle. 1,902,133; Mar. 21.
Aircraft not visible to the naked eye, Apparatus for determining the position of. J. Schier, K. Petschenig, and A. Peinl. 1,902,727; Mar. 21.
Air-mail pick-up and deposit mechanism. L. P. Wulf. 1,902,391; Mar. 21.
Airship. W. V. N. Powelson and W. Travell. 1,902,519; Mar. 21.
Air treatment, Pneumatic cleaning. M. I. Dorfan. 1,902,061; Mar. 21.
Air venting device. J. N. La Branch. 1,902,409; Mar. 21.
Alkoxyaldehyde and production of same. P. Halbig and F. Kaufler. 1,902,070; Mar. 21.
Altitudes and trigonometric functions thereof, Device for determining. C. N. Shuster. 1,901,880; Mar. 21.
Ammonium sulphate, Producing. M. Larsson. 1,902,649; Mar. 21.
Amusement device. S. W. Shepherd. 1,902,881; Mar. 21.
Amusement device, Rotary. S. J. Swanson. 1,901,935; Mar. 21.
Amusement machine. J. F. Meyer. 1,902,040; Mar. 21.
Anchor for boats. A. Bosch. 1,902,393; Mar. 21.
Animal fibers, Reserving of. J. Hulsmann and H. Schweitzer. 1,902,450; Mar. 21.
Annealing process for producing malleable iron, Short cycle. I. R. Valentine. 1,902,475; Mar. 21.
Antenna, Energizing. N. E. Lindenblad. 1,902,086; Mar. 21.
Antifreeze composition for radiators and the like. J. B. McCauley. 1,902,287; Mar. 21.
Antifriction bearing. R. B. Hoover. 1,901,967; Mar. 21.
Antirachitically active product. A. Windaus. 1,902,745; Mar. 21.
Apparel, Wearing. A. Scherer. 1,902,268; Mar. 21.
Arseno-compounds and purifying same, Heterocyclic. A. Binz and C. Räth. 1,902,756; Mar. 21.
Article delivery device. C. G. Shepher. 1,902,669; Mar. 21.
Article of manufacture. A. N. Lurie. 1,902,175; Mar. 21.
Ash tray. G. O. Campbell. 1,902,014; Mar. 21.
Asphalt, Producing. L. Kirschbraun. 1,902,305; Mar. 21.
Autographic register. L. Jensen. 1,902,284; Mar. 21.
Automatic lubricator. J. R. Warner. 1,902,601; Mar. 21.
Automobile, Air driven. J. P. Halloran. 1,902,124; Mar. 21.
Automobile stage body. D. E. Austin. 1,902,607; Mar. 21.
Awning of metal or like rigid material. J. A. Martin. 1,901,976; Mar. 21.
Bag: *See*—
Mail bag.
Bag. M. E. Johns. 1,902,368; Mar. 21.
Bag frame fastener. W. C. Hiering. 1,901,965; Mar. 21.
Bag frame structure and fastener therefor. W. J. Walker. 1,902,297; Mar. 21.
Balanced valve. R. L. Murray. 1,902,336; Mar. 21.
Banks, stores, and the like, against robbery, by gas and smoke, System for protecting. B. C. Goss. 1,901,959; Mar. 21.
Bar: *See*—
Grate bar.
Barge, Log carrying. W. J. Moloney. 1,901,877; Mar. 21.
Base for golf bags, Bowl shaped. J. K. Hotse. 1,902,644; Mar. 21.
Basket, Vegetable and fruit shipping. G. W. Talbot. 1,902,196; Mar. 21.
Bearing: *See*—
Antifriction bearing. Upper main bearing.
Bearing and seal therefor. L. D. Cobb. 1,902,620; Mar. 21.
Bearing construction for turbine pumps, Main. A. R. Weis. 1,902,150; Mar. 21.
Bearings, Method and apparatus for tinning connecting rod. W. J. Fiegel. 1,902,770; Mar. 21.
Beds, Adjustable back rest for. F. L. Lansy. 1,902,249; Mar. 21.
Beds, Counterbalancing means for foldable. G. F. Cane. 1,902,619; Mar. 21.
Binder, Loose-leaf. L. T. Lloyd. 1,902,786; Mar. 21.
Binder over fibrous materials, Distributing. E. J. Pieper, D. F. Smith, and C. C. Vogt. 1,901,930; Mar. 21.
Binding, Metal. E. E. Draper. 1,901,902; Mar. 21.
Block: *See*—
Insulating block. Toy building block.
Blowing device for pneumatic tools. E. B. Lear. 1,902,562; Mar. 21.
Blowing device for rock drills. L. C. Bayles. 1,902,536; Mar. 21.
Blow-out preventer. A. J. and K. T. Penick. 1,902,097; Mar. 21.
Board trim and securing means, Running. T. I. Duffy. 1,901,869; Mar. 21.
Boat. C. L. Woods. 1,902,006; Mar. 21.
Body striping. E. J. Hoyos. 1,901,908; Mar. 21.
Boiler: *See*—
Water tube boiler.
Boiler. J. H. Fox. 1,902,159; Mar. 21.
Boiler cleaner. W. P. Thomas. 1,902,736; Mar. 21.
Bolt, Self-locking. T. A. Kirton. 1,902,454; Mar. 21.
Bookholder. G. J. Flanagan. 1,902,549; Mar. 21.
Boot tree. F. R. Maier. 1,902,251; Mar. 21.
Bore straightening tool, Well. M. J. Lewis. 1,902,174; Mar. 21.
Bowl or article of analogous nature, Sugar. H. Negbaur. Des. 89,531; Mar. 21.
Box: *See*—
Hat box. Match box.
Journal box. Outlet box.
Junction box.
Box wrapping machine. A. E. Johnson. 1,902,079; Mar. 21.
Brace: *See*—
Table leg brace.
Bracket: *See*—
Brake beam support bracket.
Bracket for connecter heads. E. A. Robinson. 1,902,101; Mar. 21.
Brake: *See*—
Fluid pressure brake.
Brake. G. A. Halfvarson. 1,902,640; Mar. 21.
Brake. L. E. La Brie. 1,902,455; Mar. 21.
Brake. L. E. La Brie. 1,902,647; Mar. 21.
Brake band signaling device. A. S. Cataudella. 1,902,750; Mar. 21.
Brake beam support bracket. E. G. Busse. 1,902,315; Mar. 21.
Brake-lining testing. G. J. Thomas. 1,902,594; Mar. 21.
Brake mechanism, Self-adjusting. E. J. W. Ragsdale. 1,902,181; Mar. 21.
Brake testing device for vehicle wheels. T. A. Patterson. 1,902,718; Mar. 21.
Bread serving appliance. C. Holdgrafer. 1,902,239; Mar. 21.
Bread wrapping machine. L. F. Streng. 1,902,734; Mar. 21.
Brick and checker work formed therefrom, Checker. J. W. Wagstaff. 1,902,346; Mar. 21.
Bridge bid indicator and container, Combined. E. Jacobs. Des. 89,529; Mar. 21.
Bromine, Continuous process of preparing liquid. I. F. Harlow, I. A. Kenaga, and G. F. Dressel. 1,902,301; Mar. 21.
Brush making machine. A. Zaboransky. 1,902,113; Mar. 21.
Bucket, Conveyer. E. N. Riblet. 1,902,582; Mar. 21.
Buckle, Foldable. M. Anderson. 1,902,535; Mar. 21.
Building insulation and applying same. E. G. Halliwell. 1,902,699; Mar. 21.
Bumper. G. Q. Lewis. 1,902,651; Mar. 21.
Bun puncher and toaster. C. W. Mabey. 1,902,564; Mar. 21.
Burner: *See*—
Fuel burner. Oil burner.
Bus bar structure. C. H. Hill and N. Swerdlow. 1,902,501; Mar. 21.
Bushing. W. A. Vock. 1,902,600; Mar. 21.
Bushing device, High-voltage. G. A. Burr. 1,902,617; Mar. 21.
Bushing remover. H. W. Kulp and M. C. Dellinger. 1,902,711; Mar. 21.
Cabin for aircraft and the like. T. A. Verstegen. 1,902,428; Mar. 21.
Cabinet and seat construction, Combination. E. A. Bloedel. 1,902,319; Mar. 21.

Wright, Esmond P. G., Croydon, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone exchange system. 1,901,940; Mar. 21.
Wright, Percy C., Pittsburg, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y. Froth-flotation concentration of ores. 1,902,317; Mar. 21.
Wrigley, John R., Norwalk, assignor to White and Wells Company, Waterbury, Conn. Holder for transparent pie covers. 1,902,206; Mar. 21.
Wrigley, Wm., Jr. Company. (See Johnson, Arthur E., assignor.)
Wubco Battery Corporation. (See Rupp, John L., assignor.)
Wulf, Louis P., Lost Nation, Iowa. Air-mail pick-up and deposit mechanism. 1,902,391; Mar. 21.
York, Carl R., North Tonawanda, N. Y. Necktie display holder. 1,901,941; Mar. 21.
York Water Corporation, Ltd. (See Alex, Max, assignor.)
Young, Archer E., Pittsburgh, Pa. Measuring apparatus. 1,902,112; Mar. 21.
Young, Charles J. (See Butler, H. R., and Young, assignors.)
Young Motor Trunk Company. (See Duffy, Tom I., assignor.)
Youngstown Steel Door Company, The. (See Ditchfield, Frank, assignor.)
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Production of hydrogen-nitrogen gas mixtures. 1,901,884; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Manufacture of industrial hydrogen. 1,901,885; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Production of carbon black. 1,902,746; Mar. 21.
Yunker, James A., Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y. Reforming natural gas. 1,902,747; Mar. 21.
Zahoransky, Anton, Todtnau, Germany. Brush making machine. 1,902,113; Mar. 21.
Zaidan Hojin Rikagaku Kenkyujo. (See Tanaka, H., and Imatomi, assignors.)
Zanzig, Frank C. (See Buettner, R. J., Found, Muntner, Neitz, and Zanzig.)
Zehner, James L. (See Acheson, M. A., and Zehner.)
Zellstofffabrik Waldhof. (See Müller-Clemm, Hellmuth, assignor.)
Zide, Samuel, New York, N. Y. Shoe. 1,902,503; Mar. 21.
Ziehl, Gustav H., Rodenkirchen, Germany. Drawer guide. 1,902,748; Mar. 21.
Zoeller, Walter E. (See Vogt, C. W., and Zoeller.)
Zullig, Emil G., Bergenfield, N. J., assignor to Samuel Ellen, New York, N. Y. Embroidered textile fabric trimming. Des. 89,523; Mar. 21.
Zullig, Emil G., Bergenfield, N. J., assignor to S. Ellen, New York, N. Y. Embroidered textile fabric. Des. 89,524; Mar. 21.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21ST DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acetylene generator. R. A. Boley. 1,902,757; Mar. 21.
Acid esters of borneol and isoborneol, Preparing fatty. V. Hilcken. 1,902,364; Mar. 21.
Acid, Evaporation of nitric. W. E. Kirst. 1,901,875; Mar. 21.
Acid, Manufacture of maleic. J. W. Livingston. 1,901,914; Mar. 21.
Adjustably supported seat. G. Flintermann. 1,902,632; Mar. 21.
Advertising frame. W. J. Simanek. 1,901,990; Mar. 21.
Aeroplane wing construction. G. M. Bellanca. 1,901,864; Mar. 21.
Agitator. B. E. Thoen. 1,901,998; Mar. 21.
Agricultural implement. C. E. Johnson. 1,901,909; Mar. 21.
Air cooling. F. A. Kitchen. 1,902,246; Mar. 21.
Aircraft control means. T. B. Lavelle. 1,902,133; Mar. 21.
Aircraft not visible to the naked eye, Apparatus for determining the position of. J. Schler, K. Petschenig, and A. Peinl. 1,902,727; Mar. 21.
Air-mail pick-up and deposit mechanism. L. P. Wulf. 1,902,391; Mar. 21.
Airship. W. V. N. Powelson and W. Travell. 1,902,519; Mar. 21.
Air treatment, Pneumatic cleaning. M. I. Dorfan. 1,902,061; Mar. 21.
Air venting device. J. N. La Branch. 1,902,409; Mar. 21.
Alkoxyaldehyde and production of same. P. Halbig and F. Kaufler. 1,902,070; Mar. 21.
Altitudes and trigonometric functions thereof, Device for determining. C. N. Shuster. 1,901,880; Mar. 21.
Ammonium sulphate, Producing. M. Larsson. 1,902,649; Mar. 21.
Amusement device. S. W. Shepherd. 1,902,381; Mar. 21.
Amusement device, Rotary. S. J. Swanson. 1,901,935; Mar. 21.
Amusement machine. J. F. Meyer. 1,902,040; Mar. 21.
Anchor for boats. A. Bosch. 1,902,393; Mar. 21.
Animal fibers, Reserving of. J. Huismann and H. Schweitzer. 1,902,450; Mar. 21.
Annealing process for producing malleable iron, Short cycle. I. R. Valentine. 1,902,475; Mar. 21.
Antennæ, Energizing. N. E. Lindenblad. 1,902,086; Mar. 21.
Antifreeze composition for radiators and the like. J. B. McCauley. 1,902,287; Mar. 21.
Antifriction bearing. R. B. Hoover. 1,901,967; Mar. 21.
Antirachitically active product. A. Windaus. 1,902,745; Mar. 21.
Apparel, Wearing. A. Scherer. 1,902,268; Mar. 21.
Arseno-compounds and purifying same, Heterocyclic. A. Binz and C. Räth. 1,902,756; Mar. 21.
Article delivery device. C. G. Shepher. 1,902,669; Mar. 21.
Article of manufacture. A. N. Lurie. 1,902,175; Mar. 21.
Ash tray. G. O. Campbell. 1,902,014; Mar. 21.
Asphalt, Producing. L. Kirschbraun. 1,902,305; Mar. 21.
Autographic register. L. Jensen. 1,902,284; Mar. 21.
Automatic lubricator. J. R. Warner. 1,902,601; Mar. 21.
Automobile, Air driven. J. P. Halloran. 1,902,124; Mar. 21.
Automobile stage body. D. E. Austin. 1,902,607; Mar. 21.
Awning of metal or like rigid material. J. A. Martin. 1,901,976; Mar. 21.
Bag: *See*—
Mail bag.
Bag. M. E. Johns. 1,902,368; Mar. 21.
Bag frame fastener. W. C. Hiering. 1,901,965; Mar. 21.
Bag frame structure and fastener therefor. W. J. Walker. 1,902,297; Mar. 21.
Balanced valve. R. L. Murray. 1,902,336; Mar. 21.
Banks, stores, and the like, against robbery, by gas and smoke, System for protecting. B. C. Goss. 1,901,959; Mar. 21.
Bar: *See*—
Grate bar.
Barge, Log carrying. W. J. Moloney. 1,901,877; Mar. 21.
Base for golf bags, Bowl shaped. J. K. Hotze. 1,902,644; Mar. 21.
Basket, Vegetable and fruit shipping. G. W. Talbot. 1,902,196; Mar. 21.
Bearing: *See*—
Antifriction bearing. Upper main bearing.
Bearing and seal therefor. L. D. Cobb. 1,902,620; Mar. 21.
Bearing construction for turbine pumps, Main. A. R. Weis. 1,902,150; Mar. 21.
Bearings, Method and apparatus for tinning connecting rod. W. J. Fiegel. 1,902,770; Mar. 21.
Beds, Adjustable back rest for. F. L. Lansy. 1,902,249; Mar. 21.
Beds, Counterbalancing means for foldable. G. F. Cane. 1,902,619; Mar. 21.
Binder, Loose-leaf. L. T. Lloyd. 1,902,786; Mar. 21.
Binder over fibrous materials, Distributing. E. J. Pieper, D. F. Smith, and C. C. Vogt. 1,901,930; Mar. 21.
Binding, Metal. E. E. Draper. 1,901,902; Mar. 21.
Block: *See*—
Insulating block. Toy building block.
Blowing device for pneumatic tools. E. B. Lear. 1,902,562; Mar. 21.
Blowing device for rock drills. L. C. Bayles. 1,902,586; Mar. 21.
Blow-out preventer. A. J. and K. T. Penick. 1,902,097; Mar. 21.
Board trim and securing means, Running. T. I. Duffy. 1,901,869; Mar. 21.
Boat. C. L. Woods. 1,902,006; Mar. 21.
Body striping. E. J. Hoyos. 1,901,908; Mar. 21.
Boiler: *See*—
Water tube boiler.
Boiler. J. H. Fox. 1,902,159; Mar. 21.
Boiler cleaner. W. P. Thomas. 1,902,736; Mar. 21.
Bolt, Self-locking. T. A. Kirton. 1,902,454; Mar. 21.
Bookholder. G. J. Flanagan. 1,902,549; Mar. 21.
Boot tree. F. R. Maier. 1,902,251; Mar. 21.
Bore straightening tool, Well. M. J. Lewis. 1,902,174; Mar. 21.
Bowl or article of analogous nature, Sugar. H. Negbaur. Des. 89,531; Mar. 21.
Box: *See*—
Hat box. Match box.
Journal box. Outlet box.
Junction box.
Box wrapping machine. A. E. Johnson. 1,902,079; Mar. 21.
Brace: *See*—
Table leg brace.
Bracket: *See*—
Brake beam support bracket.
Bracket for connecter heads. E. A. Robinson. 1,902,101; Mar. 21.
Brake: *See*—
Fluid pressure brake.
Brake. G. A. Halfvarson. 1,902,640; Mar. 21.
Brake. L. E. La Brie. 1,902,455; Mar. 21.
Brake. L. E. La Brie. 1,902,847; Mar. 21.
Brake band signaling device. A. S. Cataudella. 1,902,759; Mar. 21.
Brake beam support bracket. E. G. Busse. 1,902,215; Mar. 21.
Brake-lining testing. G. J. Thomas. 1,902,594; Mar. 21.
Brake mechanism, Self-adjusting. E. J. W. Ragsdale. 1,902,181; Mar. 21.
Brake testing device for vehicle wheels. T. A. Patterson. 1,902,718; Mar. 21.
Bread serving appliance. C. Holdgrafer. 1,902,239; Mar. 21.
Bread wrapping machine. L. F. Streng. 1,902,734; Mar. 21.
Brick and checker work formed therefrom, Checker. J. W. Wagstaff. 1,902,348; Mar. 21.
Bridge bid indicator and container, Combined. E. Jacobs. Des. 89,509; Mar. 21.
Bromine, Continuous process of preparing liquid. I. F. Harlow, I. A. Kenaga, and G. F. Dressel. 1,902,801; Mar. 21.
Brush making machine. A. Zaboransky. 1,902,113; Mar. 21.
Bucket, Conveyer. R. N. Riblet. 1,902,582; Mar. 21.
Buckle, Foldable. M. Anderson. 1,902,535; Mar. 21.
Building insulation and applying same. R. G. Halliwell. 1,902,689; Mar. 21.
Bumper. G. Q. Lewis. 1,902,651; Mar. 21.
Bun puncher and toaster. C. W. Mabey. 1,902,564; Mar. 21.
Burner: *See*—
Fuel burner. Oil burner.
Bus bar structure. C. H. Hill and N. Swerdlow. 1,902,501; Mar. 21.
Bushing. W. A. Vock. 1,902,600; Mar. 21.
Bushing device, High-voltage. G. A. Burr. 1,902,617; Mar. 21.
Bushing remover. H. W. Kulp and M. C. Dellinger. 1,902,711; Mar. 21.
Cabin for aircraft and the like. T. A. Verstegen. 1,902,428; Mar. 21.
Cabinet and seat construction, Combination. H. A. Bloedel. 1,902,819; Mar. 21.

Cabinet, Dictating machine. B. M. Smith, S. G. Langley, and G. F. Braun. Des. 89,521; Mar. 21.
Cabinet, Matrix. F. C. Grumman. 1,902,443; Mar. 21.
Cabinet, Matrix. A. J. Stouges. 1,902,425; Mar. 21.
Cabinet, Refrigerator. J. R. Replogle. Des. 89,534; Mar. 21.
Cabinet, Refrigerator. H. S. Woodruff. 1,902,479; Mar. 21.
Cabinet, Roll towel. C. W. Thompson. 1,902,198; Mar. 21.
Cabinet, Stencil. M. D'Andrea. 1,902,220; Mar. 21.
Cable connecter. G. C. Thomas, jr. Re18,773; Mar. 21.
Cable control. R. S. Sanford. 1,902,585; Mar. 21.
Cable, Oil-filled high tension. F. V. Calvert. 1,902,487; Mar. 21.
Cable securing device, Street lamp. O. Anklam. Re18,769; Mar. 21.
Cage and utility hanger, Bird. C. A. Jones. 1,902,241; Mar. 21.
Calculating machine. J. A. V. Turck. 1,902,597–8; Mar. 21.
Calendar and record. L. B. Martin. 1,902,567; Mar. 21.
Can washing machine. I. R. Hippenmeyer. 1,902,238; Mar. 21.
Car construction. O. C. Duryea. 1,902,019; Mar. 21.
Car coupling. G. M. Murphy. 1,902,043; Mar. 21.
Car equipment, Safety. J. C. McCune. 1,901,918; Mar. 21.
Car mover device. O. W. Miller. 1,902,658; Mar. 21.
Carbon and preparing it, Highly active. W. T. Geis. 1,902,068; Mar. 21.
Carbon black, Method of and apparatus for producing. D. J. Beaver. 1,902,753; Mar. 21.
Carbon black process and apparatus. S. P. Burke. 1,902,797; Mar. 21.
Carbon black, Production of. J. A. Yunker. 1,902,746; Mar. 21.
Carbonaceous materials with electric arcs, Treating. P. Baumann, H. Schilling, and A. Fischer. 1,902,351; Mar. 21.
Carburetor. H. Schneebeli. 1,902,378; Mar. 21.
Card rack. L. C. Bishop and S. E. Swick. 1,902,156; Mar. 21.
Carrier and the like, Water. F. F. Fenwick, jr. 1,902,548; Mar. 21.
Carrier for cable and wire reels. E. P. and L. D. Blackman. 1,902,611; Mar. 21.
Carton. E. B. Whitehead. 1,901,883; Mar. 21.
Carton, Egg. M. E. Hassell and M. A. Todd. 1,902,167; Mar. 21.
Carton, Foldable display. H. K. Powell. 1,902,262; Mar. 21.
Cartridge. W. Edwards. 1,902,695; Mar. 21.
Cartridge belts to a feed mechanism, Supplying. A. Dabrasky. 1,901,868; Mar. 21.
Cartridge, Practice. A. F. Galdos. 1,902,771; Mar. 21.
Case: *See*—
Display case.
Case and ash tray, Combined cigarette. C. Welch. 1,902,388; Mar. 21.
Case for lipsticks. F. E. A. W. Bergaud. 1,902,537; Mar. 21.
Casserole or similar article. C. Kaiser. Des. 89,527; Mar. 21.
Caster mechanism for stands and the like. E. C. Harter. 1,902,166; Mar. 21.
Caster roller. W. F. Schacht. 1,902,726; Mar. 21.
Castings, Production of alloy surface. J. H. Critchett. 1,902,059; Mar. 21.
Castings with coatings composed of high-chromium alloys, Production of. S. M. Norwood. 1,902,092; Mar. 21.
Catalysts, Using oxidation. J. C. W. Frazer and L. S. Kassel. 1,902,160; Mar. 21.
Catalyzer, Ceramic. A. M. Fairchild. 1,902,630; Mar. 21.
Cathodes for electric discharge devices, Manufacture of hot. E. Wiegand. 1,902,478; Mar. 21.
Ceiling construction. C. R. Birdsey and H. W. Reel. 1,902,796; Mar. 21.
Ceiling construction, Precast. H. W. Reel. 1,902,789; Mar. 21.
Cellulose composition, Derivative of. W. H. Moss. 1,902,257; Mar. 21.
Cellulose esters and cellulose ether esters, Making mixed. M. Hagedorn, O. Reichert, and E. Güring. 1,902,280; Mar. 21.
Cement and like material, Apparatus designed for handling. W. B. Siemmer. 1,902,145; Mar. 21.
Cementitious composition. G. E. Barnhart and H. E. Pfaff. 1,901,890; Mar. 21.
Ceramic articles, Apparatus for manufacturing of. H. Mueller. 1,901,923; Mar. 21.
Chain drive. A. H. Leipert. 1,902,712; Mar. 21.
Chain for mining machines, Cutter. E. W. Radius. 1,902,420; Mar. 21.
Chair: *See*—
Invalid's chair.
Chair. J. A. Santos. 1,902,586; Mar. 21.
Chamber of variable volume. G. de Monge. 1,902,323; Mar. 21.
Check protector. W. C. Hiering. 1,901,907; Mar. 21.
Check valve, Automatic unloading. J. W. Gurley. 1,902,231; Mar. 21.
Chemical reactions in gases and vapors with aid of a high tension electric arc, Producing. E. Steinbuch, M. Eschmann, and H. Schwammberger. 1,902,384; Mar. 21.
Chlorine from zinc sulphate solutions, Removing. W. J. O'Brien and J. E. Drapeau, jr. 1,901,925; Mar. 21.
Chopper, Meat. C. F. Lindgren. 1,902,653; Mar. 21.
Chromates, Producing. J. J. Vetter. 1,901,939; Mar. 21.
Chrysanthemum. A. Cumming, jr. Pl. Pt. 58; Mar 21.
Chuck for centrifugal casting machines. L. A. Camerota. 1,902,301; Mar. 21.
Cigarette dispensing and lighting machine. S. Vernet. 1,902,599; Mar. 21.
Cigarettes and cigars, Apparatus for delivering lighted. C. W. Parker. 1,902,291; Mar. 21.
Circuit breaker. R. C. Van Sickle. 1,902,314; Mar. 21.
Circuit breaker, Electric. W. E. Paul. 1,902,463–4; Mar. 21.
Circuit breaker system, Automatic reclosing. A. E. Anderson. 1,902,483; Mar. 21.
Circuit closer for automatic signaling device. W. M. Parsons. 1,902,578; Mar. 21.
Circuit closing device. F. L. Lee and B. H. Phillips. 1,902,085; Mar. 21.
Circuit controlling apparatus. L. S. Walle. 1,902,476; Mar. 21.
Circuit controlling device. C. B. Willi. 1,902,744; Mar. 21.
Circuit for switches for automatic telephone systems, Control. C. L. Goodrum. 1,902,123; Mar. 21.
Circuit interrupter, Electric. G. A. Juhlin. 1,902,507; Mar. 21.
Circuit interruption. W. S. Edsall. 1,902,357; Mar. 21.
Circuit, Substation. J. W. Gooderham. 1,901,958; Mar. 21.
Circuits, Apparatus for regulating alternating current. F. Rathovszky. 1,902,466; Mar. 21.
Circuits, Electric translating. A. H. Mittag. 1,902,460; Mar. 21.
Circulating system. J. A. Georgoff. 1,901,871; Mar. 21.
Clamp: *See*—
Conductor clamp.
Cleaner: *See*—
Boiler cleaner. Vacuum cleaner.
Cleaner for furs and the like and cleaning. W. G. Haertel. 1,902,232; Mar. 21.
Cleansing metering drums. T. Payton. 1,902,719; Mar. 21.
Closer for windows and the like, Automatic. L. V. Blue. 1,902,392; Mar. 21.
Closure for receptacles. J. L. Pardue. 1,901,982; Mar. 21.
Cloth, Moistening. E. Wenzel. 1,902,429; Mar. 21.
Clutch: *See*—
Electromagnetic clutch.
Clutch. W. C. Pitter. 1,902,375; Mar. 21.
Coating and coating composition. C. G. Harford. 1,902,642; Mar. 21.
Coating composition and film produced thereby. W. H. Moss and B. B. White. 1,902,255–6; Mar. 21.
Coating process and apparatus. C. A. Mann. 1,902,654; Mar. 21.
Cock, Gas. E. E. Meusy. 1,901,979; Mar. 21.
Coffee dispenser. J. W. Bell. Des. 89,479; Mar. 21.
Coffee pot or similar article. Y. Buma. Des. 89,489; Mar. 21.
Collapsible holder. K. E. Brewer. 1,902,011; Mar. 21.
Collar-stretching machine. M. L. Kaplan. 1,902,330; Mar. 21.
Color meter. R. L. Sperber. 1,902,672; Mar. 21.
Combination lock, Self-closing. R. J. Buettner, R. A. Found, J. M. Munter, J. J. Neitz, and F. C. Zinzig. 1,902,214; Mar. 21.
Combination table. C. A. Magnuson and C. H. Uggla. 1,901,975; Mar. 21.
Combustible mixtures, Method and apparatus for igniting. G. G. Brown and M. Sounders, jr. 1,902,541; Mar. 21.
Combustion apparatus. D. J. Mossbart. 1,902,372; Mar. 21.
Commutators, Making. C. V. Gianmo. 1,901,955; Mar. 21.
Compact, Cosmetic. W. R. Tuttle and C. W. Stickel. 1,902,681; Mar. 21.
Composition for treating strings. F., J., and S. Saladino. 1,902,143; Mar. 21.
Compounds of the xanthene series. W. Schulemann, F. Mietzsch, and A. Wingler. 1,902,104; Mar. 21.
Condensation products and the products produced. Producing water-soluble. R. Muller. 1,902,515; Mar. 21.
Condensation products of the anthraquinone series. G. Kraeuzlein and E. Diefenbach. 1,902,083; Mar. 21.
Condenser: *See*—
Electrostatic condenser.
Conductor attachment. A. O. Austin. 1,902,009; Mar. 21.
Conductor clamp. A. O. Austin. 1,902,008; Mar. 21.
Conductor, Tapping a. W. C. Tinus. 1,901,938; Mar. 21.
Confection machine. J. L. Biggs. 1,902,755; Mar. 21.
Connecter: *See*—
Cable connecter. Pipe connecter.
Connecter. R. C. McAllister. 1,902,038; Mar. 21.
Connection, Electric circuit. M. W. McArdle. 1,901,977; Mar. 21.
Connection, Guy wire anchor. H. E. Miller. 1,902,459; Mar. 21.

Container: *See*—
Cosmetic container. Metal container.
Ice cream container. Sifter container.
Container. E. W. Roberts. 1,902,723; Mar. 21.
Container. W. I. Rubovits. 1,902,294; Mar. 21.
Container. A. W. Wilkinson. 1,902,316; Mar. 21.
Container sealing device. I. T. Kahn. 1,901,911; Mar. 21.
Containers for ice cream and the like, Marking. G. F. Dickson. 1,902,543; Mar. 21.
Control device. C. I. Hall. 1,902,498; Mar. 21.
Control for heating systems. D. J. Stewart. 1,901,995; Mar. 21.
Control for pump actuating mechanisms and the like. L. M. Miller, L. M. Greene, J. G. Miller and E. E. Calkins. 1,902,371; Mar. 21.
Control of the properties of solid bodies dispersed in a liquid, Apparatus for the continuous. H. Müller-Clemm. 1,902,659; Mar. 21.
Controlling device for record-controlled machines. J. W. Bryce. 1,902,013; Mar. 21.
Conveyer, Air current. J. B. Schaub. 1,901,932; Mar. 21.
Conveyer and scale, Combination. A. J. Mehl. 1,902,512; Mar. 21.
Conveyer for cotton. J. A. Streun. 1,902,675; Mar. 21.
Cooler: *See*—
Rotary cooler.
Core, Magnetic. O. Dahl and J. Pfaffenberger. 1,902,491; Mar. 21.
Cosmetic container. F. Tourtois. 1,902,199; Mar. 21.
Counter-electro-motive-force-cell. W. E. Kershaw and J. L. Woodbridge. 1,902,081; Mar. 21.
Coupling: *See*—
Car coupling. Pipe coupling.
Coupling. F. Ellingsen. 1,902,697; Mar. 21.
Cover: *See*—
Locking cover. Tank cover.
Cover for oil storage tanks. R. S. Twogood. 1,902,108; Mar. 21.
Cover for X-ray tubes, Protective. A. Ungelenk and W. Hofmann. 1,902,474; Mar. 21.
Cover, Making a spring. F. W. Andrew. 1,902,606; Mar. 21.
Covered joint hinge. J. Soss. 1,901,994; Mar. 21.
Covering, Heat insulating. G. V. Wilson. 1,902,794; Mar. 21.
Covering, Protective head. R. Giuliano. 1,902,441; Mar. 21.
Crystalline antirachitically active product and preparing the same. O. Linsert. 1,902,785; Mar. 21.
Cultivator, Hand. G. Wolf. 1,902,869; Mar. 21.
Cultivator tractor. N. S. Smith. 1,901,993; Mar. 21.
Cup: *See*—
Drinking cup.
Current unidirectional system and method, High potential. H. D. Garretson. 1,902,227; Mar. 21.
Curtain display hanger. H. C. Hering. 1,902,402; Mar. 21.
Cushion, Side arm. A. W. Shaw. 1,902,730; Mar. 21.
Cushioning device. E. S. Avery. 1,901,945; Mar. 21.
Cushioning pad. C. S. Hamersley. 1,902,361; Mar. 21.
Cutter: *See*—
Pipe cutter. Tubing cutter.
Cylinder head fastening means. W. L. R. Emmet. 1,902,494; Mar. 21.
Cylinder, Water cooled internal combustion engine. O. Simmen. 1,902,528; Mar. 21.
Dam. E. H. Burroughs. 1,902,353; Mar. 21.
Dam, Concrete. D. C. Henny. 1,902,168; Mar. 21.
Dam, Diversion. C. Weber. 1,902,741; Mar. 21.
Damping device for crank-shafts. F. S. Duesenberg. 1,902,787; Mar. 21.
Deflector for gas stoves, Forced draft. J. A. McCarthy. 1,902,411; Mar. 21.
Desk pen holder. R. Back and G. A. Cooper. 1,902,208; Mar. 21.
Dessert made with rennin, Sweetened and flavored. K. J. Monrad. 1,902,415; Mar. 21.
Dishwashing machine. W. S. Hilpert and E. S. Stoddard. 1,902,237; Mar. 21.
Dishwashing machine. E. S. Stoddard. 1,902,192; Mar. 21.
Disk edging machine, Rotary. H. L. Myers. Des. 89,511; Mar. 21.
Dispenser. H. A. Wolf. 1,902,052; Mar. 21.
Dispensing apparatus. F. S. Barks. 1,902,750; Mar. 21.
Dispensing apparatus. E. A. Raines. 1,902,016; Mar. 21.
Display case. B. A. Klapper. 1,902,132; Mar. 21.
Display device. L. P. Kongsted. 1,902,331; Mar. 21.
Display holder, Necktie. C. R. York. 1,901,941; Mar. 21.
Display rack. H. V. Marsh. 1,902,566; Mar. 21.
Display rack, Upright. W. M. Sample. Des. 89,512; Mar. 21.
Display table. E. S. Taylor. 1,902,677; Mar. 21.
Distilling apparatus. W. F. Brace and F. E. Beluche. 1,902,538; Mar. 21.
Door construction, Metal. F. Ditchfield. 1,902,546; Mar. 21.
Door fixture, Railway car. G. G. Gilpin. 1,902,772; Mar. 21.
Door for cars, Grain. F. Ditchfield. 1,902,545; Mar. 21.
Door lock. W. A. Endter. 1,902,628; Mar. 21.
Doorlock, Rotary bolt. W. A. Endter. 1,902,547; Mar. 21.
Door, Refrigerator. J. R. Replogle. Des. 89,536; Mar. 21.
Doors for cars, Grain. F. Ditchfield. 1,902,544; Mar. 21.
Doors, Mechanism for operating elevator. C. Norton. 1,902,138; Mar. 21.
Doughnut machine and the like. C. E. Carpenter. 1,902,058; Mar. 21.
Dowel for timber bonds, Annular. J. Seger. 1,902,880; Mar. 21.
Draft rigging. D. S. Barrows. 1,902,299; Mar. 21.
Draft rigging backstop. D. S. Barrows. 1,902,300; Mar. 21.
Draft rigging, Railway. W. A. Geiger. 1,902,636; Mar. 21.
Drafting table. D. W. Sherman. 1,902,424; Mar. 21.
Drawer guide. G. H. Ziehl. 1,902,748; Mar. 21.
Drawer suspension. C. F. Wolters. 1,902,795; Mar. 21.
Dredges, Method of and apparatus for controlling. A. Neveling. 1,902,259; Mar. 21.
Drier: *See*—

Drive, Hydraulic. J. P. Ferris. 1,902,437; Mar. 21.
Drive with differential characteristics and free wheeling, Combined positive. H. V. Hughes. 1,902,449; Mar. 21.
Driving apparatus for self-propelled vehicles. M. D. Henshaw. 1,902,500; Mar. 21.
Drum baffle, Steam. H. J. Kerr. 1,901,912; Mar. 21.
Drum truing machine. W. F. Evans. 1,902,029; Mar. 21.
Dumping body. G. E. Ogilvie. 1,902,093; Mar. 21.
Duplicating apparatus. A. J. Bates. 1,902,273; Mar. 21.
Dyestuffs of the anthraquinone series, Acid. G. Kraenslein and E. Diefenbach. 1,902,084; Mar. 21.
Eel grip. H. N. Kaiser. 1,902,458; Mar. 21.
Egg candling machine. J. F. King. 1,902,244; Mar. 21.
Electric furnace. C. E. Schwegler. 1,902,668; Mar. 21.
Electric house heater. E. F. Holinger. 1,902,074; Mar. 21.
Electric imitation fire. H. H. Berry. 1,902,274; Mar. 21.
Electric power converting apparatus. A. S. Fitz Gerald. 1,902,495; Mar. 21.
Electric power converting apparatus. C. A. Sabbah. 1,902,468; Mar. 21.
Electric regulation, System and apparatus for. L. H. Von Ohlsen. 1,901,882; Mar. 21.
Electric switch, Time-controlled. J. Mettler. 1,902,570; Mar. 21.
Electrical contacts, Testing of. J. B. Dixon and E. M. Honan. 1,901,901; Mar. 21.
Electrical control system. W. H. Arkenburgh. 1,902,485; Mar. 21.
Electrical control system. H. L. Palmer. 1,902,462; Mar. 21.
Electrical controlling system for gas water heaters. R. J. Dougherty. 1,902,303; Mar. 21.
Electrical discharge device. K. B. McEachron and E. J. Wade. 1,902,510; Mar. 21.
Electrical meter. W. J. Means. 1,901,921; Mar. 21.
Electrical music system. R. H. Ranger. 1,901,985–6; Mar. 21.
Electrical prospecting system. F. Rieber. 1,902,265; Mar. 21.
Electrical protector device. G. H. Brodie. 1,901,898; Mar. 21.
Electrical translating device. J. S. High. 1,902,643; Mar. 21.
Electricity meter, Prepayment. S. Z. de Ferranti. 1,902,396; Mar. 21.
Electrodes of discharge tubes, Coating. H. Rothe. 1,902,185; Mar. 21.
Electromagnetic clutch. E. Thomson. 1,902,471; Mar. 21.
Electron discharge apparatus. M. A. Acheson and J. L. Zehner. 1,902,432; Mar. 21.
Electron discharge device. M. A. Acheson. 1,902,481; Mar. 21.
Electrostatic condenser. A. O. Austin. 1,902,152; Mar. 21.
Engine: *See*—
Internal combustion engine
Engine starting device. G. A. Taylor. 1,901,997; Mar. 21.
Escapement and pendulum mechanism. G. Jaisle. 1,902,366; Mar. 21.
Ethers, Producing unsaturated. W. O. Herrmann and H. Deutsch. 1,902,169; Mar. 21.
Evaporator. K. Vykoupil. 1,902,533; Mar. 21.
Excavating machine. R. R. Downie. 1,902,691–3; Mar. 21.
Expansion joint. A. C. Fischer. 1,901,870; Mar. 21.
Explosion process and apparatus, Multistage constant volume. H. Holzwarth. 1,901,873; Mar. 21.
Extruding machine. F. J. Shook. 1,902,295; Mar. 21.
Fastener: *See*—
Bag frame fastener. Separable fastener.
Pin fastener. Slide fastener.
Fastener. D. A. Brennan. Re18,770; Mar. 21.
Fastening means for securing the ends of a length of material to a reel. G. E. Clark. 1,901,949; Mar. 21.
Feeding mechanism for photographic strips. W. L. Helms. 1,902,281; Mar. 21.
Fertilizers, Producing mixed. F. G. Liljenroth. 1,902,652; Mar. 21.
Filament treatment. K. Schmidt. 1,902,526; Mar. 21.
Film holder. C. D. Chase. 1,902,278; Mar. 21.
Film printing. C. D. Chase. 1,902,277; Mar. 21.

Films, lacquers, and the like, Manufacture of. C. Neubauer. 1,902,337; Mar. 21.
Filter. W. G. Elder. 1,902,435; Mar. 21.
Filter valve, Vacuum cleaner. W. Leathers. 1,902,333; Mar. 21.
Filtering apparatus. W. H. T. Holden. 1,902,031; Mar. 21.
Fire escape. O. C. N. Gundersen. 1,902,230; Mar. 21.
Fish-bait adjusting device. J. Catarau. 1,902,217; Mar. 21.
Fishing reel, Attaching means for. C. Baird and W. R. Robertson. 1,902,749; Mar. 21.
Fitting for electrical systems, Elbow. M. M. Clayton. 1,901,897; Mar. 21.
Flame arrester. F. G. D. Muller. 1,902,258; Mar. 21.
Flash light. P. Rosenberg. 1,902,377; Mar. 21.
Flash light, Electric. J. L. Shannon. 1,902,590; Mar. 21.
Flashing light signal. S. M. Day. 1,902,799; Mar. 21.
Flat and filler for egg holding cases. F. Kronenberger. 1,901,918; Mar. 21.
Flexible joint. J. M. Nalle. 1,901,924; Mar. 21.
Floodlight. K. A. Sawin. 1,902,587; Mar. 21.
Floor or roof construction, Slab. H. E. Marks. 1,902,565; Mar. 21.
Flow meter. H. M. Newton. 1,902,716; Mar. 21.
Flow meter. C. B. Sawyer. 1,902,427; Mar. 21.
Flower holding device. W. H. Seltzer. 1,902,423; Mar. 21.
Fluid, Clarifying dry cleaning. R. A. Morgen and F. Fair. 1,902,514; Mar. 21.
Fluid heating apparatus. L. C. Huff. 1,901,970; Mar. 21.
Fluid pressure brake. C. C. Farmer. 1,901,905; Mar. 21.
Fluid pressure brake. T. H. Thomas. 1,901,937; Mar. 21.
Fluid pressure governing system. H. F. Schmidt. 1,902,340; Mar. 21.
Fluid pressure pump. W. P. Valentine. 1,902,845; Mar. 21.
Fluid pressure regulator. G. Daux. 1,901,900; Mar. 21.
Flywheel. W. E. Johnson. 1,902,505; Mar. 21.
Folder, Advertising. W. J. Gallagher. 1,902,121; Mar. 21.
Folding table. C. N. Allerding. 1,901,887; Mar. 21.
Foliage trimmer. E. M. Beanblossom. 1,902,114; Mar. 21.
Food handling apparatus. H. L. Johnston and D. A. Meeker. 1,902,506; Mar. 21.
Food mixer. C. A. Purdin. 1,902,376; Mar. 21.
Food mixer, Twin. A. A. Theodoropulos. 1,902,678; Mar. 21.,
Footboard for a bedstead or similar article. H. Rodstein and I. Nathanson. Des. 89,537–40; Mar. 21.
Form, Shoe. W. J. De Witt. 1,902,120; Mar. 21.
Frame: *See*—
Advertising frame. Truck side frame.
Frame. W. J. Simanek. 1,901,991; Mar. 21.
Frame for a power unit. D. Heyer. Des. 89,507; Mar. 21.
Frame for winding mechanism, Supporting. R. Lavandeira. 1,902,370; Mar. 21.
Freewheeling attachment. J. Dorst and P. Bachhuber. 1,902,623; Mar. 21.
Friction surfaces. R. J. Norton. 1,902,576; Mar. 21.
Fuel burner. R. H. Forney. 1,902,225; Mar. 21.
Fuel injector for engines. F. A. Thaheld. 1,902,197; Mar. 21.
Fuel, Motor. D. W. Hoge. 1,902,125; Mar. 21.
Furnace: *See*—
Electric furnace.
Furnace. R. A. Foresman. 1,902,359; Mar. 21.
Furnace. L. A. Mekler. 1,901,922; Mar. 21.
Furnace operating mechanism. J. P. Ferris, D. Clute, and E. Wiedmann. 1,902,063; Mar. 21.
Fuse. G. Blumberg. 1,902,613; Mar. 21.
Fuse clip lock. F. C. La Mar. 1,902,804; Mar. 21.
Fuse cut-out. E. Burke. 1,901,894; Mar. 21.
Fuse holder and lighter, Combination. F. E. Keese, jr. 1,902,706; Mar. 21.
Fuse refilling tool. M. Kondo. 1,902,710; Mar. 21.
Fuse, Renewable electric. C. and E. Kemp. 1,902,707; Mar. 21.
Fused electrical plug. L. L. Maxam. 1,902,568; Mar. 21.
Gain control apparatus. W. H. T. Holden. 1,902,030; Mar. 21.
Game apparatus. H. T. Neuman. 1,902,137; Mar. 21.
Garment, Bathing. A. Slotoroff. 1,902,190; Mar. 21.
Garment rack. A. E. Sanderson. 1,902,724; Mar. 21.
Gas, making oil. R. E. Whitlock. 1,902,004; Mar. 21.
Gas, Reforming natural. J. A. Yunker. 1,902,747; Mar. 21.
Gas refrigerating apparatus. H. J. Nachman. 1,902,715; Mar. 21.
Gas saver. C. A. Borgeson. 1,902,275; Mar. 21.
Gases, Transferring liquefied. C. W. P. Heylandt. Re18,774; Mar. 21.
Gauge: *See*—
Liquid gauge. Miter gauge.
Gauge for determining pitch of propeller blades. G. A. Prior. 1,902,180; Mar. 21.
Gauge for low temperature fluids. C. S. Bull. 1,902,276; Mar. 21.
Gear: *See*—
Reducing gear.
Gear for engines, Blower and driving. B. G. Parsons. 1,902,095; Mar. 21.
Gear for internal combustion engine, Valve control. E. Elmer. 1,902,696; Mar. 21.
Gearing, Manufacturing. J. L. Matthews. 1,902,656; Mar. 21.
Gearing, Worm. E. Wildhaber. 1,902,683; Mar. 21.
Gelatinous product, Flexible transparent. H. Heckel. 1,902,304; Mar. 21.
Generator: *See*—
Acetylene generator.
Glass dipping rack, Photoengraver's. C. E. Riley. 1,902,338; Mar. 21.
Glass drawing apparatus. H. F. Clark. 1,901,896; Mar. 21.
Glass feeding apparatus and method. K. E. Peller. 1,902,788; Mar. 21.
Glass holder. L. E. Baltzley and F. Goertz. 1,902,608; Mar. 21.
Glass run channel structure. J. S. Reid. 1,902,422; Mar. 21.
Glassware, Apparatus for annealing. P. L. Geer. 1,902,326; Mar. 21.
Glassware, Manufacture of hollow. G. E. Rowe. 1,902,140; Mar. 21.
Glassware, Manufacture of hollow. G. E. Rowe. 1,902,141–2; Mar. 21.
Glove, Smoker's finger. R. R. Strasser. 1,902,426; Mar. 21.
Glucosides of bulbus scillæ, Manufacture of new cardioactive. W. Kreis. 1,902,408; Mar. 21.
Gluing machine. F. J. Rector. 1,902,264; Mar. 21.
Golf tee, Folding. W. E. Bock. 1,901,948; Mar. 21.
Golf tee positioning device. E. L. Walrath. 1,902,682; Mar. 21.
Governing mechanism. A. B. Reavis and R. J. Elsinger. 1,902,311; Mar. 21.
Grain distributing means for combines. E. W. Mentor and C. J. Scranton, jr. 1,902,289; Mar. 21.
Grain dump, Combination. J. McEachern. 1,902,252; Mar. 21.
Grain treating and elevating device. H. M. Smestad. 1,902,733; Mar. 21.
Grate bar. J. S. Thompson. 1,902,595; Mar. 21.
Grates and fireplaces, Combination tong and poker device for fire. N. Baldwin. 1,902,685; Mar. 21.
Grease and making the same. F. C. Gebhardt. 1,902,635; Mar. 21.
Grinder, Cylinder. Jos. Sunnen. 1,902,194; Mar. 21.
Grinding machine. F. G. Hughes. 1,902,555; Mar. 21.
Grinding machine. O. W. Nelson. 1,902,661; Mar. 21.
Grinding, refining, and mixing machine C. G. Sprado. 1,902,591; Mar. 21.
Gripping device, Exterior. J. A. Buttress. 1,902,216; Mar. 21.
Guanidine-thio cyanate, Producing. W. Gluud. 1,902,400; Mar. 21.
Guard, Tool holder. I. E. Toniewicz and M. Lizon. 1,902,679; Mar. 21.
Gun, Gas. E. H. Ingalls. 1,902,127; Mar. 21.
Guy wire protector. H. E. Miller. 1,902,414; Mar. 21.
Gymnastic apparatus. R. A. Edwards. 1,902,094; Mar. 21.
Hair collecting device. H. L. Bjorklund. 1,902,211; Mar. 21.
Hair curler. G. E. Bjorkman and J. Geloso. 1,901,892; Mar. 21.
Hair drier. T. I. Moseley. 1,902,334; Mar. 21.
Hammer, Motor-driven mechanical. M. G. H. Ousblick. 1,901,981; Mar. 21.
Handle for rock drills. E. F. Terry. 1,902,530; Mar. 21.
Handle for vacuum cleaners. J. Tuteur. 1,902,472; Mar. 21.
Handle structure, Vacuum cleaner. B. J. Tamarin. 1,902,593; Mar. 21.
Hangar for aeroplanes and the like. J. M. Webster. 1,902,205; Mar. 21.
Hanger: *See*—
Cage and utility hanger. Tubing hanger.
Curtain display hanger.
Hanger for fur scarfs and the like. G. Davison. 1,902,622; Mar. 21.
Harps, Control mechanism for vibra. H. A. Bower. 1,902,614; Mar. 21.
Harvester. E. E. Wickersham. 1,902,430; Mar. 21.
Hat box. M. Struble. 1,902,313; Mar. 21.
Hat, Combination. H. F. Jordan. 1,902,080; Mar. 21.
Hat making machine. R. G. Muller. 1,902,516; Mar. 21.
Hat protector. T. E. Roderick. 1,901,987; Mar. 21.
Hatrack, Adjustable. M. Teitelbaum. 1,902,147; Mar. 21.
Hay loader. L. H. Kaupke. 1,902,243; Mar. 21.
Hay unloading apparatus. H. C. Christiance. 1,902,761; Mar. 21.
Heat exchanger. S. M. Burton. 1,902,820; Mar. 21.
Heat exchanger. L. P. Whitaker. 1,902,350; Mar. 21.
Heat exchangers, Making. L. P. Whitaker. 1,902,849; Mar. 21.
Heat insulating bodies, Making. E. J. Pieper, D. F. Smith, and C. C. Vogt. 1,901,984; Mar. 21.
Heat motor. L. M. Persons. 1,902,260; Mar. 21.
Heat regulator, Continuous. C. I. Hall. 1,902,327; Mar. 21.
Heat retaining means for autogenous welding and method of welding. M. J. Wall. 1,902,051; Mar. 21.

Heater: *See*—
Electric house heater. Water heater.
Switch heater.
Heater. W. E. Reno. 1,902,099; Mar. 21.
Highway sign. W. A. Schutt. 1,902,189; Mar. 21.
Hinge: *See*—
Covered joint hinge.
Hob grinding machine. C. G. Olson. 1,901,926; Mar. 21.
Hoe. W. E. Kee. 1,902,705; Mar. 21.
Holder: *See*—
Collapsible holder. Film holder.
Desk pen holder. Glass holder.
Display holder. Restaurant check holder.
Holder and ash tray, Combination cigarette. R. F. Heywood. 1,902,028; Mar. 21.

Lock. J. H. Shaw. 1,902,343; Mar. 21.
Lock washer. C. G. Olson. 1,901,927; Mar. 21.
Locking cover. W. S. Sherman. 1,902,731; Mar. 21.
Locking system for strong boxes. A. Swahn. 1,902,195; Mar. 21.
Looms, Stop motion for. J. P. Costello. 1,902,302; Mar. 21.
Looms, Warp-stop motion for. W. H. Baker. 1,902,318; Mar. 21.
Lubricating means for automatic transmission mechanism. J. G. Vincent. 1,902,050; Mar. 21.
Lubricating system. G. J. Russell. 1,902,583; Mar. 21.
Lubricator: *See*—
Automatic lubricator.
Lubricator fitting. E. J. Macey. 1,901,973; Mar. 21.
Machine for attaching ornaments to shoes. G. E. Anderson. 1,902,605; Mar. 21.
Machine for counting and delivering coins. C. D. Howenstine. 1,902,328; Mar. 21.
Machine for dyeing, bleaching, and the like of loose yarns or bobbins. J. J. Müller. 1,902,042; Mar. 21.
Machine for expressing fruit juices and the like. H. W. Tuttle. 1,902,738; Mar. 21.
Machine for forming waterproof tubing around firework fuse material. J. Gioiosa. 1,902,122; Mar. 21.
Machine for grinding axles or the like. V. P. Schmidt and H. A. Brenaman. 1,902,188; Mar. 21.
Machine for making cement blocks. J. P. Rose, jr. 1,902,523; Mar. 21.
Machine for pasting webs of paper together. J. A. Lowe. 1,902,713; Mar. 21.
Machine for sharpening screwing taps and the like. H. W. and P. Hunt. 1,902,240; Mar. 21.
Machine for treating hat bodies. G. W. Cuming. 1,902,118; Mar 21.
Machine gun mount for aircraft. C. G. Trimbach. 1,902,107; Mar. 21.
Machine tool. R. N. Brown. 1,902,012; Mar. 21.
Machine tool. A. Oberhoffken. 1,902,179; Mar. 21.
Magnetic curves, Method and apparatus for photographing. H. Lehde. 1,901,876; Mar. 21.
Magneto timing indicator. J. F. Martin. 1,902,655; Mar. 21.
Mail bag. J. L. de Give. 1,902,764; Mar. 21.
Mallet, Pony polo. H. P. Nelson. 1,902,660; Mar. 21.
Mandrel for hollow crank shafts. H. H. Miner. 1,902,176; Mar. 21.
Manifolding. A. A. Johnson. 1,902,128; Mar. 21.
Manifolding machine. W. Ritzerfeld. 1,902,293; Mar. 21.
Marker or tag. C. E. Timson. 1,902,531; Mar. 21.
Match box. I. H. Dube. 1,902,767; Mar. 21.
Material, Apparatus for gauging. R. E. Hoffman and C. Paulson. 1,901,966; Mar. 21.
Material containing tin, Treating. S. Tamaru and Y. Koisumi. 1,902,735; Mar. 21.
Matrix material for production of printing plates. S. O. Thomas. 1,902,048; Mar. 21.

Mattress. W. Van Slyck. 1,902,000; Mar. 21.
Maximum and total demand meter. R. Pudelko. 1,902,045; Mar. 21.
Measurement, High frequency. A. S. Fitz Gerald. 1,902,496; Mar. 21.
Measuring apparatus. A. E. Young. 1,902,112; Mar. 21.
Memory, Assisting and testing the. A. G. Humphreys. 1,902,404; Mar. 21.
Mercury vapor anode. M. Wellauer. 1,902,002; Mar. 21.
Metal container. W. F. Punte. 1,902,664; Mar. 21.
Metal heating method and apparatus. J. J. McLaughlin. 1,902,039; Mar. 21.
Metal parts within a vacuum tube, Device for supporting. A. Ungelenk and W. Hofmann. 1,902,473; Mar. 21.
Metal sharpening machine. H. J. Gaisman. 1,902,022; Mar. 21.
Metal sharpening machine. C. R. Schumacher. 1,902,527; Mar. 21.
Metals, Coating. G. H. Howe. 1,902,503; Mar. 21.
Metals in electric furnaces, Melting. E. G. T. Gustafsson. 1,902,638; Mar. 21.
Metals, Low temperature reduced pressure or partial vacuum reduction of. A. Musso. 1,902,090; Mar. 21.
Meter: *See*—
Color meter. Liquid meter.
Electrical meter. Maximum and total demand meter.
Electricity meter.
Flow meter.
Meter recording, Centralized. W. H. Pratt. 1,902,465; Mar. 21.
$MgCl_2$ containing chlorides of alkali metals or alkaline earth metals, Producing. H. Tunaka and S. Imatomi. 1,902,385; Mar. 21.
Microphone. H. Sell. 1,901,933; Mar. 21.
Mill for reducing paints, colors, and pigments. J. R. Torrance. 1,902,680; Mar. 21.
Mineral reduction and metal extraction. A. Musso. 1,902,089; Mar. 21.
Mining apparatus. M. P. Holmes. 1,902,446; Mar. 21.
Mining machine. F. W. Vodoz. 1,902,148; Mar. 21.
Mirror, Self opening and closing three-way. E. J. Loeffler. 1,902,037; Mar. 21.
Miter gauge. J. Tate. 1,902,270; Mar. 21.
Mixer: *See*—
Food mixer.
Mixer. C. A. Rowley. 1,902,525; Mar. 21.
Mixing device or sewage treatment plant. H. N. Jenks. 1,902,078; Mar. 21.
Mold. W. E. Kemp. 1,902,559; Mar. 21.
Mold and making the same. P. Elbogen. 1,902,627; Mar. 21.
Molding composition and treating. R. A. Plant and M. E. Brooks. 1,902,419; Mar. 21.
Molding, Store fixture display. J. H. Esdorn. 1,902,769; Mar. 21.
Motor: *See*—
Heat motor. Steam motor.
Motor commutating device, Direct current. E. Kern. 1,902,131; Mar. 21.
Motors, Operating polyphase alternating current. H. M. Hobart, F. O. Stebbins, and A. F. Gettelman. 1,902,444; Mar. 21.
Mounting, Internal combustion engine. R. K. Lee. 1,902,509; Mar. 21.
Mounting, Loud speaker. G. L. Beers and W. S. Barden. 1,902,609; Mar. 21.
Mounting, Pump rod stuffing box. W. W. Foster. 1,902,360; Mar. 21.
Mouthpiece for telephone transmitters, Silencer. E. V. Hnsson. 1,902,556; Mar. 21.
Movement, System for transmitting. G. De Monge. 1,902,356; Mar. 21.
Mower, Power lawn. L. B. Roth. 1,902,524; Mar. 21.
Naphtha stocks, Purifying. D. E. Day. 1,902,221; Mar. 21.
Nipple. F. Brown. 1,902,483; Mar. 21.
Nonreturn valve. E. C. F. Oakley. 1,902,577; Mar. 21.
Nozzle, Cement gun. J. T. Vawter. 1,902,202; Mar. 21.
Nozzle, Discharge. J. F. Werder. 1,902,003; Mar. 21.
Objects, Apparatus for treating. J. H. Grow. 1,902,637; Mar. 21.
Objects, Treating. L. C. Nichols. 1,902,575; Mar. 21.
Oil burner. C. J. Peterson. 1,901,983; Mar. 21.
Oil conversion, Hydrocarbon. L. C. Huff. 1,901,969; Mar. 21.
Oil from wells, and apparatus therefor, Producing. S. W. Traylor, jr. 1,902,296; Mar. 21.
Oiler, Wick. H. Kreidel. 1,901,972; Mar. 21.
Oiling system for motor cars. E. C. Stanley. 1,902,592; Mar. 21.
Oils, Distilling mineral. E. W. Beardsley and D. M. Evans. 1,901,863; Mar. 21.
Oils, Process and apparatus for treating. R. T. Pollock. 1,901,931; Mar. 21.
Oils, Treating drying. E. Assor. 1,902,684; Mar. 21.
Oils, Treating hydrocarbon. O. Behimer. 1,902,056; Mar. 21.
Operating device. E. G. McDonald. 1,902,569; Mar. 21.
Ophthalmological apparatus. W. A. Gunning. 1,902,401; Mar. 21.
Orchard protective system. J. d. R. De Land. 1,902,119; Mar. 21.
Ores, Froth-flotation concentration of. P. C. Wright. 1,902,317; Mar. 21.
Organic compounds, Oxidizing cyclic. H. O. Forrest and P. K. Frolich. 1,902,550; Mar. 21.
Ornament, Radiator cap. W. F. Clark. Des. 89,502; Mar. 21.
Outlet box. G. Carlson. 1,902,488; Mar. 21.
Package, Special. C. C. Chase. 1,902,760; Mar. 21.
Packing. A. R. Klingloff. 1,902,247; Mar. 21.
Packing. D. F. Warner. 1,902,792; Mar. 21.
Packing frame for automobile trunks and suit cases. S. E. Cheney. 1,901,895; Mar. 21.
Packing ring for shaft bearings. A. F. Phelps. 1,902,662; Mar. 21.
Pad: *See*—
Cushioning pad.
Padlock. F. E. Reinhold. 1,902,665; Mar. 21.
Pajama, Drop seat. N. A. Gross. 1,902,634; Mar. 21.
Panel-board and panel-board construction. H. F. Starrett. 1,902,790; Mar. 21.
Paper making apparatus. W. H. Cape. 1,902,798; Mar. 21.
Paper pulp, Manufacturing. A. M. Thomsen. 1,902,106; Mar. 21.
Paper, Sheet of. R. B. Buzzaird. Des. 89,481; Mar. 21.
Parachute, Revolving. K. J. Girdwood. 1,901,957; Mar. 21.
Parallel connecting system, Automatic. R. Keller. 1,902,645; Mar. 21.
Parisons, Forming. A. J. Smith. 1,901,934; Mar. 21.
Pay station apparatus. G. Biniek. 1,902,210; Mar. 21.
Pedal, Accelerator. R. C. Sanders. 1,902,667; Mar. 21.
Pen, Fountain. W. J. Foley. 1,902,633; Mar. 21.
Pen, Fountain. A. J. Iorio. 1,901,971; Mar. 21.
Pen, Writing, drawing, or ruling. T. Kovacs. 1,902,782; Mar. 21.
Perforating machine. E. A. Ford. 1,902,064; Mar. 21.
Petroleum and other hydrocarbons, Apparatus for treating. C. P. Dubbs. 1,901,950; Mar. 21.
Phonograph, Automatic. H. L. Brump and F. O. and F. E. Gray. 1,902,158; Mar. 21.
Phosphate, Leaching raw. M. Larsson. 1,902,648; Mar. 21.
Phosphorus, Producing red. S. D. Gooch and F. P. Kerschbaum. 1,902,144; Mar. 21.
Picker roller, Adjustable. J. A. Streun. 1,902,674; Mar. 21.
Pickling machine, Operating. W. Trinks. 1,902,532; Mar. 21.
Picture transmission. H. R. Butler and C. J. Young. 1,902,486; Mar. 21.
Picture transmission or the like, Apparatus for. O. Fulton. 1,902,552; Mar. 21.
Pictures, Synchronizing mechanism for talking motion. A. J. Vasselli. 1,902,201; Mar. 21.
Pigments containing titanium, Producing. F. von Bichowsky. 1,902,204; Mar. 21.
Pin fastener. G. A. Holmes. 1,902,447; Mar. 21.
Pin fastener. G. S. Maynard. 1,902,308; Mar. 21.
Pin for soft collars, Stiffener. F. J. Barnes. 1,902,153; Mar. 21.
Pipe connecter. W. Goetzelman. 1,902,229; Mar. 21.
Pipe coupling, Train. J. C. McCune. 1,901,917; Mar. 21.
Pipe cutter, Portable. A. O. Brungardt, F. H. Morehead, and J. W. Morrissey. 1,902,616; Mar. 21.
Pipe straightening apparatus. G. C. Holbert. 1,902,029; Mar. 21.
Piston ring snagging machine. R. A. Haegg. 1,902,164; Mar. 21.
Piston rings, Device for turning. A. Abramson. 1,901,942; Mar. 21.
Piston tool. P. D. Reynolds. 1,902,722; Mar. 21.
Pitcher or analogous article, Cream. H. Neghaur. Des. 89,529; Mar. 21.
Pitcher or similar article. C. B. Ilgenfritz. Des. 89,525; Mar. 21.
Pitman for agricultural implements. E. F. Huddle. 1,901,968; Mar. 21.
Plastic composition. H. Hopkinson and J. G. Britton. 1,902,803; Mar. 21.
Plate or similar article. Y. Buma. Des. 89,482–8; Mar. 21.
Plate or similar article. Y. Buma. Des. 89,490–501; Mar. 21.
Plate or similar article. G. Wesp. Des. 89,522; Mar. 21.
Playground device. W. E. Haskell. 1,901,964; Mar. 21.
Plug: *See*—
Fused electrical plug.
Plug coupler, Electrical. H. B. Taylor. 1,902,791; Mar. 21.
Plug receptacle and warning light fixture, Combined. W. C. Tregoning. 1,902,596; Mar. 21.
Plug receptacle, Connecting. R. M. Heintz. 1,902,236; Mar. 21.
Portable screen. O. W. Pineo. 1,902,373; Mar. 21.
Post cap. D. McDaniel. 1,902,511; Mar. 21.
Powders, Manufacture of. W. J. Meier. 1,901,978; Mar. 21.
Power feeding device. G. M. Neil. 1,902,574; Mar. 21.
Power transmission. C. A. Rudqvist. 1,901,988; Mar. 21.
Power transmission device. C. E. McCoy. 1,901,916; Mar. 21.
Press. M. H. Ballard and D. G. McLean. 1,902,054; Mar. 21.
Pressing machines, Actuating mechanism for. E. Davis. 1,902,018; Mar. 21.

Priming device, Automatic. W. Wilson. 1,902,603; Mar. 21.
Printing mechanism. P. Dechêne. 1,902,060; Mar. 21.
Propeller. F. A. A. Pearson. 1,902,096; Mar. 21.
Propeller with automatic regulation. A. Ferrario. 1,901,953; Mar. 21.
Protective device for walking beam pumping rigs. H. H. Dansboe. 1,902,492; Mar. 21.
Protector: *See*—
Check protector. Hat protector.
Guy wire protector. Tube protector.
Pump: *See*—
Fluid pressure pump. Rotary pump.
Liquid pump. Sirup pump.
Rotary gear pump.
Pump. F. Frelin. 1,902,065; Mar. 21.
Pump and carburetor, Combination fuel. W. R. Hewitt. 1,902,403; Mar. 21.
Pumping apparatus. J. F. Jaworowski. 1,902,076–7; Mar. 21.
Push button switch. G. H. Whittingham. 1,902,743; Mar. 21.
Quinoline derivatives and the products, Manufacture of. F. Schönhöfer. 1,902,103; Mar. 21.
Rack: *See*—
Card rack. Garment rack.
Display rack. Glass dipping rack.
Rack and utility table, Combined. A. E. Smith. 1,902,670; Mar. 21.
Radiator. A. B. Modine. 1,902,572; Mar. 21.
Radiator, Automobile. E. J. Pommer. 1,902,044; Mar. 21.
Radiator elements, Making. F. K. Hoffman. 1,902,779; Mar. 21.
Radiator shutter. K. Forbes. Des. 89,503; Mar. 21.
Radiocabinet. G. W. Oehlsen, jr. Des. 89,533; Mar. 21.
Radioreceiver power supply. R. M. Heintz. 1,902,235; Mar. 21.
Radio receiving system. A. W. C. Boljahn. 1,902,352; Mar. 21.
Radius attachment for milling, planing, grinding, or scraping machines, Variable. V. L. Emerson. 1,901,952; Mar. 21.
Railroad crossing sign. R. P. Schiffmann. 1,901,879; Mar. 21.
Rail support and fastening means. W. S. Boyce. 1,902,615; Mar 21.
Reamer, Expansion. W. H. Evans. 1,902,062; Mar. 21.
Receiver for continuous waves. R. M. Heintz. 1,902,234; Mar. 21.
Receptacle: *See*—
Plug receptacle.
Receptacle and closure therefor. W. L. Hanavan. 1,902,362; Mar. 21.
Receptacle and roller, Cigarette. H. H. Gerjets. 1,902,699; Mar. 21.
Receptacles, Measuring and dispensing device for. C. Blomstrom. 1,902,157; Mar. 21.
Recorder: *See*—
Time recorder.
Reducing gear. G. Pirinoli. 1,902,374; Mar. 21.
Reduction gear. H. F. Schmidt. 1,902,341; Mar. 21.
Reflector, Nonglare. A. K. Crossman. 1,902,321; Mar. 21.
Refrigerating apparatus. L. G. Copeman. 1,902,016; Mar. 21.
Refrigerating apparatus. G. F. Hofferberth. 1,902,445; Mar. 21.
Refrigerating machine. C. Orr. 1,902,518; Mar. 21.
Refrigeration system. L. U. Larkin. 1,902,784; Mar. 21.
Refrigerator top. J. R. Replogle. Des. 89,535; Mar. 21.
Regulating means for high power electric discharge amplifiers. P. D. Andrews. 1,902,484; Mar. 21.
Regulator: *See*—
Fluid pressure regulator. Heat regulator.
Relay. H. W. Williams and D. Santini. 1,902,602; Mar. 21.
Relief valve. N. F. Henkel. 1,902,027; Mar. 21.
Remote control system for oscillographs. J. W. Legg. 1,902,650; Mar. 21.
Resinous product and making the same, Thermosetting. 1,902,461; Mar. 21.
Resins, Manufacture of synthetic. H. W. Warren. 1,902,477; Mar. 21.
Resins, Treating. D. W. Hoge. 1,902,073; Mar. 21.
Restaurant check holder. E. A. Haveles. 1,902,641; Mar. 21.
Ribbon, Printing. G. R. Wood. 1,902,007; Mar. 21.
Ring for scale pans, Suspension. L. W. Reis. 1,902,581; Mar. 21.
Rivet drilling machine. B. J. Conlin. 1,902,762; Mar. 21.
Rock, Apparatus for loading broken. A. Mendelsohn. 1,902,457; Mar. 21.
Rock crusher and separator. G. A. Reynolds. 1,902,721; Mar. 21.
Rod tip or curtain protector, Curtain. J. N. Rasp. 1,902,182; Mar. 21.
Roll, Accelerating feed. J. N. Reynolds and C. J. Scranton, jr. 1,902,292; Mar. 21.
Roll for use in strip and sheet mills. C. F. Knight. 1,902,084; Mar. 21.
Roll of corrugated paper and making the same, Duplex. B. Rous. 1,902,312; Mar. 21.
Roller: *See*—
Caster roller. Picker roller.
Roof and sealing means therefor, Floating. G. T. Horton. 1,901,874; Mar. 21.
Roofing and building material. H. C. Avery and L. Kirschbraun. 1,902,298; Mar. 21.
Rotary cooler. R. C. Newhouse. 1,902,517; Mar. 21.
Rotary gear pump. C. W. Vogt and W. E. Zoeller. 1,902,347; Mar. 21.
Rotary pump. C. W. Vogt. 1,902,315; Mar. 21.
Rotary pump. C. W. Vogt. 1,902,346; Mar. 21.
Rotary valve. W. F. Grant. 1,901,961; Mar. 21.
Rotor for turbo-blowers, centrifugal pumps and the like. H. Inokuty and Z. Nagaoka. 1,902,406; Mar. 21.
Rubber and products obtained thereby, Manufacturing vulcanized. S. M. Evans. 1,902,398; Mar. 21.
Rubber composition and preserving rubber. A. W. Campbell. 1,902,115; Mar. 21.
Rubber compound and making same, Age resisting. W. Scott. 1,902,379; Mar. 21.
Rubber, Preservation of. I. Williams and A. M. Neal. 1,902,005; Mar. 21.
Rubber product and manufacturing same, Age resisting vulcanized. J. R. Ingram. 1,902,405; Mar. 21.
Rudder pedal adjusting mechanism. G. A. Page, jr. 1,902,094; Mar. 21.
Sadiron. S. Grauer. 1,902,025; Mar. 21.
Safe. W. Ehrlich. 1,901,904; Mar. 21.
Safety cut-out switch. C. E. Deitsch. 1,902,765; Mar. 21.
Sandal, Spiked. E. V. Rice. 1,902,521; Mar. 21.
Sash latch. W. C. Macy. 1,901,974; Mar. 21.
Saw. W. H. Smola, sr. 1,902,671; Mar. 21.
Saw, Portable ice. T. J. Robbins. 1,902,666; Mar. 21.
Saws, Producing. O. Mitchell. 1,902,177; Mar. 21.
Scale. H. Hoyer. Des. 89,508; Mar. 21.
Scale, Computing. F. L. Fuller. 1,902,066; Mar. 21.
Scale, Weighing. S. L. Hanssen. 1,902,283; Mar. 21.
Scale, Weighing. E. A. Reussenzehn. 1,902,100; Mar. 21.
Scraping and cleaning implement. E. De Nio. 1,902,766; Mar. 21.
Screen: *See*—
Portable screen.
Screw making machine. R. S. Crosby and C. W. Sponsel. 1,902,117; Mar. 21.
Sealing tool. R. T. Edwards. 1,901,903; Mar. 21.
Seat: *See*—
Adjustably supported seat.
Seat. G. Flintermann. 1,902,681; Mar. 21.
Seat. E. L. Johnson. 1,902,367; Mar. 21.
Seat or chair, Reversible. C. R. Hultgren. 1,902,282; Mar. 21.
Selective system. H. Burton. 1,901,867; Mar. 21.
Separable fastener. S. H. Norton. 1,902,416; Mar. 21.
Separator: *See*—
Storage battery separator.
Septic tank. C. A. Kopp. 1,902,171; Mar. 21.
Sewage and trade wastes, Process and apparatus for purification of. E. B. Knight. 1,902,248; Mar. 21.
Sewing machine. F. Morel. 1,902,041; Mar. 21.
Shades, Apparatus for cleaning window. W. M. Theobald. 1,902,344; Mar. 21.
Shear. L. I. Johnson and J. A. Smitmans. 1,901,910; Mar. 21.
Sheet piling bulkhead. O. F. Doyle. 1,902,397; Mar. 21.
Sheet severing mechanism. O. R. Winter. 1,902,604; Mar. 21.
Sheets, Method and apparatus for separating adhesively joined. F. B. Pfeiffer. 1,902,139; Mar. 21.
Sheets, Method of and apparatus for stacking. H. L. Joachim. 1,902,436; Mar. 21.
Shingle. N. P. Harshberger. Re18,772; Mar. 21.
Shingle, Interlocking. J. E. Berkheimer. 1,902,155; Mar. 21.
Ship drive-coupling mechanism. O. Hegemann. 1,902,701; Mar. 21.
Shock absorber. H. Rawdon and W. E. Burnham. 1,902,421; Mar. 21.
Shoe. C. H. Stemmons. Des. 89,541; Mar. 21.
Shoe. S. Zide. 1,902,053; Mar. 21.
Shoe heel. L. W. Brooks. 1,902,656; Mar. 21.
Shotgun. R. M. Jenkins. 1,902,702; Mar. 21.
Sifter container. A. H. Dreux. 1,902,324; Mar. 21.
Sign: *See*—
Highway sign. Railroad crossing sign.
Sign. E. R. Gill, Jr. 1,902,440; Mar. 21.
Signal: *See*—
Flashing light signal.

Signaling, Telephony. C. A. McKee. 1,901,919; Mar. 21.
Silk and weighting the same, Weighted. V. Froelicher. 1,902,226; Mar. 21.
Silk, Artificial. J. J. Stöckly and E. Witte. 1,902,529; Mar. 21.
Silk fibers, Weighting of natural and artificial. H. Hintse. 1,902,777–8; Mar. 21.
Silk spinning machine attachment, Artificial. A. Krause. 1,902,382; Mar. 21.
Sirup pump. A. C. and L. C. Pilcher. 1,902,261; Mar. 21.
Slag treatment. T. Bartholomew. 1,901,891; Mar. 21.
Slicing machine. E. A. Ford. 1,902,021; Mar. 21.

Slide fastener. H. J. Piehl. 1,902,417; Mar. 21.
Snath. R. P. Stine. 1,902,191; Mar. 21.
Socket, Reflector. N. W. Hall. 1,902,026; Mar. 21.
Socket, Snap fastener. E. D. Janes. 1,902,557; Mar. 21.
Soldering machine. E. H. Jugel. 1,902,703; Mar. 21.
Sole laying machine. S. J. Finn. 1,902,325; Mar. 21.
Sole laying machine. S. J. Finn. 1,902,399; Mar. 21.
Sound amplifier. T. Lindenberg. 1,902,250; Mar. 21.
Sound recording device. M. H. Page. 1,902,290; Mar. 21.
Sound reproducer. A. N. Goldsmith and I. Wolff. 1,902,442; Mar. 21.
Sound translating device. H. R. Clarke. 1,901,898; Mar. 21.
Spacer, Automatic. S. Olson. 1,901,928; Mar. 21.
Spectrum analysis, Method of and apparatus for quantitative. F. Twyman. 1,902,109; Mar. 21.
Speed of a vehicle with the steering mechanism thereof, Device for synchronizing. O. E. Eggen. 1,902,626; Mar. 21.
Spindle. F. Bauman. 1,902,751; Mar. 21.
Spinner. J. J. Kilpatrick. 1,902 560; Mar. 21.
Spoon or similar article. W. S. Warren. Des. 89,542; Mar. 21.
Spring: *See*—
Suspension spring.
Spring. E. G. Lindhe. 1,902,036; Mar. 21.
Springboard, Adjustable. H. N. Stevenson. 1,902,678; Mar. 21.
Spring construction. E. G. Lindhe. 1,902,134; Mar. 21.
Stabilizer adjusting mechanism. C. E. Hathorn. 1,902,071; Mar. 21.
Stage grinding, Method of and apparatus for multiple. A. F. Miller. 1,902,418; Mar. 21.
Stand and filter for barrels and the like, Portable. L. W. Schwenk. 1,901,878; Mar. 21.
Stand for bottled water or the like. M. Alex. Des. 89,526; Mar. 21.
Starter, Voltage compensated motor. C. Steenstrup. 1,902,470; Mar. 21.
Starting device for internal combustion engines. G. A. Taylor. 1,901,996; Mar. 21.
Starting system for internal combustion engines, Automatic. A. S. Knapp. 1,902,646; Mar. 21.
Static eliminator. P. Kiler. 1,902,407; Mar. 21.
Steam heating system. H. B. McGinnis. 1,902,288; Mar. 21.
Steam motor, Flying worm. L. L. Foss. 1,902,439; Mar. 21.
Steam trap. C. F. Covey. 1,902,219; Mar. 21.
Steels, Hardening alloy. H. Sutton, A. J. Sidery, and B. Evans. 1,902,676; Mar. 21.
Stencil. C. F. Brauer. 1,902,539; Mar. 21.
Sterilizing apparatus. W. V. Castle. 1,902,687; Mar. 21.
Sterilizing, Method and apparatus for. A. L. Dunham. 1,902,625; Mar. 21.
Sterilizing process. J. C. Wormley. 1,902,390; Mar. 21.
Stone cutting machine. H. Evans. 1,902,279; Mar. 21.
Storage battery separator. J. L. Rupp. 1,902,267; Mar. 21.
Strip-supporting mechanism. L. W. Anderson. 1,902,010; Mar. 21.
Sugars and article produced thereby, Protecting granules of hygroscopic. W. J. Hale. 1,902,773; Mar. 21.
Suit, Life preserver. M. Anderson. 1,901,859; Mar. 21.
Supershock absorption. R. B. Martin. 1,902,714; Mar. 21.
Support and stretching mechanism for motion picture screens. J. P. Hansen. 1,901,963; Mar. 21.
Supporting device. E. A. Bescherer. 1,901,947; Mar. 21.
Surgical instrument. E. C. Pilgrim. 1,902,418; Mar. 21.
Suspenders. L. Schullerman. 1,902,342; Mar. 21.
Suspension device for equalizing the strain on elevator cables. W. P. Frost. 1,902,161; Mar. 21.
Suspension spring. P. Carteret. 1,902,894; Mar. 21.
Sweater or similar article. S. Sheindelman. Des. 89,514–20; Mar. 21.
Switch control, Automatic electric. F. H. Richterkessing. 1,902,263; Mar. 21.
Switch: *See*—
Electric switch.
Push button switch.
Safety cut-out switch.
Signal switch.
Thermostatic switch.
Time switch.
Switch control mechanism for automatic telephone systems. C. L. Goodrum. 1,902,163; Mar. 21.
Switch for direction indicators. R. Hadano. 1,902,700; Mar. 21.
Switch for use with heaters, Thermostatic. R. W. Johnson. 1,902,451; Mar. 21.
Switch heater. E. L. Ruby. 1,902,339; Mar. 21.
Table: *See*—
Combination table.
Display table.
Drafting table.
Folding table.
Table leg brace. G. J. Corporon. 1,902,690; Mar. 21.
Tabulating machine for nondecimal systems. G. F. Daly and R. E. Page. 1,902,017; Mar. 21.
Tank: *See*—
Septic tank.
Tank cover. W. H. Matthews. 1,902,456; Mar. 21.
Tank lever, Flush. W. B. Campbell. 1,902,758; Mar. 21.
Tape, Button-hole. E. M. Goldsmith. 1,902,553; Mar. 21.
Tape for fastening packages and for like purposes, Adhesive. T. H. Krueger. 1,902,369; Mar. 21.
Tar and like oils, Treating. W. Higburg and P. C. Reilly. 1,901,872; Mar. 21.
Telegraph distributor, Multiplex. C. E. Dunham and A. H. Roche. 1,901,951; Mar. 21.
Telephone exchange system. E. P. G. Wright. 1,901,940; Mar. 21.
Telephone system. L. H. Allen. 1,901,944; Mar. 21.
Telephone system. N. H. Saunders. 1,902,187; Mar. 21.
Telephone system, Automatic. N. H. Saunders. 1,902,186; Mar. 21.
Temperature control apparatus. L. A. M. Phelan and C. Hotchkiss. Re18,771; Mar. 21.
Tension and length of lines in oil wells, Device for indicating. H. M. Greene. 1,901,962; Mar. 21.
Testing device. F. V. Larkin. 1,902,307; Mar. 21.
Testing instrument and regulator. P. E. Chapman. 1,902,542; Mar. 21.
Textile fabric or similar article. M. Brodsky. Des. 89,480; Mar. 21.
Textile fabric or similar article. J. M. Gottesman. Des. 89,504; Mar. 21.
Textile fabric or similar article. M. Gubl. Des. 89,505; Mar. 21.
Textile fabric or similar article. A. Kohut. Des. 89,528; Mar. 21.
Textile fabric or similar article. J. Schweizer. Des. 89,513; Mar. 21.
Textile fabric or similar article. W. Willheim. Des. 89,543; Mar. 21.
Textile fabric or similar article of manufacture. A. J. Heinke. Des. 89,506; Mar. 21.
Thermal relay. J. E. Willing. 1,902,793; Mar. 21.
Thermostat. S. P. Vaughn. 1,901,881; Mar. 21.
Thermostat, Bimetal. H. Scott. 1,902,589; Mar. 21.
Thermostatic control. C. M. Selby. 1,902,105; Mar. 21.
Thermostatic switch. R. W. Johnson. 1,902,452; Mar. 21.
Thread guide. K. Meyer-Gaus. 1,902,458; Mar. 21.
Threads between stitched books, Method of and mechanism for extracting interconnecting. O. Kleinschmit. 1,902,286; Mar. 21.
Time recorder. F. L. Fuller. 1,902,067; Mar. 21.
Time switch. W. K. Kearsley. 1,902,508; Mar. 21.
Tire building drum. H. T. Kraft. 1,902,306; Mar. 21.
Tire, Pneumatic. F. F. Anderson. 1,901,862; Mar. 21.
Tire tool. J. C. Jackson and A. J. Ingersoll. 1,902,283; Mar. 21.
Titanium dioxide, Preparing. F. von Bichowsky. 1,902,203; Mar. 21.
Tobacco fumes during smoking, Rendering nonpoisonous the. K. Herrmann. 1,902,775; Mar. 21.
Tool: *See*—
Bore straightening tool.
Fuse refilling tool.
Machine tool.
Piston tool.
Sealing tool.
Tire tool.
Valve seat tool.
Tool for electric motors and generators, Wedge removing. M. O. Fredrickson. 1,902,551; Mar. 21.
Tool for molding machines, Molding. H. Schants. 1,902,047; Mar. 21.
Tools provided with hard metal members, Making and hardening. A. Meutsch. 1,902,513; Mar. 21.
Toothbrush. H. V. Bryan. 1,901,866; Mar. 21.
Toothbrush, Interchangeable. H. G. L. Lemoine. 1,902,410; Mar. 21.
Towel service apparatus. S. A. Schwarts. 1,902,588; Mar. 21.
Towing device. F. Bonge. 1,902,212; Mar. 21.
Toy building block. F. H. Mills. 1,902,186; Mar. 21.
Toy, Mechanical. R. D. Beerbower. 1,902,154; Mar. 21.
Toy pistol. F. B. Keyston. 1,902,708; Mar. 21.
Tractor cultivator. I. L. Charlesworth. 1,902,689; Mar. 21.
Transfer mechanism. C. D. Lake. 1,902,035; Mar. 21.
Transmission, Automatic. V. Kinser. 1,902,245; Mar. 21.
Transmission, Flexible. P. C. Gordon. 1,902,800; Mar. 21.
Transmission line. A. O. Austin. 1,901,860; Mar. 21.
Transmission mechanism. E. R. Burtnett. 1,902,618; Mar. 21.
Trap: *See*—
Steam trap.
Tray or article of analogous nature, Smoker's. H. Negbaur. Des. 89,532; Mar. 21.
Tree, Apple. J. H. Dickey. Pl. Pt. 57; Mar. 21.
Tree-planer for cutting or working out resin-passages in trees. W. Bark. 1,901,946; Mar. 21.
Trellis, arbor, and the like. H. H. Phillips. 1,902,663; Mar. 21.
Trimming, Embroidered textile fabric. E. G. Zullig. Des. 89,523–4; Mar. 21.
Truck. F. B. Howell. 1,902,504; Mar. 21.
Truck bolster. H. C. Dreibuss and G. S. Chiles. 1,902,806; Mar. 21.
Truck bolster, Reenforced. H. C. Dreibuss and G. S. Chiles. 1,902,807; Mar. 21.
Truck side frame. H. C. Dreibuss and G. S. Chiles. 1,902,805; Mar. 21.
Tube: *See*—
X-ray tube.
Tube cap, Collapsible. V. E. and L. J. Gasser. 1,902,698; Mar. 21.
Tube protector. P. Kilimnik. 1,902,082; Mar. 21.
Tubes, Apparatus for extracting. D. F. Mitchell. 1,902,571; Mar. 21.

Tubes of celluloid and the like, Forming. S. A. Neidich. 1,902,578; Mar. 21.
Tubing cutter. L. Day and W. van Ee. 1,902,355; Mar. 21.
Tubing hanger. J. H. Howard. 1,902,075; Mar. 21.
Tufting mechanism. C. Kadlec. 1,902,704; Mar. 21.
Type cleaning instrument. B. E. Gerlach (neé Parker) and H. Gerlach. 1,902,024; Mar. 21.
Umbrella. E. Cornic. 1,902,395; Mar. 21.
Umbrella, Telescopic. H. Haupt. 1,902,363; Mar. 21.
Umbrella, Telescopic. H. Haupt. 1,902,774; Mar. 21.
Upper main bearing, Deep well leakproof and sandproof. A. R. Wels. 1,902,431; Mar. 21.
Vacuum cleaner. C. Kühnel and K. Korittke. 1,902,561; Mar. 21.
Vacuum cleaning device. F. Wielats. 1,902,534; Mar. 21.
Valve: *See*—
Balanced valve.
Check valve.
Filter valve.
Nonreturn valve.
Relief valve.
Rotary valve.
Valve construction. H. H. Haller. 1,902,069; Mar. 21.
Valve mechanism. A. J. Dotterweich. 1,902,624; Mar. 21.
Valve seat tool. F. O. Albertson. 1,902,207; Mar. 21.
Vapor discharge device. M. Urich. 1,902,110; Mar. 21.
Vehicle body door stiffener. A. G. Herreshoff. 1,902,499; Mar. 21.
Vehicle with radio equipment, Automotive. J. W. Hobbs. 1,902,802; Mar. 21.
Vending and change making machine, Combined. L. J. Robb. 1,902,467; Mar. 21.
Vending machine. C. W. Blossom and W. H. Staples. 1,902,612; Mar. 21.
Veneer, Method of and apparatus for making flexible. I. Horine. 1,902,032; Mar. 21.
Vessels, Annealing. R. Stresau. 1,902,146; Mar. 21.
Vibration sensitive system. F. Rieber. 1,902,184; Mar. 21.
Vibrations, System for receiving and recording. F. Rieber. 1,902,183; Mar. 21.
Viscose, Manufacture of. O. Schmid. 1,902,102; Mar. 21.
Voltage limiting system. E. Peterson. 1,901,929; Mar. 21.
Voltage regulating apparatus. H. Grob. 1,902,554; Mar. 21.
Wafer dosing, filling, and sealing machine. G. Willmann. 1,902,272; Mar. 21.
Waist band construction. R. C. Castlen. 1,902,116; Mar. 21.
Wall structure. H. S. Warner. 1,902,271; Mar. 21.
Washer: *See*—
Lock washer.
Washers, Apparatus for making lock. A. Stoll. 1,902,269; Mar. 21.
Washing apparatus. G. J. Meyer. 1,902,253; Mar. 21.
Washing machine. F. A. Hansen. 1,902,165; Mar. 21.
Washing machine. E. S. Stoddard. 1,902,193; Mar. 21.
Water from dredged material, Apparatus for separating. D. Verstoep. 1,902,739; Mar. 21.
Water heater. W. M. Hills. 1,902,365; Mar. 21.
Water in oil emulsions, Breaking. P. Kaplan. 1,902,129; Mar. 21.
Water, Method of and apparatus for economizing feed. M. P. Shields. 1,902,732; Mar. 21.
Water tube boiler. L. E. Connelly. 1,901,899; Mar. 21.
Water with radium emanation, Device for impregnating drinking. A. H. Tyrer. 1,902,200; Mar. 21.
Weir structure. T. I. Gilbert. 1,901,956; Mar. 21.
Welding apparatus. J. A. Seede. 1,902,469; Mar. 21.
Well control device. C. C. Brown. 1,902,540; Mar. 21.
Well drilling rotary. H. G. Johnston. 1,902,242; Mar. 21.
Wheel ramp. L. L. Coomber. 1,902,218; Mar. 21.
Wind indicator for airplane landing fields. F. M. Czapiewski. 1,902,763; Mar. 21.
Wind protection for railway systems, Side. F. Kruckenberg and C. Stedefeld. 1,902,783; Mar. 21.
Winding device for the manufacturing of boxes, for instance the outer casings of push boxes and similar articles. B. A. E. Johnson. 1,902,033; Mar. 21.
Window frame construction. F. F. Beil. 1,902,209; Mar. 21.
Window protection, Casement. W. F. Moss. 1,902,385; Mar. 21.
Windows, Operating mechanism for. F. X. Ripp. 1,902,266; Mar. 21.
Windrowing machine. L. C. Badgley. 1,901,889; Mar. 21.
Windshield cleaner device for airplanes. S. A. Morehouse. 1,902,254; Mar. 21.
Wiper, Knife. H. A. Burt. 1,902,434; Mar. 21.
Wiper, Windshield. P. F. Bessy. 1,902,610; Mar. 21.
Wiping mechanism for matrix composing and line casting machines. C. A. Albrecht. 1,902,432; Mar. 21.
Wire making process. C. Dantsizen. 1,902,493; Mar. 21.
Wire, Method and apparatus for drawing. S. McMullan. 1,901,920; Mar. 21.
Wire stylus and feeding same. F. L. Capps. 1,902,057; Mar. 21.
Wood graining, Imitating. G. A. Rose. 1,902,522; Mar. 21.
Wringer. J. L. Perkins. 1,902,579; Mar. 21.
Wringer. J. L. Perkins and H. D. Croft. 1,902,580; Mar. 21.
Wringer, Mop. M. Cesario. 1,902,688; Mar. 21.
X-ray, Apparatus for and method of localizing and measuring by. C. R. Johnson. 1,902,558; Mar. 21.
X-ray installation. A. Bouwers. 1,901,865; Mar. 21.
X-ray tube. W. Hofmann. 1,902,502; Mar. 21.
Yarn, Apparatus for the multiple or multi-color dyeing of hanks of. F. and C. Faigle. 1,902,358; Mar. 21.
Zinc coated article. S. H. Davis, C. O. Anderson, W. N. Smith, and H. R. Hanley. 1,902,621; Mar. 21.

CLASSIFICATION OF PATENTS

ISSUED MARCH 21, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

2— 21: 1,902,426
67: 1,902,190
70: 1,902,268
83: 1,902,634
174: 1,902,441
185: 1,902,080
187: 1,901,987
237: 1,902,116
4— 67: 1,902,758
5— 73: 1,902,249
164: 1,902,619
356: 1,902,000
8— 5: 1,902,450
13: 1,902,226
1,902,777
1,902,778
19: 1,902,042
1,902,356
9— 17: 1,901,906
20: 1,901,859
10— 73: 1,902,269
101: 1,902,117
12— 2: 1,902,162
23: 1,902,399
117: 1,902,251
128.2: 1,902,120
146: 1,902,725
13— 23: 1,902,668
15— 1: 1,902,344
15: 1,902,211
97: 1,902,024
156: 1,902,861
158: 1,902,534
167: 1,901,866
176: 1,902,410
226: 1,902,766
253: 1,902,610
264: 1,902,668
16— 24: 1,902,166
45: 1,902,726
98: 1,902,772
162: 1,901,984
18— 2: 1,902,336
12: 1,902,295
47: 1,902,627
47.5: 1,901,984
50: 1,902,006
1,902,115
1,902,379
1,902,398
1,902,405
56: 1,902,573
19— 56: 1,902,674
74: 1,902,675
20— 2: 1,902,309
6: 1,902,716
11: 1,902,209
27: 1,902,544
1,902,545
40.5: 1,902,264
92: 1,902,280
22— 65: 1,902,301
126: 1,902,559
188: 1,902,419
189: 1,902,059
1,902,092
204: 1,902,349
23— 2: 1,902,160
7: 1,901,894
50: 1,902,204
53: 1,902,735
56: 1,901,989
91: 1,902,395
119: 1,902,649
125: 1,901,925
160: 1,901,875
165: 1,902,648
202: 1,902,208
212: 1,901,895
218: 1,902,801
223: 1,902,144
233: 1,902,630
24— 71: 1,902,535
77: 1,902,557
87: 1,902,153
129: 1,902,459
24— 152: 1,902,308
1,902,447
153: R. 18,770
205: 1,902,416
1,902,417
25— 24: 1,902,047
41: 1,902,528
108: 1,901,923
26— 46: 1,902,420
29— 17: 1,902,034
26: 1,902,179
53: 1,902,754
69: 1,902,355
84: 1,902,551
88.2: 1,902,571
1,902,711
155.5: 1,901,955
1,902,310
157.3: 1,902,779
159.2: 1,902,666
159.3: 1,902,222
1,902,226
1,902,234
181: 1,902,621
33— 71: 1,901,880
99: 1,902,270
134: 1,901,962
174: 1,902,180
211: 1,902,357
223: 1,902,497
34— 24: 1,902,575
39: 1,902,334
30: 1,902,637
35— 2: 1,902,404
12: 1,902,672

Bait, Artificial. Enterprise Manufacturing Company. 302,121; Mar. 28; Serial No. 332,996; published Jan. 17, 1933.
Game, Board. Parker Brothers, Inc. 302,122; Mar. 28; Serial No. 333,009; published Jan. 17, 1933.
Games. S. Siessinger. 302,132; Mar. 28; Serial No. 332,423; published Jan. 17, 1933.
Toys. S. Siessinger. 302,131; Mar. 28; Serial No. 332,424; published Jan. 17, 1933.

CLASS 23

Couplings for shafts, Flexible. American Flexible Coupling Co. 302,152; Mar. 28.
Machines and parts thereof for grinding, mixing, and conveying coffee, etc. Jabez Burns & Sons, Inc. 302,157; Mar. 28.

CLASS 29

Polishing, dusting, and/or cleaning cloth. Ames Harris Neville Co. 302,159; Mar. 28.
Rubbing, squeegeeing, and polishing devices. Windowitch Company. 302,098; Mar. 28; Serial No. 331,812; published Jan. 17, 1933.

CLASS 34

Burners, humidifiers, and heat savers, Oil. Real-Oil-Heat Burner Company. 302,059; Mar. 28; Serial. No. 318,170; published Jan. 17, 1933.
Heating and ventilating apparatus and certain named apparatus relating thereto. Griscom-Russell Company. 92,421; renewed July 8, 1933.
Lampshades. M. Frankel. 302,092; Mar. 28; Serial No. 330,595; published Jan. 17, 1933.

CLASS 35

Tubes for tires, Inner. General Tire & Rubber Company. 302,167; Mar. 28.

CLASS 39

Coats, dresses, suits, etc. Hahn Department Stores, Inc. 302,058; Mar. 28; Serial No. 317,935; published Jan. 12, 1932.
Hosiery. Roman Stripe Mills, Inc. 302,153; Mar. 28.
Undergarments, Infants'. William Carter Company. 302,161; Mar. 28.

CLASS 42

Bedspreads. Stevens Manufacturing Corporation. 302,096; Mar. 28; Serial No. 331,567; published Jan. 10, 1933.
Cotton goods. Davison-Paxon Company. 302,089; Mar. 28; Serial No. 329,889; published Jan. 3, 1933.
Cotton piece goods. Nashua Manufacturing Company. 302,085; Mar. 28; Serial No. 327,661; published Jan. 10, 1933.
Crepes in the piece, Silk. William Skinner & Sons. 302,106; Mar. 28; Serial No. 332,201; published Jan. 10, 1933.
Fabric of wool, cotton, etc., Knitted. William Carter Company. 302,160; Mar. 28.
Napkins, Table. Neisler Mills Inc. 302,099; Mar. 28; Serial No. 332,099; published Jan. 3, 1933.
Nets, towels, etc. Hair and sport. S. H. Kress & Co. 302,087; Mar. 28; Serial No. 329,087; published Jan. 10, 1933.
Textile fabrics. Lorraine Manufacturing Co. 302,097; Mar. 28; Serial No. 331,796; published Jan. 10, 1933.

CLASS 43

Thread. W. Warren Thread Works. 302,086; Mar. 28; Serial Nos. 332,674–6; published Jan. 17, 1933.
Thread and yarn. Clarke Thread Company. 302,102; Mar. 28; Serial No. 332,177; published Jan. 3, 1933.
Thread and yarn. Clark Thread Company. 302,103–4; Mar. 28; Serial Nos. 332,179–80; published Jan. 3, 1933.
Yarns. Steinberger Bros. Inc. 302,101; Mar. 28; Serial No. 332,129; published Jan. 10, 1933.

CLASS 44

Dental wire. Julius Aderer. Inc. 302,064–6; Mar. 28; Serial Nos. 332,674–6; published Jan. 17, 1933.
Sanitary napkins. Berkeley Company. 302,079; Mar. 28; Serial No. 331,916; published Jan. 17, 1933.
Vibrators and hairdryers. Electric. A. C. Gilbert Company. 302,126; Mar. 28; Serial No. 330,368; published Jan. 17, 1933.

CLASS 45

Beverages, and sirups and extracts for making the same, Maltless. G. F. Schneider. 302,147; Mar. 28.
Beverages, and syrups and extracts for making the same, Maltless. Seminole Bottling Co. 302,148; Mar. 28.

CLASS 46

Butter and cheese. Frederick F. Lowenfeld & Son. 302,164; Mar. 28.
Cake. Ward Baking Company. 302,054; Mar. 28; Serial No. 326,876; published Jan. 10, 1933.
Candies and chocolates. New Yorker Hotel Corporation. 302,061; Mar. 28; Serial No. 322,289; published Jan. 10, 1933.
Candy. Coffee, popcorn, tea, etc. Kresge Department Store Corporation. 302,094; Mar. 28; Serial No. 331,434; published Jan. 10, 1933.
Canned fish. Italian Food Products Company. 302,108; Mar. 28; Serial No. 332,540; published Jan. 10, 1933.
Canned tomato paste and tomatoes and canned sardines. A. J. Capone Company. 302,062; Mar. 28; Serial No. 321,905; published Jan. 10, 1933.
Conch chowder and/or broth. Bahama Isles Foods Corporation. 302,095; Mar. 28; Serial No. 331,532; published Jan. 10, 1933.
Extracts and malt syrups, Malt. Malt-Diastase Company. 302,055; Mar. 28; Serial No. 331,532; published June 14, 1932.
Flour, Prepared biscuit. Maury-Cole Company. 302,112; Mar. 28; Serial No. 332,622; published Jan. 10, 1933.
Foods. A. Sander Packing Company. 93,119; renewed Aug. 19, 1933.
Foods, Bird and fish. W. M. Gabler. 302,149; Mar. 28.
Fruits and vegetables, Fresh. H. Osborne. 302,109; Mar. 28; Serial No. 332,544; published Jan. 10, 1933.
Fruits, Fresh citrus. Highland Orange Association. 302,056; Mar. 28; Serial No. 310, 563; published May 26, 1931.
Fruits, Fresh citrus. Riley & Jones. 302,163; Mar. 28.
Grapes, Fresh. F. G. Cary. 302,057; Mar. 28; Serial No. 311,720; published Jan. 10, 1933.
Gum, Chewing. J. L. Hitchcock. 302,162; Mar. 28.
Pretzels, potato chips, noodles, and cheese sticks. Noss Pretzel and Cone Co. 302,154; Mar. 28.
Rice. Standard Rice Company, Inc. 302,100; Mar. 28; Serial No. 332,103; published Jan. 10, 1933.
Salad dressings and table syrups. L. Duffy. 302,110; Mar. 28; Serial No. 332,578; published Jan. 10, 1933.
Syrup, Concentrated liquid malt. Bachrach-Feld Company. 302,105; Mar. 28; Serial No. 332,244; published Jan. 10, 1933.
Syrup, Malt. La Crosse Refining Company. 302,088; Mar. 28; Serial No. 329,603; published Jan. 10, 1933.

CLASS 47

Wine, Port. Geo. G. Sandeman Sons & Co. Limited. 302,143; Mar. 28; Serial 331,707; published Jan. 17, 1933.
Wine, Sherry. Geo. G. Sandeman Sons & Co. Limited. 302,144; Mar. 28; Serial No. 331,703; published Jan. 17, 1933.

CLASS 48

Malt beverages. K B Beverage Company. 302,119–20; Mar. 28; Serial Nos. 332,886–7; published Jan. 17, 1933.

CLASS 49

Drinks, Mixed. John E. Cassidy & Son. 86,215; renewed Apr. 9, 1931.
Whisky. R. L. Crigler. 302,178; Mar. 28; Serial No. 332,875; published Jan. 17, 1933.

Whisky. Glenfyne Distillery Company Limited. 302,138–40; Mar. 28; Serial Nos. 331,784–6; published Jan. 17, 1933.
Whisky. Glenfyne Distillery Company Limited. 302,141; Mar. 28; Serial No. 331,788; published Jan. 17, 1933.
Whisky. Glenfyne Distillery Company Limited. 302,142; Mar. 28; Serial No. 331,782; published Jan. 17, 1933.
Whisky. White Horse Distillers, Limited. 302,116–17; Mar. 28; Serial Nos. 332,473–4; published Jan. 17, 1933.
Whisky, Scotch. Distillers Agency Limited. 302,146; Mar. 28; Serial No. 330,454; published Jan. 17, 1933.
Whisky, Scotch. John Harvey & Sons, Limited. 302,145; Mar. 28; Serial No. 331,552; published Jan. 17, 1933.

CLASS 50

Bottle closure and sediment trap, Combination. N. J. Leavy. 302,171; Mar. 28.
Mats, electrotypes, etc. A. B. Collins. 302,093; Mar. 28; Serial No. 331,039; published Jan. 17, 1933.
Trees, Artificial. Bloomingdale Bros., Inc. 302,090; Mar. 28; Serial No. 330,361; published Jan. 17, 1933.

LIST OF LABELS

Favorite Feeds. For Turkey Feeds. Page Milling Company. 41,873; Mar. 28.
Maltese Cross. For Bevel Siding. Seattle Cedar Lumber Manufacturing Company. 41,874; Mar. 28.
Pur Pos. For Tooth Powder. C. T. Hayward. 41,872; Mar. 28.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 28TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A C Spark Plug Company. (See Hans, Edmund E., assignor.)
A C Spark Plug Company. (See Zubaty, Joseph, assignor.)
Abbott, Harry W., Chicago, Ill. Centrifugal filtering device. 1,902,982; Mar. 28.
Acker, George H., assignor to The Cleveland Worm and Gear Company, Cleveland, Ohio. Gear casing. 1,902,934; Mar. 28.
Acme Steel Company. (See MacChesney, Chester M., assignor.)
Adams, Soren S., Asbury Park, N. J. Novelty toy. 1,903,082; Mar. 28.
Adler, Marcus, Chicago, and J. C. Janosik, Cicero, Ill. Combination vest and suspenders. 1,902,939; Mar. 28.
Adler, Stella, and C. B. Blank, St. Louis, Mo. Marionette control frame and cord wind-up. 1,902,983; Mar. 28.
Advance Machine Company. (See Richardson, M. H., and Gebert, assignors.)
Affel, Herman A., Ridgewood, and E. I. Green, East Orange, N. J., assignors to American Telephone and Telegraph Company. Communication with moving trains. 1,902,817; Mar. 28.
Ahrens, Harry E., Pasadena, Calif. Hinge construction. 1,903,251; Mar. 28.
Aktiebolaget Svenska Fläktfabriken. (See Olsson, J. G., and Stenfors, assignors.)
Aktiengesellschaft Brown, Boveri & Cie. (See Jonas, Julius, assignor.)
Aktiengesellschaft Brown, Boveri and Cie. (See Leonpacher, Josef, assignor.)
Alemite Corporation. (See Becker, Julius H., assignor.)
Alemite Corporation. (See Snodgrass, John L., assignor.)
Alemite Corporation. (See Thomas, George F., assignor.)
Allen, Howard G. (See Bliss, H. R., and Allen.)
Almen, John O., Royal Oak, assignor to General Motors Research Corporation, Detroit, Mich. Hydraulic mechanism. 1,903,083; Mar. 28.
Althouse, Arthur B., Drexel Hill, Pa. Vacuum controlled switch for starting motors. 1,902,940; Mar. 28.
American Engineering Company. (See Hummel, Willard A., assignor.)
American Glanzstoff Corporation. (See Oppenlaender, O. O., and Carter, assignors.)
American Manganese Steel Company. (See Meyer, Daniel H., assignor.)
American Ore Reclamation Company. (See Shallock, Edward W., assignor.)
American Ore Reclamation Company. (See Swinehart, George E., assignor.)
American Sheet and Tin Plate Company. (See Goodhue, Archie R., assignor.)
American Steel Foundries. (See Bender, Frederic H., assignor.)
American Steel Foundries. (See Lamont, J. A., and Lorenz, assignors.)
American Steel Foundries. (See Oelkers, Alfred H., assignor.)
American Telephone and Telegraph Company. (See Affel, H. A., and Green, assignors.)
American Telephone and Telegraph Company. (See Potter, Ralph K., assignor.)
Anderson, Carl E., East Orange, assignor to Eastern Tool & Mfg. Co., Bloomfield, N. J. Slide. 1,902,935; Mar. 28.
Anderson, Oliver H., Superior, Ariz., assignor to Safeway Auto License System, Inc. License plate. 1,903,155; Mar. 28.
Anderson, Samuel M., Sharon, assignor to B. F. Sturtevant Company, Boston, Mass. Air conditioning control. 1,902,818; Mar. 28.
Anderson, William T., jr., assignor to Hanovia Chemical and Manufacturing Company, Newark, N. J. Electrode for vapor gas electric devices. 1,902,936; Mar. 28.
Arato, Achille, Turin, Italy. Brake control for vehicle wheels. 1,902,819; Mar. 28.
Arden, Harry B., New York, N. Y. Automatic electromagnetic wet separation. 1,902,937; Mar. 28.
Arden, Harry B., New York, N. Y. Automatic electromagnetic wet separation. 1,902,938; Mar. 28.
Armitage, Joseph B. (See Kearney, E. J., and Armitage.)
Armstrong, Sir W. G., Whitworth Aircraft Limited. (See Lloyd, John, assignor.)
Arndt, Raymond A. (See Mers, O. H., Arndt, and Lange.)
Arth, Isidor, assignor to Isidor Arth & Son, Oakland, Calif. Pistol holster. 1,903,084; Mar. 28.
Arth, Isidor, & Son. (See Arth, Isidor, assignor.)
Asbury, Dorsey F., Broomes Island, Md. Radio apparatus. 1,903,156; Mar. 28.
Asbury, Dorsey F., Broomes Island, Md. Variable condenser. 1,903,157; Mar. 28.
Asbury, Dorsey F., Broomes Island, Md. Exhaust valve stem shield. 1,903,158; Mar. 28.
Asbury, Dorsey F., Broomes Island, Md. Internal combustion engine. 1,903,159; Mar. 28.
Asbury, Dorsey F., Broomes Island, Md. Internal combustion engine structure. 1,903,160; Mar. 28.
Associated Electric Laboratories, Inc. (See Wicks, J., Richardson, and Bellamy, assignors.)
Astrawerke Aktiengesellschaft. (See Greve, John E. W., assignor.)
Atwood, George D., assignor to Decorated Metal Manufacturing Company, Inc., Brooklyn, N. Y. Stock box for typewriter ribbons. Des. 89,547; Mar. 28.
Austin, Dwight E., P. R. Bissell, and E. W. Crutchfield, Los Angeles, Calif. Chair. 1,903,253; Mar. 28.
Automatic Recording Safe Company. (See Grunwald, Albert C., assignor.)
Babcock & Wilcox Company, The. (See Kerr, H. J., and Ebbets, assignors.)
Bailey, Walter C., Norwalk, Conn. Rotary bit. 1,902,941; Mar. 28.
Bailey, William M., Lynn, Mass., assignor, by mesne assignments, to General Electric Company. Capacitor. 1,902 877; Mar. 28.
Baji, John, New York, N. Y. Refuse disposal truck. 1,902,985; Mar. 28.
Baker, Walter J., Wyckoff, N. J. Electric fluid heater. 1,902,877; Mar. 28.
Ball, George P., Allentown, Pa. Automobile lift. 1,902,820; Mar. 28.
Bancroft, Erwin P., Brooklyn, assignor to International Communications Laboratories, Inc., New York, N. Y. Keyboard transmitter. 1,902,943; Mar. 28.
Banks, Harry P. (See Ellertsen, L. W., Cone, Davidson, Laucks, and Banks.)
Barber, Joseph L., Greeley, Colo. Adjustable mask for photoprinting machines. 1,902,984; Mar. 28.
Barkan, Irving, Philadelphia, Pa. Toothbrush. 1,903,161; Mar. 28.
Barker, Maurice E., Edgewood Arsenal, Md. Producing activated charcoal from charcoal fines. 1,902,986; Mar. 28.
Barnes, Wilfred, jr., Glenolden, Pa. Hose rack. 1,903,085; Mar. 28.
Barrett Company, The. (See Long, Leonard F., assignor.)
Barvoets, Ernest F. (See Lynch, J. J., and Barvoets.)
Bassett, Gerald L., assignor to The Conklin Penn Company, Toledo, Ohio. Plunger type pen. 1,903,022; Mar. 28.
Bates, George H., Cranford Township, Union County, N. J., assignor to United Dry Docks, Incorporated, New York, N. Y. Apparatus for riveting plates of ships. 1,902,821; Mar. 28.
Baur, Ottmar, Stuttgart, and H. Lempp, Feilbach, assignors to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Shaft coupling. 1,903,162; Mar. 28.
Becker, Julius H., San Francisco, Calif., assignor to Alemite Company, Chicago, Ill. Grease dispensing device. 1,902,822; Mar. 28.
Bell, Frank H., assignor to General Motors Corporation, Detroit, Mich. Safety glass sealing instrument. 1,902,987; Mar. 28.
Bellamy, John I. (See Wicks, J., Richardson, and Bellamy.)
Bender, Frederic H., assignor to American Steel Foundries, Chicago, Ill. Truck frame mounting. 1,902,823; Mar. 28.
Benjamin Electric Mfg. Co. (See Benjamin, Reuben B., assignor.)
Benjamin Electric Manufacturing Company. (See Benjamin, R. B., and Waterbury, assignors.)
Benjamin, Reuben B., Chicago, Ill., assignor to Benjamin Electric Mfg. Co., Des Plaines, Ill. Shock absorbing socket. 1,903,086; Mar. 28.
Benjamin, Reuben B., and J. H. Waterbury, Chicago, assignors to Benjamin Electric Manufacturing Company, Des Plaines, Ill. Lighting construction. 1,903,087; Mar. 28.
Bennett, William E. (See Wullert, W. W., and Bennett.)
Bernier, Henry, et al. (See Dufault, Homer D., assignor.)
Bernier, Hiram, et al. (See Dufault, Homer D., assignor.)
Bessom, Earl A., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-seat fitting machine. 1,902,824; Mar. 28.
Bickell, Charles H. (See Sparks, Stanley W., assignor.)
Bienenstein, Andreas, assignor to The Conklin Pen Company, Toledo, Ohio. Plunger type pen. 1,902,809; Mar. 28.

Bienenstein, Andreas, assignor to The Conklin Pen Company, Toledo, Ohio. Plunger type pen. 1,902,810; Mar. 28.

Bienenstein, Andreas, assignor to The Conklin Pen Company, Toledo, Ohio. Plunger type pen. 1,902,811; Mar. 28.

Bigelow-Sanford Carpet Co. (See Petersen, Elliott I., assignor.)

Birdsey, Charles R., Oak Park, assignor to The United States Gypsum Company, Chicago, Ill. Ceiling construction. 1,902,835; Mar. 28.

Bishop, Alois S., Kohler, Wis. Basket ball game. 1,903,254; Mar. 28.

Bissell, Percy R. (See Austin, D. E., Bissell, and Crutchfield.)

Black, Edward R., assignor to Black Systems, Inc., Chicago, Ill. Building covering. 1,903,023; Mar. 28.

Black Systems, Inc. (See Black, Edward R., assignor.)

Blackburn, Jasper, Webster Groves, Mo. Guy strand guard and lock. 1,902,945; Mar. 28.

Blackmore, Lloyd, assignor to General Motors Corporation, Detroit, Mich. Axle housing and making the same. 1,903,088; Mar. 28.

Blank, Cora B. (See Adler, S., and Blank.)

Bliss, H. R., Company. (See Bliss, H. R., and Allen, assignors.)

Bliss, Herbert R., and H. G. Allen, assignors to H. R. Bliss Company, Inc., Niagara Falls, N. Y. Stitching machine anvil. 1,902,825; Mar. 28.

Bobo, Henry S., Greenfield, Ohio. Storage and dispensing device for screen wire and the like. 1,902,826; Mar. 28.

Boehner, Georg. (See Honold, E., and Boehner.)

Boeing Airplane Company. (See Hughes, Edwin A., assignor.)

Bolens, Harry W., Port Washington, Wis. Hydraulic jack. 1,902,827; Mar. 28.

Bosch, Robert, Aktiengesellschaft. (See Baur, O., and Lempp, assignors.)

Botsford, Warren U., Moline, assignor to Rock Island Mfg. Co., Rock Island, Ill. Vise display stand. 1,903,163; Mar. 28.

Bott, George R., Stamford, Conn. Shaving machine. 1,902,988; Mar. 28.

Bottom, William G., Tulsa, Okla. Well bore angle detector and recorder. 1,902,828; Mar. 28.

Boucher, Adam, et al. (See Dufault, Homer D., assignor.)

Bouvier, Harold K., La Grange, assignor to Temple Corporation, Chicago, Ill. Loud speaker. 1,903,164; Mar. 28.

Bowman, Jesse R., Newburyport, Mass. Floor construction. 1,902,829; Mar. 28.

Bradford, William W., Clarendon, Va. Undergarment or similar article of manufacture. Des. 89,548; Mar. 28.

Bray, Stuart E., U. S. Navy. Angle multisector. 1,902,989; Mar. 28.

Breck, Spencer, Shaker Heights, Ohio. Coin bank. Des. 89,549; Mar. 28.

Breed, Maurice E., St. Louis, Mo. Safety cableless multiple elevators. 1,902,946; Mar. 28.

Brinton, H., Company. (See Levin, Nathan, assignor.)

Brinton, H., Company. (See Sanders, Joseph J., assignor.)

Brock, William M., East Windsor, Ontario, Canada. Suspension hanger. 1,903,024; Mar. 28.

Brown, Charles H. (See Steur, J. B., and Brown.)

Brown Instrument Company, The. (See Harrison, Thomas R., assignor.)

Brown, Roy W., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Instrument for controlling temperatures. 1,903,165; Mar. 28.

Browne, James H., East Liverpool, Ohio. Tire repair vulcanizer. 1,903,025; Mar. 28.

Browning, George, Wilmette, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Automatically timed apparatus for heat treatment. 1,903,089; Mar. 28.

Bryant, David Y., Sarnia, Ontario, Canada. Mill for pulverizing and the like. 1,903,166; Mar. 28.

Buckley, Leo J., Binghamton, N. Y. Combination table. 1,903,026; Mar. 28.

Bull Dog Electric Products Company. (See Messing, Joseph, assignor.)

Bulova, Arde, assignor to Bulova Watch Company, New York, N. Y. Seal for gems. 1,902,830; Mar. 28.

Bulova Watch Company. (See Bulova, Arde, assignor.)

Burke, James P., Newark, N. J., assignor of twenty per cent to J. MacIntosh, Norristown, Pa., twenty per cent to K. W. Macksey, and ten per cent to S. I. Howell, Montclair, N. J. Internal combustion engine. 1,902,831; Mar. 28.

Burnett, Richard W., Chicago, Ill. Mounting railway car hand brakes. 1,902,812; Mar. 28.

Busch, Frank E. L., Erie, Pa. Antiknock fuel. 1,903,255; Mar. 28.

Butler, William H., Monrovia, Calif. Collapsible camp table and cover structure. 1,903,209; Mar. 28.

Caldwell, Paul, Quincy, assignor to Moorman Manufacturing Company, Chicago, Ill. Mineral feed. 1,902,832; Mar. 28.

Campbell, Leon J., Buchanan, Mich., assignor to Hand's Constant Mesh Transmission Company, Chicago, Ill. Clutch mechanism. 1,902,990; Mar. 28.

Capdet, Henri, Toulouse, France. Apparatus for forming sine tracks. 1,903,027; Mar. 28.

Cardon, Henry, Hillsdale, N. J. Shell lamp. 1,902,991; Mar. 28.

Carey, Philip, Manufacturing Company, The. (See Fischer, Albert C., assignor.)

Carlson, Ralph G., assignor to Crane Co., Chicago, Ill. Externally suspended gland stud. 1,903,028; Mar. 28.

Carpenter, E. W., Manufacturing Company, The. (See Carpenter, E. W., La Reau, and Kellogg, assignors.)

Carpenter, Edward W., Fairfield, C. La Reau, Bridgeport, and H. M. Kellogg, Stratford, assignor to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn. Shade holder. 1,902,947; Mar. 28.

Carpenter, Thomas E. (See West, F. R., and Carpenter.)

Carrier Engineering Corporation. (See Carrier, Willis H., assignor.)

Carrier, Willis H., Essex Fells, assignor to Carrier Engineering Corporation, Newark, N. J. Sealing and thrust balancing means. 1,903,210; Mar. 28.

Carter, Ralph H. (See Oppenlaender, O. O., and Carter.)

Castle, A. M., & Co. (See Castle, Alfred C., assignor.)

Castle, Alfred C., Lake Forest, Ill., assignor to A. M. Castle & Co. Welding electrode. 1,902,948; Mar. 28.

Catarau, Jules W., Seattle, Wash. Artificial bait. 1,903,256; Mar. 28.

Church, William H., Buffalo, assignor to Du Pont Rayon Company, New York, N. Y. Treating textile threads. 1,902,833; Mar. 28.

Chase, Theron P. (See Ramsaur, W. R., and Chase.)

Chicago Flexible Shaft Company. (See Browning, George, assignor.)

Chicago Telephone Supply Company. (See Schellenger, Newton C., assignor.)

Chittum, Elbert C., Catonsville, Md. Display card. 1,902,992; Mar. 28.

Chong, Jue L. (See Miller, T. S., and Chong, L. L., J. L., and S. L.)

Chong, Look L. (See Miller, T. S., and Chong, L. L., J. L., and S. L.)

Chong, Sam L. (See Miller, T. S., and Chong, L. L., J. L., and S. L.)

Christian, David A., assignor to Siemens Brothers & Company Limited, London, England. Electromagnetic switch. 1,903,211; Mar. 28.

Clark, Theodore E., Redford, assignor to General Motors Corporation, Detroit, Mich. Measuring devices. 1,903,090; Mar. 28.

Cleveland Cloth Mill Company. (See Craig, William P., assignor.)

Cleveland Worm and Gear Company, The. (See Acker, George H., assignor.)

Cohen-Venezian, Carlo, Turin, Italy. Tail-supporting truck for aeroplanes. 1,902,834; Mar. 28.

Colman, Howard D. (See Stewart, Duncan J., assignor.)

Colman, Howard D., and D. J. Stewart, Rockford, Ill.; said Stewart assignor to said Colman. Electric valve operator. 1,903,229; Mar. 28.

Colman, Howard D., and D. J. Stewart, Rockford, Ill.; said Stewart assignor to said Colman. Electric control unit. 1,903,231; Mar. 28.

Colonial Trust Company, The, et al. (See Summey, David L.)

Condon, Joseph P., Omaha, Nebr. Combined window guard and screen. 1,902,949; Mar. 28.

Cone, Charles N. (See Eilersten, L. W., Cone, Davidson Laucks, and Banks.)

Conklin Pen Company, The. (See Bassett, Gerald L., assignor.)

Conklin Pen Company, The. (See Bienenstein, Andreas, assignor.)

Convertible Door Mfg. Co. (See Merz, O. H., Arndt, and Lange, assignors.)

Cooper, William L., Kankakee, Ill. Cook stove. 1,903,091 Mar. 28.

Cordrey, Almon J., Detroit, Mich., assignor to Zero Ice Corporation. Pressure vessel for solid carbon dioxide. 1,903,167; Mar. 28.

Cordrey, Almon J., Detroit, Mich., assignor to Zero Ice Corporation. Pressure vessel for solid carbon dioxide. 1,903,168; Mar. 28.

Cordrey, Almon J., Detroit, Mich., assignor to Zero Ice Corporation. Insulated container for solid carbon dioxide. 1,903,169; Mar. 28.

Cordrey, Almon J., Detroit, Mich., assignor to Zero Ice Corporation. Solid CO_2 refrigerating system. 1,903,170; Mar. 28.

Cordrey, Almon J., Detroit, Mich., assignor to Zero Ice Corporation. Solid CO_2 receptacle. 1,903,171; Mar. 28.

Corn Products Refining Company. (See Sherman, Robert F., assignor.)

Cory, Russell G., Montclair, and W. M. Cory, Mahwah, N. J. Industrial elevator arrangement. 1,903,092; Mar. 28.

Cory, Walter M. (See Cory, Russell G., and W. M.)

Couch, Elsie C., guardian. (See McMinn, C. R., Robinson, and Holliday.)

Craig, William P., assignor of one-half to Cleveland Cloth Mill Company, Shelby, N. C. Timing device for loom stop mechanism. 1,902,837; Mar. 28.

Crane Co. (See Carlson, Ralph G., assignor.)

Crickmer, Charles S., assignor to The Gulberson Corporation, Dallas, Tex. Oil saver. 1,903,093; Mar. 28.

Crompton, George, jr., New York, N. Y. Aeroplane. 1,902,813; Mar. 28.

Crowther, Frederick K., New Malden, England. Recording of sounds. 1,902,814; Mar. 28.

Crutchfield, Edward W. (See Austin, D. E., Bissell, and Crutchfield.)

Cunningham, Orin D., assignor to P. C. Reilly, Indianapolis, Ind. Ore flotation and flotation reagent. 1,902,838; Mar. 28.

Cunningham, Orin D., assignor to P. C. Reilly, Indianapolis, Ind. Froth flotation and material employed to effect the same. 1,902,839; Mar. 28.

Dahl, Charles, Fernwood, Idaho. Shears. 1,903,257; Mar. 28.

Daily, Roy, assignor to Webster Electric Company, Racine, Wis. Combined reproducing and recording device. 1,902,950; Mar. 28.

Damsel, William B., assignor to Victaulic Company of America, New York, N. Y. Pipe coupling. 1,903,029; Mar. 28.

Darrah, William A., Chicago, Ill. Furnace equipment. 1,902,951; Mar. 28.

Darrow, Marius S., St. Louis, Mo., and L. S. Sweeney, Granite City, Ill. Treating Petroleum oils. 1,903,094; Mar. 28.

Davidson, Glenn. (See Eilertsen, L. W., Cone, Davidson, Laucks, and Banks.)

Davis, Alex B., Cincinnati, Ohio, assignor to Monsanto Chemical Works, St. Louis, Mo. Manufacture and purification of paranitraniline. 1,903,030; Mar. 28.

Davis, Clarence R., assignor to Davis Tool & Engineering Company, Detroit, Mich. Automobile license plate holder. 1,903,258; Mar. 28.

Davis Tool & Engineering Company. (See Davis, Clarence R., assignor.)

Decorated Metal Manufacturing Company. (See Atwood, George D., assignor.)

Desmond, John J., Hubbard Woods, Ill., assignor to Line Material Company, South Milwaukee, Wis. Gang operated switch. 1,903,095; Mar. 28.

Deutsch, Leonhard, Vienna, Austria. Coupling device for for keyboards. 1,902,840; Mar. 28.

Deutsche Telephonwerke and Kabelindustrie Aktiengesellschaft. (See Hochfeld, Arno, assignor.)

Devers, Sidney W. (See Ferrari, A., and Devers.)

Dickhauser, Ewald. (See Kränzlein, G., Dickhäuser, and Voss.)

Dodge, Milton L. (See Jordan, Hugh, A., assignor.)

Dodge, Milton L., Newburyport, Mass. Counter stiffener. 1,903,031; Mar. 28.

Doering, Ulrich. (See Spanner, H. J., and Doering.)

Doherty Research Company. (See Nevins, Charles A., assignor.)

Dow, John R., assignor to Interstate Bakeries Corporation, Kansas City, Mo. Display package. 1,903,096; Mar. 28.

Dravo Contracting Company, The. (See Kersting, Bernard H., assignor.)

Dufault, Homer D., assignor of one-sixth to A. Fugere, one-sixth to E. Fugere, one-sixth to A. Boucher, one-sixth to H. Bernier, and one-sixth to H. Bernier, Easthampton, Mass. Burner. 1,903,032; Mar. 28.

Dunford, Ray E., and E. W. F. McMillan, Everett, Wash. Weeder. 1,903,097; Mar. 28.

Dupois, Lucien G., and G. Tinel, assignors to Union d'Electricite, Paris, France. Protecting device for electric distributing systems. 1,903,033; Mar. 28.

Du Pont Rayon Company. (See Church, William H., assignor.)

Duro Metal Products Company. (See McNaught, N. F., and Peterson, assignors.)

Easter, George C., assignor, by mesne assignments, to The Vulcan Steel Products Company, Baltimore, Md. Forming nut bar for the manufacture of grip nuts and apparatus for performing the same. 1,902,841; Mar. 28.

Eastern Tool & Mfg. Co. (See Anderson, Carl E., assignor.)

Eaton, Milton, Shawinigan Falls, Quebec, Canada. Apparatus for regulating electric steam generators. 1,902,842; Mar. 28.

Ebbets, George D. (See Kerr, H. J., and Ebbets.)

Ecker, Will J., jr., St. Louis, Mo. Card holder. 1,903,098; Mar. 28.

Egan, Arthur L. (See Ewing, S. E., and Egan.)

Eilertsen, Leo W., C. N. Cone, G. Davidson, I. F. Laucks, and H. P. Banks, assignors to I. F. Laucks Inc., Seattle, Wash. Preparing soya bean protein containing material for the manufacture of an adhesive, and the product thereof. 1,903,172; Mar. 28.

Electrons, Inc. (See Spanner, H. J., and Doering, assignors.)

Ellerbeck, William L., Salt Lake City, Utah. Forming cellular products. 1,902,993; Mar. 28.

Elliott, Clarence E., and L. O. Nichols, Kansas City, assignors to Knapp Monarch Company, Inc., St. Louis, Mo. Fruit juice extractor. Re18,778; Mar. 28.

Erhard, Antonette. (See Erhard, John W. and A.)

Erhard, John W. and A., New York, N. Y. Container closure. 1,903,099; Mar. 28.

Esterling, William M., Long Beach, assignor of forty-five per cent to R. S. Hay, and ten per cent to R. E. Spencer, San Pedro, Calif. Oil burner. 1,903,100; Mar. 28.

Eurit, Carl, Tulsa, Okla. Straight lift beam hanger for oil well pumping rigs. 1,903,034; Mar. 28.

Euth, John E., assignor to United Autographic Register Co., Chicago, Ill. Tear-off device. 1,903,173; Mar. 28.

Ewing, Sydney E. T., and A. L. Egan, Johannesburg, Transvaal, Union of South Africa. Retarding device for machinery. 1,903,035; Mar. 28.

Fairbanks, E. and T., and Company. (See Hadley, Harlan A., assignor.)

Faley, Garnet, administratrix. (See Faley, Lloyd T.)

Faley, Lloyd T., deceased, Hermosa Beach; Garnet Faley, administratrix, assignor of one-half to A. F. Larrabee, Los Angeles, Calif. Sanding-in armature brushes for generators, motors, motor-generators, or starters and the like. 1,903,101; Mar. 28.

Farley, Francis S., Trenton, N. J., assignor to D. M. Sutherland, jr., Morrisville, Pa. Fiber board manufacture and apparatus therefor. 1,903,102; Mar. 28.

Faux, William T., Santa Barbara, Calif. Oil can. 1,902,994; Mar. 28.

Ferguson, James W., Marion, Ill. Film developer and dryer. 1,903,174; Mar. 28.

Ferrari, Albert, Drexel Hill, and S. W. Devers, Philadelphia, Pa. Bathing suit. 1,902,843; Mar. 28.

Fink, Louis, et al. (See Williams, Armand A., assignor.)

Fire stone Battery Company. (See Lewis, Robert H., assignor.)

Firestone Tire & Rubber Company. (See Brown, Roy W., assignor.)

Firestone Tire & Rubber Company, The. (See Stevens Horace D., assignor.)

Fischer, Albert C., Chicago, Ill., assignor to The Philip Carey Manufacturing Company. Combined expansion and contraction joint. 1,902,944; Mar. 28.

Fischesser, Alfred, Frankfort-on-the-Main-Fechenheim, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Dyeing animal fibers. 1,903,175; Mar. 28.

Fiset, Alphonse, Cambridge, Mass. Abrading, polishing, or like surfacing tool. 1,902,844; Mar. 28.

Fisher, Fred D., assignor to Scientific Brake Service Laboratories, Inc., Chicago, Ill. Advertising device. 1,903,103; Mar. 28.

Fiskin, Leslie D., Darrouzett, Tex. Vehicle dump. 1,903,176; Mar. 28.

Flynn, Paul B., St. Louis, Mo. Jump-training device. 1,902,995; Mar. 28.

Fortuna, Francesco, and S. Giannangelo, Niagara Falls, N. Y. Container. 1,903,104; Mar. 28.

Francis, Charles B., Pittsburgh, Pa. Carbon combustion furnace. 1,903,036; Mar. 28.

Fraver, Ivan N., West Reading, Pa. Car heating, cooling, and ventilating means. 1,903,037; Mar. 28.

Freedman, Jennie, New York, N. Y. Shoulder strap retainer. 1,903,259; Mar. 28.

Fretter, Nathan F., Cleveland Heights, Ohio. Wick carrying means. 1,903,260; Mar. 28.

Friden, Carl M. F., Oakland, assignor to Marchant Calculating Machine Company, Emeryville, Calif. Calculating machine. 1,903,105; Mar. 28.

Frost, George S., Baldwin, assignor to New York Pie Baking Co., New York, N. Y. Pie package. 1,903,212; Mar. 28.

Fruehauf Trailer Company. (See Reid, Frederick M., assignor.)

Fugere, Alderic, et al. (See Dufault, Homer D., assignor.)

Fugere, Euclide, et al. (See Default, Homer D., assignor.)

Fujii, Tokutaro, Asabu Ku, Toyko, assignor to Eijiro Yumamoto, Tokyo, Japan. Felt rubber roller. 1,903,038; Mar. 28.

Gallagher, Arthur D. (See Graham, W. S., and Gallagher.)

Gebert, Albert E. (See Richardson, M. H., and Gebert.)

Gebruder, Brehmer. (See Kleinschmit, Oscar, assignor.)

Gebruder, Brehmer. (See Kleinschmit, O., and Müller, assignor.)

General Aniline Works, Inc. (See Fischesser, Alfred, assignor.)

General Aniline Works, Inc. (See Honold, E., and Boehner, assignors.)

General Aniline Works, Inc. (See Kunz, M. A., and Koeverle, assignors.)

General Aniline Works, Inc. (See Nawiasky, P., and Mueller, assignors.)

General Aniline Works, Inc. (See Zahn, Karl, assignor.)

General Electric Company. (See Bailey, William M., assignor.)

General Motors Corporation. (See Bell, Frank H., assignor.)

General Motors Corporation. (See Blackmore, Lloyd, assignor.)

General Motors Corporation. (See Clark, Theodore, E., assignor.)

General Motors Corporation. (See Humer, Frank, assignor.)

General Motors Corporation. (See McCuen, Charles L., assignor.)

General Motors Corporation. (See Phillips, William M., assignor.)

General Motors Corporation. (See Platt, Harry A., assignor.)

General Motors Corporation. (See Seaholm, E. W., and Parker, assignors.)

General Motors Corporation. (See Sterling, Claude H., assignor.)

General Motors Corporation. (See Thomson, Bernard, assignor.)

General Motors Corporation. (See Warren, E. F., and Schwarze, assignors.)
General Motors Research Corporation. (See Almen, John O., assignor.)
General Motors Research Corporation. (See Godley, Charles E., assignor.)
General Motors Research Corporation. (See Ramsaur, W. R., and Chase, assignors.)
General Motors Research Corporation. (See Wolf, Harry R., assignor.)
General Motors Research Corporation. (See Woolman, Nelson E., assignor.)
General Steel Castings Corporation. (See Lentz, W. L., and Pflager, assignors.)
General Steel Castings Corporation. (See Sheehan, W. M., and McGilvray, assignors.)
Gerard, Paul, Laurel, Mont. Valve actuating mechanism for internal combustion engines. 1,902,996; Mar. 28.
Giannangelo, Sabatino. (See Fortuna, F., and Giannangelo.)
Gianoli, Marcel L., Paris, France. Device for interlocking two movements. 1,903,039; Mar. 28.
Giesey, Russell, Oklahoma City, Okla., assignor to Reed Roller Bit Company, Houston, Tex. Deep well drill. 1,903,232; Mar. 28.
Gilbert, Archie V., Spokane, Wash. Slug casting machine. 1,902,847; Mar. 28.
Gilchrist & Company. (See Graham, Walton C., assignor.)
Gille, George W., assignor to Service Station Equipment Company, Bryan, Ohio. Apparatus for supplying air under pressure. 1,903,233; Mar. 28.
Gillies, William R., assignor to Union Asbestos & Rubber Company, Chicago, Ill. Waterproof heat insulating tape. 1,903,106; Mar. 28.
Gleason, William J., Houston, Tex. Parachute. 1,903,213; Mar. 28.
Gleason Works. (See Head, Ernest C., assignor.)
Goch, Joseph, Amsterdam, N. Y. Beam and mounting frame for Axminster looms. 1,903,040; Mar. 28.
Godley, Charles E., Ypsilanti, assignor to General Motors Research Corporation, Detroit, Mich. Lens mounting. 1,902,997; Mar. 28.
Goings, Bilton B., Export, Pa. Table or shelf for a stove. 1,903,262; Mar. 28.
Goldberg, Isidor, assignor to Pilot Radio and Tube Corporation, New York, N. Y. Cabinet for radioreceivers. Des. 89,555; Mar. 28.
Golden, John H., assignor of one-half to C. M. Sewell, Porterville, Calif. Arch support. 1,902,952; Mar. 28.
Gonard, John L., Englewood Cliffs, N. J. Device for preventing retrograde movement of an automobile. 1,903,178; Mar. 28.
Goodhue, Archie R., Vandergrift, Pa., assignor to American Sheet and Tin Plate Company. Manufacture of steel sheets. 1,902,815; Mar. 28.
Goransson, Oscar F., Springfield, Mass. Anchoring device. 1,903,214; Mar. 28.
Gottlieb, Joseph, Jersey City, N. J. Combined clock case and lamp or similar article. Des. 89,556; Mar. 28.
Gouldbourn, Joseph, and G. Hazelton, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Covering breasts of heels. 1,902,848; Mar. 28.
Graham, Walton C., Denver, Colo., assignor to Gilchrist & Company. Purification of solutions. 1,903,215; Mar. 28.
Graham, William S., Canton, Ill., assignor to International Harvester Company. Plow attachment for tractors. 1,902,846; Mar. 28.
Graham, William S., and A. D. Gallagher, Canton, Ill., assignors to International Harvester Company. Tractor plow. 1,902,845; Mar. 28.
Grant, Gerald M. M., Los Angeles, Calif. Compression ring. 1,903,107; Mar. 28.
Gray, Charles B., Millbourne, Pa. Cutting machine. 1,903,234; Mar. 28.
Gredell, Otto N., Kansas City, assignor to Standard Steel Works, North Kansas City, Mo. Trailer truck tank construction. 1,902,849; Mar. 28.
Green, Estill I. (See Affel, H. A., and Green.)
Greene, John H., Philadelphia, Pa. Dental instrument. 1,902,850; Mar. 28.
Grettie, Donald P. (See Newton, R. C., and Grettie.)
Greve, John E. W., assignor to Astrawerke Aktiengesellschaft, Chemnitz, Germany. Calculating machine. 1,903,179; Mar. 28.
Griswold, Donald G., Los Angeles, Calif. Liquid displacement gas compressor. 1,903,108; Mar. 28.
Grunwald, Albert C., assignor to The Automatic Recording Safe Company, Chicago, Ill. Savings bank. 1,903,177; Mar. 28.
Guardian Trust Company, The. (See Peck, Frank G., assignor.)
Gulberson Corporation, The. (See Crickmer, Charles S., assignor.)
Gusmer, A., Inc. (See Rosenblueth, Emilio, assignor.)
H. O. G. Holding Corp. (See Harris, Leonard B., assignor.)
Hadley, Harlan A., St. Johnsbury, Vt., assignor to E. and T. Fairbanks and Company. Coin-controlled weighing machine. 1,903,110; Mar. 28.
Hall, Ralph E., and H. A. Jackson, Mount Lebanon, assignors to J. M. Hopwood, Dormont, Pa. Water treatment. 1,903,041; Mar. 28.
Hammer, Thorvald F., Branford, Conn. Boot hook. Des. 89,558; Mar. 28.
Hammerly, Herman J., New Britain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric switch. 1,903,180; Mar. 28.
Hammermill Paper Company. (See Johnsen, Bjarne, assignor.)
Hampton, Audrey L., Houston, Tex. Overshot. 1,902,851; Mar. 28.
Hampton, Audrey L., Houston, Tex. Spear. 1,903,109; Mar. 28.
Hand's Constant Mesh Transmission Company. (See Campbell, Leon J., assignor.)
Hanovia Chemical and Manufacturing Company. (See Anderson, William T., jr., assignor.)
Hans, Edmund E., Detroit, assignor to A C Spark Plug Company, Flint, Mich. Gauge. 1,902,998; Mar. 28.
Harper, Harry, Minneapolis, Minn. Coffee making machine. 1,903,111; Mar. 28.
Harris, Leonard B., assignor to H. O. G. Holding Corp., New York, N. Y. Oil gas generator. 1,903,042; Mar. 28.
Harrison, Thomas R., Wyncote, assignor to The Brown Instrument Company, Philadelphia, Pa. Meter mechanism. 1,902,852; Mar. 28.
Hartley, George C. (See Wright, E. P. G., and Hartley.)
Hay, Robert S., et al. (See Esterling, William M., assignor.)
Hazel, Eardley, New York, N. Y., assignor to Revere Rubber Company, Providence, R. I. Method and apparatus for the manufacture of filamentary material. 1,902,953; Mar. 28.
Hazleton, George. (See Gouldbourn, J., and Hazleton.)
Head, Ernest C., assignor to Glesson Works, Rochester, N. Y. Cutting gears. 1,903,043; Mar. 28.
Hennig, Fred, assignor to Pittsburgh Taximeter Company, Pittsburgh, Pa. Means to prevent detachment of speedometer or disconnection of its drive means. 1,902,853; Mar. 28.
Henriod, Charles E., Areuse, Switzerland. Power transmission mechanism. 1,903,044; Mar. 28.
Henroteau, François C. P., Ottawa, Ontario, Canada. Television. 1,903,112; Mar. 28.
Henroteau, François C. P., Ottawa, Ontario, Canada. Television. 1,903,113; Mar. 28.
Herman Nelson Corporation. (See Shurtleff, Wilfred, assignor.)
Herzberg, Wilhelm, Berlin-Wilmersdorf, and H. Lange, Berlin-Friedenau, Germany, assignors, by mesne assignments, to Winthrop Chemical Company, Inc., New York, N. Y. Manufacturing substituted secondary amines of the benzyl-anilid type. 1,902,854; Mar. 28.
Hewitt, William R., New York, N. Y. Piston. 1,903,216; Mar. 28.
Hickish, Robert S. (See Titmas, R. W., and Hickish.)
Hinlein, Milton J., Philadelphia, Pa. Veil. 1,902,957; Mar. 28.
Hochfeld, Arno, assignor to Deutsche Telephonwerke und Kabelindustrie Aktiengesellschaft, Berlin, Germany. Small variable potential electric motor. 1,902,954; Mar. 28.
Hodge, George O., assignor to Standard Steel and Bearings Incorporated, Plainville, Conn. Ball bearing. 1,903,217; Mar. 28.
Hodges, Lee W., assignor, by mesne assignments, to Lectrolite Corporation, Defiance, Ohio. Manufacturing an electric water heater. 1,903,045; Mar. 28.
Holliday, James B. (See McMinn, C. R., Robinson, and Holliday.)
Holmes, Henry S., Brooklyn, N. Y., assignor to Metropolitan Engineering Company. Welding apparatus. 1,902,955; Mar. 28.
Holroyd, John, & Company Limited. (See Walker, Harry, assignor.)
Honold, Ernst, Frankfort-on-the-Main-Fechenheim, and G. Borbner, Friedirchsfeld in Baden, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Making nitrogenous vat dyestuffs of the acridine series. 1,903,181; Mar. 28.
Hopwood, John M. (See Hall, R. E., and Jackson.)
Horton, Charles W., Miami, Fla. Door operating mechanism. 1,903,182; Mar. 28.
House, Edwin G. (See Pottenger, F. M., jr., and House.)
Howard, Merton W., Lynn, assignor to Pope Machinery Corporation, Haverhill, Mass. Heel concaving machine. 1,902,855; Mar. 28.
Howell, Sidney I. (See Burke, James P., assignor.)
Hughes, Edwin A., assignor to Boeing Airplane Company, Seattle, Wash. Metallic airfoil. 1,902,956; Mar. 28.
Hughes, Thomas C., Newcastle-upon-Tyne, assignor to Larmuth & Bulmer Limited, Manchester, England. Bobbin or spool winding machine. 1,903,261; Mar. 28.
Humer, Frank, assignor to General Motors Corporation, Detroit, Mich. Automobile body. 1,902,999; Mar. 28.
Hummel, Willard A., assignor to American Engineering Company, Philadelphia, Pa. Hoisting apparatus. 1,903,235; Mar. 28.
Hunter, Sherwood, Newlyn, Penzance, England. Plant or installation for extracting dust from minerals such as coal. 1,903,046; Mar. 28.
I. G. Farbenindustrie Aktiengesellschaft. (See Kränzlein, G. Dickhäuser, and Voss, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Paquin, Max, assignor.)

Ilgenfritz, Curtis B., York, assignor to United States Glass Company, Pittsburgh, Pa. Sugar bowl or similar article. Des. 89,561; Mar. 28.
Ilgenfritz, Curtis B., York, assignor to United States Glass Company, Pittsburgh, Pa. Tumbler or similar article. Des. 89,562; Mar. 28.
Impey, Francis L., Northfield, Birmingham, assignor to Morland & Impey Limited, Birmingham, England. Signal for use on commercial and other records. 1,903,047; Mar. 28.
Industrial Rubber Goods Company. (See Palenske, Frederick C., assignor.)
Ingraham, E., Company, The. (See Mansfield, Arthur L., assignor.)
Inocencio, Felipe, Glendora, Calif. Receptacle cover. Des. 89,544; Mar. 28.
International Communications Laboratories, Inc. (See Bancroft, Erwin P., assignor.)
International Harvester Company. (See Graham, William S., assignor.)
International Harvester Company. (See Graham, W. S., and Gallagher, assignors.)
International Harvester Company. (See Pinson, James H., assignor.)
International Harvester Company. (See Robinson, Charles W., assignor.)
International Harvester Company. (See Wamhoff, W. E., and Thompson, assignors.)
International Standard Electric Corporation. (See Wright, E. P. G., and Hartley, assignors.)
Interstate Bakeries Corporation. (See Dow, John R., assignor.)
Jackson, Henry A. (See Hall, R. E., and Jackson.)
Jackson, Ray P., Berkeley, Calif., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,902,958; Mar. 28.
Jackson, Victor H., Metuchen, N. J., assignor to New York Stock Exchange, New York, N. Y. Carrier for pneumatic dispatch systems. 1,902,856; Mar. 28.
Jahncke, Evelyn, New Orleans, La. Ladies' hand-bag. Des. 89,545; Mar. 28.
Jamieson, Charles C., Jacksonville, Fla. Pulverizer. 1,902,857; Mar. 28.
Jannopoulo, Achilles E., Webster Groves, Md. Fastener. 1,903,000; Mar. 28.
Janosik, Joseph C. (See Adler, M., and Janosik.)
Jenkins, Charles F., Washington, D. C., assignor to Jenkins Laboratories, Inc., Silver, Spring, Md. Synchronizing system. Re18,783; Mar. 28.
Jenkins Laboratories, Inc. (See Jenkins, Charles F., assignor.)
Jennings, O. D., & Company. (See Jennings, O. D., and Mihalek, assignors.)
Jennings, Ode D., Palatine, and E. Mihalek, assignors to O. D. Jennings & Company, Chicago, Ill. Coin controlled device. 1,903,048; Mar. 28.
Jessup, Stephen C., Salem, Ohio. Mower blade. 1,903,183; Mar. 28.
John, Ferdinand, Dusseldorf-Oberkassel, Germany. Rotary key clutch. 1,903,049; Mar. 28.
Johnsen, Bjarne, assignor to Hammermill Paper Company, Erie, Pa. Paper manufacture. 1,903,236; Mar. 28.
Johnson, Clarence G., Hartford City, Ind. Roller truck. 1,902,836; Mar. 28.
Johnson, Thomas J., Flint, Mich. Gaining head. 1,903,002; Mar. 28.
Johnston, Lemuel M., Parco, Wyo. Producing a carbonized fuel briquette. 1,903,237; Mar. 28.
Jonas, Julius, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Protective system. 1,903,001; Mar. 28.
Jordan, Hugh A., assignor to M. L. Dodge, Newburyport, Mass. Counter stiffener and forming it. 1,903,050; Mar. 28.
Jorgensen, Clarence H. (See Jorgensen, Peter J. and C. H.)
Jorgensen, Peter J. and C. H., Chicago, Ill. Thermostatic controlling device. 1,902,858; Mar. 28.
Joseph, Rudolph J., New York, N. Y. Fountain toothbrush. 1,902,859; Mar. 28.
Kay, William H., and E. McDaniel, St. Louis, Mo. Headlight. 1,902,860; Mar. 28.
Kearney, Edward J., and J. B. Armitage, Wauwatosa, assignors to Kearney & Trecker Corporation, West Allis, Wis. Machine tool. 1,903,114; Mar. 28.
Kearney & Trecker Corporation. (See Kearney, E. J., and Armitage, assignors.)
Kebler, Leonard, Bronxville, N. Y., assignor to Ward Leonard Electric Company. Resistance unit. 1,902,861; Mar. 28.
Keenan, John, Cincinnati, Ohio. Hair trimmer and dresser. Re18,781; Mar. 28.
Kellogg, Henry M. (See Carpenter, E. W., LaReau, and Kellogg.)
Keney, Victor, Woodside, N. Y. Combined eye and eyelash for dolls. 1,902,816; Mar. 28.
Kennedy, Homer R. (See Zens, J., and Kennedy.)
Kennedy, Homer R., Los Angeles, Calif. Wheel aligning gauge. 1,903,051; Mar. 28.
Kerlin, James R., Los Angeles, Calif. Wrench. 1,903,052; Mar. 28.
Kern, Albert L., Jackson, Mich. Conveying jack. 1,903,115; Mar. 28.
Kerr, Howard J., Westfield, and G. D. Ebbets, Kenilworth, assignors to The Babcock & Wilcox Company, Bayonne, N. J. Pressure drum. 1,902,862; Mar. 28.
Kersting, Bernard H., Ben Avon, Pa., assignor to The Dravo Contracting Company. Concrete bucket. 1,902,863; Mar. 28.
Keystone Stamping Corporation. (See Wohlhieter, Joseph W., assignor.)
Klein, Mathias, & Sons. (See Wotherspoon, Henry H., assignor.)
Kleinschmidt, Oscar, assignor to G. Brehmer. Leipzig-Plagwitz, Germany. Method of and mechanism for extracting interconnecting threads between stitched books. 1,902,864; Mar. 28.
Kleinschmit, Oscar, and Oskar Müller, assignors to Firm Gebruder Brehmer, Leipzig-Plagwitz, Germany. Method of and mechanism for mechanically extracting the interconnecting threads between stitched books. 1,903,184; Mar. 28.
Knapp Monarch Company. (See Elliott, C. E., and Nichols, assignors.)
Knight, Elias, San Francisco, Calif. Chain block. 1,903,218; Mar. 28.
Koch, Daniel S., and W. Newberry, St. Paul, Minn. Box for milk bottles and other articles. 1,903,266; Mar. 28.
Koeberle, Karl. (See Kunz, M. A., and Koeberle.)
Koester, John V., assignor to E. Morrison, Los Angeles, Calif. Drafting instrument. 1,902,865; Mar. 28.
Koschka, Killian, St. Paul, Minn. Amusement device. 1,903,116; Mar. 28.
Kränzlein, George, Frankfort-on-the-Main-Hochst, E. Dickhäuser, Gersthofen near Augsburg, and A. Voss, Frankfort-on-the-Main-Hochst, Germany, assignors to I. G. Farbenindustrie, Aktiengesellschaft, Frankfort-on-the-Main, Germany. Acetals of cyclic ketones with polyhydric alcohols and preparing the same. 1,902,866; Mar. 28.
Kruse, Wilhelm. (See Liesk, Erwin, and Kruse.)
Kuba, Franz, Vienna, Austria. Screw gear. 1,903,053; Mar. 28.
Kunz, Max A., Mannheim, and K. Koeberle, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Allo-MS-naphthodianthrones. 1,902,867; Mar. 28.
Kupfer, Reinhold. (See Semenitz, Christian, assignor.)
La Bour, Harry E., Chicago Heights, Ill. Packing gland. 1,902,960; Mar. 28.
La Bour, Harry E., Elkhart, Ind. Pumping system. 1,902,961; Mar. 28.
Ladd, Lester L., Lockport, Ill. Kiln. 1,903,117; Mar. 28.
Ladd, Lester L., Lockport, Ill. Kiln. 1,903,118; Mar. 28.
Ladd, Lester L., Lockport, Ill. Kiln furniture. 1,903,119; Mar. 28.
Lafferty, John F., Haddon Heights, N. J. Guard for truck chains. 1,903,120; Mar. 28.
Lake, Donald W., Chicago, Ill. Air heater. Re18,777; Mar. 28.
Lamont, John A., and F. A. Lorenz, jr., assignor to American Steel Foundries, Chicago, Ill. Cast steel bottom drop door. 1,902,868; Mar. 28.
Landis, Hugh G., Los Angeles, Calif. Electric heater. 1,903,219; Mar. 28.
Lange, Carl B. (See Merz, O. H. Arndt, and Lange.)
Lange, Hans. (See Herzberg, W., and Lange.)
La Reau, Charles. (See Carpenter, E. W., La Reau, and Kellogg.)
Larmuth & Bulmer Limited. (See Hughes, Thomas C., assignor.)
Larrabee, Arthur F. (See Faley, Lloyd T., assignor.)
Larson, Sven P., Berkeley, Calif. Roll and bun splitter. 1,903,238; Mar. 28.
Lathe, Fred A., Oakland, assignor to G. Moulin, San Francisco, Calif. Rotatable turret camera back for exposing light sensitive photographic plates. 1,902,869; Mar. 28.
Lathrop, Harry D. (See Paulson, Walter H., assignor.)
Laucks, I. F., Inc. (See Eilertsen, L. W., Cone, Davidson, Laucks, and Banks, assignors.)
Laucks, Irving F. (See Eilertsen, L. W., Cone, Davidson, Laucks, and Banks.)
Laurent, Torbern, assignor to Telefonaktiebolaget L. M. Ericsson, Stockholm, Sweden. Loading coil box. 1,903,054; Mar. 28.
Lectrolite Corporation. (See Hodges, Lee W., assignor.)
Lefland, Paul W., Arlington, Tex. Rear and parking view attachment. 1,903,239; Mar. 28.
Lemert, Louis J., Beverly, assignor to United States Pipe & Foundry Company, Burlington, N. J. Flange protector. 1,903,220; Mar. 28.
Lempp, Hermann. (See Baur, O., and Lempp.)
Lentz, William L., Tuckahoe, N. Y., and H. M. Pflager, St. Louis, Mo., assignors to General Steel Castings Corporation, Granite City, Ill. Locomotive structure. 1,902,962; Mar. 28.
Leonpacher, Josef, Munich, Germany, assignor to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. System of automatic control. 1,903,055; Mar. 28.
Lepage, François, and A. Martineau, Montreal, Quebec, Canada. Package opener. 1,902,963; Mar. 28.
Levin, Nathan, Trenton, N. J., assignor to H. Brinton Company, Philadelphia, Pa. Controlling means for knitting machines. 1,902,870; Mar. 28.
Lewis, Robert H., assignor to Firestone Battery Company, Akron, Ohio. Receptacle having a handle. 1,903,185; Mar. 28.

Liberty Lace and Netting Works. (See Moosherr, John, assignor.)
Liesk, Erwin, Berlin, and W. Kruse, Wilhelmshagen, near Berlin, assignors to C. Lorenz A. G., Berlin, Germany. Supervisory device for telegraph apparatus. 1,902,964; Mar. 28.
Line Material Company. (See Desmond, John J., assignor.)
Lloyd, John, assignor to Sir W. G. Armstrong Whitworth Aircraft Limited, Coventry, England. Landing gear for aircraft. 1,903,186; Mar. 28.
Lockhart, George R., Providence, assignor to Manville Jenckes Company, Pawtucket, R. I. Reenforced vulcanized rubber articles and making the same. 1,902,871; Mar. 28.
Long, Leonard F., Montreal, Quebec, Canada, assignor to The Barrett Company, New York, N. Y. Roofing. 1,902,872; Mar. 28.
Lorenz, C., A. G. (See Liesk, E., and Kruse, assignors.)
Lorenz, Frederick A., jr. (See Lamont, J. A., and Lorenz.)
Lussier, Alphonse L., Springfield, Mass. Dual wheel structure. 1,902,121; Mar. 28.
Lynch, James J., and E. F. Barvoets, assignors to J. B. Lyon Company, Albany, N. Y. Binder. 1,902,965; Mar. 28.
Lyon, J. B., Company. (See Lynch, J. J., and Barvoets, assignors.)
MacChesney, Chester M., assignor to Acme Steel Company, Chicago, Ill. Making expanded metal fences. 1,902,966; Mar. 28.
MacIntosh, James, et al. (See Burke, James P., assignor.)
MacKenzie, Philip, assignor of one-fourth to R. Mann, Oakland, and one-fourth to J. Mann, Berkeley, Calif. Automotive transmission. 1,903,221; Mar. 28.
Macksey, Kenneth W., et al. (See Burke, James P., assignor.)
Magnesium Development Corporation. (See Schreiber, Gustav, assignor.)
Mann, Joseph, et al. (See MacKenzie, Philip, assignor.)
Mann, Robert, et al. (See MacKenzie, Philip, assignor.)
Manning, Ralph F., Medford, Mass. Table ornament. Des. 89,546; Mar. 28.
Mansfield, Arthur L., assignor to The E. Ingraham Company, Bristol, Conn. Watch. 1,903,003; Mar. 28.
Manville Jenckes Company. (See Lockhart, George R., assignor.)
Marchant Calculating Machine Company. (See Friden, Carl M. F., assignor.)
Mariani, Paul, New York, N. Y. Shoe heel ornament. 1,903,004; Mar. 28.
Markel Electric Products, Inc. (See McFadden, Glenn E., assignor.)
Marone, Alfredo, Santa Vittoria d'Alba, Italy. Chain conveying apparatus. 1,902,873; Mar. 28.
Martin, John F., assignor to United American Bosch Corporation, Springfield, Mass. Dust protector device. 1,902,874; Mar. 28.
Martineau, Antoine. (See Lepage, F., and Martineau.)
Mason, Ralph R., Pittsburgh, Pa. Plot marker. 1,902,875; Mar. 28.
Mason, William H., assignor to Masonite Corporation, Laurel, Miss. Press. 1,903,222; Mar. 28.
Masonite Corporation. (See Mason, William H., assignor.)
Mattingly, Thomas B., Huntington Park, Calif. Closure operating device. 1,903,056; Mar. 28.
Mayer, Heinrich, assignor to Société Anonyme Adolphe Saurer, Arbon, Switzerland. Convertible vehicle top. 1,903,240; Mar. 28.
McCann, Michael, St. Albans, assignor to Frederick Osann Company, New York, N. Y. Blind stitch button sewing machine. 1,903,057; Mar. 28.
McClenahan, Francis M., Monmouth, Ill. Prepared silica and making same. 1,903,187; Mar. 28.
McCuen, Charles L., Lansing, assignor to General Motors Corporation, Detroit, Mich. Oil pump screen. 1,903,005; Mar. 28.
McDaniel, Eskel. (See Kay, W. H., and McDaniel.)
McEachern, Joseph H., assignor to Standard Oil Company of California, San Francisco, Calif. Tank truck emergency valve system and controller. 1,902,876; Mar. 28.
McFadden, Glenn E., assignor to Markel Electric Products, Inc., Buffalo, N. Y. Shade for an electric lamp. Des. 89,550; Mar. 28.
McGilvray, William S. (See Sheehan, W. M., and McGilvray.)
McIntosh, Roy E., New York, N. Y., asignor to J. Edward Ogden Company, Inc., East Orange, N. J. Expansion shield. 1,903,241; Mar. 28.
McKee, George K., Cincinnati, Ohio. Shock absorber. 1,903,006; Mar. 28.
McMillan, Eli W. F. (See Dunford, R. E., and McMillan.)
McMinn, Charles R., J. T. Robinson, and J. B. Holliday, incompetent, by E. C. Couch, guardian, Los Angeles, Calif., assignors, by mesne assignments, to The Simplex Piston Ring Company of America, Inc. Antislap ring. Re18,776; Mar. 28.
McNaught, Norris F., and E. H. Peterson, assignors to Duro Metal Products Company, Chicago, Ill. Ratchet wrench. 1,902,878; Mar. 28.
McNaught, Norris F., and E. H. Peterson, assignors to Duro Metal Products Company, Chicago, Ill. Applying brake shoe linings. 1,903,058; Mar. 28.
McNish, Alexander F., assignor of one-half to J. Moncrieff Limited, Perth, Scotland. Circulating glass in gathering basins. 1,903,223; Mar. 28.
McPhail, Harold R., assignor to Norge Corporation, Detroit, Mich. Float valve structure. 1,902,967; Mar. 28.
Mead-Morrison Manufacturing Company. (See Snow, Frederick O., jr., assignor.)
Meininghaus, Ewald, Lancaster, N. Y. Hinge. 1,903,059; Mar. 28.
Mellor, James F., El Dorado, Ark. Earth boring apparatus. 1,902,968; Mar. 28.
Merz, Otto H., West Allis, R. A. Arndt, Wauwatosa, and C. B. Lange, Racine, assignors to Convertible Door Mfg. Co., West Allis, Wis. Knockdown assemblage. 1,903,122; Mar. 28.
Messing, Joseph., assignor to Bull Dog Electric Products Company, Detroit, Mich. Fuse blocks. Des. 18,779; Mar. 28.
Metropolitan Engineering Company. (See Holmes, Henry S., assignor.)
Meyer, Daniel H., Wilmington, assignor to American Manganese Steel Company, Chicago, Ill. Dipper. 1,903,123; Mar. 28.
Michlik, Stephen, Brooklyn, and C. L. O'Reilly, New York, N. Y., assignors to Sanitary Automatic Candy Corporation. Vending machine sign illuminating mechanism. 1,903,008; Mar. 28.
Middelboe, Kristian, Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Packing machine for pulverulent material. 1,903,188; Mar. 28.
Mihalek, Emery. (See Jennings, O. D., and Mihalek.)
Miller, Charles F., Miami, Fla. Combined awning and shutter. 1,902,879; Mar. 28.
Miller Devices Inc. (See Miller, Philip M., assignor.)
Miller, Philip M., Cleveland, Ohio, assignor to Miller Devices Inc., New York, N. Y. Motor vehicle wheel. 1,903,189; Mar. 28.
Miller, Tony S., and L. L., J. L., and S. L. Chong, Isleton, Calif. Rotary ground working implement. 1,903,124; Mar. 28.
Mitchell, Orville, Dallas, Tex. Shaft mounting for rotatable cylinders. 1,903,060; Mar. 28.
Modine, Arthur B., assignor to Modine Manufacturing Company, Racine, Wis. Radiator. 1,902,880; Mar. 28.
Modine, Arthur B., assignor to Modine Manufacturing Company, Racine, Wis. Radiator. 1,903,125; Mar. 28.
Modine Manufacturing Company. (See Modine, Arthur B., assignor.)
Mohawk Carpet Mills, Inc. (See Underwood, Garfield J., assignor.)
Moncrieff, John, Limited. (See McNish, Alexander F., assignor.)
Monsanto Chemical Works. (See Davis, Alex B., assignor.)
Moorman Manufacturing Company. (See Caldwell, Paul, assignor.)
Moosherr, John, assignor to Liberty Lace and Netting Works, New York, N. Y. Lace. Des. 89,551; Mar. 28.
Morgan, Gerry A., Garden City, assignor to A. Schrader's Sons, Incorporated, Brooklyn, N. Y. Valve bending tool. 1,902,881; Mar. 28.
Morland & Impey Limited. (See Impey, Francis L., assignor.)
Morris, Carrie B., administratrix. (See Morris, John O.)
Morris, John O., deceased, by C. B. Morris, Washington, D. C., assignor, by mesne assignments, to Tobacco Stemming Corporation, Dover, Del. Tobacco leaf stemming and straightening machine. 1,902,882; Mar. 28.
Morrison, Eugene. (See Koester, John V., assignor.)
Moulin, Gabriel. (See Lathe, Fred A., assignor.)
Mueller Julius. (See Nawiasky, P., and Mueller.)
Musch, Frank, New York, N. Y. Weighing and delivery machine. 1,903,263; Mar. 28.
Myers, George F., New York, N. Y. Flying machine. 1,903,009; Mar. 28.
Myers, Robert P., assignor to Research Laboratories of National Dairy Products Corporation, Inc., Baltimore, Md., Unfermented acidophilus milk. 1,902,959; Mar. 28.
Myers, Robert P., assignor to Research Laboratories of National Dairy Products Corp. Inc., Baltimore, Md. Unfermented milk product. 1,903,014; Mar. 28.
National Aniline and Chemical Company. (See Zwilgmeyer, Frithjof, assignor.)
Nawiasky, Paul, Ludwigshafen-on-the-Rhine, and J. Mueller, Manheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Production of vat dyestuffs of the dibenzanthrone series. 1,902,883; Mar. 28.
Neldner, Stephen W., Milwaukee, Wis. Valve lock. 1,903,190; Mar. 28.
Nevins, Charles A., assignor to Doherty Research Company, New York, N. Y. Piston and wrist pin construction. 1,903,191; Mar. 28.
Newberry, Wayne. (See Koch, D. S., and Newberry.)
Newman, Ray W., Wagner, S. Dak. Inkstand. 1,903,061; Mar. 28.

Newton, Roy C., and D. P. Grettie, assignors to Swift and Company, Chicago, Ill. Antioxidant for fats and oils. 1,903,126; Mar. 28.
New York Pie Baking Co. (See Frost, George S., assignor.)
New York Stock Exchange. (See Jackson, Victor H., assignor.)
Nichols, Leonard O. (See Elliott, C. E., and Nichols.)
Nixon, Jeddy D., Houston, Tex. Drill. 1,902,885; Mar. 28.
Norge Corporation. (See McPhail, Harold R., assignor.)
Norton Company. (See Trefethen, Charles G., assignor.)
Nygaard, Oscar, Saugus, Mass. Furnace walls. 1,903,062; Mar. 28.
Odell, Benjamin F. J., Chicago, Ill. Prepared fuel and producing it. 1,902,886; Mar. 28.
Oehrl, Ernest A., Grand Rapids, Mich. Spring and mattress construction. 1,903,224; Mar. 28.
Oelkers, Alfred H., assignor to American Steel Foundries, Chicago, Ill. Antifriction wheel and axle construction. 1,902,910; Mar. 28.
Ogden, J. Edward, Company, Inc. (See McIntosh, Roy E., assignor.)
Olsson, Johan G., Lidington, and F. I. E. Stenfors, Alsten, assignors to Aktiebolaget Svenska Fläktfabriken, Stockholm, Sweden. Drying device for wood, brick, pottery, etc., provided with heat recovering devices. 1,903,063; Mar. 28.
Onstott, Jacob T., Yuba City, Calif. Connecting rod. 1,903,064; Mar. 28.
Oppenheim, René, assignor to Société Anonyme le Carbon, Gennevilliers, France. Carburetor. 1,902,887; Mar. 28.
Oppenlaender, Oscar O., Elizabethton, and R. H. Carter, Johnson City, Tenn., assignors to American Glanzstoff Corporation, New York, N. Y. Sealing means. 1,903,242; Mar. 28.
O'Reilly, Charles L. (See Michlik, S., and O'Reilly.)
O'Rourke, Lawrence, San Francisco, Calif. Insulating holder for Cooper-Hewitt tubes and inert gas tubes generally. 1,903,127; Mar. 28.
Osann, Frederick, Company. (See McCann, Michael, assignor.)
Ozlberger, Rudolf, Vienna, Austria. Alloy of nickel, silver, tin, and copper. 1,903,192; Mar. 28.
Packard, Charles A., Dallas, Tex. Recording lamp. 1,903,128; Mar. 28.
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Paget, Charles E., Huntsville, Ontario, Canada. Sectional door. 1,903,065; Mar. 28.
Palenske, Frederick C., assignor to Industrial Rubber Goods Company, St. Joseph, Mich. Rubber weatherstrip. 1,903,225; Mar. 28.
Palin, Fred C., Newton, Ind. Hoe, mulcher, and weed destroyer. 1,903,264; Mar. 28.
Paquette, Herman, Chicago, Ill. Frost eliminator for vehicles. 1,902,888; Mar. 28.
Paquin, Max, Konigstein-on-Taunus, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Urea condensation products and making them. 1,902,889; Mar. 28.
Parker, Guy E. (See Seaholm, E. W., and Parker.)
Parks, Walter, Denver, Colo. Feed water heater for locomotives. 1,902,969; Mar. 28.
Patent Button Company. (See Ross, Frederick N. assignor.)
Patent Button Co., The. (See Ross, F. N., and White, assignors.)
Paulson, Walter H., assignor to H. D. Lathrop, Chicago, Ill. Milk dumping device. 1,903,193; Mar. 28.
Pearson, Arthur D., Chicago, Ill. Pin-ball amusement game device. Des. 89,552; Mar. 28.
Peck, Elmer E., Long Beach, Calif. Steering mechanism for boats. 1,903,265; Mar. 28.
Peck, Frank G., New Haven, Conn., assignor, by mesne assignments, to The Guardian Trust Company, Cleveland, Ohio. Machine for making collapsed cartons. 1,903,243; Mar. 28.
Perkins Julian L., West Springfield, Mass. Wringer. 1,903,194; Mar. 28.
Perry, Harry L., Jamaica, N. Y. Multiple picture amusement device. 1,903,226; Mar. 28.
Petersen, Elliott I., Enfield, assignor to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn. Label. Re18,782; Mar. 28.
Peterson, Edward H. (See McNaught, N. F., and Peterson.)
Peterson, John W., Cairo, Ill. Cotter key. 1,903,129; Mar. 28.
Pezzella, Rocco, Washington, D. C. Hair curling device. 1,903,066; Mar. 28.
Pfeiffer, Richard O., Newark, N. J. Wall fixture. 1,902,890; Mar. 28.
Pflager, Harry M. (See Lentz, W. L., and Pflager.)
Phillips, William M., Birmingham, assignor to General Motors Corporation, Detroit, Mich. Chromium plating process. 1,903,130; Mar. 28.
Picco, John, New York, N. Y. Aerial advertising device. 1,903,131; Mar. 28.
Pilot Radio and Tube Corporation. (See Goldberg, Isidor, assignor.)
Pinson, James H., Richmond, Ind., assignor to International Harvester Company. Check row planter. 1,902,891; Mar. 28.
Pittsburgh Equitable Meter Company. (See Weymouth, Harry G., assignor.)
Pittsburgh Taximeter Company. (See Hennig, Fred, assignor.)
Platt, Harry A., assignor to General Motors Corporation, Detroit, Mich. Adjustable sun visor. 1,903,132; Mar. 28.
Polak, Holland R., St. Louis, Mo. Game. 1,903,133; Mar. 28.
Pope Machinery Corporation. (See Howard, Merton W., assignor.)
Pottenger, Francis M., jr., Monrovia, and E. G. House, Los Angeles, Calif. Bottle stopper and flask connecter. 1,902,892; Mar. 28.
Potter, Ralph K., New York, N. Y., assignor to American Telephone and Telegraph Company. Signaling system. 1,902,893; Mar. 28.
Radio Corporation of America. (See Willans, P. W., and Ward, assignors.)
Ramsaur, Walter R., Lockport, N. Y., and T. P. Chase, assignors to General Motors Research Corporation, Detroit, Mich. Oil cooler. 1,902,970; Mar. 28.
Ream, Arthur, Chicago, Ill. Automobile heating system. 1,903,134; Mar. 28.
Rechnitzer, Rudolf, Berlin, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Current sources. 1,902,894; Mar. 28.
Reed, Henry M., jr., Louisville, Ky., assignor to Standard Sanitary Manufacturing Company. Metallic baseboard element. 1,903,244; Mar. 28.
Reed Roller Bit Company. (See Giesey, Russell, assignor.)
Rees, Mackworth G., Detroit, Mich. Push button electric switch. 1,903,135; Mar. 28.
Reid, Frederick M., assignor to Fruehauf Trailer Company, Detroit, Mich. Radius rod and axle construction. 1,903,136; Mar. 28.
Reilly, Peter C. (See Cunningham, Orin D., assignor.)
Reiss, Louis P., Dallas, Tex. Air conditioning apparatus. 1,903,137; Mar. 28.
Remington Rand Inc. (See Wassell, Frank L., assignor.)
Research Laboratories of National Dairy Products Corporation. (See Myers, Robert P., assignor.)
Revere Rubber Company. (See Hazell, Eardley, assignor.)
Rheinische Kampfer-Fabrik Gesellschaft mit beschrankter Haftung. (See Schöllkopf, K., and Serini, assignors.)
Richardson, Myron H., Chicago, and A. E. Gebert, Wilmette, assignors to Advance Machine Company, Chicago, Ill. Vending machine. 1,903,067; Mar. 28.
Richardson, Rodney G. (See Wicks, J., Richardson, and Bellamy.)
Rippon, Francis F. C., New York, N. Y. Toy. 1,902,971; Mar. 28.
Roberts, Clark L., Nampa, Idaho. Automobile seat. 1,903,267; Mar. 28.
Roberts and Schaefer Company. (See Stump, Earl, assignor.)
Robinson, Charles W., Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Rod weeder shoe. 1,902,897; Mar. 28.
Robinson, Frederick A., assignor to S. L. Robinson, Boston, Mass. Oil burner. 1,903,195; Mar. 28.
Robinson, Henry H., assignor to Robinson Orifice Fitting Company, Los Angeles, Calif. Construction for orifice meter fittings. 1,903,068; Mar. 28.
Robinson, James T. (See McMinn, C. R., Robinson, and Holliday.)
Robinson Orifice Fitting Company. (See Robinson, Henry H., assignor.)
Robinson, Sarah L. (See Robinson, Frederick A., assignor.)
Rock Island Mfg. Co. (See Botsford, Warren U., assignor.)
Rockwell, Edward A., Chicago, Ill. Brake operating mechanism. 1,903,138; Mar. 28.
Rollason, Charles H., assignor to Wheeling Steel Corporation, Wheeling, W. Va. Head retainer for drums and the like. 1,903,010; Mar. 28.
Roos, Henry W., Cincinnati, Ohio. Apparatus for forming concrete floors. 1,902,898; Mar. 28.
Roos, Henry W., Cincinnati, Ohio. Apparatus for forming concrete floors. 1,902,899; Mar. 28.
Rosenblueth, Emilio, Mexico, Mexico. Closure for metallic barrels or containers. 1,903,012; Mar. 28.
Rosenblueth, Emilio, Mexico, Mexico, assignor, by mesne assignments, to A. Gusmer, Inc., Woodbridge, N. J. Closure for metal containers. 1,903,011; Mar. 28.
Rosenstein, Ludwig, assignor to Shell Development Company, San Francisco, Calif. Tertiary xanthate flotation process. 1,903,140; Mar. 28.
Ross, Arthur, Lynbrook, assignor to Warner Bros. Pictures, Inc., New York, N. Y. Electric circuit control. 1,903,069; Mar. 28.
Ross, Frederick N., Detroit, Mich., assignor to Patent Button Company, Waterbury, Conn. Machine and method for sewing buttons onto fabric or the like. 1,903,268; Mar. 28.
Ross, Frederick N., Detroit, Mich., and F. B. White, assignors to The Patent Button Co., Waterbury, Conn. Machine for attaching buttons. 1,903,269; Mar. 28.
Rouse, Warren E., assignor to The Waterbury Tool Company, Waterbury, Conn. Mooring and hoisting apparatus. 1,902,972; Mar. 28.
Ruben, Samuel, New Rochelle, N. Y. Electrical phonograph pick-up. 1,902,900; Mar. 28.

Ruska, Max O., Voerde near Hagen, Germany. Manufacture of blanks and similar articles with jumped heads. 1,908,245; Mar. 28.
Saar, Adolf H., jr., Omaha, Nebr. Time controlled switch. Re18,780; Mar. 28.
Safeway Auto License System, Inc. (See Anderson, Oliver H., assignor.)
Sahmel, Viggo, Forest Hills, assignor to F. L. Smidth & Co., New York, N. Y. Control system for rotary kilns and the like. 1,903,070; Mar. 28.
Salerni, Picro M., Westminster, England. Power transmission mechanism. 1,903,013; Mar. 28.
Sanders, Joseph J., assignor to H. Brinton Company, Philadelphia, Pa. Design wheel. 1,902,903; Mar. 28.
Sanders, Louis E., Sacramento, Calif. Steam condensing well. 1,903,246; Mar. 28.
Sandin, Jerome, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Combination fuse and current limiting resistor. 1,902,902; Mar. 28.
Sandoz, Rollen, The Dalles, Oreg. Wrench. 1,903,270; Mar. 28.
Sanitary Automatic Candy Corporation. (See Michlik, S., and O'Reilly, assignors.)
Schabelitz, William, Lucerne, Switzerland. Device for the electrothermic treatment of metals. 1,902,896; Mar. 28.
Schellenger, Newton C., assignor to Chicago Telephone Supply Company, Elkhart, Ind. Resistance strip and making same. 1,903,142; Mar. 28.
Schiavulli, Rudolph, Providence, R. I. Spring shackle. 1,903,271; Mar. 28.
Schoening, William A., Chicago, Ill. Window construction. 1,902,973; Mar. 28.
Schöllkopf, Karl, Dusseldorf-Oberkassel, and A. Serini, Dusseldorf-Heerdt, assignors to Rheinische Kampfer-Fabrik Gesellschaft mit beschrankter Haftung, Dusseldorf-Oberkassel, Germany. Preparing thymol. 1,902,904; Mar. 28.
Schönhöfer, Fritz. (See Schulemann, W., Schönhöfer, and Wingler.)
Schrader's, A., Sons, Incorporated. (See Morgan, Gerry A., assignor.)
Schrader's, A., Sons, Incorporated. (See Wahl, John, assignor.)
Schreiber, Gustav, Bitterfeld, Germany, assignor, by mesne assignments, to Magnesium Development Corporation. Working magnesium and high percentage magnesium alloys by rolling. 1,902,905; Mar. 28.
Schulemann, Werner, Vohwinkel near Elberfeld, F. Schönhöfer, and A. Wingler, Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Substituted amino quinolines and making the same. 1,903,196; Mar. 28.
Schwarze, Herman. (See Warren, E. F., and Schwarze.)
Schweizer, Jack, assignor to William Wilhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,553; Mar. 28.
Scientific Brake Service Laboratories, Inc. (See Fisher, Fred D., assignor.)
Scott, Allison F. H., Detroit, Mich., assignor to Woodall Industries Incorporated. Casket. 1,903,197; Mar. 28.
Scott, Allison F. H., Detroit, Mich., assignor to Woodall Industries Incorporated. Casket. 1,903,198; Mar. 28.
Seaholm, Ernest W., and G. E. Parker, assignors to General Motors Corporation, Detroit, Mich. Radiator. 1,903,141; Mar. 28.
Seamark, Louis M. C., Outer Down, Chagford, England. Casing head equipment. 1,902,906; Mar. 28.
Sementis, Christian, Berlin, Charlottenburg, assignor to Reinhold Kupfer, Berlin, Germany. Episcopic projector. 1,902,907; Mar. 28.
Sensow, Anton C., assignor to U. S. Slicing Machine Company, La Porte, Ind. Cushioning device for slicing machines. 1,902,908; Mar. 28.
Seric Products Company. (See Steerup, Godfrey, assignor.)
Serini, Arthur. (See Schöllkopf, K., and Serini.)
Service Station Equipment Company. (See Gille, George W., assignor.)
Sewell, Chester M. (See Golden, John H., assignor.)
Shallock, Edward W., assignor to American Ore Reclamation Company, Chicago, Ill. Sintering machine. 1,902,911; Mar. 28.
Sharp, William E., Chicago, Ill. Lock nut and process of making. 1,902,912; Mar. 28.
Sheehan, William M., St. Louis, Mo., and W. S. McGilvray, assignors to General Steel Castings Corporation, Granite City, Ill. Car truck. 1,902,974; Mar. 28.
Shell Development Company. (See Rosenstein, Ludwig, assignor.)
Sherman, Robert F., Pekin, Ill., assignor to Corn Products Refining Company, New York, N. Y. Manufacture of starch. Re18,775; Mar. 28.
Shurtleff, Wilfred, assignor to The Herman Nelson Corporation, Moline, Ill. Unit ventilator. 1,903,143; Mar. 28.
Siemens Brothers & Company Limited. (See Christian, David A., assignor.)
Sievern, Fredrick, McKeesport, Pa. Pliers. 1,902,913; Mar. 28.
Simon, Hans, assignor to G. Wagner, Hanover, Germany. Duplicating stencil. 1,902,914; Mar. 28.
Simplex Piston Ring Company of America, Inc., The. (See McMinn, C. R., Robinson, and Holliday, assignors.)
Simpson, Frank, Fort Worth, Tex. Photography light reflector. 1,903,071; Mar. 28.
Small, Alfred B., Miama, Fla. Automatic safety reverse motion lock. 1,903,199; Mar. 28.
Smidth, F. L., & Co. (See Middelboe, Kristian, assignor.)
Smidth, F. L., & Co. (See Sahmel, Viggo, assignor.)
Smith, Frederick J. C., assignor to Tenova Limited, London, England. Supporting means for trousers and the like. 1,902,895; Mar. 28.
Snodgrass, John L., assignor to Alemite Corporation, Chicago, Ill. Grease gun. 1,903,227; Mar. 28.
Snow, Frederick O., jr., Winchester, assignor to Mead-Morrison Manufacturing Company, East Boston, Mass. Reversing mechanism. 1,903,200; Mar. 28.
Société Anonyme Adolphe Saurer. (See Mayer, Heinrich, assignor.)
Société Anonyme le Carbone. (See Oppenheim, René, assignor.)
Spanner, Hans J., Berlin, Germany, and Ulrich Doering, New York, N. Y., assignors to Electrons, Inc. Rectifying tube. 1,903,144; Mar. 28.
Spanner, Hans J., Berlin, Germany, and Ulrich Doering, New York, N. Y., assignors to Electrons, Inc. Rectifying tube. 1,903,145; Mar. 28.
Sparks, Stanley W., Brooklyn, N. Y., assignor to C. H. Bickell, trustee. Method of and apparatus for making extruded seamless metal shapes. 1,902,975; Mar. 28.
Spence, Paulsen, Orange, N. J. Valve. 1,903,248; Mar. 28.
Spencer, Raymond E., et al. (See Esterling, William M., assignor.)
Spicer, Clarence W., Plainfield, and G. L. Tarbox, North Plainfield, N. J. Casing for universal joints. 1,902,976; Mar. 28.
Standard Mirror Company. (See Weir, James B., assignor.)
Standard Oil Company of California. (See McEachern, Joseph H., assignor.)
Standard Sanitary Manufacturing Company. (See Reed, Henry M., jr., assignor.)
Standard Steel and Bearings Incorporated. (See Hodge, George O., assignor.)
Standard Steel Works. (See Gredell, Otto N., assignor.)
Starkey, Lewis P., Fort Collins, Colo. Automatic vending machine. 1,902,915; Mar. 28.
Starr, Charles E., Omaha, Nebr. Thermal decomposition of natural gas. 1,903,247; Mar. 28.
Steerup, Godfrey, Maywood, assignor to Seric Products Company, Chicago, Ill. Electric heating pad and control therefor. 1,903,015; Mar. 28.
Stenfors, Frans I. E. (See Olsson, J. G., and Stenfors.)
Sterling, Claude H., Syracuse, N. Y., assignor to General Motors Corporation, Detroit, Mich. Rear axle carrier. 1,903,146; Mar. 28.
Sterrett, Robert, Ambridge, Pa. Limit stop. 1,903,072; Mar. 28.
Steur, Jacques B., and C. H. Brown, San Francisco, Calif. Sound modifying device. 1,903,201; Mar. 28.
Stevens, Horace D., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Collapsible tire-form. 1,903,202; Mar. 28.
Stevenson, Arthur, G., Rochester, N. Y. Combined pencil and lighter. 1,903,203; Mar. 28.
Stewart, Duncan J. (See Colman, H. D., and Stewart.)
Stewart, Duncan J., assignor to H. D. Colman, Rockford, Ill. Electric valve operator. 1,903,230; Mar. 28.
Strecker, Dr. Otto C., the Firm. (See Strecker, Otto H., assignor.)
Strecker, Otto H., assignor to the Firm Dr. Otto C. Strecker, Darmstadt, Germany. Decomposing plant fiber material by cooking with phenolates. 1,902,916; Mar. 28.
Ströher, Karl G., Rotherkirchen, Germany. Hair clamp for permanent hair waving. 1,903,249; Mar. 28.
Stubbins, Robert O. (See Watson, George V. E., and Stubbins.)
Stump, Earl, assignor to Roberts and Schaefer Company, Chicago, Ill. Classifying table. 1,902,917; Mar. 28.
Sturtevant, B. F., Company. (See Anderson, Samuel M., assignor.)
Sugarman, Miriam. (See Trompeter, David, assignor.)
Suhara, Toyotaro, Tokyo, Japan. Photographing device for high speed moving pictures. 1,903,204; Mar. 28.
Summey, David L., deceased, Waterbury, Conn., by The Colonial Trust Company and E. P. W. Summey, executors. Power control apparatus. 1,903,147; Mar. 28.
Summey, Richard P. W., et al, executor. (See Summey, David L.)
Sutherland, Daniel M., jr. (See Farley, Francis S., assignor.)
Sweeney, George K., et al. (See Williams, Armand A., assignor.)
Sweeney, Leo S. (See Darrow, M. S., and Sweeney.)
Swift and Company. (See Newton, R. C., and Grettie, assignors.)
Swinehart, George E., Buffalo, N. Y., assignor, by mesne assignments, to American Ore Reclamation Company, Chicago, Ill. Sintering machine. 1,902,918; Mar. 28.
Swisher, Samuel C., San Jose, Calif. Rope clamp. 1,903,148; Mar. 28.

Talbot, Frank A., Greenville, S. C. Coupling. 1,902,919; Mar. 28.
Tamagno, Peter, Natick, Mass. Mold for cast stone and using the same. 1,902,977; Mar. 28.
Tarbox, Gurdon L. (See Spicer, C. W., and Tarbox.)
Tebeau, Silas B., East Detroit, Mich. Toy animation picture device. 1,903,272; Mar. 28.
Tefft, Henry D., Chicago, Ill. Electrical stunning device. 1,902,901; Mar. 28.
Telefonaktiebolaget L. M. Ericsson. (See Laurent, Torbern, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Rechnitzer, Rudolf, assignor.)
Temple Corporation. (See Bouvier, Harold K., assignor.)
Tenney, Dwight, Montclair, N. J. Air conditioning apparatus. 1,903,250; Mar. 28.
Tenova Limited. (See Smith, Frederick J. C.)
Thomas, George F., Berwyn, assignor to Alemite Corporation, Chicago, Ill. Decarbonizing apparatus. 1,903,016; Mar. 28.
Thompson, William H. (See Wamhoff, W. F., and Thompson.)
Thomson, Bernard, Woldingham, England, assignor to General Motors Corporation, Detroit, Mich. Frictional gearing. 1,903,228; Mar. 28.
Thorssell, Carl T., Kassel, Germany. Production of soda and potassium hydroxide. 1,903,073; Mar. 28.
Tinel, Georges. (See Dupuis, L. G., and Tinel.)
Titmas Company. (See Titmas, R. W., and Hickish, assignors.)
Titmas, Reginald W., London, England, and R. S. Hickish, La Ceiba, Spanish Honduras, assignors to Titmas Company, Inc., New Orleans, La. Burner for liquid or semi-liquid fuel. 1,902,920; Mar. 28.
Tobacco Stemming Corporation. (See Morris, John O., assignor.)
Trefethen, Charles G., assignor to Norton Company, Worcester, Mass. Cam grinding apparatus. 1,903,149; Mar. 28.
Trompter, David, Amityville, N. Y., assignor to Miriam Sugarman, Baldwin, Long Island, N. Y. Nozzle. 1,903,139; Mar. 28.
Trumbull Electric Manufacturing Company, The. (See Hammerly, Herman J., assignor.)
Tyden, Emil, Hastings, Mich. Pendant sprinkler system. 1,903,150; Mar. 28.
Underwood, Garfield, J., assignor to Mohawk Carpet Mill, Inc., Amsterdam, N. Y. Making pile fabrics. 1,902,921; Mar. 28.
Union Asbestos & Rubber Company. (See Gillies, William R., assignor.)
Union d'Electricite. (See Tinel, Georges, and Dupuis, assignors.)
United American Bosch Corporation. (See Martin, John F., assignor.)
United Autographic Register Co. (See Euth, John E., assignor.)
United Dry Docks, Incorporated. (See Bates, George H., assignor.)
United Shoe Machinery Corporation. (See Bessom, Earl A., assignor.)
United Shoe Machinery Corporation. (See Gouldbourn, J., and Hazelton, assignors.)
United States Glass Company. (See Ilgenfritz, Curtis B., assignor.)
United States Gypsum Company, The. (See Birdsey, Charles R., assignor.)
United States Pipe & Foundry Company. (See Lemert, Louis J., assignor.)
U. S. Slicing Machine Company. (See Sensow, Anton C., assignor.)
Valko, John, Aguilar, Colo. Attachment for preventing buckling of coal conveyer troughs. 1,903,205; Mar. 28.
Victaulic Company of America. (See Damsel, William B., assignor.)
Viviani, Ettore, Milan, Italy. Apparatus for dry-spinning artificial textile fibers with recovery of the volatile solvents. 1,902,922; Mar. 28.
Von Frankenberg, Arthur, New York, N. Y. Receptacle. 1,902,978; Mar. 28.
Voss, Arthur. (See Krünzlein, G., Dickhäuser, and Voss.)
Vulcan Steel Products Company, The. (See Easter, George C., assignor.)
Wagner, Gunther. (See Simon, Hans, assignor.)
Wagner, Walter, Park Ridge, Ill. Map display device for motor vehicles. 1,902,884; Mar. 28.
Wahl, John, Rosedale, assignor to A. Schrader's Son Inc., New York, N. Y. Deflating machine. 1,902,923; Mar. 28.
Wakeman, Arthur G., Appleton, Wis. Apparatus for feeding pulp or fiber to paper making machinery. 1,903,151; Mar. 28.
Walker, Harry, Milnrow, near Rochdale, assignor of one-half to John Holroyd & Company Limited, Milnrow, near Rochdale, England. Worm gearing. 1,903,273; Mar. 28.
Wamhoff, William, F., Emblem, Wyo., and W. H. Thompson, Canton, Ill., assignors to International Harvester Company. Planter attachment for tractors. 1,902,924; Mar. 28.
Ward, George M., East Weymouth, Mass. Sales indicator. 1,902,925; Mar. 28.
Ward Leonard Electric Company. (See Kebler, Leonard, assignor.)
Ward, Mark. (See Willans, P. W., and Ward.)
Warner Bros. Pictures, Inc. (See Ross, Arthur, assignor.)
Warren, Edward F. and H. Schwarze, Birmingham, assignors to General Motors Corporation, Detroit, Mich. Transmission lock. 1,903,017; Mar. 28.
Wassell, Frank L., assignor to Remington Rand Inc., Buffalo, N. Y. Index. 1,903,206; Mar. 28.
Waterbury, John H.. (See Benjamin, R. B., and Waterbury.)
Waterbury Tool Company, The. (See Rouse, Warren E., assignor.)
Watson, Archie S., Highland Park, Mich. Garage handling mechanism. 1,903,274; Mar. 28.
Watson, George V. E., and R. O. Stubbins, Seattle, Wash. Mural decoration. 1,903,152; Mar. 28.
Wearn's Inventions, Ltd. (See Wilhelm, Harold F., assignor.)
Webster Electric Company. (See Dally, Roy, assignor.)
Weir, James B., New Dorp, assignor, by mesne assignments, to Standard Mirror Company, Inc., Buffalo, N. Y. Clock and mirror holder. 1,903,153; Mar. 28.
Wemp, Ernest E., Detroit, Mich. Clutch. 1,903,275; Mar. 28.
West, Frank R., and T. E. Carpenter, Detroit, Mich.; said Carpenter assignor to said West. Control device for electric circuits. 1,902,926; Mar. 28.
Westinghouse Electric & Manufacturing Company. (See Jackson, Ray P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sandin, Jerome, assignor.)
Weston, William E., Kansas City, Mo. Heating and drying apparatus. 1,902,927; Mar. 28.
Weymouth, Harry G., assignor to Pittsburgh Equitable Meter Company, Pittsburgh, Pa. Meter. 1,903,074; Mar. 28.
Wheeler, Vernon L., Sault Ste. Marie, Mich. Diestock. 1,902,909; Mar. 28.
Wheeling Steel Corporation. (See Rollason, Charles H., assignor.)
White, Franklin R. (See Ross, F. N., and White.)
White, Morris, New York, N. Y., assignor to Morris White Mfg. Co. Inc. Hand-bag. Des. 89,554; Mar. 28.
White, Morris, Mfg. Co. (See White, Morris, assignor.)
Whiteley, Frank A., Minneapolis, Minn. Thermostat. 1,902,979; Mar. 28.
Wicks, John, Oak Park, R. G. Richardson, Chicago, and J. I. Bellamy, Brookfield, assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone system. 1,903,207; Mar. 28.
Wilhelm, Harold F., East Orange, N. J., assignor, by mesne assignments, to Wearn's Inventions, Ltd., Auckland, New Zealand. Belt tightening pulley. 1,902,980; Mar. 28.
Willans, Peter W., Towcester, and M. Ward, London, England, assignors to Radio Corporation of America. Electrical transformer. 1,903,075; Mar. 28.
Willheim, William, Co. (See Schweizer, Jack, assignor.)
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,557; Mar. 28.
Williams, Armand A., assignor of one-fourth to L. Fink and one-fourth to G. K. Sweeney, Ghent, W. Va. Automatic gate. 1,903,208; Mar. 28.
Williams, William D., jr., Richmond, Ind. Kitchen cabinet. Des. 89,559; Mar. 28.
Willman, Charles, Retsil, Wash. Tool. 1,903,252; Mar. 28.
Wilmet, Georges, New York, N. Y., assignor to Armstrong Cork Company, Lancaster, Pa. Container cap. Des. 89,560; Mar. 28.
Wingler, August. (See Schulemann, W., Schönhöfer, and Wingler.)
Winkler, Kurt, Finsterwalde, Niederlausitz, Germany. Wood plate. 1,903,076; Mar. 28.
Winthrop Chemical Company. (See Hersberg, W., and Lange, assignors.)
Winthrop Chemical Company. (See Schulemann, W., Schönhöfer, and Wingler, assignors.)
Wirth, Dorsey M., Bucyrus, Ohio. Belt buckle. 1,902,981; Mar. 28.
Wohlbieter, Joseph W., East Orange, N. J., assignor to Keystone Stamping Corporation. Mopstick head. 1,903,018; Mar. 28.
Wolf, Harry R., assignor to General Motors Research Corporation, Detroit, Mich. Uniting dissimilar metals. 1,903,077; Mar. 28.
Woodall Industries Incorporated. (See Scott, Allison F. H., assignor.)
Woolman, Nelson E., Hermosa Beach, Calif., assignor to General Motors Research Corporation. Valve mechanism. 1,903,078; Mar. 28.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,079; Mar. 28.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,080; Mar. 28.
Worthington, Charles C., Dunfield, N. J. Gang lawn mower. 1,902,928; Mar. 28.

Wotherspoon, Henry H., Lawrence, Mass., assignor to Mathias Klein & Sons, Chicago, Ill. Lineman's belt. 1,903,081; Mar. 28.
Wright, Esmond P. G., and G. C. Hartley, Aldwych, London, England, assignors to International Standard Electric Corporation, New York, N. Y. Automatic or semi-automatic telephone exchange system. 1,903,019; Mar. 28.
Wullert, Wichard W., and W. E. Bennett, Bend, Oreg. Electromagnet. 1,903,154; Mar. 28.
Yanga, Eleuterio S., Valladolid, Occidental Negros, P. I. Fish trap. 1,903,276; Mar. 28.
Yumamoto, Eijiro. (See Fujii, Tokutaro, assignor.)
Zahn, Karl, Frankfort-on-the-Main, Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Condensation product or isatin-α-anilide and substituted anthrones and producing same. 1,902,929; Mar. 28.
Zenz, John, and H. R. Kennedy, Los Angeles, Calif.; said Zenz assignor to said Kennedy. Brake tester. 1,903,020; Mar. 28.
Zero Ice Corporation. (See Cordrey, Almon J., assignor.)
Zubaty, Joseph, Flint, Mich. Fuel pump. 1,902,930; Mar. 28.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Pressure gauge. 1,902,931; Mar. 28.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Instrument mounting. 1,902,932; Mar. 28.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Electric gasoline gauge. 1,902,933; Mar. 28.
Zwilgmeyer, Frithjof, Hamburg, assignor to National Aniline Chemical Company, Inc., New York, N. Y. Trisazo dye. 1,903,021; Mar. 28.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 28TH DAY OF MARCH, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Arbrading, polishing, or like surfacing tool. A. Fiset. 1,902,844; Mar. 28.
Acetals of cyclic ketones with polyhydric alcohols and preparing the same. G. Kränzlein, E. Dickhäuser, and A. Voss. 1,902,866; Mar. 28.
Advertising device. F. D. Fisher. 1,903,103; Mar. 28.
Advertising device, Aerial. J. Picco. 1,903,131; Mar. 28.
Aeroplane. G. Crompton, jr. 1,902,813; Mar. 28.
Air conditioning apparatus. L. P. Reiss. 1,903,137; Mar. 28.
Air conditioning apparatus. D. Tenney. 1,903,250; Mar. 28.
Air conditioning control. S. M. Anderson. 1,902,818; Mar. 28.
Airfoil, Metallic. E. A. Hughes. 1,902,956; Mar. 28.
Air heater. D. W. Lake. Re18,777; Mar. 28.
Air under pressure, Apparatus for supplying. G. W. Gille. 1,903,233; Mar. 28.
Allo-MS-naphthodianthrones. M. A. Kunz and K. Koeberle. 1,902,867. Mar. 28.
Alloy of nickel, silver, tin, and copper. 1,903,192; Mar. 28.
Amines of the benzyl-anilid type, Manufacturing substituted secondary. W. Herzberg and H. Lange. 1,902,854; Mar. 28.
Aminoquinolines and making the same, Substituted. W. Schulemann, F. Schönhöfer, and A. Wingler. 1,903,196; Mar. 28.
Amusement device. K. Koschka. 1,903,116; Mar. 28.
Anchoring device. O. F. Goransson. 1,903,214; Mar. 28.
Angle multisector. S. E. Bray. 1,902,989; Mar. 28.
Animal fibers, Dyeing. A. Fischesser. 1,903,175; Mar. 28.
Antislap ring. C. R. McMinn, J. T. Robinson, and J. B. Holliday. Re18,776; Mar. 28.
Antitoxicant for fats and oils. R. C. Newton and D. P. Grettie. 1,903,126; Mar. 28.
Anvil, Stitching machine. H. R. Bliss and H. G. Allen. 1,902,825; Mar. 28.
Arch support. J. H. Golden. 1,902,952; Mar. 28.
Automatic gate. A. A. Williams. 1,903,208; Mar. 28.
Automobile body. F. Humer. 1,902,999; Mar. 28.
Automobile, Device for preventing retrograde movement of an. J. L. Gonard. 1,903,178; Mar. 28.
Automobile lift. G. P. Ball. 1,902,820; Mar. 28.
Automobile seat. C. L. Roberts. 1,903,267; Mar. 28.
Awning and shutter, Combined. C. F. Miller. 1,902,879; Mar. 28.
Axle housing and making the same. L. Blackmore. 1,903,088; Mar. 28.
Bait, Artificial. J. W. Catarau. 1,903,256; Mar. 28.
Ball bearing. G. O. Hodge. 1,903,217; Mar. 28.
Bank, Coin. S. Breck. Des. 89,549; Mar. 28.
Bank, Savings. A. C. Grunwald. 1,903,177; Mar. 28.
Baseboard element, Metallic. H. M. Reed, jr. 1,903,244; Mar. 28.
Beam and mounting frame for Axminster looms. J. Goch. 1,903,040; Mar. 28.
Belt, Lineman's. H. H. Wotherspoon. 1,903,081; Mar. 28.
Binder. J. J. Lynch and E. F. Barvoets. 1,902,965; Mar. 28.
Bit: *See*—
Rotary bit.
Blanks and similar articles with jumped heads, Manufacture of. M. O. Ruska. 1,903,245; Mar. 28.
Block: *See*—
Chain block. Fuse block.
Bobbin or spool winding machine. T. C. Hughes. 1,903,261; Mar. 28.
Boot hook. T. F. Hammer. Des. 89,558; Mar. 28.
Bowl or similar article, Sugar. C. B. Ilgenfritz. Des. 89,561; Mar. 28.
Box: *See*—
Coil box.
Box for milk bottles and other articles. D. S. Koch and W. Newberry. 1,903,266; Mar. 28.
Box for typewriter ribbons, Stock. G. D. Atwood. Des. 89,547; Mar. 28.
Brake control for vehicle wheels. A. Arato. 1,902,819; Mar. 28.
Brake operating mechanism. E. A. Rockwell. 1,903,138; Mar. 28.
Brake tester. J. Zenz and H. R. Kennedy. 1,903,020; Mar. 28.
Brakes, Mounting railway car hand. R. W. Burnett. 1,902,812; Mar. 28.
Brushes for generators, motors, motor-generators, or starters and the like, Sanding-in armature. L. T. Faley. 1,903,101; Mar. 28.
Bucket, Concrete. B. H. Kersting. 1,902,863; Mar. 28.
Buckle, Belt. D. M. Wirth. 1,902,981; Mar. 28.
Building covering. E. R. Black. 1,903,023; Mar. 28.
Burner: *See*—
Oil burner.
Burner. H. D. Dufault. 1,903,032; Mar. 28.
Burner for liquid or semiliquid fuel. R. W. Titmas and R. S. Hickish. 1,902,920; Mar. 28.
Cabinet for radioreceivers. I. Goldberg. Des. 89,555; Mar. 28.
Cabinet, Kitchen. W. D. Williams. Des. 89,559; Mar. 28.
Calculating machine. C. M. F. Friden. 1,903,105; Mar. 28.
Calculating machine. J. E. W. Greve. 1,903,179; Mar. 28.
Cam grinding apparatus. C. G. Trefethen. 1,903,149; Mar. 28.
Camera back for exposing light sensitive photographic plates, Rotatable turret. F. A. Lathe. 1,902,869; Mar. 28.
Can: *See*—
Oil can.
Capacitor. W. M. Bailey. 1,902,942; Mar. 28.
Car heating, cooling, and ventilating means. I. N. Fraver. 1,903,037; Mar. 28.
Carbon combustion furnace. C. B. Francis. 1,903,036; Mar. 28.
Carburetor. R. Oppenheim. 1,902,887; Mar. 28.
Card, Display. E. C. Chittum. 1,902,992; Mar. 28.
Card holder. W. J. Ecker, jr. 1,903,098; Mar. 28.
Carrier: *See*—
Rear axle carrier.
Carrier for pneumatic dispatch systems. V. H. Jackson. 1,902,856; Mar. 28.
Casing: *See*—
Gear casing.
Casing for universal joints. C. W. Spicer and G. L. Tarbox. 1,902,976; Mar. 28.
Casing head equipment. L. M. C. Seamark. 1,902,906; Mar. 28.
Casket. A. F. H. Scott. 1,903,197–8; Mar. 28.
Ceiling construction. C. R. Birdsey. 1,902,835; Mar. 28.
Cellular products, Forming. W. L. Ellerbeck. 1,902,993; Mar. 28.
Chain block. E. Knight. 1,903,218; Mar. 28.
Chain conveying apparatus. A. Marone. 1,902,873; Mar. 28.
Chair. D. E. Austin, P. R. Bissell, and E. W. Crutchfield. 1,903,253; Mar. 28.
Charcoal from charcoal fines, Producing activated. M. E. Barker. 1,902,986; Mar. 28.
Chromium plating process. W. M. Phillips. 1,903,130; Mar. 28.
Circuit breaker. R. P. Jackson. 1,902,958; Mar. 28.
Circuit control, Electric. A. Ross. 1,903,069; Mar. 28.
Clamp: *See*—
Rope clamp.
Clamp for permanent hair waving, Hair. K. G. Ströher. 1,903,249; Mar. 28.
Classifying table. E. Stump. 1,902,917; Mar. 28.
Clock and mirror holder. J. B. Weir. 1,903,153; Mar. 28.
Clock case and lamp or similar article, Combined. J. Gottlieb. Des. 89,556; Mar. 28.
Closure for metal containers. E. Rosenblueth. 1,903,011; Mar. 28.
Closure for metallic barrels or containers. E. Rosenblueth. 1,903,012; Mar. 28.
Closure operating device. T. B. Mattingly. 1,903,056; Mar. 28.
Clutch: *See*—
Key clutch.
Clutch. E. E. Wemp. 1,903,275; Mar. 28.
Clutch mechanism. L. J. Campbell. 1,902,990; Mar. 28.
Coffee making machine. H. Harper. 1,903,111; Mar. 28.
Coil box, Loading. T. Laurent. 1,903,054; Mar. 28.
Coin controlled device. O. D. Jennings and E. Mihalek. 1,903,048; Mar. 28.
Combination table. L. J. Buckley. 1,903,026; Mar. 28.
Communication with moving trains. H. A. Affel and E. I. Green. 1,902,817; Mar. 28.
Compression ring. G. M. M. Grant. 1,903,107; Mar. 28.
Condensation product of isatin-α-anilide and substituted anthrones and producing same. E. Zahn. 1,902,929; Mar. 28.
Condenser: *See*—
Variable condenser.
Connecting rod. J. T. Onstott. 1,903,064; Mar. 28.
Container. F. Fortuna and S. Giannangelo. 1,903,104; Mar. 28.
Container cap. G. Wilmet. Des. 89,560; Mar. 28.

Container closure. J. W. and A. Erhard. 1,903,099; Mar. 28.
Container for solid carbon dioxide, Insulated. A. J. Cordrey. 1,903,169; Mar. 28.
Control device for electric circuits. F. R. West and T. E. Carpenter. 1,902,926; Mar. 28.
Control, System of automatic. J. Leonpacher. 1,903,055; Mar. 28.
Controlling means for knitting machines. N. Levin. 1,902,870; Mar. 28.
Conveying jack. A. L. Kern. 1,903,115; Mar. 28.
Cooler: *See*—
Oil cooler.
Counter stiffener. M. L. Dodge. 1,903,031; Mar. 28.
Counter stiffener and forming it. H. A. Jordan. 1,903,050; Mar. 28.
Coupling: *See*—
Pipe coupling. Shaft coupling.
Coupling. F. A. Talbot. 1,902,919; Mar. 28.
Coupling device for keyboards. L. Deutsch. 1,902,840; Mar. 28.
Current sources. R. Rechnitzer. 1,902,894; Mar. 28.
Cushioning device for slicing machines. A. C. Sensow. 1,902,908; Mar. 28.
Cutting machine. C. B. Gray. 1,903,234; Mar. 28.
Decarbonizing apparatus. G. F. Thomas. 1,903,016; Mar. 28.
Deep well drill. R. Giesey. 1,903,232; Mar. 28.
Deflating machine. J. Wahl. 1,902,923; Mar. 28.
Dental instrument. J. H. Greene. 1,902,850. Mar. 28.
Design wheel. J. J. Sanders. 1,902,903; Mar. 28.
Diestock. V. L. Wheeler. 1,902,909; Mar. 28.
Dipper. D. H. Meyer. 1,903,123; Mar. 28.
Door, Cast steel bottom drop. J. A. Lamont and F. A. Lorenz, jr. 1,902,868; Mar. 28.
Door operating mechanism. C. W. Horton. 1,903,182; Mar. 28.
Door, Sectional. C. E. Paget. 1,903,065; Mar. 28.
Drafting instrument. J. V. Koester. 1,902,865; Mar. 28.
Drill: *See*—
Deep well drill.
Drill. J. D. Nixon. 1,902,885; Mar. 28
Drums and the like, Head retainer for. C. H. Rollason. 1,903,010; Mar. 28.
Drying device for wood, brick, pottery, etc., provided with heat recovering devices. J. G. Olsson and F. I. E. Stenfors. 1,903,063; Mar. 28.
Dump, Vehicle. L. D. Fiskin. 1,903,176; Mar. 28.
Dust protector device. J. F. Martin. 1,902,874; Mar. 28.
Dye, Trisazo. F. Zwilgmeyer. 1,903,021; Mar. 28.
Dyestuffs of the acridine series, Making nitrogenous vat. E. Honold and G. Boehner. 1,903,181; Mar. 28.
Dyestuffs of the benzanthrone series, Production of vat. P. Nawiasky and J. Mueller. 1,902,883; Mar. 28.
Earth boring apparatus. J. F. Mellor. 1,902,968; Mar. 28.
Electric control unit. H. D. Colman and D. J. Stewart. 1,903,231; Mar. 28.
Electric fluid heater. W. J. Baker. 1,902,877; Mar. 28.
Electric heater. H. G. Landis. 1,903,219; Mar. 28.
Electric switch. H. J. Hammerly. 1,903,180; Mar. 28.
Electric switch, Push button. M. G. Rees. 1,903,135; Mar. 28.
Electric valve operator. H. D. Colman and D. J. Stewart. 1,903,229; Mar. 28.
Electric valve operator. D. J. Stewart. 1,903,230; Mar. 28.
Electrical stunning device. H. D. Tefft. 1,902,901; Mar. 28.
Electrical transformer. P. W. Willans and M. Ward. 1,903,075; Mar. 28.
Electrode for vapor gas electric devices. W. T. Anderson, jr. 1,902,936; Mar. 28.
Electrode, Welding. A. C. Castle. 1,902,948; Mar. 28.
Electromagnet. W. W. Wullert and W. E. Bennett. 1,903,154; Mar. 28.
Electromagnetic switch. D. A. Christian. 1,903,211; Mar. 28.
Electromagnetic wet separation, Automatic. H. B. Arden. 1,902,937–8; Mar. 28.
Elevator arrangement, Industrial. R. G. and W. M. Cory. 1,903,092; Mar. 28.
Elevators, Safety cableless multiple. M. E. Breed. 1,902,946; Mar. 28.
Engine: *See*—
Internal combustion engine.
Engine structure, Internal combustion. D. F. Asbury. 1,903,160; Mar. 28.
Expansion and contraction joint, Combined. A. C. Fischer. 1,902,844; Mar. 28.
Extractor: *See*—
Fruit juice extractor.
Eye and eyelash for dolls, Combined. V. Keney. 1,902,816; Mar. 28.
Fastener. A. E. Jannopoulo. 1,903,000; Mar. 28.
Feed, Mineral. P. Caldwell. 1,902,832; Mar. 28.
Felt rubber roller. T. Fujii. 1,903,038; Mar. 28.
Fences, Making expanded metal. C. M. MacChesney. 1,902,966; Mar. 28.
Fiberboard manufacture and apparatus therefor. F. S. Farley. 1,903,102; Mar. 28.
Filamentary material, Method and apparatus for the manufacture of. R. Hazel. 1,902,953; Mar. 28.
Film developer and dried. J. W. Ferguson. 1,903,174; Mar. 28.
Filtering device, Centrifugal. H. W. Abbott. 1,902,982; Mar. 28.
Fish trap. E. S. Yanga. 1,903,276; Mar. 28.
Flange protector. L. J. Lemert. 1,903,220; Mar. 28.
Floor construction. J. R. Bowman. 1,902,829; Mar. 28.
Floors, Apparatus for forming concrete. H. W. Roos. 1,902,898–9; Mar. 28.
Flying machine. G. F. Myers. 1,903,009; Mar. 28.
Form, collapsible tire. H. D. Stevens. 1,903,202; Mar. 28.
Frost eliminator for vehicles. H. Paquette. 1,902,888; Mar. 28.
Froth flotation and material employed to effect the same. O. D. Cunningham. 1,902,839; Mar. 28.
Fruit juice extractor. C. E. Elliott and L. O. Nichols. Re18,778; Mar. 28.
Fuel and producing it, Prepared. B. F. J. Odell. 1,902,886; Mar. 28.
Fuel, Antiknock. F. E. L. Busch. 1,903,255; Mar. 28.
Fuel briquette, Producing a carbonized. L. M. Johnston. 1,903,237; Mar. 28.
Fuel pump. J. Zubaty. 1,902,930; Mar. 28.
Furnace: *See*—
Carbon combustion furnace.
Furnace equipment. W. A. Darrah. 1,902,931; Mar. 28.
Fuse and current limiting resistor, Combination. J. Sandin. 1,902,902; Mar. 28.
Fuse block. J. Messing. Re18,779; Mar. 28.
Gaining head. T. J. Johnson. 1,903,002; Mar. 28.
Game. H. B. Polak. 1,903,133; Mar. 28.
Game, Basket ball. A. S. Bishop. 1,903,254; Mar. 28.
Game device, Pin-ball amusement. A. D. Pearson. Des. 89,552; Mar. 28.
Gang operated switch. J. J. Desmond. 1,903,095; Mar. 28.
Garage handling mechanism. A. S. Watson. 1,903,274; Mar. 28.
Gas compressor, Liquid displacement. D. G. Griswold. 1,903,108; Mar. 28.
Gas, Thermal decomposition of natural. C. E. Starr. 1,903,247; Mar. 28.
Gasoline gauge, Electric. J. Zubaty. 1,902,933; Mar. 28.
Gate: *See*—
Automatic gate.
Gauge: *See*—
Gasoline gauge. Wheel aligning gauge.
Pressure gauge.
Gauge. E. E. Hans. 1,902,998; Mar. 28.
Gear: *See*—
Screw gear.
Gear casing. G. H. Acker. 1,902,934; Mar. 28.
Gear for aircraft, Landing. J. Lloyd. 1,903,186; Mar. 28.
Gearing, Frictional. B. Thomson. 1,903,228; Mar. 28.
Gearing, Worm. H. Walker. 1,903,273; Mar. 28.
Gears, Cutting. E. C. Head. 1,093,043; Mar. 28.
Generator: *See*—
Oil gas generator.
Glass in gathering basins, Circulating. A. F. McNish. 1,903,223; Mar. 28.
Glass-sealing instrument, Safety. F. H. Bell. 1,902,987; Mar. 28.
Grease dispensing device. J. H. Becker. 1,902,822; Mar. 28.
Ground working implement, Rotary. T. S. Miller and L. L. J. L., and S. L. Chong. 1,903,124; Mar. 28.
Guard for truck chains. J. F. Lafferty. 1,903,120; Mar. 28.
Gun, Grease. J. L. Snodgrass. 1,903,227; Mar. 28.
Guy strand guard and lock. J. Blackburn. 1,902,945; Mar. 28.
Hair curling device. R. Pezzella. 1,903,066; Mar. 28.
Hair trimmer and dresser. J. Keenan. Re18,781; Mar. 28.
Hand-bag. M. White. Des. 89,554; Mar. 28.
Hanger: *See*—
Suspension hanger.
Hanger for oil well pumping rigs, Straight lift beam. C. Furit. 1,903,034; Mar. 28.
Headlight. W. H. Kay and E. McDaniel. 1,902,860; Mar. 28.
Heat treatment, Automatically timed apparatus for. G. Browning. 1,903,089; Mar. 28.
Heater: *See*—
Air heater. Electric heater.
Electric fluid heater.
Heater for locomotives, Feed water. W. Parks. 1,902,969; Mar. 28.
Heater, Manufacturing an electric water. L. W. Hodges. 1,903,045; Mar. 28.
Heating and drying apparatus. W. E. Weston. 1,902,927; Mar. 28.
Heating system, Automobile. A. Ream. 1,903,134; Mar. 28.
Heel concaving machine. M. W. Howard. 1,902,855; Mar. 28.
Heel-seat fitting machine. E. A. Bessom. 1,902,824; Mar. 28.
Heels, Covering breasts of. J. Gouldbourn and G. Hazelton. 1,902,848; Mar. 28.
Hinge. E. Meininghaus. 1,903,059; Mar. 28.
Hinge construction. H. E. Ahrens. 1,903,251; Mar. 28.
Hoe, mulcher, and weed destroyer. F. C. Palm. 1,903,264; Mar. 28.

Hoisting apparatus. W. A. Hummel. 1,903,235; Mar. 28.
Holder: *See*—
Card holder. License plate holder.
Clock and mirror holder. Shade holder.
Holder for Cooper-Hewitt tubes and inert gas tubes generally, Insulating. L. O'Rourke. 1,903,127; Mar. 28.
Holster, Pistol. I. Arth. 1,903,084; Mar. 28.
Hose rack. W. Barnes, jr. 1,903,085; Mar. 28.
Hydraulic jack. H. W. Bolens. 1,902,827; Mar. 28.
Hydraulic mechanism. J. O. Almen. 1,903,083; Mar. 28.
Index. F. L. Wassell. 1,903,206; Mar. 28.
Indicator: *See*—
Sales indicator.
Inkstand. R. W. Newman. 1,903,061; Mar. 28.
Instrument for controlling temperatures. R. W. Brown. 1,903,165; Mar. 28.
Interlocking two movements, Device for. M. L. Gianoli. 1,903,039; Mar. 28.
Internal combustion engine. D. F. Asbury. 1,903,159; Mar. 28.
Internal combustion engine. J. P. Burke. 1,902,831; Mar. 28.
Internal combustion engine. L. M. Woolson. 1,903,079–80; Mar. 28.
Jack: *See*—
Conveying jack. Hydraulic jack.
Joint: *See*—
Expansion and contraction joint.
Jump-training device. P. B. Flynn. 1,902,995; Mar. 28.
Keyboard transmitter. E. P. Bancroft. 1,092,943; Mar. 28.
Key clutch, Rotary. F. John. 1,903,049; Mar. 28.
Key, cotter. J. W. Peterson. 1,903,129; Mar. 28.
Kiln. L. L. Ladd. 1,903,117–18; Mar. 28.
Kiln furniture. L. L. Ladd. 1,903,119; Mar. 28.
Kilns and the like, Control system for rotary. V. Sahmel. 1,903,070; Mar. 28.
Knockdown assemblage. O. H. Merz, R. A. Arndt, and C. B. Lange. 1,903,122; Mar. 28.
Label. E. I. Petersen. Re18,782; Mar. 28.
Lace. J. Moosherr. Des. 89,551; Mar. 28
Ladies' hand-bag. E. Jabncke. Des. 89,545; Mar. 28.
Lamp, Recording. C. A. Packard. 1,903,128; Mar. 28.
Lamp, Shell. H. Cardon. 1,902,991; Mar. 28.
License plate. O. H. Anderson. 1,903,155; Mar. 28.
License plate holder, Automobile. C. R. Davis. 1,903,258; Mar. 28.
Lighting construction. R. B. Benjamin and J. H. Waterbury. 1,903,087; Mar. 28.
Linings, Applying brake shoe. N. F. McNaught and E. H. Peterson. 1,903,058; Mar. 28.
Lock: *See*—
Reverse lock. Valve lock.
Transmission lock.
Locomotive structure. W. L. Lentz and H. M. Pflager. 1,902,962; Mar. 28.
Loud speaker. H. K. Bouvier. 1,903,164; Mar. 28.
Machine and method for sewing buttons onto fabric or the like. F. N. Ross. 1,903,268; Mar. 28.
Machine for attaching buttons. F. N. Ross and F. R. White. 1,903,269; Mar. 28.
Machine for making collapsed cartons. F. G. Peck. 1,903,243; Mar. 28.
Machine tool. E. J. Kearney and J. B. Armitage. 1,903,114; Mar. 28.
Magnesium and high percentage magnesium alloys by rolling, Working. G. Schreiber. 1,902,905; Mar. 28.
Map display device for motor vehicles. W. Wagner. 1,902,884; Mar. 28.
Marionette control frame and cord wind-up. S. Adler and C. B. Blank. 1,902,983; Mar. 28.
Marker, Plot. R. R. Mason. 1,902,875; Mar. 28.
Mask for photoprinting machines, Adjustable. J. L. Barber. 1,902,984; Mar. 28.
Measuring device. T. E. Clark. 1,903,090; Mar. 28.
Metal shapes, Methods of and apparatus for making extruded seamless. S. W. Sparks. 1,902,975; Mar. 28.
Metals, Device for the electrothermic treatment of. W. Schabelitz. 1,902,896; Mar. 28.
Metals, Uniting dissimilar. H. R. Wolf. 1,903,077; Mar. 28.
Meter. H. G. Weymouth. 1,903,074; Mar. 28.
Meter fittings, Construction for orifice. H. H. Robinson. 1,903,068; Mar. 28.
Meter mechanism. T. R. Harrison. 1,902,852; Mar. 28.
Milk-dumping device. W. H. Paulson. 1,903,193; Mar. 28.
Milk product, Unfermented. R. P. Myers. 1,903,014; Mar. 28.
Milk, Unfermented acidophilus. R. P. Myers. 1,902,959; Mar. 28.
Mill, for pulverizing and the like. D. Y. Bryant. 1,903,166; Mar. 28.
Mold for cast stone and using the same. P. Tamagno. 1,902,977; Mar. 28.
Mooring and hoisting apparatus. W. E. Rouse. 1,902,972; Mar. 28.
Mopstick head. J. W. Wohlhieter. 1,903,018; Mar. 28.
Motor: *See*—
Potential electric motor.
Motor vehicle wheel. P. M. Miller. 1,903,189; Mar. 28.
Mounting for rotatable cylinders, Shaft. O. Mitchell. 1,903,060; Mar. 28.
Mounting, Instrument. J. Zubaty. 1,902,932; Mar. 28.
Mounting, Lens. C. E. Godley. 1,902,997; Mar. 28.
Mounting, Truck frame. F. H. Bender. 1,902,823; Mar. 28.
Mower blade. S. C. Jessup. 1,903,188; Mar. 28.
Mower, Gang lawn. C. C. Worthington. 1,902,928; Mar. 28.
Mural decoration. G. V. E. Watson and R. O. Stubbins. 1,903,152; Mar. 28.
Nozzle. D. Trompeter. 1,903,139; Mar. 28.
Nut and process of making, Lock. W. E. Sharp. 1,902,912; Mar. 28.
Nut bar for the manufacture of grip nuts and apparatus for forming the same, Forming. G. C. Easter. 1,902,841; Mar. 28.
Oil burner. W. M. Esterling. 1,903,100; Mar. 28.
Oil burner. F. A. Robinson. 1,903,195; Mar. 28.
Oil can. W. T. Faux. 1,902,994; Mar. 28.
Oil cooler. W. R. Ramsaur and T. P. Chase. 1,902,970; Mar. 28.
Oil gas generator. L. B. Harris. 1,903,042; Mar. 28.
Oil pump screen. C. L. McCuen. 1,903,005; Mar. 28.
Oil saver. C. S. Crickmer. 1,903,093; Mar. 28.
Opener, Package. F. Lepage and A. Martineau. 1,902,963; Mar. 28.
Ore flotation and flotation reagent. O. D. Cunningham. 1,902,838; Mar. 28.
Ornament, Shoe heel. P. Mariani. 1,903,004; Mar. 28.
Ornament, Table. R. F. Manning. Des. 89,546; Mar. 28.
Oversbot. A. L. Hampton. 1,902,851; Mar. 28.
Package, Display. J. R. Dow. 1,903,096; Mar. 28.
Packing gland. H. E. La Bour. 1,902,960; Mar. 28.
Packing machine for pulverulent material. K. Middelboe. 1,903,188; Mar. 28.
Pad and control therefor, Electric heating. G. Steerup. 1,903,015; Mar. 28.
Paper manufacture. B. Johnsen. 1,903,236; Mar. 28.
Parachute. W. J. Gleason. 1,903,213; Mar. 28.
Paranitraniline, Manufacture and purification of. A. B. Davis. 1,903,030; Mar. 28.
Pen, Plunger type. G. L. Bassett. 1,903,022; Mar. 28.
Pen, Plunger type. A. Bienenstein. 1,902,809–11; Mar. 28.
Pencil and lighter, Combined. A. G. Stevenson. 1,903,203; Mar. 28.
Petroleum oils, Treating. M. S. Darrow and L. S. Sweeney. 1,903,094; Mar. 28.
Phonograph pick-up, Electrical. S. Ruben. 1,902,900; Mar. 28.
Photographing device for high speed moving pictures. T. Subara. 1,903,204; Mar. 28.
Picture amusement device, Multiple. H. L. Perry. 1,903,226; Mar. 28.
Pie package. G. S. Frost. 1,903,212; Mar. 28.
Pile fabrics, Making. G. J. Underwood. 1,902,921; Mar. 28.
Pipe coupling. W. B. Damsel. 1,903,029; Mar. 28.
Piston. W. R. Hewitt. 1,903,216; Mar. 28.
Piston and wrist pin construction. C. A. Nevins. 1,903,191; Mar. 28.
Plant fiber material by cooking with phenolates, Decomposing. O. H. Strecker. 1,902,916; Mar. 28.
Plant or installation for extracting dust from minerals such as coal. S. Hunter. 1,903,046; Mar. 28.
Planter attachment for tractors. W. F. Wamhoff and W. H. Thompson. 1,902,924; Mar. 28.
Planter, Check row. J. H. Pinson. 1,902,891; Mar. 28.
Plate, Wood. K. Winkler. 1,903,076; Mar. 28.
Pliers. F. Sievern. 1,902,913; Mar. 28.
Plow attachment for tractors. W. S. Graham. 1,902,846; Mar. 28.
Plow, Tractor. W. S. Graham and A. D. Gallagher. 1,902,845; Mar. 28.
Potential electric motor, Small variable. A. Hochfeld. 1,902,954; Mar. 28.
Power control apparatus. D. L. Summey. 1,903,147; Mar. 28.
Power transmission mechanism. C. E. Henriod. 1,903,044; Mar. 28.
Power transmission mechanism. P. M. Salerni. 1,903,013; Mar. 28.
Press. W. H. Mason. 1,903,222; Mar. 28.
Pressure drum. H. J. Kerr and G. D. Ebbets. 1,902,862; Mar. 28.
Pressure gauge. J. Zubaty. 1,902,931; Mar. 28.
Projector, Episcope. C. Semenitz. 1,902,907; Mar. 28.
Protecting device for electric distributing systems. L. G. Dupois and G. Tinel. 1,903,033; Mar. 28.
Protective system. J. Jonas. 1,903,001; Mar. 28.
Protector: *See*—
Flange protector.
Pulley, Belt tightening. H. F. Wilhelm. 1,902,980; Mar. 28.
Pulp or fiber to paper making machinery, Apparatus for feeding. A. G. Wakeman. 1,903,151; Mar. 28.
Pulverizer. C. C. Jamieson. 1,902,857; Mar. 28.
Pump: *See*—
Fuel pump.
Pumping system. H. E. La Bour. 1,902,961; Mar. 28.
Rack: *See*—
Hose rack.
Radiator. A. B. Modine. 1,902,880; Mar. 28.
Radiator. A. B. Modine. 1,903,125; Mar. 28.

Radiator. E. W. Seaholm and G. E. Parker. 1,903,141; Mar. 28.
Radio apparatus. D. F. Asbury. 1,903,156; Mar. 28.
Ratchet wrench. N. F. McNaught and E. H. Peterson. 1,902,878; Mar. 28.
Rear and parking view attachment. P. W. Leilland. 1,903,239; Mar. 28.
Rear axle carrier. C. H. Sterling. 1,903,146; Mar. 28.
Receptacle: *See*—
Solid CO_2 receptacle.
Receptacle. A. von Frankenberg. 1,902,978; Mar. 28.
Receptacle cover. F. Inocencio. Des. 89,544; Mar. 28.
Receptacle having a handle. R. H. Lewis. 1,903,185; Mar. 28.
Rectifying tube. H. J. Spanner and U. Doering. 1,903,144–5; Mar. 28.
Reflector, Photography light. F. Simpson. 1,903,071; Mar. 28.
Refrigerating system, Solid-CO_2. A. J. Cordrey. 1,903,170; Mar. 28.
Reproducing and recording device, Combined. R. Dally. 1,902,950; Mar. 28.
Resistance strip and making same. N. C. Schellenger. 1,903,142; Mar. 28.
Resistance unit. L. Kebler. 1,902,861; Mar. 28.
Retarding device for machinery. S. E. T. Ewing and A. L. Egan. 1,903,035; Mar. 28.
Reverse motion lock, Automatic safety. A. B. Small. 1,903,199; Mar. 28.
Reversing mechanism. F. O. Snow, jr. 1,903,200; Mar. 28.
Ring: *See*—
Antislap ring. Compression ring.
Rod: *See*—
Connecting rod.
Rod and axle construction, Radius. F. M. Reid. 1,903,136; Mar. 28.
Rod weeder shoe. C. W. Robinson. 1,902,897; Mar. 28.
Roll and bun splitter. S. P. Larson. 1,903,238; Mar. 28.
Roller: *See*—
Felt rubber roller.
Roofing. L. F. Long. 1,902,872; Mar. 28.
Rope clamp. S. C. Swisher. 1,903,148; Mar. 28.
Rotary bit. W. C. Bailey. 1,902,941; Mar. 28.
Rubber articles and making the same, Reinforced vulcanized. G. R. Lockhart. 1,902,871; Mar. 28.
Rubber weather-strip. F. C. Palenske. 1,903,225; Mar. 28.
Sales indicator. G. M. Ward. 1,902,925; Mar. 28.
Screen: *See*—
Oil pump screen.
Screw gear. F. Kuba. 1,903,053; Mar. 28.
Seal for gems. A. Bulova. 1,902,830; Mar. 28.
Sealing and thrust balancing means. W. H. Carrier. 1,903,210; Mar. 28.
Sealing means. O. O. Oppenlaender and R. H. Carter. 1,903,242; Mar. 28.
Seat: *See*—
Automobile seat.
Sewing machine, Blind stitch button. M. McCann. 1,903,057; Mar. 28.
Shade for an electric lamp. G. E. McFadden. Des. 89,550; Mar. 28.
Shade holder. E. W. Carpenter, C. La Reau, and H. M. Kellogg. 1,902,947; Mar. 28.
Shaft coupling. O. Baur and H. Lempp. 1,903,162; Mar. 28.
Shaving machine. G. R. Bett. 1,902,988; Mar. 28.
Shears. C. Dahl. 1,903,257; Mar. 28.
Shield, Exhaust valve stem. D. F. Asbury. 1,903,158; Mar. 28.
Shield, Expansion. R. E. McIntosh. 1,903,241; Mar. 28.
Ships, Apparatus for riveting plates of. G. H. Bates. 1,902,821; Mar. 28.
Shock absorber. G. K. McKee. 1,903,006; Mar. 28.
Sign illuminating mechanism, Vending machine. S. Michlik and C. L. O'Reilly. 1,903,008; Mar. 28.
Signal for use on commercial and other records. F. L. Impey. 1,903,047; Mar. 28.
Signaling system. R. K. Potter. 1,902,893; Mar. 28.
Silica and making same, Prepared. F. M. McClenahan. 1,903,187; Mar. 28.
Sintering machine. E. W. Shallock. 1,902,911; Mar. 28.
Sintering machine. G. E. Swinehart. 1,902,918; Mar. 28.
Slide. C. E. Anderson. 1,902,935; Mar. 28.
Slug casting machine. A. V. Gilbert. 1,902,847; Mar. 28.
Socket, Shock absorbing. R. B. Benjamin. 1,903,086; Mar. 28.
Soda and potassium hydroxide, Production of. C. T. Thorsseil. 1,903,073; Mar. 28.
Solid CO_2 receptacle. A. J. Crodrey. 1,903,171; Mar. 28.
Solutions, Purification of. W. C. Graham. 1,903,215; Mar. 28.
Sound modifying device. J. B. Steur and C. H. Brown. 1,903,201; Mar. 28.
Sounds, Recording of. F. K. Crowther. 1,902,814; Mar. 28.
Soya bean protein containing material for the manufacture of an adhesive, and the product thereof, Preparing. L. W. Eilertsen, C. N. Cone, G. Davidson, I. F. Laucks, and H. P. Banks. 1,903,172; Mar. 28.
Spear. A. L. Hampton. 1,903,109; Mar. 28.
Speedometer or disconnection of its drive means, Means to prevent detachment of. F. Hennig. 1,902,853; Mar. 28.
Spring and mattress construction. E. A. Oehrl. 1,903,224; Mar. 28.
Spring shackle. R. Schiavulli. 1,903,271; Mar. 28.
Sprinkler system, Pendant. E. Tyden. 1,903,150; Mar. 28.
Stand: *See*—
Vise display stand.
Starch, Manufacture of. R. F. Sherman. Re18,775; Mar. 28.
Steam condensing well. L. E. Sanders. 1,903,246; Mar. 28.
Steam generators, Apparatus for regulating electric. M. Eaton. 1,902,842; Mar. 28.
Steel sheets, Manufacture of. A. R. Goodhue. 1,902,815; Mar. 28.
Steering mechanism for boats. E. E. Peck. 1,903,265; Mar. 28.
Stencil, Duplicating. H. Simon. 1,902,914; Mar. 28.
Stop, Limit. R. Sterrett. 1,903,072; Mar. 28.
Stopper and flask connector, Bottle. F. M. Pottenger and E. G. House. 1,902,892; Mar. 28.
Storage and dispensing device for screen wire and the like. H. S. Bobo. 1,902,826; Mar. 28.
Stove, Cook. W. L. Cooper. 1,903,091; Mar. 28.
Strap retainer, Shoulder. J. Freedman. 1,903,259; Mar. 28.
Stud, Externally suspended gland. R. G. Carlson. 1,903,028; Mar. 28.
Suit, Bathing. A. Ferrari and S. W. Devers. 1,902,843; Mar. 28.
Supervisory device for telegraph apparatus. E. Liesk and W. Kruse. 1,902,964; Mar. 28.
Support: *See*—
Arch support.
Supporting means for trousers and the like. F. J. C. Smith. 1,902,895; Mar. 28.
Suspension hanger. W. M. Brock. 1,903,024; Mar. 28.
Switch: *See*—
Electric switch. Gang operated switch.
Electromagnetic switch. Time controlled switch.
Switch for starting motors, Vacuum controlled. A. B. Althouse. 1,902,940; Mar. 28.
Synchronizing system. C. F. Jenkins. Re18,783; Mar. 28.
Table: *See*—
Classifying table. Combination table.
Table and cover structure, Collapsible camp. W. H. Butler. 1,903,209; Mar. 28.
Table or shelf for a stove. B. B. Goings. 1,903,262; Mar. 28.
Tank construction, Trailer truck. O. N. Gredell. 1,902,849; Mar. 28.
Tape, Waterproof heat insulating. W. R. Gillies. 1,903,106; Mar. 28.
Tear-off device. J. E. Euth. 1,903,173; Mar. 28.
Telephone exchange system, Automatic or semiautomatic. E. P. G. Wright and G. C. Hartley. 1,903,019; Mar. 28.
Telephone system. J. Wicks, R. G. Richardson, and J. I. Bellamy. 1,903,207; Mar. 28.
Television. F. C. P. Henroteau. 1,903,112–13; Mar. 28.
Textile fabric or similar article. J. Schweizer. Des. 89,553; Mar. 28.
Textile fabric or similar article. W. Willheim. Des. 89,557; Mar. 28.
Textile fibers with recovery of the volatile solvents, Apparatus for dry-spinning artificial. E. Viviani. 1,902,922; Mar. 28.
Thermostat. F. A. Whiteley. 1,902,979; Mar. 28.
Thermostatic controlling device. P. J. and C. H. Jorgensen. 1,902,858; Mar. 28.
Threads between stitched books, Method of and mechanism for extracting interconnecting. O. Kleinschmit. 1,902,864; Mar. 28.
Threads between stitched books, Method of and mechanism for mechanically extracting the interconnecting. O. Kleinschmit and O. Müller. 1,903,184; Mar. 28.
Threads, Treating textile. W. H. Charch. 1,902,833; Mar. 28.
Thymol, Preparing. K. Schöllkopf and A. Serini. 1,902,904; Mar. 28.
Time controlled switch. A. H. Saar, jr. Re18,780; Mar. 28.
Timing device for loom stop mechanism. W. P. Craig. 1,902,837; Mar. 28.
Tobacco leaf stemming and straightening machine. J. O. Morris. 1,902,882; Mar. 28.
Tool: *See*—
Machine tool. Valve bending tool.
Tool. C. Willman. 1,903,252; Mar. 28.
Toothbrush. I. Barkan. 1,903,161; Mar. 28.
Toothbrush, Fountain. R. J. Joseph. 1,902,859; Mar. 28.
Top, Convertible vehicle. H. Mayer. 1,903,240; Mar. 28.
Toy. F. F. C. Rippon. 1,902,971; Mar. 28.
Toy animation picture device. S. B. Tebeau. 1,903,272; Mar. 28.
Toy, Novelty. S. S. Adams. 1,903,082; Mar. 28.
Track, Roller. C. G. Johnson. 1,902,836; Mar. 28.
Tracks, Apparatus for forming sine. H. Capdet. 1,903,027; Mar. 28.
Transmission, Automotive. P. MacKenzie. 1,903,221; Mar. 28.

Transmission lock. E. F. Warren and H. Schwarze. 1,903,017; Mar. 28.
Trap: *See*—
Fish trap.
Troughs, Attachment for preventing buckling of coal conveyer. J. Valko. 1,903,205; Mar. 28.
Truck, Car. W. M. Sheehan and W. S. McGilvray. 1,902,974; Mar. 28.
Truck for aeroplanes, Tail-supporting. C. Cohen-Venezian. 1,902,884; Mar. 28.
Truck, Refuse disposal. J. Baji. 1,902,985; Mar. 28.
Tube: *See*—
Rectifying tube.
Tumbler or similar article. C. B. Ilgenfritz. Des. 89,562; Mar. 28.
Undergarment or similar article of manufacture. W. W. Bradford. Des. 89,548; Mar. 28.
Unit ventilator. W. Shurtleff. 1,903,143; Mar. 28.
Urea condensation products and making them. M. Paquin. 1,902,889; Mar. 28.
Valve. P. Spence. 1,903,248; Mar. 28.
Valve actuating mechanism for internal combustion engines. P. Gerard. 1,902,996; Mar. 28.
Valve bending tool. G. A. Morgan. 1,902,881; Mar. 28.
Valve lock. S. W. Neidner. 1,903,190; Mar. 28.
Valve mechanism. N. E. Woolman. 1,903,078; Mar. 28.
Valve structure, Float. H. R. McPhail. 1,902,967; Mar. 28.
Valve system and controller, Tank truck emergency. J. H. McEachern. 1,902,876; Mar. 28.
Variable condenser. D. F. Asbury. 1,903,157; Mar. 28.
Veil. M. J. Hinlein. 1,902,957; Mar. 28.
Vending machine. M. H. Richardson and A. E. Gebert. 1,903,067; Mar. 28.
Vending machine, Automatic. L. P. Starkey. 1,902,915; Mar. 28.
Ventilator: *See*—
Unit ventilator.
Vessel for solid carbon dioxide, Pressure. A. J. Cordrey. 1,903,167–8; Mar. 28.
Vest and suspenders, Combination. M. Adler and J. C. Janosik. 1,902,939; Mar. 28.
Vise display stand. W. U. Botsford. 1,903,163; Mar. 28.
Visor, Adjustable sun. H. A. Platt. 1,903,132; Mar. 28.
Vulcanizer, Tire repair. J. H. Browne. 1,903,025; Mar. 28.
Wall fixture. R. O. Pfeiffer. 1,902,890; Mar. 28.
Wall, Furnace. O. Nygaard. 1,903,062; Mar. 28.
Watch. A. L. Mansfield. 1,903,003; Mar. 28.
Water treatment. R. E. Hall and H. A. Jackson. 1,903,041; Mar. 28.
Weeder. R. E. Dunford and E. W. F. McMillan. 1,903,097; Mar. 28.
Weighing and delivery machine. F. Musch. 1,903,263; Mar. 28.
Weighing machine, Coin-controlled. H. A. Hadley. 1,903,110; Mar. 28.
Welding apparatus. H. S. Holmes. 1,902,955; Mar. 28.
Well bore angle detector and recorder. W. G. Bottum. 1,902,828; Mar. 28.
Wheel: *See*—
Design wheel. Motor vehicle wheel.
Wheel aligning gauge. H. R. Kennedy. 1,903,051; Mar. 28.
Wheel and axle construction, Antifriction. A. H. Oelkers. 1,902,910; Mar. 28.
Wheel structure, Dual. A. L. Lussier. 1,903,121; Mar. 28.
Wick carrying means. N. F. Fretter. 1,903,260; Mar. 28.
Window construction. W. A. Schoening. 1,902,973; Mar. 28.
Window guard and screen, Combined. J. P. Condon. 1,902,949; Mar. 28.
Wrench: *See*—
Ratchet wrench.
Wrench. J. R. Kerlin. 1,903,052; Mar. 28.
Wrench. R. Sandos. 1,903,270; Mar. 28.
Wringer. J. L. Perkins. 1,903,194; Mar. 28.
Xanthate flotation process, Tertiary. L. Rosenstein. 1,903,140; Mar. 28.

CLASSIFICATION OF PATENTS

ISSUED MARCH 28, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

1— 48: 1,902,825
2— 67: 1,902,843
102: 1,902,939
237: 1,902,895
5— 75: 1,903,224
7— 4: 1,902,913
8— 5: 1,902,833
1,903,175
19: 1,903,242
9— 22: 1,902,972
10— 27: 1,903,245
123: 1,902,909
12— 31.5: 1,902,824
46: 1,902,855
142: 1,902,848
146: 1,903,050
15— 137: 1,902,859
147: 1,903,018
188: 1,903,161
16— 96: 1,902,836
114: 1,903,185
135: 1,903,059
191: 1,903,251
18— 3.5: 1,902,987
8: 1,902,922
1,902,953
18: 1,903,025
54: 1,902,871
20— 16: 1,903,065
40.5: 1,902,888
49: 1,902,973
59: 1,902,879
71: 1,902,949
91: 1,903,076
23— 182: 1,903,187
184: 1,903,073
24— 73: 1,903,259
115: 1,903,148
136: 1,903,000
163: 1,902,981
186: 1,902,935
25— 128: 1,902,977
131.5: 1,902,898
1,902,899
142: 1,903,117
1,903,118
1,903,119
27— 3: 1,903,197
1,903,198
29— 84: 1,903,058
153.1: 1,903,088
30— 12: R. 18,781
1,902,988
13: 1,903,257
32— 10: 1,902,850
33— 1: 1,902,989
42: 1,902,865
83: 1,903,173
203: 1,903,051
34— 16: 1,903,222
18: 1,902,927
46: 1,903,063
48: 1,903,102
35— 9: 1,902,971
36— 68: 1,903,031
71: 1,902,952
37— 141: 1,903,123
39— 55: 1,903,208
40— 1: 1,903,047
2: R. 18,782
95: 1,902,894
125: 1,903,155
1,903,288
126: 1,903,103
127: 1,903,131
130: 1,903,006
146: 1,902,992
41— 5.5: 1,903,152
10: 1,903,004
38.6: 1,902,914

43— 41: 1,903,256
102: 1,903,276
44— 6: 1,902,886
9: 1,903,255
45— 70: 1,903,026

U. S. GOVERNMENT PRINTING OFFICE: 1933

CARNEGIE LIBRARY OF ATLANTA

Patents Nos. 1,899,921 to 1,900,893

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 428—No. 1 TUESDAY, MARCH 7, 1933 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $18.25; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notice

U. S. Patent Office, *Washington, Feb. 8, 1933.*

Harry Eggert, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of Daniel A. Brennan, of 10 South La Salle Street, Chicago, Ill., and Harry Eggert, care of A. G. Schneider, 10 South La Salle Street, Chicago, Ill., and a notice of such declaration sent to said Eggert at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Eggert, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

Notice of Cancellation

U. S. Patent Office, *Washington, Feb. 7, 1933.*

Motor Car Painting & Trimming Co., its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of The Simonis Company, 2101 Indiana Avenue, Chicago, Ill., to effect the cancellation of the trade-mark registration of Motor Car Painting & Trimming Co., 1444 Michigan Avenue, Chicago, Ill., No. 179,521, dated February 12, 1924, and the notice of such proceeding sent by registered mail to the said Motor Car Painting & Trimming Co., at the said address, having been returned by the post office as undeliverable, notice is hereby given that unless said Motor Car Painting & Trimming Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

Changes in Classification

Order No. 3,235, February 20, 1933, directs:

In *class 234, Recorders* (Division 23), establish the following subclasses and definitions, these subclasses to be coordinate with and immediately preceding subclass 6:

5.3 Inclination.
5.4 Weighing.
5.5 Machine efficiency or output.
5.6 Vibration.
5.7 Sphygmographs.

5.3. INCLINATION. Devices for making a record of the amount and/or direction of deviation from the vertical. Includes bore-hole direction recorders.

Note.—See class 33, Geometrical Instruments, subclasses 204 and 206; class 177, Electric Signaling, subclass 251; and class 255, Earth Boring, subclasses 1 and 72.

5.4. WEIGHING. Devices for recording weight when the novelty resides in the recorder only.

Note.—For combinations of scale structure and recorders, where the weighing mechanism is an essential part, see class 265, Forch Measuring, subclasses 3–9.

5.5. MACHINE EFFICIENCY OR OUTPUT. Devices which record the amount of work performed by a machine or machines or the time of or speed of operation relative to that which is expected.

Note.—For time recorders, see this class, subclasses 36 and 36.5. For speed recorders, see this class, subclass 29, and the subclasses indented thereunder. For area integrators for lumber, see class 33, Geometrical Instruments, and class 235, Registers, subclass 61.

5.6. VIBRATION. Devices for recording the vibration of materials or machines.

Note.—For seismographs, see class 177, Electric Signaling, subclass 251. See also class 73, Measuring Instruments, subclass 51, and class 116, Signals and Indicators, subclass 129.

5.7. SPHYGMOGRAPHS. Devices for recording pulse-beats and heart-performance in general.

Note.—For sphygmoscopes, see class 73, Measuring Instruments, subclass 44.

The patents contained in these subclasses have been taken for the most part from class 234, subclasses 1 and 1.5.

Condition of Applications Under Examination at Close of Business February 18, 1933

(Total number of applications awaiting action, excluding Trade-Mark Division, 55,326; Trade-Mark Division, 1,029. Oldest new case, Sept. 16, 1932; oldest amended, Sept. 16, 1932. The dates given are 1932 except where † indicates 1933.)

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

In re Barber

No. 3,048. Decided December 27, 1932

Design—Patentability—Flash Light Tubes.

A design for a flash light tube *Held* unpatentable over the prior art.

Appeal from the Patent Office. Affirmed.

Messrs. Bohleber & Ledbetter and *Mr. Frederick Griswold, jr.*, for Barber.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

Graham, *P. J.:*

Appellant has made application to the United States Patent Office for a patent upon a claimed new, original, and ornamental design for a flashlight tube. The design is embodied in a form of a flashlight tube, having a tubular body member, with screw threads for caps at each end, with circumferential beads near each end back of the threads, and with the body between these beads provided with longitudinal corrugations. These corrugated portions consist of six stripes, each having approximately nine parallel corrugations, which corrugations terminate at each end, some distance from said beads. Between the corrugated portions and between the ends of the corrugations and the beads, the surface of the tube is smooth. This arrangement, it is claimed by the appellant, gives the design the appearance of being panelled, and thus distinguishes it from the references which were cited by the Examiner and Board of Appeals, both of which tribunals rejected the claim for a patent.

These references are: Harsha, 22,186, January 31, 1893; Arkell, 29,594, November 1, 1898; "Long Range Pocket Flashlight," shown in Price List issued by National Carbon Co., Inc., of New York (May 1, 1926).

The basic reference relied upon is the design for a flashlight tube shown in the price list of the National Carbon Company. This reference shows a flashlight tube having threaded ends, and beads substantially as shown by appellant here. It also shows a series of corrugations extending lengthwise of the tube, these also ending at some distance from each end of the tube. The only appreciable difference between appellant's design and that of this reference is that, in the reference, there are but three corrugations in each longitudinal stripe and the intervening smooth portions are comparatively wider. There are also a greater number of such stripes in said reference.

The Board of Appeals calls attention to the fact that there is nothing inventive in appellant's design for a multiplicity of corrugations, arranged as appellant has arranged them, in view of Harsha, who shows stripes of four corrugations, and Arkell, who shows six. We agree with the Board in this respect.

The single question involved here is whether appellant's design is original and inventive. This must be determined by the appeal of the design to the eye. The number of corrugations may differ somewhat, but is the essential conception of the designer the same? To our minds, no substantial distinction exists, and the design is, therefore, unpatentable. *Gorham Company* v. *White*, 14 Wall. 511, 526; *Imperial Glass Co.* v. *Heisey & Co.*, 294 Fed. 267; *Martin Copeland Co.* v. *Pilot Elec. Co.*, 32 F.(2d) 235, 885 O. G. 513; *In re Walter*, 17 C. C. P. A. (Patents) 962, 39 F.(2d) 724, 896 O. G. 706; *In re Schierholtz*, 18 C. C. P. A. (Patents) 765, 45 F.(2d) 283, 402 O. G. 523; *In re Jordan*, 19 C. C. P. A. (Patents) 726, 53 F.(2d) 274, 414 O. G. 572; *In re Sadacca*, 19 C. C. P. A. (Patents) 1123, 56 F.(2d) 1085, 421 O. G. 854.

The decision of the Board of Appeals is affirmed. Affirmed.

U. S. Court of Customs and Patent Appeals

Hammers *v.* Bethenod

No. 3,028. Decided December 19, 1932

Interference—Priority—Reduction to Practice and Diligence.

Evidence reviewed and *Held* that priority was properly awarded to B. on the ground that, if H. was the first to conceive the invention, he had not established a reduction to practice thereof prior to B.'s effective date and had not established that he was diligent in reducing the invention to practice from the time that B. entered the field until he (H.) reduced the invention to practice.

Appeal from the Patent Office. Affirmed.

Mr. Frank B. Lloverance, jr., for Hammers.

Mr. Charles E. Tullar for Bethenod.

Lenroot, *J.:*

This is an appeal from a decision of the Board of Appeals of the United States Patent Office, affirming a decision of the Examiner of Interferences, awarding priority of invention of the subject matter of the counts in issue to appellee.

There are seven counts involved, of which counts 2 and 3 are illustrative and read as follows:

Count 2. A method of electric welding or cutting by means of three independent three-phase arcs produced between the parts to be welded or cut, and two electrodes juxtaposed but insulated from each other, the parts to be welded or cut being connected to the third pole of the source of three phase current.

Count 3. A method of electric welding or cutting by means of two independent two phase arcs produced between the parts to be welded and two electrodes juxtaposed but insulated from each other, the parts to be welded or cut being themselves connected to the common conductor of a source of two phase current with three wires.

As indicated by the counts above quoted, the invention involved herein relates to polyphase electric arc welding or cutting, and the invention is directed to the use of a two-phase or a three-phase electrical-welding device; in the three-phase device, two electrodes are connected to two of the three wires of a three-phase electrical supply, said electrodes being

placed close together but insulated one from the other; the work upon which the welding is to be done is connected to the third leg of the three-phase system; in the two-phase device, the work upon which the welding is to be done is connected to the common wire of a two-phase, three-wire system, the other two wires of the system being connected to two electrodes which are close together but insulated from each other. While it is not an element of either of the counts quoted, the invention also involves an automatic switch or cut out, the purpose of which is to cut off the supply to the electrodes when the same are so far removed from the work as to break the arc from the electrodes to the work, thus preventing the maintenance of an arc from one electrode to the other after actual welding operations have been terminated.

Appellant's application was filed on November 1, 1926. Appellee's application was filed on January 5, 1926, and for dates of conception and reduction to practice he relies upon an application filed in France on January 8, 1925, for counts 1, 2, 4 and 5, and upon an application filed in France on October 15, 1925, for counts 3, 6 and 7. It is conceded that appellee is entitled to said dates of filing in France for conception and reduction to practice of the invention.

Appellant was formerly a resident of the Netherlands and came to the United States about the first of October, 1920. He testified that he conceived the invention, made drawings of the same, and constructed a device which supported all of the counts in issue before coming to this country; that he brought some of his drawings and some parts of his device with him to this country; that most of his drawings, made in the Netherlands, were lost or destroyed; a drawing was introduced in evidence, however, by appellant as Exhibit A, which he testified was one of the drawings he brought with him from the Netherlands. He further testified that the welder constructed in the Netherlands was so constructed as to operate on a fifty-cycle, 380-volt power supply, and that, inasmuch as power is supplied in the United States at either 30 or 60 cycles and 440 volts, the welder described by appellant as having been constructed in Holland could not be operated in the United States. He also testified that some of the parts brought to this country could be used, but that it was necessary to tear down and rebuild the transformers on a larger scale; that upon his arrival in this country he could not speak the English language, had difficulty in finding employment and, as a consequence, did not begin the construction of a new machine until early in 1924; that early in 1924, and thereafter until he filed his application for patent, he was engaged in business for himself in the operation of an electrical business in Grand Rapids, Mich.; that a drawing, introduced in evidence as Exhibit C, of the machine thereafter constructed was made in April of that year; that this machine was completed in June, 1924, and satisfactorily operated at that time. His testimony with respect to satisfactory operation was in response to questions which will hereafter be referred to. He further testified that thereafter he, together with his associate, one Winterhalter, began the construction of what is termed by appellant "a more perfect commercial machine," embodying the invention, and that said machine was ready for operation in October, 1925.

Appellant contends that the record establishes by a preponderance of evidence that the invention involved was disclosed by appellant to said Winterhalter, to appellant's wife, and to three other persons who were not experts in the electrical art, in the summer of 1924, and that all of said persons witnessed successful tests of the invention. All of said persons testified in behalf of appellant.

Both the Examiner of Interferences and the Board of Appeals held that conception of the invention prior to his filing date, November 1, 1926, had not been established by appellant; that if conception should be awarded to appellant in 1924, it was not established that the machine alleged to have been constructed in that year was operated and tested sufficiently to constitute a reduction to practice of the invention, and was therefore nothing more than an abandoned experiment; and that, even though conception be awarded to appellant in 1924, he had not shown diligence from immediately prior to appellee's entry into the field, namely January 8, 1925, as to counts 1, 2, 4 and 5, and October 15, 1925, as to counts 3, 6 and 7, to appellant's filing date, November 1, 1926. Therefore both Patent Office tribunals awarded priority of invention to appellee as to all of the counts in issue. From this award by the Board of Appeals appellant takes this appeal.

While a number of errors have been assigned by appellant, there is really but one question before us for determination, and that is whether, upon the record herein, appellant has established by a preponderance of evidence conception of the invention involved before appellee entered the field and reduction to practice prior to that time, or, if not reduced to practice before such time, whether he was diligent from immediately prior to appellee's entry into the field until his (appellant's) reduction of the invention to practice, constructively or otherwise.

As heretofore indicated, appellant relies for corroboration of both conception and reduction to practice of the invention upon the testimony of his associate, Winterhalter, his wife, and three nonexpert witnesses. Appellee seasonably filed in the Patent Office a motion to strike out specified questions and answers of appellant's witnesses because the questions were either leading or called merely for conclusions of nonexpert witnesses. This motion was denied by the Examiner. We do not find it necessary to pass upon this question because we are in accord with the conclusions of the Examiner of Interferences and the Board of Appeals that, even though said motion be denied, appellant has not established by a preponderance of evidence either reduction of the invention to practice before appellee's entry into the field, or diligence in reducing it to practice from immediately prior to appellee's entry into the field until appellant did reduce it to practice. Holding this view, we may assume that appellant's conception of the invention is established by a preponderance of evidence as not later than June, 1924, which was some time prior to appellee's entry into the field. We therefore come to an examination of the evidence in the case bearing upon the question of reduction to practice of the invention, assuming, without deciding, that it was conceived by appellant at the time above stated.

The invention involves an apparatus for the welding or cutting of materials. It is clear that such a device, in order to constitute a reduction to practice of the invention, must be tested to demonstrate that the apparatus will accomplish the purpose intended. Careful examination of the testimony discloses that there is no evidence as to what the material was that was claimed to have been welded in 1924, and there is no evidence that a useful weld was accomplished. It is true that appellant gave the following answers to questions propounded by his counsel:

Q79. When was the machine completed and first successfully operated in this country?
A. In June, 1924.
Q84. Was this first machine thoroughly and practically operative for arc welding, and did every essential part of it work efficiently when it was first constructed?
A. Yes, it was thoroughly operative. The principle of the machine was working in good condition.

The witness Winterhalter, appellant's associate, answered a question propounded by appellant's counsel as follows:

Q37. Did this machine operate successfully at that time, June, 1924?
A. Yes.

Later in his testimony, with reference to a cut-out device alleged to have been used in said machine in 1924, he testified as follows:

Q40. Did it operate successfully?
A. Yes.

With reference to two-phase operation, he testified that he saw it operate in 1924, but there is no testimony, by way of conclusion or otherwise, that the two-phase operation was successful.

With respect to the nonexpert witnesses, while they all described the operation of a machine that they saw, which we assume embodied appellant's conception, none of them testified as to the material that was welded or the nature of the weld that was produced.

We therefore can not hold, upon the testimony of appellant and these witnesses, that the alleged tests of the machine demonstrated that the machine would accomplish the purpose for which it was intended. For these reasons we can not find that there was a reduction to practice of the invention embodied in the counts during 1924, and we therefore agree with the tribunals of the Patent Office that the construction and alleged use of said machine during 1924 was only an abandoned experiment.

There is no evidence in the record upon which a reduction of the invention to practice can be based prior to October, 1925. Appellant's testimony is that, shortly after said alleged tests in June, 1924, he borrowed $700 from one Peter Horter, to be used for the promotion of a certain three-phase arc welder. This fact is established and the written agreement with respect to such loan is found in the record as an exhibit. The testimony of appellant and testimony on his behalf shows that thereafter work was begun, largely handwork, on the construction of a larger machine which would be commercially useful for all welding purposes. There is no testimony as to the dates of such activities, but both appellant and his associate Winterhalter testified that the second machine was built and ready for operation in October, 1925. This was about 10 months after appellee entered the field as to counts 1, 2, 4 and 5, and at about the time of appellee's entry into the field as to counts 3, 6 and 7. Appellant was chargeable with diligence in reducing his invention to practice from immediately prior to January 8, 1925, as to counts 1, 2, 4 and 5, and from immediately prior to October 15, 1925, as to counts 3, 6 and 7. Assuming, without deciding, that if the second machine had been completed and successfully tested in October, 1925, as alleged, diligence upon the part of appellant should be presumed, because of the character of the construction of the machine, from January, 1925, to October, 1925, we can not find that it is established by a preponderance of the evidence that said second machine was constructed and ready for operation in October, 1925. Appellant's testimony upon this point, after describing the second machine, is as follows:

Q110. When was the machine again in operative condition?
A. October, 1925.
Q111. Did you again use the machine *at that time*, and to what extent? (Italics ours.)
A. I used the machine, after it was finished, at the Certain-Teed Products, at Beverly, on steel ovens for about three days; at the Grand Rapids Road Equipment Company on road scraper parts; Michigan Chair Company, on steam boiler; then I put it in the plant of Haven-Busch Wire Company where they used it on sheet metal for two months.
Q112. Did the machine work perfectly satisfactorily on all of these jobs?
A. Yes, it did.

It will be observed that the plain effect of this testimony is that, beginning in October, 1925, the machine was ready for use and was tested in the places named in appellant's testimony. Were this testimony of appellant corroborated and there were no other testimony in the record tending to rebut the same, we of course should hold that the second machine was completed in October, 1925. The testimony of appellant's associate Winterhalter upon this point, after describing the construction of the second machine, is as follows:

Q55. When was the machine next in usable condition after you altered it from its original construction?
A. I would say that was in about October, 1925.
Q56. Did you put it to any use *at that time*?
A. Yes, that is in our shop, *shortly after we had it out on demonstration.* (Italics ours.)
Q57. Where did you put it out on demonstration?
A. At a wire company, the Haven-Busch Wire Works in Grand Rapids.
Q58. Do you know what type of work it was used on in that plant?
A. Sheet iron and steel.
Q59. How long was it in use in the plant?
A. Four weeks I believe approximately.
* * * * * * *
Q62. *After having demonstrated the machine in that condition in October, 1925*, what did you next do with the machine?
A. Well, we of course took it to the shop, and we made new patterns for a new cabinet and a new track, and immediately started completing the new type automatic control switches. (Italics ours.)

This testimony, standing alone, clearly corroborates the testimony of appellant that the second machine was constructed and subjected to test beginning in October, 1925. Although appellant called no witnesses who were employees (or officials) of the concerns mentioned in his testimony and that of Winterhalter, nevertheless we should hold that the testimony of these witnesses, standing alone, was sufficient to establish the completion of the second machine in October, 1925.

When appellant closed his testimony, it certainly must have been the intention to have the Patent Office tribunals and a reviewing court, if the case should be reviewed, understand that the second machine was completed and used in October, 1925, or shortly thereafter.

Appellee, however, produced witnesses from the various firms at which said second machine was alleged to have been demonstrated, and it is clearly established, not only by the testimony of such witnesses, but by bills and invoices from appellant himself to the firms named in his testimony, that the use of said second machine by such firms was not in October, 1925, or shortly thereafter, but in the spring of 1927. This is not denied by appellant's counsel, either in his brief or upon oral argument. We may observe, in passing, that the testimony of these witnesses establishes that when the machine was used in their plants it satisfactorily accomplished the purpose for which it was intended.

We are loath to believe that appellant and his associate Winterhalter testified intentionally falsely upon this very important point, and we prefer to take the view that both were mistaken in their recollection of when said second machine was completed and ready for operation, and actually demonstrated in the manner described by them.

It is inconceivable to us that the second machine should have been completed in 1925 and no effort made to test it or demonstrate it thereafter for a period of about one year and a half. This is so contrary to the natural course of human action that we must find from the evidence in the case that such second machine was not constructed and ready for operation in October, 1925, and probably was not constructed and ready for operation until early in 1927.

While appellant contends that the discrepancy between appellant's testimony as to the tests of the second machine and the testimony introduced by appellee upon that subject is immaterial, it is, as a matter of fact, highly material because, unless we can find that the second machine was constructed in October, 1925, there is a clear want of evidence establishing diligence upon the part of appellant in reducing his invention to practice during the time when he was chargeable with such diligence. We can not find, upon the evidence, that appellant exercised the diligence required.

The second machine, which was successfully demonstrated in 1927, was designed for operation on three-phase electrical supply only. With respect to reduction to practice of the two-phase machine, the evidence is even less satisfactory than in the case of the three-phase machine, there being nothing in the record with respect to a two-phase machine of a date later than 1924, and we find no corroborating evidence that the invention embodied in the two-phase machine was reduced to practice prior to appellant's filing date, November 1, 1928.

From the record before us, and by which we are governed in arriving at our conclusion, we are compelled to hold that appellant has failed to establish by a preponderance of evidence that he was the first inventor of the invention set forth in the various counts here in issue, and the decision of the Board of Appeals is affirmed.

Affirmed.

Patent Suits

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922.]

1,118,547, W. C. Griffin, Fruit drying machine; 1,122,018, C. C. McIntosh, Fruit drying apparatus; 1,466,798, H. M. Miller, Apparatus for and method of peeling vegetables or fruits; 1,468,873, W. D. Bost et al., Apparatus for peeling fruits or vegetables, D. C., W. D. Wash., N. Div., Doc. 772, *Stebler-Parker Co.* v. *C. M. Bryant* (*Fruit Machines Co.*). Dismissed with prejudice Dec. 22, 1932.

1,122,018. (See 1,118,547.)

1,173,079, E. F. Alexanderson, Selective tuning system; 1,195,632, W. C. White, Circuit connections of electron discharge apparatus; 1,239,852, F. K. Vreeland, Receiver of electrical impulses; 1,544,081, same, Transmitting intelligence by radiant energy; 1,573,374, P. A. Chamberlain, Radio condenser; 1,728,879, Rice & Kellogg, Amplifying system, filed Dec. 23, 1932, D. C., S. D. N. Y., Doc E 73/254, *Radio Corp. of America et al.* v. *John Wanamaker, N. Y.*

1,180,159, I. Langmuir, Incandescent electric lamp; 1,410,499, A. Pacz, Metals and their manufacture; 1,687,510, M. Pipkin, Electric lamp bulb, D. C., S. D. Calif. (Los Angeles), Doc. E Y-93-C, *General Electric Co.* v. *Standard Woodenware & Specialty Co.* Decree for plaintiff Dec. 20, 1932.

1,182,090. (See 1,695,557.) 1,195,632. (See 1,173,079.)

1,223,659, W. S. Barnickel, Treatment of crude oil; 1,467,831, same, Process for treating petroleum emulsions; 1,596,589, 1,596,590, M. De Groote, same, D. C., S. D. Calif. (Los Angeles), Doc. Y-39-C, *The Tretolite Co. et al.* v. *Oil Field Chemical Corp., Ltd., et al.* Decree for plaintiff Nov. 18, 1932.

1,231,764, F. Lowenstein, Telephone relay; 1,618,017, same, Wireless telegraph apparatus; 1,403,475, H. D. Arnold, Vacuum tube circuit; 1,465,332, same, Vacuum tube amplifier; 1,507,016, L. De Forest, Radio signaling system; 1,507,017, same, Wireless telegraph and telephone system, filed Dec. 23, 1932, D. C., S. D. N. Y., Doc. E 73/253, *Radio Corp. of America et al.* v. *John Wanamaker, N. Y.*

1,239,852. (See 1,173,079.)

1,240,459, C. J. Klein, Electric switch; 1,651,035, 1,783,665, G. J. Meur, same, appeal filed Dec. 24, 1932, C. C. A., 2d Cir., Doc. 12493, *Cutler-Hammer, Inc.*, v. *Carling Tool & Machine Co., Inc.*

1,256,491, W. E. Urschel, Process for snipping string beans; 1,256,492, 1,336,991, same, Apparatus for snipping string beans, appeal filed Dec. 22, 1932, C. C. A., 4th Cir., Doc. 3443, *Chisholm-Ryder Co., Inc.*, v. *B. I. Buck.*

1,256,492. (See 1,256,491.)

1,257,084, A. E. Lard, Golf club, filed Jan. 5, 1933, D. C., S. D. N. Y., Doc. E 73/340, *The Metallic Shaft Co.* v. *A. G. Spalding & Bros.*

1,259,917, E. L. Sharpneck, Heel for shoes; 1,718,177, W. H. Nutt, Heel covering, filed Nov. 9, 1932, D. C., E. D. Pa., Doc. 7375, *United Shoe Machinery Corp.* v. *W. F. Cowon, jr., et al.*

1,279,454, D. H. Schweyer, Train stopping apparatus; 1,389,602, same, Automatic train control system, C. C. A., 3d Cir., Doc. 4679, *Schweyer Electric & Mfg. Co.* v. *Reading Co. et al.* Decree affirmed Jan. 4, 1933.

1,320,384, Godbold & Fletcher, Drill cutter; 1,480,014, F. L. Scott, Self-cleaning roller drill; 1,647,753, Scott & Wellenstek, Drill cutter, D. C., W. D. Okla. (Oklahoma City), Doc. E 1188, *Hughes Tool Co.* v. *Garber Tool Co.* Patent held valid and infringed Dec. 23, 1932.

1,336,991. (See 1,256,491.)

1,374,970, E. V. Weyand, Garment material, filed Jan. 6, 1933, D. C., S. D. N. Y., Doc. E 73/345, *Cockcroft Arts, Inc.*, v. *Novelties, Inc., et al.*

1,389,602. (See 1,279,454.) 1,403,475. (See 1,231,764.)

1,410,499. (See 1,180,159.)

1,423,956, Mitchell & White, Tipless incandescent lamp; 1,687,510, M. Pipkin, Electric lamp bulb, filed Dec. 14, 1932, D. C., S. D. Calif. (Los Angeles), Doc. E Y-85-J, *General Electric Co.* v. *S. Fujotha et al.* (*Union Importing Co.*).

1,440,168. (See Re. 17,393.)

1,448,279, 1,579,392, Pridham & Jensen, Electro dynamic receiver; 1,881,324, H. E. Metcalf, Signal reproducer, filed Dec. 23, 1932, D. C., S. D. Calif. (Los Angeles), Doc. E Y-99-H, *The Magnavox Co.* v. *Lansing Mfg. Co., et al.*

1,465,332. (See 1,231,764.) 1,466,798. (See 1,118,547.)

1,467,831. (See 1,223,659.) 1,468,873. (See 1,118,547.)

1,469,305. (See 1,683,096.) 1,480,014. (See 1,320,384.)

1,486,883, E. P. Halliburton, Method of hydrating cement; 1,500,385, same, Method of and apparatus for mixing material, filed Oct. 27, 1932, D. C., W. D. La. (Shreveport), Doc. E 510, *E. P. Halliburton, et al.* v. *E. L. Hunt.* Doc. E 511, *E. P. Halliburton et al.* v. *A. D. King et al.*

1,500,385. (See 1,486,883.) 1,507,016. (See 1,231,764.)

1,507,017. (See 1,231,764.)

1,526,982, E. W. Hill, Stencil sheet, D. C., S. D. N. Y., Doc. E 73/99, *A. B. Dick Co.* v. *Molling Equipment Corp. et al.* Consent decree for plaintiff (notice Jan. 9, 1933). Same, D. C., E. D. Pa., Doc. 7365, *A. B. Dick Co.* v. *Safe Guard Corp.* Consent decree for injunction Jan. 10, 1933.

1,529,544. (See 1,683,096.)

1,537,564, E. B. Symons, Gyratory cone crusher; 1,537,565, same, Process of crushing hard material, D. C., E. D. Wis. (Milwaukee), Doc. ——, *Nordberg Mfg. Co.* v. *Smith Engineering Works.* Patent held valid Dec. 29, 1932.

1,537,565. (See 1,537,564.) 1,544,081. (See 1,173,079.)

1,573,374. (See 1,173,079.) 1,579,392. (See 1,448,279.)

1,596,589. (See 1,223,659.) 1,596,590. (See 1,223,659.)

1,597,129, L. L. Watters, Bed-pan cleanser and sterilizer, D. C., S. D. N. Y., Doc. E 54/40, *L. L. Watters et al.* v. *The Kny-Scheerer Corp.* Patent sustained (notice Jan. 6, 1933).

1,611,012, F. H. Flowers, Three-way dump motor truck body, appeal filed Apr. 16, 1932, C. C. A., 3d Cir., Doc. 4898, *F. H. Flowers* v. *Mayor Car Corp.*

1,618,017. (See 1,231,764.)

1,621,360, R. N. Falge, Incandescent lamp, D. C., E. D. N. Y., Doc. E 6605, *General Electric Co.* v. *P. Sorensen Mfg. Co., Inc.* Consent decree for plaintiff Jan. 6, 1933.

1,622,957. (See Re. 17,393.) 1,633,789. (See 1,815,745.)

1,646,173, 1,693,005, M. C. Steichen, Hair waver, filed Dec. 28, 1932, D. C., S. D. N. Y., Doc. E 73/285, *M. C. Steichen* v. *A. D. Powers.*

1,647,753. (See 1,320,384.)

1,648,808, L. A. Hazeltine, Wave signaling system, filed Jan. 5, 1933, D. C., S. D. N. Y., Doc. E 73/337, *Hazeltine Corp.* v. *Pilot Radio & Tube Corp. et al.*

1,651,035. (See 1,240,459.)

1,658,223, L. Blackmore, Refrigerator control, filed Jan. 9, 1933, D. C., S. D. Iowa. (Des Moines), Doc. 4497, *Frigidaire Corp.* v. *W. G. MacGregor.*

1,683,096, R. M. Pyles, Rotary jar; Re. 15,760 (of 1,469,305), 1,529,544, J. A. Kammerdiner, same, D. C., S. D. Calif. (Los Angeles), Doc. E Y-83-H, *J. A. Kammerdiner* v. *Bush-Ross Tool Co.* "Decree after settlement by the parties Dec. 29, 1932".

1,687,510. (See 1,423,956 and 1,180,159.)

1,693,005. (See 1,646,173.)

1,695,557, R. H. Myers, Spark plug testing device; 1,836,891, C. W. Price, same; 1,182,090, A. P. Jackson, same, D. C., E. D. Mich. (Detroit), Doc. 5489, *Wayne Equipment Mfg. Co., Inc.*, v. *Champion Spark Plug Co.* Bill and counter-claim dismissed Dec. 28, 1932.

1,710,073, 1,714,191, S. Ruben, Electrical condenser, filed Dec. 23, 1932, D. C., S. D. N. Y., Doc. E 73/257, *Ruben Condenser Co. et al.* v. *Dumont Electric Co., Inc., et al.* Same, filed Jan. 20, 1933, D. C., S. D. N. Y., Doc. E 73/454, *Ruben Condenser Co. et al.* v. *A. M. Fleckheim & Co., Inc.*

1,714,191. (See 1,710,073.)

1,716,670, L. B. Sperry, Device for launching and landing aeroplanes from and upon suspended positions, D. C., E. D. N. Y., Doc. E 4082, *W. B. Perkins, jr., et al.* v. *The Lawrence Sperry Aircraft Co., Inc.* Patentee held in suit under Sec. 4915 R. S. to be first inventor Nov. 30, 1932.

1,718,177. (See 1,259,917.)

1,726,113, E. C. Miller, Machine for making annular pieces of candy, C. C. A., 2d Cir., Doc. 12056, *E. C. Miller et al* v. *Life Savers, Inc.* Decree affirmed (notice Jan. 9, 1933).

1,728,879. (See 1,173,079.)

1,755,114, L. A. Hazeltine, Unicontrol signaling system; 1,755,115, same, Variable condenser, filed Dec. 23, 1932, D. C., S. D. N. Y., Doc. E 73/250, *Hazeltine Corp.* v. *Simplex Radio Corp.* Same, D. C., E. D. N. Y., Doc. E 6727, *Hazeltine Corp.* v. *Michaels Bros., Inc.* Consent decree for plaintiff Jan. 3, 1933.

1,755,115. (See 1,755,114.)

1,763,380, 1,798,962, C. E. Trube, Electric coupling system, D. C., S. D. N. Y., Doc. E 73/146, *Hazeltine Corp.* v. *Emerson Radio & Phonograph Corp.* Consent order of discontinuance (notice Dec. 29, 1932).

1,771,020, Thurm & Engels, Traveling tray ovens, C. C. A., 2d Cir., Doc. 12261, *Baker Perkins Co., Inc.*, v. *T. Roulston, Inc.* Decree affirmed (notice Jan. 9, 1933).

1,783,665. (See 1,240,459.)

1,789,949, A. Georgiev, Electrolytic cell, D. C., S. D. N. Y., Doc. E 57/340, *Aerovox Wireless Corp.* v. *Concourse Electric Co., Inc.* Dismissed Jan. 6, 1933.

1,797,205, H. W. Houck, Electron tube apparatus, D. C. Del., Doc. E 901, *Dubilier Condenser Corp.* v. *Pilot Radio & Tube Corp.* Dismissed Dec. 31, 1932.

1,798,962. (See 1,763,380.)

1,814,464, L. E. Baltzley, Machine for snelling fish hooks; 1,861,198, W. S. Torrence, Snelling machine; 1,869,857, H. W. Meyer, Fishhook snelling machine, filed Nov. 14, 1932, D. C., E. D. Pa., Doc. 7379, *W. H. Meyer & Son, Inc.*, v. *H. C. Kaufman.*

1,815,745, R. E. Thompson, Safety razor; 1,633,789 H. J. Gaisman, same, appeal filed Dec. 15, 1932, C. C. A. 2d Cir., Doc. 12478, *Gillette Safety Razor Co.* v. *Hewis Hardware Co.*

1,832,437, L. J. Wahl, Vibrator, D. C., E. D. Wis. (Milwaukee), Doc. 3596, *Wahl Clipper Corp.* v. *Andis Clipper Co. et al.* Claim 7 held void, dismissed for want of equity Jan. 4, 1933.

1,833,225, Neimeyer & Bruebaker, Tire, D. C., N. D. Ohio E. Div., Doc. 4321, *H. F. Freeman* v. *Seiberling Rubber Co* Dismissed Jan. 11, 1933.

1,836,891. (See 1,695,557.)

1,845,302, 1,857,055, W. A. MacDonald, Coupling system, filed Dec. 23, 1932, D. C., S. D. N. Y., Doc. E 73/251, *Hazeltine Corp.* v. *Simplex Radio Co.*

1,846,615, H. W. Russ. Wood heel grooving machine; 1,860,789, W. N. Sawyer, same, filed Nov. 9, 1932, D. C., E. D. Pa., Doc. 7373, *United Shoe Machinery Corp.* v. *W. F. Cowon, jr., et al.*

T. M. 75,658, The Amies Asphalt Co., Bituminous product, appeal filed June 18, 1932, C. C. A. 3d Cir., Doc. 4937, *Amiesite Asphalt Co. of America* v. *Interstate Amiesite Co.* (To correct error in 426 O. G., p. 8, originally published as Des. 75,568).

Adjudicated Patents

(D. C. Idaho) Smith patent, No. 1,262,860, for incubator, claims 1 and 2 *Held* infringed. *Smith* v. *Jensma*, 1 F. Supp. 999.

(C. C. A. N. Y.) Stein and Austin patent, No. 1,564,378, for bleached and dyed furs, claims 17 and 20 *Held* invalid and the other claims *Held* valid and infringed. *Steinfur Patents Corporation* v. *William Beyer, Inc.*, 62 F.(2d) 238.

(C. C. A. N. Y.) Stein and Austin patent, No. 1,573,200, for process of bleaching and dyeing furs, *Held* valid and infringed. *Id.*

Adverse Decisions in Interference

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,812,749, R. H. Kienle and W. H. Schelber, Resinous material and method of making same, decided February 6, 1933, claims 1, 2, 3, 4, 5, 6, 7, 9, 11, and 12.

Pat. 1,869,681, P. K. Frolich, Method for the production of normally liquid hydrocarbons from gaseous or lower boiling hydrocarbon materials, decided February 9, 1933, claim 1.

Disclaimers

1,839,402.—*Rudolf Lorant*, Vienna, Austria. APPARATUS FOR TRANSFERRING DATA FROM PERFORATED RECORDS. Patent dated January 5, 1932. Disclaimer filed February 17, 1933, by the assignee, *The Tabulating Machine Company.*

Hereby enters this disclaimer to that part of the claims in said specification which is in the following words, to wit:

"1. A device for transferring data represented by perforations in a sheet to a receiving device comprising a sensing mechanism for simultaneously sensing a plurality of positions in one or more columns on the sheet for perforations, a receiving device and control means for controlling the latter successively in accordance with perforations in different columns on the sheet.

"2. A device for transferring perforations comprising a sensing mechanism for simultaneously sensing a plurality of columns of a record card, a punch, and controlling means for the punch controlled by the sensing mechanism to effect column by column operation of the punch in accordance with the simultaneous sensing of a plurality of columns by the sensing mechanism."

"4. A device for transmitting data comprising a sensing mechanism for simultaneously searching a plurality of positions in a plurality of columns on a sheet for perforations, a receiving device and a transmitter having a set of elements connected to the sensing mechanism, a second set of elements connected to the receiving device and means for coordinating the two sets of elements to transmit the several data according to the simultaneous sensing of the sheet successively to the receiving device.

"5. A device for transmitting data comprising a sensing mechanism for simultaneously searching a plurality of columns of a record sheet for perforations, a receiving device including mechanism for registering data successively column by column on the receiving device and a transmitter having a set of elements connected to the sensing mechanism, a second set of elements connected to the successively operating registering mechanism of the receiving device and means for coordinating the two sets of elements to bring the successively operating mechanism under control of the searching mechanism for column by column operation."

1,847,739.—*Arthur M. Wilhelm*, Randolph, N. Y. AVIATION MARKER. Patent dated March 1, 1932. Disclaimer filed February 3, 1933, by the patentee.

I disclaim the subject matter of claims 1 and 2 of my Patent No. 1,847,739, except as they apply to an aviation marker having an external information-imparting shape.

Suggestion for the Use of Coupons

The execution of orders for printed copies of U. S. patents, trade-marks, etc., will be considerably expedited if coupons are used. Such coupons may be purchased at the Patent Office in lots of 20 at $2.00 and 100 at $10.00.

Coupon orders do not have to be accompanied by letters of transmittal. They require nothing but the filling in of the patent number, the name of the inventor, the date of issue, and the name and address of the party desiring the service.

CARNEGIE LIBRARY OF ATLANTA

TRADE-MARKS

OFFICIAL GAZETTE, MARCH 7, 1933

[VOL. 428. No. 1]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

41,826.—*Title:* SCHREIBER'S MANRU BARLEY MALT SYRUP. For Barley Malt Syrup. SCHREIBER PRODUCTS CORPORATION, Buffalo, N. Y. Published December 22, 1932.

41,827.—*Title:* "X" ODORLESS DRY CLEANER. For Dry Cleaning Composition. EDWARD R. TOLFREE, doing business as "X" Laboratories, New York, N. Y. Published March 1, 1932.

41,828.—*Title:* "X" PENETRATING LUBRICANT. For Lubricants. EDWARD R. TOLFREE, doing business as "X" Laboratories, New York, N. Y. Published June 25, 1932.

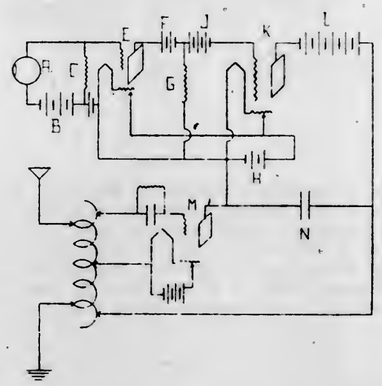
41,829.—*Title:* DOUBLE PURPOSE DENTIFRICE. For Dentifrice. TRENT LABORATORIES, Cleveland, Ohio. Published December 31, 1932.

41,830.—*Title:* UNION METAL-TONE. For Liquid for Cleaning and Polishing Copper, Bronze, Brass, Zinc, Pewter, Nickel, Etc. UNION OIL COMPANY OF CALIFORNIA, Los Angeles, Calif. Published December 15, 1932.

PRINTS

REGISTERED MARCH 7, 1933

14,066.—*Title:* SOMETIME SOON . . . FACE THESE FACTS. For Cleansing Cream, Skin Tonic, Skin Cream, Anti-Brown Spot Ointment, Orange Skin Food, Etc. ELIZABETH ARDEN OF NEW YORK, LTD., doing business as Elizabeth Arden, New York, N. Y. Published January 1, 1933.



14,067.—*Title:* UNCLE JACK'S CLUB SCRAP BOOK. For Scrap Books. THE EVENING NEWS COMPANY, Baltimore, Md. Published January 1, 1933.

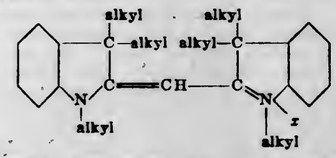
14,068.—*Title:* SKIPPY. For Milk of Magnesia, Milk of Magnesia Wafers, and Sodium Carbonate. E. R. SQUIBB & SONS, New York, N. Y. Published January 11, 1933.

REISSUES

MARCH 7, 1933

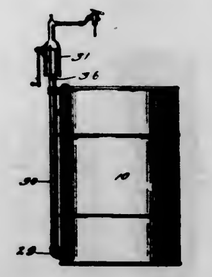
18,756. RESISTOR CELL CIRCUIT. CHARLES FRANCIS JENKINS, Washington, D. C., assignor to Jenkins Laboratories, Washington, D. C., a Corporation of the District of Columbia. Original No. 1,693,509, dated Nov. 27, 1928, Serial No. 745,215, filed Oct. 22, 1924. Application for reissue filed May 7, 1930. Serial No. 450,530. 9 Claims. (Cl. 250—17.)

2. In combination a first electron discharge device, circuits for causing said device normally to generate sustained oscillations, another electron discharge amplifying device, means for applying an operating plate potential to said first electron discharge device through the conducting space between the anode-cathode of said amplifier device, a light sensitive cell controlling said second device, and means for biasing the grid of the second device to provide sharp off and on control of oscillations by said cell.



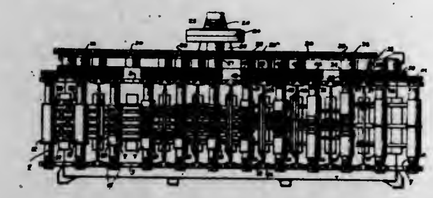
18,757. HOSIERY. EDWIN BRAND BRACHAM, Easton, Pa., assignor to Chipman Knitting Mills, Easton, Pa., a Corporation of Pennsylvania. Original No. 1,849,783, dated Mar. 15, 1932, Serial No. 405,545, filed Nov. 7, 1929. Application for reissue filed Nov. 19, 1932. Serial No. 643,329. 15 Claims. (Cl. 66—178.)

1. The method of manufacturing hosiery, intended to be worn with the reverse face of the fabric at the outside, which comprises knitting a stocking blank with a main or body yarn, and incidentally producing reinforced portions with auxiliary yarn fed so that in the fabric as used the loops formed from it underlie those formed from the main yarn on the outwardly exposed reverse face of the fabric.



18,758. DYESTUFF DERIVED FROM INDOLINE BASES AND PROCESS OF PREPARING SAME. OTTMAR WAHL, Leverkusen, Germany, assignor to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Original No. 1,755,678, dated Apr. 22, 1930, Serial No. 186,829, filed Apr. 26, 1927. Application for reissue filed Feb. 20, 1932. Serial No. 594,383. 5 Claims. (Cl. 260—47.)

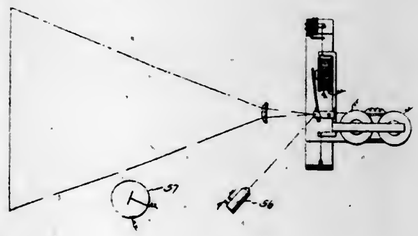
3. As new products dyestuffs corresponding probably to the general formula:



wherein the benzene nuclei may be substituted or not and x stands for an organic or inorganic acid radicle, which are in a dry state yellow to orange-red crystalline powders, soluble in water with light yellow to orange-red color, and which dye natural and artificial silk and cotton when using tannin or other mordants in beautiful greenish-yellow to reddish-yellow shades of good fastness to light.

18,759. NONSUBSTITUTING CONTAINER. HAROLD B. LLOYD, Sioux City, Iowa. Original No. 1,793,811, dated Feb. 24, 1931, Serial No. 428,071, filed Feb. 13, 1930. Application for reissue filed May 6, 1931. Serial No. 535,540. 8 Claims. (Cl. 220—85.)

1. In a non-substituting container having top and bottom walls and a side wall, a withdrawal pipe extending through the side wall near the bottom of the container and projecting into the container and thence bent downwardly to a position adjacent the bottom of the container, a member secured to the bottom of the container and secured to the inner end of said withdrawal pipe to hold the same rigidly in position and an outwardly opening check valve associated with the inner end of the withdrawal pipe, the outer end of the withdrawal pipe projecting beyond the side wall to form means for attachment of a pumping mechanism.

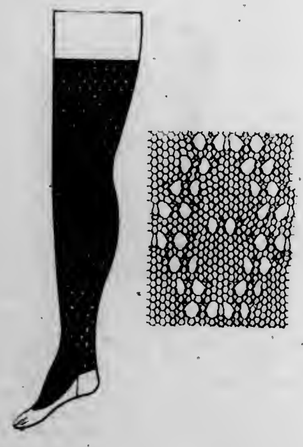


18,760. MACHINE FOR AND PROCESS OF FORMING METAL INTO SHAPES. CARL M. YODER, Lakewood, Ohio. Original No. 1,770,963, dated July 22, 1930, Serial No. 111,196, filed May 24, 1926. Application for reissue filed July 8, 1931. Serial No. 549,524. 17 Claims. (Cl. 153—28.)

11. The herein disclosed process which consists in passing a sheet of metal through and between sets of rolls, first forming therein a channel, then bending an adjacent portion of the metal out of the plane of the sheet and oppositely from the channel, forming a second channel laterally of the outer edge of the bent portion and finally flattening the bent portion back into the plane of the sheet.

12. In a machine of the class described, the combination of a frame, sets of rolls mounted thereon and arranged to receive between them a section of sheet metal, and means for driving said rolls, one set of rolls being shaped to form a longitudinal channel in the metal sheet and to bend the adjacent portions of the sheet out of the plane thereof, and succeeding sets of rolls being shaped to form a second longitudinal channel in the metal sheet and to bend the said portions of the sheet back into the original plane thereof.

18,761. TELEVISION APPARATUS. MELCHOR CENTENO V., New York, N. Y. Original No. 1,873,926, dated Aug. 23, 1932, Serial No. 430,375, filed Feb. 21, 1930. Application for reissue filed Jan. 4, 1933. Serial No. 650,192. 6 Claims. (Cl. 178—6.)



1. In a television apparatus, a stationary frame, a movable frame disposed within the stationary frame, flexible suspension means for supporting the movable frame in the stationary frame, the latter being provided with an armature, a low frequency magnet supported in the stationary frame so as to project its field through the armature of the movable frame, a mirror, a high frequency magnet carried by the movable frame, an armature for the last said magnet, said armature being flexibly mounted in the movable frame and carrying said mirror.

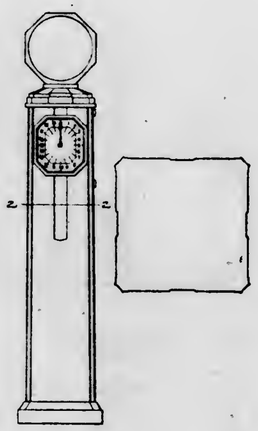
DESIGNS

MARCH 7, 1933

89,383. HOSIERY. EMIL J. BERGER, Hatfield, Pa., assignor to Dexdale Hosiery Mills, Lansdale, Pa., a Corporation of Pennsylvania. Filed Mar. 3, 1932. Serial No. 43,056. Term of patent 3½ years.

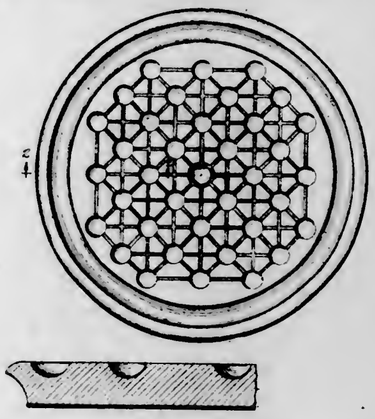
The ornamental design for hosiery, as shown and described.

89,384. SHOE. WALTER L. BRADY, Brockton, Mass., assignor to The Stetson Shoe Company, Inc., Weymouth, Mass., a Corporation of Massachusetts. Filed Dec. 30, 1932. Serial No. 46,673. Term of patent 7 years.



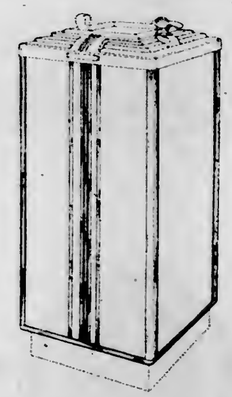
The ornamental design for a shoe, substantially as shown.

89,385. SHOE. WALTER L. BRADY, Brockton, Mass., assignor to The Stetson Shoe Company, Inc., Weymouth, Mass., a Corporation of Massachusetts. Filed Dec. 30, 1932. Serial No. 46,672. Term of patent 7 years.



The ornamental design for a shoe, substantially as shown.

89,386. PUMP CABINET. WILLIAM H. CURTIS, Dayton, Ohio, assignor to National Pumps Corporation, Dayton, Ohio, a Corporation of Ohio. Filed Jan. 3, 1933. Serial No. 46,687. Term of patent 7 years.

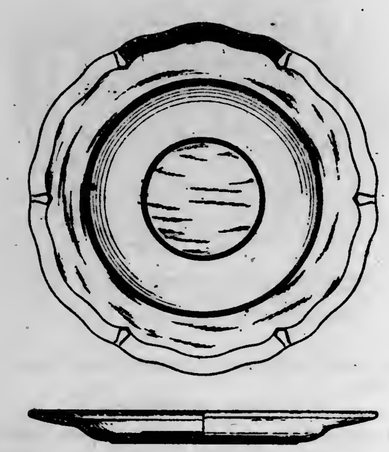


The ornamental design for a pump cabinet as shown.

89,387. GAME BOARD. REUBEN A. DAHLQUIST, Chicago, Ill. Filed Apr. 25, 1932. Serial No. 43,604. Term of patent 14 years.

The ornamental design for a game board as shown and described.

89,388. REFRIGERATOR CABINET OR SIMILAR ARTICLE. DONALD R. DOHNER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 12, 1932. Serial No. 42,838. Term of patent 7 years.



The ornamental design for a refrigerator cabinet or similar article, substantially as shown and described.

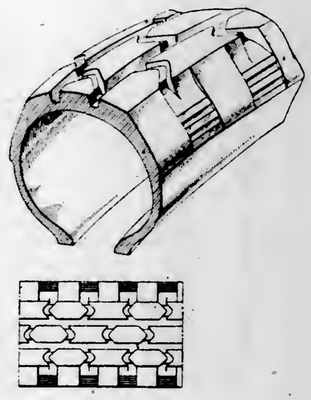
89,389. COVER OF A REFRIGERATOR CABINET OR SIMILAR ARTICLE. DONALD R. DOHNER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 12, 1932. Serial No. 42,839. Term of patent 7 years.

The ornamental design for a cover of a refrigerator cabinet or similar article, substantially as shown and described.

89,390. SAUCER. DAVID FISHER, Paden City, W. Va. Filed Jan. 5, 1933. Serial No. 46,737. Term of patent 3½ years.

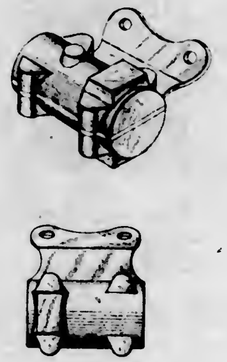
The ornamental design for a saucer, as shown.

89,391. CUP. DAVID FISHER, Paden City, W. Va. Filed Jan. 5, 1933. Serial No. 46,738. Term of patent 3½ years.



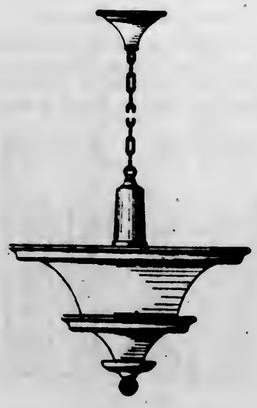
The ornamental design for a cup, as shown.

89,392. EMBROIDERED TEXTILE FABRIC OR A SIMILAR ARTICLE. ERNEST W. FREUDENBERG, Larchmont, N. Y. Filed Oct. 18, 1932. Serial No. 45,889. Term of patest 3½ years.



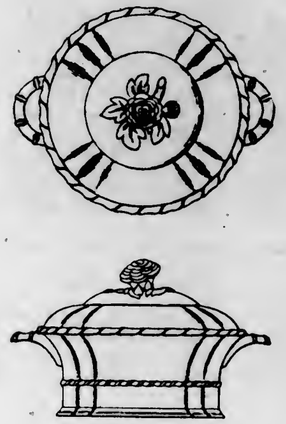
The ornamental design for an embroidered textile fabric or a similar article substantially as shown and described.

89,393. TIRE. WILLIAM S. GILBERT, Detroit, Mich., assignor to Morgan & Wright, a Corporation of Michigan. Filed Apr. 12, 1930. Serial No. 35,231. Term of patent 7 years.



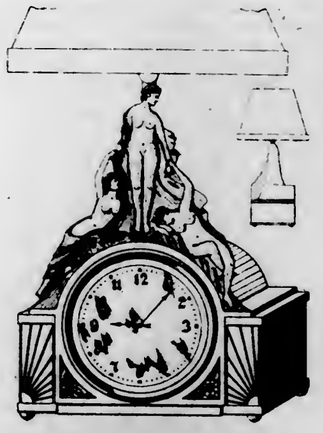
The ornamental design for a tire as shown.

89,394. COMBINED SWITCH CASING AND MOUNTING BRACKET OR SIMILAR ARTICLE. GEORGE A. GILLEN, Bronx, N. Y. Filed Nov. 3, 1932. Serial No. 45,720. Term of patent 14 years.



The ornamental design for a combined switch casing and mounting bracket or similar article, substantially as shown.

89,395. LIGHTING FIXTURE. GEORGE E. GLATTHAR, University Heights, and FREDERICK WENING, South Euclid, Ohio. Filed Dec. 3, 1932. Serial No. 46,305. Term of patent 7 years.

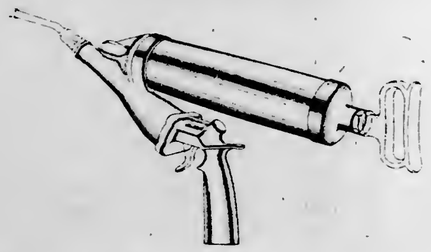


The ornamental design for a lighting fixture, as shown and described.

89,396. COVERED DISH OR SIMILAR ARTICLE. JOHN V. GODDARD, Trentham, England, assignor to Hugh C. Edmiston, New York, N. Y. Filed Jan. 6, 1933. Serial No. 46,744. Term of patent 7 years.

The ornamental design for a covered dish or similar article as shown.

89,397. COMBINED CLOCK CASE AND LAMP OR SIMILAR ARTICLE. JOSEPH GOTTLIEB, Jersey City, N. J. Filed Jan. 3, 1933. Serial No. 46,699. Term of patent 3½ years.

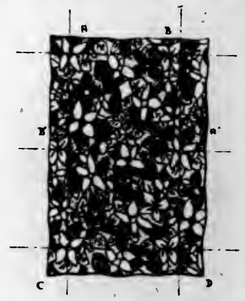


The ornamental design for a combined clock case and lamp or similar article, as shown and described.

89,398. TEXTILE FABRIC OR THE LIKE. ANTON GRULICH, Glen Ridge, N. J. Filed Jan. 21, 1933. Serial No. 46,911. Term of patent 3½ years.

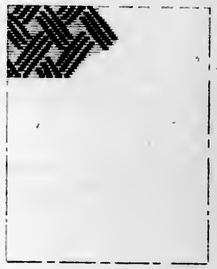
The ornamental design for a textile fabric or the like as shown.

89,399. GREASE GUN CASING. CLEO HARRIS, Cincinnati, Ohio, assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Dec. 28, 1932. Serial No. 46,645. Term of patent 14 years.



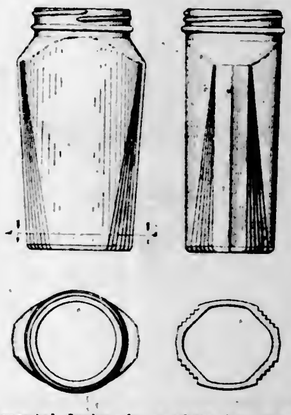
The ornamental design for a grease gun casing as shown.

89,400. TEXTILE FABRIC OR SIMILAR ARTICLE OF MANUFACTURE. ALFRED J. HEINKE, Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 18, 1932. Serial No. 45,400. Term of patent 3½ years.



The ornamental design for a textile fabric or similar article of manufacture substantially as shown and described.

89,401. TEXTILE FABRIC OR SIMILAR ARTICLE. CARL R. HELLMAN, New York, N. Y., assignor to William Willhelm Co., Inc., New York, N. Y. Filed Nov. 14, 1932. Serial No. 45,957. Term of patent 3½ years.



The ornamental design for a textile fabric or similar article as shown and described.

89,402. TEXTILE FABRIC OR SIMILAR ARTICLE. ISIDORE J. MARKS, New York, N. Y., assignor to E. S. Mendelson & Co., Inc., a Corporation of New York. Filed Nov. 1, 1932. Serial No. 45,696. Term of patent 3½ years.

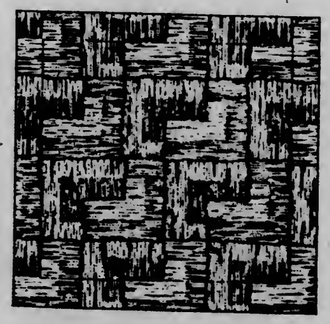
The ornamental design for a textile fabric or similar article as shown and described.

89,403. GLASS JAR. HARRY R. MCDONALD, Dunkirk, Ind., assignor to Hart Glass Manufacturing Company, Dunkirk, Ind., a Corporation of Indiana. Filed Dec. 15, 1932. Serial No. 46,463. Term of patent 7 years.

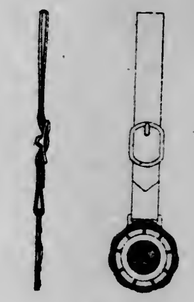
The ornamental design for a glass jar, as shown.

89,404. TEXTILE FABRIC OR THE LIKE. GEORGES MEGROS, Bronxville, N. Y. Filed Jan. 16, 1933. Serial No. 46,836. Term of patent 3½ years.

The ornamental design for a textile fabric or the like as shown.



89,405. BUCKLE. ABRAHAM MENTKOW, Brooklyn, N. Y., assignor to B. Blumenthal & Co. Inc., New York, N. Y. Filed Jan. 3, 1933. Serial No. 46,701. Term of patent 3½ years.

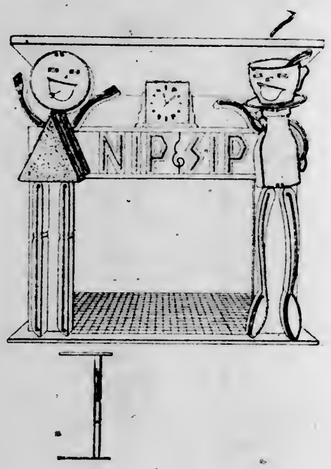


The ornamental design for a buckle, as shown.

89,406. CARPET. FRANCIS MURPHY, New York, N. Y., assignor to Bigelow Sanford Carpet Co., Inc., a Corporation of Massachusetts. Filed Oct. 5, 1932. Serial No. 45,216. Term of patent 7 years.

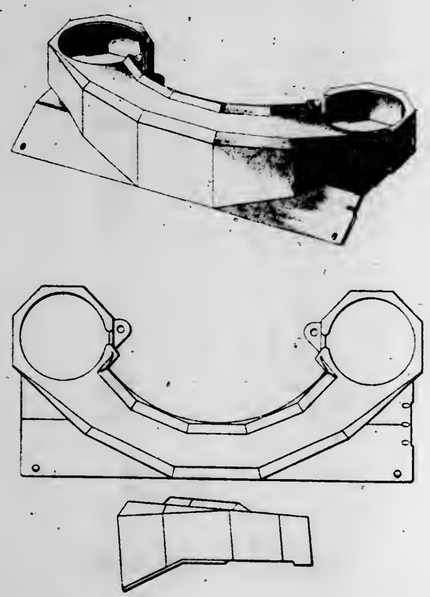
The ornamental design for a carpet substantially as shown and described.

89,407. WATCH-FOB. CHARLES OPPENHEIM, Chicago, Ill., assignor to Sears, Roebuck and Co., Chicago, Ill., a Corporation of New York. Filed July 5, 1932. Serial No. 44,265. Term of patent 7 years.



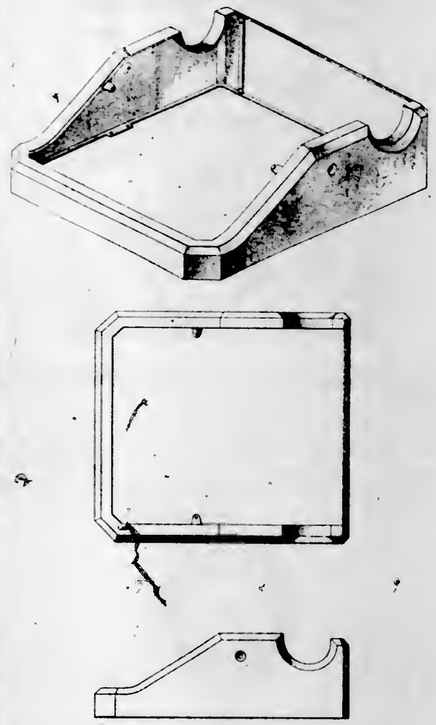
The ornamental design for a watch-fob, as shown and described.

89,408. HANDLE FOR COFFEE MAKERS. CHARLES B. PAGE, Los Angeles, Calif. Filed July 22, 1932. Serial No. 44,415. Term of patent 3½ years.



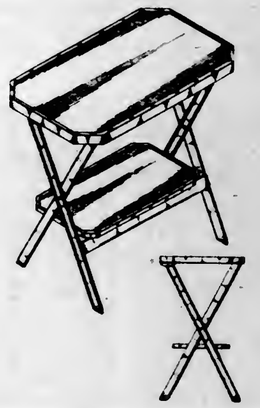
The ornamental design for a handle for coffee makers, as shown and described.

89,409. BUILDING FRONT. ALEXANDER W. PORTER, Atlantic City, N. J. Filed Nov. 25, 1932. Serial No. 46,153. Term of patent 14 years.



The ornamental design for a building front as shown.

89,410. TOP OR COVER PLATE FOR TYPEWRITING MACHINES. JAMES H. RAND, Jr., and JOHN A. ZELLERS, Buffalo, N. Y., assignors to Remington Rand Inc., New York, N. Y., a Corporation of Delaware. Filed Dec. 29, 1932. Serial No. 46,654. Term of patent 3½ years.



The ornamental design for a top or cover plate for a typewriting machine as shown.

89,411. FRAME FOR TYPEWRITING MACHINES. JAMES H. RAND, Jr., and JOHN A. ZELLERS, Buffalo, N. Y., assignors to Remington Rand Inc., New York, N. Y., a Corporation of Delaware. Filed Dec. 29, 1932. Serial No. 46,655. Term of patent 3½ years.

The ornamental design for a frame for typewriting machines, as shown.

89,412. TABLE OR SIMILAR ARTICLE. RUDOLPH REDLICH, Jr., Chicago, Ill. Filed Jan. 9, 1933. Serial No. 46,768. Term of patent 7 years.

The ornamental design for a table or a similar article, as shown.

89,413. LAMP SHADE. EUGENE SCHWARZ, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill., a Corporation of Illinois. Filed Dec. 22, 1932. Serial No. 46,551. Term of patent 3½ years.

The ornamental design for a lamp shade, substantially as shown and described.

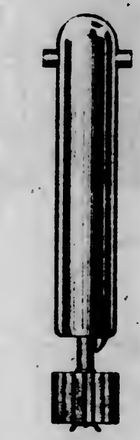
89,414. LAMP SHADE. EUGENE SCHWARZ, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill., a Corporation of Illinois. Filed Dec. 22, 1932. Serial No. 46,554. Term of patent 3½ years.

The ornamental design for a lamp shade, substantially as shown and described.

89,415. LAMP SHADE. EUGENE SCHWARZ, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill., a Corporation of Illinois. Filed Dec. 22, 1932. Serial No. 46,556. Term of patent 3½ years.

The ornamental design for a lamp shade, substantially as shown and described.

89,416. LAMP SHADE. EUGENE SCHWARZ, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill., a Corporation of Illinois. Filed Dec. 22, 1932. Serial No. 46,558. Term of patent 3½ years.



The ornamental design for a lamp shade, substantially as shown and described.

89,417. ARM SLING. KATHERINE E. UHRIG and ANNA K. UHRIG, Dayton, Ohio. Filed July 8, 1932. Serial No. 44,287. Term of patent 7 years.

The ornamental design for an arm sling, as shown.

89,418. ELECTRICAL DISCHARGE DEVICE. CLAYTON TRIDLE ULREY, East Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Jan. 26, 1932. Serial No. 42,632. Term of patent 14 years.

The ornamental design for an electrical discharge device, as shown and described.

89,419. SHOE SOLE. CLARENCE L. WHITE, Cuyahoga Falls, Ohio. Filed Dec. 19, 1932. Serial No. 46,581. Term of patent 7 years.

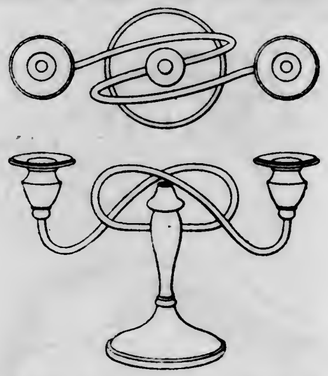
The ornamental design for a shoe sole, as shown.

89,420. JAR. FRASIER SMITH, Zanesville, Ohio, assignor to Hazel-Atlas Glass Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Jan. 9, 1933. Serial No. 46,763. Term of patent 14 years.

The ornamental design for a jar, as shown.

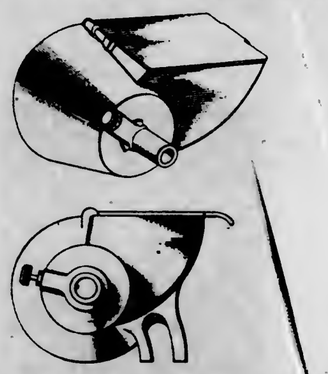
89,421. COMBINED FLASH-LIGHT CAP AND HANGER RING. GEORGE H. BARBER, New Rochelle, N. Y., assignor to Bond Electric Corporation, Jersey City, N. J., a Corporation of Delaware. Filed June 29, 1932. Serial No. 44,220. Term of patent 14 years.

The ornamental design for a combined flashlight cap and hanger ring, as shown and described.



89,422. COMBINED CLOCK CASE AND LAMP. PAUL BUHRLE, Bronx, N. Y., assignor to United Metal Goods Mfg. Co. Inc., Brooklyn, N. Y. Filed Nov. 25, 1932. Serial No. 46,151. Term of patent 7 years.

The ornamental design for a combined clock case and lamp, as shown.

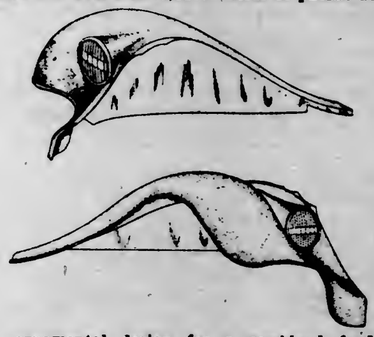


CARNEGIE LIBRARY OF ATLANTA

89,423. CANDELABRUM. IRVING COOPERSTEIN and ABRAHAM COOPERSTEIN, Brooklyn, and ABE LEVITT, New York, N. Y. Filed Nov. 17, 1932. Serial No. 46,017. Term of patent 8½ years.

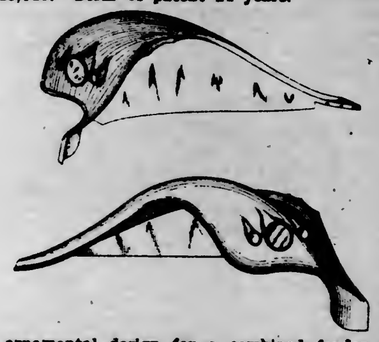
The ornamental design for a candelabrum, as shown.

89,424. CASING FOR A ROTARY CUTTING IMPLEMENT. PATRICK J. FITZGERALD, Torrington, Conn., assignor to The Fitzgerald Mfg. Company, Torrington, Conn., a Corporation of Connecticut. Filed Dec. 6, 1932. Serial No. 46,313. Term of patent 14 years.



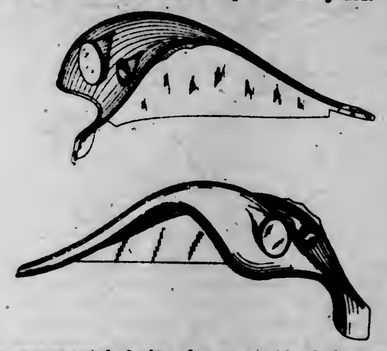
The ornamental design for a casing for a rotary cutting implement, as shown.

89,425. POWDER BOX. CLYDE H. HORNER, Palmyra, N. J. Filed June 11, 1932. Serial No. 44,057. Term of patent 14 years.



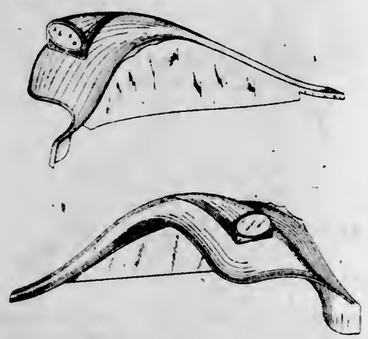
The ornamental design for a powder box substantially as shown and described.

89,426. COMBINED FENDER AND HEAD LAMP CASING FOR VEHICLES. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,639. Term of patent 14 years.



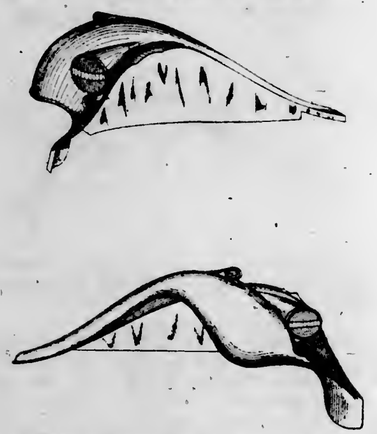
The ornamental design for a combined fender and headlamp casing for vehicles substantially as shown.

89,427. COMBINED FENDER, HEAD LAMP CASING, PARKING LAMP CASING, AND HORN CASING. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,640. Term of patent 14 years.



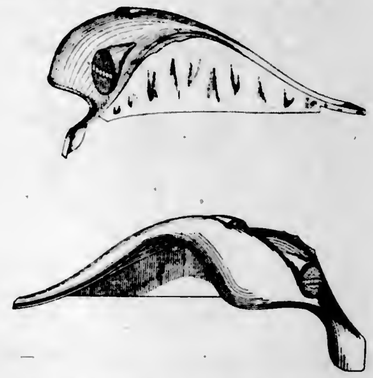
The ornamental design for a combined fender, headlamp casing, parking lamp casing, and horn casing substantially as shown.

89,428. COMBINED FENDER, HEAD LAMP CASING, AND COMBINED PARKING LAMP AND HORN CASING. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,641. Term of patent 14 years.



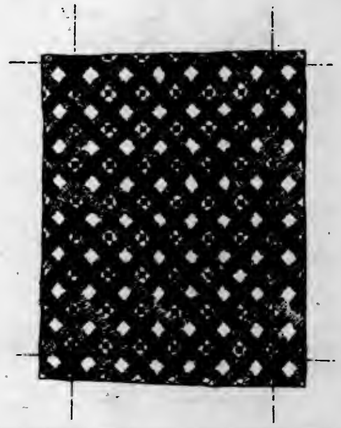
The ornamental design for a combined fender, headlamp casing, and combined parking lamp and horn casing substantially as shown.

89,429. COMBINED FENDER, HEAD LAMP, PARKING LAMP, AND HORN CASING. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,642. Term of patent 14 years.



The ornamental design for a combined fender, headlamp, parking lamp, and horn casing substantially as shown.

89,430. COMBINED FENDER, HEAD LAMP CASING, PARKING LAMP CASING, AND HORN CASING. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,647. Term of patent 14 years.

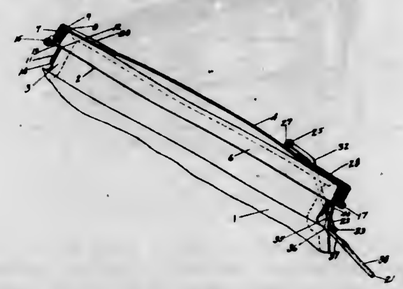


The ornamental design for a combined fender, headlamp casing, parking lamp casing, and horn casing substantially as shown.

89,431. COMBINED FENDER, HEAD LAMP CASING, AND PARKING LAMP CASING. JAMES R. HUGHES, South Bend, Ind., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y., a Corporation of New York. Filed Oct. 29, 1932. Serial No. 45,648. Term of patent 14 years.

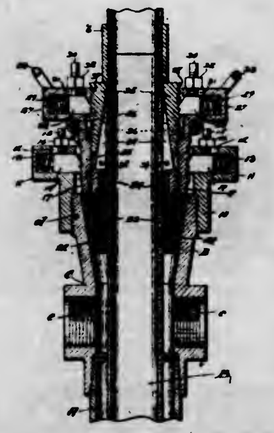
The ornamental design for a combined fender, headlamp casing, and parking lamp casing substantially as shown.

89,432. EMBROIDERED TEXTILE FABRIC OR THE LIKE. WILLIAM G. MEIER, Mamaroneck, N. Y. Filed Jan. 25, 1933. Serial No. 46,971. Term of patent 3½ years.



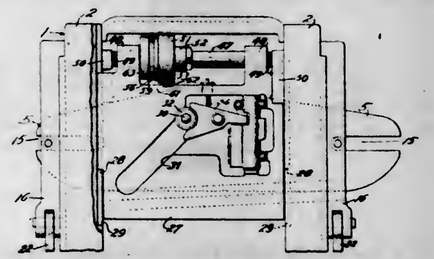
The ornamental design for an embroidered textile fabric or the like as shown and described.

PATENTS



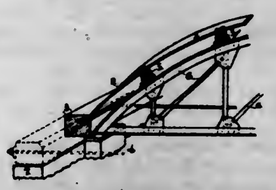
GRANTED MARCH 7, 1933

1,899,921. COVERED CONTAINER AND SEALING CLOSURE THEREFOR. CHARLES S. BARON, Tiffin, Ohio. Filed Aug. 14, 1928. Serial No. 299,498. 5 Claims. (Cl. 215—63.)



1. The combination with a container and its mouth-defining rim, of a peripherally flanged cover hinged at one side to the container and provided on its opposite side with a thumb-latch of the eccentric type provided with a bearing face adapted to engage with latching effect the bottom of the said rim, said thumb-latch comprising a resilient bail pivotally fastened to and downwardly deflected from the top of the cover and comprising a stiff body portion, a bend therein between the actuating lever and thumb-piece of the thumb-latch and means adjacent to said bend for pivotally connecting th thumb-latch and bail.

1,899,922. BLOW-OUT PREVENTING ATTACHMENT FOR CASING HEADS. LEE J. BLACK, Beaumont, Tex. Filed July 3, 1931. Serial No. 548,659. 8 Claims. (Cl. 166—14.)



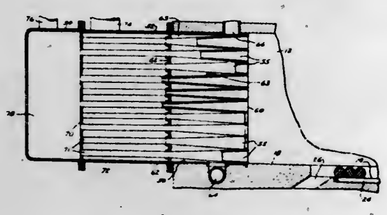
1. In a well drilling apparatus, a casing head having an upwardly extending bowl, a collar carried by the bowl, an annular packing member, the packing member being insertible into the casing head bowl around an inner string of pipe, a plurality of spring projected latches carried by said collar and having means whereby they may be manually retracted, the packing member having upwardly inclined teeth with which said latches are adapted to engage to prevent upward movement of the packing member, but permitting free downward movement of the packing member under the action of gravity and means engaged by the collar against upward movement, said means preventing upward movement of the string of pipe passing through the casing head and collar.

1,899,923. PAPER CUTTING AND TRIMMING MACHINE AND CLAMPING AND SHOCK-ABSORBING MECHANISM THEREFOR. EDWARD M. BRACKETT and DIETRICH DANEKE, Topeka, Kans., assignors to The Brackett Stripping Machine Company, Topeka, Kans., a Copartnership consisting of Edward M. Brackett and Fred M. Brackett. Filed Apr. 8, 1931, Serial No. 528,591, and in Canada July 30, 1930. 10 Claims. (Cl. 164—54.)

1. In a cutting machine having a movable knife and knife-supporting bar, the combination of knife-operating means, a material-engaging clamping member mounted adjacent to and in movable relation to the knife and provided with an inclined slot in said clamping member, clamp-operating means in operative engagement with said clamping member for moving the same into and out of engagement with the material to be operated upon, locking means comprising means for locking said paper engaging clamping member against movement in one direction and in clamping engagement with the material to be operated upon, and shock-absorbing means comprising a rocking lever mounted on said clamping member and having a lever arm adapted to operatively engage said clamp-operating means a piston operably connected with said rocking lever and adapted to be operated thereby, and means for yieldingly resisting movement of the piston for yieldingly resisting and stopping the upward movement of said clamping member.

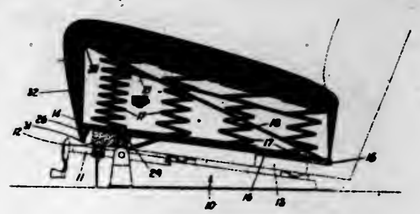
1,899,924. ARCHED ROOF. JAN BRODA, Torun, Poland. Filed Mar. 23, 1931, Serial No. 524,698, and in Germany Mar. 30, 1930. 5 Claims. (Cl. 108—78.)

1. An arched roof, comprising in combination: an arched roof cover constructed as a substantially continuous arch; longitudinal abutments for supporting said arched roof cover; means for holding said longitudinal abutments at a constant distance, said arched roof cover being at its longitudinal edges firmly supported by the said longitudinal abutments, whereby said arched roof cover acts as an



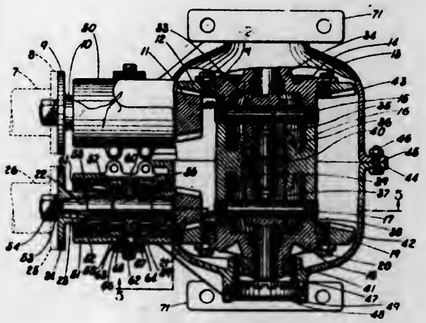
arch capable of transmitting longitudinal stresses directly to the longitudinal abutments; transverse trusses supporting said arched roof cover at numerous points intermediate of the longitudinal abutments; and means for supporting said transverse trusses, substantially as described.

1,899,925. WADDING FOR WHALE GUNS. GUSTAV EMANUEL BROFELTH, Halmstad, Sweden, assignor to Aktiebolaget Malcus Holmquist, Halmstad, Sweden. Filed Apr. 28, 1932, Serial No. 608,080, and in Norway Apr. 13, 1931. 5 Claims. (Cl. 102—42.)



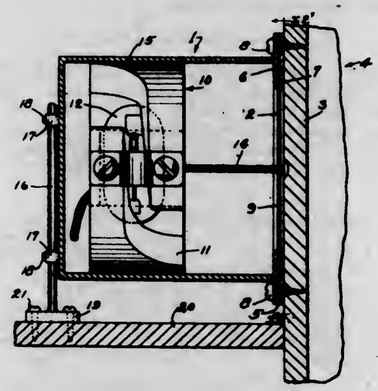
1. A wadding for whale guns comprising a plurality of round plates upon each other and kept together as a unit, the plates being alternately of different diameter and the larger plates consisting of a soft and elastic material while the smaller plates consist of harder material, the soft plates being plane and the hard plates being conical and arranged in pairs with the bases against each other.

1,899,926. FURNACE. STEPHEN P. BURKE, Morgantown, W. Va., assignor to Surface Combustion Corporation, Toledo, Ohio, a Corporation of New York. Original application filed Jan. 29, 1930, Serial No. 424,280. Divided and this application filed June 13, 1932. Serial No. 616,874. 9 Claims. (Cl. 263—6.)



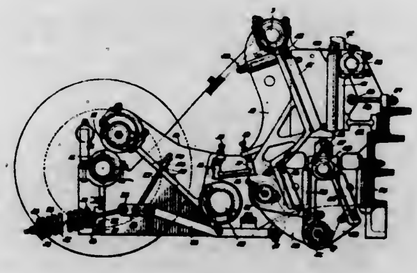
9. A furnace comprising in combination an elongate heating chamber substantially free of abrupt changes in shape and size, a burner disposed at one end of the chamber and being of substantially the same size as the said end, the said burner comprising a group of superposed ducts, means for connecting alternate ducts with a source of air, and means for connecting the remaining ducts with a source of combustible gas, the said ducts being so shaped as to permit streamline flow into the chamber of the gas and air.

1,899,927. VEHICLE SEAT. ALBERT H. ACKERMAN, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed Mar. 28, 1930, Serial No. 439,744. 13 Claims. (Cl. 155—180.)



1. In a spring seat structure, a lower border frame, spring supporting bars extending substantially perpendicular to a portion thereof, an upholstery receiving member extending below and parallel to a portion of said border frame, a bent wire brace member secured at its ends to said spring supporting bars and intermediate its length to said border frame and said upholstery receiving member, and an offset in said brace adapted to bear against a seat supporting member to retain said seat in place.

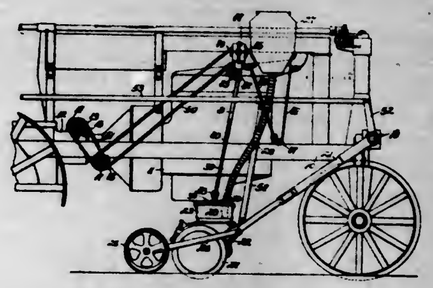
1,899,928. TRANSMISSION. HERBERT D. ALLEE, Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed Nov. 17, 1930. Serial No. 496,189. 2 Claims. (Cl. 74—7.)



1. A transmission assembly comprising, a casing, a driving gear, a ring gear meshing with said driving gear, an axial boss on said ring gear for supporting said ring gear at its outer end for rotation relative to said casing, a second ring gear, an axial boss on said second ring gear for supporting said second ring gear at its outer end for rotation relative to said casing, a tubular member positioned between said ring gears, aligned members extending through said tubular member and through the bosses on said ring gears, removable means carried by said aligned members interposed between said ring gears and said tubular member to drivably connect said ring gears, and a driven gear meshing with said second ring gear.

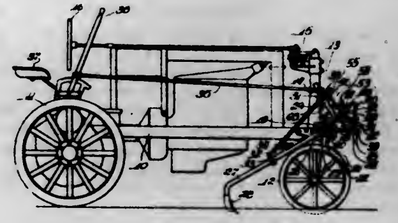
1,899,929. SOUND AMPLIFYING DEVICE. CYRUS N. ANDREWS, Yucaipa, Calif. Filed Mar. 3, 1928. Serial No. 258,889. 14 Claims. (Cl. 181—31.)

1. The combination with a sounding board and a drive pin; of a diaphragm centrally spaced from and fixed around its rim, to the sound board, and centrally connected to the drive pin to vibrate with the same.



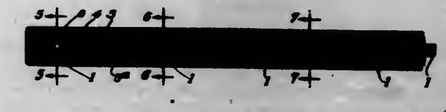
1,899,930. CRUSHER. JOHAN R. BAKSTAD, Chicago, Ill., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Apr. 10, 1929. Serial No. 354,021. 12 Claims. (Cl. 83—53.)

1. In a crusher, primary crushing means comprising relatively movable jaws, auxiliary crushing means comprising a double set of relatively movable jaws, means for operating all three sets of jaws from a common power shaft, means for directing the material discharging from said primary crushing jaws to said auxiliary crushing jaws, the total area of discharge from the auxiliary crushing jaws being substantially equal to the area of discharge from said primary crushing jaws, means for simultaneously adjusting said primary discharge area and said auxiliary discharge area and independent means for adjusting said primary discharge area.



1,899,931. TRACTOR PLANTER. BERT R. BENJAMIN, Oak Park, and WILLIAM S. GRAHAM, Canton, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed Jan. 19, 1931. Serial No. 509,691. 11 Claims. (Cl. 111—63.)

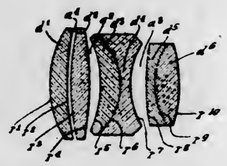
3. A tractor mounted and operated planter comprising, in combination with a tractor, a soil engaging unit floatingly attached to the tractor, a seed hopper mounted on the planter unit, seeding mechanism mounted beneath the hopper, a shaft extending upwardly through the hopper



for driving said mechanism, and means mounted on the tractor driven from the tractor engine for operating said shaft.

1,899,932. TRACTOR CULTIVATOR. BERT R. BENJAMIN, Oak Park, and SHERMAN W. CADY, Canton, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed May 6, 1932. Serial No. 609,624. 6 Claims. (Cl. 97—47.)

1. The combination with a tractor having a dirigible wheeled support at its forward end, of implement supporting means secured to the forward portion of the tractor to project outwardly at each side thereof, a coupling member mounted on the projecting portion of said supporting means at each side of the tractor for angular movement about an axis transverse to said projecting portion, earth working means connected to each coupling member to move therewith, and means for transmitting angular movement of the dirigible support to the coupling members.

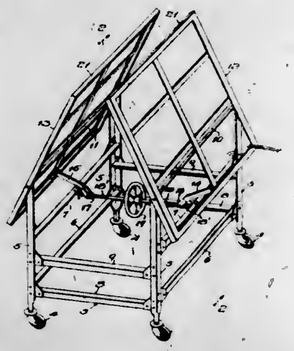


1,899,933. ELECTRIC HEATER. IRVING T. BENNETT, Brooklyn, N. Y., assignor to Thomas E. Murray, Brooklyn, N. Y.; Joseph Bradley Murray, Thomas E. Murray, jr., and John F. Murray executors of said Thomas E. Murray, deceased. Original application filed Jan. 30, 1928, Serial No. 250 350, Patent No. 1,796,317, dated Mar. 17, 1931. Divided and this application filed Apr. 25, 1928. Serial No. 272,584. 6 Claims. (Cl. 219—38.)

1. An electric heater comprising a casing containing insulating material in the form of removable molded blocks

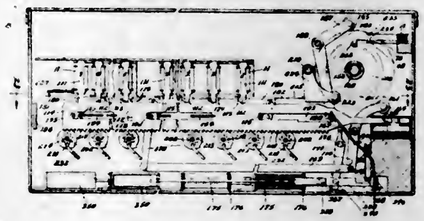
and a resistance element enclosed thereby, the mating blocks being interlocked with one another in a direction transverse to the line of withdrawal so that the withdrawal of one causes the withdrawal of its mate.

1,899,934. ULTRALIGHT INTENSIVE OBJECTIVE. MAX BEREK, Wetzlar, Germany, assignor to Ernst Leitz, Optische Werke, G. m. b. H., Wetzlar, Germany. Filed July 20, 1932, Serial No. 623,554, and in Germany June 6, 1931. 1 Claim. (Cl. 88—57.)



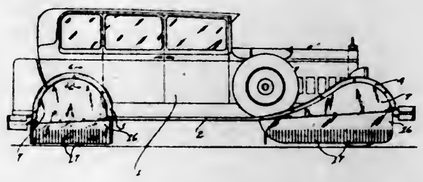
An objective of ultralight intensity with light surfaces exposed to air comprising two positive members in consecutive order separated by an air space, a following negative member and a positive rear member, the negative member consisting of a positive and a negative element which are cemented together, and present collective cement faces, so that the n_D difference at the cement face in the negative member is at least 0.05, and at this cement face the value is

$$\frac{n'-n}{r}f,$$



where n'—n represent the difference of the numbers of refraction, r the curvature radius of the cement face and f the focal distance of the entire system, larger than 0.1 and characterized by the fact that the second air space is at least ⅔ of the air space between the negative member and the rear member, while the total amount of all air spaces is at best equal to ⅓ of the entire length of the system construction.

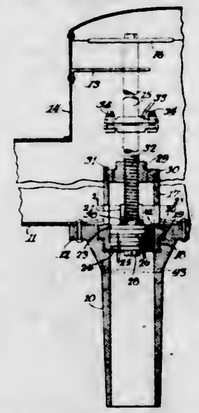
1,899,935. DISPLAY RACK. HARRY SUMNER BEST, Galva, Ill., assignor to John H. Best & Sons, Galva, Ill., a Firm composed of Charlotte Sumner Best, Don Jewell Best, Leon Henson Best, and Harry Sumner Best, Galva, Ill. Filed June 15, 1931. Serial No. 544,347. 6 Claims. (Cl. 211—45.)



1. A display device for rugs and the like comprising a pair of oppositely disposed supports providing outwardly disposed supporting areas adapted to receive articles to be displayed and having cooperating clamping edges, said supports having corresponding ends thereof rested on a supporting member, a frame, means pivotally connecting the supports to the frame, and means for uniformly adjusting said supports on said supporting member and relative to each other to clamp articles rested on said supporting areas and having portions arranged between the clamping edges of said supports.

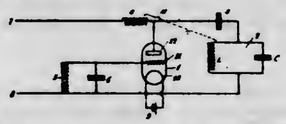
1,899,936. TYPEWRITING AND CALCULATING MACHINE. JOHN BRICKEN, now by judicial change of name John George Beaver, East Orange, N. J., assignor to Monroe Calculating Machine Company, Orange, N. J., a Corporation of Delaware. Filed May 4, 1931. Serial No. 534,925. 6 Claims. (Cl. 235—60.)

1. Register mechanism comprising a plurality of multiple order totalizers, a typewriter control unit, including a shiftable platen carriage, connections between said typewriter and said totalizers including settable control elements connected each with a selective unit comprising a plurality of totalizers, stationary control elements, control elements mounted upon said carriage and cooperating with said stationary elements to select a single totalizer of any selected unit, and means for operating the selected totalizer.



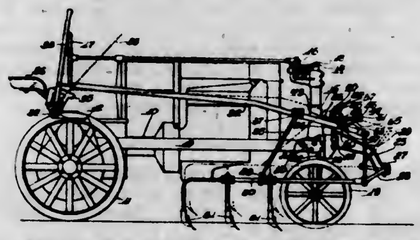
1,899,937. SPLASH GUARD FOR MOTOR VEHICLES. CRESTON L. BROWN, The Dalles, Oreg. Filed Mar. 2, 1931. Serial No. 519,528. 1 Claim. (Cl. 280—152.)

A device to be used in connection with the fenders of an automobile body comprising a tubular frame shaped to the contour of the side wall of the fenders, a flexible shield formed about the frame, a plurality of pins securing the frame to the inside wall of the fenders, fasteners secured to the lower end of the shield, and a skirt removably secured to the shield, said shield being adapted for protecting the sides of the automobile and for carrying indicia.



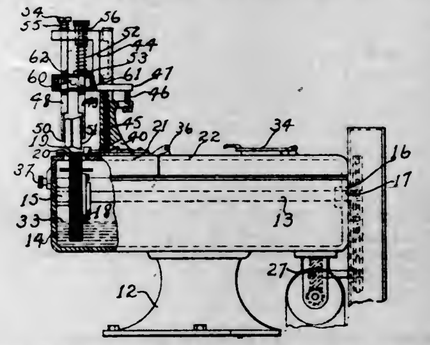
1,899,938. TANK CAR OUTLET VALVE. CLARENCE O. BUENGER, Chicago, Ill., assignor to Hills-McCanna Company, Chicago, Ill. a Corporation of Illinois. Filed Sept. 23, 1929. Serial No. 394,412. 7 Claims. (Cl. 137—21.)

1. In a tank car outlet valve the combination with a depending outlet leg, of a valve casing secured to and extending within the upper portion of said leg said casing having ports in its side walls adjacent and above the upper end of said leg and having its bore below said port forming a substantially cylindrical valve seat, a sliding piston valve comprising an imperforate, substantially cylindrical body portion having a flange at its upper end, freely slidable within said seat and provided with soft packing and a follower ring mounted thereon below said flange, said casing having an inwardly projecting shoul-



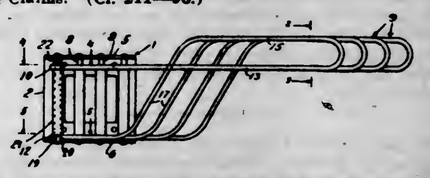
der below said valve seat for engaging the follower ring to axially compress and radially expand the soft packing as the valve is closed, and a threaded valve stem rotatably connected to the upper portion of said valve body, substantially as described.

1,899,939. ARRANGEMENT FOR RADIO CIRCUITS. WERNER BUSCHBECK, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Dec. 28, 1928, Serial No. 328,876, and in Germany Dec. 31, 1927. 4 Claims. (Cl. 250—17.)



1. In an electrical system, means for preventing high frequency energy from passing into any desired branch thereof, comprising a choke coil connected in series with the desired branch and means for coupling said choke coil with another coil connected to any other part of the system passed by the high frequency energy and means controlled thereby for setting up in said choke coil an electromotive force of such a value that the electromotive force caused by any alternating current energy in said choke coil is neutralized.

1,899,940. TRACTOR CULTIVATOR. SHERMAN W. CADY, Canton, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed June 15, 1932. Serial No. 617,825. 8 Claims. (Cl. 97—47.)

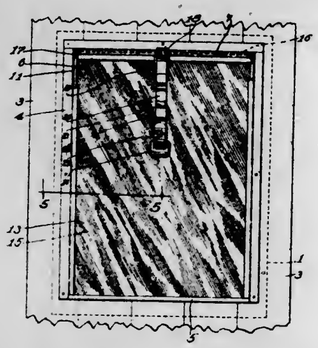


1. The combination with a tractor having dirigible supporting means at its front end and means for steering same, of a cultivator attachment comprising a fixed bar extending across the forward end of the tractor and projecting beyond each side thereof, a pair of spaced hanger members pivoted on each projecting portion of the bar for movement laterally and extending downwardly therefrom, earth working means having beams trailing from the lower ends of said hanger members, and means actuated through the steering means for swinging the hanger members thereby shifting the earth working means laterally.

1,899,941. SOLE CEMENTING MACHINE. WILLIAM C. CARD, Jr., Winthrop, Mass., assignor to Compo Shoe Machinery Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 18, 1930. Serial No. 496,420. 19 Claims. (Cl. 91—51.)

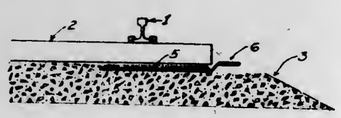
1. A sole cementing machine for operating on a sole of varying thickness, including a cementing surface, means for pressing those portions of the sole which are to be cemented against the cementing surface, and means associated with said pressing means and responsive to variations in sole thickness for bodily tilting the sole in a manner always to present said sole portions in flat surface contact with the cementing surface.

1,899,942. TROUSER HANGER. WILLIAM B. CLAFLIN, Jr., New Canaan, Conn., assignor to Claflin Products Incorporated, New Canaan, Conn., a Corporation of Connecticut. Filed Jan. 12, 1932. Serial No. 586,150. 4 Claims. (Cl. 211—96.)



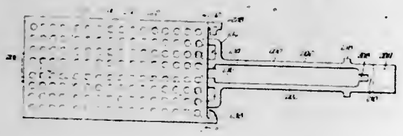
1. A garment hanger comprising a support, a plurality of garment holders mounted on said support to swing in a common plane, means associated with one of said holders and with said support for locking all of said holders against swinging in said common plane and in at least partial contact with each other, said locking means comprising a projection carried by said support for engaging one of said holders, and resilient means for engaging the last mentioned holder and maintaining it in engagement with said projection.

1,899,943. WINDOW DEVICE. JOSEPH BURLEIGH CLAY, Cedar Heights, and LANCELOT ROYCE WILSON, Waterloo, Iowa, assignors to Clay Equipment Corporation, Cedar Falls, Iowa. Filed May 26, 1930. Serial No. 455,694. 7 Claims. (Cl. 98—88.)



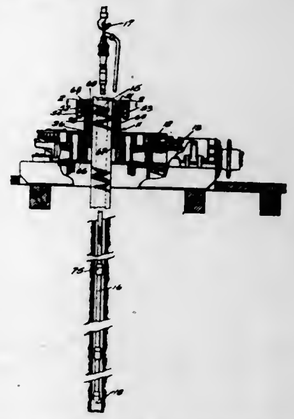
1. A window device, comprising in combination, an apertured wall, an apertured window frame, the said

frame fitting said aperture with outer flanges contacting sealingly the outer face of the wall therearound, an imperforate window fitting in said frame to swing from the bottom away from the frame, means movably connected to said frame engageable with the window releasably



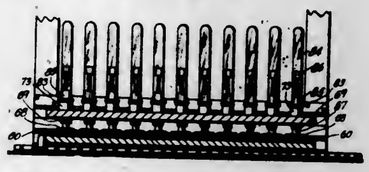
to hold it in differently adjusted open positions, side wings detachably mounted on the sides of the frame slidingly at opposite sides of the window and side and top bars secured on said wall as stops thereon for said wings and said frame respectively.

1,899,944. END BALLAST TAMPER. CHARLES C. COOK, Baltimore, Md. Filed July 22, 1932. Serial No. 623,956. 3 Claims. (Cl. 104—13.)



1. In an end ballast tamper for rail road ties, a substantially rectangular resiliently flexible ballast holding blade, the resilient flexibility of said blade allowing bending in being inserted and withdrawn from under a tie, said blade having a handle attached to one end thereof an removed from the face of the blade, said blade being longer than the distance from the end of a standard length wooden tie to a point inside of the inner edge of the base of the rail.

1,899,945. GRATE. ROBERT F. DARBY, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Feb. 11, 1929. Serial No. 338,950. 4 Claims. (Cl. 126—180.)



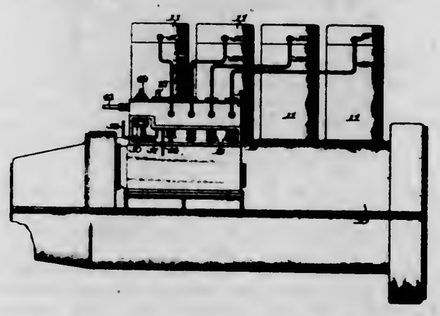
1. In an assembly of the character described, in combination with a grate bar and a supporting frame, locking and positioning means including a shoulder on said supporting frame, a hooked lug formed on the underside of said grate bar and engageable with said shoulder, two horizontally projecting apertured lugs provided on said supporting frame, downwardly projecting apertured lugs on the under side of said grate bar engaging with said supporting frame lugs, and fastening means positioned in said apertures of said projecting grate member lugs.

1,899,946. KELLY BUSHING. WILLIAM D. DAVIDSON, Los Angeles, Calif., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif., a Corporation of California. Filed Mar. 28, 1932. Serial No. 601,558. 10 Claims. (Cl. 255—23.)

1. In a kelly bushing for use in establishing a driving connection between a rotary table and a drill stem, the combination of: a body having a block portion for engagement with said rotary table, there being an opening therethrough; a plurality of slips disposed in said opening; retaining means at the lower end of said slips; and a cover secured to the upper end of said body for immovably securing the upper ends of said slips to said body.

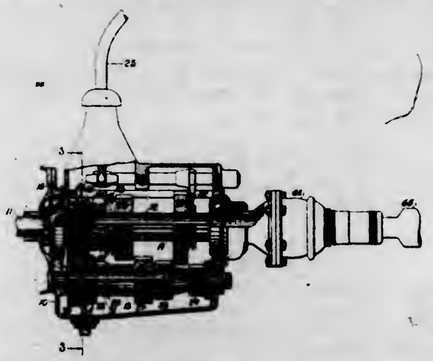
1,899,947. BEAD FORMING MACHINE. WILBUR J. DEAN, Kansas City, Mo. Filed Dec. 6, 1930. Serial No. 500,562. 14 Claims. (Cl. 18—2.)

12. In a machine of the character described, bead forming means, molds, and means for operatively engaging said molds with said bead forming means and rotating said molds during such engagement, comprising a rack, a conveyor extending alongside said rack, a conveyor engaging base member detachably mounted on said conveyor, driving members on said base member, gears on said driving members engaging said rack to rotate said driving members, a mold carrier having said molds rotatably mounted thereon, clutch members on said driving members and cooperating clutch members on said molds engaging the clutch members on said driving members to rotate said molds upon rotation of said driving members.



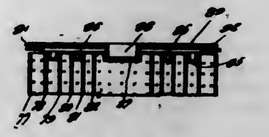
1,899,948. CHAIN LINK AND INTEGRAL HEAD ARTICULATING PINTLE. FRANK A. FAHRENWALD, Chicago, Ill. Filed Jan. 16, 1931. Serial No. 509,097. 5 Claims. (Cl. 59—5.)

1. In a chain conveyor for substantially the purpose described, link members and pintles articulating said link members; said pintles having integral end enlargements bearing laterally against links of the chain and prevent-



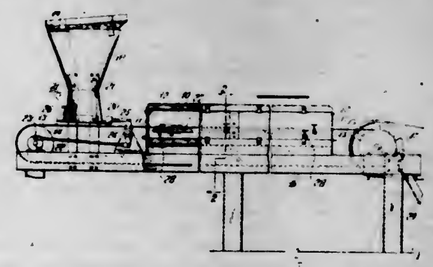
ing axial displacement of the pintles, certain of said links having trussing horns located beyond their bearings through which they receive the pintles.

1,899,949. LUBRICATING MEANS FOR HIGH PRESSURE PUMP PISTONS. EMMET H. FAHRNEY, Chicago, Ill. Filed Feb. 13, 1930. Serial No. 428,074. 8 Claims. (Cl. 123—196.)



1. In combination, a chamber, means for supplying the chamber with a fluid to be compressed, a piston, means for reciprocating the piston to compress said fluid in said chamber, a hollow casing extending across and forming a portion of a wall of said chamber, and through which casing the piston moves, means for supplying a lubricant to the said casing under a pressure greater than the fuel oil pressure, and means for discharging the lubricant from the casing against the piston at points spaced in directions lengthwise of the piston as the latter reciprocates through the casing.

1,899,950. FREE WHEELING TRANSMISSION. CHESTER H. FEHLBERG, South Bend, Ind., assignor, by mesne assignments, to Free Wheeling Patents Corporation, South Bend, Ind., a Corporation of Delaware. Filed Feb. 8, 1932. Serial No. 591,598. 12 Claims. (Cl. 74—58.)



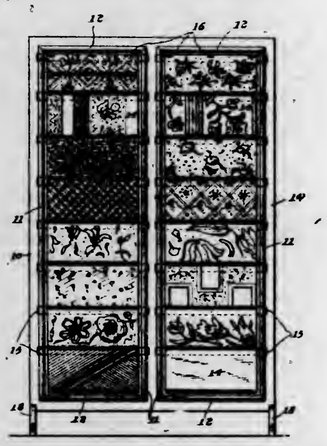
1. In a vehicle transmission, a drive shaft, a transmission shaft, a countershaft, driving means on said drive shaft, and means slidably but non-rotatably mounted on said countershaft engageable with said driving means, said slidable means being movable to one position to provide a one-way drive for the vehicle and movable to another position to provide a two-way drive for the vehicle.

1,899,951. BURNER. PAUL GERVASI, Waterbury, Conn. Filed May 9, 1931. Serial No. 536,272. 1 Claim. (Cl. 158—89.)

A baffle for liquid fuel burners employing co-axial perforated spaced shells comprising a pair of superimposed serrated plates for disposition upon the shells, the upper plate being provided with a detachable connection to the lower plate, and a dependency on the lower plate for snug removable disposition between the shells.

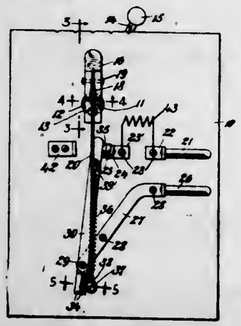
1,899,952. APPARATUS FOR MAKING GELATINIZED STARCH PRODUCTS. FRED O. GIESECKE, Evanston, Ill., assignor to International Patents Development Company, Wilmington, Del., a Corporation of Delaware. Filed Jan. 19, 1929. Serial No. 333,659. 3 Claims. (Cl. 87—17.)

1. Apparatus for making gelatinized starch comprising in combination an oven substantially closed so as to retain water vapor, means for introducing the starch in a relatively thin layer into the oven, means for applying heat to the oven and means for introducing water vapor into the oven.



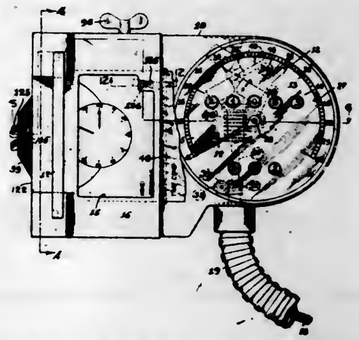
1,899,953. ROTARY DRAW WORKS WITH ADJUSTABLE JACK SHAFT. EDWIN W. GOESER, Los Angeles, Calif., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif., a Corporation of California. Filed May 14, 1928. Serial No. 277,544. 3 Claims. (Cl. 74—21.)

1. In a rotary draw works the combination of: a plurality of upright frame members; a line shaft rotatably mounted on upper portions of said members; a jack shaft; a drive sprocket on said jack shaft adapted to be connected by a sprocket chain with a rotary table for driving the same; means for driving said drive sprocket



from said line shaft; brackets provided upon lower portions of said uprights and adapted to support said jack shaft, each of said brackets having an upwardly opening recess across which an end of said jack shaft extends; positioning means applicable to said jack shaft ends and fitting into said recesses of said brackets in a plurality of positions to vary the distance between said jack shaft and said rotary table, the distance between said jack shaft and said line shaft, or both of said distances; and means for securing said positioning means to said brackets.

1,899,954. DISPLAY STAND. LEWIS GOTTSTEIN, Chicago, Ill., assignor of one-half to Carson Pirie Scott & Company, Chicago, Ill., a Corporation of Illinois. Filed July 11, 1931. Serial No. 550,135. 2 Claims. (Cl. 206—82.)

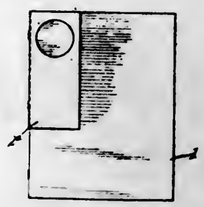


1. A display stand comprising a supporting member; parallel supporting strips on the face of said supporting member, there being transversely registering notches in the inner faces of said strips; flexible retaining strips traversing the space between said supporting strips and having their ends inserted in said notches; and display articles folded upon themselves and having their upper edges secured to said display strips, said articles depending from said retaining strips to constitute stops to limit insertion of the ends of said retaining strips in said notches.

1,899,955. THERMOSTAT SWITCH. ALBERT E. GRANT, New York, and SAMUEL W. VANDERBEEK, Manhasset, N. Y. Filed May 7, 1930. Serial No. 450,344. 8 Claims. (Cl. 200—138.)

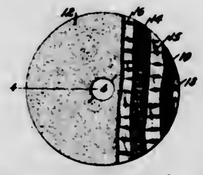
1. A switch of the character described, comprising a base-plate, a thermostat having a normally straight portion one end of which is free to move, a lever having its fulcrum near one end thereof and carrying a contact-point at its opposite end, a spring connected at one end with the free end of the thermostat, and its other end connected with the opposite end of the lever adjacent said contact-point; the ends of said lever being movable laterally to break the circuit and said thermostat being movable into engagement with the lever to move the same upwardly whereby one contact slides relative to the other contact to prevent the contact points from sticking together.

1,899,956. SPEED AND TIME RECORDER. JAY HIRAM GREENLEY, Buffalo, N. Y. Filed Mar. 29, 1929. Serial No. 351,065. 3 Claims. (Cl. 234—30.)



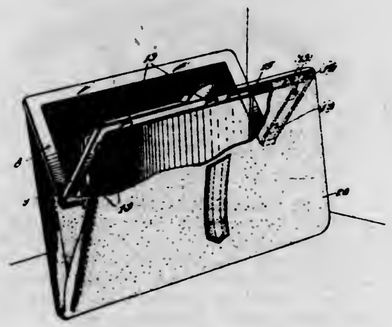
1. In a device of the character described adapted to be driven by a vehicle and having connected indicating and recording hands for simultaneous and equal operation under speed changes of the vehicle, a clock having a recording dial and recording hands cooperating therewith and manually controlled recording means cooperating with said recording hands of both the speedometer and the clock and the clock dial to make a record of the time and speed of the vehicle at the time at which the recording operation is performed.

1,899,957. PROCESS FOR PREPARING ANTHRAQUINONE SULPHONIC ACIDS. IVAN GUBELMAN, South Milwaukee, and WILLIAM L. RINTELMAN, Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, a Corporation of Delaware. Filed Dec. 14, 1928. Serial No. 326,148. 11 Claims. (Cl. 260—51.)



1. The process of preparing a mixture of anthraquinone beta disulphonic acids which comprises heating a p'-sulpho-benzoyl-orthobenzoic acid body in concentrated sulphuric acid and subsequently sulphonating.

1,899,958. BOOK. RAYMOND M. GUNNISON, Scarsdale, N. Y. Filed Oct. 20, 1932. Serial No. 638,685. 3 Claims. (Cl. 281—32.)



1. The combination of a periodical comprising a plurality of sheets bound along their rear edges to open in book form, and a hanger for the periodical composed of a folded sheet bound along the fold therein to the rear edge of the periodical and having a hole in each side adapted to register with the companion hole to receive a projection support.

1,899,959. ABRASIVE DISK. WILLARD C. HAPP, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed Dec. 10, 1928. Serial No. 324,913. 11 Claims. (Cl. 51—195.)

1. An abrading disk comprising a woven metallic base, and abrasive material adhesively secured thereto, the composite structure being sufficiently pliable to permit distortion adjacent the free edge thereof without disrupting the same.

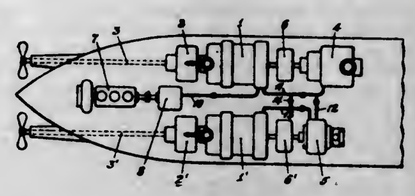
1,899,960. HAND BAG. PAUL E. HARTMANN, Hillside Township, Union County, N. J., assignor to J. E. Mergott Company, Newark, N. J., a Corporation of Delaware. Filed Feb. 15, 1932. Serial No. 592,934. 3 Claims. (Cl. 150—29.)

1. In a hand bag, a frame member having an inner side wall provided with top and bottom flanges, an inlay having substantially the same shape as the frame members, means on the inlay for attaching bag covering material thereto, and spaced tabs integral with the bottom flange, said tabs being adapted to be bent up to clinch the inlay in the frame member between the top and bottom flanges.

2. In a hand bag, a substantially U-shaped inlay having a plurality of spaced tabs along its inner edge, each tab having an apertured protuberance, said tabs being bendable upwardly parallel with the inlay, said inlay having spaced apertures registering with the protuberances when the tabs are bent upwardly.

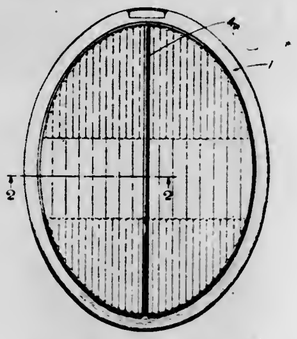
1,899,961. HYDROGENATED ROSIN PRODUCT. CLYDE O. HENKE, South Milwaukee, Wis., assignor, by mesne assignments, to Newport Industries, Inc., a Corporation of Delaware. Filed Oct. 6, 1930. Serial No. 486,748. 10 Claims. (Cl. 202—52.)

1. The process of preparing improved resinous products of low color content from abietic acid containing material which comprises hydrogenating the abietic acid containing material in the presence of a catalyst, separating the catalyst from the hydrogenated product, vacuum distilling the hydrogenated product and isolating an intermediate fraction of the distillate.



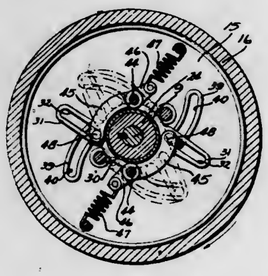
1,899,962. ILLUMINATED CHANGEABLE DISPLAY DEVICE AND METHOD OF PRODUCING THE SAME. LUTHER J. HIGGINBOTHAM, Dallas, Tex. Filed Mar. 2, 1931. Serial No. 519,671. 8 Claims. (Cl. 95—5.)

1. The method of producing transparencies for alternate display of a pair of different images, which consists in photographically printing on the sensitized sides of a pair of transparent plates two images to be displayed, and after one of the plates is photographically printed with its image to be displayed coating the printed emulsion side of the plate with a translucent substance, and securing said plates together with the printed sides next to each other and separated only by the coating.



5. A transparency for the alternate display of a pair of different images, comprising a pair of transparent plates having adjacent emulsion sides, each bearing a printed photographic image, one of said sides having a thin coating of translucent material thereon, and means for securing said plates together with the printed images separated only by the said translucent coating.

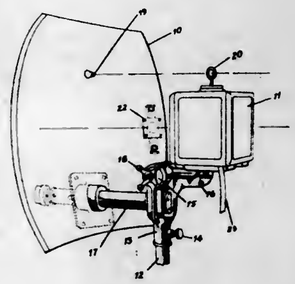
1,899,963. EXPLOSION TURBINE PLANT FOR SHIPS. HANS HOLZWARTH, Dusseldorf, Germany, assignor to Holzwarth Gas Turbine Co., San Francisco, Calif., a Corporation of Delaware. Filed Jan. 30, 1929, Serial No. 336,275, and in Germany Feb. 29, 1928. 6 Claims. (Cl. 60—97.)



1. In an explosion turbine power plant, in combination, an explosion turbine having a plurality of explosion chambers, a conduit for conducting air to one or more of said chambers to start said turbine, a low pressure air compressor arranged to be driven by the latter, a second explosion turbine having a plurality of explosion chambers, a high pressure air compressor arranged to be driven by said second turbine, said compressors being adapted to compress air for charging the explosion chambers of both said turbines, and air conduits between each of said compressors and the chambers of each of said turbines.

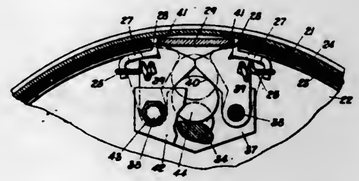
1,899,964. HEAD LAMP LENS. JAMES R. HUGHES, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed Nov. 17, 1930. Serial No. 496,182. 8 Claims. (Cl. 240—41.4.)

1. A transparent closure for an automobile lamp having a vertical axial portion thereof provided with a highly reflective surface and having a cylindrical lens formation on the side opposite said reflective surface to cause said reflective surface to appear larger than it actually is when viewed from a position in front of the lamp.



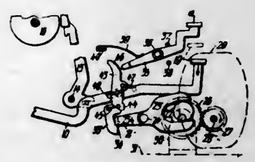
1,899,965. IGNITION TIMER BREAKER MECHANISM. FINN T. IRGENS, Wauwatosa, Wis., assignor to Outboard Motors Corporation, Milwaukee, Wis., a Corporation of Michigan. Filed May 20, 1931. Serial No. 538,726. 13 Claims. (Cl. 200—31.)

1. In a timer, the combination with relatively movable contacts and a cam follower provided with connections for the operation of said contacts, of a compound cam having relatively movable portions and angularly spaced effective contact closing and opening surfaces subject to variation in spacing upon the relative movement of the portions of said cam, and means for varying the relative positions of said cam portions during the operation of the cam whereby to vary the closed contact interval in terms of the angular interval between said surfaces, said means being effective upon both the cam closing and cam opening surfaces to advance them at different relative rates in the direction of cam rotation and said means including a single element providing a common connection with said surfaces.



1,899,966. SOUND PICK-UP DEVICE. PAUL E. G. JENSEN, Grantwood, N. J., assignor to Radio Corporation of America, a Corporation of Delaware. Filed Aug. 14, 1931. Serial No. 557,045. 7 Claims. (Cl. 179—1.)

1. A sound pick-up device including a concentrator and a support therefor, a microphone arranged within said concentrator to receive the concentrated sound, means mounted on said support for determining the distance

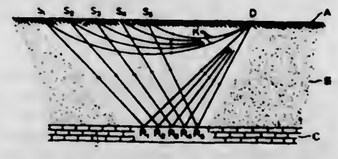


between said device and the point of sound origin, and means for adjusting the spacing between said microphone and said concentrator in accordance with said distance.

1,899,967. BRAKE. ROBERT F. KOHR, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Original application filed June 23, 1927, Serial No. 200,944. Divided and this application filed May 3, 1929. Serial No. 360,123. 12 Claims. (Cl. 188—78.)

1. In a brake mechanism, a rotatable drum, braking means movable to engage said drum, an actuating means therefor comprising a pair of pivoted levers engaging the ends of said braking means substantially in the circular path thereof, a free floating cylinder positioned between said levers and contacting therewith, and a rotatable cam for moving said cylinder outwardly to pivot one or both of said levers for engaging said braking means with said drum.

1,899,968. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Original application filed July 22, 1926, Serial No. 124,147. Divided and this application filed Aug. 13, 1928. Serial No. 299,205. 8 Claims. (Cl. Claims. (Cl. 196—13.)



2. In a typewriting machine, the combination with actuating levers, of a reciprocating bar underlying said levers, a swingable interponent mounted on each of said levers to cooperate with said bar for depressing said levers, a cam adjacent each interponent and also mounted on its lever, for moving said interponent into engagement with said reciprocating bar, and key means for operating said cams.

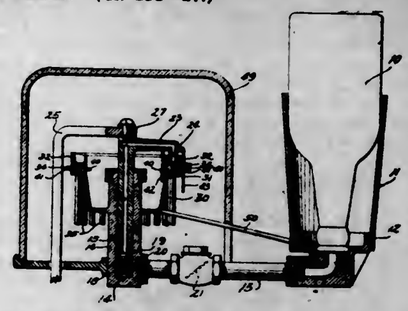
1,899,969. REFINING HYDROCARBON OIL. STEWART S. KURTZ, Jr., Merion, Pa., assignor to The Atlantic Refining Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 23, 1931. Serial No. 510,847. 18 Claims. (Cl. 196—13.)

1. In the art of refining mineral oils containing paraffinic and naphthenic hydrocarbons, the process which comprises bringing the oil into contact with benzonitrile, thereby effecting solution of a portion of the oil richer in naphthenic hydrocarbons in the benzonitrile, separating the benzonitrile solution of oil from the oil so treated, and removing the benzonitrile from each of the fractions so obtained, thereby to obtain fractions of the oil respectively richer in paraffinic and naphthenic hydrocarbons.

1,899,970. SEISMIC EXPLORATION OF GEOLOGIC FORMATIONS. BURTON MCCOLLUM, Houston, Tex., assignor to McCollum Geological Explorations, Inc., Houston, Tex., a Corporation of Delaware. Filed July 14, 1931. Serial No. 550,680. 8 Claims. (Cl. 181—0.5.)

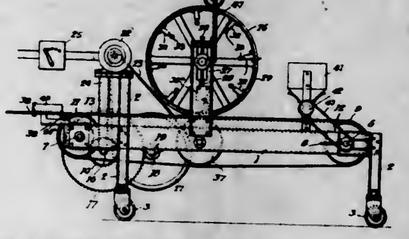
1. In the art of profiling geological formations, the step in the method which consists in originating a plurality of seismic waves above said formation at spaced points and at times to enable the individual waves to be reflected from said formation to arrive simultaneously at a common detecting point.

1,899,971. METHOD OF MAKING COLORED SIGNS. JOHN P. MEEHAN, Los Angeles, Calif. Filed Aug. 12, 1932. Serial No. 628,476. 3 Claims. (Cl. 41—24.)



3. A method of making a colored sign plate, which consists in forming raised characters and a raised field in the same plane on the plate, forming sunken characters in the field, applying a color pigment to the plate, permitting the color to dry, and then applying a color-coating roller carrying a contrasting color to apply the contrasting color simultaneously to the characters and to the field.

1,899,972. PROCESS FOR TONING SILVER PICTURES. HANS MENGELE, Wiesbaden, Germany, assignor to Byk-Guldenwerke Chemische Fabrik Aktiengesellschaft, Berlin, Germany, a Corporation of Germany. Filed June 4, 1931, Serial No. 542,108, and in Germany June 5, 1930. 6 Claims. (Cl. 95—88.)



1. A composition of matter for toning photographic pictures comprising a solution containing selenious acid and a water soluble salt of sulphocyanic acid.

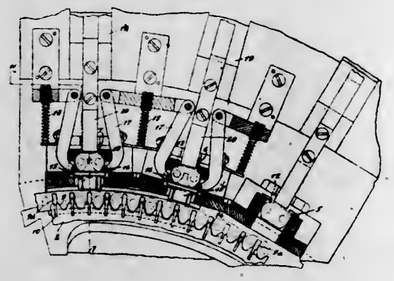
1,899,973. OIL FEED MECHANISM. GEORGE J. MEYER, Cudahy, Wis. Filed Jan. 18, 1930. Serial No. 420,864. 11 Claims. (Cl. 184—27.)

1. An oil distributing mechanism including the combination of an annular table, an annular series of cups on said table, and provided with outlet ports, oil ducts, each connected with the outlet port of one cup, an axially disposed reciprocatory pump plunger having an outlet nozzle adapted for registry with the respective cups successively, and means for rotating the plunger to bring said nozzle into such successive registry with the cups on the table during the retractive movements of the plunger.

1,899,974. MACHINE FOR MANUFACTURING CERAMIC OBJECTS. THOMAS FRED MOONEY, New Lexington, Ohio, assignor to Ludowici-Celadon Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 17, 1930. Serial No. 444,896. 9 Claims. (Cl. 25—42.)

1. In a machine for forming clay products, a conveyor for receiving and supporting a column of clay, means for positively moving said conveyor, a drum mounted for rotation over said conveyor and having molds in the outer surface thereof and a table for receiving the molded articles from said conveyor, said table having means thereon for trimming the edges of said molded articles.

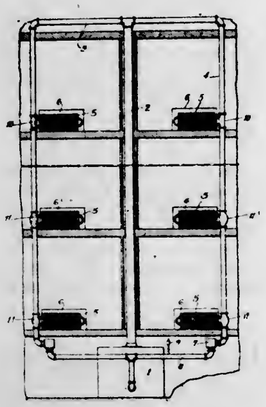
1,899,975. DYEING PROCESS. WILLIAM R. MOORHOUSE, New York, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed July 21, 1928. Serial No. 294,586. 33 Claims. (Cl. 8—5.)



1. In the process of dyeing with a vat dyestuff by the pad and jig method, the improvement which comprises padding the material to be dyed with a padding liquor which contains the vat dyestuff substantially entirely in the unreduced form and a soluble sulfide.

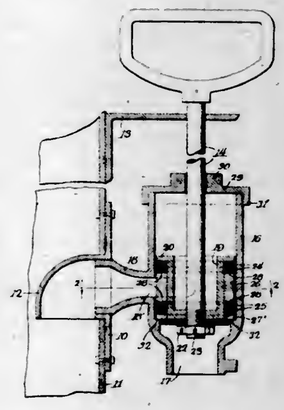
15. A padding liquor comprising water, a vat dyestuff in the unreduced form, a soluble sulfide and an adhesive.

20. A composition comprising a vat dyestuff substantially completely in the unreduced form and a soluble sulfide.



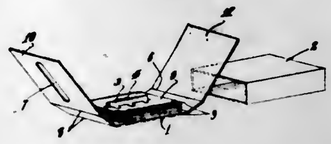
27. A composition comprising water, a vat dyestuff of the indigoid series substantially completely in the unreduced form, and sodium sulfide.

1,899,976. AUTOMATIC CHAIN ASSEMBLING MEANS. FRIEDERICH MÜLLER, Elizabeth, N. J., assignor to The Whitney Mfg. Co., Hartford, Conn., a Corporation of Connecticut. Filed Aug. 1, 1929. Serial No. 382,748. 48 Claims. (Cl. 59—7.)



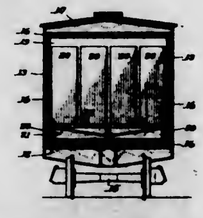
1. In a chain assembling machine, an assembling member, means for feeding chain elements forming successive pitches to said member in overlapping relation to each other, means on the member for receiving said elements in said overlapping relation to each other to form a chain, and means for intermittently moving said member in one direction to bring successive parts thereof into position to receive other chain elements.

1,899,977. HEATING SYSTEM. THOMAS E. MURRAY, Jr., Brooklyn, N. Y., and GEORGE H. PHELPS, Warehouse Point, Conn., assignors, by direct and mesne assignments, to Metropolitan Engineering Company, a Corporation of New York. Filed Feb. 14, 1930. Serial No. 428,265. 3 Claims. (Cl. 237—67.)



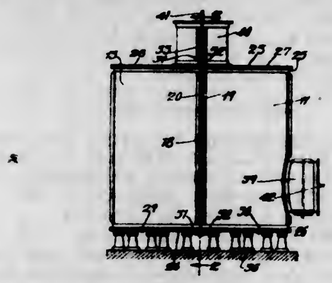
1. A steam heating system including in combination a vertical line of radiators of the convection type in which the greater portion of the heat is transmitted to air which is circulated over the heating surfaces, means for regulating separately the flow of air over each radiator and thereby the consumption of steam, a riser carrying the steam supply and connected to the inlet and outlet respectively of each of said radiators, means in the riser between the inlet and outlet of each of the radiators for maintaining a higher pressure of steam at the inlet of the radiator than at its outlet and means in the lower part of the riser for limiting the difference between the pressures at the inlet and the outlet respectively of each radiator to a predetermined maximum so that the required differential pressure is maintained for all the radiators in the line independently of any differences in their consumption of steam.

1,899,978. TANK OUTLET VALVE. ALBERT H. NOYES, Chicago, Ill., assignor to Hills-McCanna Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 20, 1929. Serial No. 394,063. 9 Claims. (Cl. 137—21.)



1. A tank discharge valve comprising a valve casing having an outlet at its lower end and a lateral extension adapted to be connected to the tank outlet and provided with an inlet port, and a piston valve slidable in said casing and comprising a cylindrical body having a flange at its upper end, upper and lower packing rings, an intermediate sleeve and a follower ring mounted on the cylindrical valve body and a plate secured to the lower end of the valve body and engaging the follower ring to axially compress and radially expand the packing rings, said casing having a stop shoulder for engaging the follower ring to arrest the closing movement of the valve with the packing rings above and below said inlet port, substantially as described.

1,899,979. RAZOR BLADE PACKAGE. HAZLEHURST R. NOYES, Los Angeles, Calif., assignor to William G. McAdoo, Los Angeles, Calif. Filed Nov. 20, 1931. Serial No. 576,245. 1 Claim. (Cl. 206—46.)

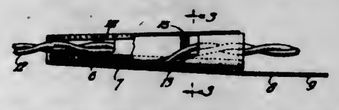


A container for slotted razor blades comprising a base element of sheet material of width greater than the blades to be packaged, a tab of sheet material extending perpendicularly from said base portion to engage with slots in blades to be packaged and retain them in position, one of the ends of said base element being extended to fold back flat against blades positioned on said tab and having a slot therein for receiving the upper edge of said tab and the other end of said base element being extended to fold back flat on top of said first end, said other end being substantially imperforate whereby it rests against the top edge of said tab projecting through said slot in said first end, and outer enclosing means for maintaining said ends flat against each other and against blades in the package.

1,899,980. SUPPORT CONSTRUCTION. ARTHUR F. O'CONNOR, Chicago, Ill., assignor to Equipment Specialties Company, Chicago, Ill., a Corporation of Illinois. Filed July 25, 1931. Serial No. 553,234. 10 Claims. (Cl. 62—169.1.)

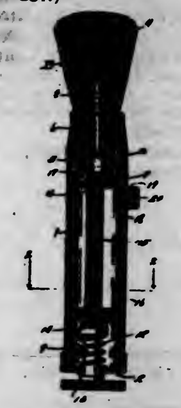
1. The combination, with a refrigerator compartment having brine tanks and a drip pan, of a support structure for said brine tanks in said drip pan, and blocks of relatively soft, easy-wearing material disposed in the drip pan under the opposite ends of the support.

1,899,981. PROTECTIVE INCLOSURE FOR REACTORS AND SIMILAR APPARATUS. SANDOR I. OBERREICHER, Brooklyn, N. Y., assignor to Metropolitan Device Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Dec. 9, 1930. Serial No. 501,047. 11 Claims. (Cl. 175—361.)



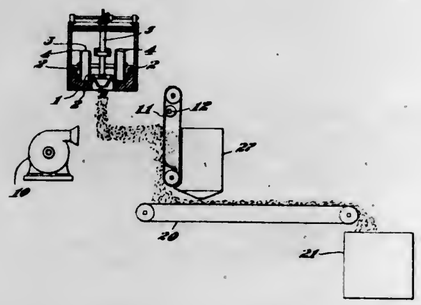
1. Electric apparatus comprising a reactance coil and an inclosure therefor, comprising a metallic shield and intercepting strips of insulating material in the path of secondary induced currents in said inclosure.

1,899,982. CLAMP CLOTHESPIN. AXEL E. OLSON, Brainerd, Minn. Filed July 11, 1932. Serial No. 621,887. 2 Claims. (Cl. 24—137.)



1. In a device of the kind described, two elongated jaws hingedly connected at aligned medial points, the intended upper ends of the jaws being slotted through in alignment in a common plane, the inner faces of the upper extremities of the jaws being grooved through longitudinally in the said plane of the said slots, thereby forming a hanger slideway, and also giving additional range to the opening and closing of jaw ends without resorting to increasing the angle of wedge to obtain a greater opening and closing, and a hanger having a head and a wedge shaped depending portion slidably seated at its margins within said slideway, the opposite end of the hanger having means for engaging a clothes line, there being a hole formed thru the head of the device for engaging a nail or the like.

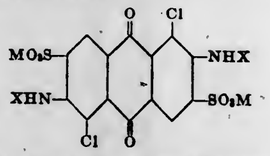
1,899,983. WIRE CLAMP. HORACE W. PERRY, Oak Park, Ill., assignor to Reliable Electric Company, Chicago, Ill., a Corporation of Illinois. Filed June 8, 1931. Serial No. 542,876. 4 Claims. (Cl. 24—126.)



1. A clamp comprising an elongated transversely U-shaped clamping member having a groove extending around the back of said member and opening through the opposite side walls thereof to the space between said walls and means for mounting said member on a support.

1,899,984. SHAVING BRUSH. JAMES D. POWELL, Stoyestown, Pa. Filed Apr. 28, 1932. Serial No. 608,057. 3 Claims. (Cl. 15—137.)

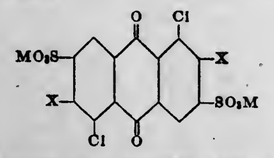
1. A device of the character described consisting of an elongated tubular member, a brush extending within one end portion of the member, said inserted portion of the brush having an opening to permit delivery therethrough to the fibres of the brush, the inner portion of such opening constituting a valve seat, a rod freely disposed through the opposite end portion of the member, the inserted end of the rod constituting a valve for coaction with the valve seat, an expansible member within the tubular member and coacting with the rod and a wall of the tubular member for normally maintaining the valve end of the rod in closing engagement with the valve seat, and a follower threaded upon the rod and moving therealong upon rotation of the rod, the pressure created by the follower upon the content of the tubular member upon rotation of the rod in one direction bodily moving the rod and follower against the tension of the expansible member to allow the valve at the inserted end portion of the rod to move away from its seat, said rod and follower bodily moving in the opposite direction under the action of the expansible member as the pressure on the content of the tubular member decreases to return the valve of the rod to its seat.



1,899,985. FIBROUS PRODUCT AND MANUFACTURE OF SAME. ROLAND B. RESPESS, Wickford, R. I., assignor to Respats Inc., Cranston, R. I., a Corporation of Rhode Island. Filed July 8, 1930. Serial No. 466,465. 18 Claims. (Cl. 106—24.)

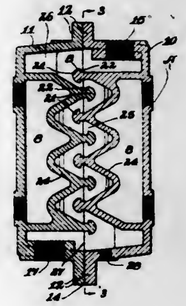
2. Method of making a fiber-cement, comprising the subjection of wood chips to the abrasive and splitting action of sand mixed therewith, and mixing the reduced chips and the sand with cementitious material.

1,899,986. 1 5-DICHLORO-2,6-DIAMINO-ANTHRAQUINONE-3,7-DISULPHONIC ACID AND PROCESS OF PRODUCING SAME. WILLIAM L. RINTELMAN, Milwaukee, Wis., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, a Corporation of Delaware. Filed Apr. 20, 1931. Serial No. 531,631. 8 Claims. (Cl. 260—60.)



1. As a new product of manufacture, a compound of the following general formula:

in which X is hydrogen or an acidyl group, and M is a hydrogen atom or a metallic radical.



1,899,987. PROCESS OF PREPARING 1,5-DICHLORO-2,6-DIAMINO-ANTHRAQUINONE. WILLIAM L. RINTELMAN, Milwaukee, Wis., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, a Corporation of Delaware. Filed Apr. 20, 1931. Serial No. 531,632. 6 Claims. (Cl. 260—60.)

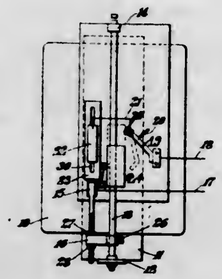
1. The process of producing 1,5-dichloro-2,6-diamino-anthraquinone which comprises hydrolyzing a compound of the general formula:

in which M stands for a hydrogen atom, an ammonium group, or a metallic radical, and X stands for an amino group, either primary or substituted by a readily hydrolyzable protective group.

1,899,988. AIR DRIER. RICHARD RUEMELIN, Milwaukee, Wis. Filed Nov. 8, 1929. Serial No. 405,764. 17 Claims. (Cl. 183—79.)

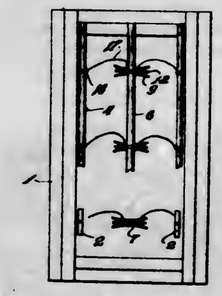
1. An air drier including, a pair of members secured together, and a series of interrupting baffles and horizontal moisture conducting grooves carried by said members forming an air passage through said drier to carry compressed air from an inlet at the top to an outlet at the bottom whereby the major part of the moisture is collected out of the air passing through said drier.

1,899,989. PROCESS OF TREATING CELLULOSE FIBER PULP. HELLMUTH C. SCHWALBE, Philadelphia, Pa., assignor to Dill & Collins Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 4, 1931. Serial No. 527,664. 9 Claims. (Cl. 92—15.)



4. The process of treating sulphite pulp which comprises as steps therein the prebeating of the same, thereafter subjecting it to a prebleaching treatment and subsequently to a digesting treatment.

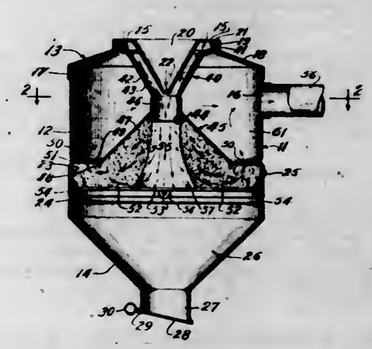
1,899,990. MANUFACTURE OF PILE FABRICS. HOWARD L. SHUTTLEWORTH, Amsterdam, N. Y., assignor to Mohawk Carpet Mills, Inc., Amsterdam, N. Y., a Corporation of New York. Filed Feb. 8, 1932. Serial No. 591,546. 4 Claims. (Cl. 2—278.)



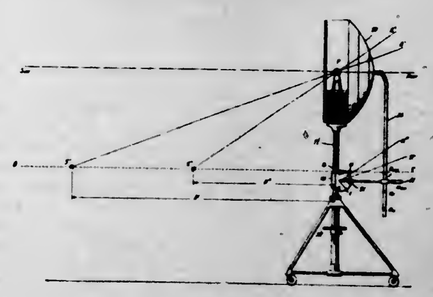
1. A pile fabric having a heading without pile tufts at at least one end of the fabric, the heading being folded back upon itself with the free edge underneath and with no portion of the heading lying beneath that portion of the fabric provided with pile tufts, a strip of fringe having a portion lying on top of the doubled portion of the heading, and means for securing the fringe and the two plies of the heading together.

1,899,991. ELECTRIC WELDING APPARATUS. ALBERT A. SMITH, Riverdale, N. J., assignor to Metropolitan Engineering Company, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 7, 1929. Serial No. 397,843. 9 Claims. (Cl. 219—4.)

1. In a welding apparatus including a movable pressure application element and a welding current control circuit cooperating therewith, a switch for controlling the application of welding current, means actuated by said movable pressure element to close and open said switch at definite independent points in its path of travel and means to adjust the points at which said switch is closed and opened.



1,899,992. RACK FOR ELECTROPLATING. EDWIN SOHN, Oak Park, Ill. Filed Dec. 30, 1926. Serial No. 157,919. 6 Claims. (Cl. 204—5.)

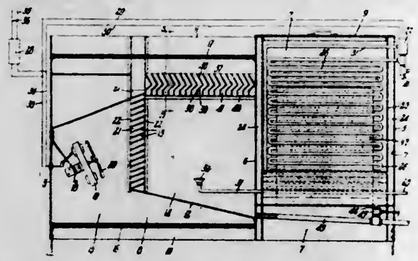


1. As a new article of manufacture, a rack for use in plating articles comprising a bar, resilient means secured at intervals thereto and adapted to be inserted into the articles to be plated to maintain said articles thereon, auxiliary anodes in said bar adapted to project into the articles to be plated, means for insulating the anodes from said resilient means and means for partially insulating said anodes from an electroplating solution.

1,899,993. FLUID CLEANER. GEORGE M. SPENCER, Chicago, Ill. Filed June 18, 1930. Serial No. 461,906. 5 Claims. (Cl. 183—48.)

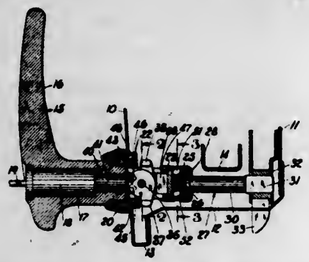
1. An air cleaner comprising, a body having inlet and outlet openings, a member mounted in said body to receive fluid from the inlet opening and being substantially of the form of an inverted frustrated cone terminating in a depending cylindrical channel portion, a second member of similar form mounted in said body and embracing the depending cylindrical channel portion of said first mentioned member and spaced from the body, said members forming a central fluid channel and an outer outlet chamber communicating with the outlet in said body, a mass filter positioned in said second member, and between said central channel and said outlet chamber having a central opening therein, and a bottom closure for said body arranged to provide a quiescent chamber and to receive and store materials separated from fluid.

1,899,994. CONVERSION OF SOUND INTO ELECTRICAL IMPULSES. RALPH K. SPOTTS, Los Angeles, Calif., assignor to Radio-Keith-Orpheum Corporation, a Corporation of Maryland. Filed Aug. 28, 1931. Serial No. 559,878. 4 Claims. (Cl. 179—1.)



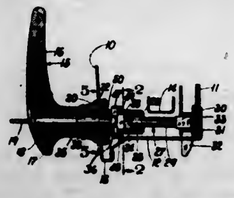
1. A sound pick-up device including a concentrator, a microphone arranged within said concentrator to receive the concentrated sound, a support for said concentrator, a control member pivoted to said support, coupling means extending between said control member and concentrator for adjusting the angular position of said concentrator, and means for predetermining the angular adjustment of said concentrator.

1,899,995. AIR CONDITIONING APPARATUS. PEHR W. STROMBERG, Somerville, Mass., assignor of one-half to Willsie M. Mattison, Ogdensburg, N. Y. Filed July 26, 1932. Serial No. 624,673. 4 Claims. (Cl. 261—115.)



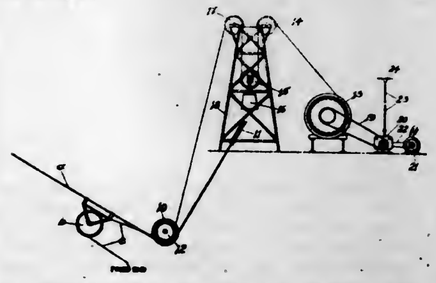
1. An air conditioning apparatus having, in combination, a casing embodying therein a humidifying compartment, a blower adapted to create a current of air to be purified through said compartment, means to create a spray in the humidifying compartment, means to temper

said spray, a plurality of baffle plates interposed between the blower and spray adapted to diffuse air passing therebetween, a plurality of other baffle plates adapted to in-



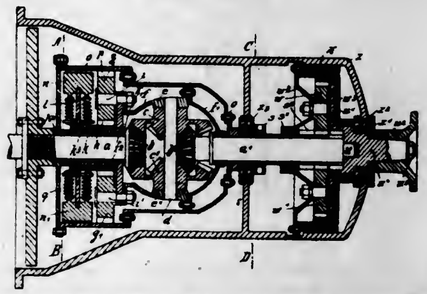
tercept the saturated air and arrest the impurities entrained therein, and means to automatically control the supply of cooling fluid and the actuation of the blower.

1,899,996. DOORLOCK HANDLE. PERRY W. SULLIVAN, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed July 8, 1931. Serial No. 549,392. 2 Claims. (Cl. 70—91.)



1. In a vehicle door lock, a lock handle having a slot therein, a separate latch operating spindle having a slot therein corresponding to the slot in said handle, a pair of rotatable levers mounted in the slot in said handle rotatable into the slot in said spindle, a key controlled rotatable member in said handle, extensions on said member engageable in recesses in said levers whereby said levers may be rotated into said slot in said spindle to connect said handle to said spindle, and a pair of spring pressed balls carried by said spindle engageable with said handle to resiliently define the position in the rotation of said handle relative to said spindle wherein the locking means in said handle may be engaged with said spindle.

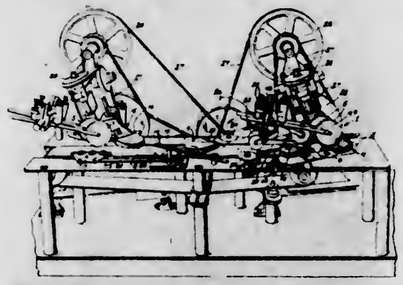
1,899,997. DOORLOCK HANDLE. PERRY W. SULLIVAN, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed July 8, 1931. Serial No. 549,393. 3 Claims. (Cl. 70—91.)



1. In a vehicle door lock, a lock handle and a separate latch operating spindle telescopically associated against axial separation, means preventing axial movement of said spindle, means carried by said lock handle engageable with said spindle for operatively connecting said handle and said spindle for unitary rotation, a leaf spring surrounding said handle for urging said second means into spindle engaging position, and key operated means for moving said second means to render said handle freely rotatable relative to said spindle.

1,899,998. METHOD AND APPARATUS FOR SPINNING BRIDGE CABLES. CHARLES C. SUNDERLAND, New Brunswick, N. J., assignor to John A. Roebling's Sons Company, Trenton, N. J., a Corporation of New Jersey. Filed Jan. 9, 1931. Serial No. 507,742. 5 Claims. (Cl. 14—23.)

4. The combination with the spinning wheel and traction rope of a cable spinning apparatus, of a supply reel carrying the cable wire, variable speed driving means for rotating said reel to supply the wire to the spinning wheel in the travel of the latter, and a floating tension roll on the cable wire between the supply reel and spinning wheel.

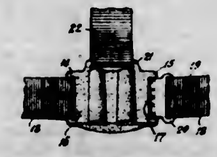


1,899,999. SUN AND PLANET WHEEL GEAR. ERICH UHLICH and WALTER BALLENTIN, GENANNT MIELKE, Berlin-Hirschgarten, Germany. Filed Mar. 28, 1930, Serial No. 439,632, and in Germany Mar. 28, 1929. 9 Claims. (Cl. 74—34.)

1. A sun and planet wheel gear, especially for motor-driven vehicles, comprising a motor-driven shaft, a sun wheel driven by said shaft, a pair of stepped wheels co-operative with said sun wheel, a second pair of planet wheels, a carrier common to both of said pairs of planet wheels, a wheel rim having internal teeth in mesh with said second pair of planet wheels, and a clutch geared to one of the planet wheels of said first pair.

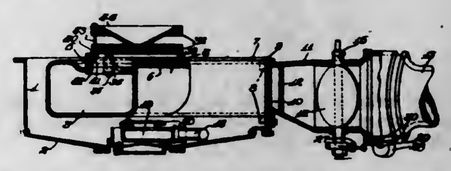
1,900,000. TRIMMING APPARATUS. THOMAS W. MORRIS, Chicago, Ill. Filed July 22, 1929. Serial No. 380,185. 18 Claims. (Cl. 164—68.)

1. Apparatus for trimming the overflow from a rubber heel comprising a trimmer having rotating cutting edges which draw the work toward the cutters, a spring pressure roller for engaging the upper surface of the heel to hold the heel down as it is being trimmed, yieldable pivotally mounted means for guiding said heel as said cutters are acting on it so that the entire outline of the heel with the exception of the breast will be trimmed, said guide means comprising a roller for engaging the untrimmed side of the heel opposite the side on which the cutter initially acts, an abutment member engaged by the breast of the heel forming a spring fulcrum about which the heel turns as the rear of the heel is being trimmed, and a second abutment member engaged by the trimmed side of the heel as the opposite side of the heel is being trimmed, a turntable for supporting the heel as it is being acted on by said trimmer, a conveyor for carrying said heel from said guide and trimming means, a second conveyor running alongside said first conveyor, guiding and



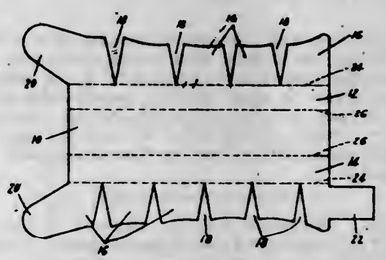
deflecting means above said first conveyor for deflecting the heel from said first conveyor to said second conveyor and causing the heel to be turned to present the breast portion in position for trimming, said deflector comprising a frictional abutment engaged by the heel extending obliquely to the first conveyor, a second trimmer for trimming the breast of the heel, adjustable guide means above the second conveyor for engaging the breast of the heel and steering it to the trimmer, a spring pressure roller for engaging the upper surface of the heel as it is being trimmed to hold the heel down on the conveyor, and a spring-pressure roller for engaging the end of the heel opposite the breast for holding the breast of the heel in proper relation to the trimmer.

1,900,001. METHOD OF PURIFYING AN ANTHRAQUINONE BODY. LYNNE ULICH, Racine, and ROBERT J. GOODRICH, South Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, a Corporation of Delaware. Filed Feb. 6, 1930. Serial No. 426,435. 5 Claims. (Cl. 260—60.)



4. The process of purifying crude beta-amino-anthraquinone, which comprises sulphonating the impurities by treating the impure beta-amino-anthraquinone with sulphonating agents under conditions milder than those leading to substantial amounts of beta-amino-anthraquinone sulfonic acid and precipitating the beta-amino-anthraquinone in the form of its free base by diluting the reaction mass with water.

1,900,002. WRINKLE ERADICATOR. ANNA D. VARELL, New York, N. Y. Filed Mar. 5, 1930. Serial No. 433,261. 1 Claim. (Cl. 128—163.)

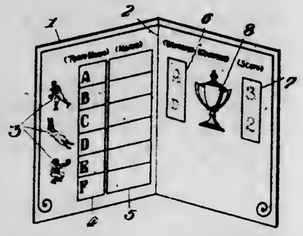


A device of the character described comprising a soft rubber pressure pad of substantially oblong rectangular form having upon one face a plurality of transversely extending fixed bars of hard rubber and having rounded surfaces adapted to be brought into contact with the portion of the lower forehead intermediate the eyebrows, and a band secured at one end to an end portion of said pad and adapted to encircle the head to hold said pad in position, the free end of said band being adapted to be detachably secured to the other end portion of said pad.

1,900,003. BURNER. EARL C. WALKER, Chicago, and GUSTAF W. ENGSTROM, Riverside, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed May 31, 1930. Serial No. 457,947. 7 Claims. (Cl. 158—69.)

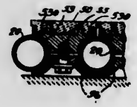
1. A burner comprising a burner grating, a base plate for said grating having a pair of substantially semi-cylindrical openings therethrough positioned adjacent each other, an air supply conduit, and a pair of curved hollow vaporising members communicating with the openings in the base plate and with the air supply.

1,900,004. METHOD OF FORMING BRAKE SHOES AND BLANKS THEREFOR. STANLEY WHITWORTH, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Dec. 15, 1927. Serial No. 240,175. 19 Claims. (Cl. 29—152.)



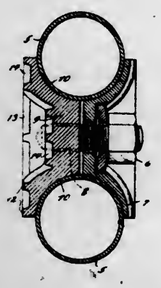
18. That method which comprises forming a blank with a central rectangular portion and with two rectangular portions of half the width along opposite sides of the central portion and with two series of tongues along the sides of the said two portions, folding the said two portions under opposite sides of the central portion and folding the tongues at right angles to the double-thickness part so formed, the tongues forming stiffening means for the double-thickness part, and bending the entire blank on an arc, the tongues being trapezoidal in form and the tongues of one series being staggered with respect to those of the other series so that the bending brings them together to form a substantially continuous web, with the joint between successive tongues of the one series being bridged by one of the tongues of the other series.

1,900,005. PLAYBOARD. SHIICHI YASUDA, Osaka-Fu, Japan. Filed Nov. 13, 1931. Serial No. 574,767. 2 Claims. (Cl. 273—138.)



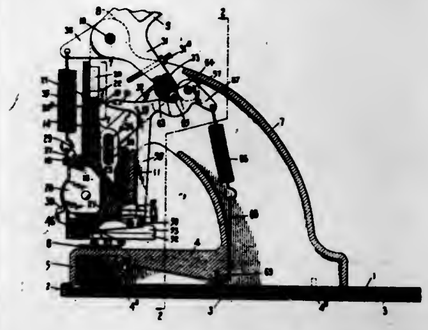
1. A play board comprising a board proper, a column of indicia on said board, a column of blank spaces in juxtaposition with said indicia, adapted to have inscribed therein the names of the participants of the game played on said board, characters applied in "invisible" ink on

said board, adapted to indicate the supposed winners, other characters in "invisible" ink indicating the "supposed scores" of the winners, respectively, and means



on said board when applied to the characters for causing said characters in "invisible" ink to become visible by a chemical reaction therewith.

1,900,006. FURNACE. ERVIN G. BAILEY, Cleveland Heights, Ohio, assignor, by mesne assignments, to Fuller Lehigh Company, a Corporation of Delaware. Filed Mar. 20, 1925. Serial No. 17,054. 24 Claims. (Cl. 122—235.)

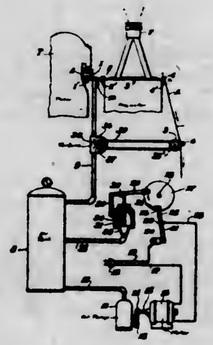


1. A furnace wall composed of parallel tubes combined with tiles or blocks, each block having at the ends of its rear portion concave seats adapted to fit the outer surfaces of a pair of tubes, and each having conductive cement material between the tubes and tile affording a gas-tight heat-conducting union between the tubes and tile, and means for securing the tiles to the tubes under pressure.

1,900,007. FURNACE BLOCK. ERVIN G. BAILEY, Easton, Pa., assignor to Fuller Lehigh Company, Fullerton, Pa., a Corporation of Delaware. Filed July 30, 1927. Serial No. 209,583. 9 Claims. (Cl. 122—6.)

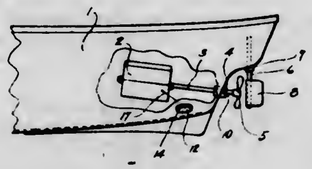
1. In combination, a combustion chamber having a wall comprising a row of cooling tubes, a plurality of metallic blocks, means to clamp each of said blocks to said tubes with the inner surface of a block forming part of the inner face of the wall and with each block having extended thermal contact with at least one of said tubes, means to burn slag-forming fuel in the chamber, and projections on said inner surface to cause residue from said burning fuel to adhere thereto.

1,900,008. STAMPING PRESS. EMANUEL BAUMGARTEN, CHARLES W. GOSNELL, and NOEL J. DEISCH, Washington, D. C., assignors to The Baumgarten Company of Washington, Washington, D. C., a Corporation of The District of Columbia. Filed Apr. 19, 1929. Serial No. 356,552. 4 Claims. (Cl. 101—320.)



1. In a stamp press, the combination of a movable die and a stationary die, means for inking said movable die normally disposed between the latter and said stationary die, a hand operated lever positively connected to said movable die for actuating the latter, and cam-controlled means in turn controlled by said hand lever for moving said inking means out of position between said dies and across the impression surface of said movable die while the latter is stationary, continued movement of said hand lever forcing said movable die into contact with said stationary die.

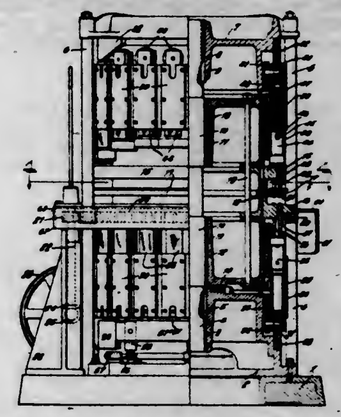
1,900,009. AUTOMATIC DOOR, WINDOW, OR GATE OPERATING DEVICE. JOHN LUDVIK CHRISTENSON, Edmonton, Alberta, Canada, assignor of one-half to Earl M. Boughtin and C. Wagenius, Edmonton, Alberta, Canada. Filed Dec. 20, 1930. Serial No. 503,831. 3 Claims. (Cl. 268—53.)



1. A device of the character set forth including a supporting structure and a slidable closure therefor, a rotatable drive shaft carried by the supporting structure and having oppositely extending feed grooves, an electric motor for rotating the shaft and in circuit with an electrical source, a housing carried by the closure and slidably receiving the shaft, actuating members located in the housing and mounted on the shaft for sliding movement relative thereto, lugs on said members and engaging the grooves, a control means carried by the housing and when in one position adapted to lock one of the actuating members to the housing for causing the door to move in one direction by the rotation of the shaft and when shifted to another position to lock the other actuating member to the housing for causing the closure to move in an opposite direction by the rotation of the shaft, stops carried by the supporting structure for actuating said last means when the closure reaches the limit of its movement, means in circuit with the motor to set the latter in operation, and means for interrupting the circuit to the motor when the closure reaches the limit of its movement.

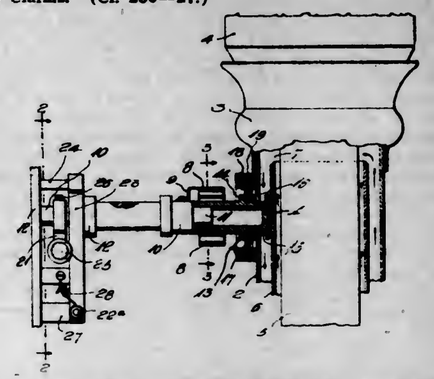
1,900,010. STOCK QUOTATION PROJECTING MACHINE. JAMES W. DECKER, New York, N. Y. Filed May 19, 1928, Serial No. 278,982. Renewed May 24, 1932. 8 Claims. (Cl. 274—2.4.)

1. The combination with a ticker tape, of a tape drawing device for drawing the tape across the light aperture of a projecting machine, pneumatic means cooperating with the tape before it enters the light aperture for dissipating the vibrations transmitted to the tape before the tape passes to the light aperture, and an air motor for actuating said tape drawing device, said pneumatic means supplying pressure normally to actuate said air motor.



1,900,011. CORROSION PREVENTING ATTACHMENT FOR BOATS. HAROLD L. DURHAM, Everett, Wash. Filed June 23, 1931. Serial No. 546,285. 4 Claims. (Cl. 114—65.)

1. In a boat designed for operation in salt water and having a stern bearing and propeller shaft extending therethrough, a zinc plate attached to the hull of the boat and in contact with the water in which it floats and having a circuit connection with the propeller shaft at a point within the stern bearing.

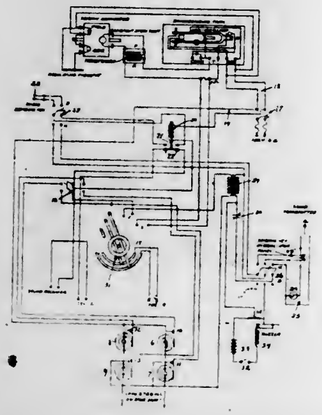


1,900,012. PROCESS OF AND APPARATUS FOR MAKING WADS. HANS ERNST, Alton, Ill., assignor to Western Cartridge Company, East Alton, Ill., a Corporation of Delaware. Filed Sept. 4, 1925. Serial No. 54,486. 16 Claims. (Cl. 18—16.)

4. A machine for making gun wads, comprising, a die, opposed punches, means for feeding material to said die, means for moving one of said punches into said die while the opposed punch recedes in order to pack the material,

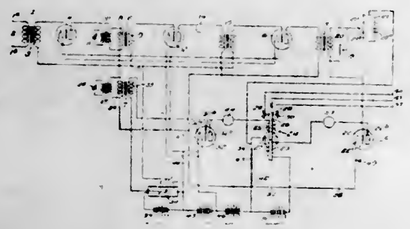
and means for moving the receded punch in said die to condense the material.

1,900,013. PROTECTIVE SYSTEM FOR FLUID COOLED TUBES. LOUIS A. GEBHARD, Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y., a Corporation of Delaware. Filed Feb. 12, 1930. Serial No. 427,985. 9 Claims. (Cl. 250—27.)



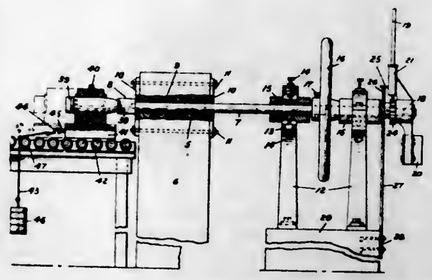
1. A high power tube system including a high power electron tube including an electrode having an exposed surface, a jacket enclosing said electron tube and arranged for the circulation of a cooling fluid around said electrode, a thermally conductive element extending through said jacket, an angularly shiftable shaft member journaled in said thermally conductive element, a thermostatic member extending between said thermally conductive element and said angularly movable shaft, a switch controlled by said angularly movable shaft, said switch operating to interrupt the power supply circuits to said electron tube under conditions of excessive temperature within the jacket surrounding said electron tube.

1,900,014. ANTIFREEZE COMPOSITION. GEORGE D. GRAVES, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed May 6, 1930. Serial No. 450,318. 7 Claims. (Cl. 252—5.)



1. A liquid anti-freeze composition which is substantially non-volatile and capable of remaining liquid at low temperatures, comprising water, sorbitol and a glycol, the sorbitol being present in an amount which is at least .5% of the mixture

1,900,015. METHOD AND APPARATUS FOR SOUND RANGING. HARVEY C. HAYES, Washington, D. C. Filed Jan. 4, 1927. Serial No. 158,953. 7 Claims. (Cl. 177—386.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)

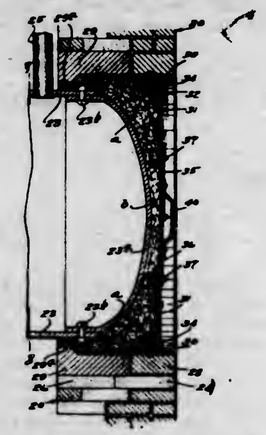


2. In a device for measuring distance consisting of means for generating one periodic series of sonic signals, means for generating a second periodic series of sonic signals so spaced in time relation to the first series that the signals of the second series are generated only in the periods between the signals of the first series and in which said periods are divided by signals of the second series in a fixed ratio at all times independent of the frequency of occurrence of said signals, means for transmitting said first series of signals to an object, the distance of which it is desired to know, means for receiving the sonic signals reflected from said object and conveying them to a point of audition, means for conveying the second series to the point of audition and means for correspondingly varying the frequency of occurrence of the two series of signals and maintaining said time relation whereby the echoes of the signals of the first series reach said point of audition at the same time as the direct signals of the second series.

1,900,016. SIGNALING SYSTEM. JAMES M. KANE, Berkeley, Calif. Filed Mar. 13, 1931. Serial No. 522,483. 2 Claims. (Cl. 178—88.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)

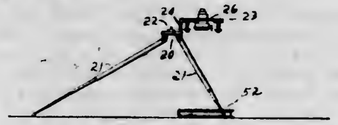
1. In a signal receiving system, an input circuit, a pair of branch circuits extending from said input circuit, one of said branch circuits having means discriminating against the desired signaling energy while transmittng undesred signaling energy and interference and the other of said paths having means discriminating against interference and undesired signaling energy while transmitting the desired signaling energy, a pair of control tubes each having input and output circuits with the input circuits thereof individually connected to each of said paths, a relay system including a movable armature and a pair of actuating windings, means interconnecting the output circuit of each control tube with a selected winding, a resistance element included in the output circuit of one of said control tubes and connections across said resistance element with the input circuit of the other of said control tubes for differentially energizing said control tubes for effecting a balancing operation of said actuating windings with respect to the undesired signaling energy and interference while controlling the movement of said armature under control of the signaling energy.

1,900,017. APPARATUS FOR DISCONNECTING THREADED MEMBERS. GRAFTON S. KENNEDY, Dayton, Ohio. Filed Jan. 31, 1931. Serial No. 512,716. 3 Claims. (Cl. 21—88.2.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)



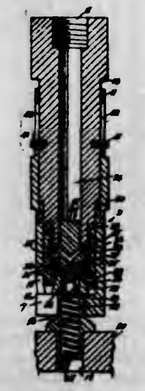
1. In apparatus of the class described, a wall, a shaft passing through the wall, a hand wheel on one end of the shaft, a wrench head on the other end of the shaft and including spaced jaws parallel to the shaft, an adapter securable to the wrench head and having means for externally engaging a member to be unthreaded, a holder confined between the adapted and wrench head and having means for internally engaging a member to be unthreaded, a work-holding carriage, a series of rollers forming a support for the carriage, and a gravity actuator including a flexible cable passing over one of the rollers and a hook carried by the cable for detachably engaging the carriage.

1,900,018. DEVICE FOR CONTROLLING ELECTRIC CURRENT. JULIUS EDGAR LILIENFELD, Brooklyn, N. Y. Filed Mar. 28, 1928. Serial No. 265,372. 28 Claims. (Cl. 179—171.)



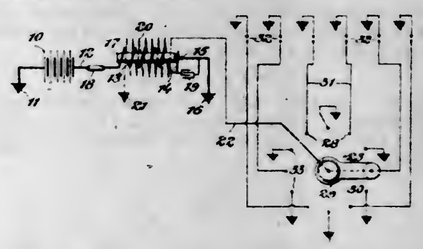
1. An electrical device comprising a conducting solid material having on one surface an insulating layer of a thickness of the order of magnitude of 10^{-4} mm., and a superposed stratum of solid material integral therewith, of substantially greater conductivity and insulated from the conducting solid material by the said insulating layer.

1,900,019. MUD DRUM SEAL. MICHAEL LIPTAK, St. Paul, Min. Filed Nov. 30, 1931. Serial No. 578,010. 18 Claims. (Cl. 110—97.)



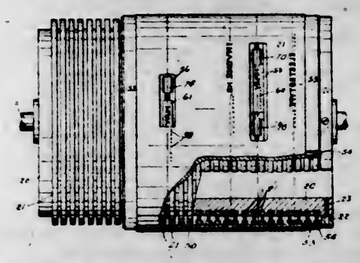
1. In a mud drum seal, a tubular casing adapted to be embedded in a furnace wall concentric to and in the vicinity of the head of the mud drum, a diaphragm removably secured to said casing, and an insulating packing adapted to be packed within said casing and against the mud drum and to be held in place by said diaphragm.

1,900 020. PORTABLE CAMERA APPARATUS. BYRON MCCANDLESS, U. S. Navy. Filed Aug. 31, 1931. Serial No. 560,252. 11 Claims. (Cl. 88—24.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)



2. A portable camera apparatus comprising a portable support, a plate swivelly affixed to said support, an adjustable camera lens in said plate, and a focusing glass whereby to adjust said lens.

1,900,021. LUBRICATING DEVICE. MORRIS NEWMARK, New York, N. Y. Filed Dec. 9, 1931. Serial No. 579,959. 8 Claims. (Cl. 285—143.)

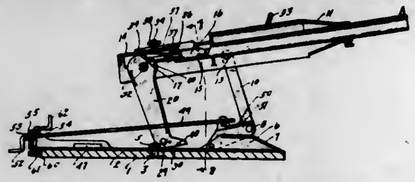


1. A nozzle adapted to be secured to a pressure lubricating device, comprising a barrel, a plunger rotatably and depressibly mounted therein and having a bore in communication with the pressure device, means for releasably locking the plunger in depressed position, a perforated pilot operatively mounted in the said bore, and a casing for maintaining the pilot in the said bore.

1,900,022. HIGH TENSION IGNITION SYSTEM. FRED D. NUTTALL, Richmond, Va., assignor of one-fourth to Laurence M. Mathieu, Richmond, Va. Filed July 12, 1930, Serial No. 467,561. Renewed June 4, 1932. 4 Claims. (Cl. 123—148.)

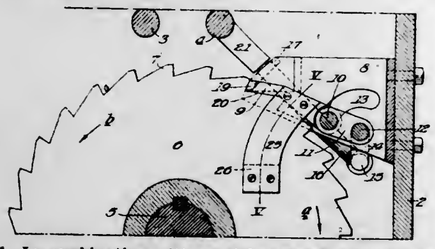
1. In a high tension ignition system, a distributor mechanism comprising a housing of insulating material, spaced contacts carried thereby, a movable distributor member carrying a conductor for successive cooperation with said contacts, a source of high tension current, means whereby said high tension current is supplied to said distributor member during its cooperation with said contacts and also during its entire movement between adjacent pairs of said contacts, and means between each adjacent pair of contacts for grounding said conductor during a portion of the movement thereof between each adjacent pair of said contacts.

1,900,023. PRINTING FORM. HENRY C. OSBORN, Cleveland, Ohio, assignor to Multigraph Company, Wilmington, Del., a Corporation of Delaware. Filed May 16, 1931. Serial No. 537,893. 20 Claims. (Cl. 101—374.)



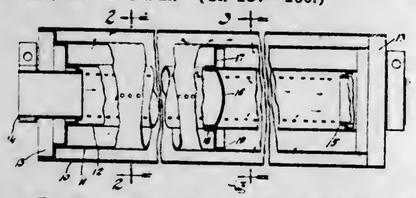
18. The combination of a rotary printing drum having circumferentially extending rails, a curved printing plate resting on the rails, a stop on the drum engaged by one arcuate end of the plate, means for tightening the plate arcuately about the drum, an arcuate printing slug T-shaped in cross section, having its head portion resting on a pair of the rails and its web portion extending between them, said slug having its printing face registering with that of the plate, and a platen coacting with both the plate and the slug.

1,900,024. TOY COAST DEFENSE GUN. FRANK J. PETERS, Portland, Oreg., assignor of one-half to Irving J. Boyce, Portland, Oreg. Filed Mar. 2, 1932. Serial No. 596,267. 6 Claims. (Cl. 124—14.)



5. In a device of the class described, the combination of a gun barrel and breeching, manually manipulative means for loading the gun, means for raising then firing

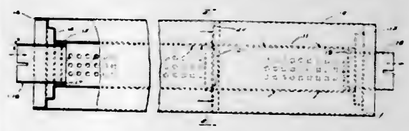
and finally returning the gun to normal lowered position as a sequence in each firing cycle, means for settably limiting the length of projectile that may be placed within



the breeching and settable means for predetermining the angle of elevation of the barrel assembly and the distance that the projectile may be thrown.

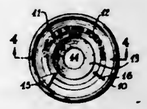
1,900,025. MEANS FOR PREVENTING REVERSE MOVEMENT. SIDNEY C. PORTER, East Liverpool, Ohio. Filed Jan. 7, 1929. Serial No. 330,696. 29 Claims. (Cl. 192—4.)

1. In combination with a ratchet-wheel, a locking pawl therefor, a shifting lever having pivotal connection with the pawl, means for actuating the lever, and an arm on the pawl frictionally engaging the ratchet wheel.



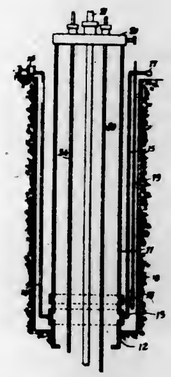
1,900,026. MUFFLER FOR INTERNAL COMBUSTION ENGINES. EDWARD H. RADECKY, Detroit, Mich., assignor to The Murray Corporation of America, a Corporation of Delaware. Filed May 18, 1929. Serial No. 364,136. 1 Claim. (Cl. 137—160.)

A muffler for an internal combustion engine comprising three tubes arranged in spaced concentric relation to each other, a pair of head pieces supporting the ends of said tubes and having central openings leading to each end of the inner tube, baffle plates secured intermediate the ends of the inner and intermediate tubes and dividing each of them into two chambers of substantially equal capacity, said inner and intermediate tubes having lateral passages therethrough on the inlet side of said baffle plates, and said intermediate tube having lateral passages on the outlet side of said baffle plates of lesser area than on the inlet side, and said inner tube having lateral passages on the outlet side of lesser total area than the corresponding passages in said intermediate tube.



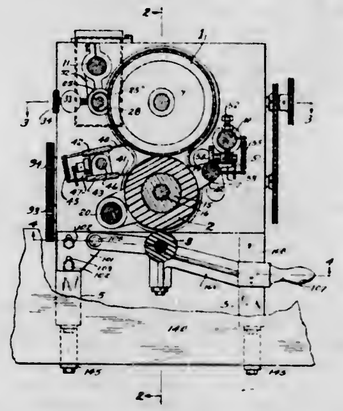
1,900,027. MUFFLER FOR INTERNAL COMBUSTION ENGINES. EDWARD H. RADECKY, Detroit, Mich., assignor to The Murray Corporation of America, a Corporation of Delaware. Filed Aug. 5, 1929. Serial No. 383,464. 1 Claim. (Cl. 137—160.)

A muffler for an internal combustion engine consisting of two tubes arranged in spaced concentric relation to each other, one of said tubes serving as the outer housing of the muffler, a pair of head pieces supporting the opposite ends of said tubes and forming closures for the ends of said outer tube and having central openings registering with the ends of said inner tube, a baffle plate secured in and intermediate the ends of said inner tube and separating the same into two unequal compartments, a second aperture baffle plate secured in and intermediate the ends of said outer tube and around said inner tube



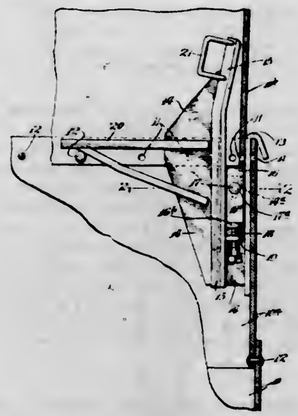
at a point adjacent the location of said first baffle plate, the inlet portion of said inner tube which is the longer portion having a group of lateral gas passages therein adjacent the entrance thereto and another group adjacent said baffle plate, and the outlet portion of said tube which is the shorter portion having lateral gas passages therein, the total area of such lateral gas passages in the inlet portion of said inner tube being greater than the total area of the lateral passages in the outlet portion thereof.

1,900,028. MANICURING METHOD AND MEANS. HERBERT B. SNIDER, Ellensburg, Wash. Filed Apr. 18, 1932. Serial No. 605,947. 6 Claims. (Cl. 132—78.)



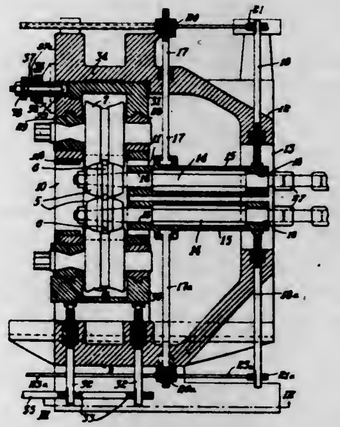
2. As a new article of manufacture, a manicuring device including a continuous cone-shaped abrasive surface for grinding the nails, in combination with a set of polishing bristles and a cleaning point, both of which project from the surface opposite the cone-shaped grinding surface.

1,900,029. WELL DRILLING APPARATUS. THOMAS G. TAYLOR, Roswell, N. Mex. Filed Nov. 24, 1931. Serial No. 577,075. 4 Claims. (Cl. 255—4.)



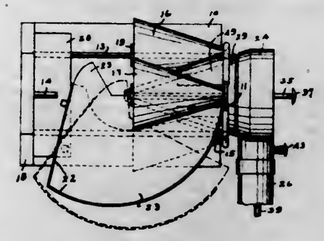
1. In a well drilling apparatus having a rotary drilling bit and a motor for rotating it, means for holding the motor support from rotating to permit rotation of the bit, means for supplying and maintaining pressure in the well, said means serving also to operate said motor holding means.

1,900,030. SURFACE DECORATING MACHINE. GUIDO VON WEBEREN and EDWARD W. HAMANT, Dayton, Ohio, assignors to Oxford Varnish Corporation, Detroit, Mich., a Corporation of Michigan. Filed May 28, 1930. Serial No. 456,337. 8 Claims. (Cl. 101—154.)



1. In a surface decorating machine, a frame, a pattern transferring member rotatably mounted on the frame, an arm pivotally mounted to the frame, a pressure member rotatably mounted on said arm, means acting on the arm to bring the members toward each other to effect an imprint on an article interposed between them, and a guide adapted to engage such article, the guide being arranged to maintain the position of the article while the same moves entirely about one of said members, whereby articles with variously deviating surfaces may be decorated on such surfaces in one continuous operation.

1,900,031. WRECKING DEVICE. DJALMA D. WILLIAMS, Dallas, Tex., assignor to Chicago Bridge and Iron Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 5, 1931. Serial No. 573,211. 4 Claims. (Cl. 29—89.)

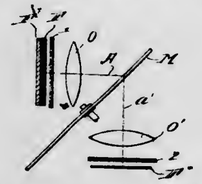


1. A device of the character described, including; a hook; a brace back of the hook and carried thereby, said brace being spaced from the hook and extending in a direction generally parallel to and above the hook; and a support between the hook and the brace.

1,900,032. BAR MILL. WARREN WORTHINGTON, Pittsburgh, Pa. Filed Oct. 25, 1930, Serial No. 491,217. Renewed May 18, 1932. 30 Claims. (Cl. 80—38.)

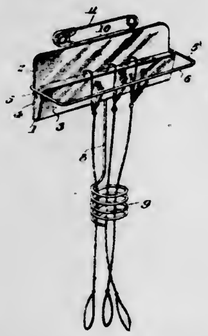
30. In combination in a rolling mill, a frame, a roll spindle journalled in said frame, means for adjusting the angular position of said spindle, a reducing roll mounted on the overhanging end of said spindle, and capable of endwise movement, a backing roll for said reducing roll, the contacting surfaces of said rolls being such as to oppose relative endwise motion between said rolls, means for adjusting the endwise position of said backing roll to adjust the endwise position of said reducing roll, a second reducing roll journalled in said frame, means for adjusting the operating position of one reducing roll toward and away from the other, and means for opposing endwise movement of said rolls during their rotation.

1,900,033. APPARATUS FOR FORMING REMOVABLE ICE CREAM WRAPPERS. RAY ANDERS, Indianapolis, Ind. Filed Apr. 22, 1931. Serial No. 531,910. 12 Claims. (Cl. 93—36.)



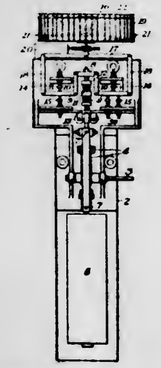
1. For forming conical wrappers, conical blocks, a table adapted to feed a wrapper to between the blocks, and a cone adapted to be inserted between the blocks, said cone having perforated walls, means for creating a partial vacuum in the cone to cause the cone to engage said wrapper and carry it around the cone.

1,900,034. COLOR CINEMATOGRAPHIC APPARATUS. JOSEPH A. BALL, Los Angeles, Calif., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 15, 1929. Serial No. 399,742. 3 Claims. (Cl. 88—16.4.)



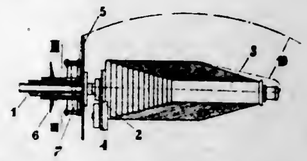
1. Apparatus for making three-color cinematographic pictures comprising means for simultaneously exposing, from the same point of view and along the same optical

path, parallel juxtaposed records of series of complemental images representing two color aspects, means for shuttering light along said path between successive ex-



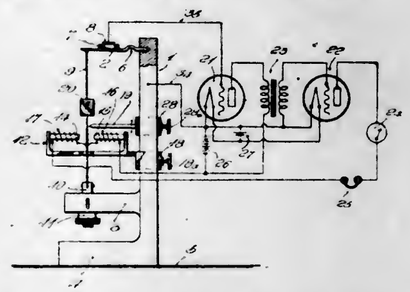
posures, and means for exposing, during the intervals when said path is shuttered, records of a third series representing a different color aspect.

1,900,035. FLY HOLDER. HENRY M. BECK, Wilkes-Barre, Pa. Filed Oct. 3, 1932. Serial No. 636,059. 4 Claims. (Cl. 43—32.)



1. A holder comprising an elongated body including connected plates, a strip of soft porous material secured between the plates for receiving the hooks of flies or the like, means extending forwardly from the body and arranged in a plane across the front thereof to protect the flies, means connected to the body and arranged below the same to receive the snells of the hooks and attaching means carried by the body.

1,900,036. FURNACE CONTROL. MERRILL G. BENJAMIN, Lakewood, Ohio, assignor, by mesne assignments, to Bailey Meter Company, a Corporation of Delaware. Filed Mar. 31, 1924. Serial No. 703,324. 61 Claims. (Cl. 236—14.)

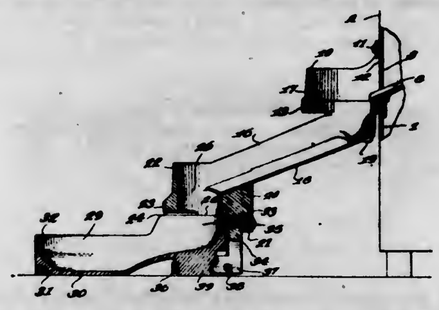


1. A steam regulator including time-controlled means for establishing a normal pressure, said means being effective for adjusting such normal pressure at various desired times, and means for maintaining substantially constant the pressure imposed by the timed-controlled means.

1,900,037. DEVICE FOR EQUALIZING THE THREAD TENSIONS FOR TWISTING DEVICES. OTTO BOCHMANN and WILHELM LENK, Remscheid-Lennep, Germany, assignors to Barmer Maschinenfabrik A.-G., Wuppertal-Oberbarmen, Germany. Filed Apr. 4, 1931, Serial No. 527,750, and in Germany Apr. 12, 1930. 8 Claims. (Cl. 117—23.)

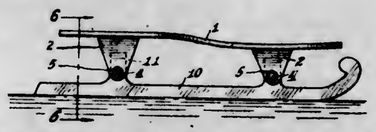
1. A device for equalizing the thread tension for twisting devices, in which during each spindle revolution several twists are imparted to the thread, comprising in combination with the hollow spindle, a whirl on said spindle, a twisting disc, and a thread storing ring arranged between the thread delivery point of said hollow spindle and said twisting disc rigidly connected to said whirl with the thread receiving face of the thread storing ring radially positioned intermediate the thread delivery point of the hollow spindle and the peripheral edge of the twisting disc adapted to accommodate a thread reserve.

1,900,038. OSCILLATION GENERATOR. WARD E. BOWER, Washington, D. C. Filed Apr. 15, 1930. Serial No. 444,481. 2 Claims. (Cl. 250—36.)



1. In a generator of oscillations of controlled frequency, a support, a resilient strip projecting from said support, a piezoelectric crystal carried by said strip, a tensioned magnetic wire held between said strip and a portion of said support, electromagnetic means mounted upon said support for operating upon the wire and being adjustable in position upon the support along the length of said wire, a fret to engage said wire mounted upon said support and being adjustable upon the support to a desired point along the length of said wire whereby the resonant frequency of the oscillator is controlled, and an electron tube amplifier having its input connected to said crystal and its output connected to said electromagnetic means.

1,900,039. MONEY HANDLING MACHINE. EDWARD J. BRANDT, Watertown, Wis., assignor to Brandt Automatic Cashier Company, Watertown, Wis., a Corporation of Wisconsin. Filed Aug. 22, 1929. Serial No. 387,695. 6 Claims. (Cl. 133—12.)

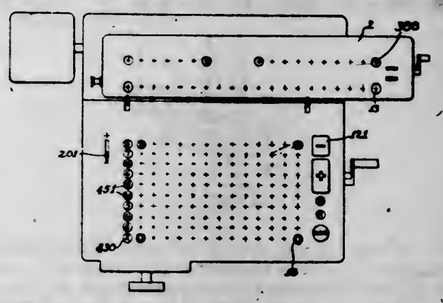


1. The combination with an inclined coin spout formed at one end for operative association with coin delivery means of a relatively shallow coin receiver

adapted to be associated with the other end of the spout, said receiver having an open forward or toe portion accessible to the hand of the user and an elevated heel portion registering at its top with a discharge opening

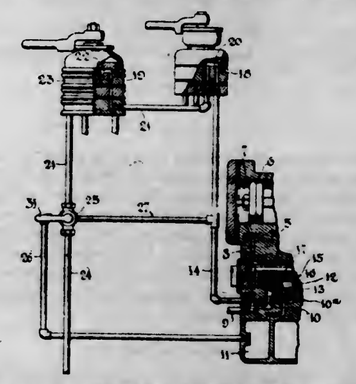
from the spout, the heel and toe portions of the coin receiver being merged at the bottom through an inclined bottom wall, the bottom of the toe portion being formed into a distinct recess for the reception of the coins.

1,900,040. SKATE. JOSEPH ROCH BRIEN, Montreal, Quebec, Canada, assignor of one-half to Camille Lapierre, Montreal, Quebec, Canada. Filed Sept. 3, 1931, Serial No. 561,018, and in Canada July 25, 1931. 1 Claim. (Cl. 208—166.)



A skate comprising a sole plate pairs of spaced brackets depending from the toe and heel portions thereof, removable bolts passed through said pairs of brackets, removable blocks inserted between the members of each pair of brackets, said blocks being formed with slots, and a runner having upstanding lugs inserted in said slots, said bolts passing through said brackets, blocks and lugs received therein.

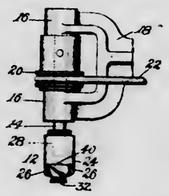
1,900,041. CABLE. CARL P. BRODHUN, Wilkes-Barre, Pa., assignor to The Okonite Company, Passaic, N. J., a Corporation of New Jersey. Filed Sept. 20, 1928. Serial No. 307,171. 4 Claims. (Cl. 173—267.)



1. An electric cable comprising a conductor, a layer of rubber compound around the conductor, a layer of fabric strips around the layer of rubber compound, a layer of jute cord around the layer of fabric strips and a protective layer of rubber wound in strip form around the layer of jute cord.

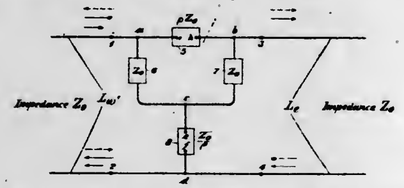
1,900,042. CALCULATING MACHINE. LES R. BROWN, East Orange, N. J., assignor to Monroe Calculating Machine Company, Orange, N. J., a Corporation of Delaware. Filed Aug. 1, 1929. Serial No. 382,792. 6 Claims. (Cl. 235—68.)

1. In a calculating machine having numeral wheels, an item keyboard, and means for repeatedly registering on said numeral wheels selected amounts set in said keyboard; means for setting an amount in the keyboard, and means for initiating and differentially controlling the extent of a plural cycle operation of the registering means, including an operating member common to the setting and the operation initiating and controlling means.



1,900,043. AIR BRAKE. CHARLES A. CAMPBELL, Watertown, N. Y., assignor to The New York Air Brake Company, a Corporation of New Jersey. Filed Aug. 28, 1931. Serial No. 559,995. 4 Claims. (Cl. 303—41.)

1. In a fluid pressure brake, the combination with a distributing valve mechanism including an application cylinder and piston operated by fluid pressure in said cylinder to control the brakes, and an equalizing valve device having a slide valve adapted to connect said application cylinder with an application chamber in effecting an application of the brakes, said distributing valve mechanism having a distributing valve release connection, of an engineer's brake valve and an independent brake valve each having a port connected in series with the corresponding port in the other, said valves conjointly controlling flow from the distributing valve release connection to atmosphere, said engineer's brake valve having a brake pipe connection; a shunt connection from said application chamber to the distributing valve release connection at a point such that the flow through said shunt connection is controlled by said engineer's brake valve and said

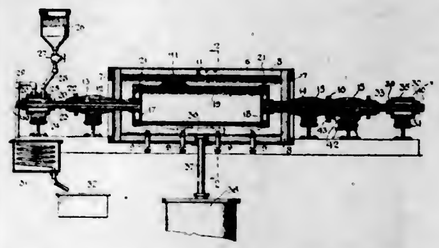


independent brake valve conjointly; and a double-heading cock controlling said shunt connection and said brake pipe connection, and serving to open and close said connections simultaneously.

1,900,044. LIP TURNING MACHINE. HERBERT L. CHAPIN, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 16, 1931. Serial No. 522,983. 24 Claims. (Cl. 12—30.)

1. In a lip turning machine, a rotary lip turning tool comprising a member constructed and arranged to engage the lip of a channeled sole held against and fed past the tool and to exert wiping pressure upon the lip in directions lengthwise of the lip and flatwise of the sole to open the channel and turn the lip over toward the face of the sole and to exert edgewise pressure yieldingly to form a shoulder at the base of the lip.

1,900,045. TWO-WAY NEGATIVE RESISTANCE REPEATER. GEORGE CRISSON, East Orange, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed May 13, 1931. Serial No. 537,146. 8 Claims. (Cl. 178—44.)



1. The combination with a line of a repeater connected between sections thereof, each of which sections has the characteristic impedance Z_0, the said line sections and said repeater forming a Wheatstone bridge network, one of said line sections forming one arm, an impedance Z_0 forming the opposite arm, and negative impedances ρZ_0 and Z_0/ρ forming the other arms, the other section of said line forming one diagonal and an impedance Z_0 forming the other diagonal.

1,900,046. TYPE PAD FOR TYPEWRITERS. LUDWIG DENZER, Hamburg, Germany. Filed Nov. 23, 1931, Serial No. 576,814, and in Germany Mar. 14, 1931. 5 Claims. (Cl. 197—42.)

1. A type pad for typewriters, comprising a strip of elastic material having in its outer surface a groove for catching the dust and in its inner surface a recess of trapezate cross section leaving projections forming with said recess a dove-tailed shaped groove for clamping the pad on the bow of the typewriter.

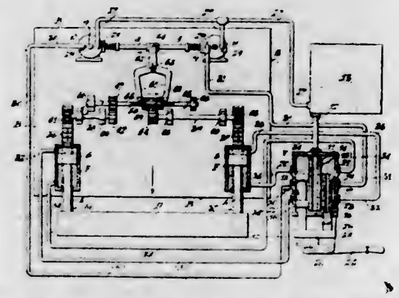
1,900,047. METHOD OF DISTILLING FLUENT MATERIALS AND PRODUCING COKE. IRA H. DERBY, Indianapolis, Ind., assignor to Peter C. Reilly, Indianapolis, Ind. Filed Mar. 6, 1929. Serial No. 344,796. 2 Claims. (Cl. 202—32.)

1. The method of distilling and coking a fluent carbonizable material contained in a retort which is subjected externally to the heat of a furnace, and accelerating the transfer of heat from the furnace to the carbonisable material, which comprises continuously rotating the retort at a speed materially in excess of that necessary to distribute the fluent material by centrifugal force in a layer over the interior of the retort whereby foaming of the material is prevented and a dense, fine-grained coke is produced therefrom.

1,900,048. DECALCOMANIA TRANSFER. FREDERICK A. EDGHILL, Chicago, Ill., assignor to Rayner Decalcomania Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 7, 1932. Serial No. 585,207. 3 Claims. (Cl. 41—33.)

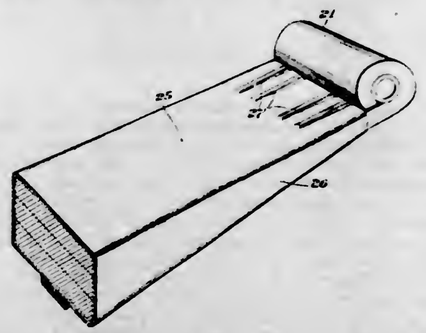
2. In a decalcomania transfer, the combination of a vehicle on which is releasably carried a cellulose base lacquer coating supporting successive applications of printing having a thin aluminum leaf backing over which is laid an ink coating, the lacquer coating being clear and of substantial thickness so as to afford to the transfer protection against elements of weather while exposing to view the associated printing.

3. A base to which decalcomania transfers have been applied upon release from their respective vehicles, each transfer having a constituent coating of cellulose base lacquer of substantial thickness extending slightly beyond the edges of the remaining transfer components, and a further coating of cellulose base lacquer applied over the base and transfers and uniting with the lacquer coatings on the transfers to produce a clear protective coating which extends around, along and partly under the edges of each of the transfers.



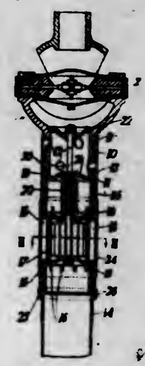
1,900,049. U-BOLT AND METHOD OF MAKING THE SAME. HARRY C. ELLISON, Lakewood, Ohio, assignor, by mesne assignments, to Republic Steel Corporation, a Corporation of New Jersey. Filed Mar. 19, 1930. Serial No. 437,007. 9 Claims. (Cl. 29—152.)

1. The method of producing U-bolts comprising upsetting a bar of stock of predetermined length at two spaced points intermediate the ends thereof, thereby increasing the cross sectional area at said points, forming the bar



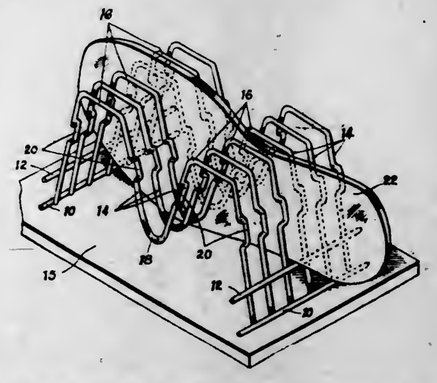
to provide two cylindrical end portions, a flat intermediate portion and connecting portions between the cylindrical end portions and the flat intermediate portion at said points of greater cross sectional area, bending the bar at the points of greater cross sectional area to form a U so that the corners between the bight portion and the legs will be of greater cross sectional area than the bight portion or legs.

1,900,050. HYDRAULIC PRESS PLATEN TRAVEL EQUALIZER. WALTER ERNST, Mount Gilead, Ohio, assignor to The Hydraulic Press Manufacturing Company, Mount Gilead, Ohio. Filed Feb. 24, 1931. Serial No. 517,989. 13 Claims. (Cl. 138—10.)



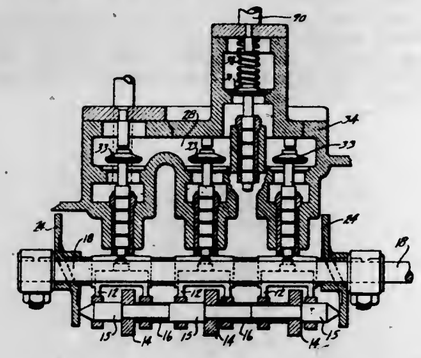
1. In a hydraulic press, a platen, a ram disposed at each side of the center of the platen, a pump for supplying hydraulic pressure to each ram, one said pump being a variable output pump, a rack travelling with each end of the platen, a countershaft associated with each rack and having a driven pinion meshing with the rack and a driving pinion, a driven shaft having a driving pinion fixed thereon and meshing with one driven pinion, a second like diameter pinion having a screw mounting on said driven shaft whereby it will rotate with the driven shaft when the platen ends are travelling synchronously but will move longitudinally on said driven shaft in response to uneven platen end travel, and means actuated by the longitudinal movement of the screw mounted pinion to vary the output of the variable output pump to correct the uneven travel of the platen.

1,900,051. METAL SPRING COVER. WARREN T. FERGUSON, Brookline, Mass., assignor to Ajax Spring Stabilizer Company, Cambridge, Mass., a Corporation of Illinois. Filed May 31, 1930. Serial No. 458,679. 3 Claims. (Cl. 267—37.)



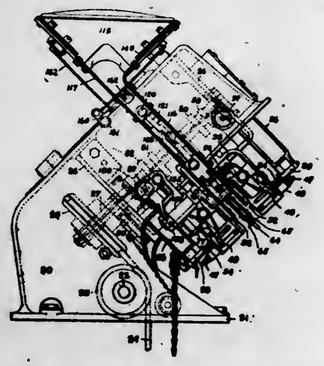
2. A metal spring cover, comprising a tapering hollow body for enclosing a spring, the small end of the body having a plurality of relatively spaced thickening ribs integral with the top plate of the body and extending from the edge thereof longitudinally of the body, said ribs being thickest at said edge to form abrupt outwardly facing shoulders and tapering in height to merge into the metal of the top plate.

1,900,052. CARDAN SHAFT. FRANCIS ALBERT GARRETT, Ipswich, England, assignor to Ransomes, Sims & Jefferies, Limited, Ipswich, England. Filed July 30, 1930, Serial No. 471,780, and in Great Britain Aug. 29, 1929. 4 Claims. (Cl. 64—29.)



1. A Cardan shaft having a universal joint at each end and two intermediate tubular portions of shaft telescoping into one another, said tubular portions having a plurality of corresponding longitudinal slots, driving keys in said slots, and a carrier within the shaft for supporting said keys; substantially as and for the purpose hereinbefore set forth.

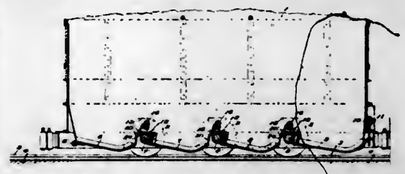
1,900,053. RACK. HARVEY L. GLIDDEN, Lexington, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Nov. 22, 1928. Serial No. 321,197. 3 Claims. (Cl. 211—34.)



1. A rack for shoe parts comprising a frame, a plurality of loops of wire extending from the frame and having body portions located substantially in parallel plapes, and a plurality of integral projections extending from one of the body portions for engaging one surface of a shoe part inserted between two of the adjacent loops to space said surface of the shoe part from an adjacently carried shoe part, the projections being arranged along said body portion to engage and support a shoe part at a plurality of spaced points.

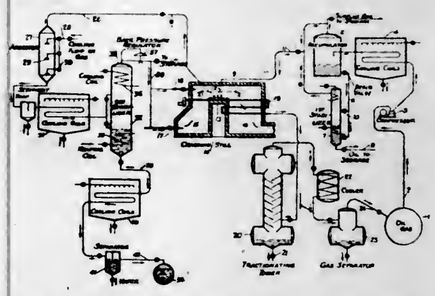
1,900,054. REVERSING AND CONTROL MECHANISM FOR INTERNAL COMBUSTION ENGINES. MORRIS J. GOLDBERG and FRANS CARL TEUFL, Beloit, Wis., assignors to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed Apr. 1, 1927. Serial No. 180,294. 15 Claims. (Cl. 60—16.)

1. In an internal combustion engine, a reversing means therefor comprising a timed admission valve for starting air, a cam shaft, a pair of cams carried by said shaft, a tappet common to said cams, and a control shaft adapted to be selectively manually rotated, and means, including cam members on opposite sides of the tappet, for utilizing the rotation of said control shaft to effect a movement of said tappet to cause an operative relation between either of said cams and said tappet.



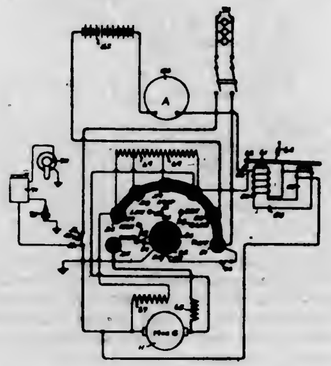
1,900,055. FASTENER SUPPLYING APPARATUS. SYLVESTER LEO. GOOKIN, Quincy, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed July 21, 1930, Serial No. 469,432. Divided and this application filed July 28, 1931. Serial No. 552,698. 16 Claims. (Cl. 218—151.)

1. In a duplex eyeleting machine, an eyelet-hopper having two oppositely inclined bottom walls and upstanding walls in which outlet ports are formed and arranged to emit eyelets, and only those eyelets, that stand on said bottom walls respectively in one certain relation thereto, means arranged to feed eyelets through said ports, and a duplex raceway the divisions of which are arranged to conduct into parallel opposed relationship the eyelets so emitted.



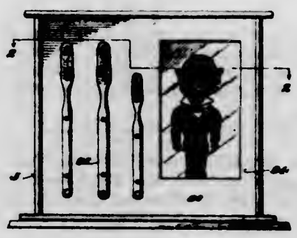
16. In a fastener-inserting machine having a frame and fastener-inserting mechanism arranged therein, a detachable raceway for supplying fasteners to said mechanism, said raceway and said frame being provided with cooperative dowels and sockets by which to mount the raceway in cooperative relation to said mechanism, and a plurality of retaining devices movably attached to said frame and interconnected with each other to partake in common of operating movement, said devices being arranged to fasten spaced portions of the raceway in certain predetermined positions.

1,900,056. DROP BOTTOM CAR. CHARLES A. GRIFFITH, Knoxville, Tenn. Filed Apr. 12, 1930. Serial No. 443,854. 8 Claims. (Cl. 105—253.)



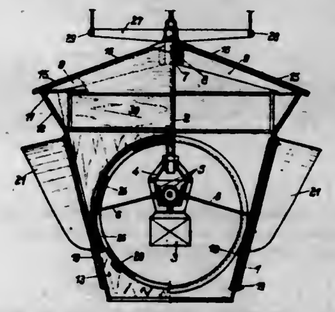
1. In a drop bottom car, the combination of a plurality of drop bottom doors hinged to axes extending transversely of the body of the car by bending the metal of the door around said axes, drop bottom plates or wings hinged to axes extending transversely of the car above the axes of said doors by bending the metal of said drop bottom plates around their respective axes, said drop bottom plates extending transversely across the car, and a plate secured to the hinged portion of the door and extending transversely across the car and adapted to move the free edges of the drop bottom plates to engage with the free edge of the adjacent door to support said doors in upper or closed position, said plates being movable with the doors through slight angles to release the plates from the doors and to permit them to swing downwardly.

1,900,057. PROCESS FOR TREATING AN OIL-GAS. AUDLEY E. HARNSBERGER, Chicago, Ill., assignor to The Pure Oil Company, Chicago, Ill., a Corporation of Ohio. Filed May 8, 1929. Serial No. 361,447. 6 Claims. (Cl. 196—10.)



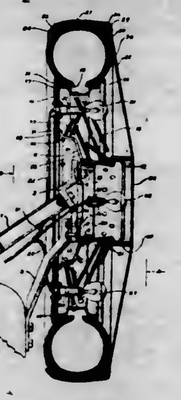
1. The method of converting hydrocarbons, which consists in passing vaporized hydrocarbons of high boiling range through a heated converting zone possessing relatively high and low temperature regions, heating said hydrocarbons during their passage through said zone to desired converting temperatures to effect molecular decomposition of such hydrocarbons while in the vapor phase and at temperatures of the order of 1000° F. into hydrocarbons of lower boiling range, removing the converted hydrocarbons from said zone and condensing the lighter compounds thereof, removing from the oils comprising such lighter compounds the normally incondensible gases formed in the converting zone, returning a portion, at least, of said gases for re-passage through the high temperature region only of the aforesaid converting zone, whereby to subject said gases to converting temperatures requisite to produce therefrom reaction products consisting of compounds of higher boiling range than said gases and accompanying quantities of lighter gases, separating said lighter gases from the high boiling compounds, and separately collecting and condensing the high boiling compounds.

1,900,058. POWER PLANT. WILLIAM H. HARSTICK, Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed May 15, 1930. Serial No. 452,660. 12 Claims. (Cl. 290—35.)



1. In a dynamo electric power plant employing a secondary battery, a switch having a rotary contact disc for selectively effecting a plurality of circuit relations between the battery and plant, a reverse-current relay in circuit with the battery, and mechanical means for actuating the relay responsively to a predetermined position of the contact disc, said means including a cam carried by the disc, and a lever in operative relation to the relay, and disposed in the path of movement of said cam.

1,900,059. CHANGEABLE EXHIBITOR. BERNIE SUMMY HAYTER, Waco, Tex. Filed Feb. 11, 1932. Serial No. 592,401. 4 Claims. (Cl. 472—13.)

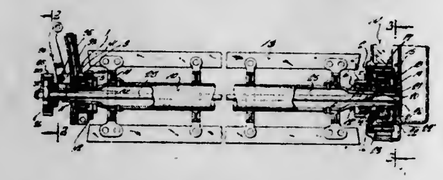


1. In a changeable exhibitor, a casing having partitions arranged approximately at right angles to each other and joined at the inner edges thereof to cooperate in the formation of diagonally opposite figure-receiving compartments, an illuminating compartment and a panel-receiving compartment diagonally opposite the illuminating compartment, said partitions being provided with light passages, figures in said figure-receiving compartments, a single source of light in said illuminating compartment and having means associated therewith to direct a flow of light alternately through said passages into said figure-receiving compartments and to alternately cut off the supply of light to said figure receiving compartments, said figure-receiving compartments being opened into said panel-receiving compartment, and a combined reflecting and transparent panel in said panel-receiving compartment and extending diagonally therein.

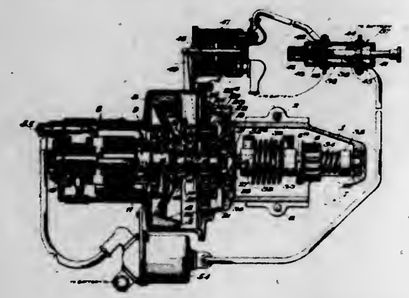
1,900,060. TRAFFIC SIGNAL APPARATUS. JOSEF HEUMS, Gruna, Germany. Filed Nov. 17, 1931, Serial No. 575,670, and in Germany Sept. 28, 1931. 6 Claims. (Cl. 116—63.)

1. A traffic signal apparatus, comprising a plurality of discs; a double-armed pointer for each disc pivotally mounted from its center point to the center of its disc; and means for slowly rotating the pointers in the same direction, each disc having differently colored sectors corresponding to different traffic periods whereby each period is represented with two diametrically opposite sectors of the same size and color.

1,900,061. ADVERTISING DEVICE. FRANS HUND, Cleveland, Ohio. Filed Oct. 29, 1931. Serial No. 571,837. 6 Claims. (Cl. 40—130.)



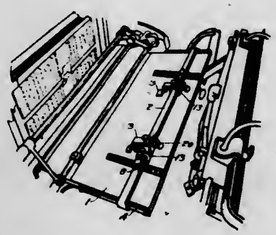
1. In combination with a wheel of the hollow hub type, a cover therefor, comprising an annular tread covering portion, a generally circular side portion of light transmitting material covering the side of the wheel and the tire thereon and joined at its periphery to the tread covering portion, the wheel being provided with means to support lamps externally and internally of the hub behind the side covering portion, and the side covering portion being spaced axially from the hub to prevent casting of shadows thereon by the hub.



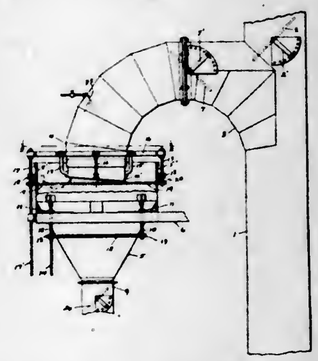
1,900,062. POWER MOWER. WILLIAM F. KRENKEL, Racine, Wis., assignor to Jacobsen Manufacturing Co., Racine, Wis., a Corporation of Wisconsin. Filed Aug. 24, 1931. Serial No. 558,883. 5 Claims. (Cl. 56—249.)

1. In a mower having side frame members, anti-friction bearing assemblies carried by said side frame member, a hollow cutting reel shaft journaled in said bearing assemblies, a cutting reel carried by said shaft, a drive

for the cutting reel, a clutch between the drive and one end of the cutting reel shaft, and means for controlling the engagement and disengagement of the clutch and including a shifter rod extending through the hollow shaft, a connection between one end of the shifting rod and the clutch, and a lever for shifting said rod.

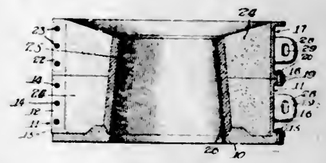


1,900,063. ENGINE STARTING MECHANISM. RAYMOND P. LANSING, Montclair, N. J., assignor to Eclipse Aviation Corporation, East Orange, N. J., a Corporation of New Jersey. Filed Sept. 17, 1929. Serial No. 393,272. 24 Claims. (Cl. 290—38.)



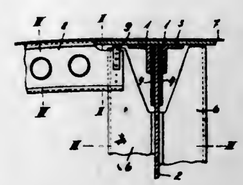
9. In combination, a pinion adapted to engage and crank an engine member, a flywheel, means for rotating said flywheel to store energy therein, and means including a resilient torque transmission member for drivably connecting said flywheel and pinion after the flywheel has reached a desired speed.

1,900,064. TRANSFER TABLE REAR GUIDE. ISIDOR MAARSEN, New York, N. Y. Filed Feb. 10, 1931. Serial No. 514,782. 6 Claims. (Cl. 271—60.)



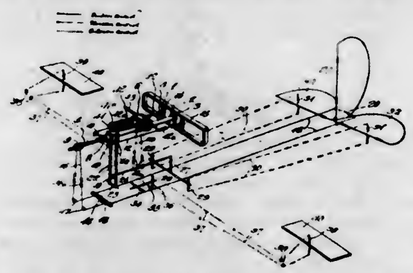
1. In a transfer table rear guide, a plurality of spring guide members adapted to engage the rear edge of material placed upon said table, a common member upon which said guide members are mounted, means for adjusting the position of said guide members upon said common member, means for adjusting the distance of the working face of said guide members from said common member, and means for adjusting the position of said common member upon said table.

1,900,065. DRAFT CONTROL AND DUST SEPARATOR. IRA T. MARTIN, San Francisco, Calif. Filed Mar. 9, 1931. Serial No. 521,057. 16 Claims. (Cl. 110—147.)



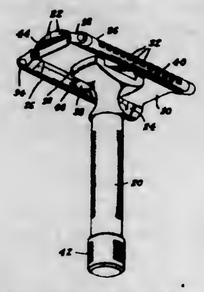
1. Draft control apparatus comprising a main stack provided with a side outlet fitted with a downwardly extending return bend open at its lower end, a receptacle into which the lower end of said return bend extends, and means for varying the effective extension of the return bend into said receptacle.

1,900,066. HOT TOP FOR INGOT MOLDS. WALTHER MATHESIUS, Chicago, Ill. Filed Mar. 9, 1929. Serial No. 345,785. 3 Claims. (Cl. 22—147.)



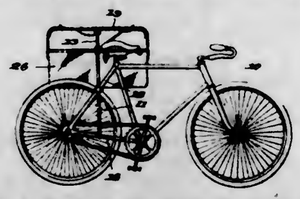
1. A hot top for ingot molds comprising in combination, a shell, a refractory lining therefor, a frusto-conical shaped collar removably secured in spaced relation to said lining, and a refractory packing in the space between said collar and lining.

1,900,067. SPAR FOR AIRPLANES. WILLY MESSERSCHMITT, Augsburg, Germany. Filed Sept. 21, 1929, Serial No. 394,202, and in Germany Sept. 25, 1928. 5 Claims. (Cl. 244—31.)



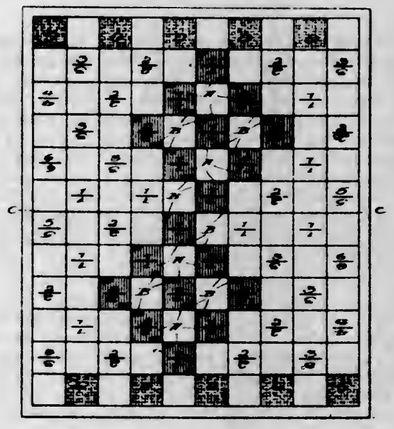
1. A structure for aircraft, comprising a single spar having a single web, reinforcing means therefor composed of angle members extending longitudinally of its edges, vertical and horizontal sheet metal strips also extending therealong, and a non-buckling cover plate for said structure to which said spar is connected by said angle members.

1,900,068. CONTROL MECHANISM FOR AIRCRAFT. RICHARD P. MUELLER, New York, N. Y. Filed Mar. 20, 1931. Serial No. 524,184. 11 Claims. (Cl. 244—29.)



1. Control mechanism for adjusting the angular position of the rudder, elevator planes and ailerons of an aircraft, comprising a frame structure, a pair of telescopic shafts journaled in said frame structure, one of said shafts having translatory movement with respect to the other of said shafts, a hand grip device connected to said transitory movable shaft, rotary means controlled by the rotation of said translatory movable shaft, independent rotatable means on the other of said shafts controlled by oscillatory movement of said hand grip device, and independent cable connectors extending from said rotary means and connected with said rudder and said ailerons for controlling the operation of the aircraft.

1,900 069. SAFETY RAZOR. JOSEPH MUROS, Belmont, Mass., assignor to Gillette Safety Razor Company, Boston, Mass., a Corporation of Delaware. Filed June 22, 1932. Serial No. 618,731. 8 Claims. (Cl. 30—12.)

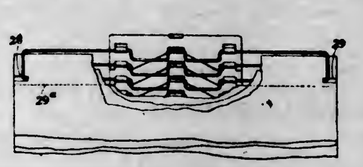


1. A safety razor comprising a blade-supporting member, cap sections pivotally mounted at both longitudinal edges thereof and provided with one element of a quick-swinging and slow-locking mechanism, and a rotatable handle member which supplies the co-operating element of said mechanism.

1,900,070. BICYCLE NEWSPAPER BAG RACK. EDWARD D. MURPHY, Louisville, Ky. Filed Sept. 24, 1931. Serial No. 564,939. 3 Claims. (Cl. 224—39.)

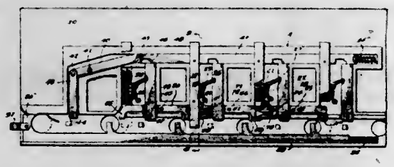
1. A combined newspaper bag rack and frame, means to connect said frame to either side of a bicycle frame, the upper portion of said frame being offset whereby said upper portion may be disposed on the other side of the bicycle frame from said connecting means, said rack being movably mounted on said rack frame, means to hold said rack in either of a plurality of positions on said rack frame, and a newspaper holding bag depending from said rack.

1,900,071. GAME. WILLIAM T. O'NEILL, Pittsburgh, Pa. Filed Aug. 21, 1930. Serial No. 476,871. 2 Claims. (Cl. 273—131.)



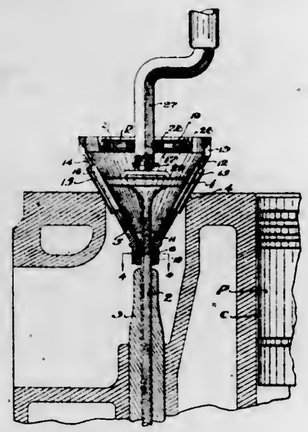
1. In a game-board marked off in alternately arranged areas, these areas having numbers of the value of ten or less, and which areas when occupied by the final move of one player determine the number of moves allowed to the opposing player.

1,900,072. COFFEE ROASTING PROCESS. JOSEPH F. QUINN, Burlingame, Calif., assignor to Geo. W. Caswell Co., San Francisco, Calif., a Corporation of California. Original application filed Jan. 16, 1929, Serial No. 332,829. Divided and this application filed Apr. 12, 1930. Serial No. 443,924. 2 Claims. (Cl. 99—11.)



1. The method of roasting coffee which comprises continually passing a flat layer of coffee beans of substantially one bean in depth along under a downwardly directed heat radiating surface only for a time period to effect roasting while continually turning the beans over and over and under conditions permitting free escape of hot vapors.

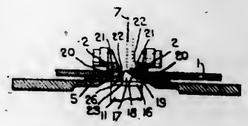
1,900,073. INDEXING DEVICE. ARTHUR PEEL, London, England. Filed Aug. 7, 1930, Serial No. 473,669, and in Great Britain Nov. 1, 1929. 13 Claims. (Cl. 129—16.)



1. In a paper-filing device, a backing having means for detachable engagement to a similar backing, and further means adapted when two similar backings are engaged to co-operate to provide means to hingedly mount a paper-holding device.

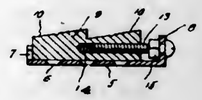
1,900,074. VENDING MACHINE. IRA W. PENNY, Phoenix, Ariz. Filed Mar. 2, 1931. Serial No. 519,580. 6 Claims. (Cl. 194—58.)

6. A coin controlled vending machine comprising a plurality of dispensing chutes, an ejecting plunger for movement through each chute, means independently locking each plunger against movement, a master operating means, a master locking means, means for operating the master locking means from said master operating means through the placing of a coin between said master locking and master operating means, and means carried by said operating means for engaging a second coin for causing the second coin to engage a selected independent plunger locking means for releasing the locking means of the desired ejecting plunger.



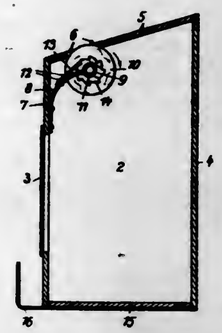
1,900,075. VALVE AND VALVE-SEAT REFINISHING TOOL. ALTON A. RADLEY, Jr., Whitefish, Mont., assignor of one-fourth to John G. Hogan, Whitefish, Mont. Filed Dec. 16, 1931. Serial No. 581,307. 2 Claims. (Cl. 29—76.)

1. The combination in a tool as described with a hollow, inverted, conical, head having an upper cylindrical flange and notches in said flange, said head having slots therein extending into said flange, and tongues on the opposite side walls of the slots in the head, of complementary files having lateral grooves in sliding engagement with the tongues, a removable rotary driving head, and radially disposed arms on said driving head in engagement in the notches of the flange.



1,900,076. BUTTONHOLE SEWING MACHINE. FRANKLIN A. REECE, Brookline, Mass., assignor to The Reece Button Hole Machine Company, Boston, Mass., a Corporation of Maine. Filed Oct. 1, 1931. Serial No. 566,284. 9 Claims. (Cl. 112—71.)

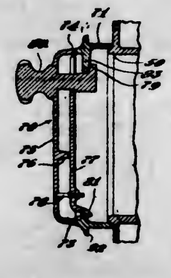
1. In a buttonhole sewing machine, the combination with work-holding means, of stitch-forming mechanism including a reciprocating needle, the alternate thrusts of which extend through the work, and means for progressively maintaining a relation between said needle and the



portion of the work through which it passes at any stitch, whereby the needle extends through the work at an angle to the surface thereof other than a right angle.

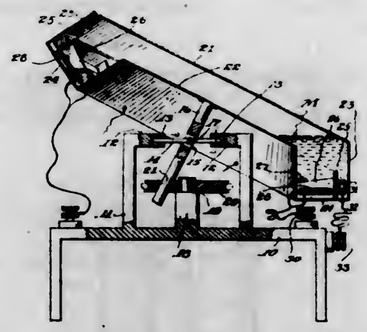
1,900,077. ADJUSTABLE DOOR CATCH. RAYMOND F. RIFFLE, Greensburg, Pa. Filed Jan. 22, 1932. Serial No. 588,206. 1 Claim. (Cl. 292—340.)

In a door catch, a bolt keeper comprising a substantially broad flat plate having on one side thereof spaced parallel side flanges and an end flange connecting the side flanges at one end thereof said side flanges having upper edge portions disposed at right angles to the bodies of said side flanges, a double wedge keeper constrained to shift longitudinally of said plate and provided on opposite sides thereof with longitudinal grooves receiving the aforementioned edge portions of said side flanges, said keeper having an axial threaded socket extending inwardly from one end thereof, an adjusting screw rotatably supported on said end flange and having threaded engagement with said socket; and said keeper having two inclined faces each of which is provided with intersecting diagonal lubricant grooves.



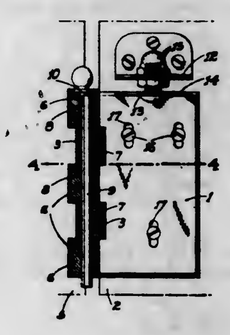
1,900,078. LETTER BOX. FRIEDRICH SAUTER, Weingarten, Germany. Filed Apr. 4, 1931. Serial No. 527,781. 1 Claim. (Cl. 232—45.)

A letter box, comprising in combination with the box having an insertion slot, a cylinder in said box adapted to engage in said slot, two resilient supporting bars mounted on the inner side of one of the walls of said box rotatably carrying said cylinder adapted to press said cylinder into and close said slot, a ratchet wheel on one end



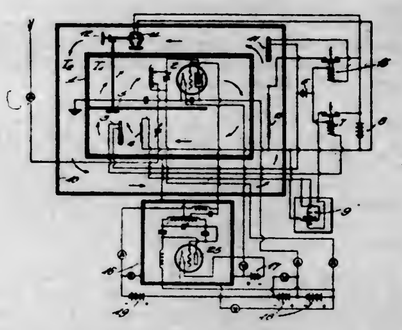
of said cylinder, and a resilient steel strip rigidly fixed at one end on one of said bars engaging with its free end said ratchet wheel, adapted to cooperate with said ratchet wheel to allow said cylinder to turn in the direction necessary for inserting a letter in said slot and to lock said cylinder against rotation in the opposite direction.

1,900,079. DOOR CONSTRUCTION. STANLEY K. SMITH, Westfield, Mass., assignor to The H. B. Smith Company, Westfield, Mass., a Corporation of Massachusetts. Original application filed May 24, 1929, Serial No. 365,629. Divided and this application filed Jan. 21, 1930. Serial No. 422,381. 7 Claims. (Cl. 110—173.)



1. Apparatus of the class described comprising a housing, an opening therein, a closure member for said opening, a shield upon said member, a frame about the opening, said closure being engageable with said frame, said shield having a projection engaging the inside of said frame, and a pivoted locking member extending through said closure and shield and having a lug movable into engagement with another part of the frame.

1,900,080. MERCURY SWITCH. EARL RUSSELL SNAVELY, Roselle, N. J., assignor to The Fire King Co., Inc., Union, N. J. Filed Apr. 10, 1929, Serial No. 354,159. Renewed July 20, 1932. 6 Claims. (Cl. 200—152.)

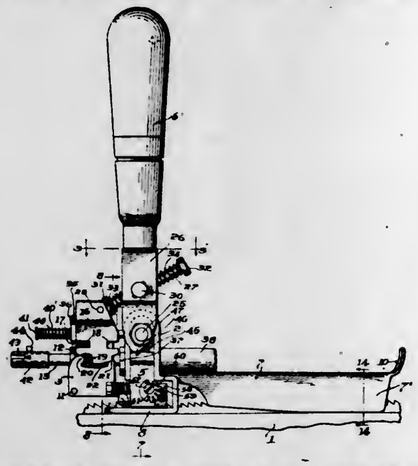


1. In a mercury switch, a body having an annular channel adjacent its periphery and containing mercury, a partition in said channel between its walls and extending upwardly from the bottom of the channel, radial walls extending from the partition to the inner wall and dividing the inner part of the channel into cells, an electrode in each cell, an electrode extending around the channel between the partition and the outer wall, and means to support the body for gyratory movement.

1,900,081. ADJUSTABLE DOOR HINGE. MILLARD F. SWERER, Jamestown, Calif. Filed Mar. 11, 1932. Serial No. 598,153. 4 Claims. (Cl. 16—131.)

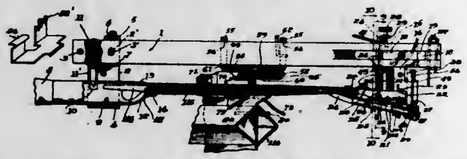
1. In a hinge, separate knuckles for the leaves of the hinge, bushings in the knuckles, the bushings in the knuckles of one leaf being turnable therein, and means connecting all the bushings for disposing them in eccentric or concentric and non-turning relationship with each other selectively.

1,900,082. HIGH FREQUENCY MEASURING APPARATUS. JAMES D. WALLACE, Washington, D. C. Filed Mar. 13, 1931. Serial No. 522,487. 15 Claims. (Cl. 250—17.)



1. The method of measuring power in a reactive antenna circuit which consists in operating a power amplifier into the antenna circuit, determining the power required to maintain the parts of the power amplifier at constant operating temperature, measuring the heat loss and determining therefrom the power transferred from said amplifier to the antenna circuit.

1,900,083. SAW SETTING DEVICE. JOHN A. WALLER, Beverly Hills, Calif., assignor to Waller Manufacturing Corporation, Ltd., Los Angeles, Calif., a Corporation of Nevada. Filed Nov. 7, 1929. Serial No. 405,289. 7 Claims. (Cl. 76—61.)



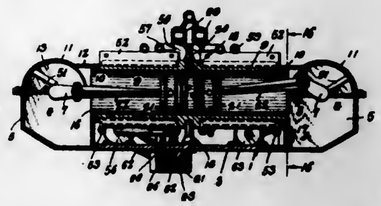
1. A saw setting device comprising a body, guide means carried by said body and extending in the direction of movement of the body, a pawl carrier mounted to slide longitudinally along said guide means, a pawl member pivotally mounted on said pawl carrier and adapted to engage the teeth of the saw, an operating member movably

operated on said pawl carrier, said operating member and pawl member being provided with interengaging portions adapted to lift the pawl member off the saw teeth when the operating member is moved to advanced position on the pawl carrier, a handle member pivotally mounted on said body, a connection between said handle member and

said operating member to move the said operating member so as to operate the pawl member by operation of the handle member, jaw means mounted on said body and provided with saw tooth setting projections and means for operation of said jaw means by operation of said handle member.

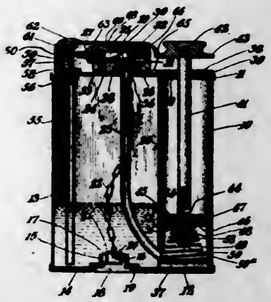
1,900,084. SAW FILING DEVICE. JOHN A. WALLER, Beverly Hills, Calif., assignor to Waller Manufacturing Corporation, Ltd., Los Angeles, Calif., a Corporation of Nevada. Filed Dec. 24, 1930. Serial No. 504,466. 7 Claims. (Cl. 76—31.)

1. A saw filing device comprising a file carrier consisting of a longitudinal member and file clamps mounted on said longitudinal member and adapted to engage and hold the file, guiding means in which said longitudinal member is slidably mounted, a member pivotally mounted on one of said clamp members so as to swing transversely to said longitudinal member and provided with means for engaging the teeth of the saw and with a spring for moving it to effect advance of the file carrier upon such engagement, and a control member mounted adjacent said advance effecting means and provided with inclined faces for moving said advance effecting member inwardly against the action of said spring and provided with an inclined member adapted to be engaged and operated by the aforesaid guiding means for the longitudinal member of the file carrier, to effect the operation of said controlling member at the end of a complete stroke of the longitudinal member on the guiding means.



3. In a saw filing device, a file carrier, a guide member on which said carrier is slidably mounted, a supporting member on which said guide member is pivotally mounted, and a positioning element mounted on said supporting member and provided with corrugated lower edge portions adapted to engage the teeth of the saw to position the file carrier support longitudinally and laterally with respect to the saw tooth.

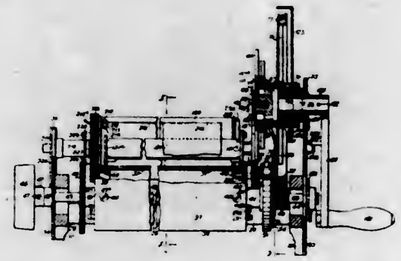
1,900,085. OIL FRACTIONATION. JOHN SAMUEL WALLIS, New York, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Filed Jan. 14, 1930. Serial No. 420,680. 16 Claims. (Cl. 196—139.)



1. A fractionating tower comprising a shell, means to supply oil vapor to the shell, means for producing downward flow of condensate in the shell, a plurality of bubble trays in the shell for flow of liquid thereover and for contact of the liquid with vapor, means for withdrawing fraction products at different levels and means on the trays for equalizing the rate of liquid flow on the trays.

1,900,086. ENGINE. WILLIAM F. WEIR, Holden, W. Va., assignor to Ralph Thompson and Lawson Thompson, Holden, W. Va. Filed July 24, 1931. Serial No. 552,960. 5 Claims. (Cl. 123—51.)

1. In an internal combustion engine, a base having a crank case at each side thereof, a cylinder having its ends communicating with the cases, clamps for holding the ends of the cylinder in the cases, a key at each end of the cylinder engaging a keyway in each case, a dowel on the case engaging a socket on the under side of the cylinder at the center thereof, inlet and exhause means and ignition means at the center of the cylinder, a crank shaft in each case, a pair of pistons in the cylinder and means for so connecting the pistons with the crank shafts that one piston will be on dead center while the other is beyond center.



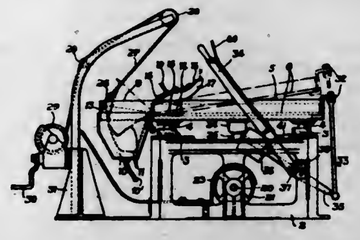
1,900,087. ATOMIZER. LOUIS V. ARONSON, Newark, N. J., assignor to Art Metal Works, Inc., a Corporation of New Jersey. Filed Oct. 23, 1928. Serial No. 314,457. 8 Claims. (Cl. 299—88.)

1. An atomizer comprising a casing, liquid and vent nozzles projecting from the casing in spaced relation, a cover for said nozzles, and spaced, flexible stoppers on the cover to engage the nozzles when the cover is in its closed position to prevent the evaporation of the liquid and the ingress of dirt.

3. An atomizer comprising a casing, a nozzle projecting from said casing, a cover for said nozzle on said casing, a pump plunger head projecting from said casing, a projection on said cover, and means on the plunger head adapted to lie under said projection when the head is in a depressed position irrespective of the position of the head due to its having been rotated, said projection being disengageable from said head in response to further depression of the latter.

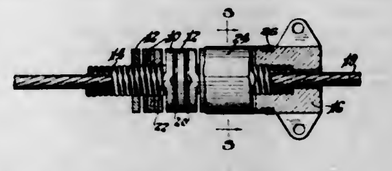
1,900,088. TYPEWRITING MACHINE. EDWIN E. BARNEY, New Rochelle, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Original application filed Apr. 13, 1927, Serial No. 183,466. Divided and this application filed June 16, 1928. Serial No. 285,884. 42 Claims. (Cl. 197—126.)

1. The combination of a cylindrical platen, a cylindrical carbon holder of the same diameter as the platen which receives within it a roll of transfer material and has wound around the outer surface thereof a strip of such material projecting from the roll sufficient only for use in the work being produced, a hand actuated driving gear wheel, connections between said platen and said driving gear wheel, and yielding connections between said carbon holder and said gear wheel.



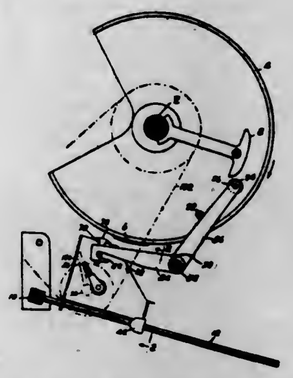
1,900,089. VANITY CASE. HAROLD BATCHELOR, Jersey City, N. J. Filed Oct. 2, 1931. Serial No. 566,426. 16 Claims. (Cl. 132—83.)

1. In a vanity case, a container for cosmetic, a puff in the container adapted to receive cosmetic, and means movably mounted within the container constituting a scraper movable to scrape off a portion of the cosmetic from the surface of the puff.



1,900,090. MACHINE FOR GRAINING LITHOGRAPHIC PLATES. CHARLES ARTHUR BECKETT, Hull, England. Filed Apr. 16, 1931, Serial No. 530,527, and in Great Britain Apr. 25, 1930. 4 Claims. (Cl. 51—6.)

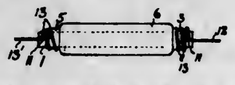
1. A machine for graining lithographic plates comprising a trough mounted on a framing and adapted to be subjected to a circular shaking movement, a tiltable false bottom to the trough to which the plates are adapted to be secured, at least one tiltable container for graining elements carried in the trough, said tiltable false bottom and container being tiltable independently of and towards one another for the transference of graining elements from one to the other, means for retaining graining elements operatively in the trough, means for operating the trough and means for mechanically tilting the false bottom inde-



pendently of the tiltable container and of the trough so as to effect discharge of graining elements therefrom into such tiltable container.

1,900,091. CONDUIT. VINCENT BENDIX, Chicago, Ill., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed July 8, 1929. Serial No. 376,829. 3 Claims. (Cl. 64—12.)

1. Power transmission mechanism comprising a flexible and substantially incompressible conduit including a plurality of disk members each having diametrically extending embossments, one embossment extending from each side face thereof, plain faced washer members between said embossed members, both plain and embossed members being provided with openings at their centers, and a tubular support member within said openings.

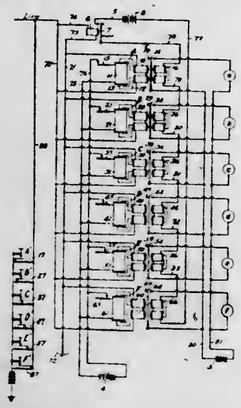


1,900,092. INKING DEVICE. HORACE D. BLACK, Uxbridge, England, assignor to Bell Punch Company, Ltd., London, England. Filed May 2, 1929. Serial No. 359,889. 8 Claims. (Cl. 101—351.)

1. An inking device for a printing mechanism comprising an inking assembly, a fixed sloping supporting track on which the inking assembly is slidable with a horisontal component of motion either to a position in which it is

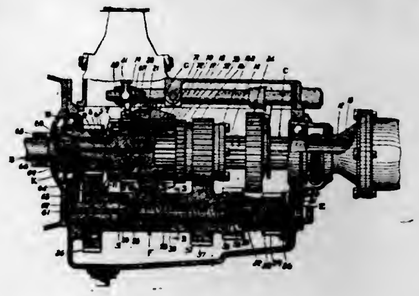
in operative relationship to the printing mechanism or to a position where it is accessible to an operator, and a latch carried by the inking assembly and arranged to engage the track when the assembly is in the former position.

1,900,093. FIXED CONDENSER AND METHOD OF MAKING THE SAME. OCTAVE BLAKE and HAIM BEYER, New York, N. Y., assignors to Cornell Electric Manufacturing Co., Inc., Long Island City, N. Y., a Corporation of New York. Filed Dec. 30, 1930. Serial No. 505,502. 2 Claims. (Cl. 175—41.)



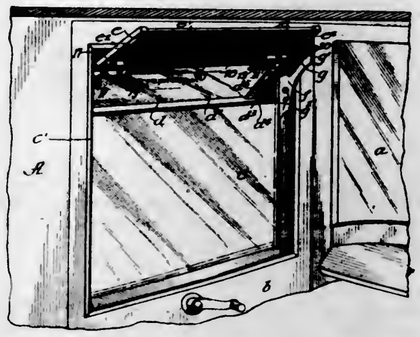
2. A condenser comprising a pair of conducting foils and a pair of insulating strips interleaved with the conductor strips to insulate them from each other, a supporting member therefor, the foils projecting beyond the edges of the insulating strips, wire leads coiled at the ends, the coils being conductively connected to the foils, and means for securing the leads to said supporting member.

1,900,094. WHEAT FLOUR DILUENT. RALPH M. BOHN, Evanston, Ill. Filed May 14, 1928. Serial No. 277,800. 3 Claims. (Cl. 99—10.)



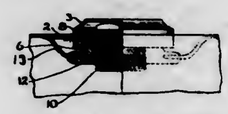
1. A non-fermenting wheat flour compound of reduced and relatively low protein content essential for the production of pastry dough and other soft flour products, said compound consisting of an intimate mixture containing a preponderance of relatively hard wheat flour of undesirably high protein content, a less proportion of gelatinized starch to dilute and reduce the protein content of the mixture to substantially that of soft flour and impart water absorbing properties, a still smaller proportion of degradation products of starch including dextrose and dextrin to impart color-producing properties and flavor to the baked product and a further relatively smaller proportion of corn starch to prevent lumping of the gelatinized starch in water, whereby the easily obtainable hard flour of intermediate and undesirable protein content may be utilized for the production of soft flour.

1,900,095. ONE-WIRE ELECTRICAL SELECTING APPARATUS. LOUIS BROWNSTEIN, Brooklyn, N. Y., assignor to Monopulse Teletype Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 11, 1929. Serial No. 346,036. 14 Claims. (Cl. 177—353.)



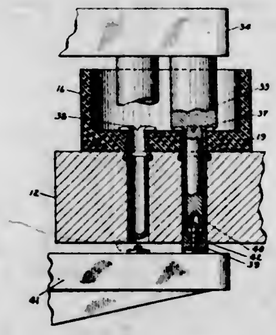
1. In an electrical system in which any one of any number of selecting devices is responsible to a single impulse of given current value delivered thereto over a single wire, and the other devices are each responsive respectively to impulses of different current value, a series of selecting magnets receiving said impulses, means for neutralising the magnetic field of only one of said magnets by said impulse, an armature for each of said magnets normally biased toward its selecting magnet, a series of auxiliary magnets each arranged to operate upon one of said armatures, and means responsive to the impulse for energising said auxiliary magnets for operating the armature of the neutralized magnet only.

1,900,096. TRANSMISSION. HARRY F. BUSHONG, South Bend, Ind., assignor, by mesne assignments, to Free Wheeling Patents Corporation, South Bend, Ind., a Corporation of Delaware. Filed Apr. 8, 1931. Serial No. 528,586. 9 Claims. (Cl. 192—113.)



1. In a vehicle transmission, a drive shaft, a driven shaft, and a countershaft, speed changing mechanisms including an overrunning clutch mounted on said drive and driven shafts, a countershaft sleeve rotatably mounted on said countershaft, and means operative upon rotation of said sleeve relative to said countershaft to force lubricant to said speed changing mechanisms.

1,900,097. RAIN AND SUN SHIELD FOR VEHICLES. WILLIAM T. CLARK, Boston, Mass. Filed Aug. 19, 1929. Serial No. 386,768. 8 Claims. (Cl. 296—44.)



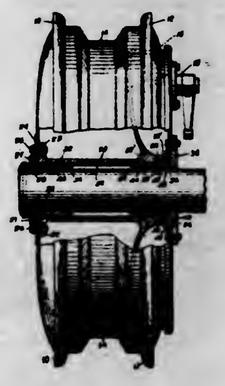
1. The combination with the vertically sliding glass of a vehicle window, of a shield plate pivoted inside the vehicle proximate the top of the window frame and adapted to be swung outward through the window opening with provision of a vent regulatable by adjustment of the sliding glass, and windbreak means on the shield plate coacting with the sliding glass for holding said shield plate in different positions

1,900,098. PROTECTING CAP. EARL B. COOPER, Decatur, Ill., assignor to Chambers, Bering, Quinlan Company, Decatur, Ill., a Corporation. Filed Dec. 29, 1930. Serial No. 505,852. 1 Claim. (Cl. 220—39.)

In combination with a container closure plug rotatably engageable with a container wall, a protecting cap completely covering the exposed portions of the plug and freely rotatable thereon, an integral skirt on said cap having a lower terminal retaining ledge, a band of resilient material fixedly flanked and secured within said skirt portion of said protecting cap and provided with integral flexible barb members sprung at an angle with the band and inclined upwardly, an exterior circular shoulder of the plug provided with an annular recess on the lower side thereof; said shoulder engaged by said barb members in a manner exerting a longitudinal thrust up against said shoulder in resisting removal of the cap from the plug while freely rotatable thereon.

1,900,099. METHOD OF SECURING CONTACT PINS IN RADIOTUBE BASES. JOHN E. FERGUSON, Edgewood, R. I., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed May 25, 1929. Serial No. 365,845. 2 Claims. (Cl. 218—29.)

2. The method of shaping and securing a tubular metallic member in an aperture provided in a wall of a base which comprises positioning a base with one end of a tubular member extending through said aperture, applying force in the direction of the longitudinal axis of said member to engage an opposite end thereof with a forming surface to partly close the said end, continuing the application of said force to form a shoulder intermediate the ends of said tubular member and in deforming the said first mentioned end to secure said member to said wall.

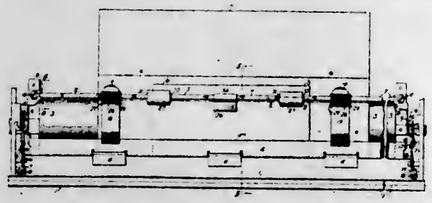


1,900,100. METHOD OF WELDING METALS. JOHN BERNARD FITZPATRICK, East Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed July 17, 1929. Serial No. 378,876. 8 Claims. (Cl. 219—10.)

1. The method of welding wrought tungsten bodies to nickel which comprises contacting the tungsten and nickel bodies over a relatively large area, welding the two metals together at one point on said contacting surfaces, simultaneously effecting a substantial fusing of the lesser refractory metal along the contacting surface of the tungsten away from the welded union until the bonded union

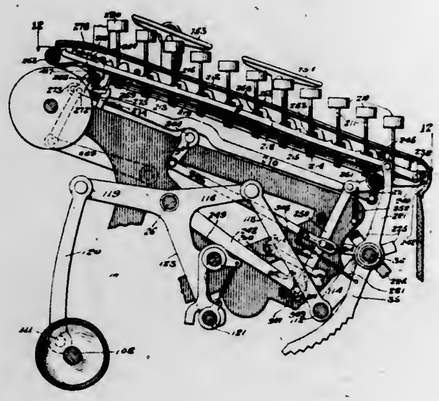
of the two metals has extended beyond the area of grain recrystallization of the said tungsten produced as a result of the application of the welding heat thereto.

1,900,101. WHEEL. FREDERICK C. FRANK, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Feb. 11, 1929. Serial No. 339,105. 2 Claims. (Cl. 301—1.)



1. A wheel comprising a hub, a member sleeved in the hub, a washer secured to one end of the hub extending beyond the outer and inner peripheries of the hub and engaging one end of the member sleeved in the hub, a radial shouldered flange on the other end of the hub, a disk secured to the flange and resting on the shoulder to present an unbroken outer surface with the hub, and a washer secured to the flange overlapping the junction of the disk with the shoulder and extending beyond the flange to reinforce the disk and beyond the inner periphery of the hub to engage the other end of the member sleeved in the hub to effectively retain the member in the hub.

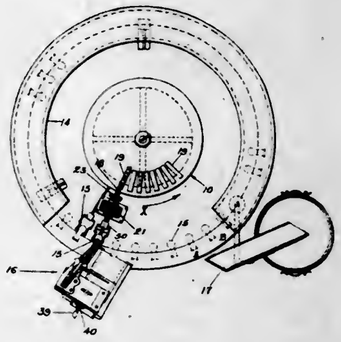
1,900,102. TYPEWRITING MACHINE. GEORGE G. GOING, Middletown, Conn., assignor, by mesne assignments, to Remington Typewriter Company, a Corporation of New York. Filed June 25, 1927. Serial No. 201,429. 7 Claims. (Cl. 197—138.)



7. The combination of a cylindrical platen, a supporting rod arranged above the platen, means for mounting said rod for movement into and out of parallelism with the surface of the platen but for holding it against turning movement around its longitudinal axis, means for spring impelling the rod towards the platen, paper fingers depending from said rod across the printing line and individually and adjustable along said rod, individually adjustable paper feed rollers separate from and intermediate said paper fingers, said feed rollers being coaxial

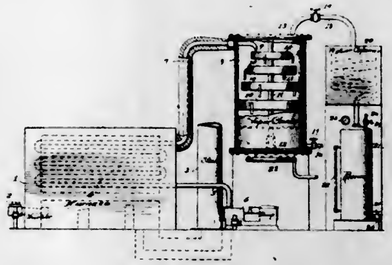
with said rod, and a paper deflector mounted for adjustment along said rod intermediate said feed rollers but fixed against turning movement on said rod, said

deflector at all times standing away from and out of contact with the platen to coact with work sheets and direct them beneath said feed rollers and rod.



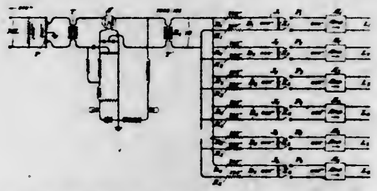
1,900,103. CALCULATING MACHINE. WILLIAM S. GUBELMANN, Buffalo, N. Y. Original application filed Sept. 19, 1912, Serial No. 721,141. Divided and this application filed Mar. 30, 1927. Serial No. 179,525. 92 Claims. (Cl. 235—27.)

1. In a calculating machine, the combination of a plurality of rows of keys, each provided with a stem, upper and lower guide plates through which the stems of the keys pass, means for yieldingly holding the keys in an elevated position consisting of a rod arranged on the underside of the lower plate between adjacent rows of key stems, and springs arranged on said rod and each having its ends connected with the lower ends of two key stems.



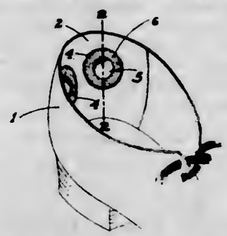
1,900,104. METHOD AND APPARATUS FOR COATING THE INTERIOR WALL OF HOLLOW BODIES. AARON M. HAGEMAN, Bloomfield, and ALBERT F. LINDSTROM, Nutley, N. J., assignors to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Dec. 9, 1927. Serial No. 238,784. 6 Claims. (Cl. 91—45.)

1. An apparatus for depositing a layer of a light diffusing material upon the inner surface of a lamp bulb which comprises mechanism having a spray discharge orifice for light diffusing material, means for moving said



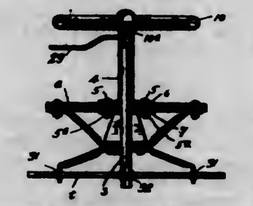
mechanism into and out from said bulb and means for preventing an accumulation of spray material adjacent to said orifice.

1,900,105. PROCESS AND APPARATUS FOR TREATING HYDROCARBONS. HIRAM J. HALLE, New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Continuation of application Serial No. 410,917, filed Sept. 17, 1920. This application filed Feb. 6, 1926, Serial No. 86,676. Renewed Nov. 18, 1929. 4 Claims. (Cl. 196—58.)



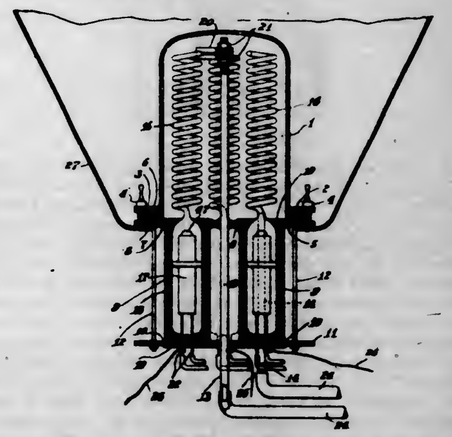
1. A continuous process for cracking hydrocarbon oil, consisting in passing the oil in a stream through a heating zone wherein it is raised to a cracking temperature, in delivering the highly heated oil from said stream to an enlarged vapor chamber, collecting the oil in a plurality of vertically spaced pools in said enlarged vapor chamber, said pools being of successively lower temperature and larger volume from the top to the bottom of said enlarged chamber, in permitting the oil to overflow successively from the pool of highest temperature to the pool of lowest temperature, in continuously withdrawing unvaporised oil from the bottom of said enlarged vapor chamber without again admitting the same to said stream, in taking off vapors from the top of said vapor chamber, in condensing such vapors, in collecting the resulting distillate and in maintaining a superatmospheric pressure on the oil undergoing treatment in the process.

1,900,106. BRIDGING CONNECTION FOR PROGRAM CIRCUITS. HAROLD S. HAMILTON, White Plains, N. Y., and GEORGE CRISSON, East Orange, N. J., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 27, 1931. Serial No. 571,450. 2 Claims. (Cl. 178—44.)



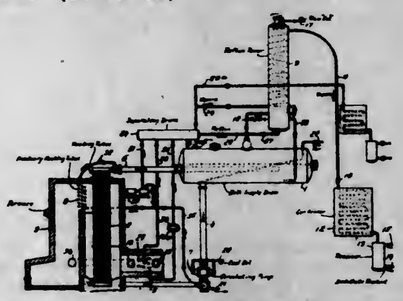
1. In a transmission system, a main line including an amplifier, a plurality of branch lines, a bridging circuit interposed between said amplifier and said branch lines, said bridging circuit having multiple bridge connections for said branch lines, impedances in each bridge connection between the bridging line and the junction point of the bridge connections, said impedances having such values that the impedance looking into the bridging circuit from any branch line will be equal to the impedance of the branch line itself and the impedance looking into the bridging circuit will be less than the impedance of a branch line, and a transformer associating said bridging circuit with the output of said amplifier and equalising the impedance looking into the amplifier with respect to the bridging circuit.

1,900,107. CUSHION PAD FOR SHOE COUNTERS. HARRIS L. HANDLER, Vallejo, Calif. Filed Dec. 10, 1931. Serial No. 580,028. 1 Claim. (Cl. 36—58.5.)



A pad for shoe heels comprising the combination with a shoe counter and lining therefor, of a resilient pad interposed between the lining and the counter, such pad being relatively thick in the center and tapering thence to a feather edge about the periphery of the pad, and a pair of projecting cup shaped elements on the pad one on each side of the vertical center line of the counter and projecting through the lining.

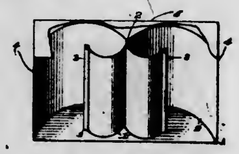
1,900,108. COASTER WAGON. ARTHUR HEDERN, JOHN G. HOLLIES and VICTOR S. LANDESS, Portland, Oreg., assignors to Barry Cerf, Portland, Oreg., trustee. Filed Apr. 7, 1931. Serial No. 528,318. 4 Claims. (Cl. 280—87.5.)



4. In a coaster wagon the combination of a tubular steering post mounted on the wagon bed, a steering shaft rotatable in said post, a steering wheel carried by said shaft, the latter extending below the wagon bed, a steering axle rigidly carried by the lower end of the steering shaft, complementary angular bolster plates arranged normal to each other, supporting the wagon bed on the axle, the extremities of one of said bolster plates bearing on and secured to the extremities of the axle.

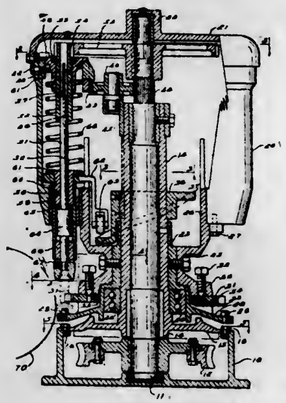
1,900,109. HIGH INTENSITY GASEOUS DISCHARGE TUBE. WILLIAM F. HENDRY, Ossining, N. Y., assignor, by mesne assignments, to Manhattan Electrical Supply Company, Inc., Jersey City, N. J., a Corporation of New Jersey. Filed Jan. 3, 1928. Serial No. 244,229. 8 Claims. (Cl. 176—122.)

1. In a high intensity lamp unit, a base plate, a glass bowl secured to said base plate in water tight fashion, a coiled gas filled tube positioned within said bowl, electrodes for said tube, and means for circulating a cooling fluid through said bowl.



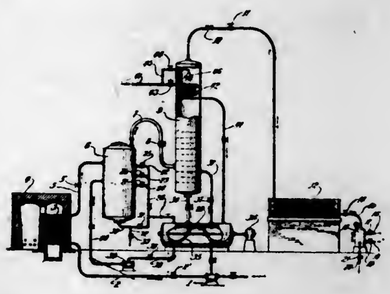
1,900,110. ART OF CRACKING HYDROCARBONS. EUGENE C. HERTHEL, Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y., a Corporation of Maine. Filed Sept. 29, 1927. Serial No. 222,912. 8 Claims. (Cl. 196—59.)

1. The improvement in the cracking of hydrocarbon oils, which comprises heating a body of oil to a cracking temperature by circulating the oil over heating surfaces externally in contact with heating gases and taking off vapors therefrom under pressure, subjecting these vapors to a refluxing operation and taking off from the refluxing operation vapors including vapors of the desired distillate product, separating components of the reflux condensate suitable as components of the desired distillate product by vaporization from the reflux condensate after discharge from the refluxing operation, thereafter passing the re-



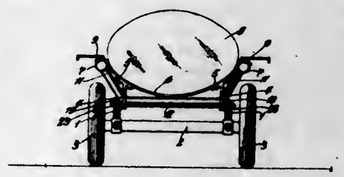
flux condensate stripped of such components over separate heating surfaces externally in contact with heating gases, and passing heating gases for supplying heat to the operation first over the last mentioned separate heating surfaces and then over the first mentioned heating surfaces whereby the oil circulating over the last mentioned heating surfaces is heated to a higher temperature than the oil circulating over the first mentioned heating surfaces.

1,900,111. SOUND AMPLIFIER. CHESTER W. HICKS, Hampton, Va. Filed Aug. 9, 1927. Serial No. 211,755. 4 Claims. (Cl. 181—31.)



1. A device of the character described including a deflecting partition having curved faces meeting each other to form a point and a curved fibrous diaphragm having a stiffening member at each of its extremities, the said deflecting partition when taken in connection with the curvature of the diaphragm forming substantially two opposed spiral structures each of substantially a single convolution, and having one of the said diaphragm stiffening members for a center, and an actuating unit connected to said diaphragm, the whole arranged in such manner that substantially one half of each spiral convolution vibrates under the influence of the actuating unit, while the other half of each spiral convolution deflects and amplifies the sound waves produced by the vibrations of the first mentioned half of the spiral convolution, substantially as described.

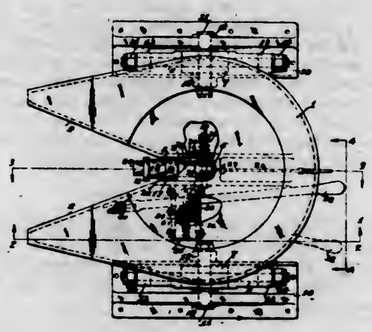
1,900,112. GRINDING MACHINE. JOSEPH H. HOBAN, Saginaw, Mich., assignor to Wilcox-Rich Corporation, a Corporation of Michigan. Filed Aug. 31, 1929. Serial No. 389,662. 8 Claims. (Cl. 51—108.)



3. In a machine of the class described, the combination of a rotatable turret, reciprocating rotatable spring-urged chucks carried by said turret adjacent its periphery, work seats eccentrically located with reference to said chucks and cooperating therewith for supporting cylindrical articles, steady rests for centering said articles during their rotation, and means for rotating said turret at a relatively low speed and said chucks at a relatively high speed.

1,900,113. TREATMENT OF HYDROCARBONS. WILLIAM R. HOWARD, Washington, D. C., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Feb. 21, 1927, Serial No. 169,774. Renewed Feb. 4, 1931. 12 Claims. (Cl. 196—59.)

1. A process of hydrocarbon oil conversion comprising subjecting oil to cracking conditions of temperature and superatmospheric pressure in a heating zone to cause substantial vaporization, passing the heated oil to a vapor separating zone and there separating the vapors, subjecting the vapors to reflux condensation, separately condensing and collecting the uncondensed vapors subsequent to reflux condensation, removing from the vapor separating zone regulated portion of non-vaporized residue and passing same to an enlarged mixing zone wherein a substantial body accumulates, removing from the reflux condensing zone regulated portions of reflux condensate and passing same to said mixing zone wherein a substantial body thereof accumulates and mixes with said substantial body of non-vaporized residue, and removing from said mixing zone regulated portions of said mixture and directing same directly and without passage through said heating zone to said vapor separating zone where said mixture mixes with the non-vaporized residue accumulated in said vapor separating zone.

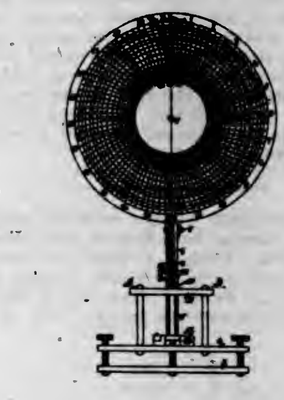


1,900,114. VEHICLE TRAILER TANK. FRANK ALLISON JONES, University City, Mo., assignor to Shell Petroleum Corporation, a Corporation of Virginia. Filed June 17, 1929. Serial No. 371,485. 4 Claims. (Cl. 280—5.)

1. A trailer device comprising a downwardly curved plate forming a saddle, a pair of transverse frame members supporting the intermediate portion of said saddle between the sides thereof, a pair of lateral plates supporting portions of said saddle laterally from said intermediate portion, a pair of longitudinal tubes supporting the marginal edges of said saddle, and means for supporting said tubes.

1,900,115. FIFTH WHEEL FOR CONNECTING TRACTORS TO DIFFERENT TYPES OF TRAILERS. CHARLES H. LAND, Grosse Pointe, and WILLIAM H. WILSON, Detroit, Mich. Filed Mar. 8, 1932. Serial No. 596,518. 11 Claims. (Cl. 280—33.1.)

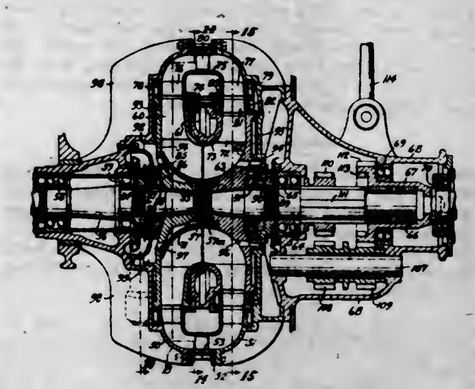
1. In combination with a rigidly secured fifth wheel of a tractor adapted for connecting the tractor to different types of semitrailers equipped with supporting legs; a folding king-pin pivoted to the rigidly secured fifth wheel, adapted to engage a coordinating coupling means carried



by the trailer; a lock carried by the fifth wheel for supporting said king-pin in operative position to effect a coupling relation with the coupling means of a trailer.

1,900,116. PROCESS AND APPARATUS FOR CRACKING OIL. NATHANIEL E. LOOMIS, Westfield, and ALBERT H. TOMLINSON, Elizabeth, N. J., assignors to Standard Oil Development Company, a Corporation of Delaware. Filed Oct. 1, 1926. Serial No. 138,840. 6 Claims. (Cl. 196—51.)

1. Process of cracking hydrocarbon oil in an elongated vertical soaking drum insulated against loss of heat, comprising heating a stream of oil to a vaporising and cracking temperature, dividing the resulting stream of hot oil vapor, passing a portion of the stream into an upper part of the drum, passing another portion of the stream into a lower part of the drum, and withdrawing all vaporous and liquid products of conversion together from an intermediate point in the drum.

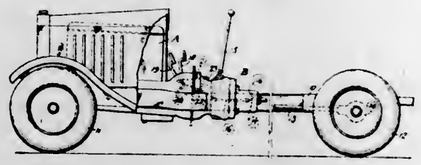


1,900,117. SUNDIAL. FRANCESCO LORIA, Rome, Italy. Filed Mar. 13, 1928, Serial No. 261,335, and in Italy Jan. 14, 1928. 3 Claims. (Cl. 33—62.)

1. In an instrument of the class described, a supporting member, an upright bearer upon said member, an arm mounted for tilting adjustment upon the bearer, two cup-shaped discs mounted upon the arm at their axes and in opposition to each other, the relatively remote faces of the discs bearing indicia indicating hours and fractions of hours, the angular adjustment of the arm permitting either disc to be positioned to receive rays from the sun, a style at the axes of the discs projecting at its end portions beyond the faces of the disc whereby to provide for the casting of its shadow, under the sunlight rays, onto the respective face of the respective disc,

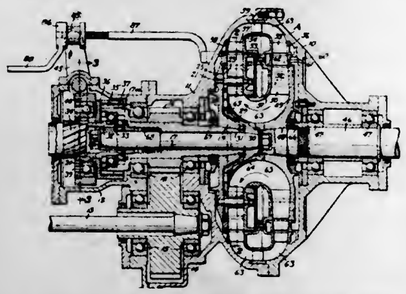
the bearer being rotatable for adjustment of the discs in accordance with the adopted meridian, and means for holding the bearer in its positions of adjustment.

1,900,118. HYDRAULIC VARIABLE SPEED POWER TRANSMISSION. ALF JAMES RUDOLF LYSHOLM, Stockholm, Sweden, assignor to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden, a Corporation of Sweden. Filed Nov. 28, 1932, Serial No. 644,082, and in Sweden Nov. 22, 1926. 20 Claims. (Cl. 60—54.)



3. In a variable-speed power transmission including a casing enclosing co-axially mounted interfitting driving and driven members, a ring of turbine blades concentric with the axis of rotation, said blades having bluntly rounded inlet edges and relatively sharp outlet edges and having outlet angles within a range of which the lower limit is substantially 20° and the upper limit of which is substantially 45° and said blades being so thick adjacent to inlet edge of the ring as to form passages between adjacent blades wherein the length of the projection normal to the median line of the passage from the median line to the surface of the blade varies rapidly for a short distance along the median line from the inlet edge of the ring toward the outlet edge thereof and then relatively slowly to said outlet edge and wherein

the length of such normal projection at said inlet edge is one and one half times such normal projection at a relatively short distance from said inlet edge.

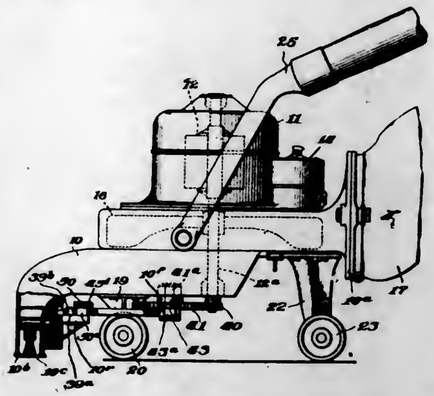


11. In a power plant, a motor of the type requiring a cooling fluid, a fluid operated variable-speed transmission driven by the motor, a conduit for conducting fluid from the transmission for cooling, a cooler receiving fluid from said conduit, a conduit for conducting cooled fluid from the cooler to the transmission, a pump in said last named conduit, means providing a restriction in said first named conduit for maintaining the fluid in the transmission under pressure, a conduit for conducting cooling fluid from the pump to the motor and a conduit for conducting fluid from the motor to the cooler.

1,900,119. VARIABLE SPEED POWER TRANSMISSION. ALF LYSHOLM, FRED HORNEY, and GÖSTA WAHLSTEN, Stockholm, Sweden, assignors to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden, a Joint-Stock Company of Sweden. Filed Jan. 8, 1932, Serial No. 585,440, and in Germany Jan. 14, 1931. 85 Claims. (Cl. 74—59.)

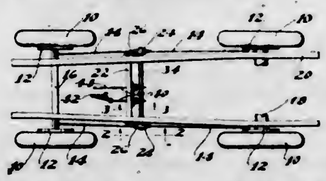
1. A variable speed power transmission comprising a driving shaft, a driven shaft, means forming mechanical power transmitting connection between said shafts to provide drive therebetween, hydraulic variable speed power transmitting mechanism for transmitting power from the driving shaft to the driven shaft to provide a synchronous drive between said shafts, means for selectively engaging said first named means to transmit power from the driving shaft to the driven shaft, means for selectively transmitting power through the hydraulic mechanism, and means for automatically disconnecting the entire hydraulic mechanism from operative relationship with the remaining parts of the transmission upon transmission of power through said first named means.

1,900,120. VARIABLE SPEED POWER TRANSMISSION. ALF LYSHOLM, FRED HORNEY, and GÖSTA WAHLSTEN, Stockholm, Sweden, assignors to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden, a Joint-Stock Company of Sweden. Filed Mar. 26, 1932, Serial No. 601,330, and in Germany May 7, 1931. 11 Claims. (Cl. 60—54.)



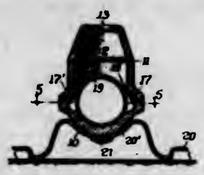
1. A hydraulic variable-speed power transmission comprising a non-rotatably mounted casing providing a chamber for operating fluid, a primary member comprising a shaft part rotatably mounted in the casing and an impeller part in said chamber, a secondary member having a shaft part rotatably mounted in said casing in axial alignment with the first mentioned shaft part and a turbine part in said chamber, said impeller part and said turbine part having a plurality of rings of blades arranged for circulation of operating fluid in a closed path of flow in said chamber outwardly through a ring of impeller blades and through a ring of turbine blades situated outwardly of said impeller blades and inwardly through a second ring of turbine blades, said rings of turbine blades comprising blades fixed on said turbine part to provide fixed channels for flow of operating fluid therebetween, said ring of impeller blades comprising blades pivotally mounted on said impeller part and mechanism operable from the exterior of the casing for turning the pivotally mounted blades to alter the free area of the passages for flow of operating fluid therebetween.

1,900,121. TAPE MOISTENING AND AFFIXING DEVICE. EDWIN H. MANVELL, Brooklyn, N. Y., assignor to Edwin H. Manvell and Louis Casper, Brooklyn, N. Y. Filed Apr. 23, 1929. Serial No. 357,874. 5 Claims. (Cl. 91—14.5.)



1. In a tape moistening and affixing device having a head attached to a liquid holding receptacle, a well incorporated in said head, a moistening or gumming wheel revoluble in said well, means for feeding liquid from said holding receptacle into said well, said means coacting with the movement of said wheel, a tape groove, a spring pressed curved pressure shoe resting normally upon the gummed paper tape that rests in said groove preparatory to being moistened; a tape guide embracing the tape and integral with the lower face of said shoe, and a finger lever integral with said shoe for lifting the tape clear of the gumming or moistening wheel aforesaid.

1,900,122. APPARATUS FOR CLEANING. FRANCIS C. MASON, Chicago, Ill., assignor to Sears, Roebuck & Company, Chicago, Ill., a Corporation of New York. Filed Aug. 8, 1929. Serial No. 384,258. 16 Claims. (Cl. 15—10.)

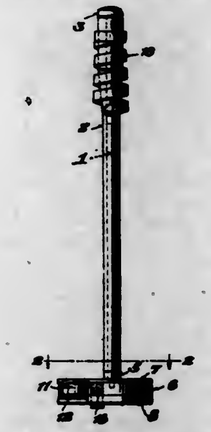


1. Apparatus of the class described including a casing having an elongated opening therein, a plurality of brushes oscillatably mounted and projecting into said opening, said brushes being arranged with their axes of oscillation transverse to the major axis of said opening, and means to oscillate said brushes about said axes in substantial parallelism with said major axis and across the surface underlying said opening.

1,900,123. BRAKE OPERATING CONNECTION. EUGENE G. MCDONALD, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Jan. 26, 1931. Serial No. 511,233. 15 Claims. (Cl. 188—204.)

1. Brake operating means comprising, in combination with a chassis, a plurality of levers, pivotal connections between said levers and said chassis, connections between said levers and said brakes, and a transverse substantially rigid shaft connected to said levers some distance from their bearings and which has a combined turning and bodily movement in operating the levers.

1,900,124. SPRINKLER HEAD. HARRY E. MENG, Oak Park, Ill., assignor to The W. D. Allen Manufacturing Company, Chicago, Ill., a Corporation. Filed July 11, 1932. Serial No. 621,783. 5 Claims. (Cl. 299—105.)



1. A sprinkler head comprising a horizontal tubular body, a nozzle on the upper side of said body having a spray chamber therein, and a tube section snugly fitting the bore of the tubular body and forming the floor of the spray chamber, the sprinkler head having a port or ports opening into the lower portion of the spray chamber exteriorly of and partly defined by said tube section.

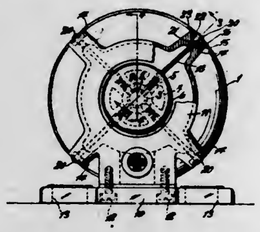
1,900,125. GRAY IRON ALLOY. PAUL D. MERICA, Westfield, JAMES S. VANICK, Elizabeth, and THOMAS H. WICKENDEN, Roselle, N. J., assignors, by mesne assignments, to The International Nickel Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 21, 1926. Serial No. 143,294. 5 Claims. (Cl. 75—1.)

8. A hard gray iron casting containing about 2.5% to about 3.7% of carbon, about 0.30% to about 3.0% silicon, about 1.0% to about 10.0% nickel, and about 0.15% to about 2.0% chromium in the ratio of from about 2 and upwards of nickel to 1 of chromium, said nickel being present in excess of chromium, said casting as cast in a mold without heat treatment consisting practically wholly of graphite and martensite or troostite, and to a minor degree of free iron carbine and having a Brinell hardness in excess of about 200.

1,900,126. HAIR WAVING OR CURLING ROD. VINCENT N. NICOSIA, Houston, Tex. Filed Nov. 16, 1932. Serial No. 642,951. 11 Claims. (Cl. 132—33.)

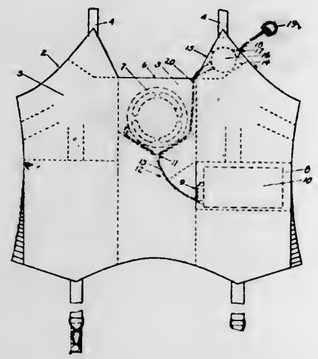
1. In a hair waver or curler, or rod having a threaded end, a sleeve rotatable on the rod, and formed to have hair wrapped thereover, a coil spring slidable on the sleeve for engagement throughout a substantial part of its length with and over the free end of the wrapped hair to hold same on the sleeve, and means to hold the hair adjacent the scalp having a threaded portion for removable engagement with said threaded end of the rod.

1,900,127. MILK BOTTLE HOOD. WILLIAM H. OERM, Baltimore, Md. Filed June 25, 1932. Serial No. 619,345. 2 Claims. (Cl. 226—83.)



1. The method of forming a bottle-mouth-hood, consisting in, first providing a molded cup having a substantially cylindrical wall which includes fibrous and fusible materials; second, applying moisture to the cup for softening it; third, placing the cup of softened material with its wall around the bead of the bottle-mouth; and fourth, simultaneously applying centripetal pressure and heat sufficient to complete the molding of the hood around and under the bead and to evaporate the moisture and thus render the finished molded hood brittle so it cannot be removed from the head without breaking the fibres of the material which composes the hood.

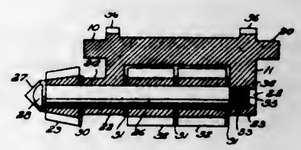
1,900,128. RESILIENT SUPPORT FOR ELECTRIC MOTORS. LAWRENCE M. PERRONE, St. Louis, Mo., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo., a Corporation of Missouri. Filed Apr. 9, 1930. Serial No. 442,828. 3 Claims. (Cl. 248—16.)



2. A motor having a frame, a support having a series of holes and sockets concentric with said holes, a series

of spokes of substantially less diameter than said holes passing through the holes respectively and engaging in

the frame, a resilient washer seated in each of said sockets and about the spoke, and a head on the spoke engaging said resilient washer.



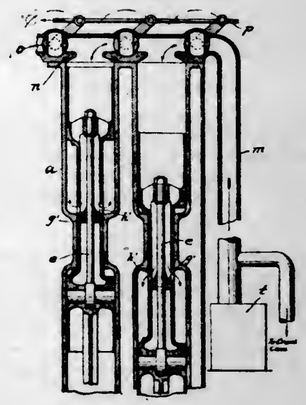
1,900,129. WOMAN'S UNDERGARMENT. FRED RING, New York, N. Y., assignor to Dictograph Products Co., Inc., New York, N. Y., a Corporation of Delaware. Filed Sept. 25, 1931. Serial No. 565,055. 3 Claims. (Cl. 2—250.)

1. A woman's undergarment comprising a front adapted to cover the chest of a wearer having two layers of material in the central portion, a relatively large article supporting pocket positioned centrally on said front within the region to be disposed adjacent the hollow of the chest formed by stitching together the two above mentioned layers of material, a second article supporting pocket positioned to one side on said front below the region adapted to cover the fullness of the chest and formed by stitching together the two layers of material, a passage formed between said pockets by the two layers of material, and a third relatively small article supporting pocket disposed on said front adjacent the shoulder support above the last mentioned region and formed by stitching together the two layers of material.

1,900,130. TUBE CLEANER. JAMES P. RODGERS, Pittsburgh, Pa., assignor to Elliott Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 16, 1930. Serial No. 421,256. 6 Claims. (Cl. 15—104.14.)

1. In a tube cleaner, a head having a body portion, a cleaning element carrier having spaced projections thereon having openings therein receiving a pin for supporting a cleaning element, means on the head for supporting one end of the carrier for swinging movement, a demountable keeper, means on the head for receiving and positioning the keeper, means in the keeper for supporting the other end of the carrier for swinging movement, a threaded section on one end of the head, means on the threaded sec-

tion for holding the keeper in place and engaging the driving means, and spaced shoulders on the head for limiting the distance through which the carrier swings.



1,900,131. RUGOUS COATING COMPOSITION AND PROCESS OF MAKING SAME. FRANK B. ROOT, East Orange, N. J., assignor to Chadeloid Chemical Company, New York, N. Y., a Corporation of Virginia. Filed Nov. 20, 1929. Serial No. 408,662. 14 Claims. (Cl. 91—68.)

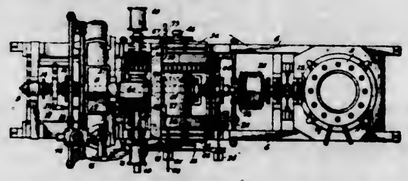
1. A liquid coating composition containing palpable ground wood of substantially soft wood origin and of spray-projecting fineness; said coating composition rapidly drying on exposure at room temperature to form a textured rugous surface.

1,900,132. PROCESSS OF REFINING. LUDWIG ROSENSTEIN, San Francisco, Calif. Filed Apr. 20, 1931. Serial No. 531,650. 8 Claims. (Cl. 87—12.)

1. In a process of purifying a substance of the class consisting of oils, fats, waxes and resins of animal or vegetable origin, the step which comprises treating a mass of said substance with liquid ammonia.

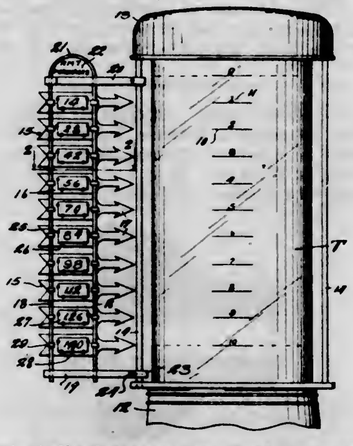
1,900,133. INTERNAL COMBUSTION ENGINE. JOSEPH SCHAEFFERS, Philadelphia, Pa. Filed Mar. 13, 1931, Serial No. 522,193, and in Germany October, 1930. 15 Claims. (Cl. 123—57.)

3. A two-cycle internal combustion engine comprising a cylinder having an extension of reduced bore, a piston arranged to reciprocate within the cylinder and having a tubular extension reciprocable in the cylinder extension, said parts forming an annular combustion chamber about the tubular extension, the piston having a shoulder formed on a portion of its annular working face adapted to closely approach the end of the cylinder, said tubular extension



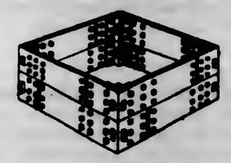
being provided with a plurality of ports providing a passage for air into the combustion chamber, the ports being directed angularly relatively to the radii to initiate rotary movements of the charges passing therethrough.

1,900,134. RAILWAY CAR. ELMER E. SCHLOTZ, Denver, Colo. Filed Feb. 4, 1929. Serial No. 337,251. 7 Claims. (Cl. 105—171.)



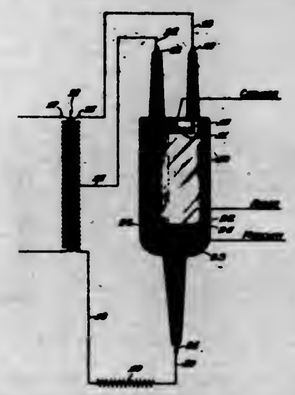
2. In a railway car, a car body, and a truck for the body, having relative rotary movements in horizontal and vertical planes, and having a sliding movement laterally of the body.

1,900,135. WELL DRILLING APPARATUS. WALDO SHELDON, South Norwalk, Conn., assignor to Sheldon Machinery Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 11, 1928. Serial No. 298,950. 10 Claims. (Cl. 254—187.)



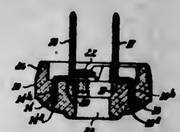
5. In apparatus of the character disclosed, a main drive shaft, a cross-shaft driven thereby, a drum, drive gearing from said cross shaft to said drum, a cathead shaft, drive gearing from said cathead shaft to the drum and drive gearing from the cross shaft to said cathead shaft.

1,900,136. PRICE MARKER. ROSCOE V. SHELDON, Riverside, Calif. Filed Sept. 10, 1932. Serial No. 632,619. 3 Claims. (Cl. 116—135.)



1. A price indicating means comprising a pointer, means for mounting the pointer at one side of a liquid dispensing means, said pointer comprising a body, a reduced head formed with the body, lugs struck from the body and engaging about the mounting means, a placard and means for removably mounting the placard on the body.

1,900,137. FOUNDRY FLASK. WALTER O. SHELLING, Allentown, Pa. Filed Sept. 24, 1931. Serial No. 564,838. 3 Claims. (Cl. 22—96.)



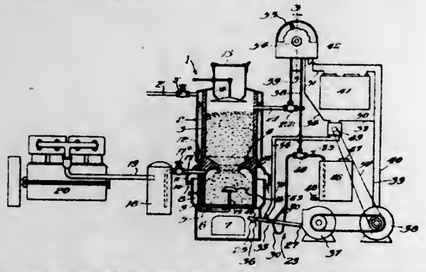
1. A foundry flask section comprising four structurally rigid composite L-shaped members each having a central L-shaped portion of double thickness and two legs each of single thickness, assembled so that the portions of single thickness overlap to form a frame of substantially double thickness throughout its entire periphery.

1,900,138. THERAPEUTIC LAMP. SAMUEL S. TOBIAS, Philadelphia, Pa., assignor to The Burdick Corporation, Milton, Wis., a Corporation of Delaware. Filed July 12, 1928. Serial No. 292,140. 5 Claims. (Cl. 250—35.)

5. A therapeutic lamp comprising a transparent envelope, a filamentary cathode in the envelope, a vaporisable medium in the envelope, a solid anode in the envelope in thermal contact with said medium and between said medium and the cathode, the anode serving as a shield to prevent the arc striking said medium.

1,900,139. ATTACHMENT PLUG CAP AND METHOD OF MAKING THE SAME. WILLIAM C. TERGONING, Wauwatosa, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a Corporation of Delaware. Filed Oct. 19, 1929. Serial No. 400,881. 11 Claims. (Cl. 173—361.)

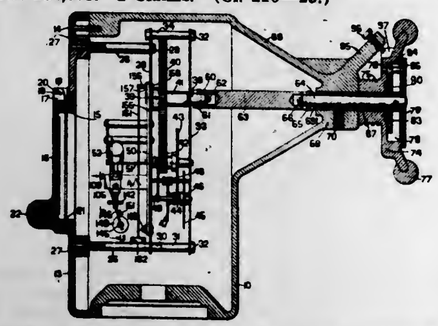
1. The method of making an attachment plug cap, which comprises cold molding a mass of insulating material to form an article of the desired shape, then pressing into the molded article an integral portion of a combined contact and terminal member, and thereafter subjecting the article to the usual heat treatment for curing, whereby said combined contact and terminal member is rigidly and permanently secured in position through shrinkage of the insulating material.



9. An attachment plug cap comprising an insulating body molded free from inserts of any kind, said body hav-

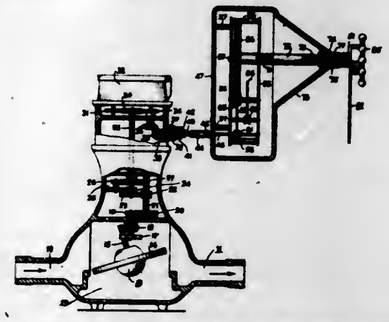
ing a plurality of recesses formed therein by the molding operation, and a plurality of one-piece combined contact and terminal members having integral projections inserted within said recesses and permanently retained therein by shrinkage of the material of said body.

1,900,140. METHOD OF IMBIBITION PRINTING WITH PURE PRIMARY COLORS AND PRODUCT. BERTHA SUODEN TUTTLE, Boston, Mass., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y., a Corporation of Delaware. Filed Mar. 9, 1929. Serial No. 345,903. 8 Claims. (Cl. 101—149.)



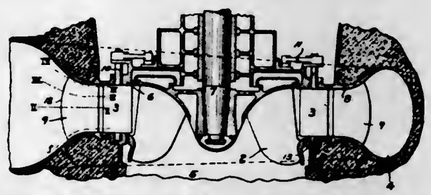
5. A colored motion picture film, characterised by having fixed superposed images thereon of pure yellow, red and blue dye solutions, respectively, and free from insoluble matter, whether of dye or other substance.

1,900,141. METHOD FOR MAKING PRODUCER GAS. ARTHUR P. VAN HEEDEN, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed May 31, 1927. Serial No. 195,193. 1 Claim. (Cl. 48—203.)



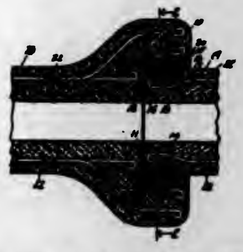
A process of making producer gas in a gas producer having a solid fuel bed supported by a grate; which comprises spraying oil and air into the fuel bed below the grate, igniting the oil and air mixture and thereby heating the solid fuel bed above the grate, then discontinuing the heating with oil, admitting air to the lower portion of the heated fuel bed. and thereby generating producer gas, and withdrawing producer gas from the top of the solid fuel bed.

1,900,142. APPARATUS FOR FEEDING SOLUTIONS. CHARLES F. WALLACE, Westfield, N. J., assignor to Wallace & Tiernan Products, Inc., Belleville, N. J., a Corporation of New Jersey. Filed May 31, 1928. Serial No. 282,005. 2 Claims. (Cl. 210—29.)



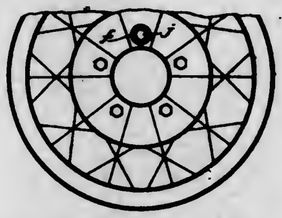
1. An apparatus for feeding solutions comprising a clock gear train, a weight connected to drive the gear train by the gravitational movement of the weight, a container for solution into which the weight descends to displace solution from the container, and a pendulum and escapement mechanism for the gear train controlling the descent of the weight and displacement of the solution.

1,900,143. APPARATUS FOR FEEDING SOLUTIONS. CHARLES F. WALLACE, Westfield, N. J., assignor to Wallace & Tiernan Products, Inc., Belleville, N. J., a Corporation of New Jersey. Filed May 31, 1928. Serial No. 282,006. 4 Claims. (Cl. 210—29.)



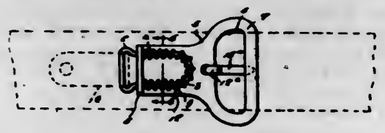
1. An apparatus for feeding or dispensing solutions comprising a water meter, a train of gears actuated by the meter, a weight lowered by the meter through connections including said train of gears at a rate proportional to the flow through the water meter, a container for the solution, a suction device including a venturi for producing the suction, and a flexible connection between the suction device and the container comprising an intake for the solution moving with the aforesaid weight.

1,900,144. HYDRAULIC MACHINE. WILLIAM M. WHITE, Milwaukee, Wis. Filed Sept. 2, 1930. Serial No. 479,226. 5 Claims. (Cl. 253—118.)



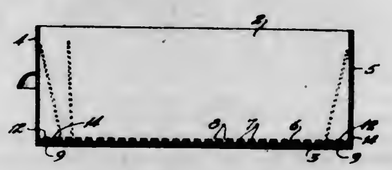
1. In a hydraulic machine, a spiral fluid conducting casing having an annular fluid exit portion and a plurality of vanes mounted in said fluid exit portion, the entrance angles of which vary progressively from the top and bottom to a point intermediate the top and the bottom.

1,900,145. PRECALKED EXTENSIBLE JOINT FOR PIPES. WILLIAM A. WHITING, Huntington Park, Calif., assignor to American Concrete Pipe Company, a Corporation of Delaware. Filed Apr. 1, 1930. Serial No. 440,715. 10 Claims. (Cl. 285—112.)



1. In a pipe joint of the character described: a pair of concentric rings mounted upon a pipe section; a flexible gasket interposed between said rings; and means on said rings for effecting a bond between said rings and said pipe section.

1,900,146. LOCK FOR SCREW FASTENING MEMBERS. BRUNO ERNEST WINKLER, Detroit, Mich. Filed June 25, 1931. Serial No. 546,781. 1 Claim. (Cl. 70—122.)

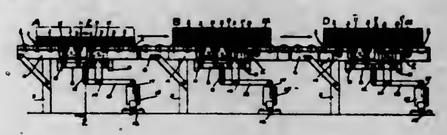


In a device of the character described, the combination, with a fixed member having screw threads, and a removable member provided with co-acting screw threads and with external tool-engaging means, of a sleeve having smooth, unbroken internal and external cylindrical surfaces and rotatable and reciprocable upon said removable member and adapted to enclose the said tool-engaging means, a recess within said removable member having an internal annular groove and a slot communicating therewith from the outside, a barrel fitting within said recess having a projection adapted to pass through said slot and to engage said annular groove, key operated retractable tumbler means upon said barrel non-coincident with said projection for engaging said slot and preventing rotation of said barrel to remove the same, and a flange on said barrel for retaining the said sleeve in place longitudinally.

1,900,147. BELT BUCKLE. DORSEY M. WIRTH, Bucyrus, Ohio. Filed Aug. 27, 1931. Serial No. 559,695. 2 Claims. (Cl. 24—163.)

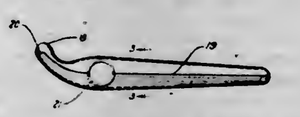
1. In a belt buckle comprising a plate provided at one end with means for engaging the adjustable end of the belt, said plate being provided at its opposite end with a laterally disposed formation having an opening therein, a slidable member disposed through the opening and provided with a transversely extending straight portion at its outer end and a spring interposed between the inner end of the slidable member and the inner side of the laterally disposed formation the other end of the belt being secured to the straight portion.

1,900,148. DEVICE FOR STABILIZING CARDS, FILES, ETC., IN FILING DRAWERS OR BOXES. RICHARD V. WOOD, Louisville, Ky. Filed Oct. 20, 1931. Serial No. 570,018. 6 Claims. (Cl. 129—16.)



1. A stabilizing device for files adapted to be placed in the bottom of a file drawer to rest thereon and restrained against movement longitudinally and transversely of the drawer and consisting of a pair of strips having flat ends and having the portions between the ends corrugated to provide alternate ribs and depressions, cross bars respectively connecting the front and rear ends of said strips in spaced relation and resting on top of the flat ends of the strips, and means for detachably securing the bars to the strips.

1,900,149. BRAKE MECHANISM FOR CONVEYERS. MARTIN J. ANDERSON, Ellwood City, Pa., assignor to Mathews Conveyer Company, Ellwood City, Pa., a Corporation of Pennsylvania. Filed Oct. 8, 1930. Serial No. 487,229. 2 Claims. (Cl. 193—32.)

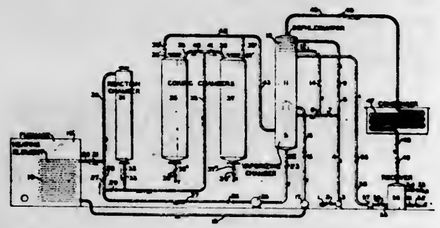


1. The combination with a gravity conveyer comprising a plurality of anti-friction rollers, of a series of brake devices arranged at intervals along said conveyer and each having means adapted to frictionally engage certain of the rollers of said conveyer to retard their rotation, an actuator for each brake device, and a control means for said actuators whereby said devices may be operated independently of one another, or simultaneously, to control the movement of articles over said conveyer.

1,900,150. CONVEYING SYSTEM. MARTIN J. ANDERSON, Ellwood City, Pa., assignor to Mathews Conveyer Company, Ellwood City, Pa., a Corporation of Pennsylvania. Filed Oct. 8, 1930. Serial No. 487,230. 20 Claims. (Cl. 193—32.)

1. In a conveying system, a loading station having means whereby a commodity may be retained thereon, means for causing the release of a commodity from said loading station and permitting it to advance along the system, an unloading station connected with said loading station, an electrically controlled stop means adapted to interrupt the travel of a commodity between said stations, if the unloading station is loaded, and means made operable by removal of a commodity from said unloading station to render said stop means inoperative and cause the release of a commodity being held between said stations and permitting it to advance to the unloading station.

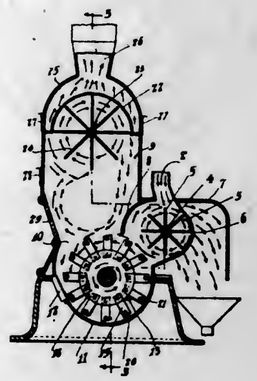
1,900,151. LEVER. WILLIAM J. ANDRES and CLARENCE E. WARD, South Bend, Ind., assignors to Bendix Aviation Corporation, South Bend, Ind. a Corporation of Delaware. Filed May 31, 1930. Serial No. 458,484. 2 Claims. (Cl. 74—5.)



1. A lever comprising two longitudinally extending generally channel-shaped parts permanently secured concave face to concave face, and each forming one side of the lever and said lever being formed with at least one of its ends out of line with the lever body and with one of said parts extending across the end of the other at said end of the lever to provide an unbroken ball shaped thrust surface.

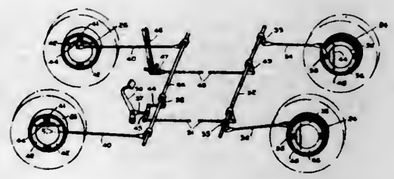
1,900,152. SAFETY REMOVABLE FASTENER. ABRAHAM BEBEL, New York, N. Y. Filed Mar. 19, 1932. Serial No. 599,889. 8 Claims. (Cl. 24—205.)

6. A safety hook fastener, comprising upper and lower spaced trapezoidal guide plates, a separation post between said guide plates rigidly connected therewith, a strap across the top guide plate, a handle with prongs extending beneath opposite edges of the strap, pegs projecting from said handle and positioned thereon to engage against one edge of one of the guide plates to hold the handle against free moving, and resilient means for causing the pegs to engage the edge of the guide plate.



1,900,153. TREATMENT OF HYDROCARBON OILS. DONALD J. BERGMAN, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Aug. 11, 1930. Serial No. 474,428. 1 Claim. (Cl. 196—58.)

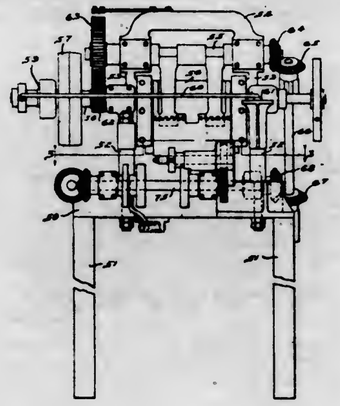
A hydrocarbon oil cracking process which comprises passing the raw charging oil for the process countercurrent to and in direct contact with flashed vapors in a contacting zone to vaporize a substantial portion of the charging oil by the heat of said vapors, dephlegmating the resultant commingled vapors out of direct contact with raw charging oil thereby forming a relatively clean cracking stock, passing said stock, unadmixed with raw charging oil, in a restricted stream through a heating zone and heating the same therein to cracking temperature under pressure, removing the unvaporized portion of said charging oil from the contacting zone and commingling the same, without prior heating to cracking temperature, with the heated cracking stock in an unheated zone maintained under pressure, withdrawing unvaporized oil from the last mentioned zone and flash distilling the same by pressure reduction in a flashing zone, separately removing vapors and residue from the flashing zone and isolating the latter from the process, and supplying the last mentioned vapors to said contacting zone to constitute said flashed vapors.



1,900,154. METHOD AND APPARATUS FOR DEFIBRATING COTTONSEED HULLS. GEORGE L. BLANCHARD, Calexico, Calif. Filed Feb. 19, 1930. Serial No. 429,541. 8 Claims. (Cl. 19—44.)

1. A process of defibrating cottonseed hulls which comprises, first passing the hulls to a hull beating zone, therein beating the hulls while discharging delinted hulls therefrom passing the incompletely delinted hulls and substantially hull-free fibers into a separation zone, therein separating by an uprising current of air the substantially hull-free fibers from incompletely delinted hulls, and passing the incompletely delinted hulls to an independent hull

scraping zone, scraping the fibers from the hulls in said zone, and ejecting the hulls back into the hull beating and discharge zone, and passing the fibers separately from the scraping zone to said separation chamber.

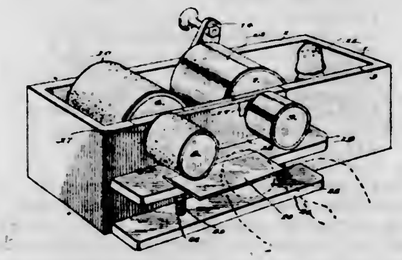


1,900,155. BRAKE MECHANISM. CALEB S. BRAGG, Palm Beach, Fla., and VICTOR W. KLIESRATH, Port Washington, N. Y., assignors to Bragg-Kliesrath Corporation, Long Island City, N. Y., a Corporation of New York. Original application filed Feb. 1, 1929, Serial No. 336,720. Divided and this application filed Dec. 30, 1929. Serial No. 417,296. 1 Claim. (Cl. 188—10.)

In an automotive vehicle, front brakes and rear brakes, said brakes adapted to be operated by a common means providing a predetermined distribution of brake operating forces to each brake, said front brakes being so constructed that parts thereof deform when heated during the operation of the brakes to thereby reduce the braking efficiency of said front brakes, and said rear brakes being so constructed that parts thereof resist deformation during the braking operation to thereby automatically increase the braking efficiency of said rear wheel brakes.

1,900,156. METHOD AND APPARATUS FOR MAKING BELT LACING HOOKS. ORVILLE B. BRIGGS and GRANT M. RICHARD, Toledo, Ohio, assignors to Safety Belt Lacer Company, Toledo, Ohio, a Corporation of Delaware. Filed Mar. 3, 1930. Serial No. 432,820. 21 Claims. (Cl. 140—71.)

1. In the method of manufacturing a strip of belt lacing hooks, those steps which consist in perforating a lacing bar to provide open end recesses engaging belt hook forming members in said recesses to unite said bar and



members and bending said members longitudinally thereof to form belt hooks.

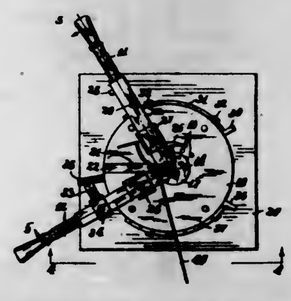
1,900,157. AMMUNITION. JAMES E. BURNS, Bridgeport, Conn., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed Mar. 24, 1930. Serial No. 438,628. 12 Claims. (Cl. 52—4.)

1. A priming mixture for ammunition containing basic lead picrate in admixture with guanylnitrosaminoguanyltetracene.

8. A priming mixture for ammunition containing basic lead picrate admixed with mercury fulminate.

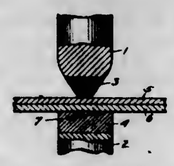
1,900,158. RAZOR BLADE SHARPENER. JOHN D. BUTLER, Washington, D. C. Filed Apr. 4, 1930. Serial No. 441,573. 3 Claims. (Cl. 51—72.)

1. A razor blade sharpener comprising a box having a rigid shelf extending from one of the side walls in the plane of the bottom thus to extend the bearing surface of the box, a pair of shafts journaled on the side walls of the box, each having a pair of dissimilarly sized rolls arranged in sets respectively inside and outside of the box, means correspondingly surfacing the rolls of each pair but constituting dissimilar surfacings as to the sets of rolls, means by which one of the shafts is turned and means by which both shafts are turned in unison, a presser plate hinged to one of the side walls in a position above the rigid shelf for limited movement respecting an adjoining set of rolls, and resilient means situated between the shelf and presser plate to urge the latter against said set of rolls.



CARNEGIE LIBRARY OF ATLANTA

1,900,159. AMMUNITION. ALLAN CAMPBELL, Bridgeport, Conn., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed May 23, 1931. Serial No. 539,515. 3 Claims. (Cl. 102—17.)

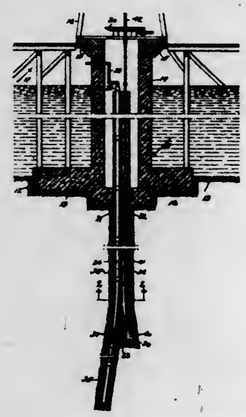


1. An anvil comprising an exteriorly cylindrical base, a conical body above said base, a projection at the apex of said conical body, and spaced ridges extending laterally from said projection.

1,900,160. WIRE SHAPING MACHINE. JOSEPH CIPKO, New York, N. Y. Filed Jan. 20, 1932. Serial No. 587,628. 9 Claims. (Cl. 153—46.)

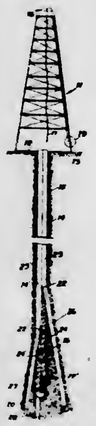
1. A wire shaping machine, comprising a base member, a pair of levers swivelly mounted on the base member upon a common axis, a bending disc eccentrically swivelly mounted on said axis, means for holding said bending disc in various adjusted positions, a starting blade radially adjustable on said base member relative to the axis of said levers, a bending blade adjustably mounted on one of said levers for acting against the edge of the bending disc, a second bending blade adjustably mounted on the other lever for operating against the first bending blade to bend a wire away from the bending disc, and means for limiting pivoting of said lever.

1,900,161. SPOT WELDING. MORRIS J. COHAN, Brooklyn, N. Y. Filed Feb. 15, 1930. Serial No. 428,716. 2 Claims. (Cl. 219—10.)



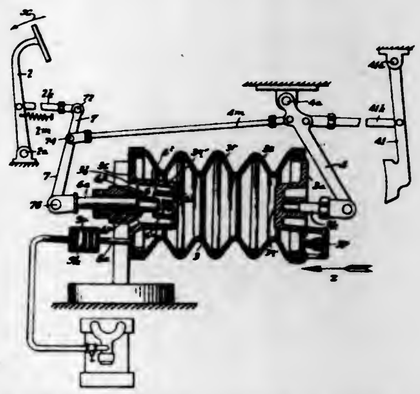
1. That process of spot welding a pair of superposed contacting work pieces by pressing the work sheets together at a definite locality and passing through the locality from one piece to the other an electrical current of sufficient amperage and for a sufficient time to weld the contacting portions together at the spot, which is characterised by the step of forming, simultaneous with the welding, a protrusion on one of the work pieces of such dimensions that contraction during cooling will render the surface of the metal protruded coplanar with the surrounding metal.

1,900,162. ZINC-META-ARSENITE. LEO P. CURTIN, Cranbury, N. J., assignor to Curtin-Howe Corporation, New York, N. Y., a Corporation of New York. Filed June 21, 1930. Serial No. 462,941. 5 Claims. (Cl. 92—21.)



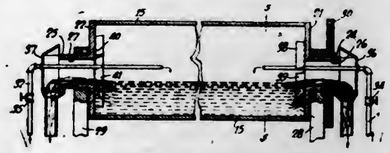
1. Method of making wallboard or like article comprising precipitating zinc-meta-arsenite in the presence of a plant fiber, and shaping and drying the fiber.

1,900,163. METHOD AND APPARATUS FOR DRILLING OIL WELLS. DREXLER DANA, Santa Barbara, and FRANK A. MORGAN, Beverly Hills, Calif. Filed May 2, 1931. Serial No. 534,481. 13 Claims. (Cl. 255—1.)



1. A well drilling method which comprises: drilling a comparatively shallow large diameter bore hole; placing a partitioned conductor pipe in said bore hole; and drilling a plurality of small diameter bore holes in the compartments formed by the partition in said conductor pipe.

1,900,164. METHOD AND APPARATUS FOR DRILLING OIL WELLS. DREXLER DANA, Santa Barbara, and FRANK A. MORGAN, Beverly Hills, Calif. Filed July 5, 1932. Serial No. 620,826. 15 Claims. (Cl. 255—1.)



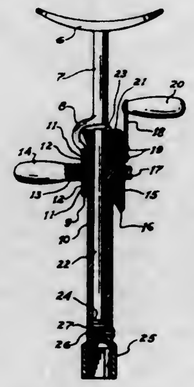
1. A well drilling method which comprises: drilling a large diameter bore hole; partitioning said hole to form a plurality of longitudinal chambers; and drilling small diameter bore holes at different elevations from said chambers.

1,900,165. POWER TRANSMISSION MECHANISM. GÉRARD DE MONGE, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli, Societa Anonima, Milan, Italy. Filed Dec. 23, 1927, Serial No. 242,178, and in Belgium Dec. 30, 1926. 1 Claim. (Cl. 121—41.)

The transmission system comprising an actuated member, an actuating member, a direct connection between said members, means enclosing a chamber of variable volume having a movable end connected to the actuated member, means providing a conduit from said chamber to the intake of an internal combustion engine, said chamber also having communication with the atmosphere, a device for controlling said communication and connected to the actuating member, said device including a needle valve, a spring maintaining the valve normally open, a floating lever for actuating said valve against the spring, said lever forming part of the connection between said members, means in said conduit for influencing the suction of the engine therethrough and an automatic independently operating valve to vent said chamber.

1,900,166. DRIER HEAD. LAWTON A. DIX, New York, N. Y. Filed May 10, 1930. Serial No. 451,437. 12 Claims. (Cl. 34—4.)

1. In a paper making machine, a revolving roll having relatively large side journals on each end thereof, said journals having openings extending to the interior of the said roll, means, for introducing a cooling medium into said roll through said journals, and means extending part way from a journal to the circumference of the roll for extracting a quantity of said medium through one of said journals, the quantity of said medium passing into and out of said roll being sufficient to at all times create a predetermined amount of moisture on the exterior surface of said roll.

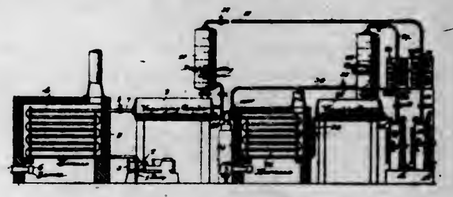


1,900,167. DIFFERENTIALLY COLORING FABRIC AND PRODUCT THEREOF. CAMILLE DREYFUS, New York, N. Y., and GEORGE RIVAT, Paterson, N. J., assignors to Celanese Corporation of America, a Corporation of Delaware. Filed Apr. 13, 1929. Serial No. 354,982. 6 Claims. (Cl. 8—5.)

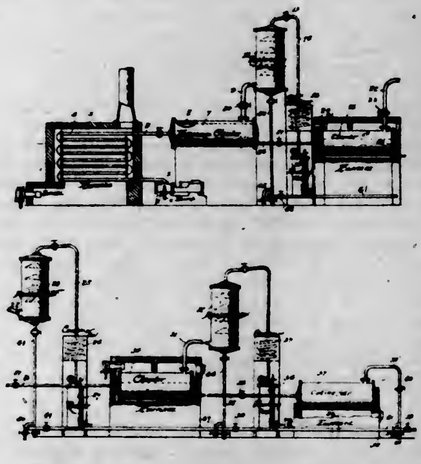
1. Method of producing differential colored effects on fabrics containing organic derivatives of cellulose which comprises applying locally to said fabric a paste comprising a reducing agent, an alkali, a swelling agent for the cellulose derivative and a pigment and subsequently treating the fabric with a paste containing an aniline black base and an oxidizing agent and then steaming the fabric.

1,900,168. DYEING OF TEXTILE MATERIAL WITH VAT DYES. CAMILLE DREYFUS, New York, N. Y., and HERBERT PLATT, Cumberland, Md., assignors to Celanese Corporation of America, a Corporation of Delaware. Filed July 2, 1929. Serial No. 375,571. 7 Claims. (Cl. 8—5.)

1. Process of dyeing textile materials which comprises treating said material in a dye bath containing a vat dye, comparatively large amounts of hydrosulphite and small amounts of soda ash.



1,900,169. BREAST WRENCH. JOHN DUDULETZ, Tregarva, Saskatchewan, Canada, assignor of one-half to Stephen Dudulets, Tregarva, Canada. Filed Feb. 24, 1930, Serial No. 430,761. Renewed May 20, 1932. 1 Claim. (Cl. 81—57.)



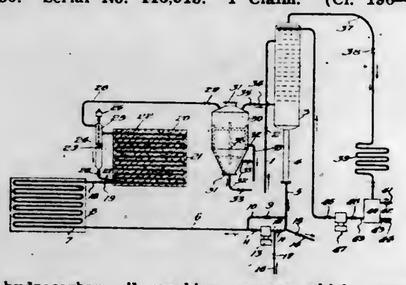
As a new product of manufacture, a breast wrench, including a tube having a pair of diametrically opposed studs extending radially therefrom; a stem carrying an arcuate breast engaging member on one end and having its oposite end curved outwardly and then continued in a parallel plane to the main portion of said stem and mounted on one of said studs; a handgrip secured on said last mentioned stud; auxiliary lugs extended from said tube and into said continued offset end of said stem to prevent turning and twisting of the same on said tube; a driving gear rotatably mounted on the other of said studs; an actuating handle for said driving gear; a shaft rotatable in said tube and having a gear keyed on its upper end within the curved portion of said stem and engaged with said driving gear to be driven by the latter; and a socket member carried on the projecting opposite end of said shaft.

1,900,170. PROCESS AND APPARATUS FOR CONVERTING OILS. GUSTAV EGLOFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Oct. 31, 1921, Serial No. 511,713. Renewed June 9, 1926. 7 Claims. (Cl. 196—49.)

1. A process of converting hydrocarbon oils, consisting in passing the oil in a restricted stream through an initial heating zone, thence to a vapor chamber while under a substantial pressure, refluxing and condensing the generated vapors; passing the unvaporized products and reflux condensate in a restricted stream through a secondary heating zone to a separate vapor chamber, and maintaining higher temperature and pressure conditions in said secondary heating zone and separate vapor chamber adapted to produce further conversion of the unvaporized products and reflux condensate, refluxing and condensing the generated vapors from said separate vapor chamber and returning the reflux condensate to the restricted stream of said secondary heating zone.

1,900,171. PROCESS AND APPARATUS FOR CONVERTING OILS. GUSTAV EGLOFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Oct. 31, 1921, Serial No. 511,902. Renewed Dec. 15, 1928. 8 Claims. (Cl. 196—49.)

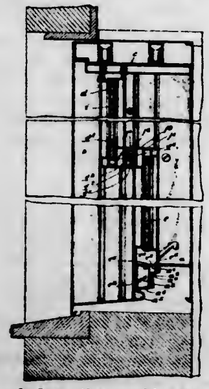
1. A process for converting hydrocarbon oils, consisting in passing the oil in a small stream through a furnace heated to a cracking temperature and thence through a series of vaporizing chambers serially connected and of progressively decreasing pressures, while maintaining a pressure in excess of 500 pounds throughout said chambers, removing, dephlegmating and condensing the generated vapors from each of said chambers, isolating the reflux condensate formed by dephlegmation from the separate vapor chambers, finally reducing the unvaporized product to coke in a coking still.



1,900,172. TREATMENT OF TEXTILE AND OTHER MATERIALS. GEORGE HOLLAND ELLIS, HENRY CHARLES OLPIN, and RALPH CHARLES STORRY, Spondon, near Derby, England, assignors to Celanese Corporation of America, a Corporation of Delaware. Filed June 7, 1930, Serial No. 459,828, and in Great Britain July 4, 1929. 23 Claims. (Cl. 8—5.)

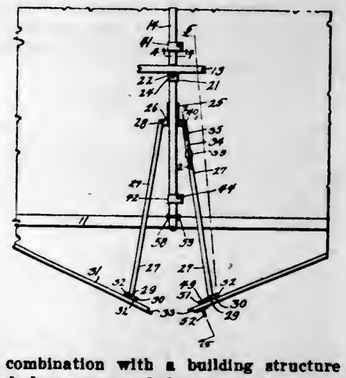
1. Process for the coloration of textile and other materials containing organic derivatives of cellulose comprising applying thereto free leuco compounds of vat dyestuffs.

1,900,173. BRIQUETTE AND PROCESS OF MANUFACTURE. ALBERT A. EPSTEIN, New York, N. Y. Filed Mar. 25, 1931. Serial No. 525,837. 12 Claims. (Cl. 44—15.)



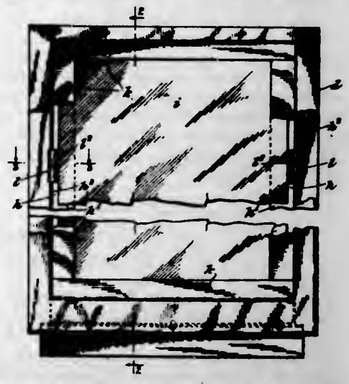
1. A method of producing fuel briquettes which consists in mixing coffee residue with an inflammable binding fluid and pressing into briquette shape.

1,900,174. HYDROCARBON OIL CONVERSION. OSCAR H. FAIRCHILD, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Continuation of application Serial No. 191,676, filed May 16, 1927. This application filed Apr. 24, 1930. Serial No. 446,915. 1 Claim. (Cl. 196—51.)



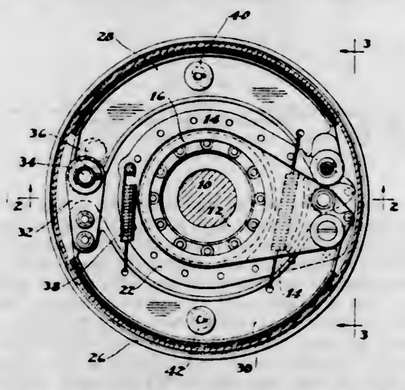
A hydrocarbon oil cracking process which comprises flowing the oil in an elongated stream of restricted cross-sectional area through a heating zone and heating the same therein to cracking temperature under pressure, thence circulating the thus heated oil, substantially without further application of heat thereto, through a soaking zone in a heat insulated stream of restricted cross-sectional area at a temperature near that at which the heated oil left the heating zone, effecting substantial conversion of the oil during such circulation thereof through the soaking zone, then removing the converted oil from the soaking zone and splitting the same into two sections, injecting one of said sections into the hot oil stream passing from the heating zone to the soaking zone in the direction of flow of the heated oil and under sufficient velocity to substantially prevent carbon precipitation from the oil while circulating through the soaking zone, introducing the other of said sections of converted oil into a separating zone and separating the same therein into vapors and residue, and dephlegmating and condensing the separated vapors.

1,900,175. METAL WINDOW. ALPHONSUS FINN, New York, N. Y., assignor to S. H. Pomeroy Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 18, 1931. Serial No. 531,173. 4 Claims. (Cl. 189—72.)



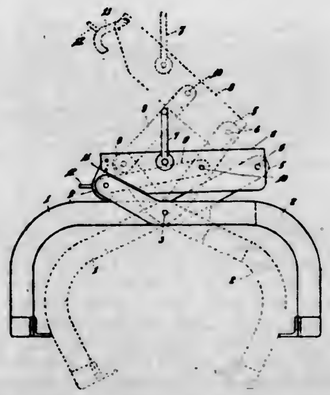
1. In a metal window, the combination of an upper sash of sheet metal having one edge portion of its meeting rail member turned inward at the bottom and then turned upward obliquely and having the other free edge portion carried inward beyond the first named portion and then turned upward, and a lower sash of sheet metal having one edge portion of its meeting rail member turned outward at the top and then turned downward obliquely and having the other free edge portion carried outward beyond the first named portion and then turned downward.

1,900,176. DUAL DOOR CONTROL. WALTER H. FLEWELL, Sioux City, Iowa. Filed Nov. 3, 1930. Serial No. 493,006. 4 Claims. (Cl. 268—62.)



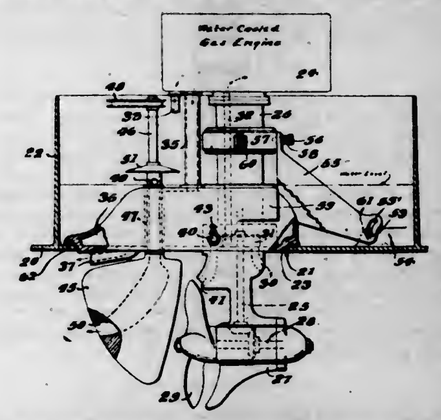
1. In combination with a building structure provided with dual doors mounted for opening movement in opposite directions, a rail attached to the building structure and supported in a position parallel to and near the horizontal plane of the upper edges of the door, and perpendicular to the plane of the doors when closed, a knuckle slidably attached to the rail, a pair of bars each pivoted at one end to the knuckle and at its other end to a respective door whereby one door when moved will transmit similar movement to the other, and latch devices attached to one of the bars and to the rail respectively for securing the doors in certain positions, the latch element on the bar including an engaging portion which is co-axial with the pivot between its bar and the knuckle.

1,900,177. METAL WINDOW. ALPHONSUS FINN, New York, N. Y., assignor to S. H. Pomeroy Company, Inc., New York, N. Y., a Corporation of New York. Original application filed Apr. 18, 1931, Serial No. 531,173. Divided and this application filed Oct. 17, 1931. Serial No. 569,414. 2 Claims. (Cl. 189—78.)



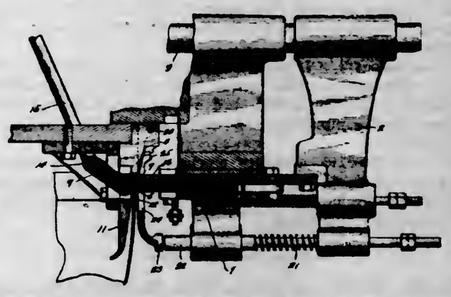
1. In a metal window, the combination of a sash, a glazing angle formed with a bend between the edge of the glass and the sash member and with a portion to overlap the glass and a spring clip engaged with the sash member and having a bent portion also interposed between the edge of the glass and the bent portion of the glazing angle, such bent portion of the spring clip forming a seat for the edge of the glass and cooperating with the glazing angle to retain both in place.

1,900,178. BRAKE. FREDERICK C. FRANK, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Oct. 13, 1930. Serial No. 488,224. 4 Claims. Cl. 188—78.)



1. A brake structure comprising an annular support having a torque reaction projecting portion at one side thereof, an outboard bearing support on the projecting portion, a backing plate secured to and supported by said support and forming a subassembly therewith, and a friction element supported by the torque reaction member.

1,900,179. GRAB. JOSEPH GEIST, Kraiburg-on-the-Inn, Germany. Filed Aug. 19, 1931, Serial No. 558,085, and in Germany Dec. 3, 1930. 2 Claims. (Cl. 294—118.)

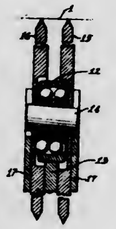


1. In a grapple of the character described, the combination of a pair of jaws pivotally connected together, each jaw having an upper arm projecting beyond the pivotal connection, the upper arm of one jaw being longer than the upper arm of the other jaw, a link pivotally connected to the free end of the longer arm, a second link pivotally mounted at one end on the free end of the shorter arm and at the opposite end to the first link at a point spaced from the pivoted end thereof approximately the length of the shorter arm, and a shackle mounted on the first link at a point beyond the pivotal connection thereof with the second link, whereby in any position of the jaws the pivotal points of the shackle and jaws will always fall along the longitudinal axis thereof and maintain the grapple in a true upright position.

1,900,180. MOTOR BOAT INSTALLATION. JAMES WILLARD HARVEY, Winthrop, Me. Filed Dec. 24, 1931. Serial No. 582,980. 20 Claims. (Cl. 115—41.)

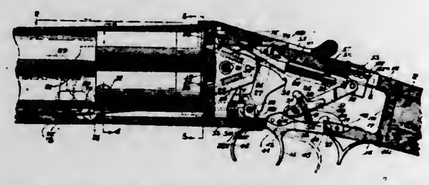
1. A boat attachment comprising a casing to be secured in the bottom of the boat and having an opening in its bottom, a plate fitting this opening in the casing, a propeller carried by said plate, a rudder carried by said plate, means for turning said rudder for steering independently of the movement of the propeller and pivoted means for supporting said plate in the casing to permit the propeller and the rudder to be simultaneously tilted and retracted into said casing.

1,900,181. BASKET HANDLE MACHINE. LESLIE M. HILL, Benton Harbor, Mich. Filed Aug. 17, 1931. Serial No. 557,518. 18 Claims. (Cl. 140—93.)



1. In a machine for inserting a wire handle in the rim of a basket, the combination of driving means for inserting the handle ends through the basket rim, clinching mechanism having clinchers for receiving the wire ends and bending and deflecting these ends back toward the upper edge of the basket and through the rim of the basket and against the driver, whereby to clinch the final ends of the wire handle against the side of the basket rim.

1,900,182. METALLIC ALLOY. DANIEL D. JACKSON, Brooklyn, N. Y., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed Nov. 28, 1930. Serial No. 498,755. 5 Claims. (Cl. 102—26.)

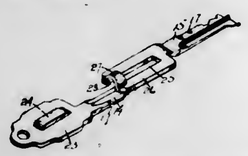


1. As an article of manufacture, lead shot which has been rendered non-poisonous to animals by the incorporation therein of phosphor tin.

1,900,183. SLITTING DEVICE. ROBERT MCC. JOHNSTONE, Short Hills, N. J., assignor to Cameron Machine Company, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 14, 1932. Serial No. 605,144. 7 Claims. (Cl. 164—70.)

7. In a slitting device: backing means, two rotatable score-cut slitters, to engage the backing means, arranged side by side in spaced relation; side cheeks confining the outer sides of the slitters; a member extending intermediate the slitters; a self-alining anti-friction bearing the outer race of which is carried by the intermediate member; and a pintle, loosely supporting both slitters, secured in the inner race of the bearing and tiltable and rotatable in the side cheeks.

1,900,184. FIREARM. CRAWFORD C. LOOMIS, Ilion, N. Y., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed Jan. 26, 1931. Serial No. 511,190. 19 Claims. (Cl. 42—41.)

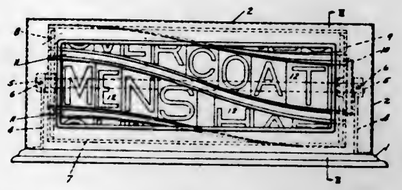


2. In a multiple chamber firearm, a pair of similar firing hammers pivoted on a common pivot shaft and a supporting bearing for said pivot shaft located between said hammers.

7. In a firearm, a frame plate, a bearing member secured in an aperture in said plate and extending inwardly therefrom, a trigger guard, and means for attaching said trigger guard comprising a threaded opening in said bearing member.

13. In a firearm, a safety mechanism having a "safe" position and a "firing" position, and means for setting said safety mechanism in firing position and preventing its movement therefrom.

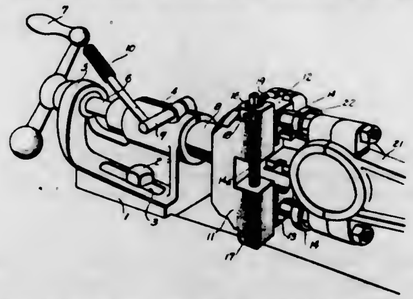
1,900,185. LOCK. GEORGE A. LONG, Hartford, Conn., assignor to The Long Security Lock Company, Hartford, Conn., a Corporation of Connecticut. Original application filed Nov. 18, 1927, Serial No. 234,258. Divided and this application filed May 16, 1930. Serial No. 452,938. 2 Claims. (Cl. 70—72.)



1. A lock including a key receiving controller member, locking elements therefor, a bolt and locking elements therefor, said parts being adapted to be operated by a two-part key having one part operable to release said controller member locking elements for movement of the controller to its advanced position and the other operable to release said locking bolt locking elements, said lock also including means to permit removal of one of said key parts with the controller member in its advanced position after it has been moved from its key entrance position.

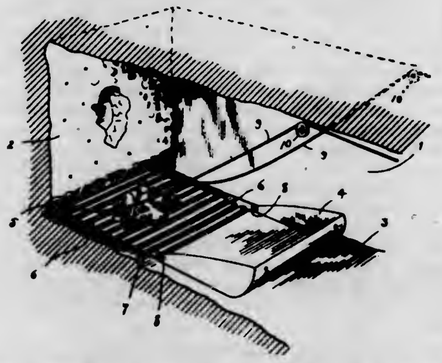
1,900,186. LAWN MOWER SHARPENER. WILLIAM L. MARLING, Weimar, Calif. Filed Mar. 9, 1931. Serial No. 521,189. 1 Claim. (Cl. 76—82.1.)

In a tool holder of the kind described, a two piece assembly including a shaft rest and a file holding clip, the same being of relatively thin strip material and associated together and arranged for adjustment upon their longitudinal axes, the said shaft rest including a shaft engaging stirrup and a handle, and the said file holding clip including a handle at its outer end aligned with the handle of the shaft rest, a portion of the said clip inwardly of the handle portion thereof being raised to form a slotted cam seat, a lock cam operatively mounted within the said cam seat, and a handle extended from the lock cam out through the slot thereof, the said handle being arranged to lie flat to the file holding clip when in its locking position, whereby it may be readily held down to its locking position by the operator in the act of grasping the handle portion of the file holding clip.



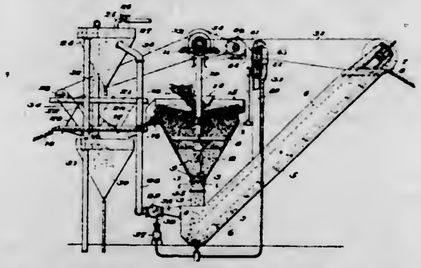
1,900,187. ADVERTISING DEVICE. GUSTAVE O. MATTER, Portland, Oreg. Filed July 10, 1931. Serial No. 549,869. 5 Claims. (Cl. 40—68.)

1. In a display device, a display drum continually rotating about its axis, a casing normally concealing said drum and provided with a view aperture whose major dimension from one end to the other parallels the axis of said drum, said drum having guides located upon its periphery, each guide being obliquely disposed with regard to an intersecting radial plane, including means for each adjacent pair of guides to hold a line of display matter therebetween, and the obliquity of the guides causing each display line to pass before the view aperture in the order that it is to be read, commencing with one end thereof and continuing to the other end.



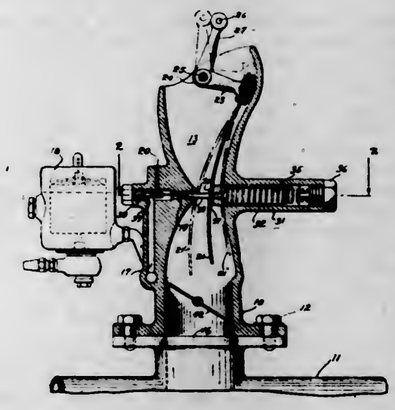
1,900,188. CHUCK. HERMAN T. MATTERN, Kansas City, Mo., assignor to Hempy-Cooper Manufacturing Company, Kansas City, Mo., a Corporation of Missouri. Filed Feb. 13, 1930. Serial No. 428,043. 2 Claims. (Cl. 77—62.)

1. In a chuck for holding the crank shaft end of a connecting rod during machining of the bearing, the combination including a support, a head rotatably mounted in said support, means for advancing and retracting said head along the axis of rotation, a plurality of carriers



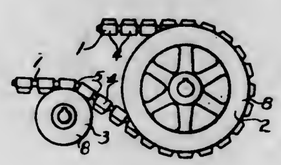
slidably mounted in said head, stops positioned in said carriers, and means to vary the distance between said stops.

1,900,189. SCRAPER. ROBERT J. MCGHEE, Virginia, Minn. Filed Aug. 28, 1931. Serial No. 559,841. 1 Claim. (Cl. 262—5.)



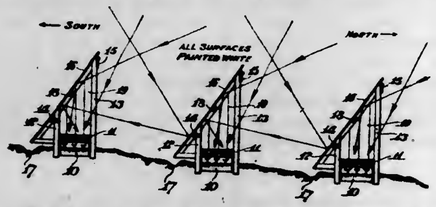
The combination with a mucking scraper, of a flexible apron for initially receiving the muck which is ultimately lodged in the scraper, means for attaching adjacent corners of the scraper and apron together, and means at the corners of the opposite end of the apron for rolling it backwardly towards the scraper.

1,900,190. METHOD OF AND APPARATUS FOR SEPARATING MATERIALS OF DIFFERENT SPECIFIC GRAVITIES. WILLIAM C. MENZIES, Scranton, Pa. Filed Aug. 22, 1931. Serial No. 558,812. 21 Claims. (Cl. 209—160.)



1. A method of separating materials of at least two different specific gravities from a mixture containing them which comprises feeding said mixture to a column of water, effecting such an hydraulic state of said column by movement of the water therein as to produce a hindered settling of the materials of the second lowest specific gravity in said column and a floating of the materials of the lowest specific gravity thereabove to a position of discharge, and so changing the hydraulic state of said column by reduction of the movement of the water therein as the density of the fluid mass in the column increases as to produce a sufficiently free settling to prevent the materials of said second lowest specific gravity from being discharged with the materials of the lowest specific gravity.

1,900,191. CHARGE FORMING DEVICE. FRANK C. MOCK, East Orange, N. J., assignor to Bendix Aviation Corporation, South Bend, Ind., a Corporation of Delaware. Filed July 28, 1930. Serial No. 471,342. 13 Claims. (Cl. 261—50.)



1. A carburetor comprising a casting having an air intake passage therethrough, a fuel supply within said carburetor, means for connecting said fuel supply with said air passage, a flexible member disposed within said passage and adapted to conform to one wall of the passage, the flexible member having one free end responsive to suction for automatically varying the cross-sectional area of said air passage in the plane of said connecting means, and manual means for actuating the said flexible member.

1,900,192. DUPLEX LINK BELT. FRANK L. MORSE, Ithaca, N. Y., assignor to Morse Chain Company, Ithaca, N. Y., a Corporation of New York. Filed Dec. 6, 1930. Serial No. 500,465. 8 Claims. (Cl. 74—64.)

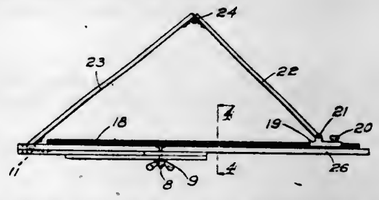
1. In a link belt for power transmission, the combination of tension links, structural members, joints connecting the tension links and structural members, and an external metallic casing having a pair of V type driving faces converging in one direction and an inverted pair of V type driving faces converging in the other direction.

1,900,193. PROMOTING PLANT GROWTH. GEORGE G. NEARING, Chadds Ford, Pa. Filed Oct. 8, 1931. Serial No. 567,567. 9 Claims. (Cl. 47—26.)

1. Means for promoting plant growth comprising a structure arranged adjacent a plant bed adapted at all times to shield the plant bed from the direct rays of the sun and having surfaces arranged to reflect indirect rays of the sun toward the plant bed.

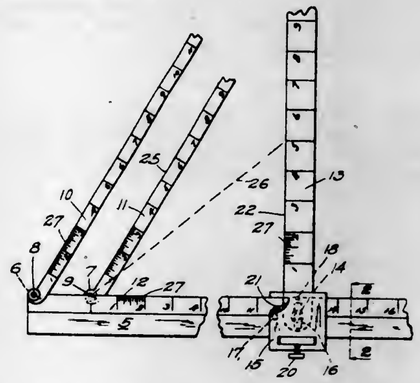
1,900,194. HOISTING BLOCK. MATTI NIEMI, Seattle, Wash. Filed Nov. 9, 1931. Serial No. 573,912. 10 Claims. (Cl. 294—83.)

1. In apparatus of the character described, a frame providing a chamber open at its lower end to form a throat the side walls of which are parallel, the end walls of said chamber converging downwardly toward said throat, a pair of fulcrum pins supported by said frame and located at opposite sides of a transverse vertical center line taken through said throat, a pair of lever arms fulcrumed approximately medially of their lengths on said pins, the lower ends of said lever arms providing companion jaws adapted to engage the work and the upper portions providing power arms for closing said jaws, said power arms arranged for normal engagement against said chamber end walls, a wedge member supported in said chamber for vertical movement in the space between said power arms, rollers supported by said wedge for tracking engagement with said power arms, a spring serving to depress said wedge for actuating said power arms outwardly to normally compress said jaws, a spring oppositionally arranged thereto for spreading said jaws responsive to retraction of said wedge, a bail secured to said frame for elevating the same, and a control line operatively engaging said wedge for retracting the same in opposition to said first named spring.



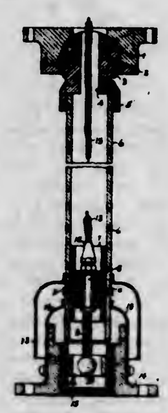
1,900,195. SCREW LOCKING ELEMENT. CARL G. OLSON, Chicago, Ill., assignor to Shakeproof Lock Washer Company, Chicago, Ill., a Corporation of Delaware. Filed July 31, 1930. Serial No. 471,973. 1 Claim. (Cl. 173—269.)

A locking element formed from a single strip of wire stock including an outer annular section, an inner annular section, the outer periphery of the inner section being positioned adjacent the inner periphery of the outer annular section, work engaging teeth associated



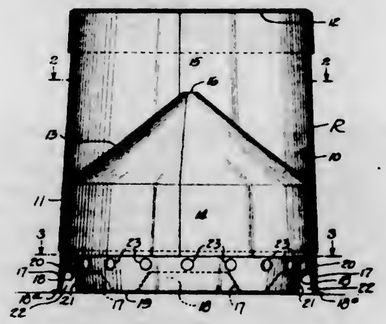
with said annular sections and projecting out of the plane thereof, and binding material interposed between the adjacent annular surface of said annular sections.

1,900,196. ROOFER'S GAUGE. WILLIAM E. PACK, Oakland, Calif. Filed July 28, 1930. Serial No. 471,229. 4 Claims. (Cl. 33—98.)



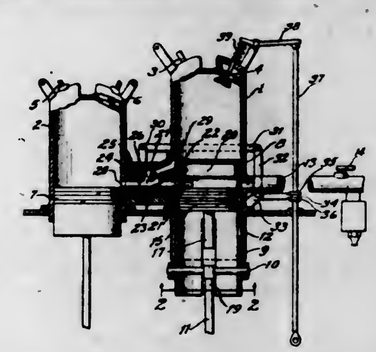
3. A gauge comprising a main straight-edge, a track extending longitudinally of and secured to the top surface thereof, a shoe slidable on said track, securing means for said shoe, a strut having one end pivoted to said shoe, a second straight-edge having one end pivoted to the other end of said strut, the other end of said second straight-edge being pivotally connected to one end of said main straight-edge and adapted to fold against the undersurface thereof, a pair of oppositely disposed arms each having one end pivotally secured to the undersurface of said main straight-edge adjacent one end and operating in a plane at right angles to said second straight-edge, and an adjustable strut for each of said arms.

1,900,197. PITCH GAUGE. WILLIAM E. PACK, Oakland, Calif. Filed Sept. 8, 1930. Serial No. 480,406. 6 Claims. (Cl. 33—97.)



5. A pitch gauge comprising a run scale having a graduated edge, a carrier slidably mounted on said run scale, means for securing said carrier in adjusted position on said run scale, a rise scale secured at one end to said carrier perpendicular to said run scale, a hip scale pivotally mounted at one end of said run scale, a slope scale pivotally mounted intermediate said hip scale and said rise scale.

1,900,198. STANCHION SWITCH. ABRAM F. PAUL, Llanerch, Pa., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed July 29, 1931. Serial No. 553,757. 5 Claims. (Cl. 200—52.)

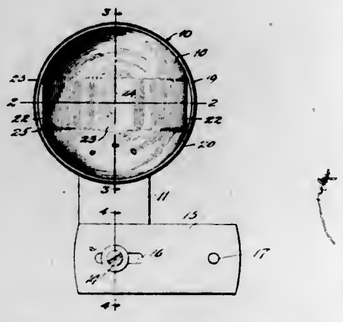


1. A combined stanchion and switch for vehicles, comprising a roof plate, a hand grasp tube, means for securing the upper end of the tube to the roof plate to permit transverse movement of the lower end of the tube in any direction, a resiliently mounted contact secured to the tube, a floor plate, a contact mounted on and insulated from the floor plate in a position to be engaged by the first contact when the tube is displaced, resilient means for normally holding the contacts out of engagement, and a protecting skirt enclosing the lower end of the tube and the upper end of the floor plate.

1,900,199. INSECT TRAP. ANGELO C. PICKETT, Riverside, Calif. Filed Nov. 10, 1930. Serial No. 494,722. 4 Claims. (Cl. 43—107.)

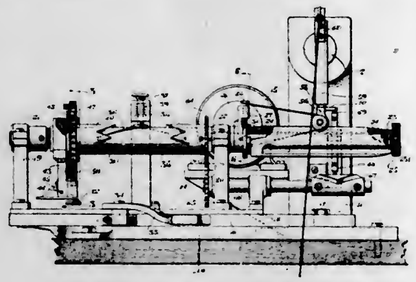
1. An insect trap comprising a receptacle including a frusto conical section closed at its smaller end and open at its larger end, a second frusto conical section frictionally fitting into the larger end of the first section and terminating at its smaller end in a conical portion constituting a partition for dividing the receptacle into a lower bait compartment and an upper trapping compartment, said conical portion having an aperture at its apex through which flies are free to enter the trapping compartment from the bait compartment, the larger end of the second section having feet providing spaces therebetween through which flies are free to pass, and a bait holder in the bait compartment closing the lower end of the latter and having entrance openings through which the flies are free to enter the bait compartment to feed.

1,900,200. SUPERCHARGER. GUY R. POYER, Wichita, Kans. Filed Feb. 21, 1930. Serial No. 430,265. 4 Claims. (Cl. 123—75.)



1. A four-cycle internal combustion engine comprising two cylinders, each having an inlet valve and an outlet valve at one end, pistons in the cylinders, the piston in one cylinder having an elongated skirt provided with port openings to register with port openings in the cylinder below the piston head, a stationary wall inside the piston skirt to form an auxiliary fluid chamber, means for admitting fluid into the auxiliary chamber, a valve body having a passage-way to communicate the auxiliary chamber in one cylinder with the combustion chamber of the other cylinder at the end thereof distant from the inlet valve and the outlet valve, said valve body having a branch passage-way communicating with the auxiliary chamber and with the combustion chamber of the first named cylinder at the end distant from the inlet valve and the outlet valve and a valve in the valve body for alternately establishing communication between the auxiliary chamber and the respective cylinders.

1,900,201. EYE CUP. SOLOMON M. SAGER, Evanston, Ill. Filed Jan. 10, 1930. Serial No. 419,772. 1 Claim. (Cl. 128—249.)



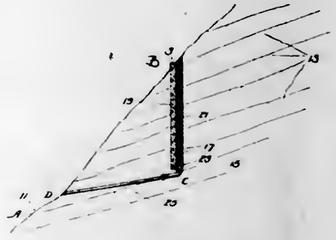
An eye treating device comprising a cup for carrying an eye treating solution, a check valve mechanism connected with the cup and opening to an upward stream of air and stopping any downward flow of the solution, and an air bulb connected with the check valve mechanism adapted to be compressed to open the check valve mechanism and cause air to pass upwardly through the solution to agitate the same.

1,900,202. REFLECTOR. ERNEST E. SCOTT, Denver, Colo., assignor to The Dangerlite Corporation of America, Denver, Colo., a Corporation of Colorado. Filed Mar. 14, 1931. Serial No. 522,611. 4 Claims. (Cl. 88—1.)

2. A reflector having a concave reflecting surface divided into three superposed zones of which the central zone is formed on an open curve in which any point lies in a vertical plane tangent to the surface of said zone at that point, the top and bottom zones merging with the central zone and constituting sectors of the frustum of a cone.

1,900,203. CHECKERING MACHINE. RICHARD J. SEILER, Ilion, N. Y., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed Apr. 3, 1931. Serial No. 527,461. 15 Claims. (Cl. 144—138.)

1. In a machine of the character described, a fixed cutting tool support, a cutting tool carried by said support, a work supporting arbor adapted to hold a piece of work in cooperative relation to said cutting tool, work rotating and traversing means comprising a rotation controlling sleeve associated with said arbor, and work rotation and traverse limiting means comprising a pattern controlling sleeve associated with said rotation controlling sleeve.

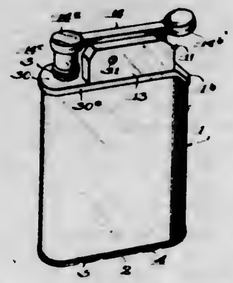


11. In a machine of the character described, a cutting tool, a work supporting arbor adapted to hold a piece of work in cooperative relation to said cutting tool, means for causing said tool to cut a pattern on said work comprising a rotation and traverse controlling sleeve associated with said arbor and comprising a guide groove, a pattern controlling sleeve surrounding said rotation controlling sleeve and comprising an aperture of a configuration corresponding to the desired pattern, movement limiting means comprising an element extending through the aperture in the pattern controlling sleeve and entering the guide groove in the rotation controlling sleeve, means normally effective to couple the rotation controlling sleeve and the pattern controlling sleeve together, and means for indexing said rotation controlling sleeve relative to said pattern controlling sleeve.

1,900,204. COUPLER FOR TOY RAILWAY CARS. JEFFERSON M. SHARP, Oil City, Pa. Filed July 10, 1931. Serial No. 549,877. 1 Claim. (Cl. 213—89.)

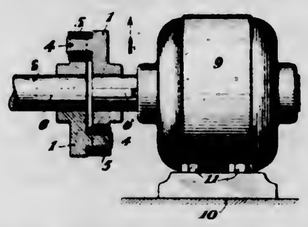
A coupler for toy cars which is a substantially unitary structure composed of sheet metal, structurally rigid throughout, for cooperation with a counterpart coupler upon another car, its engagement with said counterpart coupler being effected and maintained by the action of gravity, said structure comprising a head of bifurcate formation, one of the branches of which is a straight, horizontally-extending member the flat sides of which are vertically disposed and provided upon its lower edge adjacent its free end with a hook for engagement with an engageable member of such counterpart coupler, the other of said branches having its flat sides likewise vertically disposed, its rearward portion being parallel with and spaced laterally from said first branch with its forward free end portion diverging laterally from said first branch, a member extending across said spaced portion for engagement of the hook of said counterpart coupler, said bifurcate structure being formed into a rearwardly extending shank adapted for attachment to the center pin of the truck of a car.

1,900,205. EARTHWORK AND METHOD OF MAKING SAME. CLARENCE O. SHERRILL, Cincinnati, Ohio. Filed Nov. 1, 1930. Serial No. 492,681. 16 Claims. (Cl. 61—39.)



1. Earthwork construction for preventing landslides and the like comprising a trench formed in the hillside to isolate a prism of earth in front of the trench and means in the trench for preventing moisture from the upper hillside from saturating the isolated prism, said means including a wall substantially impervious to moisture for the purpose of backing up sub-surface moisture and directing same to the bottom of the trench, and means in said trench for carrying off the accumulated water therein.

1,900,206. ELECTRIC RESISTANCE. ISIDOR SILBERSTEIN, Berlin, Germany. Filed June 28, 1929, Serial No. 374,376, and in Germany June 30, 1928. 5 Claims. (Cl. 201—63.)

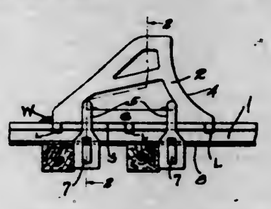


1. A resistance, comprising a rod, a metallic cap carried by said rod and in electrical connection therewith and formed with a groove, and a lead embedded in said groove and having the wall of the groove pressed into engagement therewith.

1,900,207. POCKET LIGHTER. HERBERT S. STRAUSSER, Chicago, and HENRY T. REYNOLDS, Lombard, Ill., assignors to Otis Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Nov. 27, 1929. Serial No. 410,028. 2 Claims. (Cl. 67—7.1.)

1. In a lighter, the combination of a casing having a wick standard extending beyond one end thereof, a pair of parallel webs projecting from said end of the casing, ignition mechanism mounted between said webs, a cover plate fitting over the end of said casing, and a pair of side plates secured to the outer faces of said webs and bearing at their lower edges upon said cover plate, the latter being initially bowed whereby upon the application of said side plates the same is placed under tension for the purpose described.

1,900,208. COUPLING. REHL W. SWANK, Sharpsville, Pa., assignor to Sharpsville Boiler Works Co., Sharpsville, Pa., a Corporation of Pennsylvania. Filed Oct. 18, 1930. Serial No. 489,603. 2 Claims. (Cl. 64—96.)



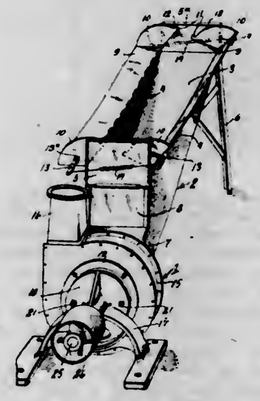
1. An article of manufacture comprising a coupling member having a head adapted to be mounted upon a shaft, said head being provided on one side with an open slot extending radially of said head relative to the axis on which said shaft is adapted to be mounted, a projection on said head and extending parallel to said shaft and diametrically opposed to said open slot, said projection and said slot being adapted to cooperate with the slot and a projection of an identical coupling member to transmit power through said projection and slot connection.

1,900,209. METHOD OF MANUFACTURING PURE PARA-HYDROXYCAMPHOR. KENZO TAMURA, Iriarai-Cho, GYOKUJO KIHARA, Suna-Machi, YASUHIKO ASAHINA, Tozuka-Cho, and MORIZO ISHIDATE, Suginami-Cho, Japan. Filed Apr. 10, 1931, Serial No. 529,288, and in Japan Apr. 25, 1930. 2 Claims. (Cl. 260—133.)

1. A method of manufacturing para-hydroxycamphor from a compound of campherol and glucuronic acid excreted in the urine of living bodies to which camphor has been given internally, characterised by the fact that the compound is transformed into a precipitate of a plumbic compound by the addition of lead acetate with ammonia, and the said precipitate is resolved with dilute acids into camphorol, which is treated with benzene in order to liberate and purify the desired substance.

1,900,210. WHEEL STOP. ARNOLD H. TOLD, Chicago, Ill. Filed July 30, 1932. Serial No. 626,885. 12 Claims. (Cl. 104—258.)

1. In a device of the class described, a body part constructed to sit on top of a rail and to engage a car wheel, and means for holding said part to the rail including a wedge structure disposed to underlie the rail.

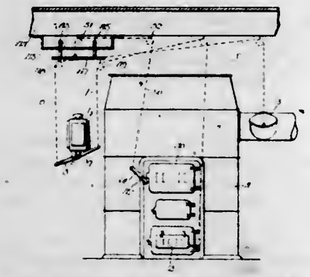


1,900,211. FIRE RESISTANT AND PRESERVATIVE COMPOSITION. JOSEPH RIGBY WATSON, San Francisco, Calif., assignor to Virginia Louise Watson, San Francisco, Calif. Filed July 18, 1928. Serial No. 293,784. 11 Claims. (Cl. 134—45.)

1. A fire resistant and preservative composition comprising a substance of the group consisting of cryolite and an alkali metal fluosilicate, an alkali metal silicate, and an oil vehicle.

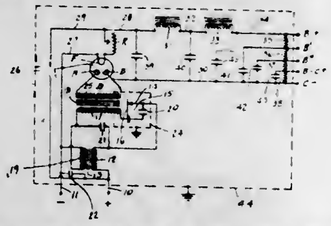
1,900,212. FIRE RESISTANT AND PRESERVATIVE COMPOSITION AND PROCESS FOR MAKING SAME. JOSEPH RIGBY WATSON, San Francisco, Calif., assignor to Virginia Louise Watson, San Francisco, Calif. Filed July 18, 1928. Serial No. 293,785. 4 Claims. (Cl. 134—45.)

1. A fire resistant and preservative composition comprising the products resulting from the combination of a water soluble metal sulfate, water, an alkali metal silicate, and a substance of the group consisting of cryolite and an alkali metal fluosilicate.



1,900,213. GRAIN HANDLING DEVICE. OSCAR A. WENBERG, Batavia, Ill., assignor to United States Wind Engine & Pump Company, Batavia, Ill., a Corporation of Illinois. Filed Aug. 2, 1930. Serial No. 472,730. 2 Claims. (Cl. 302—37.)

1. A grain handling device comprising a centrifugal blower fan, a blower casing for said fan, a discharge conduit leading from said casing, a shaft for the blower fan, a bearing bracket for said shaft having a swivel connection with one side of the fan casing, an open-top in-

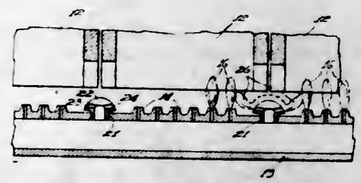


clined gravity inlet chute having a swivel connection with the other side of the fan casing, and a support secured to the chute for holding it in inclined position, whereby the bearing bracket supports one side of the fan casing and the chute supports the other side of the fan casing and whereby the fan casing is suspended by and swiveled between the supporting bracket and the supporting chute.

1,900,214. DRAFT CONTROLLER. ALBERT M. WILKINS, Chicago, Ill., assignor to Cook Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 16, 1931. Serial No. 509,177. 4 Claims. (Cl. 236—16.)

1. An automatic control for operating the draft damper and check damper of a furnace comprising, in combination, a motor, a thermostat responsive to temperature variations for controlling the operation of the motor, a damper actuating member adapted to be operated by the motor to control the dampers, flexible connections between the damper actuating member and the dampers, a support mounted substantially above the motor and the dampers, a member mounted for reciprocal movement in said support, pulleys upon the reciprocal member over which the flexible connections extend from the dampers to the damper actuating member, and a flexible connection for holding the reciprocal member in the support adapted to raise and lower the same depending upon the position of the fire door of the furnace.

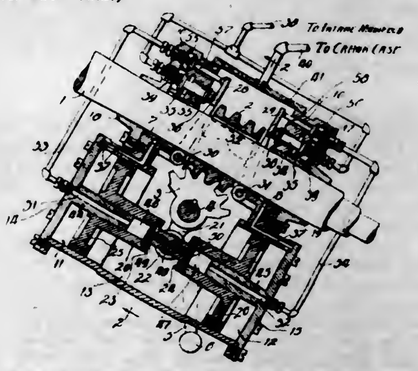
1,900,215. VOLTAGE TRANSFORMING APPARATUS FOR DIRECT CURRENT. CHESTER C. WILSON, Alexandria, Ind. Filed Apr. 25, 1930. Serial No. 447,404. 4 Claims. (Cl. 171—97.)



1. Transforming apparatus for producing a high voltage direct electromotive force from a relatively low voltage direct current supply including a transformer having primary and secondary windings, a source of low voltage direct current, a primary electrical circuit including said current source and said primary winding, means for repeatedly interrupting the current flow in said primary circuit for inducing an alternating electromotive force in said secondary winding, said electromotive force at the breaking of said circuit being unequal to that at the making thereof, whereby one terminal of said winding reaches a lower average potential than the other, a thermionic rectifier, a plate electrode in said rectifier connected to each of the terminals of said secondary winding, a heated filament in said rectifier for reducing the average potential of said plates by electronic flow from said filament to said plates, an electrical circuit connecting said filament to the secondary winding terminal having the lowest average potential and to its associated plate electrode, and resistance elements included in said circuit for resisting electronic flow therethrough whereby a relatively high direct electromotive force is established in said circuit.

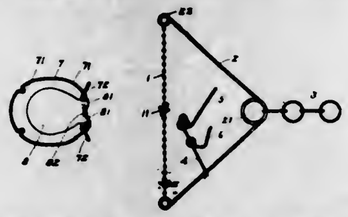
4. Transforming apparatus including a thermionic rectifier, a pair of plate electrodes therein, a filament electrode therein adapted to be heated for electronic emission, a source of direct current for heating said filament, a resistance element interposed between said filament and the high potential terminal of said current supply source, apparatus actuable by a low voltage direct current to impress a relatively high alternating potential upon said plate electrodes, and an electrical circuit connecting one of said plate electrodes and the high potential terminal of said resistance unit.

1,900,216. COLORING MATERIAL. JOSHUA CHITWOOD WITT, Chicago, Ill. Filed Jan. 28, 1929. Serial No. 335,745. 3 Claims. (Cl. 106—24.)



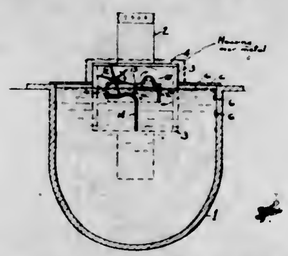
1. The method of preparing pigmented plastic material, which includes mixing a pigment with a stabilizing agent and with hydraulic cement, passing such mixture through a colloid mill, and thereby reducing such pigment, while mixed with the stabilizing agent, to colloidal fineness and adding said mixture to the plastic material.

1,900,217. GAS BURNER. EDWIN C. ADAMS, Pittsburgh, Pa. Filed Mar. 6, 1931. Serial No. 520,571. 5 Claims. (Cl. 158—104.)



2. A gas burner comprising a gas manifold common to the whole burner having a plurality of spaced sections of main burner ports and flame-spreading ports on the surface thereof, said flame-spreading ports being provided in the space between said sections of main ports and so constructed as to carry the flame from one main port section adjacent thereto to the other.

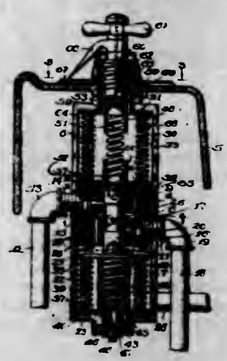
1,900,218. STEERING DEVICE. BURTON S. AIKMAN, Milwaukee, Wis., assignor of one-half to R. P. Tell, Milwaukee, Wis. Original application filed Nov. 28, 1927, Serial No. 236 311. Divided and this application filed Oct. 11, 1928. Serial No. 311,788. 12 Claims. (Cl. 180—79.2.)



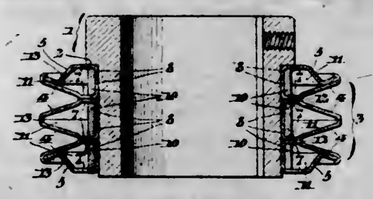
1. In a power operated steering mechanism, a worm shaft, a worm having limited axial motion thereupon, a gear sector engaged by the worm, steering means connected to the sector, a fluid pressure motor connected to said sector, a valve actuated by operation of said worm, and means for locking the steering mechanism to prevent actuation of said worm by the sector.

1,900,219. ANIMAL TRAP. VERNON BAILEY, Washington, D. C. Filed Apr. 11, 1932. Serial No. 604,395. 2 Claims. (Cl. 43—87.)

1. An animal trap consisting of a noose element and a pan element, adapted to be assembled and released and completely separated one from the other, the noose element including a noose and a noose-drawing spring, and the pan element including a rigid one-piece noose positioning frame and a pan hinged thereon, means controlled by the swinging of the pan upon the frame when the parts are assembled for holding the spring of the noose element under tension, and means borne by the frame for guiding the spring element upward when the spring is released.



1,900,220. PRODUCTION OF LIGHT METALS, SUCH AS MAGNESIUM. EDWIN O. BARSTOW, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Dec. 20, 1929. Serial No. 415,456. 8 Claims. (Cl. 204—19.)

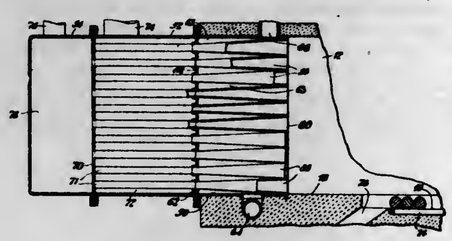


1. In a method of electrolysing a fused electrolyte for the production of a metal which will float thereon, the step which consists in elevating and transferring the floating metal so produced to a defined collecting well in the electrolyzer, wherein the so transferred metal may be retained and accumulate to a substantial depth while in contact with said electrolyte at the lower surface of the mass of metal so retained.

1,900,221. THERMOSTATICALLY CONTROLLED MIXING DEVICE. ELMER O. BEARDSLEY, Chicago, Ill., assignor to The Beardsley & Piper Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 19, 1930. Serial No. 496,639. 3 Claims. (Cl. 236—12.)

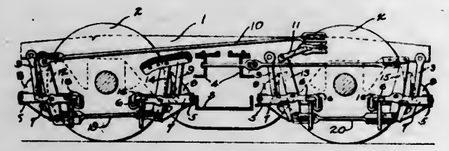
1. In a mixing device of the character described, the combination of a casing comprising a substantially cylindrical body having a bore extending longitudinally therethrough, a transverse hot fluid inlet port communicating with one end of the bore, a transverse cold fluid inlet port communicating with the other end of the bore, an annular chamber positioned between the ports and extending around and communicating with the central portion of the bore so as to receive fluid from the ports, an outlet-equipped jacket connected to one end of the casing and adapted to receive fluid from the annular chamber via a longitudinal duct in the body and between the chamber and the said one end of the body, and a second jacket connected to the other end of the body and having the interior thereof communicating with the annular chamber via a longitudinal duct in the body and between the chamber and the said other end of the body, a piston for varying the proportion of the fluids passing into the annular chamber, mounted slidably in the bore and having valve-forming ends for controlling the ports and a reduced or stem-like central portion around which the fluids pass to the annular chamber, a thermostatic element for automatically shifting the piston to maintain the mixed fluid at a predetermined temperature, disposed in the first mentioned jacket and embodying an expansible and contractible bellows connected to one end of the piston and in direct contact with the fluid in the interior of said first mentioned jacket, the means for counteracting the effect of the pressure of the fluid on the bellows consisting of a second expansible and contractible bellows disposed in the interior of the second mentioned jacket applied to the other end of the piston and surrounded by the fluid in the interior of said second mentioned jacket.

1,900,222. GROOVED PULLEY. RUSSELL H. BOWEN, Philadelphia, Pa., assignor to The American Pulley Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Nov. 10, 1930. Serial No. 494,639. 6 Claims. (Cl. 64—17.)



1. A multi-grooved pulley provided with air spaces between the walls of the grooves, and said walls having apertures connecting with each air space both in the region of the bottom of the groove and in the region of the perimeter of the pulley, whereby a continuous circulation of fresh air through the respective spaces is effected assisted by the centrifugal force created incident to rotation of said pulley.

1,900,223. METHOD OF FIRING REHEATING FURNACES. STEPHEN P. BURKE, Elizabeth, N. J., assignor to Surface Combustion Corporation, Toledo, Ohio, a Corporation of New York. Filed Jan. 29, 1930. Serial No. 424,280. 11 Claims. (Cl. 263—1.)



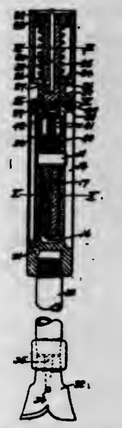
1. In a method of heating by the combustion of fuel gas, the steps comprising simultaneously discharging indi-

vidually non-turbulent streams of air and said gas, respectively, in a common direction, in contacting relation, at substantially equal velocities and in proportions for substantially complete combustion, and maintaining the

stream line flow of said streams after discharge as aforesaid, whereby combustion is substantially dependent upon the interdiffusion of the air and gas at their stream boundaries.

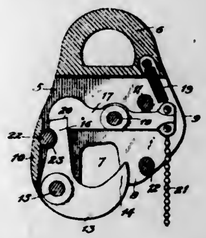
1,900,224. SAFETY GUARD FOR BRAKE RODS. EDWIN G. BUSSE and HERBERT W. EKHOLM, Chicago, Ill., assignors to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 16, 1931. Serial No. 522,874. 14 Claims. (Cl. 188—210.)

1. A safety guard for a railway brake bottom connection having a portion adapted to be applied to the front end of a brake beam fulcrum arm, and a portion shaped to extend beneath the connection to be safe guarded.



1,900,225. SPLASH GUARD HOLDER FOR VEHICLE FENDERS. WALTER R. CHESLEY, Somerville, Mass., assignor to Persons-Majestic Manufacturing Company, Worcester, Mass., a Corporation of Massachusetts. Filed May 25, 1931. Serial No. 539,851. 3 Claims. (Cl. 280—152.)

3. The combination with a vehicle fender having spaced downwardly extending flanges, of a holder for supporting a guard or flaps from said fender, comprising a pair of clips each adapted to embrace a fender flange and each providing a projecting lever and a spring connected at its ends to said levers to maintain them in clamping engagement with said flanges.

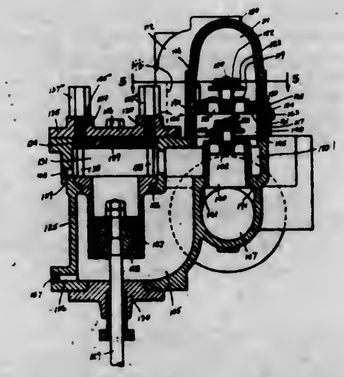


1,900,226. WELL REAMER. DAVID J. CONANT, Memphis, Tenn. Filed Jan. 2, 1932. Serial No. 584,383. 7 Claims. (Cl. 255—76.)

1. In a well reamer a tubular drill stem, a slotted head carried thereby a pair of reamer blades pivotally mounted in said slot, a cylinder chambered out in said head above said slot and in communication with said stem, a restricted bore connecting said cylinder and slot, a piston within said cylinder, a compression spring within said cylinder acting to hold said piston in raised position, a piston rod secured to said piston and extending downward therefrom,

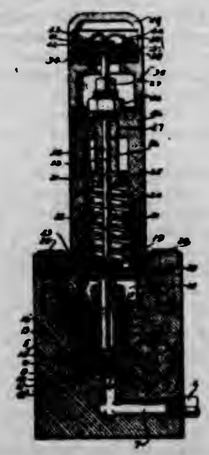
through said bore, links pivotally secured to said piston rod and to said blades, fluid pressure means for depressing said piston, means for reducing said pressure on movement of said piston to depressed position, and means engaging said rod when fully depressed, to restrain return movement thereof.

1,900,227. LIFEBOAT HOOK. FRANK E. CRAIG, Astoria, Oreg., assignor of one-fourth to James W. Lovell, Astoria, Oreg. Filed Feb. 29, 1932. Serial No. 595,893. 3 Claims. (Cl. 294—84.)



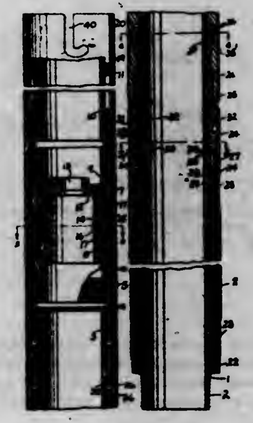
1. A lifeboat hook comprising a casing having a throat in its lower end, a load-supporting hook pivoted in said casing, said hook having a bill extending across said throat and being provided with an upwardly projecting shank at one side of said throat, latch means in the casing normally abutting said shank to prevent swinging of the hook to released position until said means is released, safety means for preventing pulling of the hook from the casing and for carrying the hook-supported load if the hook pivot should become broken or lost, and means fixedly carried by said casing to abut the hook and prevent swinging thereof to free said safety means until said latch means is released.

1,900,228. PUMP CONSTRUCTION. STUART DEAN, Indianapolis, Ind., assignor to Dean Brothers Co., Indianapolis, Ind., a Corporation. Filed Mar. 30, 1931. Serial No. 526,272. 2 Claims. (Cl. 103—203.)



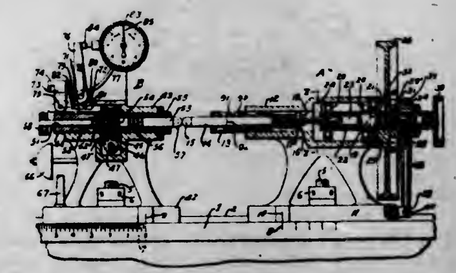
1. In a pump, the combination of an intake chamber having an intake port therein, an intake valve for the port, means detachably associated with the port for elevating the valve to the highest operative position in the chamber, a discharge deck forming the top of said chamber

and positioned above the body of the chamber, said deck including depending wall means forming a continuation of said chamber and into which the intake valve structure projects.



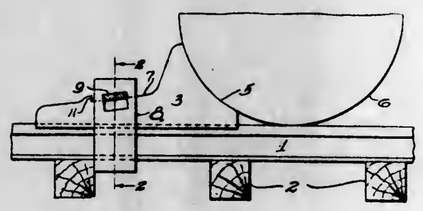
2. In a pump, an intake chamber, a discharge chamber, a discharge valve supporting partition therebetween, a passage leading downwardly from the discharge chamber, a passage leading outwardly from the intake chamber, said passages communicating with each other, one of said passages being extended for exterior exposure and the extension being threaded, and a threaded plug seatable in the extension for passage control purposes and removable for priming purposes.

1,900,229. SAFETY DEVICE FOR PRESSURE SYSTEMS. WILLIAM C. DENNIS, Milwaukee, Wis., assignor to Claybourn Process Corporation, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 27, 1929. Serial No. 366,482. 1 Claim. (Cl. 200—81.)



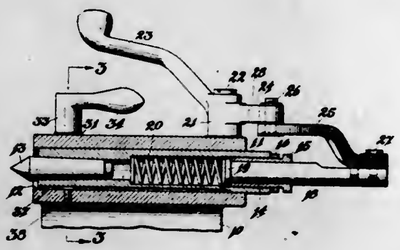
In a safety device for pressure systems, the combination with a pressure line, of a casing provided with a valve-controlled relief passage, a needle valve controlling said passage, a housing secured to said casing, a spring mounted in said housing, spring seat plugs engaged by said spring, one of said plugs engaging said valve, a tension-adjusting plug in threaded engagement with said casing and engaging said other spring seat plug, said last-named plug and tension adjusting plug having alined bores, a switch-operating rod passing through said bores and engaging said other spring seat plug, said rod also projecting beyond the casing.

1,900,230. RELEASABLE PACKER. JAMES C. DICKENS, Goose Creek, Tex., assignor of one-half to W. C. Thomas, Houston, Tex. Filed Nov. 28, 1930. Serial No. 498,537. 12 Claims. (Cl. 166—10.)



11. In a device of the character described a packing member, a mandrel on which said member is mounted, compression means connected to one end of said packing member and slidable upon the outer surface of said mandrel, and slips mounted in said compression means to grip said mandrel and retain said means in an adjusted position.

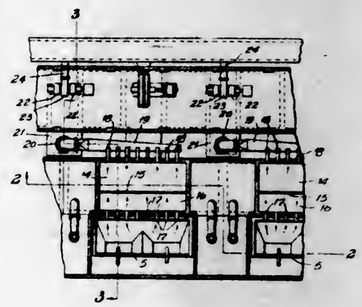
1,900,231. MEASURING DEVICE. GEORGE A. EDE, Cobden, Ill. Filed Mar. 24, 1927. Serial No. 177,876. 6 Claims. (Cl. 33—125.)



1. A measuring device comprising oppositely disposed measuring units, measuring elements associated with and supported by the respective measuring units, and means associated with one of said measuring units whereby the measuring element associated therewith may be adjusted with respect to the associated measuring unit, said means comprising means adapted to prevent rotation of said measuring element, a rotatable element including a screw-threaded portion adapted to receive a screw-threaded portion of said measuring element whereby rotation of said rotatable element will impart linear movement to said measuring element, means whereby said rotatable element may be manually rotated, and means whereby the last-mentioned means may be prevented from moving undesignedly with respect to said rotatable element, said means for preventing undesigned movement comprising a plurality of radially movable members carried by said rotatable element, and means whereby said radially movable members may be forced into firm contact with a portion of the means for rotating said rotatable element.

1,900,232. **WHEEL STOP.** HERBERT W. EKHOLM, Chicago, Ill., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 1, 1932. Serial No. 631,373. 10 Claims. (Cl. 104—257.)

1. A wheel stop consisting of a wheel engaging element having a rearwardly and downwardly inclined wedge-like portion constructed to overlie the rail, and a loop member arranged to encircle the rail and said portion.

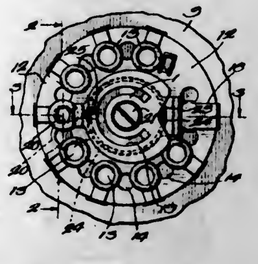


1,900,233. **TAILSTOCK FOR LATHES AND THE LIKE.** ARTHUR N. EMMONS, Syracuse, N. Y., assignor to The Porter-Cable Machine Company, Syracuse, N. Y., a Corporation of New York. Filed June 23, 1930. Serial No. 463,004. 3 Claims. (Cl. 82—31.)

1. A tail stock for lathes and the like having a horizontal bore, a work center spindle slidably mounted in said bore, said spindle being of substantially the same length as the bore and having a bore at one end for receiving a work center, a straight bore at the opposite end, and a shoulder located between the bores, a sleeve mounted in the straight bore and adjusted axially of the spindle, a plunger slidably mounted in the sleeve and having a head portion slidable in the straight bore of the spindle, a spring acting between the head of the plunger and the shoulder between the bores, a manually operable lever associated with the tail stock, and motion transmitting connections between the lever and the free end of the plunger, whereby the plunger and the spindle are moved axially of the tail stock and locked in operative position upon operation of the lever.

1,900,234. **METHOD OF COOLING SINTERED MATERIAL.** JOHN E. GREENAWALT, New York, N. Y. Filed Mar. 21, 1931. Serial No. 524,353. 7 Claims. (Cl. 266—20.)

1. The method of cooling sintered material which comprises dumping the freshly sintered material into a closed hopper, screening the finer particles therefrom and collecting the fines into a separate fines hopper, spraying



water onto the fines, causing air to traverse the closed hopper, and causing the steam generated in the fines hopper to traverse the closed hopper.

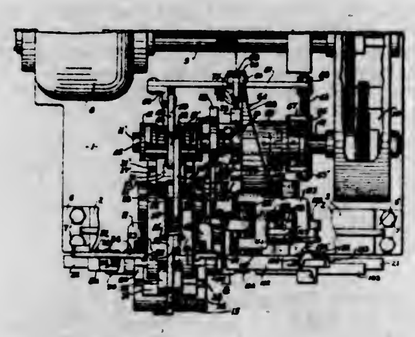
1,900,235. **MAGNESIUM CARBONATE AND MANUFACTURING PROCESS THEREOF.** HAROLD W. GREIDER, Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed Apr. 18, 1928. Serial No. 271,109. 22 Claims. (Cl. 23—67.)

17. The process of manufacturing light magnesia comprising precipitation of magnesia from raw magnesia liquor in which is dispersed a crystallization retarding agent.

18. Light magnesium carbonate precipitated from a solution containing magnesium bicarbonate and a crystallization retarding agent.

1,900,236. **ELECTRIC SWITCH.** ARTHUR HALL, Oak Park, Ill., assignor to Yaxley Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 21, 1929, Serial No. 333,815. Renewed July 27, 1932. 2 Claims. (Cl. 200—171.)

1. A movable contactor for electric switches stamped from a sheet of resilient metal to form a hub and a contact carrying switch arm whose contact is offset with respect to the hub, the latter having key lugs struck therefrom at its center to engage in recesses in a switch operating shaft.



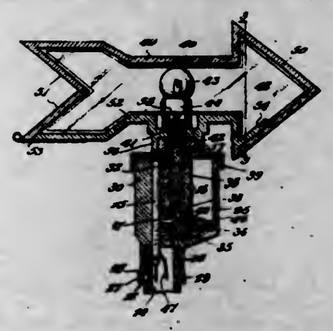
1,900,237. **DENTAL CEMENT AND PROCESS OF MAKING DENTAL CEMENT.** VERN S. HARSHMAN, Detroit, Mich. Filed July 22, 1929. Serial No. 380,268. 12 Claims. (Cl. 106—6.)

2. A dental cement comprising a powdered and a fluid constituent adapted when mixed to harden quickly into a

composition useful for a permanent tooth filling, said powdered constituent comprising a metallic oxide and said fluid constituent comprising a liquid capable of setting said metallic oxide and nitrocellulose dissolved in said liquid.

12. A dental cement comprising a powdered and a fluid constituent adapted when mixed to harden quickly into a composition useful for a permanent tooth filling, said powdered constituent comprising a preponderance of an alkaline earth oxide together with a smaller amount of zinc oxide and said fluid constituent comprising nitrocellulose, methyl salicylate, and oil of cassia.

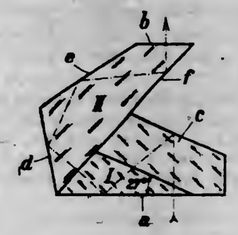
1,900,238. **FLAT BAND TYING MACHINE.** LEO M. HARVEY, Los Angeles, Calif. Filed Feb. 4, 1931. Serial No. 513,347. 25 Claims. (Cl. 31—9.1.)



1. A flat band tying machine comprising the combination of means for forming a tie in the overlapped portions of a band, means for independently gripping said overlapped portions of the band and for supporting the same in tie forming position, and a tensioning device for gripping and holding one portion of the band during a tensioning operation and including a primary member and a secondary member differentially connected therewith, means for applying power to and for operating the primary member, means on the secondary member for gripping a portion of the band during a tensioning operation, and means for connecting said primary and said secondary members, whereby the secondary member will be operated by the primary member until the band is tensioned to a predetermined extent, and the primary member is thereafter operable to a greater extent than the secondary member, while the band is held in tension.

1,900,239. **PROCESS OF MANUFACTURING SO_3 GAS.** INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor to Chemical Construction Corporation, Charlotte, N. C., a Corporation of Delaware. Filed Jan. 27, 1932. Serial No. 589,099. 15 Claims. (Cl. 23—177.)

1. The method of treating acid sludge which consists in subjecting acid sludge to hot combustion gases whereby SO_2 gas is generated in re-circulating part of the generated SO_2 gas with the hot combustion gases.

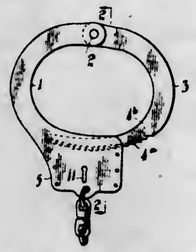


1,900,240. **DIRECTION SIGNAL.** THOMAS ASA KANE, McMinnville, Oreg. Original application filed Oct. 14, 1930, Serial No. 488,622. Patent No. 1,860,034. Divided and this application filed Feb. 29, 1932. Serial No. 595,929. 2 Claims. (Cl. 116—48.)

1. In a direction signal for motor vehicles, an indicator element comprising an open frame and a bottom plate having an outline corresponding to the outline of the frame whereby to complete a direction indicator partly formed by the frame and having a socket on its under side, longitudinal ribs on the inner surface of the frame, a tongue

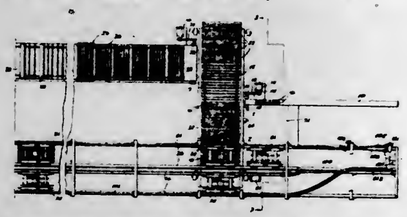
carried by the bottom plate to engage between and interlock with the ribs on the frame, and means for locking said bottom plate in the open frame.

1,900,241. **REVERSING PRISM SYSTEM AFFORDING PARALLEL VISION.** ALBERT KÖNIG, Jena, Germany, assignor to Firm Carl Zeiss, Jena, Germany. Filed July 31, 1930, Serial No. 472,004, and in Germany Aug. 3, 1929. 1 Claim. (Cl. 88—1.)



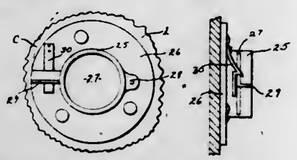
A reversing prism system comprising two prisms, each prism having four plane polished surfaces, the four polished surfaces of one of the two prisms being such that the first surface serves for ray traversion as well as for total reflexion, that the second and third surfaces, which form a roof, serve only for total reflexion, and that the fourth surface serves only for ray traversion, the four polished surfaces of the other of the two prisms being such that the first surface serves for ray traversion, that the second and third surfaces serve only for total reflexion, and that the fourth surface serves for ray traversion as well as for total reflexion, the eight polished surfaces of the said two prisms being so arranged relatively to each other that the said first surfaces of the two prisms are parallel to each other and that the totally reflecting surfaces are adapted to deflect in one and the same plane a ray entering one of the said two parallel surfaces of the prism system perpendicularly to these two surfaces, the said fourth surfaces of the two prisms being cemented together.

1,900,242. **LOCKING MECHANISM FOR HANDCUFFS.** WILLIAM L. LATOU, Toronto, Ontario, Canada, assignor of two-fifths to William Morgan Floyd, Toronto, Canada. Filed Apr. 1, 1932. Serial No. 602,514. 7 Claims. (Cl. 70—24.)



2. In a handcuff including a lock mounting arm and a lockable arm pivotally connected with each other, a set of

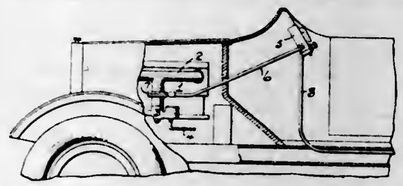
circumferentially arranged teeth on the lockable arm, and a lock on the lock mounting arm including a latch adapted for engagement and disengagement with the teeth on the lockable arm, said latch having a depression therein, locking mechanism comprising a cam engageable by a key and



pivoted to the lock mounting arm and adapted to be turned to engage the latch to retain it in a locked or toothed engaging position or to enter the depression and permit the latch to withdraw from the tooth engaging position.

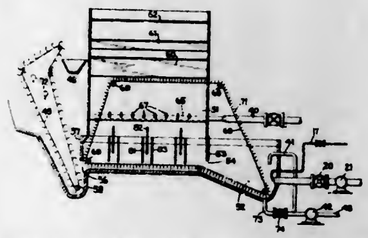
1,900,243. BRICK HACKING APPARATUS. FRANK C. LAYER, Algonquin, Ill. Filed May 20, 1931. Serial No. 538,768. 13 Claims. (Cl. 214—6.)

1. Brick hacking apparatus of the kind described, comprising a car loading station, a set of brick holding grouping frames of varying sizes and capacity, said set of frames representing the total volume of a car, and means to convey said frames to said car loading station in proper sequence.



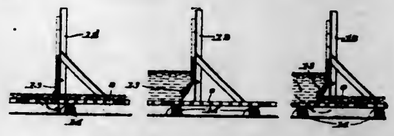
1,900,244. GRAIN DOOR. ALVA MAHANNAH, Sedgwick, Kans. Filed Feb. 26, 1931. Serial No. 518,357. 1 Claim. (Cl. 20—39.)

In a grain door valve of the class described, in combination with a removably arranged grain door for box cars, a valve carried by the door and consisting of a flange and spout integrally connected and outwardly extending and having a slot transversely positioned therein, a spring catch secured to the flange, a disc cut-off to slidably engage in the slot, the disc pivotally connected to the flange, and a lipped element integral with the disc as rocking means therefor, and adapted to engage with the catch as locking means for the closed position of the disc.



1,900,245. FUEL CONTROL APPARATUS FOR AUTOMOBILES. ASSAD M. MALLUK, New York, and FREDERICK W. ALLEN, Sea Cliff, N. Y. Filed Oct. 29, 1931. Serial No. 571,820. 15 Claims. (Cl. 123—198.)

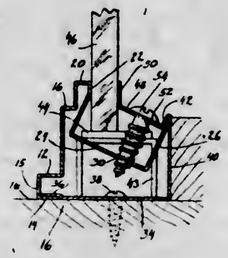
1. Fuel controlling means for an automobile of a type including an internal combustion engine, an intake manifold and a fuel tank, comprising a control box adapted to be mounted on a dash board, a shutter adapted to be connected to the intake manifold and a locking device adapt-



ed to be connected to the fuel tank for locking the cap thereof, and means connected to the control box for moving both the shutter and the tank cap locking means to three positions.

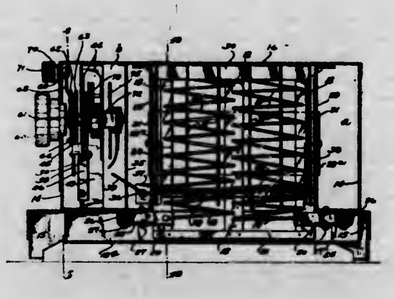
1,900,246. RECOVERY OF SALTS AND OTHER PRODUCTS FROM OIL FIELD BRINES. OTTO V. MARTIN, Sand Springs, Okla., assignor to The Texaco Salt Products Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 14, 1930. Serial No. 475,270. 14 Claims. (Cl. 23—43.)

1. In the herein described process of preparing salts from solutions the steps which comprise directing supersaturated solution in a finely dispersed state onto a salt growing bed over which salt crystals are thinly disposed, and slowly and continuously moving the salt crystals over the bed whereby the crystals are brought into intimate contact with the finely dispersed super-saturated solution to precipitate salt therefrom and effect growth of the crystals.



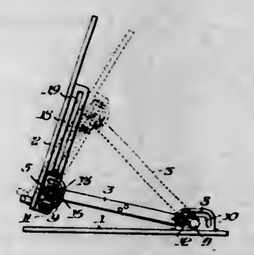
1,900,247. RECOVERY OF SALTS AND OTHER PRODUCTS FROM OIL FIELD BRINES. OTTO V. MARTIN, Tulsa, Okla., assignor to Texaco Salt Products Company, Tulsa, Okla., a Corporation of Delaware. Filed Apr. 6, 1932. Serial No. 603,515. 6 Claims. (Cl. 23—273.)

1. In the process of preparing salt of uniform particle size from solutions containing the salt, the steps comprising maintaining the solution in a flowing body from which the salt is precipitated forming a mass of coarse and fine particles, slowly and continuously moving the mass of precipitated salt countercurrently through the body of solution, successively obstructing and releasing the flow of solution over the particle mass, and thereby subjecting the mass to the intermittent sweeping action of suddenly moving bodies of liquid to sweep out the fine particles and maintain them suspended in the solution to effect further growth.



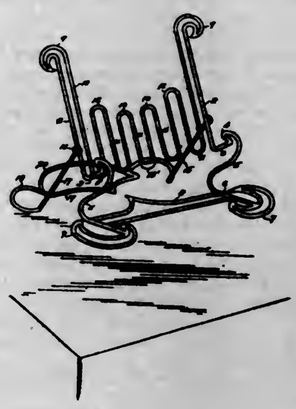
3. In apparatus for the recovery of salts from solutions a tank adapted to maintain a flowing body of solution from which particles of salt of non-uniform size are precipitated, means for slowly moving the precipitated particles over the floor of the tank countercurrently to the flowing solution, a plurality of baffles supported across the tank and interposed in the path of liquid flow adapted to intermittently obstruct said flow thereby subjecting the mass of particles to the sweeping action of sudden intermittent movements of the solution, to displace the relatively fine particles from the mass and maintain them suspended in the solution.

1,900,248. STORE FRONT SASH. ANGUS N. MCDONALD, Detroit, Mich., assignor to Detroit Show Case Company, a Corporation of Michigan. Filed Oct. 10, 1930. Serial No. 487,837. 22 Claims. (Cl. 20—56.4.)



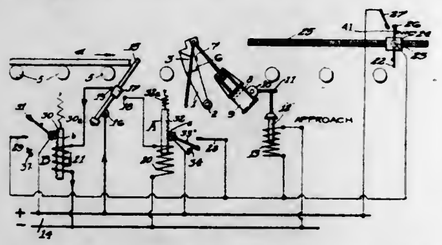
1. A glass pane supporting structure comprising, in combination; a face plate having a supporting base, a glass pane positioning surface at its upper extremity, and a channel shaped portion depending therefrom; and a set plate adapted to cooperate with said supporting base and channel shaped portion to secure the same in fixed position, said set plate including a positioning surface adapted to align in parallel spaced relation with the positioning surface of the face plate.

1,900,249. ELECTRIC TOASTER. PETER J. N. MILLER and VICTOR E. EXTROM, Minneapolis, Minn. Filed Nov. 7, 1928. Serial No. 317,702. 2 Claims. (Cl. 53—5.)



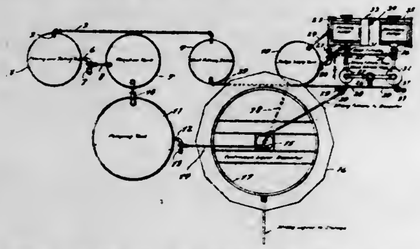
1. In an electric toaster, a casing, electric heating elements within said casing spaced to afford bread-receiving chambers therebetween, said casing including vertically extended end plates adjacent to vertical edges of said heating elements, and baffle plates secured to said end plates spaced from the bottom and top of said casing and extended adjacent the sides of said heating elements and regulating the flow of air upward through the bread-receiving chambers.

1,900,250. VERTICALLY AND HORIZONTALLY ADJUSTABLE TABLE. OSSIAN K. MITCHELL and LEONARD O. MITCHELL, Oak Park, Ill. Filed Apr. 28, 1928. Serial No. 273,513. 10 Claims. (Cl. 45—46.)



1. An angularly and vertically adjustable table, comprising a base member, a table member, supporting links extending from front to rear of the table in vertical planes spaced apart in the direction of the lateral dimension of the table, pivot mountings carried by the base member and table member to which the ends of the links are, respectively, pivoted, and stay means fixing the ends of the links against angular movement relatively to their pivot mountings; said stay means connecting the links with their pivot mountings at points removed from the pivots and moving longitudinally of the links, and having fixing means for releasably arresting said longitudinal movement and thereby resisting the angular adjustment of the links.

1,900,251. TABLE SUPPORT FOR READING MATTER. IDA L. MOORE, Long Beach, Calif. Filed June 15, 1932. Serial No. 617,385. 4 Claims. (Cl. 45—57.)

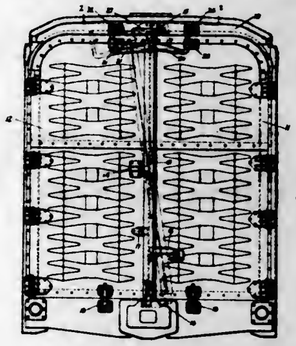


1. A device for holding printed matter, such as books, newspapers and magazines in readable position on a table or the like, comprising a frontal frame having side bars with forwardly extending bracket bends forming rests for applied reading matter, and a coplanar system of upstanding parts forming a back rest; said parts comprising wire loops spaced apart for insertion of magazines or newspapers, the side bars joining the system of loops by end loops of greater height than the intermediate system.

1,900,252. CONTROLLING THE SHEARING OF METAL BARS WHILE IN MOTION. MYLES MORGAN, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed May 16, 1929. Serial No. 363,453. 12 Claims. (Cl. 164—49.)

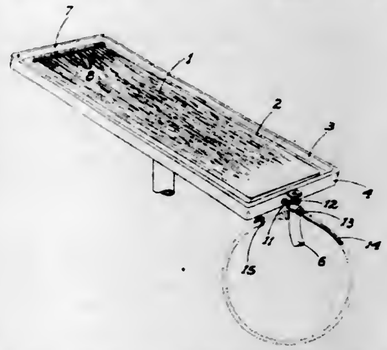
1. Apparatus for shearing material in motion, comprising a flying shear and means responsive to movement of the material to procure operations of said shear for cropping the front and rear ends of each piece of material, and severing it, intermediate said ends, into predetermined lengths.

1,900,253. PREPARATION OF CAUSTIC LIQUOR. MORRIS BLAKE MOUNT, Lynchburg, Va. Filed Nov. 11, 1930. Serial No. 494,915. 12 Claims. (Cl. 23—185.)



1. The process for the preparation of caustic liquor which consists in treating successive batches of liquor containing soda ash by slaking lime therein, causticizing the milk of lime mixture, delivering the successive batches of the causticized milk of lime mixture and sludge to a tank, continuously withdrawing the liquor and sludge from the tank and delivering it to a continuous decanter, and continuously decanting the clear caustic liquor.

9. The process for the preparation of caustic liquor which consists in treating successive batches of liquor containing soda ash by slaking lime therein, agitating the liquor during the slaking of the lime, causticizing the soda ash in the milk of lime-mixture formed by slaking the lime in the liquor containing the soda ash, continually agitating the milk of lime mixture during the causticization thereof, delivering the successive batches of caustic liquor and sludge to a tank, agitating the caustic liquor in the tank to maintain the sludge in suspension, continuously withdrawing the liquor and sludge from the tank and delivering it to a continuous decanter, continuously decanting the clear caustic liquor, continuously removing the sludge from the decanter, filtering the sludge removed from the decanter, returning the filtrate to the decanter, washing the sludge removed from the filter, filtering the washing water from the sludge, and mixing the washing water with the liquor containing the soda ash during the slaking of lime.



1,900,254. LATCH MECHANISM. KARL F. NYSTROM, Milwaukee, Wis., assignor to Camel Company, Chicago, Ill., a Corporation of Illinois. Filed June 14, 1930. Serial No. 461,068. 18 Claims. (Cl. 292—218.)

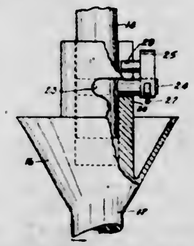
1. A latch mechanism comprising a main swinging latch, auxiliary swinging latches on opposite sides of said main latch, connections between said main and auxiliary latches effecting simultaneous movement of said latches and keepers co-operable with said latches, said main latch engaging its keeper during moving of said latches to latching

position prior to the engagement of said auxiliary latches with their corresponding keepers, said main latch keeper having means adapted to impart movement to said latches substantially normally to the swinging movement thereof.

1,900,255. FLUSHING SYSTEM FOR OPERATING TABLES. ARNOLD L. ORMSBEE, Lodi, Calif. Filed June 26, 1931. Serial No. 547,052. 3 Claims. (Cl. 27—23.)

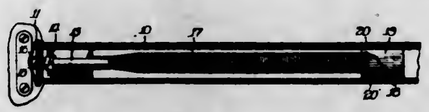
1. In combination with a mortuary operating table, a transversely extending water spray device mounted in connection with the table adjacent its upper end to discharge a spray onto the table in the direction of its lower end, a conduit connected to said device and extending to and beyond the lower end of the table for connection to a fixed source of water supply, and a control valve interposed in said conduit.

1,900,256. ELECTRICAL CONTACT AND THE MANUFACTURE THEREOF. JOSEPH ARTHUR PAYETTE, Attleboro, Mass., assignor to General Plate Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Feb. 26, 1932. Serial No. 595,265. 10 Claims. (Cl. 200—166.)



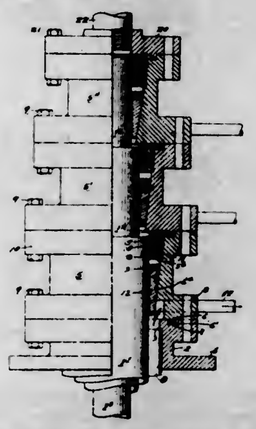
1. An electrical contact comprising a blade of relatively thin metal, said blade being turned over at one end forming a bead, and a metal contact of U-conformation, compressed around said bead.

1,900,257. METHOD OF MAKING ARTICLES OF PAPER. BENJAMIN F. PERKINS, Holyoke, Mass., assignor to American Tissue Mills, Holyoke, Mass., a Corporation of Massachusetts. Filed Oct. 1, 1931. Serial No. 566,196. 4 Claims. (Cl. 154—2.)



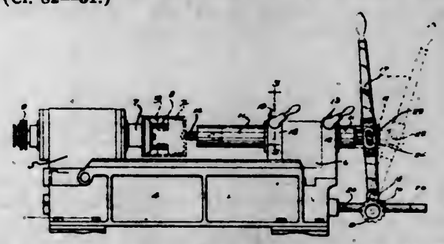
1. The method of producing handkerchiefs and the like from paper to simulate woven linen which consists in, subjecting superposed webs of crepe paper to the action of coacting pressure rolls which have the surfaces thereof provided with alternate grooves and ridges arranged to simulate woven linen and being provided with grooves so as to press the webs together outside said grooves to form a united composite web with substantial areas thereof joined together and having separated portions at spaced intervals.

1,900,258. LOCKING DEVICE FOR BAYONET SLOT CONSTRUCTIONS. SIGMUND SCHIFF, Cincinnati, Ohio, assignor to The J. H. Day Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 15, 1930. Serial No. 436,136. 8 Claims. (Cl. 287—103.)



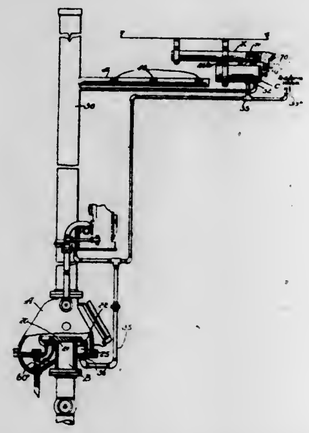
1. The combination with a drive shaft having a free end, of a laterally-projecting arm on said shaft adjacent the free end thereof, a removable connecting member adapted to receive the free end of the shaft, the receiving portion of said member being provided with a bayonet slot comprising a retaining and a release portion, said slot being adapted to receive said laterally-projecting arm, and a lug mounted for limited pivotal movement upon the end of said arm and having a stud thereon projecting into the bayonet slot upon insertion of the arm into said slot, said lug being adapted to assume a position substantially parallel with the retaining portion of the bayonet slot whereby said stud, upon movement of the arm toward the release portion of the slot, contacts the wall of said release portion, preventing movement of the arm into alignment with the release portion of the slot.

1,900,259. CURTAIN ROLLER CONSTRUCTION. HARRY D. SEVISON, Elkhart, Ind., assignor to The Adlake Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 10, 1932. Serial No. 632,568. 4 Claims. (Cl. 156—36.)



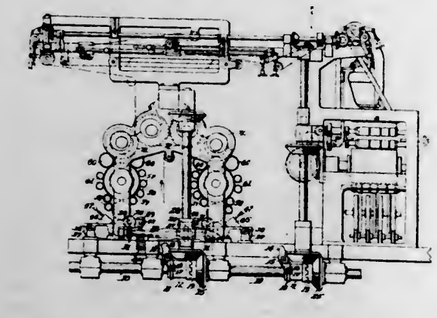
4. In curtain roller construction, a hollow sheet metal roller of generally circular cross section having an inwardly projecting seam formation on the inside thereof, a spindle journaled in one end of the roller, a spring connected at one of its ends to the spindle, and a sheet metal stamping connected to the other end of the spring, said stamping being provided with a plurality of longitudinally extending parallel supporting edges which are spaced apart far enough to engage against the inside of the roller and center the stamping within the same, and one of said supporting edges on the stamping being held in lateral abutment with the seam formation by the torsion of the spring.

1,900,260. MULTICAP CASING HEAD. WILLIAM D. SHAFFER, Brea, Calif. Filed June 6, 1930. Serial No. 459,436. 1 Claim. (Cl. 166—14.)



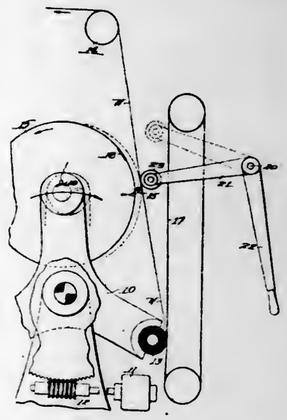
In a concentric casing head apparatus, a plurality of separable, connected, superimposed cap units, each with an internal conical bore in their lower ends and grip slips therein to hang a respective casing, each cap bore adapted to permit passing of coupling collars of relative casing, and each having a packer assembly disposed above the slips in the caps and including an adjustable follower ring threaded from end to end and wholly screwed in its respective cap below the top plane of respective caps, the bottom of each superposed cap wholly overhanging the packer assembly in and being substantially coplanar throughout and flush with the next lower cap; each packer being readily accessible from the top bore of its cap in the absence of higher caps in the apparatus.

1,900,261. LATHE DEAD CENTER ACTUATING DEVICE. ADOLPH STORM and THOR THORSEN, Minneapolis, Minn., assignors to Storm Manufacturing Co., Inc., Minneapolis, Minn., a Corporation of Minnesota. Filed Feb. 18, 1931. Serial No. 516,649. 2 Claims. (Cl. 82—31.)



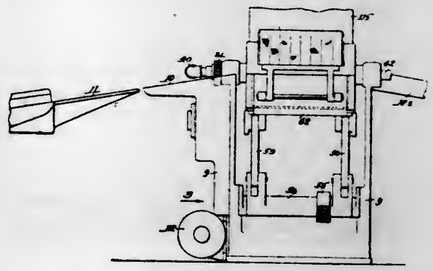
1. In a machine of the class described, a sleeve-like bearing, a round bar mounted in the bearing with freedom for axial sliding movement and for turning movement about its longitudinal axis, frictional clamping means for rigidly securing the bar to the bearing, a round rod rigidly secured to a relatively fixed support and extending parallel to the bar, a sliding collar mounted on the rod with freedom to turn about its axis, frictional clamping means for rigidly securing the collar to the rod, a hand-lever, one end of which is fulcrumed to the collar, and a slip connection between the lever and outer end of the bar.

1,900,262. PRESSURE VENTING DEVICE FOR DRY PIPE SPRINKLER SYSTEMS. EMIL TYDEN, Hastings, Mich. Filed Nov. 6, 1930. Serial No. 493,709. 4 Claims. (Cl. 169—17.)



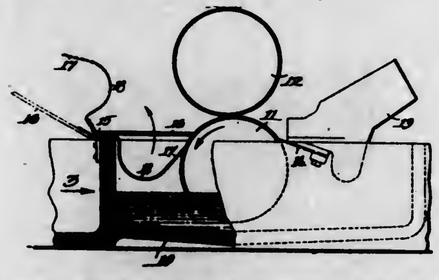
1. In combination with a dry pipe sprinkler system having a vent passage for the air pressure of the system, said passage being extended for discharge separately from the water discharge heads of the system, and a valve controlling said vent passage, and a temperature-responsive device independent of the water discharge heads of the sprinkler system arranged to operate the vent valve for opening upon predetermined temperature conditions in the apartment protected, said temperature-responsive device being arranged for so operating in advance of the operation of the discharge heads, means for preventing discharge of water following the air from the vent passage consisting of a chamber in the vent passage beyond the vent controlling valve, arranged to collect water passing said valve when open for venting the air pressure; a float in said chamber, and connections between the valve and float by which the float operates when buoyed by the water accumulated in the chamber to reseat the valve.

1,900,263. INKING MECHANISM FOR PRINTING PRESSES. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Apr. 28, 1927, Serial No. 187,375. Renewed Feb. 8, 1932. 18 Claims. (Cl. 101—351.)



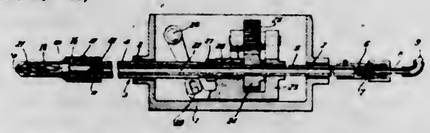
1. In a drive for a printing press inking mechanism, the combination with a main driving shaft, of a press drive shaft, a clutch for positively connecting the drive shaft with the main shaft at will, a gear on the press drive shaft, a shaft adapted to be operated by said gear constantly, and an ink fountain roll connected with the last-named shaft to be operated thereby constantly while the press drive shaft is operating.

1,900,264. WEB SPLICING APPARATUS. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Aug. 27, 1927, Serial No. 215,933. Renewed May 9, 1932. 2 Claims. (Cl. 242—58.)



1. In a web splicing device, the combination with means for supporting a fresh web roll and the expiring web roll and means for guiding the running web from the expiring roll in a path adjacent to the fresh roll, of a soft roll beyond the web movable into and out of position for engaging the web on the side opposite the fresh web roll, while the web is running from the expiring roll, and means for moving the fresh roll into contact with the web in that position to make the paster.

1,900,265. MACHINE FOR CASTING STEREOTYPE PRINTING PLATES. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Aug. 27, 1929, Serial No. 388,843. Renewed July 29, 1932. 58 Claims. (Cl. 22—2.)

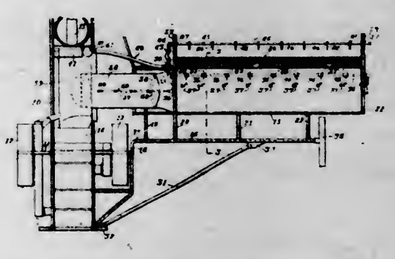


1. In a stereotype plate casting machine, the combination with a cylinder and back, of a shaft, cranks rotatable on said shaft for moving the back toward and from the cylinder, and a projection extending from the back and having a cam slot surrounding said shaft, said shaft having a finished surface thereon entering said slot and constituting a guide for fixing the direction of movement of the back.

1,900,266. FOUNTAIN ROLL CLEANER. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Feb. 16, 1931. Serial No. 516,015. 5 Claims. (Cl. 101—364.)

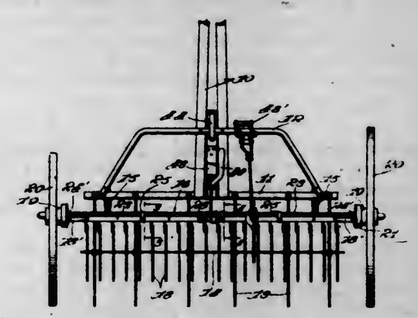
1. The combination with an ink fountain and its roll, of a scraper on the return side of the roll comprising a series of fingers spaced apart for engaging the roll and removing foreign matter therefrom.

1,900,267. FISH AUGER. BURT C. YOUMAN, San Francisco, Calif., assignor to California Packing Corporation, San Francisco, Calif., a Corporation of New York. Filed Mar. 1, 1930. Serial No. 432,480. 3 Claims. (Cl. 17—3.)



1. A fish auger for cleaning fish comprising in combination, a spindle adapted to be reciprocated longitudinally to enter the fish's body lengthwise and withdraw from the same, a rotary head carried at the end of the spindle, in the form of a screw having a helix with an inclined forward face and an abrupt rear face for engaging the viscera of the fish as the head rotates, and a relatively fixed cap-member having a plurality of bars extending longitudinally alongside of the rotary-head and cooperating with the same to entangle the viscera of the fish.

1,900,268. VALVE MECHANISM. PAUL F. YUNGLING, Los Angeles, Calif., assignor to Scott-Ross and Company, Los Angeles, Calif., a Corporation of Delaware. Filed June 13, 1928. Serial No. 285,025. 8 Claims. (Cl. 121—164.)

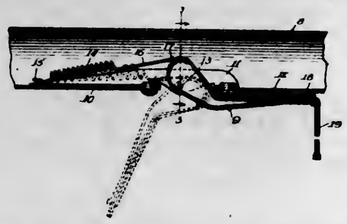


1. A valve mechanism comprising a body provided with ports, valves to control the ports and provided with stems, cams pivotally mounted in the body, one of the cams operably connected with two of the valve stems and the other cam operably connected with two other of the valve stems, a slide shiftably mounted in the body and operably connected with the cams to rock said cams, and a rod slidably mounted in the body and connected with the slide.

1,900,269. HARVESTER. HERMAN E. ALTGELT and RUDOLPH J. ALTGELT, South Bend, Ind., assignors to Oliver Farm Equipment Company, a Corporation of Delaware. Filed May 21, 1930. Serial No. 454,219. 16 Claims. (Cl. 56—20.)

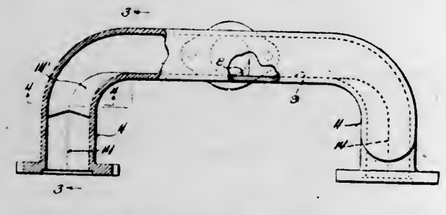
1. The combination with a harvester, of grain severing means located on one side of said harvester, a conveying trough located rearwardly of said severing means, and pneumatic means located in said trough for conveying the grain laterally in said trough to the harvester proper.

1,900,270. DUMP RAKE. HERMAN E. ALTGELT, South Bend, Ind., assignor to Oliver Farm Equipment Company, a Corporation of Delaware. Filed May 9, 1932. Serial No. 610,025. 5 Claims. (Cl. 56—392.)



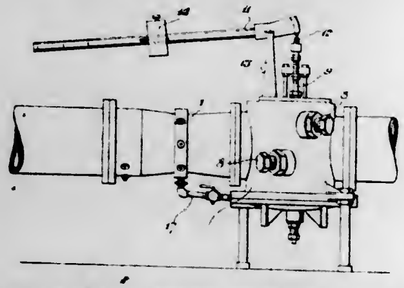
1. A self dump rake comprising a relatively stationary frame, a dump frame pivoted to said stationary frame, wheels for supporting said rake frame, clutch rods carried by said dump frame, and means connected to the inner ends of said clutch rods to move them eccentrically with respect to their outer ends for operatively connecting the wheels with said dump frame for actuating the same.

1,900,271. SUCTION CLEANER. HARRY R. BALLOU, Canton, Ohio, assignor to The Hoover Company, a Corporation of Ohio. Filed Feb. 28, 1929. Serial No. 343,502. 12 Claims. (Cl. 15—257.)



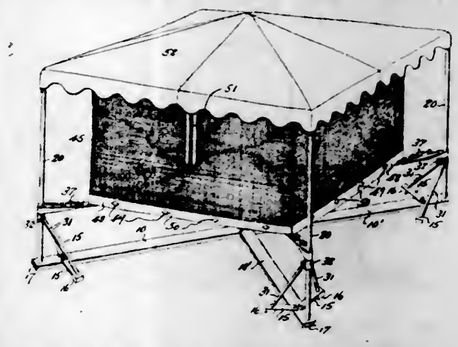
11. The combination of a hand propelled tool, a handle pivotally mounted on said tool, a container attached to said tool at a point removed from the pivotal axis of said handle and extending along said handle, and yielding means connecting the upper portion of said container

and said handle comprising a spring mounted on said handle, a member connected to said container and operatively connected to said spring, and means for varying



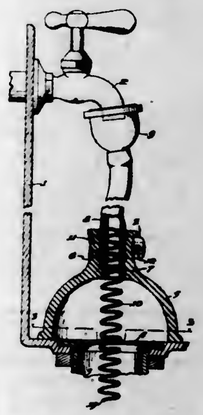
the application of the force of said spring to said member to maintain substantially the same tension on said container in various positions of said handle.

1,900,272. INTAKE MANIFOLD. WALTER J. BLIFFERT, Milwaukee, Wis. Filed Jan. 24, 1931. Serial No. 510,879. 2 Claims. (Cl. 123—52.)



1. An intake manifold for an internal combustion engine comprising an elongated body portion having a pair of main branches extending in opposite directions from its center and having an inlet portion located at its center, a pair of short branches extending laterally from said main outlet portions towards the motor side of said manifold, said main branches each having a bottom wall and a top wall sloping downwardly towards the motor side, said main branches each having substantially vertical side walls.

1,900,273. FLOW CONTROLLER. MORO M. BORDEN, Collingswood, N. J., assignor to Simplex Valve & Meter Company, Philadelphia, Pa., a Corporation of Delaware. Filed Oct. 28, 1927. Serial No. 229,423. 7 Claims. (Cl. 137—78.)

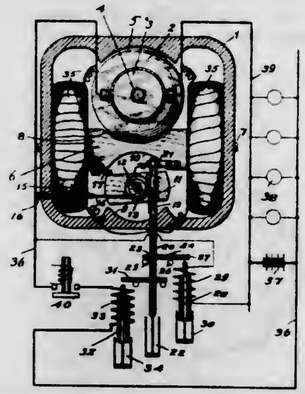


1. A rate of flow controller comprising a casing having therein a partition containing ports, valve mechanism operable by variations in the rate of flow for opening a port aforesaid as flow decreases and closing such port as flow increases, and thereby maintaining a substantially constant rate of flow and manually operable means projecting through said casing for controlling a port aforesaid uncontrolled by said valve.

1,900,274. COLLAPSIBLE PLAY PEN AND SUN BATH. HAROLD I. BROCKIE, Chatham, N. J. Filed Aug. 17, 1932. Serial No. 629,102. 18 Claims. (Cl. 135—5.)

15. A child's play pen, comprising a collapsible frame work, a pen body of flexible foldable material, and means to connect said pen body to and within said frame-work so as to be supported thereby in suspension therefrom.

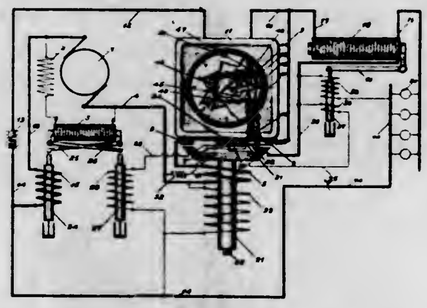
1,900,275. DEVICE FOR CLEANING WASTE AND DRAIN PIPES. DANIEL G. CARTER and GUY G. CARTER, Highland Park, Mich. Filed June 10, 1930, Serial No. 460,237. Renewed July 27, 1932. 2 Claims. (Cl. 285—44.)



1. A drain pipe cleaner, comprising a dome-shaped member of flexible material having an opening in its top substantially concentric therewith, a hose having one of its ends connected to said opening, and a helix having its upper end secured against rotation in said opening and its lower end projecting beyond the lower end of said dome-shaped member for engagement with the drain screen of a sink, said helix being operative, when said dome-shaped cap is axially rotated to compress the open end of said dome-shaped member against the sink around the drain screen.

1,900,276. PROCESS FOR THE PREPARATION OF ETHYLIDENE CHLORIDE. GERALD H. COLEMAN, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed July 27, 1928. Serial No. 295,858. 9 Claims. (Cl. 260—166.)

1. In a process of making ethylidene chloride, the step which consists in reacting between vinyl chloride and hydrochloric acid in the presence of anhydrous aluminum chloride as catalyst.

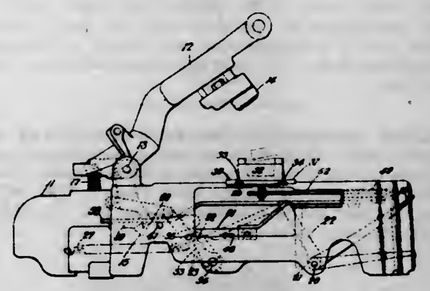


1,900,277. ELECTRIC REGULATION. JOHN L. CREVELING, White Plains, N. Y., assignor, by mesne assignments, to Simplex Equipment Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Mar. 7, 1917. Serial No. 153,133. 44 Claims. (Cl. 171—313.)

1. In a dynamo electric machine, regulating means comprehending a movable magnetic shunt combined with clutch mechanism for moving said shunt and responsive means for affecting said clutch mechanism.

28. In an electric system, in combination, a variably driven generator, a battery adapted to be charged thereby, a regulator to control the generator output, and means effective when said regulator is relatively ineffective to assist in the operation of said regulator in accordance with the charging capacity of said battery.

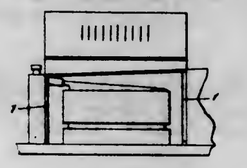
1,900,278. ELECTRIC SYSTEM. JOHN L. CREVELING, Tucson, Ariz., assignor, by mesne assignments, to The Simplex Equipment Company, Inc., New York, N. Y., a Corporation of Delaware. Filed May 24, 1920. Serial No. 383,750. 95 Claims. (Cl. 171—313.)



1. The combination with a source of electrical potential difference, a storage battery circuit and a translating circuit, of an automatic switch for connecting and disconnecting the source therewith comprehending means whereby said switch connects the source with the battery circuit under certain conditions and with the translating circuit under other conditions comprising means for determining which connection shall be made operated by current supplied to the battery.

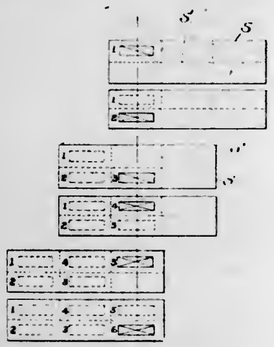
23. The combination with a variable speed generator, a storage battery charged thereby, automatic means for stopping the charging thereof, current responsive means limiting the output of the generator, voltage responsive means controlling the generator to limit the voltage supplied thereby, and means for altering the operative relation of said voltage responsive means, operated by current supplied to the battery.

40. In a car lighting system, in combination, an axle-driven generator, a battery adapted to be charged thereby, a regulator to control the generator output, and means effective only when said regulator is relatively ineffective to govern the action of said regulator in accordance with the charging capacity of said battery.



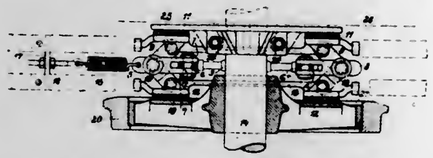
67. The combination with a variable speed generator, a storage battery charged thereby, current responsive means controlling the output of the generator, voltage responsive means for independently controlling the generator to limit the voltage supplied thereby, and means acting upon the voltage responsive means for altering the adjustment and shifting the point of operative connection of said voltage responsive means affected by the state of charge of the battery.

1,900,279. ADDRESSING MACHINE AND OTHER SIMILAR PRINTING MACHINES. ALONZO ELEY, Hendon, England, assignor to Addressograph Company, Chicago, Ill., a Corporation of Delaware. Filed Oct. 28, 1929, Serial No. 401,635, and in Great Britain Feb. 18, 1929. 12 Claims. (Cl. 101—65.)



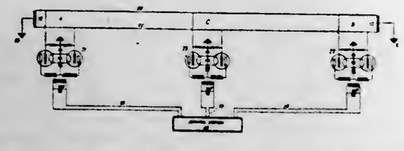
1. In a printing machine of the kind set forth, a reciprocable ink container, means for supplying ink from said container to a printing device, and means associated with said container for discharging a previously printed article from the printing position.

1,900,280. PAD OR PACKING WITH FASTENING MEANS. GEORGE WALKER GILMER, Tacony, Pa. Original application filed May 15, 1926, Serial No. 109,281. Divided and this application filed Nov. 8, 1930. Serial No. 494,435. 1 Claim. (Cl. 180—69.)



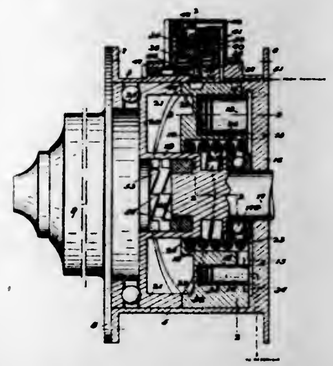
In an automobile engine hood support, a cowl or radiator member having a hood supporting ledge provided with a deflected portion, a metal reinforced buffer strip extending along said ledge and fastened at its ends to the ledge, and means intermediate the length of the strip between the fastened ends thereof for drawing the strip into the deflected portion of the ledge and securing the same thereto.

1,900,281. ADDRESSING MACHINE. WALTER T. GOLLWITZER, Chicago, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Filed Sept. 9, 1929. Serial No. 391,141. 18 Claims. (Cl. 101—47.)



1. In an addressing machine the combination of a printing mechanism embodying changeable printing devices, means for moving a sheet step by step through said printing mechanism to print impressions in a row on said sheet from a printing device, and means for shifting the sheet transversely of the printing mechanism to print other impressions on the sheet from the same printing device and in transverse rows and means for changing the printing device after said impressions have been made therefrom.

1,900,282. MECHANICAL BRAKE FOR RAILWAY MOTOR CARS. PAUL HALBACH, Remscheid, Germany, assignor to the Firm Bergische Stahl-Industrie, Dusseldorf-Oberkassel, Germany. Filed June 9, 1926, Serial No. 114,751, and in Germany Feb. 4, 1926. 17 Claims. (Cl. 188—71.)



1. In a railway-vehicle, a rotating axle, a wheel at the end of the axle, a brake disk having a braking surface arranged normal to said axle, a disk fixed on the wheel, braking surfaces on the wheel disk and on the other disk spaced apart and opposite to one another, said other brake disk being mounted on the said axle, so that the distance of the braking surfaces from one another is smaller than the diameter of said wheel, and a brake shoe device within the space between the said surfaces, said device comprising brake shoes each movable in a direction parallel to the said axle.

1,900,283. SELECTIVE RADIO RECEPTION. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Nov. 9, 1929. Serial No. 405,874. 14 Claims. (Cl. 250—20.)

1. The method of radio reception which includes producing a spacial distribution of the energy representative of a radio signal within a closed path, and combining the energy thus distributed along points of the path where the signal is in the proper phase when of the desired frequency, and not in phase when of an undesired frequency.

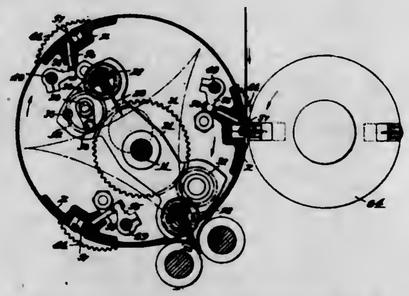
1,900,284. AIR COMPRESSOR. NICOLAS HERZMARK, Paris, France. Filed July 28, 1930, Serial No. 471,336, and in France Aug. 6, 1929. 20 Claims. (Cl. 230—174.)

1. An air compressor comprising a casing, a plurality of pistons secured to said casing, a cylinder block reciprocable within said casing and having a plurality of cylinders within which said pistons extend, a rotatable cam within said casing, a cam having a contour similar to that of said rotatable cam and formed integrally with said cylinder block, and resilient means tending to maintain said last named cam in contact with the rotatable cam whereby the rotary motion of the latter is converted into rectilinear reciprocating movement of the cylinder block.

1,900,285. SPHYGMOMANOMETER. WARD I. HUSER, Cleveland, Ohio, assignor to W. I. Huber, Inc., Cleveland, Ohio, a Corporation of Ohio. Filed July 9, 1927. Serial No. 204,469. 5 Claims. (Cl. 73—44.)

2. A sphygmomanometer, comprising a transparent tube having measuring indicia lengthwise thereof, a collapsible device at the bottom of said tube including integral portions of sufficient stiffness to apply a constricting pressure to an artery, and integral portions of less stiffness than said first portions to transfer the pulsations of the artery while it is being constricted, and a fluid within said tube exposed to said device and adapted to be displaced by the movements of both portions thereof.

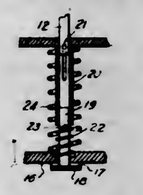
1,900,286. SPHYGMOMANOMETER. WARD I. HUBER and LOWELL B. CLOSE, Cleveland, Ohio, assignors to W. I. Huber, Inc., Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 12, 1929. Serial No. 413,567. 8 Claims. (Cl. 73—44.)



1. A sphygmomanometer, comprising a transparent tube having a mercury container connected therewith, the bottom of said container being yieldable to effect displacement and uplift of the mercury and the border edge of said container being yieldably resistant to thrust to effect compression of an artery in a circumscribed area, and a flexible air bag suspended above the top of the tube and sealing the same against the open atmosphere.

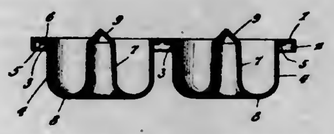
1,900,287. PROCESS OF PRODUCING ALUMINA AND PHOSPHORUS OR PHOSPHORIC ACID. ERLING JOHNSON, Odda, Norway, assignor to the Firm Odda Smelteverk A/S, Odda, Norway. Filed Apr. 28, 1930, Serial No. 448,182, and in Norway Mar. 13, 1927. 10 Claims. (Cl. 23—142.)

1. A process of producing alumina and phosphorus, comprising smelting phosphate material and bauxite under reducing conditions in presence of materials containing iron and sulphur, in order to volatilise phosphorus and to form a slag containing aluminium compounds and sulphides, treating said slag with a leaching liquor and precipitating alumina from the solution so obtained.



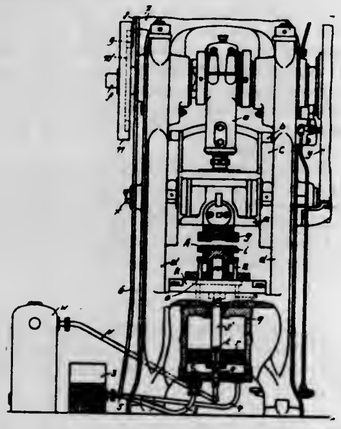
1,900,288. FOLDING CYLINDER. HANS C. JOHNSON, North Plainfield, N. J., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Aug. 21, 1930, Serial No. 476,763. Renewed July 29, 1932. 18 Claims. (Cl. 270—50.)

8. In a folding cylinder, the combination with a cylinder proper and studs on which the cylinder is mounted to rotate, means for rotating the cylinder, a folding blade arm shaft carried on stationary eccentric bearings inside the cylinder, two gears connecting the cylinder with the folding blade arm shaft for rotating said shaft as the cylinder rotates in a predetermined ratio, folding blade shafts carried by the folding blade arm shaft, a stationary gear concentric with the folding blade arm shaft, a gear on each folding blade shaft adapted to be driven by the stationary gear as the folding blade arm shaft rotates, and means for frictionally transmitting rotation from the stationary gear to said shafts frictionally, whereby the folding blades may stop rotating by overcoming the frictional resistance for the purpose of preventing damage in case of a jam,



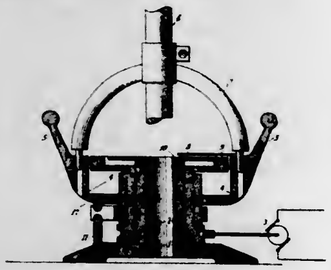
11. In a folding cylinder, the combination with the cylinder proper, of a plurality of pins each having a separate motion carried within the cylinder, individual closed-path cams inside the cylinder for operating the pin motions, and a change speed connection located within the cylinder for operating all of the cams.

1,900,289. LOST MOTION MECHANICAL LINKAGE. JOSEPH E. KELLY and JOHN A. ARABIM, Scranton, Pa. Filed Apr. 30, 1930. Serial No. 448,574. 1 Claim. (Cl. 267—1.)



A device of the class described comprising upper and lower members, a rod passing through the lower member, a pin passing through an intermediate part of the rod, a spring encircling the rod and having one end bearing against the pin and its other end against the lower member, a sleeve having its lower end receiving the upper end of the rod with the spring holding the pin against the lower end of the sleeve, a second rod passing through the upper member with its lower end fitting in the upper end of the sleeve, a pin and slot connection between the second rod and the upper end of the sleeve and a second spring encircling the sleeve and the first rod having its lower end resting against the lower member and its upper end engaging the pin of the pin and slot connection whereby after the second rod has been moved to a certain extent the pin therein will engage the lower end of the slot in the sleeve to cause downward movement of the sleeve and this movement of the sleeve will move the first rod downwardly by the engagement of the lower end of the sleeve with the pin in the first rod.

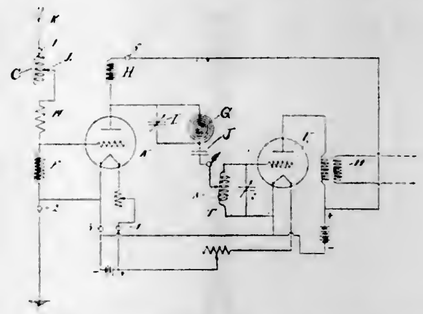
1,900,290. DOUGHNUT PAN. HAROLD KUDO, Dubuque, Iowa. Filed Sept. 5, 1931. Serial No. 561,477. 3 Claims. (Cl. 53—6.)



1. In a doughnut baking pan, a supporting plate, and a cup secured to and depending from the plate and having annular side walls, a bottom wall, and a column rising from the bottom centrally thereof, the bottom being arcuate transversely and merging into lower portions of the side walls and column, said column having a hollow upper end the walls of which are sharply upwardly inclined with the apex of the column projecting slightly above the plane of the supporting plate.

1,900,291. SHEET METAL DRAWING PRESS. OTTO KÜHNER, Goppingen, Germany. Filed Sept. 23, 1931, Serial No. 564,635, and in Germany Oct. 1, 1930. 5 Claims. (Cl. 267—1.)

1. In a sheet-metal drawing press, a cushioning device for the blank holder, comprising a piston and a cylinder closed at both ends and enclosing said piston, said piston and cylinder being one fixed and the other movable and means connecting the movable one of these members operatively with said blank holder; a source of fluid under pressure, a duct connecting one of the spaces in said cylinder with said source of a fluid under pressure; a receptacle containing a liquid; a duct connecting said liquid receptacle and the other space of the said cylinder; and a controlled valve in said liquid duct.



1,900,292. DIRECTION FINDER APPARATUS. AUGUST LEIB, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Apr. 20, 1929, Serial No. 356,652, and in Germany May 5, 1928. 4 Claims. (Cl. 250—111.)

1. Directional finding apparatus for marine and aircraft including, a radio compass, a magnetic compass, and means actuated by said magnetic compass for automatically imparting to said radio compass movements equal to the movements of said magnetic compass.

1,900,293. MEANS FOR INCREASING THE SELECTIVITY OF TUNED RADIO FREQUENCY SYSTEMS. CHARLES V. LOGWOOD, Providence, R. I., assignor to Radio Corporation of America, New York, N. Y., a Corporation of Delaware. Filed Oct. 29, 1926, Serial No. 144,962. Renewed July 8, 1932. 15 Claims. (Cl. 250—20.)

1. Means for increasing the selectivity of tuned radio frequency systems comprising in combination an antenna, an adjustable inductance and a radio-frequency choke coil in series with said antenna, a three-electrode vacuum tube having a grid, a filament and a plate, connections from the terminals of the said choke coil, respectively, to said grid and filament, a second radio frequency choke coil

in the plate circuit of said tube, and a circuit connected between said second choke coil and said plate, said circuit including a fixed condenser and a parallel-branch circuit having in its respective branches a third choke coil and an adjustable condenser.

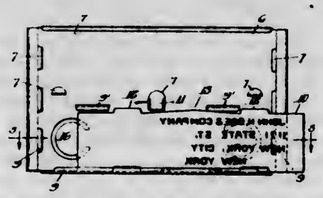
1,900,294. WAXED PAPER AND PROCESS OF MAKING THE SAME. GEORGE N. LOVATT, Holliston, Mass. Filed Nov. 4, 1929. Serial No. 404,793. 5 Claims. (Cl. 91—67.9.)

1. A method of making food wrappers consisting in first embossing the paper with a design and then providing the embossed paper with a coating of wax.

1,900,295. PROCESS OF TREATING FRUIT FOR THE MARKET. REX DE ORE MCDILL, Riverside, Calif., assignor to Food Machinery Corporation, San Jose, Calif., a Corporation of Delaware. Filed Oct. 26, 1929. Serial No. 402,787. 8 Claims. (Cl. 99—1.)

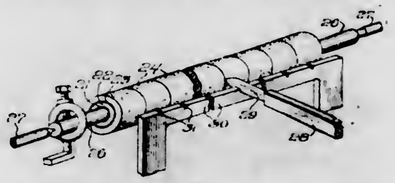
8. A process of preserving fruit consisting of submerging the fruit in an aqueous preserving solution having enzyme arresting properties and contacting the fruit while submerged with a coating solution consisting of carbon tetrachloride, paraffin, said solution being of greater specific gravity than the aqueous preserving solution, and rubbing the fruit while submerged to spread the coating over the fruit, then brushing the surplus aqueous solution from the fruit by brushing the fruit out of contact with the aqueous solution, and finally drying the fruit.

1,900,296. PRINTING DEVICE FRAME BLANK. VALENTINE J. MOHLER, River Forest, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 4, 1929. Serial No. 411,416. 9 Claims. (Cl. 101—369.)



1. A standard blank for printing device frames having at each end a plurality of retaining devices of substantially equal length spaced apart in equal amounts from each other and from the top and bottom of the blank and arranged in alignment, the retaining devices at one end being disposed opposite the retaining devices at the other end of the blank.

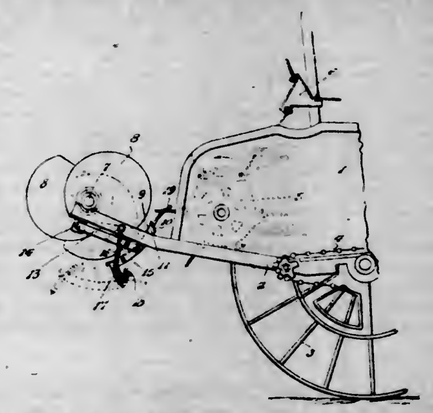
5. A printing device frame blank comprising a body having its end portion bent to provide a spacing flange on the back of the blank, there being a shoulder on the front of the blank connecting the spacing flange with the body, the marginal edge of said end portion being bent inwardly from the outer edge of the spacing flange to form



a facing section on the front of the blank disposed in the place of the face of the body with the free edge thereof abutting said shoulder.

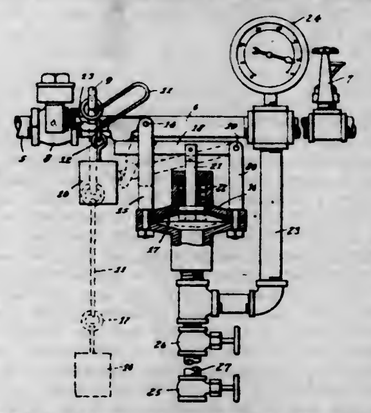
1,900,297. PRINTING DEVICE. VALENTINE J. MOHLER, River Forest, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 4, 1929. Serial No. 411,417. 15 Claims. (Cl. 101—369.)

1. A printing device of the class described comprising a frame, a printing plate having type characters thereon, means for detachably retaining the plate on the frame, said means comprising a device on the frame engaging an end of the plate, and a yielding pressure section on the frame back of the plate adjacent said end thereof adapted to be operated to lift said end of the plate sufficiently to clear said retaining device and permit removal of the plate from the frame.



1,900,298. METHOD OF MAKING BUSHINGS. FRED C. MORRIS, San Francisco, Calif. Filed Apr. 22, 1929. Serial No. 357,155. 15 Claims. (Cl. 18—53.)

1. The method of making hard rubber articles comprising in first forming fabric and uncured hard rubber into stock approximately the desired section of the desired final product and in a length sufficient to form a plurality of said products, subjecting said length of stock to a semi-curing process, then completely severing said length of stock into lengths substantially corresponding with that of said desired final product, and then subjecting said severed lengths to a final curing process.

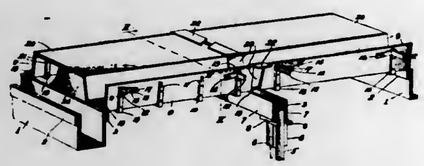


1,900,299. ATTACHMENT FOR FERTILIZER DISTRIBUTORS. THEODORE H. OPPENHEIM, Coldwater, Ohio, assignor to The New Idea Spreader Company, Coldwater, Ohio, a Corporation of Ohio. Filed Jan. 5, 1931. Serial No. 506,783. 10 Claims. (Cl. 275—6.)

1. An attachment for fertilizer distributors having a beater and a spreader, said attachment comprising a pan adapted to extend from side to side of the fertilizer distributor with its front end adjacent the beater and its

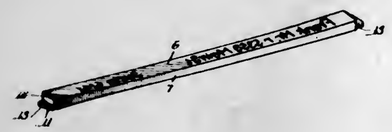
rear end adjacent the spreader, and means for yieldably mounting said pan between the spreader and beater of the fertilizer distributor.

1,900,300. VALVE CONTROL APPARATUS FOR DRY PIPE SPRINKLER SYSTEMS. MATTHEW W. PADEN and VERNICE G. OPDYKE, Rockford, Ill. Filed May 22, 1930. Serial No. 454,545. 9 Claims. (Cl. 169—17.)



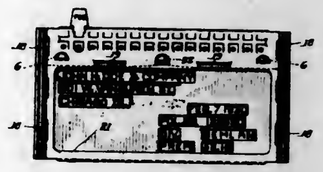
1. In a dry pipe sprinkler system, the combination with the water supply pipe containing water under pressure and the distribution pipe or pipes normally containing air under a predetermined pressure, of a valve connecting said pipes having a downwardly swingable operating member arranged to be raised manually or otherwise to closed position but arranged to be lowered abruptly to open position, a drop weight having direct connection with said member for operating the same, the said weight being arranged to be raised manually to operative position for subsequent operation of said member to open position, a trigger for holding the weight in raised position and preventing accidental movement of the valve operating member downwardly, said weight being releasably supported on said trigger, a diaphragm responsive to the air pressure existing in the distribution pipe, and a plunger movable with said diaphragm to directly release said trigger, said diaphragm being arranged upon a drop in said pressure past a predetermined point to move the plunger to release the trigger and cause the weight to drop and thereby operate the valve operating member to open said valve.

9. In a dry pipe sprinkler system, the combination with a distribution pipe or pipes normally containing air under



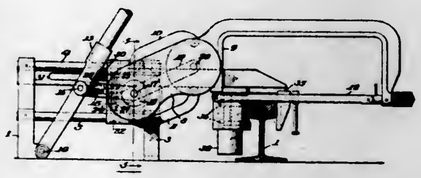
a predetermined pressure, of an air exhauster valve connected therewith and arranged to discharge air therefrom to the atmosphere, said valve having the operating member thereof arranged to be moved to closed position and arranged to be moved abruptly to open position, a drop weight having connection with said member for operating the same, the said weight being arranged to be raised at the time said member is moved to closed position, means for keeping the weight in raised position, means responsive to the air pressure existing in the distribution pipe and arranged upon a drop in said pressure past a predetermined point to operate the last mentioned means whereby to cause the weight to drop and thereby operate the valve operating member to open said valve, and means for limiting the movement of the valve operating member so as to allow the valve to open only part way, the means responsive to the air pressure being operable under the hydraulic pressure of the water filling the pipe upon the exhausting of the air therefrom whereby to operate the valve against the action of the weight to closed position.

1,900,301. CONCRETE FLOOR JOIST FORM CONSTRUCTION. HENRY READ, Tulsa, Okla. Filed July 29, 1929. Serial No. 381,719. 3 Claims. (Cl. 25—131.5.)



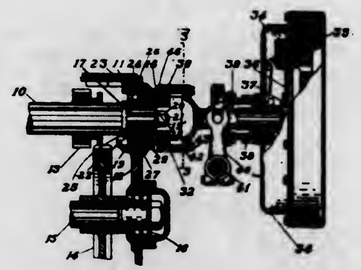
1. Spaced supports, a joist formwork resting at its ends on said supports and consisting of parallel sides, angle brackets secured to and underlying the sides and secured together in pairs, the arms of the brackets engaging the sides, having portions spaced from the latter and also having upwardly-facing shoulders, a horizontal spreader resting at one end on each shoulder and provided with a laterally-projecting tongue fitting in the said space between the respective formwork side and bracket, a locking device fitting against the joist side and endwise against the side of the corresponding spreader to hold the latter on the shoulder of the bracket and the tongue in the said space, and provided with a longitudinal slot terminating at its end remote from the spreader in an extension disposed in downwardly-converging relation to the engaged side of the spreader, and a pin pivotally and slidably engaged by the slot and secured to the adjacent joist formwork.

1,900,302. PRINTING DEVICE. ELMER F. RICHTER, Park Ridge, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Filed May 10, 1929. Serial No. 361,978. 4 Claims. (Cl. 101—396.)



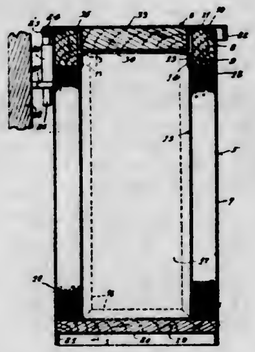
1. A printing form blank of oblong shape having oppositely disposed projections at its ends and of less width than the ends, the outer edges of said ends being reversely inclined.

1,900,303. PRINTING DEVICE. ELMER F. RICHTER, Park Ridge, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 1, 1930. Serial No. 432,483. 1 Claim. (Cl. 101—369.)



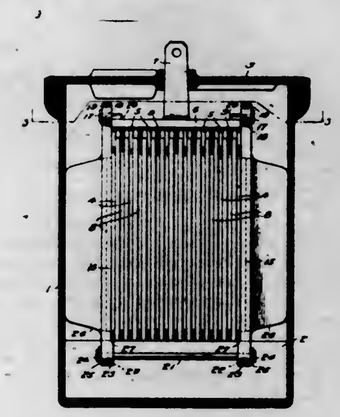
In a printing device which has a frame having a plurality of end stops spaced apart and stamped up from the frame in substantially vertical alinement adjacent the ends of the frame, a bead along the lower edge of the frame, retaining lips struck up from the frame and spaced from and disposed opposite said bead, and a holding device intermediate the retaining lips, said frame having an opening therein with the edges thereof spaced inwardly from said end stops, retaining lips, and bead and facilitating springing of the frame, the combination of a printing plate having printing characters embossed in relief on one face thereof and appearing in intaglio on the opposite face, and a wedge projection on one edge of said printing plate and adapted to be engaged with said holding device and said retaining lips when the other edges of said plate are engaged with said bead and said end stops, the opening in said frame disclosing the intaglio faces of said type characters to facilitate reading thereof and affording access to said plate whereby said plate may be grasped on opposite faces thereof to facilitate sliding of the plate along the frame when the frame is sprung to clear the end stops from an edge of the plate whereby the plate may be removed from the frame after limited movement of the plate disengaging the wedge projection thereon from the holding device and retaining lips.

1,900,304. SAW OPERATING MECHANISM. EMIL W. K. ROE, Chicago, Ill., assignor to The Aldon Company, Chicago, Ill., a Corporation of Illinois. Filed May 31, 1928. Serial No. 281,728. 9 Claims. (Cl. 29—73.)



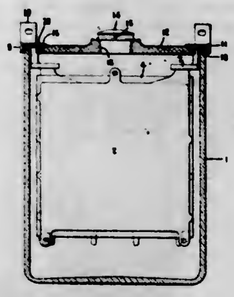
1. A saw operating mechanism comprising a frame, a cross-head slidable on said frame, a saw frame, means pivotally connecting the saw frame to the cross-head, means for maintaining said saw frame in horizontal position as it moves to and from the work, a lever for actuating said cross-head whereby a reciprocatory movement may be imparted to said saw frame, brake means and means for operating the brake means and movable with the saw frame to be operable in any position into which the saw frame is raised or lowered, said brake means including parts mounted on the cross-head and parts connected to the saw frame whereby when said brake means is operated to prevent movement thereof the saw frame is raised to lift a saw in the frame from engagement with the work.

1,900,305. CLUTCH COUPLING. OTTO R. SCHORNBOCK, Chicago, Ill., assignor to Oliver Farm Equipment Company, a Corporation of Delaware. Filed Jan. 13, 1930. Serial No. 420,879. 5 Claims. (Cl. 287—130.)



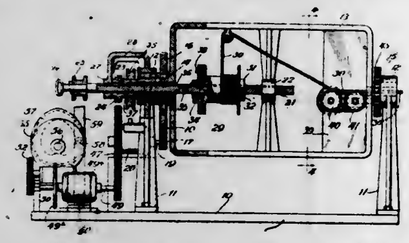
1. A clutch coupling for a transmission shaft comprising a clutch shaft having a disk like portion formed on one end thereof, a clutch ring secured to said disk-like portion, a clutch member secured to said transmission shaft and telescopically connected to said clutch ring, a clutch washer detachably mounted on said clutch member, and securing means extending through the disk-like portion of said clutch shaft, said clutch ring and said washer for securely fastening said clutch shaft to said transmission shaft.

1,900,306. DAIRY PRODUCTS REFRIGERATOR. ROSWELL R. SHIRLEY, Rockford, Ill. Filed July 16, 1928. Serial No. 293,178. 6 Claims. (Cl. 220—9.)



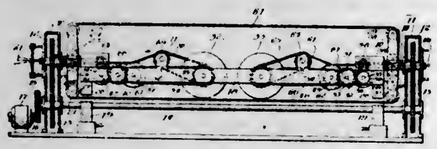
1. In a refrigerator generally of the character described, a box comprising an open-top sheet metal shell, the upper edges of said shell being bent inwardly to define shoulders, a top frame of wood or the equivalent heat insulating material fitting in said shell below and in abutment with the aforesaid shoulders, an open-top sheet metal container having the upper open end thereof fitting inside said frame and provided with outwardly projecting flanges bearing against the under side of said frame to support the latter and be held thereby in spaced relation to the shell, there being heat insulating material about the sides of said container within the shell and beneath said container, a bottom for said shell serving to retain the insulating material and to hold the aforesaid elements in their stated relation, and a lid for said box serving as a closure for the open top thereof.

1,900,307. STORAGE BATTERY. ALMOND H. SNYDER, Lancaster, N. Y., assignor, by mesne assignments, to Gould Storage Battery Corporation, Depew, N. Y., a Corporation of Delaware. Filed Jan. 10, 1927. Serial No. 160,141. 9 Claims. (Cl. 136—81.)



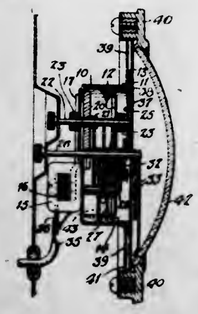
1. In an electric battery, the combination with a container, of a group of positive plates, of a group of negative plates, bus bars connecting the plates of each group, separators interposed between said plates and end pieces connected at the top to said bus bars and at the bottom by tie rods to each other, said end pieces having projecting portions adapted to form, when united with said plates and separators, an assembly unit of the desired dimensions, said projecting portions being engageable with the interior surface of the container to prevent lateral displacement of the unit.

1,900,308. STORAGE BATTERY CELL. ALMOND H. SNYDER, Lancaster, N. Y., assignor, by mesne assignments, to Gould Storage Battery Corporation, Depew, N. Y., a Corporation of Delaware. Filed Oct. 18, 1928. Serial No. 313,351. 5 Claims. (Cl. 136—80.)



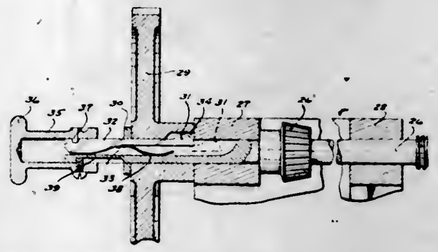
1. In a storage battery of the sealed type, a container, groups of plates therein, a metallic member connecting all the plates of each group and terminating in a projecting portion engaged upon the upper edge of the container, upstanding terminal lugs on said members, a cover sealed upon the container and having peripheral notches for the accommodation of the projecting portions of said metallic members, and sealing means within said openings, said projecting portions having upstanding flanges closing said notches.

1,900,309. TWISTING AND REELING MECHANISM FOR WIRE ROPE MAKING MACHINES. WILLIAM E. SOMERVILLE, Coal City, Ill. Filed Mar. 25, 1931. Serial No. 525,202. 6 Claims. (Cl. 117—16.)



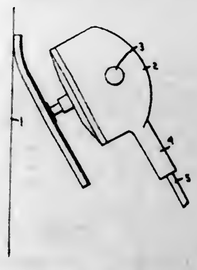
1. In a wire rope making machine embodying a rotary flier, a take up reel mounted upon the flier and a draw off mechanism also mounted upon the flier, said flier and take up reel being disconnected, said take up reel being rotated by the rope being wound thereupon from the draw off mechanism, and means separate from the flier and responsive in its operation to the said rotation of the take up reel for reciprocating said take up reel with respect to the flier.

1,900,310. TWISTER OR STRANDER. WILLIAM E. SOMERVILLE, Coal City, Ill. Filed Nov. 20, 1931. Serial No. 576,327. 3 Claims. (Cl. 117—49.)



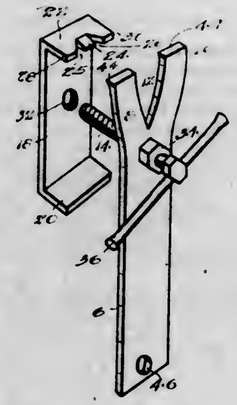
2. In a wire rope or cable making machine, a cradle, supporting means for the cradle, said cradle being maintained against rotation, oppositely disposed rotatable twisting arms constituting sets of arms arranged adjacent each end of the cradle, take up reels and haul off mechanisms mounted upon said cradle, individual to and intermediate the sets of arms at the ends of the cradle, a shaft separate from the cradle supporting means common to and connecting the arms at opposite ends of the cradle for rotating them independently with respect to the cradle, and constituting with said arms a unitary machine element.

1,900,311. CLOCK. WALTER A. SPEAR, Cincinnati, Ohio, assignor to Victor Electric Products, Inc., Cincinnati, Ohio. Filed July 22, 1930. Serial No. 469,852. 1 Claim. (Cl. 58—26.)



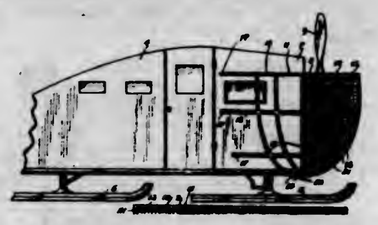
In a clock mechanism, a cup-shaped casing, a relatively shallow cup-shaped cover adapted to fit into the open end of the casing, said cover having a groove formed therein adjacent its periphery to render the cover compressible, shafts supported between the casing and cover, a gear train arranged on said shafts, and means to operate said gear train.

1,900,312. CLUTCH. ADOLPH STORM and THOR THORSEN, Minneapolis, Minn., assignors to Storm Manufacturing Co., Inc., Minneapolis, Minn., a Corporation of Minnesota. Filed Feb. 18, 1931. Serial No. 516,646. 1 Claim. (Cl. 192—71.)



The combination with a shaft, a wheel loose on the shaft, one of which is driven, said wheel being axially spaced from the outer end of the shaft, and a member on the shaft at the inner end of the hub of the wheel, of a clutch for connecting the wheel to the shaft comprising an external keyway in the projecting end of the shaft and extending through the wheel and into the member, an internal keyway in the wheel, extending through the inner end of its hub and closed by the member, a tubular key shifter telescoped onto the projecting end of the shaft and having a key body the outer end portion of which extends into said shifter and is hingedly connected thereto and mounted in the keyway in the shaft, said key body having on its inner end an outwardly and radially projecting key, and a spring compressed between the shaft and key body and under strain to move the key body and project the key into the keyway in the wheel to connect the wheel to the shaft, said shifter being operable to move the key body endwise toward the member to cause the key to engage the member, be cammed thereby out of the keyway in the wheel, into the keyway in the shaft and into the member to release the wheel from the shaft and be held inoperative by the member.

1,900,313. METHOD OF SURFACING. HERBERT R. STRATFORD, Cleveland, Ohio, assignor to The Stratmore Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 15, 1926, Serial No. 81,565. Renewed Aug. 26, 1930. 2 Claims. (Cl. 51—278.)



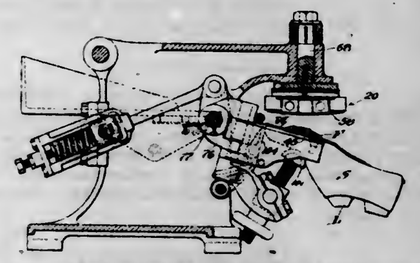
1. In a method of polishing lacquer, the steps which consist in moving a pad over a lacquer coated surface at high speed to first smooth by actually flowing the lacquer by the generated heat and then polish the coating thereon to a high lustre.

1,900,314. SHEET METAL CLAMP. WILLIAM S. STROM, Seattle, Wash. Filed Sept. 22, 1931. Serial No. 564,410. 3 Claims. (Cl. 7—1.)

1. In a clamp as described, the combination with a plate having flanged ends, one of said ends having a notch and a screw-driver head centered in the notch, of a second plate and a screw bar connecting said plates, said second plate having a bifurcated end complementary to the notched-flanged-end for the purpose described and either of said flange ends of the first named plate adapted to rest against the second plate and form a fulcrum for the screw bar to tighten against.

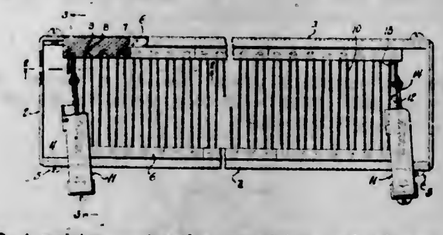
1,900,315. MOTOR SLED. JOSEPH E. VALIQUETTE, Webbwood, Ontario, Canada. Filed Mar. 19, 1932, Serial No. 599,879, and in Canada Mar. 25, 1931. 2 Claims. (Cl. 180—8.)

1. A guard or shield for a propeller of a motor sled having a nose of a substantially lesser width than the length of the propeller, said guard or shield consisting of a series of horizontal bars bellied in front of the propeller so as to curve laterally beyond the same to bights from which the bars are curved inwardly and rearwardly to meet the sides of the aforesaid nose of the sled body, a plurality of upwardly directed bars radiating outwardly and upwardly from the bottom of the said nose and joined to the said horizontal bars at the intersecting points, and a reticulate member covering the framework of the bars.



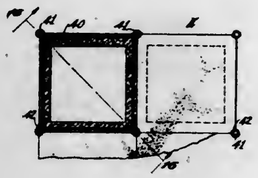
1,900,316. METHOD OF FILLING SHOES. ANDREW THOMA, Cambridge, Mass., assignor to North American Chemical Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 6, 1928. Serial No. 245,001. 1 Claim. (Cl. 106—8.)

The method of making spreadable shoe bottom filler which comprises coating the individual particles of comminuted, fibrous, absorbent body material with a fluid paste made of a suitable film-forming substance and an evaporable liquid, then drying the coated particles and driving off whatever evaporable liquid may be present both in the coating and in the coated particles, leaving each particle enclosed by a dry, protective film adapted



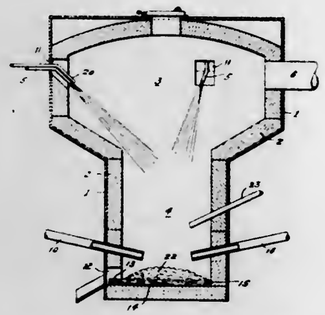
to prevent penetration and absorption by the particles of external binder and of external moisture, and adapted to be disrupted in use, and then mixing the dry film-coated particles with a sticky binder to form a homogeneous filler composition.

1,900,317. METHOD OF FILLING SHOES. ANDREW THOMA, Cambridge, Mass., assignor to North American Chemical Company, Cambridge, Mass., a Corporation of Massachusetts. Filed Feb. 20, 1931. Serial No. 517,236. 17 Claims. (Cl. 12—142.)



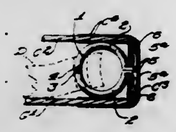
10. The method of filling welt shoes which comprises depositing in the bottom cavity defined by the welt seam a quantity of spreadable shoe filler, suitable when spread for filling the cavity but differing in shape from the shape of the cavity, spreading the filler laterally to the confines of the cavity and compressing the same by powerful pressure applied substantially flatwise of the cavity by a press surface in a direction substantially normal to the shoe bottom and at the same time flattening the welt seam by pressure, and simultaneously subjecting both the filler and the welt seam to a vibratory motion of the press surface in a plane transverse to the direction of pressure and applying heat to the filler and welt seam during the spreading and pressing operation.

1,900,318. RESISTOR CONSTRUCTION. HERMON L. VAN VALKENBURG, Wauwatosa, and FORREST C. McNICOL, Milwaukee, Wis., assignors to Square D Company, Detroit, Mich. Filed May 20, 1929. Serial No. 364,375. 7 Claims. (Cl. 201—74.)



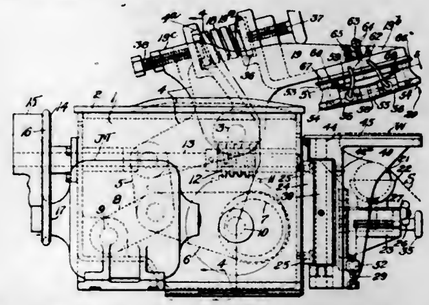
8. A resistor construction comprising a pair of opposed, spaced insulating members, each having spaced sockets therein, a resistance element having reversely formed, looped portions fitted within said sockets, and a terminal member having a pair of clamping portions adapted to clamp said resistance element at any point along its length and having oppositely projecting extensions adapted to seat in any of the said sockets, whereby said terminal member is supported by said insulating members.

1,900,319. STRUCTURAL DEVICE. AURÈLE VERMEULEN, Los Angeles, Calif. Filed Mar. 13, 1931. Serial No. 522,280. 2 Claims. (Cl. 61—48.)



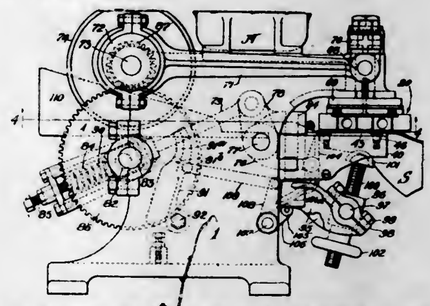
1. In a device of the character disclosed, a block, the upright corner edges of which are grooved, loop members secured to and extended in part outwardly from the grooves of said corners and whereby when said loop members are aligned with corresponding loop members of an adjoining block, said loop members may be interlocked in said grooves, the blocks being held in close abutting relationship, and means adapted to be passed through said loop members and within said grooves for interlocking the blocks.

1,900,320. METHOD OF RECOVERING CHEMICALS FROM WASTE LIQUORS. CHARLES L. WAGNER, Boonton, N. J., and HORACE FREEMAN, Shawinigan Falls, Quebec, Canada, assignors to J. O. Ross Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 7, 1928. Serial No. 259,891. 10 Claims. (Cl. 23—48.)



3. The method of recovering chemicals from waste liquor which comprises destructively distilling the liquor, consuming the combustible products of such distillation, forming a pool of the non-combustible portions in a fused mass and retaining said fused mass in a pool until reduction is substantially complete.

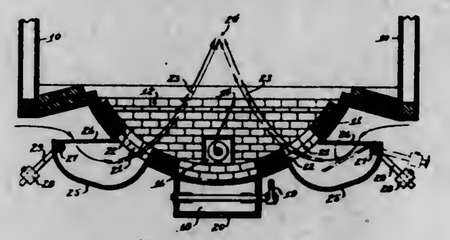
1,900,321. BINDER RING. GEORGE E. WHITE, San Diego, Calif. Filed Dec. 3, 1930. Serial No. 499,707. 5 Claims. (Cl. 281—25.)



4. In a device of the class described, a binder ring comprising a pair of complementary semi-circular members, hinge means at one end of each semi-circular member joining the same together, a radially extending arm at the opposite end of each semi-circular member, said binder ring arranged to receive a sheaf of perforated paper by insertion over one of said arms and a retaining means for receiving said arms when close together for holding said binder ring in closed position.

1,900,322. SHOE-FILLING MACHINE. ALFRED H. AVERY, Malden, Mass., assignor to North American Chemical Company, Cambridge, Mass., a Corporation of Massachusetts. Filed Feb. 19, 1931. Serial No. 516,862. 14 Claims. (Cl. 18—1.)

4. A shoe bottom filling machine comprising a shoe support, a pressing and spreading member having a flexible working face of outwardly bowed spring sheet metal, a number of relatively movable blocks behind said sheet metal, a second bowed sheet metal spring adapted yieldingly to press the movable blocks toward the sheet metal facing, and means to impart relative movement between the shoe support and the pressing and spreading member toward and from each other.

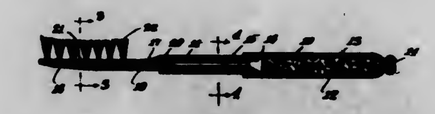


1,900,323. SHOE-FILLING MACHINE. ALFRED H. AVERY, Malden, Mass., assignor to North American Chemical Company, Cambridge, Mass., a Corporation of Massachusetts. Filed Feb. 20, 1931. Serial No. 517,237. 12 Claims. (Cl. 18—1.)

3. A shoe bottom filling machine comprising a pressing and spreading member, a shoe support, means to impart relative movement between the pressing and spreading member and the shoe support toward and from each other, and means to impart to the pressing and spreading member a vibration of partial rotation on an axis substantially parallel to the direction of pressure, thereby to vibrate the working face of said member in a plane transverse to the direction of pressure during its operation on the shoe bottom.

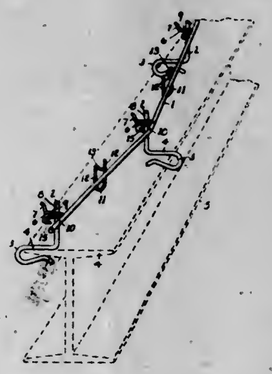
1,900,324. LOCOMOTIVE FIRE-BOX. GEORGE L. BAXTER and FREDERICK W. STRACHAUER, Sacramento, and RALPH S. TWOGOOD, Berkeley, Calif. Filed Oct. 18, 1930. Serial No. 489,566. 3 Claims. (Cl. 158—3.)

1. In a fire-box having a flash wall at one end and a pair of laterally spaced air inlets in its lower portion adjacent the face of said flash wall, a burner adapted to direct a stream of fuel substantially horizontally against the lower central portion of said flash wall, said fuel stream then rising along the face thereof, means for



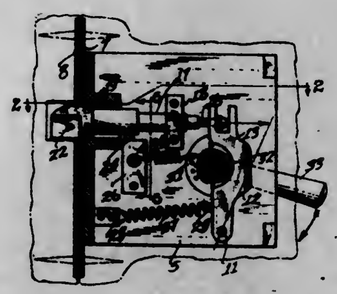
directing the air streams entering through said inlets upwardly over the face of said flash wall and convergingly to a common intersection with the rising fuel stream; and automatic dampers responsive to draft conditions in the fire-box for controlling said air inlets.

1,900,325. AUTOMOBILE TABLE. FRED BAYMAN and RICHARD C. BRENNENHOLTZ, Seattle, Wash. Filed July 25, 1931. Serial No. 553,104. 6 Claims. (Cl. 45—51.)



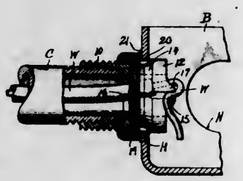
3. An automobile table consisting of a fixed table portion; a second table member hingedly secured to the fixed portion; a guide way fixedly secured to the fixed portion; a support member, having a standard adapted to engage the guide way and a T shaped support bar adapted to support the table; a supporting arm secured to the support member having a pivot pin disposed at its outer-end and a supporting pin adjacent thereto; a pivot member having a slot engaging the pivot pin and a plurality of U shaped openings adapted to engage the supporting pin; and a bracket disposed to pivotably support the pivot member and provide an anchorage for the table.

1,900,326. FOUNTAIN TOOTHBRUSH. JOSEPH W. BERESFORD, Clifton, N. J. Filed Apr. 1, 1931. Serial No. 526,798. 2 Claims. (Cl. 15—187.)



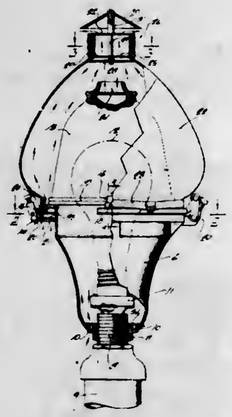
1. A tooth brush comprising an elongated head of semi-elliptical cross section having a cylindrical shank provided with an external thread and containing a duct, a bristle carrying plate secured on the flat side of said head having a central opening communicating with the duct, a tubular paste container handle having a cap at its outer end and provided with an internal thread, and a connector element of hexagonal cross section provided with a bore, an internal thread to engage the shank of said head, an enlarged externally threaded opposite end to engage said handle and a conical cavity within the enlarged end open to its bore.

1,900,327. STRUCTURAL UNIT. DEWEY H. BITNEY, Albion, Mich., assignor to Union Steel Products Company, Albion, Mich. Filed Jan. 11, 1932. Serial No. 585,824. 10 Claims. (Cl. 72—109.)



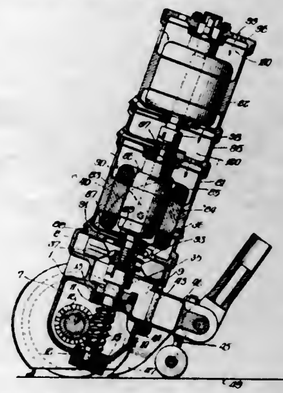
3. A structural unit comprising a longitudinal rod of springable material, a plurality of support engaging members fixedly secured to said rod in spaced relation to project at each side thereof and having hooks at one end engageable with the flange of a beam or like structural element, the hooks of adjacent support engaging members being disposed to engage opposite edges of the supporting element, reinforce holders fixedly secured to the other ends of said support members and having spring arms disposed in spaced relation to the rod and terminating in inturned reinforce engaging hooks, and U-shaped clips disposed transversely of said longitudinal rod intermediate its said upper members, one arm thereof being fixedly secured to the rod, the other arm being free and springable to receive a reinforcing element and having its end directed inwardly to provide a reinforce engaging member.

1,900,328. AUTOMATIC DOOR TIGHTENER. ROBERT BOGGS, Daly City, Calif. Filed Mar. 8, 1932. Serial No. 597,583. 3 Claims. (Cl. 292—242.)



1. In a latch, a housing, a keeper, said keeper having an opening formed therein, a bolt slidable in said housing, said bolt having a spiral groove formed therein, a stationary pin positioned in said housing and engaging said groove to cause rotation of said bolt when said bolt is moved with respect to said pin, said bolt being equipped with means for engaging and causing a camming action in the opening of said keeper to cause lateral displacement between said keeper and said housing.

1,900,329. GROUND WIRE COUPLER. STEPHEN N. BUCHANAN, New York, N. Y., assignor to The Thomas & Betts Co., Elizabeth, N. J., a Corporation of New Jersey. Filed June 25, 1927. Serial No. 201,518. 20 Claims. (Cl. 247—1.)



1. In combination with an outlet box provided with an outlet hole, a coupler sleeve disposed in the hole, means upon the sleeve to which a cable protective covering is connected, box hole anchorage means carried with the coupler sleeve, ground wire receiving jaws carried with the coupler sleeve, and a single operating means carried on the sleeve to clamp the box wall between the operating means and the box hole anchorage means and to simultaneously pinch the jaws together.

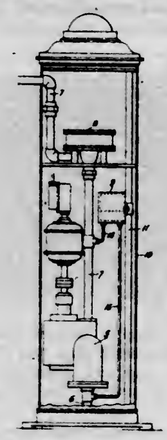
1,900,330. LIGHTING FIXTURE. JOHN B. CHARTRAND, Cleveland, Ohio, assignor to Line Material Company, South Milwaukee, Wis., a Corporation of Delaware. Filed Aug. 21, 1931. Serial No. 558,451. 10 Claims. (Cl. 240—25.)

1. In a lighting fixture, a substantially cup shaped body member open at its top and provided with an air inlet opening in its closed bottom, lamp supporting means within the body member adjacent its closed bottom adapted to receive the base of an incandescent lamp, whereby the base of the lamp is near the air inlet opening, an inverted glass bowl having an air outlet opening in its closed top and positioned over the open top of the body member whereby air entering the inlet opening at the bottom of the body member and becoming heated by a lamp therein rises through the fixture to be exhausted through the air outlet opening, and means for supporting the inverted glass bowl from the open top portion of the body member so as to provide a second air inlet opening adjacent the bottom of the glass bowl, whereby cool air is drawn into the fixture to pass upwardly along the inner wall of the glass bowl.

1,900,331. WOOD SURFACING MACHINE. ALEX A. CLARKE, Chicago, Ill., assignor to Thomas B. Bennett, Muskegon, Mich., and himself, jointly. Filed July 13, 1928. Serial No. 292,393. 3 Claims. (Cl. 51—176.)

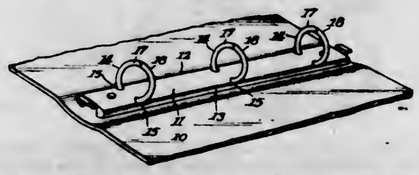
1. In a floor surfacing machine, a motor unit, a downwardly extending driving shaft in said unit, a driving mechanism on the lower end of said shaft, a driven shaft extending from said driving mechanism transversely to said driving shaft and freely projecting therefrom, a pair of abrading drums mounted on the opposite ends of said shaft, a fan mounted on said driving shaft between said driving mechanism and said motor unit, a casing forming a chamber enclosing said driving mechanism and a chamber enclosing said fan, a pair of intake ducts extending from said fan chamber in the rear of said drums, said intake ducts terminating in elongated nozzles constituting at their ends chambers enclosing said drums, and rolling means mounted on said intake ducts rearwardly of said drum chambers.

1,900,332. TRACING DEVICE FOR INSTRUMENTS SUCH AS INTEGRAPHS AND THE LIKE. OSWALD CORADI, Zurich, and WALTER LEEMANN, Ruschlikon near Zurich, Switzerland. Filed Mar. 25, 1931, Serial No. 525,216, and in Switzerland Apr. 4, 1930. 8 Claims. (Cl. 88—1.)



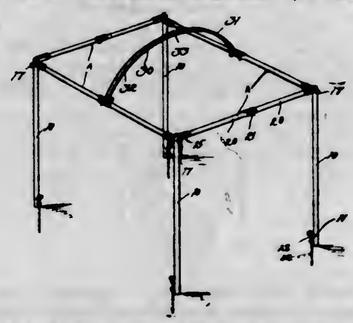
1. In an instrument of the class described, a guide member, a transparent plate slidable longitudinally on the guide member and having an index line parallel with a side of the guide member, an arm at right angles to the guide member, and a cylindrical glass body carried by the arm and movable longitudinally of the guide member, said body forming a lens and having a curved upper face, and being provided at the lower end with an index mark for coaction with the index line of said transparent plate.

1,900,333. PRESSURE CONTROLLING DEVICE FOR A LIQUID DISPENSING APPARATUS. WILLIAM H. CURTIS, Dayton, Ohio, assignor to National Pumps Corporation, Dayton, Ohio, a Corporation of Ohio. Filed Sept. 12, 1932. Serial No. 632,693. 7 Claims. (Cl. 221—95.)



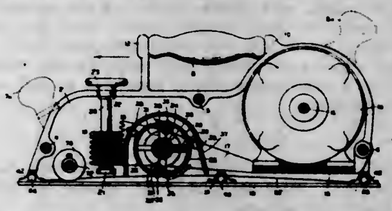
1. A controlling device for a dispensing apparatus having a suction line and a pressure line, comprising an expansion chamber adapted to contain liquid and air under pressure, and means for establishing a continuously open

connection between said expansion chamber and said pressure line and said suction line and for so controlling the flow of liquid through said connecting means as to main-



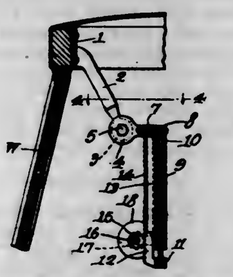
tain in said expansion chamber at all times a quantity of liquid sufficient to substantially compress the air in said expansion chamber.

1,900,334. LOOSE LEAF BINDER. JAMES C. DAWSON, Webster Groves, Mo., assignor to Elma N. Dawson, Webster Groves, Mo. Filed Mar. 4, 1931. Serial No. 519,945. 10 Claims. (Cl. 129—24.)



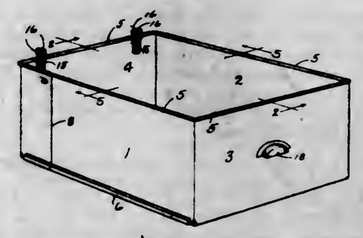
6. In a loose leaf binder, a plurality of conventional paper holding rings, a plurality of longitudinal members rigidly affixed to the rings, means for resisting lateral movement of the longitudinal members, said rings forming the toggle elements of the device together with the longitudinal members.

1,900,335. COLLAPSIBLE TENT AND FRAME. AMBROGIO DEL VECCHIO, Hawthorne, N. Y. Filed June 4, 1931. Serial No. 542,134. 6 Claims. (Cl. 135—4.)



1. A folding tent frame, comprising uprights, U-shaped clips removably carried by said uprights, horisontally extending members pivotally mounted in said clips, and means for connecting together, the horisontal members of adjacent uprights.

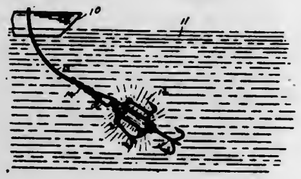
1,900,336. WOODWORKING MACHINERY. JOHN J. EGAN, San Francisco, Calif. Filed Feb. 28, 1931. Serial No. 518,920. 1 Claim. (Cl. 144—117.)



A power plane comprising a pair of interspaced plates; rods rigidly connecting said plates and located above the bottom plane thereof; a frame between said plates having one end pivoted on one of said cross rods; a rotatable cutter journaled in the opposite end of said frame; means to raise and lower said frame and cutter with respect to said plates; a motor mounted on said frame intermediate said pivot and cutter; power transmission means driven by said motor and operatively engaging said cutter; a flexible horizontal guide attached to the bottom of each of said plates; and means for curving said guides.

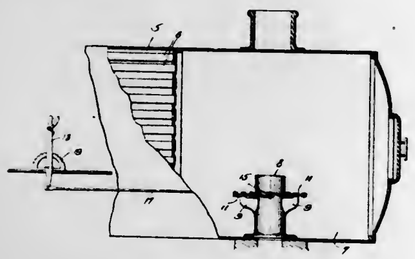
1,900,337. GLARE SHIELD. LEO FUCHS, Cameron, Tex. Filed Mar. 27, 1931. Serial No. 525,813. 1 Claim. (Cl. 296—97.)

The combination with an attaching bracket, of a frame supported thereby for angular adjustment, said frame having opposed channels, a transparent panel slidable in the channels, a reinforcing strip along the bottom edge of the panel, a guide on the frame, a rack secured to the strip and extending upwardly above the panel, said rack movably engaging the guide, a transverse shaft supported by the frame, means for rotating the shaft, and a gear on the shaft engaging the rack.



1,900,338. DRAWER CONSTRUCTION. WALTER M. HANSON, Grand Rapids, Mich., assignor to American Seating Company, Grand Rapids, Mich., a Corporation of New Jersey. Filed Sept. 25, 1931. Serial No. 565,100. 2 Claims. (Cl. 45—7.)

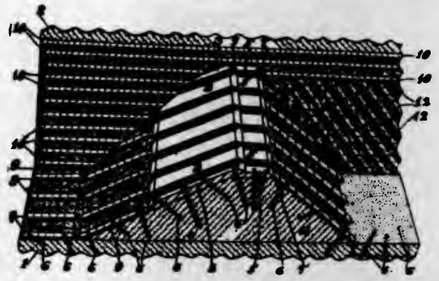
1. In a sheet metal cabinet having oppositely disposed parallel drawer guides, a sheet metal drawer therefor comprising sides and ends of a single strip of sheet metal, the



lower corners of which are blanked out, outwardly pressed ribs adjacent each longitudinal bottom edge of each of the sides above the said blanked out portions adapted to slidingly fit within said drawer guides of the cabinet, said ribs terminating short of the drawer ends, the blanked out portion below said ribs being bent inwardly to form a flange which substantially surrounds the said sides and ends, and a sheet metal bottom supported on and secured to the said flange.

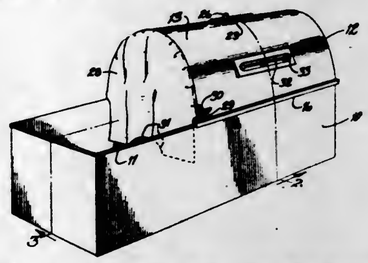
1,900,339. FIREFLY. BILLINGTON C. HARRELL, San Antonio, Tex. Filed Mar. 28, 1932. Serial No. 601,623. 1 Claim. (Cl. 43—44.)

A fire fly comprising a body bolt, a glass tubing, a pair of cork washers within said tubing spacing said tubing from said body bolt, phosphorescent paint on the inside of said glass tubing, means for sealing the inside of said glass tubing water tight, washer means on the outer sides of said cork washers, a nut on the outside of each washer means for holding the same assembled, fish hook supporting arms integrally projecting from one of said washers, a propeller on said body bolt, a second nut holding said propeller securely thereon, means in said body bolt for attaching the same to a swivel line, and means in said body bolt for receiving another fish hook.



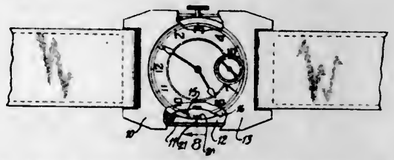
1,900,340. DRAFT REGULATOR. ERNEST S. HAYNE, Birmingham, Ala., assignor of one-third to John T. Large and one-third to C. C. Hayne, Birmingham, Ala. Filed Dec. 21, 1931. Serial No. 582,403. 1 Claim. (Cl. 230—100.)

The combination with the exhaust nozzle of a locomotive, said nozzle having circular openings formed in opposite sides thereof, of a draft regulator comprising bars circular in cross section, operating through the openings in opposite directions and in alignment with each other adjusting the area of the nozzle, and means for operating the bars simultaneously.



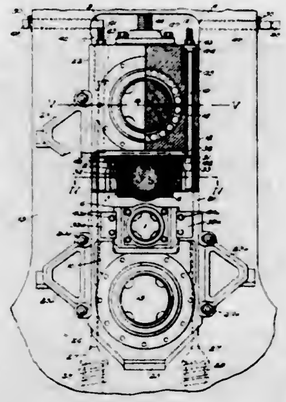
1,900,341. MEANS FOR PROTECTING EARTHEN DAMS, RIVER LEVEES, ETC. SKELTON D. HENRY, Houston, Tex. Filed Aug. 31, 1931. Serial No. 560,403. 2 Claims. (Cl. 61—37.)

1. A water-retaining earthen dam having a series of beams overlying its crest and the upper part of its water face, the said beams being in a combination with metallic gutters, the said beams having their upper longitudinal corners chamfered and two narrow vertical grooves (one adjacent to each chamfered corner) extending the length of the face of the beam, the metallic gutters being con-



caved and their margins flanged downward, the flanges fitting into the aforesaid grooves, the gutters covering the gaps between any two adjacent beams and secured thereto by nails to prevent the leakage of water therethrough.

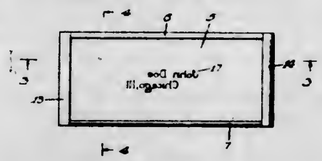
1,900,342. INFANT INCUBATOR. JULIUS H. HESS, Chicago, Ill. Filed Aug. 3, 1929. Serial No. 383,403. 1 Claim. (Cl. 128—1.)



An infant incubator comprising a crib having connected vertical imperforate metal walls defining a box-like structure, a canopy having imperforate metal side walls of less length than the side walls of the crib and one end wall each flanged at their lower edge for sealing and interlocking engagement with the corresponding upper edge portions of the crib walls, a flexible partition extending from the other end of the canopy into the crib between the vertical side walls thereof, whereby to form a removable enclosure with said walls at the foot end of the crib, and means for heating and ventilating said crib carried by said canopy.

1,900,343. WATCH. EDWARD HOWARD, Elgin, Ill., assignor, by mesne assignments, to Elgin National Watch Company, Chicago, Ill., a Corporation of Illinois. Filed June 20, 1930. Serial No. 462,505. 1 Claim. (Cl. 58—88.)

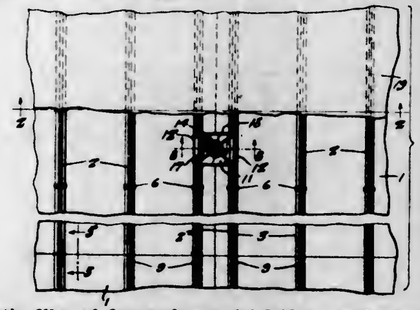
In a watch, the combination of a movment ring provided with an opening, a movement located within the opening, the movement having a flange adapted to rest upon the surface of the ring around the opening therein, which flange is provided with a recess, and a rigid tongue carried by the ring and bent upwardly above the surface thereof to enter the recess.



1,900,344. ROLL MOUNTING. LORENZ IVERSEN, Pittsburgh, Pa., assignor to Mesta Machine Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 29, 1929. Serial No. 367,032. 24 Claims. (Cl. 80—38.)

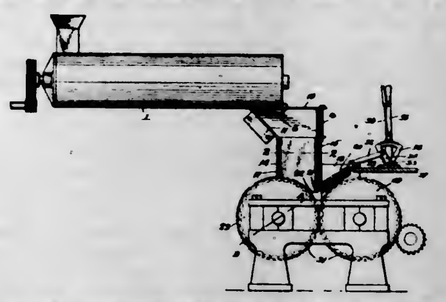
1. In a mill, a backing roll, a chuck therefor, a working roll carried by said chuck, a rigid supporting surface in said chuck in one horizontal plane, and a resilient supporting surface in said chuck in a different horizontal plane, said surfaces being successively effective for supporting the working roll upon relative vertical movement between the chuck and working roll.

7. In a rolling mill, a housing, bearing chucks mounted therein for adjustment in a plurality of directions, antifriction bearings in said chucks, a backing roll journaled in said bearings, additional bearing chucks having antifriction bearings suspended from the backing roll bearing chucks out of contact with said housing, and a working roll journaled in the bearings of said last mentioned chucks.



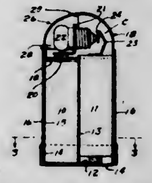
1,900,345. PRINTING DEVICE. JAMES P. JACKSON, Chicago, Ill., assignor to Addressograph Company, Wilmington, Del., a Corporation of Delaware. Original application filed Oct. 17, 1930, Serial No. 489,278. Divided and this application filed Jan. 2, 1932. Serial No. 584,381. 9 Claims. (Cl. 101—369.)

1. A printing device having marginal sections along opposite edges thereof and folded onto one face thereof, said device having other marginal sections along other opposite edges thereof folded to provide abutment surfaces, the edges of the last-named marginal sections engaging the ends of said first-named marginal sections, all of said marginal sections providing a raised border on one face of said printing device.



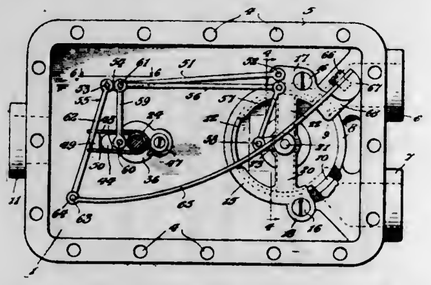
1,900,346. ROOF AND FLOOR STRUCTURE. WALTER D. JARVIS, Pittsburgh, Pa., assignor of one-half to Frank W. Jarvis, Pittsburgh, Pa. Filed July 1, 1931. Serial No. 548,204. 9 Claims. (Cl. 72—66.)

1. In a structure as described sections of fireproof material having abutting edges, rails laid upon said sections in parallel relation, means for clinching the rails to the sections, a bridging plate disposed over the seam between the sections and provided at opposite edges with flanges disposed over the adjacent rails, said bridging plate having at its intervening edges upstanding flanges, and a



plastic filler of fireproof material laid upon the sections between the rails and having an upper surface troweled to a level above the upper edges of the rails.

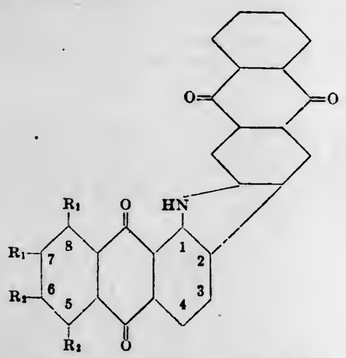
1,900,347. COAL BRIQUETTING EQUIPMENT. EMORY E. JONES, Bluefield, W. Va., assignor to Winding Gulf Collieries, Bluefield, W. Va. Filed Dec. 15, 1931. Serial No. 581,228. 3 Claims. (Cl. 44—12.)



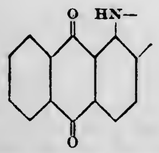
1. A coal briquetting press embodying cooperating rolls journaled for rotation, a hopper above and discharging between the rolls, and a gate slidable at the lower end of the hopper, at an acute angle to the line of flow through the hopper, the inner corners of the gate being cut away, adjacent to one roll, and at the sides of the hopper.

1,900,348. FLASH LIGHT. HOMER W. JONES, Williamsville, N. Y., and HERMAN G. GRAUBNER, Lakewood, Ohio, assignors to National Carbon Company, Inc., a Corporation of New York. Filed July 3, 1930. Serial No. 465,669. 4 Claims. (Cl. 240—10.67.)

1. In a flashlight; a battery having the electric poles thereof in contiguous relation; a hood covering said poles and having an opening therein; a lamp bulb carried by one pole of said battery; a movable visor closing said opening in one position thereof and exposing said lamp bulb in another position thereof; a flexible conductor carried by the other pole of said battery in a position opposite one terminal of said lamp bulb and also in the path of said visor by which it is moved into contact with said lamp bulb to complete the electric circuit through said battery and bulb.



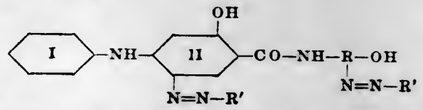
1,900,349. THERMOSTATIC MIXING VALVE. WALTER G. KLINGBEIL, Portland, Oreg. Filed Aug. 22, 1931. Serial No. 558,793. 4 Claims. (Cl. 236—12.)



1. In a thermostatic mixing valve, a casing having inlets for hot and cold water and an outlet, a valve to control flow through the inlets, a stem for said valve, a crank fixed to said stem, a shaft rotatably mounted in the casing and projecting therefrom, a crank carried by and turning with the shaft, an arm loose upon the shaft above and normally alined with said crank, a spring carried by the crank and engaging opposite sides of the arm whereby the shaft and arm may move together when the shaft is rotated and the arm may move about the shaft when the shaft is stationary, a thermostatic strip anchored at one end in the casing, and connections between the opposite end of said strip and said arm and the crank on the valve stem.

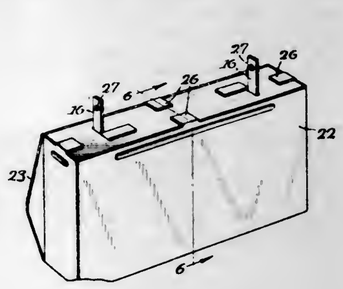
1,900,350. VAT DYESTUFFS OF THE ANTHRACENE SERIES. GEORG KRÄNZLEIN and PAUL OCHWAT, Frankfort-on-the-Main-Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Aug. 21, 1928, Serial No. 301,166, and in Germany Sept. 7, 1927. 2 Claims. (Cl. 260—46.)

1. As new products, dyestuffs substantially identical with those obtainable by treating a dyestuff of the following probable constitution:



wherein either the two R_1's or the two R_2's are substituted by the group

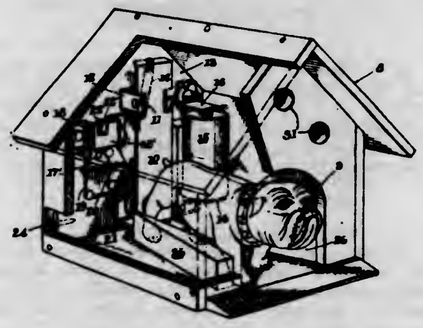
the imino group occupying the 8-position or the 5-position in the central anthraquinone molecule, with concentrated sulfuric acid, while cooling, diluting the reaction product with water and after-treating the precipitate with a solution of hypochlorite, the said products being when dried orange powders, sparingly soluble in organic solvents, of a high melting point over 360° C. and yielding yellow to orange dyeings of excellent fastness to light and washing.



1,900,351. NEW AZODYESTUFFS. LEOPOLD LASKA and ARTHUR ZITSCHER, Offenbach-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 29, 1930, Serial No. 492,080, and in Germany Nov. 5, 1929. 10 Claims. (Cl. 260—70.)

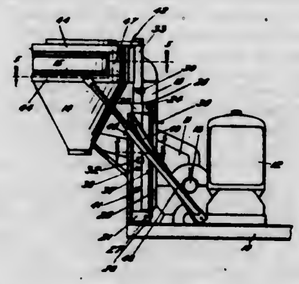
1. As new compounds the azo-dyestuffs of the probable general formula:

wherein the benzene nucleus I may be substituted by alkyl, alkoxy or halogen, R means an aromatic radical of the benzene or naphthalene series and R' means a radical of the benzene, naphthalene or anthracene series which may contain an alkyl, alkoxy, phenoxy, phenylazo or nitro-group or halogen, which compounds yield when produced on a substratum brown to black shades.



1,900,352. CONDENSER AND METHOD OF MAKING THE SAME. ROBERT O. LEWIS, Chicago, Ill., assignor to Grigsby-Grunow Company, Chicago, Ill., a Corporation of Illinois. Filed July 13, 1929. Serial No. 378,100. 12 Claims. (Cl. 175—41.)

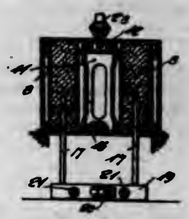
1. A condenser comprising a pair of spaced metallic ribbons wound into a coil, dielectric material between said metallic ribbons, said metallic ribbons being laterally displaced whereby the edge of one ribbon projects from one end of the coil and the opposite edge of the other ribbon projects from the other end of the coil, a strip terminal member for the projecting edge of each metallic ribbon, the portion of the terminal member contacting with the end of the coil being cupped to hold a limited quantity of solder, and the cupped portion being filled with solder for securing the terminal to the coil.



1,900,353. TOY. CHRISTOPH MARCHETTI, Chicago, Ill. Filed Nov. 10, 1932. Serial No. 641,976. 3 Claims. (Cl. 46—49.)

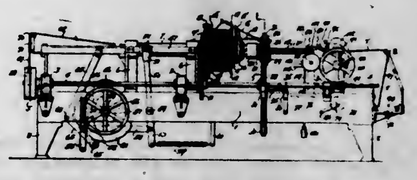
1. A toy comprising a dog house having a door opening in its front and a movable rear wall, a spring-operated ejector and a magnet mounted on said rear wall, a vibration sensitive switch, an electric circuit including said ejector, battery, magnet and switch, said ejector adapted to be set for operation in said circuit when a toy dog is pushed through the door opening into the house and against said ejector, said switch adapted to be operated by sound close to the door opening to open the circuit and release the ejector, and said rear wall adapted to be moved

to permit replacement of the battery, and guides for guiding the dog when it is pushed into the house to set the ejector and when it is ejected from the house.



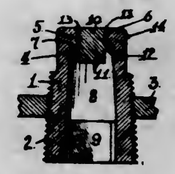
1,900,354. MEANS FOR SUPPORTING A SEPARATING HOPPER AS APPLIED TO PORTABLE MILLS. EARL L. MARTIN, Des Moines, Iowa. Filed Jan. 26, 1931. Serial No. 511,241. 6 Claims. (Cl. 248—2.)

3. The combination of a rectangular frame, an angle iron supported vertically from one corner of said frame, a brace member connected to the outer surface of each flange of said angle near its upper end, one of said braces being connected to one of the side members of said frame and the other to one of the end members of said frame, a second angle slidably mounted longitudinally of the first angle, guides carried by the first angle for slidably supporting the second angle, a laterally projecting supporting bracket fixed to the upper end of the slidable angle, a telescopic brace member having one end pivotally connected to one side member of said bracket and its opposite end to the corresponding side member of said supporting bracket to prevent swinging movement of said supporting frame about the longitudinal axis of said supports.



1,900,355. METHOD AND APPARATUS FOR MAKING ICE CREAM BARS, STICKS, OR THE LIKE. WILLIAM MAURER, Queens Village, N. Y. Filed Apr. 4, 1932. Serial No. 603,140. 17 Claims. (Cl. 107—19.)

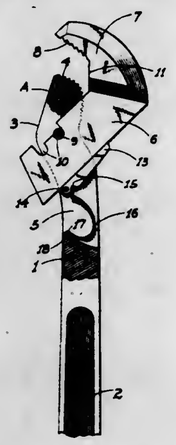
8. A method of producing coated ice cream bars comprising the mixing of cream to a semi-frozen state, applying a plunger-like mold to a quantity of said cream to fill predetermined portions of the mold, freezing the cream in said mold to a full frozen state to form masses of frozen cream, supporting the masses of frozen cream in the mold on means impaled within the cream, removing the mold to permit the masses of frozen cream to remain on said supporting means, coating the cream while on the supporting means with a chocolate mixture, depositing the



masses of frozen cream in wrappers and applying a stick to each mass of frozen cream to facilitate the handling thereof.

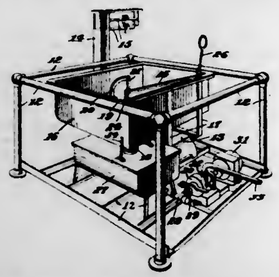
1,900,356. MACHINE FOR FABRICATING SCOURING DEVICES, MOP HEADS, AND SIMILAR ARTICLES. DANIEL J. MAYER, Belleville, N. J., assignor to Metal Textile Corporation, West Orange, N. J., a Corporation of Delaware. Filed July 8, 1931. Serial No. 549,345. 22 Claims. (Cl. 300—16.)

1. An automatic machine of the kind described, comprising a mandrel, power actuated means to wind flexible material in convolutions about said mandrel to form looped ends, timed means to discharge a segregated quantity of the wound convolutions from the mandrel, means to receive the discharged convolutions adapted to bunch together the portions thereof intermediate their oppositely extending loop ends, and power actuated means to apply a tie-wire about said bunched portions.



1,900,357. BOILER DROP-PLUG. GEORGE MCCORMICK, Redwood City, and FRANK E. RUSSELL, Alameda, Calif. Filed Feb. 23, 1932. Serial No. 594,566. 3 Claims. (Cl. 122—504.3.)

1. A boiler drop-plug comprising a body-member having upon its exterior surface near one end a relatively easily disfigurable chased section, said body member having also a through bore, which for a distance inwardly from the end within said chased section, is cylindrical and of a diameter less than the diameter of the remainder of the bore, whereby an internal annular shoulder is formed; a drop-plug member having at one end a cylindrical portion adapted to fit within the reduced end of the body-bore and having also a flange of greater diameter than said reduced end, said flange being seated against the

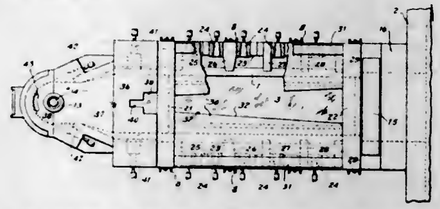


internal shoulder of the bore, with peripheral clearance from the side wall of said bore; and a cylindrical fusible cementing member between the opposing surfaces of the reduced end of the body-bore and the portion of the drop-plug member fitting therein.

1,900,358. ADJUSTABLE JAW WRENCH. HOMER A. MEAD, Turlock, Calif., assignor to Masterench Corporation, Turlock, Calif., a Corporation. Filed Apr. 9, 1931. Serial No. 528,713. 1 Claim. (Cl. 81—110.)

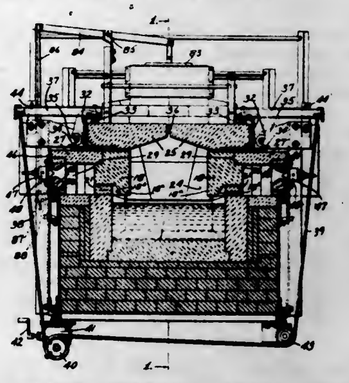
A wrench comprising a straight shank terminating in an elbow offset to one side of the longitudinal center line of the shank, the outer end of the elbow forming the fixed jaw of the wrench, the elbow and the adjacent portion of the shank having a slot therethrough, a pin in the bend of the elbow extending across the slot, a movable jaw to cooperate with the fixed jaw and having a shank mounted for movement through the slot below the pin, the upper edge of said last named shank having spaced notches to engage the pin, and yieldable means engaging said last named shank to exert turning pressure on the same to move the jaw thereof to a closed position.

1,900,359. MILK WEIGHING APPARATUS. HARRY L. MILLER, Chester, Pa. Filed Aug. 11, 1931. Serial No. 556,444. 5 Claims. (Cl. 265—27.)



1. A milk weighing apparatus comprising a scale, a weighing tank carried thereby and provided at its bottom with an outlet tube having valve seats at its top and bottom, a manually-controlled valve fitting the upper valve seat on said tube and which, when resting on said valve seat, will close the outlet from said tank, a stationary receiving tank located below said weighing tank, a float in said receiving tank and a valve on said float fitting the lower valve seat on said tube.

1,900,360. HAIR CURLER. JOHN MUELLER, Chicago, Ill. Filed June 11, 1932. Serial No. 616,602. 15 Claims. (Cl. 132—33.)



1. In a curler of the character described, the combination of a spindle-like member adapted to have the inner half of a lock of hair wrapped therearound, a second spindle-like member adapted to have the outer half of the lock of hair wrapped therearound, and means for connecting the two members in end-to-end relation.

1,900,361. FOREHEARTH FOR MOLTEN GLASS. VERGIL MULHOLLAND, West Hartford, and ALFRED R. HUNTER, Hartford, Conn., assignors to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Oct. 23, 1929. Serial No. 401,831. 12 Claims. (Cl. 49—55.)

1. A forehearth having a channel for conducting molten glass from a melting furnace or other source of supply to a place at which glass is to be removed, means providing a cover structure for the channel, said cover structure having a longitudinally extending opening above the middle portion of the glass in said channel, said longitudinal opening being of different widths at the opposite ends thereof.

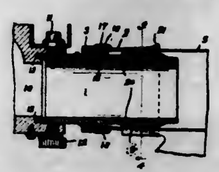
1,900,362. FOREHEARTH FOR MOLTEN GLASS. VERGIL MULHOLLAND, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed June 14, 1930. Serial No. 461,132. 9 Claims. (Cl. 49—55.)

9. In a forehearth structure, a refractory channel for receiving molten glass from a source of supply and along which such glass may flow in a stream, a cover structure for the channel and cooperating therewith to provide a conditioning chamber for the glass in a portion of the channel, a combustion space adjacent to the channel and communicating with the space above the glass of a side portion of a stream through a narrow passage extending along the side of said conditioning chamber for the greater part of the length of the chamber, a baffle lip at the inner side of said passage for deflecting heated gases downwardly onto the glass at the adjacent side of said channel, a burner arranged to discharge laterally inward through the outer wall of said combustion chamber, said burner being located approximately intermediate the length of the combustion chamber, baffle means extending parallel with said chamber for preventing direct projection of flame from said burner into said communicating passage between the combustion chamber and the space above the forehearth channel and for distributing flame from the burner longitudinally of said communicating passage, and means for admitting air adjacent to said burner tip to support combustion and to aid in effecting practically complete combustion at a relatively short distance from said burner tip.

1,900,363. HEAT EXCHANGE APPARATUS. EMILE J. PARENT, Hartford, Conn., assignor to The Whitlock Coil Pipe Company. West Hartford. Conn.. a Corporation of Connecticut. Filed May 15, 1931. Serial No. 537,645. 15 Claims. (Cl. 257—206.)

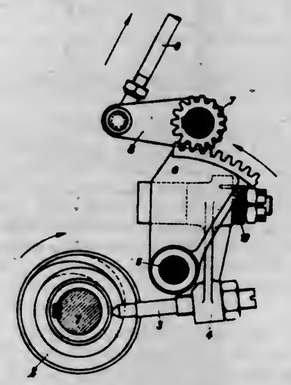
2. In a heat exchange apparatus of the character described, structure defining a waste water pit and having in its floor a longitudinally extending narrow groove, a preheater apparatus positioned in said pit and comprising a unitary structure having a plurality of stages, partition means dividing said pit into a plurality of waste water chambers and including a longitudinally extending metal partition member positioned between the stages of said preheater and having its lower edge engaged in said groove, said chambers being connected in series and each having an inlet at one end and adjacent the top, and an outlet at the other end adjacent the bottom.

1,900,364. GUN PORT FOR BULLET-RESISTING STRUCTURES. SYLVAN R. POPP, Minneapolis, Minn., assignor to O. B. McClintock Company, Minneapolis. Minn.. a Corporation of Minnesota. Filed Jan. 15. 1932. Serial No. 586,916. 11 Claims. (Cl. 89—36.)



1. A panel having a gun port, a self-closing closure for the gun port, an automatic latch for holding the closure closed, and common means by which the latch may be released and the closure opened.

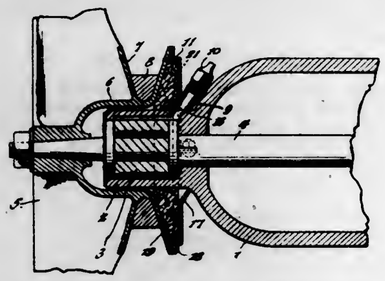
1,900,365. CONDENSATION PRODUCT FROM ALIPHATIC ALDEHYDES AND BASES OF THE NAPHTHALENE SERIES. ERICH RIETZ and WILHELM HOFFMANN, Elberfeld, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed May 9, 1929. Serial No. 361,840. 13 Claims. (Cl. 260—130.)



1. In the process of preparing new anti-oxidants, the step which comprises heating alpha-naphthylamine with an aldehyde of the group consisting of acetaldehyde, crotonaldehyde and aldol in the presence of an acid and of a water-soluble alcohol until the reaction product has separated.

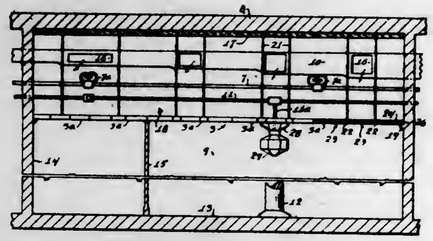
1,900,366. BAG COUPLING. FREDERICK RIEBEL, Jr., and DEWEY M. DOW, Toledo, Ohio, assignors to Air-Way Electric Appliance Corporation, Toledo, Ohio, a Corporation of Delaware. Filed May 28, 1931. Serial No. 540,525. 7 Claims. (Cl. 285—71.)

1. A suction cleaner bag coupling comprising a tube forming a continuation of the fan casing outlet of said cleaner, an annular enlargement formed on said tube toward its projecting end, a sleeve encircling said tube between the fan casing and said projecting end, said sleeve being tapered outwardly toward said end and slidable axially on said tube, an intermediate region of the interior tapered surface thereof being adapted to contact the exterior surface of said enlargement, and means located between the fan casing and projecting end of said tube, to axially advance and securely hold said sleeve in engagement with a bag neck received between said sleeve and said enlargement.



1,900,367. MEANS FOR STARTING INTERNAL COMBUSTION ENGINES. LAZAR SCHARGORODSKY, Hanover, Germany, assignor to the Firm Hannoversche Maschinenbau-Actien-Gesellschaft vormals Georg Egestorff Hanomag, Hanover-Linden, Germany. Filed Aug. 15, 1930, Serial No. 475,610, and in Germany Nov. 7, 1929. 4 Claims. (Cl. 123—182.)

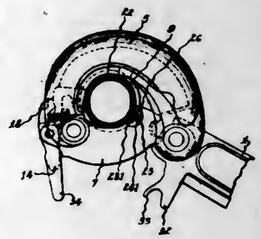
1. Mechanism for closing the exhaust when starting internal combustion engines comprising a rotary shaft formed with a worm portion, a second shaft, a toothed segment rotating about the second shaft, a lever arm pivotally associated with said segment, a pin carried by said



arm for engagement with said worm whereby on the worm shaft being rotated, the toothed segment rotates in one plane and the pin oscillates in a plane at right angles to the aforementioned plane in engagement with the worm.

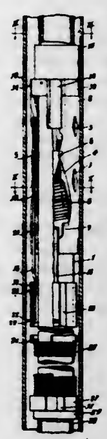
1,900,368. LUBRICANT RETAINER. HARRY R. SHIFFER, Brownstown, Pa. Filed Aug. 3, 1931. Serial No. 554,854. 3 Claims. (Cl. 286—5.)

3. A grease-retaining device for the purposes stated comprising an absorbent washer, a backing disk consisting of two semi-circular members having recesses in their inner peripheries to fit around a bearing each provided with elements to penetrate the washer and prevent relative rotation of the same, mating lugs on the members of the disk, and fastening devices engaged through said lugs, one member of the disk having an inset portion at its inner periphery, and the other member of the disk having a similar outset portion at its inner periphery adapted to engage parts supporting a bearing about which the disk is fitted to prevent relative rotation and sidewise movement of the disk.



1,900,369. BUILDING CONSTRUCTION. HERBERT C. SMITH, Los Angeles, Calif. Filed Jan. 16, 1932. Serial No. 587,080. 5 Claims. (Cl. 20—4.)

1. In a structure having a ceiling, a plurality of inverted T metal frame members angularly intersecting one another to provide a skeletonized false ceiling spaced below the ceiling proper and defining a multiplicity of openings each bounded by an encompassing ledge, foraminous ceiling obscuring inserts one for each opening and resting on the corresponding ledge; said false ceiling and inserts obscuring the space between the false ceiling and the ceiling proper.



1,900,370. TONGS. NELSON K. SMITH, Los Angeles, Calif., assignor to Byron Jackson Co., West Berkeley, Calif., a Corporation of Delaware. Filed Dec. 3, 1927, Serial No. 237,509. Renewed June 12, 1931. 7 Claims. (Cl. 81—66.)

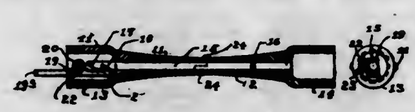
7. In a pipe tong, a handle having associated therewith a plurality of arcuate pipe gripping jaws substantially forming a circle around a pipe to be engaged thereby, a pivot means interconnecting adjacent jaws for inward movement relative to each other to reduce the circle and for outward movement relative to each other to open the circle, a stop formed upon the exterior face of one jaw, a keeper comprising a bar pivoted to the exterior face of the adjacent jaw and extending across said pivot inter-

connecting said jaws for movement in a plane at right angles to the axis of said circle, a spring normally urging said bar toward the face of said adjacent jaw to abut the said stop for limiting outward movement of the jaws to prevent opening of the circle sufficient for the pipe to pass laterally out of the tong.

1,900,371. TUBING CATCHER. NELSON K. SMITH, Los Angeles, Calif., assignor to Byron-Jackson Co., Los Angeles, Calif., a Corporation of Delaware. Filed Mar. 4, 1932. Serial No. 596,728. 5 Claims. (Cl. 103—219.)

2. In a tubing catcher, a head adapted for connection to a string of tubing and having a bore therethrough in concentric alignment with the bore of the tubing, the wall of the head being thicker on one side than on the opposite side, a slip in the thicker wall of said head, and means for actuating said slip.

1,900,372. CORE FOR MOLDS. WESTERN UNDERWOOD, Santa Monica, Calif., assignor to La Lux Manufacturing Company, Los Angeles, Calif., a Corporation of California. Original application filed Dec. 14, 1927, Serial No. 239,915. Divided and this application filed Mar. 22, 1930. Serial No. 437,995. 2 Claims. (Cl. 25—118.)



1. In combination, a tubular rotary post mold, an insert for the mold including a plate for attachment to one end of the mold, and a unitary tubular core fixed to the

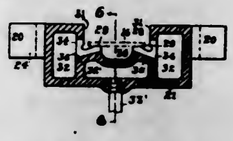
plate to project through the mold to its other end, the plate projecting radially beyond the core to contact with an end of the mold and having an opening in the pro-

jecting part to admit material into the mold and a mounting member to connect said end of the mold with a rotating device, said member closing said opening.

1,900,373. HAIR CURLER OR HAIR WAVE WINDER. FRANK SEHRING, Brooklyn, N. Y. Filed Oct. 8, 1932. Serial No. 636,800. 9 Claims. (Cl. 132—33.)

1. A hair curler or hair wave winder comprising multiple sections, pawl and rack engaging means, for detachably connecting said sections to each other, and a pawl disengaging means for readily disconnecting said sections from each other, whereby the sections of said hair curler or hair wave winder may be removed from a curl when the latter is completed and the curler employed to successively wind a number of curls.

1,900,374. BLADE SHARPENER AND THE LIKE. HOMER D. TRACY, Ridgewood, N. J. Filed Jan. 18, 1930. Serial No. 421,717. 3 Claims. (Cl. 51—195.)



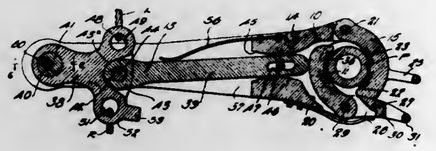
1. A device for sharpening the edge of a flat blade comprising a pair of members adapted to clamp between them the blade to be sharpened and one of which is slidable on the clamping surface of the other, each member having its clamping surface an attrition surface and yieldable to the interposed blade.

1,900,375. EASEL. JOHN WATSON, Passaic, N. J., assignor to Sweeney Lithograph Co., Inc., Belleville, N. J., a Corporation of New York. Filed Oct. 21, 1932. Serial No. 638,889. 17 Claims. (Cl. 40—125.)

4. An easel for flexible posters, comprising an intermediate member, an end member hingedly connected with one end of said intermediate member and having limited hinging movement thereon in one direction, and end member having a hinging and sliding connection with the opposite ed of said intermediate member and having restricted hinging movement in one direction, said end members having free end portions engageable with the edge strips of a flexible poster.

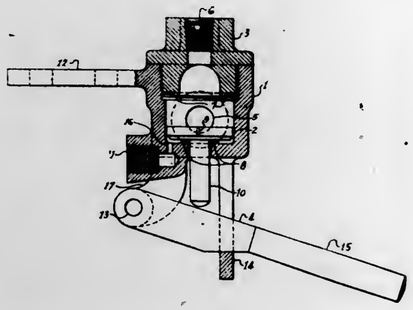
1,900,376. APPARATUS FOR WELDING TUBES. FRED W. WEIR, Pittsburgh, Pa. Original application filed July 14, 1931, Serial No. 550,657. Divided and this application filed Jan. 9, 1932. Serial No. 585,720. 3 Claims. (Cl. 205—9.)

1. In an apparatus for welding together the heated edges of a metallic strip, a blower-head having a channel through which the strip is fed, lateral ports in the head opposite the edges of the strip, a chamber in the blower-head with which the ports communicate, and means to supply highly heated air under pressure to the chamber, the bottom of the channel having transverse ribs on which the strip rests, there being transverse passages between the ribs to conduct the said air from the ports into contact with the lower face of the strip near its edges.



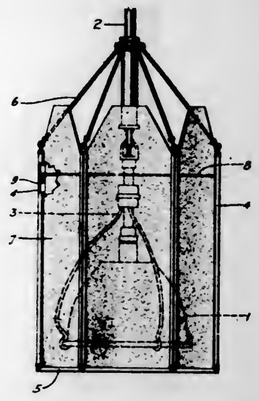
1,900,377. ORNAMENTAL CHAIN. KARL C. AUGENSTEIN, Cranston, R. I., assignor to Edwin F. M. Speidel, Edgewood, R. I. Filed Jan. 28, 1930. Serial No. 424,117. 4 Claims. (Cl. 59—80.)

1. An ornamental chain comprising a plurality of links, each having a pivot bar portion disposed at right angles to the length of the chain, and side sections spaced from



said pivot bar portion and connected thereto by offset arms, the ends of each side section being each lapped over the pivot bar portion of the next link and over each other to hingedly lock the links in parallel relationship.

1,900,378. TONGS. LAWRENCE F. BAASH, Los Angeles, and WILLIAM H. MAXWELL, Beverly Hills, Calif. Filed Aug. 25, 1930. Serial No. 477,586. 11 Claims. (Cl. 81—53.)

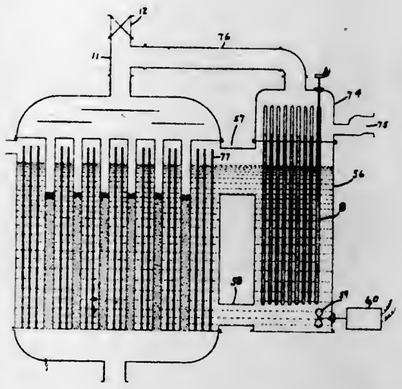


1. A tool of the character described including, a pipe encircling means including an inner part having an opening adapted to receive an object, and a gate adapted to retain an object in the opening, a gripping jaw pivotally carried by the means, a handle on the inner part and means on the handle for operating the jaw into engagement with the object including two pivotally connected toggle links, one of the links being pivoted to the handle adjacent its outer end, the other being adapted to directly engage the jaw, means in the handle for slidably guiding the said other link, and means for adjusting the links longitudinally relative to the jaw to adapt the tool for handling pipe of different diameters.

1,900,379. CONTROL VALVE FOR LOW WATER ALARMS. HARRY W. CODDINGTON, Roanoke, Va. Filed Feb. 13, 1932. Serial No. 592,708. 9 Claims. (Cl. 251—118.)

1. A fluid-pressure control valve for low water alarms, including a body having an inlet opening for admitting fluid pressure from the alarm valve and an outlet opening adapted for fluid connection with the alarm element, and valve means inside said body, said valve means being arranged to lie normally in a position to permit free passage of pressure fluid from the alarm valve to the alarm element through said control valve and to be held in said position by the presence of fluid pressure inside the body thereof, and an orifice of reduced size around said valve means whereby a small predetermined amound of fluid may escape past said valve means to the atmosphere when said valve means is in the first mentioned position.

1,900,380. LIGHTING FIXTURE. REUBEN B. HALM, San Francisco, Calif. Filed Apr. 4, 1932. Serial No. 602,932. 4 Claims. (Cl. 240—78.)

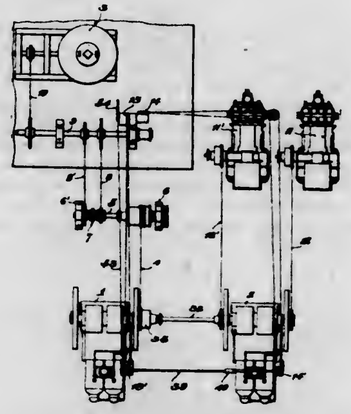


1. In a lighting fixture, a source of light, means associated therewith for giving off a diffused beam and a reflected beam, and a casing for said means having an aperture in the path of said reflected beam and diffusing means in the path of said diffused beam.

1,900,381. SYSTEM FOR PRODUCING GYPSUM. WALDEMAR C. HANSEN, Westfield, N. J., assignor to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed June 9, 1931. Serial No. 543,241. 15 Claims. (Cl. 222—6.)

1. A process of treating acidulous by-product gypsum which comprises subjecting the same to a calcining operation in the presence of a neutralizing agent.

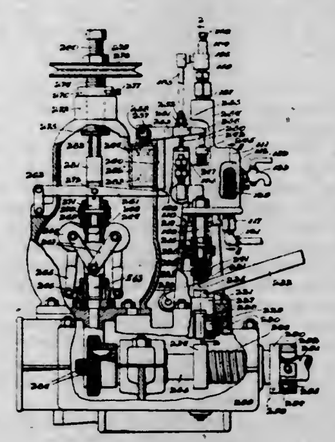
1,900,382. CATALYTIC APPARATUS. ALPHONS O. JAEGER, Crafton, Pa., assignor to The Selden Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Feb. 23, 1928. Serial No. 256,189. 6 Claims. (Cl. 23—288.)



6. A converter comprising in combination a plurality of catalyst containing compartments, a normally non-boiling bath liquid at normal operating temperatures surrounding said compartments, a portion of the converter separated from the catalyst containing compartments by baffling means but provided with connecting means with the top and bottom of the portion of the converter containing the catalyst compartments, the lowest part of the top connection being below the level of the non-boiling bath, heat exchange elements in said remote portions, said heat exchange elements having a portion in heat exchange relation with the non-boiling bath and a portion out of heat exchange relation therewith.

1,900,383. CONTACT SULPHURIC ACID PROCESS. ALPHONS O. JAEGER, Mount Lebanon, Pa., assignor to The Selden Company, Pittsburgh, Pa., a Corporation of Delaware. Filed June 1, 1931. Serial No. 541,328. 8 Claims. (Cl. 23—175.)

1. A process of oxidizing sulphur dioxide to sulphur trioxide, which comprises bringing about reaction between sulphur dioxide and oxygen containing gases in the presence of a catalyst containing diatomite brick fragments with which are associated silver in chemical combination, vanadium in chemical combination and an alkali-forming metal in chemical combination.

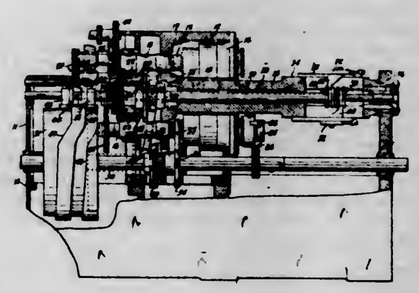


1,900,384. POWER PLANT FOR DRILLING APPARATUS. MARTIN KAHR, Franklin, Pa., assignor to Franklin Valveless Engine Company, Franklin, Pa., a Corporation of Pennsylvania. Filed Mar. 25, 1926. Serial No. 97,417. 9 Claims. (Cl. 255—19.)

5. In rotary drilling apparatus including drilling mechanism and pumping mechanism, an engine for operating each of said mechanisms, and means for combining said engines to operate either of said mechanisms conjointly.

1,900,385. FUEL FEEDING MEANS. MARTIN KAHR, Franklin, Pa., assignor to Franklin Valveless Engine Company, Franklin, Pa., a Corporation of Pennsylvania. Original application filed Mar. 5, 1926, Serial No. 92,573. Divided and this application filed May 19, 1927. Serial No. 192,674. 8 Claims. (Cl. 123—140.)

1. In an internal combustion engine including an engine cylinder and an injection device for injecting liquid fuel thereinto, a pump including a plunger for forcing fuel through said injection device, a by-pass for the fuel, a valve controlling said by-pass and adapted to be moved to open position only during the fuel forcing stroke of said plunger, and means for operating said by-pass valve including a lever cooperating with the stem of said by-pass valve, means for continuously maintaining said lever in pivotal contact with said stem, a fulcrum device for said lever, means responsive to the speed of the engine for variously positioning said fulcrum device, and means positively movable by the plunger of said pump during its

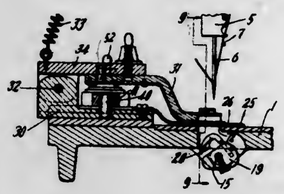


forcing stroke only for moving said lever about said fulcrum and thereby actuating the valve stem through the pivotal contact therewith of said lever.

1,900,386. ABRASIVE PRODUCT AND METHOD OF MAKING THE SAME. JOSEPH NESTOR KUZMICK, Passaic, N. J., assignor of one-half to The Manhattan Rubber Manufacturing Division of Raybestos-Manhattan, Inc., Passaic, N. J., a Corporation of New Jersey, and one-half to John Stogdell Stokes, Spring Valley Farms, Pa. Filed June 24, 1929. Serial No. 373,492. 4 Claims. (Cl. 51—280.)

1. An abrasive composition comprising, abrasive granules and synthetic resin wetted with benzaldebyde, the proportion of the benzaldebyde being low and of the order of 1½% by weight of the composition when using a fine grain of abrasive.

1,900,387. CHUCKING MACHINE. ARTHUR J. LEWIS, Stratford, Conn., assignor to The Baird Machine Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Sept. 25, 1930. Serial No. 484,357. 25 Claims. (Cl. 29—38.)

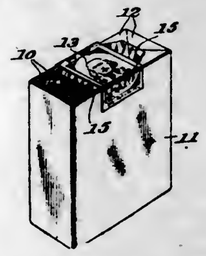


1. In a machine of the character described, a rotary turret, a plurality of work carrying spindles in said tur-

ret providing a plurality of loading stations adjacent each other on the same side of the turret and a plurality of working stations, means for driving the spindles at the working stations, and means for automatically indexing the turret in timed relation with the operation of the spindles to move each spindle the distance between alternate stations after the completion of each working cycle.

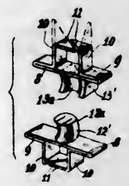
12. In a machine of the character described, a rotatable turret, a plurality of work spindles in said turret providing a plurality of loading stations and a plurality of working stations, chucks on the spindle at one loading station and alternate work stations to grip inwardly on the work, chucks on the spindle at the other loading station and the remaining working stations to grip outwardly on the same work, means at the work stations for driving the spindles, means for disconnecting the driving means from the spindles to permit indexing of the turret, tools at the work stations for performing machining operations on the work at these stations, means for feeding the tools, means for indexing the turret to shift each spindle a distance equal to twice the distance between adjacent spindles, and means for operating the spindle driving means, the tool feeding means and the indexing means in certain timed relation.

25. A method of machining a part comprising holding the part by gripping it on certain surfaces, partly machining the part in alternate stations while so held, then holding the partly machined part by gripping it on other surfaces, performing different machining operations at other alternate stations between the first stations while the part is so gripped, and shifting the part between successive operations to the next alternate station.



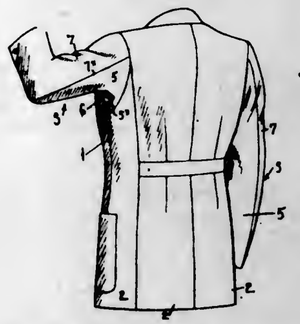
1,900,388. BUTTON SEWING MACHINE. ROBERT L. LYONS, Waltham, Mass. Filed May 17, 1930. Serial No. 453,214. 10 Claims. (Cl. 112—112.)

1. In a machine of the class described, sewing instrumentalities including a pair of needles, a shaft, and a pair of loopers carried by said shaft, a work table, means for supporting an article in position to be attached to work on said table by said instrumentalities, means for moving said article support laterally of the looper shaft alternately in opposite directions between successive sewing strokes of the needles, and means for engaging the threads between the needles and loopers whenever said support is in one of said positions and holding the thread loops in substantially the same relation thereto for cooperation with the needles as when the article support is in the other of said positions.



1,900,389. PACKAGE. JAMES H. REED, Marblehead, Mass. Filed Sept. 22, 1931. Serial No. 564,303. 2 Claims. (Cl. 206—56.)

1. A package of cigarettes or the like, comprising a wrapper having superimposed end closure flaps sealed together, a stamp affixed to said flaps, said flaps being cut away to provide a permanent removal opening adjacent said stamp, and a transparent closure member extending beneath the stamp and between said stamp and

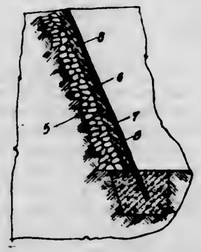


the sealed flaps, said member having a free end beyond the stamp adapted to be lifted to open the package and simultaneously rupture the stamp.

1,900,390. SEPARABLE FASTENER. JOHN A. H. SIMS, Jersey City, N. J. Filed June 29, 1931. Serial No. 547,590. 12 Claims. (Cl. 24—205.)

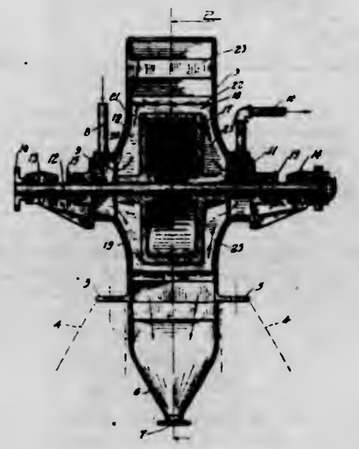
12. In a separable fastener, flexible supporting parts, a series of spaced fastener elements attached to one side face of each of said supporting parts, said elements in each series having interlocking lugs, said lugs on the opposing series of elements projecting in reverse directions and at oblique angles relative to the planes of the respective supporting parts and having co-acting means directly interlocking the opposed lugs with each other.

1,900,391. SLEEVE CONSTRUCTION. LEOPOLD SLANGER, Brooklyn, N. Y. Filed Apr. 6, 1931. Serial No. 527,911. 1 Claim. (Cl. 2—93.)



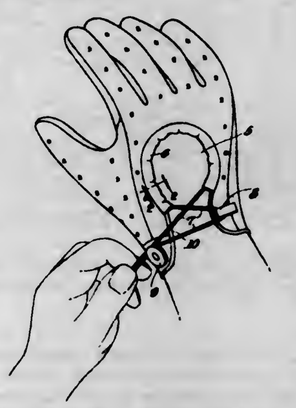
As a new and improved article of manufacture, a sleeve having a top section sewed at its edges to two bottom sections, the said bottom sections having projections of substantially triangular shape at their inner ends to form a tapered and depending projection, the combined widths of said bottom sections being less than the width of said top section, the adjacent edges of said bottom sections being sewed to each other.

1,900,392. PROCESS OF OBTAINING MAGNESIUM SULPHATE. HORACE E. STUMP, Lakeville, Conn., assignor to New England Lime Co., Pittsfield, Mass., a Corporation of Delaware. Filed June 16, 1931. Serial No. 544,921. 2 Claims. (Cl. 23—128.)



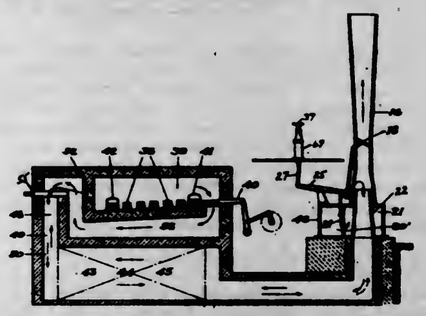
1. In the method of separating magnesium and calcium from a mixture of magnesium oxide and calcium carbonate, such as may be obtained by the partial calcining of magnesium limestone, the step which consists in subjecting such mixture to the action of sulphur dioxide and oxygen in the presence of water to form magnesium sulphate, the calcium carbonate remaining substantially unchanged.

1,900,393. DAM CONSTRUCTION. WILLIAM H. BAILEY, Pueblo, Colo., assignor to The Colorado Fuel and Iron Company, Denver, Colo. Filed Feb. 9, 1931. Serial No. 514,492. 6 Claims. (Cl. 61—30.)



1. A metallic facing for a dam having a flat upstream face consisting of a series of channels each having a flat web and outwardly flared flanges, said channels being arranged to lie side by side with the edges of the flanges of adjacent channels in contact whereby to leave expansion spaces substantially triangular in cross section, said channels having their webs lying throughout against said upstream face and extending vertically thereof.

1,900,394. CENTRIFUGAL THICKENER. ROY H. CORTRELL, Ogden, Utah. Filed Dec. 28, 1931. Serial No. 583,595. 8 Claims. (Cl. 210—51.)

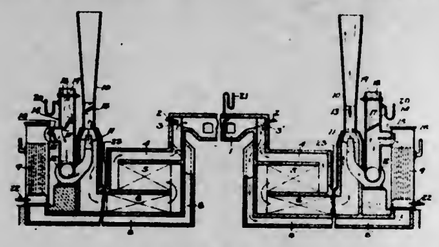


1. A centrifugal thickener comprising a stationary housing, and a rotor in the housing having a radial passage of uniform cross-sectional area, the housing having an inlet and an outlet disposed to cause material to traverse said passages in passing from the inlet to the outlet.

1,900,395. HAND BALL GLOVE. HARRY N. GITT, 2d, Hanover, Pa. Filed July 8, 1932. Serial No. 621,287. 7 Claims. (Cl. 2—19.)

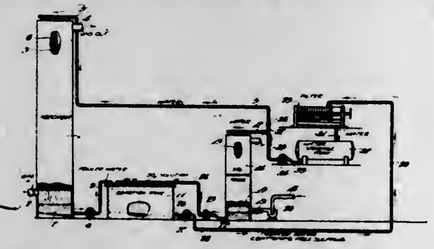
1. A glove for hand ball or the like, said glove having an open back with guide tubing about the edges of such opening and a draw cord extending through said guide tubing and secured across the separated wrist portions at the back of the glove.

1,900,396. FURNACE CONSTRUCTION AND OPERATION. GEORGE H. ISLEY and GUSTAV A. MERET, Worcester, Mass., assignors to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 2, 1930. Serial No. 417,981. 4 Claims. (Cl. 263—15.)



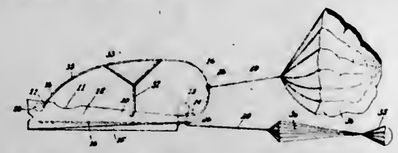
1. In a regenerative heating furnace, a heating chamber, two sets of fuel supply devices arranged at one end of said chamber and adapted to be rendered alternately active and inactive as the furnace in operation is periodically reversed, an air regenerator associated with each fuel supply device for the delivery of heated combustion-supporting air to said chamber when the associated fuel supply device is active, and a passage at all times maintaining each regenerator in unrestricted communication with the other end of said chamber, for the delivery of combustion products to said regenerator, when its associated fuel supply device is inactive.

1,900,397. OPERATION OF REGENERATIVE FURNACES. GEORGE H. ISLEY, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Mar. 12, 1931. Serial No. 521,974. 14 Claims. (Cl. 263—15.)



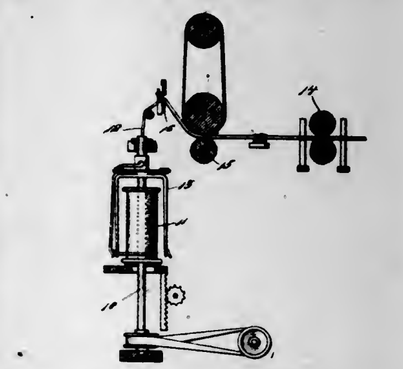
2. In the operation of a regenerative furnace, the improvement which consists in passing a portion of the combustion products of said furnace through a regenerator, to provide for heating of the air supply to said furnace

when the latter is reversed, passing another portion of said combustion products through a waste heat boiler, subjecting said second mentioned portion to the discharge action



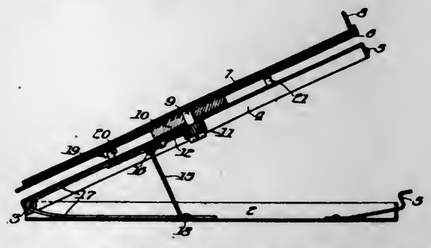
of a blower, and causing the entrainment and discharge of said first portion by the gases exhausted from said blower.

1,900,398. PROCESS FOR THE REMOVAL OF HYDROGEN SULPHIDE FROM GASES. DAVID L. JACOBSON, Pittsburgh, Pa., assignor to The Koppers Company of Delaware, a Corporation of Delaware. Filed May 14, 1930. Serial No. 452,380. 3 Claims. (Cl. 23—225.)



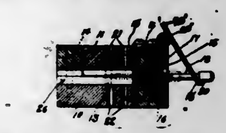
1. The process of removing hydrogen sulphide from a gas which comprises washing the gas with a liquid for the absorption of hydrogen sulphide therefrom, removing said liquid after contact with the gas and commingling it with a further quantity of liquid containing sulphur dioxide in solution, whereby the absorbed hydrogen sulphide is decomposed and free sulphur is liberated, removing sulphur from the liquid, separating a portion of the liquid, treating it to effect a substantial neutralization thereof, and recirculating it for further treatment of gas.

1,900,399. PARACHUTE PROJECTING DEVICE FOR AIRPLANES. ALBERT LAKEHURST, Brooklyn, N. Y., assignor to Lakewood Comet Aero Advertising Company, Lakewood, N. J. Filed Dec. 8, 1931. Serial No. 579,699. 3 Claims. (Cl. 244—21.)



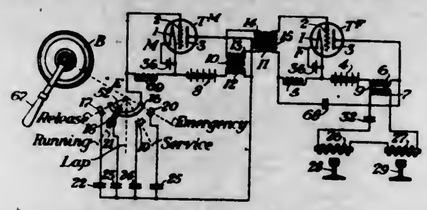
1. In combination with an airplane and a parachute, means for storing the parachute comprising a tube extending lengthwise of the plane, said tube being open at the rear end of the plane, a tubular guide secured within said tube and extending outward, upward, and forward above the plane, the forward end of said guide being secured to the plane ajacent the cockpit, a cable passing through said guide, a winding drum having said cable wound thereon, a sleeve surrounding said guide and having the parachute secured thereto, said cable upon being wound on said drum withdrawing the parachute from said tube along said guide.

1,900,400. STOP MOTION FOR GILL BOXES. WALTER J. SCOTT, Woonsocket, R. I. Filed May 29, 1930. Serial No. 458,291. 7 Claims. (Cl. 19—165.)



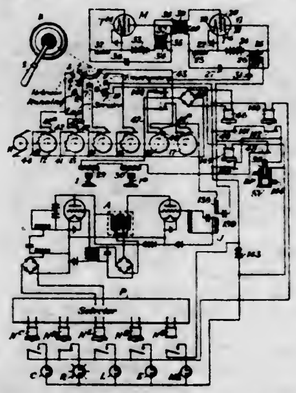
1. In a gill box, draft rolls acting upon the sliver as fed therethrough, means for receiving the treated sliver, stop mechanism intermediate said rolls and receiving means, said stop mechanism including a plurality of flexible feeler members rigidly secured at one end with their free ends independently movable and extending to a position adjacent the traveling sliver, a contact member normally spaced from said feeler members, whereby an abnormally thickened portion in the sliver will engage and move the free end of one of said feeler member into engagement with said contact member to complete an electric circuit snd stop the machine.

1,900,401. SCORING DEVICE. REES T. SCULLY, Pittsburgh, Pa. Filed Nov. 14, 1931. Serial No. 575,053. 13 Claims. (Cl. 281—44.)



1. A scoring device including a base member, a spring-pressed movable plate-member hingedly connected to the base, a revoluble score-pad carrier mounted on the plate-member, and automatically operable means for revolving the carrier upon a movement of the plate member.

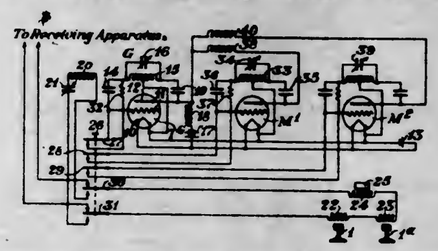
1,900,402. APPARATUS FOR MAKING A BELT SPLICE. WILLIAM J. SCULLEY, Palmyra, N. J. Filed Feb. 9, 1932. Serial No. 591,917. 6 Claims. (Cl. 69—20.)



1. An apparatus for use in making belt splices comprising a clamping member, a knife positioned to be driven into the end of a belt clamped by the clamping member, and guides for directing tools for forming transverse perforations through the belt.

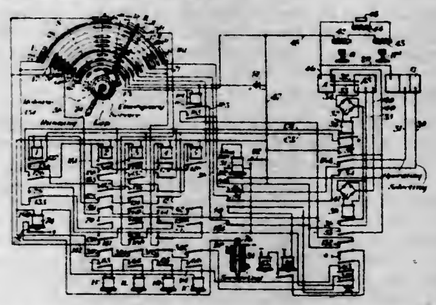
1,900,403. APPARATUS FOR THE CONTROL OF TRAIN BRAKES. LARS O. GRONDAHL, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 4, 1930. Serial No. 441,593. 19 Claims. (Cl. 246—63.)

1. Apparatus for the control of train brakes comprising, in combination with the usual engineer's valve on the locomotive, a source of carrier current on the locomotive, means for modulating the output of said source at different frequencies for different positions of said engineer's valve, auxiliary brake controlling mechanism at another point on the train capable of reproducing the functions of the engineer's valve, and controlling means associated with said auxiliary mechanism and selectively responsive to the several modulations of said carrier current for causing the condition of the auxiliary mechanism to register with the position of the engineer's valve.



1,900,404. APPARATUS FOR THE CONTROL OF VEHICLE BRAKES. LARS O. GRONDAHL, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Mar. 21, 1931. Serial No. 524,805. 21 Claims. (Cl. 246—63.)

1. Apparatus for the control of the brakes of a vehicle including, a brake controlling mechanism capable of producing the release, running, lap, service and emergency functions of the vehicle brakes, electroresponsive means associated with the brake controlling mechanism selectively responsive to different codes of current for causing the brake controlling mechanism to produce the several different brake functions, a current source adapted to supply the different codes of current to said electroresponsive means, and means to select the code to be supplied by said source and thereby determine the brake function produced.

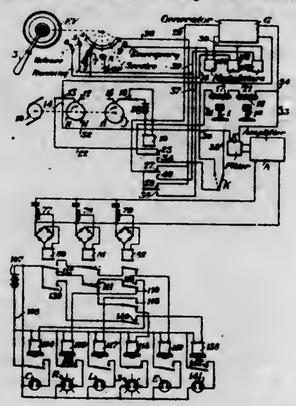


1,900,405. ELECTRIC TRAIN SIGNALING SYSTEM. PAUL N. BOSSART, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 2, 1931. Serial No. 527,124. 18 Claims. (Cl. 246—63.)

1. In combination, a railway train, a brake controlling mechanism having a plurality of operating functions, a transmitting means capable of supplying a carrier frequency current simultaneously modulated by different groups of low frequency currents, means for establishing the frequency of the carrier current and the frequencies of each of the modulating currents of the transmitting means of the train, a manually operated device adapted to select a different group of the modulating currents for each of the different operating functions of the brake

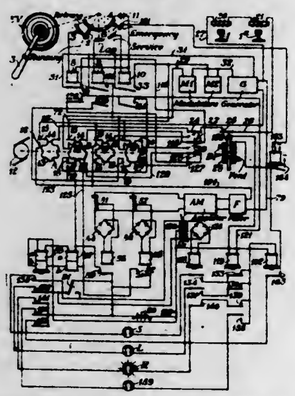
mechanism, a receiving means responsive to the modulated carrier current supplied by the transmitting means for causing the operating function of the brake mechanism to register with that selected by the manually operated means, and selecting means to adjust said receiving means to respond to the current supplied by the transmitting means of that train and none other.

1,900,406. ELECTRIC CONTROL SYSTEM. LEE DEVOL, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1931. Serial No. 530,573. 23 Claims. (Cl. 246—63.)



1. A control system including, a control station, a remote station, an operating mechanism at the remote station having a plurality of operating conditions, means including a source of current adapted to supply a selecting current impulse and an operating current impulse with said impulses having distinctive characteristics, coding means to produce a different code group of selecting impulses for each operating condition of said operating mechanism, a transmitting means at said control station to transmit any one of the different code groups of selecting impulses and an operating impulse, a receiving means at the remote station selectively responsive to the different code groups of selecting impulses and to said operating impulse for causing the operating mechanism to establish any desired operating condition, and means to continue to transmit and to receive operating impulses only to retain the operating mechanism in the condition established.

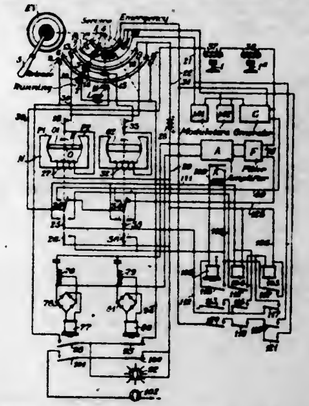
1,900,407. ELECTRIC CONTROL SYSTEM. LARS O. GRONDAHL and ANDREW J. SORENSEN, Pittsburgh, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1931. Serial No. 530,580. 14 Claims. (Cl. 246—63.)



1. A control system including, a generator of carrier frequency current, means to supply a plurality of low fre-

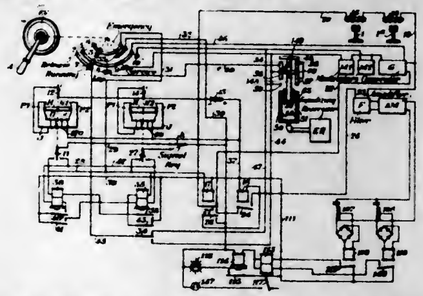
quency currents of different frequencies, manually controlled means to modulate the carrier current with different combinations of the low frequency currents, automatic means to periodically close the output circuit of said generator of carrier current, a receiving circuit influenced by said output circuit, a plurality of electro-responsive

devices controlled by said receiving circuit selectively responsive to the different modulating frequencies and operated in step with the periodic closing of said output circuit, and control circuits selectively controlled by the different combinations of operated electroresponsive devices.



1,900,408. ELECTRIC CONTROL SYSTEM. ANDREW J. SORENSEN, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed May 11, 1931. Serial No. 536,390. 24 Claims. (Cl. 246—63.)

1. A control system including, a source of periodic impulses of current, means to modulate a plurality of successive impulses each with a distinctive characteristic in cyclic order, and a control means effectively influenced by the cyclic order of said successive impulses.

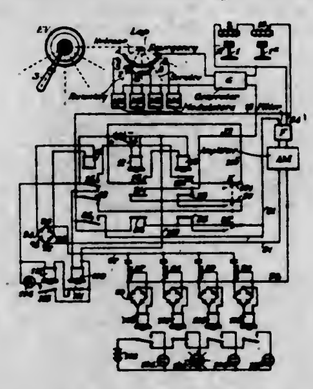


1,900,409. ELECTRIC CONTROL SYSTEM. ANDREW J. SORENSEN, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed May 27, 1931. Serial No. 540,351. 16 Claims. (Cl. 246—63.)

1. A control system including, a transmitting circuit, means to supply to the transmitting circuit a plurality of different codes each consisting of periodic impulses of current simultaneously affected by a distinctive rate of occurrence and modulation, a first receiving means controlled by said transmitting circuit selectively responsive to the rate of occurrence of the impulses of the different codes, a second receiving means controlled by the trans-

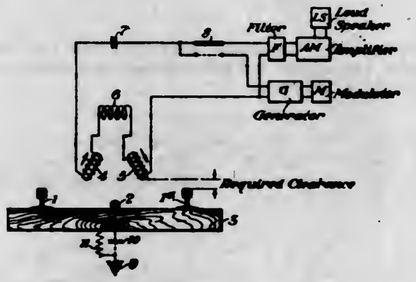
mitting circuit selectively responsive to the modulation of the impulses of the different codes, and an operating mechanism jointly controlled by said two receiving means.

1,900,410. ELECTRIC CONTROL SYSTEM. ANDREW J. SORENSEN, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 8, 1931. Serial No. 567,549. 15 Claims. (Cl. 246—63.)



1. Apparatus for the control of the brakes of a railway train including; a manually operated brake controlling mechanism capable of producing a running, a lap and a brake applying condition of the train brakes; a signaling device adapted to display a different signal for each condition of the train brakes, an electroresponsive means selectively responsive to different codes of current to select the different signals and thereby determine the condition to be established by the operator of said brake controlling mechanism, means located at a remote point on the train capable of transmitting different current codes to said electroresponsive means, and a manually operated device at said remote point to select the different current codes.

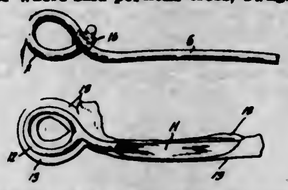
1,900,411. ELECTRIC CONTROL SYSTEM. LARS O. GRONDAHL and ANDREW J. SORENSEN, Pittsburgh, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Nov. 10, 1931. Serial No. 574,093. 11 Claims. (Cl. 246—63.)



1. A control system for the brakes of a railway train including; a brake controlling mechanism at one location on a train adapted to establish different functional conditions of the train brakes, an indicating mechanism at another location on the train capable of establishing a different indication for each condition of the brake control-

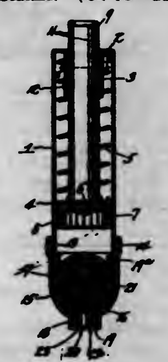
ling mechanism, a source of carrier current, means at each location to impress a different modulating frequency for each functional condition of the train brakes on said carrier current, transmitting means associated with each location to alternately exchange between the two locations periodic impulses of modulated carrier current, receiving means at each location responsive to modulated

carrier current impulses, a plurality of multiple circuits at each location receiving current from the receiving means tuned respectively to the different modulating frequencies and each including a slow-release electromagnet for maintaining a steady condition of the associated mechanism corresponding to the modulation in response to the periodic impulses.



1,900,412. ELECTRIC TRAIN SIGNALING SYSTEM. PAUL N. BOSSART, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Dec. 8, 1931. Serial No. 578,645. 13 Claims. (Cl. 246—63.)

1. Train signaling apparatus including, three windings mounted on a train disposed in inductive relation with a single trackway conductor characterized by the fact that two of said windings add their inductive effects created by current flowing in said conductor while the third winding opposes, said third winding so positioned and proportioned as to cause but a relatively small cancelling of the induction by current in the conductor while balancing out the induction of said first two windings due to any space-uniform magnetic field.

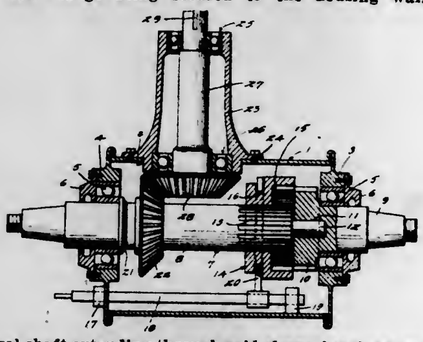


1,900,413. METHOD OF MAKING SHEARS. EDWARD W. CARPENTER, Fairfield, Conn., assignor to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn., a Corporation of Connecticut. Filed July 6, 1931. Serial No. 548,740. 6 Claims. (Cl. 76—104.)

1. The method of making a shear blade and loop consisting in doubling an end portion of a wire upon and across itself to form a loop, welding the portions of the wire together where said portions cross, swaging the wire

in forming dies to form a solid blade and loop, and finishing the formed blade and loop.

1,900,414. FLUID PRESSURE GAUGE. JOHN ELLERBE, New York, and MAGNUS CRONWALL, Brooklyn, N. Y., assignors to A. Schrader's Son, Inc., Brooklyn, N. Y., a Corporation of New York. Filed Mar. 21, 1929. Serial No. 348,786. 6 Claims. (Cl. 73—111.)

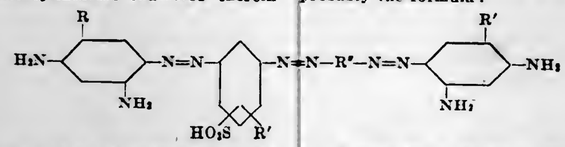


8. In a fluid pressure gauge, the combination with a cylinder provided at one end with a rounded housing having an elongated slot therein, of a piston movable in said cylinder, a stem reciprocable by said piston, a pressure resistance interposed between said piston and the other end of said housing, said pressure resistance being adapted to react with a pressure proportional to the displacement of said piston, and a member slidably contacting with the inner wall of said rounded housing and provided with a port-opening connection presented through and adjustable along said elongated slot.

6. A fluid pressure gauge comprising a receptacle provided with fluid pressure measuring means and having a cylindrical portion, a rounded housing connected to the open end of said cylindrical portion, a ball articulated in said rounded housing, a press-on foot connected to said ball said ball being provided with a port-opening communicating with the interior of the cylindrical portion and with the press-on foot in all articulated positions of the ball and means for limiting the articulation of the ball so that the press-on foot may be disposed in any position between coaxial alinement with, and normal to the cylindrical axis.

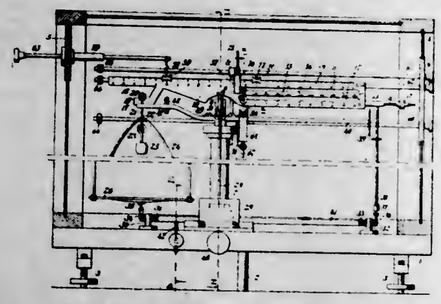
1,900,415. POWER TAKE-OFF FOR MOTOR VEHICLES. GEORGE A. FULLERTON, Clarendon, Pa. Filed Oct. 13, 1931. Serial No. 568,593. 1 Claim. (Cl. 71—1.)

A power take-off device for a motor vehicle, comprising an elongated housing having a head at each end, a bearing mounted in each head, said housing having an opening through the side wall thereof, a shaft mounted in one bearing and extending longitudinally into the housing and terminating at its inner end in a central longitudinally extending pin, a stub shaft mounted in the other of said bearings and formed at its inner end within the housing to provide an integral gear, an internal gear slidable on said first shaft to mesh with said gear when moved to one position, the said pin being rotatably mounted in the adjacent end of the stub shaft, a guide element mounted upon the inner wall of the housing, a bearing guide formed



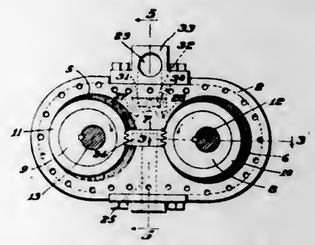
through one of said heads, a bar slidably mounted in said bearing guide and said guide element and extending to the exterior of the housing, a fork carried by said bar and engaging said internal gear, a sleeve having a flange thereabout inwardly of one end and having the said one end extended through the opening in the housing wall, the said flange being secured to the housing wall, a

lateral shaft extending through said sleeve, bearings mounted in the ends of said sleeve and supporting said lateral shaft, a beveled gear upon said lateral shaft within said housing and a beveled gear upon the first mentioned shaft and permanently in mesh with the other beveled gear, the said first shaft and stub shaft being formed at their outer ends to facilitate their connection in the drive shaft of a motor vehicle.



1,900,416. ROTARY PUMP. ADOLPH IZBICKI, Cambridge, Mass. Filed Dec. 5, 1929. Serial No. 411,780. 5 Claims. (Cl. 103—132.)

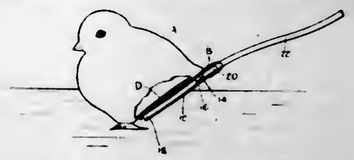
1. In a rotary pump, the combination of a casing having two approximately parallel cylindrical chambers therein



in which R and R' each denotes a hydrogen atom or an alkyl group, and R'' denotes a benzene or naphthalene nucleus which may contain alkyl and/or alkoxy groups as substituents in the nucleus but is otherwise free from substituents; said dyestuffs in the form of their sodium salts and in the dry and pulverised state being brown powders soluble in water, and which from a neutral or alkaline bath dye cotton various shades of brown which may be developed on the fibre by diazotization and treatment with a diamine of the benzene series.

1,900,418. BEAM SCALE. JACOB EMIL SEEDERER, Jersey City, N. J., assignor to Seederer-Kohlbusch, Inc., Jersey City, N. J., a Corporation of New Jersey. Filed May 9, 1929. Serial No. 361,574. 15 Claims. (Cl. 265—49.)

1. A beam scale comprising a case, a beam pivoted therein having a longitudinal slot and notches in said slot, located side by side and closely adjacent to each other with a guideway connecting them at their points of closest approach to each other, two eccentrics mounted, respectively, in said chambers, sleeves encircling the respective eccentrics, driving means for rotating said eccentrics in a fixed relationship to each other, a rigid slide fitting snugly in said guideway for reciprocating movement there-



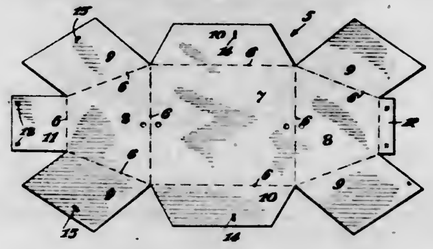
through in a fixed path, the opposite end faces of said slide each being provided with a plurality of teeth, and said sleeve each having a plurality of similar teeth fitting between the teeth on the ends of said slide, whereby the sleeves can move up and down relatively to said slide while their engagement with the slide remains uninterrupted, and intake and exhaust ports for said chambers.

1,900,417. PRODUCTION OF AZO DYE. RALPH B. PAYNE, Elma, N. Y., assignor to National Aniline & Chemical Co. Inc., New York, N. Y., a Corporation of New York. Filed July 18, 1929. Serial No. 379,331. 4 Claims. (Cl. 260—72.)

1. The trisazo dyestuffs having in the free state most probably the formula:

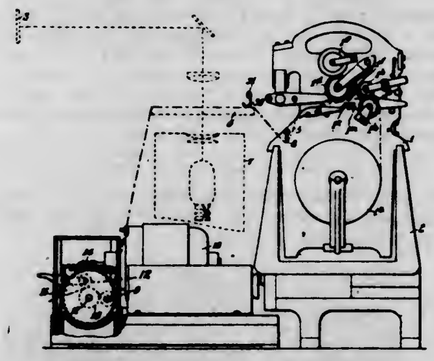
a rolling poise in said slot cooperating with the notches therein, and means for manipulating said rolling poise exteriorly of said case.

1,900,419. TOY. LEO RANNEY, New York, and HARCOURT F. GADE, Brooklyn, N. Y.; said Gade assignor to said Ranney. Filed Dec. 12, 1930. Serial No. 501,818. 8 Claims. (Cl. 46—40.)



1. A swimming and whistling toy adapted to float on the surface of a body of water, said toy including an inclined submerged trough-like surface, and a whistle so mounted on the toy that the discharge end of the same releases air bubbles beneath the lower end of said surface, which bubbles rise and expand in contact with the surface and thereby propel the toy over the surface of the water.

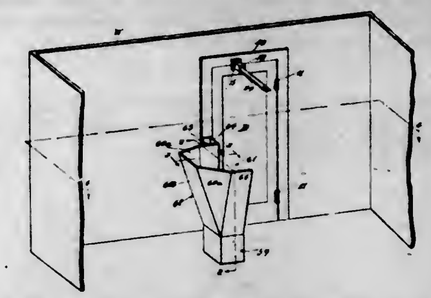
1,900,420. HAT BOX. WILLIAM T. SHRADER, Norwalk, Conn., assignor to The American Hat Co. Inc., Norwalk, Conn., a Corporation of Connecticut. Filed Dec. 11, 1929. Serial No. 413,168. 1 Claim. (Cl. 229—22.)



A collapsible box or container formed from a single blank of cardboard material scored to provide relatively foldable parts, including a rectangular bottom wall, one

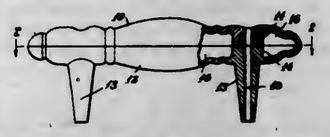
piece tapering side walls connected at their wider ends with opposite edges of the bottom wall, one of said side walls at its free end having a foldable flap and the other of said side walls at its free end having a top for the box hingedly connected therewith, relatively foldable sections hingedly connected with opposite edges of each of said side walls, the said sections at corresponding edges of the side walls being foldable inwardly with respect thereto to extend in overlapping relation upon each other along the other edges of the bottom wall, relatively narrow flaps

hingedly connected with the edges of the bottom wall and foldable upon said overlapping side wall sections, bendable fastener elements fixed to the underlying side wall sections engageable through openings in the other side wall sections and in said flaps and bendable upon the latter to releasably retain said wall sections and flaps in superimposed relation, said top section for the box overlapping upon said flap on the first named side wall of the box, and additional means for releasably fastening the free end of said top wall section to said flap.



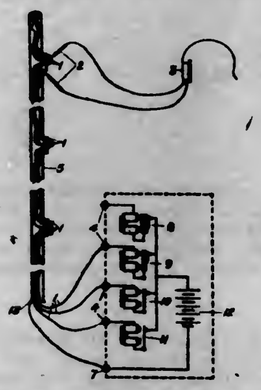
1,900,421. TAPE PULLER. EDWARD H. UNKLES, Weehawken, N. J., assignor to Trans-Lux Daylight Picture Screen Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 15, 1928, Serial No. 261,990. Renewed May 20, 1932. 9 Claims. (Cl. 271—2.4.)

1. In a tape feeding mechanism, means to stop the movement of the tape independent of the feeding means, said means comprising a pivoted member having one arm thereof controlled by the variations in a loop of the tape whereby the other arm is caused to impede movement of the tape.



1,900,422. ENTRANCE CONTROL. DONALD J. WALLACE, Long Beach, Calif., assignor of one-half to Roland H. Mulford, Long Beach, Calif. Filed Nov. 13, 1928. Serial No. 319,115. 7 Claims. (Cl. 20—16.)

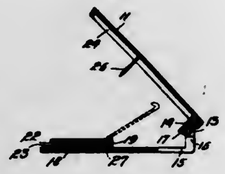
7. In enclosure for controlling the passage of individuals through a predetermined path a wall structure having an entrance way, the lower part of the wall structure defining a relatively restricted foot-receiving space, and



the wall structure above said lower part flaring upwardly and outwardly from the foot-receiving space to define a space of relatively large size.

1,900,423. HANDLE. LLEWELLYN MARSH WILLEY, Hoosick Falls, N. Y., assignor to Specialty Insulation Manufacturing Company, Inc., Hoosick Falls, N. Y., a Corporation of New York. Filed Nov. 7, 1928. Serial No. 317,781. 3 Claims. (Cl. 16—116.)

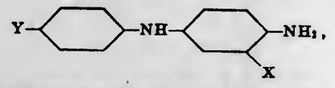
1. A handle, comprising two hollow shell sections, comprising molded heat-insulating composition material of organic origin, adapted to fit together and combined with screw means, penetrating both sections to hold them together; each of these shell sections having two interior medial bosses, one of which is located near each end of the handle, and each of which bosses stands opposed to a boss on the other section; and there being an orifice for a screw to pass through each said pair of bosses and across the cleavage between shell sections with the boss material closely surrounding the screw, each of which screws secures the sections together and to the device on which the handle is to serve.



1,900,424. ELECTRICAL TESTING. EUGENE WOODBURY, Lincoln Park, N. J. Filed Sept. 27, 1927. Serial No. 222,380. 7 Claims. (Cl. 175—183.)

1. The method of identifying a plurality of electrical conductors at different points along their length which comprises applying a current which varies in magnitude

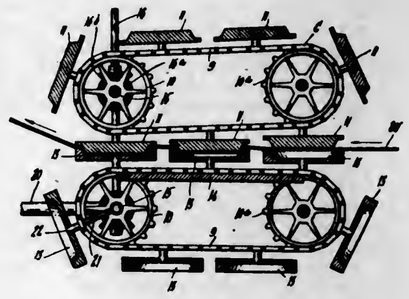
at a definite time rate to one conductor and applying currents which vary at different time rates to the other conductors and causing said currents to produce different, distinctive indications at said different points along their length, whereby they may be identified.



1,900,425. ARTICLE OF JEWELRY. PHILIP BENJAMIN, New York, N. Y. Filed Nov. 24, 1930. Serial No. 497,720. 3 Claims. (Cl. 63—20.)

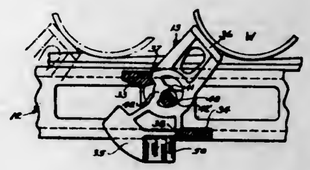
1. An article of jewelry such as a clasp or brooch, including a back plate having a flat inner surface throughout, an ornamental front plate, a hinge connecting the plates at corresponding edges, a relatively small receptacle rigidly mounted on the inner surface of the back plate and adjacent its opposite edge, and considerably removed from the other edge, the receptacle being bordered by and entirely set back from projecting edge portions of the back plate, a cover plate for the receptacle and similarly back from the projecting edge portions, a hinge connecting the cover plate with the inner end of the receptacle, a snap fastening for securing the cover plate in closed position on the receptacle, and an inner flange on the face plate having such width and length as to oppose said projecting edge portions and surround the receptacle when the plates are closed, the plates being sufficiently separated, when closed together, to receive and be engaged over the material on which the clasp is to be worn so as to leave the front plate visible, and the back plate and small receptacle concealed, and means for securing the clasp to such material.

1,900,426. SUBSTITUTED AMINO-DIPHENYLAMINE. JOHANN BÜSDORF and FRITZ LÖFLUND, Offenbach-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Sept. 16, 1929, Serial No. 393,111, and in Germany Oct. 9, 1928. 5 Claims. (Cl. 26—128.)



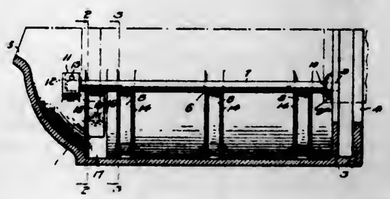
1. As new compounds the substituted amino-diphenylamine derivatives corresponding to the general formula:

wherein X' means chlorine, methyl or methoxy and Y means hydrogen, chlorine or methyl, which compounds are when dry colored crystallized substances, insoluble in water, having a definite melting point, capable of being diazotized whereby a nitrosodiazo-compound may be formed.



1,900,427. MANUFACTURE OF FIBROUS ARTICLES. ALBERT L. CLAPP, Danvers, Mass. Filed Dec. 20, 1927. Serial No. 241,436. 5 Claims. (Cl. 92—54.)

1. Steps in the manufacture of pulp articles, which comprise preparing an aqueous pulp suspension containing sufficient non-hydratable material to form a non-warping composition, interfelting the pulp into a web on a paper machine, removing the web while wet from the machine,

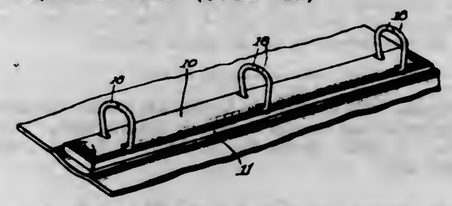


forming articles of the desired shape from the wet web, impregnating the articles with sodium silicate solution, and drying the treated articles.

1,900,428. CONVEYER FOR FURNACES. RALF S. COCHRAN, Toledo, Ohio, assignor to Surface Combustion Corporation, Toledo, Ohio, a Corporation of New York. Filed Mar. 21, 1931. Serial No. 524,290. 4 Claims. (Cl. 198—219.)

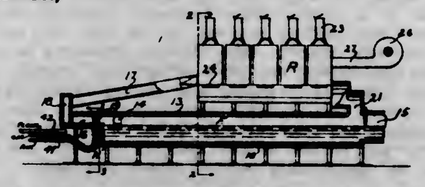
1. In apparatus for pushing work along a support, the combination of a reciprocable member, a trip dog carried by said member for engaging the work, a knife-edge bearing for rotatably supporting said dog, and means independent of said bearing for taking the thrust of the work against the dog, said knife-edge bearing comprising a pin secured to said member and an anvil on said dog overlying said pin.

1,900,429. LUBRICATING DEVICE. HARRY F. CUNNING, Roanoke, Va. Filed Oct. 7, 1929. Serial No. 397,967. 15 Claims. (Cl. 308—88.)



1. In a journal box adapted to receive a body of oil waste in a single mass in contact with the journal and the bottom of the box, means for maintaining the waste in contact with the journal, said means including a pivotally mounted member provided with a plurality of fingers movable upwardly toward the journal for elevating portions of the body of waste, said fingers being arranged to permit portions of the body of waste between them to sag downwardly so as to maintain a thread connection between the bottom of the box and the journal when the fingers are moved toward the latter.

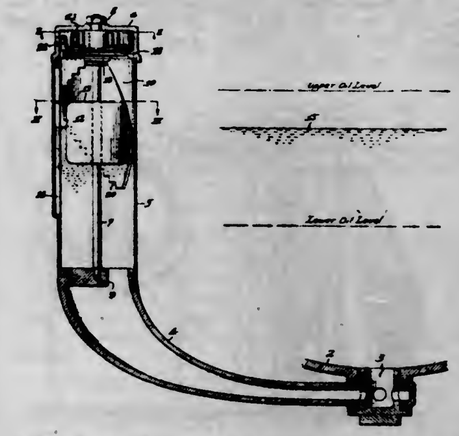
1,900,430. WATER REPELLENT ABRASIVE. RUPERT S. DANIELS, Newark, N. J., assignor to Bakelite Corporation, New York, N. Y., a Corporation of Delaware. Filed Sept. 15, 1928. Serial No. 306,292. 2 Claims. (Cl. 51—278.)



1. An abrasive implement for wet grinding having a porous structure prepared from abrasive particles bonded with a resinoid and impregnated with chlorinated naphthalene which is substantially free from mono- and dichlornaphthalenes.

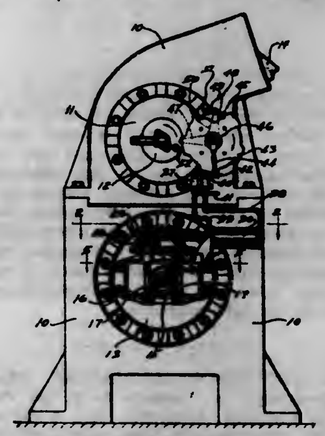
1,900,431. LOOSE LEAF BINDER. JAMES C. DAWSON, Webster Groves, Mo. Filed Aug. 25, 1931. Serial No. 559,189. 2 Claims. (Cl. 129—24.)

2. In a loose leaf binder, a plate having marginal flanges, a pair of wire arch frames, each frame having bent portions, each engaging the corresponding portion of the other frame and carrying mating paper holding prongs and assembled between the flanges of the plate to form a toggle, whereby the prongs are held in open or closed position, a second pair of similar wire arch frames assembled in like manner between the flanges of the plate in end to end relation with the first pair, the prongs at the adjacent end of the second pair of frames being cut away to form stub portions too short for holding engagement with the paper to be bound, and means for binding one of the stub portions to the adjacent prong of the corresponding frame of said first pair whereby they are constrained to move in unison when the prongs are opened and closed.



1,900,432. GLASS MELTING APPARATUS. ERNEST G. DE CORIOLIS, Toledo, and PERCY Q. WILLIAMS, Ottawa Hills, Ohio, assignors to Surface Combustion Corporation, Toledo, Ohio, a Corporation of New York. Filed Nov. 12, 1931. Serial No. 574,574. 10 Claims. (Cl. 49—54.)

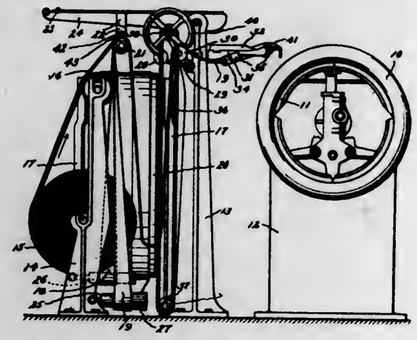
1. In a glass melting furnace, the combination of an elongate melting tank, a roof overlying the tank in spaced relation and forming therewith an elongate combustion chamber, means for discharging fuel gas lengthwise of the chamber in spaced parallel streams without substantial turbulence and for supplying air without substantial turbulence between said streams for parallel flow therewith, said means being positioned at that end of said chamber adjacent to the charging end of the tank and being substantially as wide and high as the chamber at said end.



10. A method of producing molten glass in an elongate melting tank having an overlying roof forming with said tank an elongate heating chamber, comprising liberating heat within said chamber substantially uniformly crosswise of the tank and at a gradually increasing rate for a substantial distance lengthwise of the chamber, and feeding the raw material into that portion of the tank where the rate of heat liberation is increasing.

1,900,433. LIQUID LEVEL INDICATOR. STEPHEN DE ORLOW, Lansing, Mich. Filed Oct. 16, 1926. Serial No. 142,035. 5 Claims. (Cl. 73—82.)

5. In an indicator for determining the liquid level in a receptacle, a stepped gauge member supported within the receptacle and rotatable to move the steps in circular paths, a non-rotatable floatable member mounted to move in accordance with the rise and fall of the liquid level in a predetermined path, said members being relatively positioned so that rotation of the gauge member will cause engagement of a step thereof with the floatable member, the step engaged being determined by the position of the floatable member provided by the liquid level.



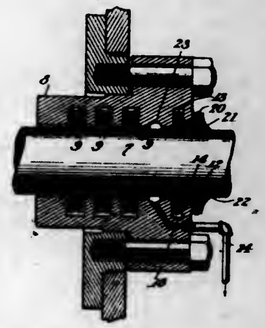
1,900,434. CUTTER FOR EXTRUDING MACHINES. CHARLES H. DESAUTELS, Springfield, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Apr. 15, 1929. Serial No. 355,168. 3 Claims. (Cl. 18—12.)

2. The combination comprising a rubber extruding machine, a pair of rotatably mounted double-edged cutters adjacent the extruding die of the machine and so posi-

tioned that the product passes between them and means operable to rotate the knives in the direction of the feed of the product to engage their cutting edges in the product and to present the back surface of the knives to the advancing product to be engaged thereby to aid in the rotating of the knives.

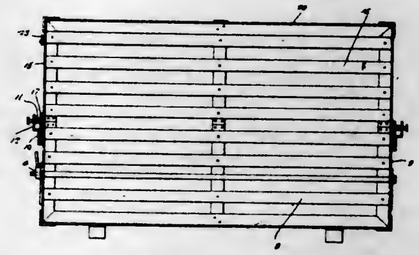
1,900,435. TIRE BUILDING METHOD. CHARLES H. DESAUTELS, Springfield, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Original application filed Mar. 30, 1928, Serial No. 265,836. Divided and this application filed Aug. 8, 1929. Serial No. 384,419. 1 Claim. (Cl. 154—14.)

The method of preparing material for tire building purposes which comprises drawing a length of the material from a roll into loop form, allowing the material to stretch as it is thus drawn, and then allowing said loop of the material to remain stationary and contract free of tension before it is used.



1,900,436. SYSTEM OF INDIRECT LIGHTING OF ALL SPACES. JEAN TIGRANE DOURGNON, Paris, France. Filed Apr. 18, 1929, Serial No. 356,150, and in France Apr. 25, 1928. 5 Claims. (Cl. 240—9.)

1. A system for indirect illumination of a localized space, comprising a diffusing surface forming a secondary light source, a primary source of light adjacent said diffusing surface and an optical dioptric, exclusively refractive; device to direct the light rays from the primary light source exclusively against said diffusing surface at a slight angle to said diffusing surface and substantially parallel to one another said optical device being obtained by rotation about an axis substantially normal to the said diffusing surface of a lenticular stepped contour, furnishing rays which define cones or segments of cones, whose bases are on the said surface and whose apices are at the light projector.

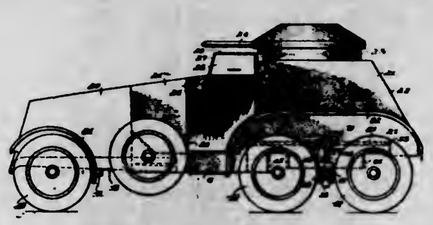


1,900,437. ROD WIPING MECHANISM. FRED D. DURHAM, Louisville, Ky., assignor to C. Lee Cook Manufacturing Company, Louisville, Ky., a Corporation of Kentucky. Filed Mar. 31, 1930. Serial No. 440,604. 3 Claims. (Cl. 286—24.)

3. In combination with a gland member and a rod slidably passing therethrough, and a wiping ring surrounding the rod and having its inner end interlocked with the internal portion of the gland member, said

ring projecting from one end of the gland member and having on its projecting end a wiping edge that acts on the rod externally of the gland member.

1,900,438. COLLAPSIBLE LUGGAGE RACK. EVERETT ERICKSON and GEORGE J. HOODY, Omaha, Nebr. Filed Mar. 6, 1931. Serial No. 520,692. 3 Claims. (Cl. 224—29.)

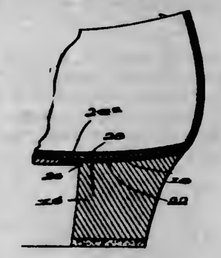


1. A collapsible luggage rack for motor vehicles and the like including brackets fixed to the vehicle; a pair of hingedly connected rack sections adapted to be folded one upon the other, one of said sections being pivoted intermediate its front and rear edges to said brackets to swing from a substantially horizontal position to a substantially vertical folded position between said brackets; stop members fixed to the rear edge of said one section to engage the body of the vehicle when the said one section is swung from the said vertical folded position to a substantially horizontal position; spring pressed pins slidably mounted on the said one section at relatively opposite sides thereof, extensions on corresponding sides of the other of said rack sections and having apertures to receive said pins to thereby retain the sections substantially horizontal and in extended alinement; and inter-engaging means on said other rack section and on one of said brackets to retain the sections in substantially vertical folded positions.

1,900,439. MOTOR VEHICLE. DAVID FERGUSSON, Rochester, N. Y., assignor to James Cunningham, Son & Company, Rochester, N. Y., a Corporation of New York. Filed Sept. 8, 1931. Serial No. 561,589. 17 Claims. (Cl. 180—89.)

1. In a motor vehicle, a body including a compartment, an engine supporting frame extending forwardly of and connected with the walls of said compartment, wheels having axles for supporting said body, a longitudinally extending drive shaft operatively associated with the axles, springs extending longitudinally between

the axles and body, a floor for said compartment disposed in a plane above which portions of the axles are movable upon relative movement between the axles and body one toward another within the limits of movement of the spring suspension, said floor having side tunnels alined with the springs and transverse tunnels overlying



the axles and arranged to receive the latter when moved above the floor level and also having a tunnel overlying said shaft and arranged to receive the latter, arms extending upwardly from the axles, and radius rods connected with said arms and extending within the side tunnels and connected with the side walls of the body.

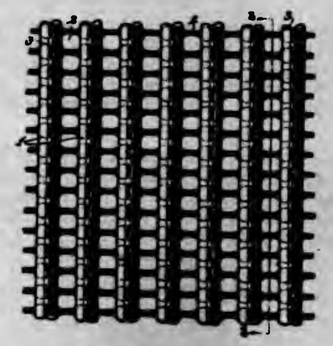
1,900,440. CULTIVATOR. HARRY FERGUSON, Belfast, Northern Ireland. Filed Sept. 15, 1930, Serial No. 482,058, and in Great Britain Sept. 20, 1929. 6 Claims. (Cl. 97—47.)

1. An agricultural tine device, comprising a tine, a support for carrying said tine, a pivot connecting said tine to said support, toggle links one of which is anchored to said tine support and the other is connected to said tine, spring means anchored to said tine support and connected to the inter-connecting pivot of said toggle links, and stop means whereby said tine is normally maintained with its point and pivot in or about vertical alignment and whereby said spring means exerts maximum pull during the initial period of displacement of said tine by an obstruction and in the later period exerts a pull which gradually decreases.

1,900,441. ART AND METHOD OF MAKING SHOES. BENJAMIN W. FREEMAN, Cincinnati, Ohio. Filed Oct. 5, 1931. Serial No. 567,060. 9 Claims. (Cl. 12—142.)

1. The method of fitting heel seats of shoes which comprises splitting the sole across the back to form a pair of flaps, applying the sole to a shoe, removing that portion of the flap adjacent the shoe, back of the breast line, trimming the edge of the other flap, and applying a heel

to the shoe with the trimmed flap therebeneath and the edge of the first mentioned flap flush with the heel breast.



1,900,442. ACYL DERIVATIVES OF 4,4'-DIAMINO DIPHENYL OXIDE. ERNEST F. GEUTHER, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Jan. 15, 1930. Serial No. 421,061. 8 Claims. (Cl. 260—124.)

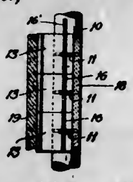
1. As a new product, a compound having the following formula

(4) acyl—NH—C_6H_4—O—C_6H_4—NH—X(4')

wherein X may be H or the same acyl group.

1,900,443. FURNACE WALL. ISAAC HARTER, New York, N. Y., assignor to Fuller Lehigh Company, Fullerton, Pa., a Corporation of Delaware. Filed July 8, 1928, Serial No. 290,117. Renewed Sept. 8, 1932. 12 Claims. (Cl. 122—6.)

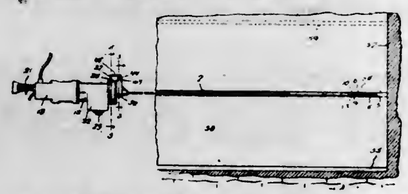
1. In a furnace wall, a row of vertically disposed water tubes spaced apart, and metal bars of substantially uniform width and thickness from one end to the other exposed to the radiant heat of the furnace and extending from one tube to another having substantially horizontal portions extending toward the inside of the furnace approximately in the plane of the row of tubes.



1,900,444. PRESERVED EGG AND PROCESS OF MAKING SAME. HERMAN HEUSER, Evanston, Ill. Filed Mar. 27, 1929. Serial No. 350,442. 12 Claims. (Cl. 99—11.)

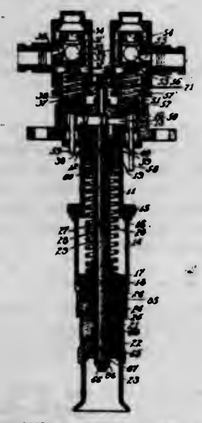
1. The process of preserving egg in the absence of applied heat which consists in incorporating into the egg a preserving quantity of sugar to form an emulsion, and subjecting the emulsion to centrifugal action of sufficient

force to convert the emulsion into a raw egg syrup substantially free of emulsion air.



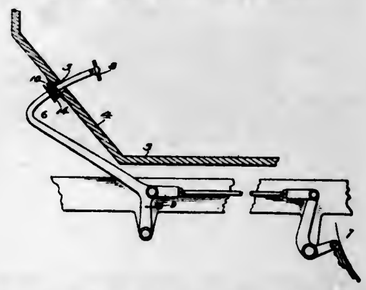
11. A preserved raw egg syrup containing a preserving quantity of sugar and a nontoxic reducing agent and being free from emulsion air and occluded air.

1,900,445. WATER COOLED FURNACE WALL. DAVID S. JACOBUS, Montclair, and HOWARD J. KERR, Westfield, N. J., assignors, by mesne assignments, to Fuller Lehigh Company, a Corporation of Delaware. Filed Aug. 27, 1926, Serial No. 131,872. Renewed Apr. 6, 1931. 22 Claims. (Cl. 122—6.)



1. A furnace wall comprising parallel water tubes, and supports for insulating material between said tubes, each support comprising a horizontal and a vertical plate, one extending at right angles to the tubes and the other parallel thereto and spaced therefrom.

1,900,446. DEVICE FOR BREAKING DOWN COAL. JOSEPH F. JOY, Marion, Ohio, assignor to Joy Bros., Inc., Marion, Ohio, a Corporation. Filed Oct. 13, 1931. Serial No. 568,626. 7 Claims. (Cl. 262—12.)



1. A device for breaking down coal comprising a flat hollow coal breaking member having opposed flexible walls, and means operable at will to expand or collapse said coal breaking member including power operated means for pumping fluid into or from said coal breaking member.

1,900,447. FILLER VALVE FOR BOTTLE FILLERS. JAMES KANTOR, Chicago, Ill., assignor to The Liquid Carbonic Corporation, Chicago, Ill., a Corporation of Delaware. Filed May 11, 1929. Serial No. 362,237. 7 Claims. (Cl. 226—111.)

1. In a bottle filling machine, the combination with a relatively stationary filling tube, of a sleeve telescoping said tube and movable with the bottle when the same is moved into and out of filling position, a valve operated by said sleeve for controlling the admission of fluid to said tube and a second valve normally cooperating with the discharge end of said tube to close the same, and operated by said sleeve to open and close with said first valve.

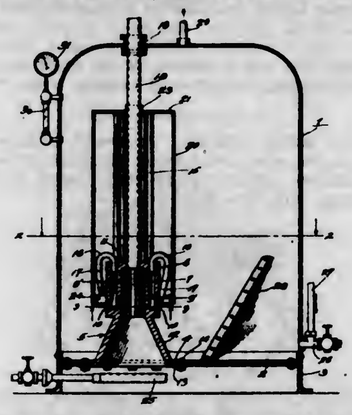
1,900,448. AUTOMOBILE ACCESSORY. HAROLD A. KING, Birmingham, Mich. Filed Sept. 1, 1928. Serial No. 303,390. 14 Claims. (Cl. 180—90.6.)

1. In or for an automobile, the combination of a footboard having a lever opening therethrough, a lever extending through said opening, a cover fixed to said footboard about said opening, and a member arranged on said lever to contact with the free edge of said cover, whereby a substantially airtight seal is established between said cover and the footboard and lever.

1,900,449. PHARMACEUTICAL PREPARATION. FRIEDRICH KROLLPFEIFFER, Marburg-on-the-Lahn, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 12, 1930. Serial No. 427,946. 7 Claims. (Cl. 167—58.)

1. Composition of matter comprising 100 parts by weight of 7-iodo-18-hydroxyquinoline-5-sulfonic acid, 2–10 parts by weight of 8-hydroxyquinoline-5-sulfonic acid and about 80 parts by weight of sodium bicarbonate, said composition of matter being a yellow powder soluble in water which solutions show a great stability when heated and are valuable for pharmaceutical purposes.

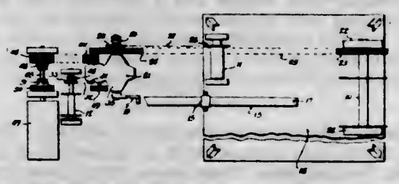
1,900,450. METHOD OF APPLYING COVERING MATERIAL TO TIRE PATCHES. ROLAND A. LABINE, Springfield, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Mar. 3, 1930. Serial No. 432,592. 4 Claims. (Cl. 154—2.)



2. A method of applying covering material to a double-curved repair patch which comprises straightening one of the curves in the patch during the applying operation, positioning the dome portion of the patch on a sheet of material, progressively pressing the material around the patch at either side of the dome portion, and slitting the material at a plurality of opposed portions of the patch, said slits extending from near the dome of the patch to the edges.

1,900,451. WATER HEATER. MARTIN I. LARSEN, Chicago, Ill. Filed June 4, 1932. Serial No. 615,447. 11 Claims. (Cl. 122—159.)

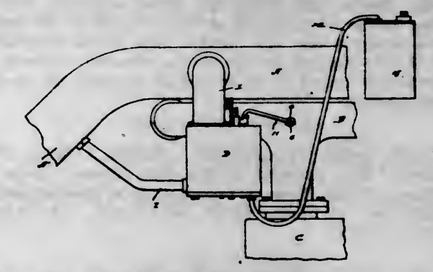
1. A water heater, comprising a tank, a chambered heating unit mounted within said tank upon the bottom



CARNEGIE LIBRARY OF ATLANTA

and opening through the bottom thereof, flue means for removing gases from the said heating unit, water passages formed vertically in the wall of said unit and opening at their lower ends laterally into the tank, water circulating tubes extending vertically from the upper ends of

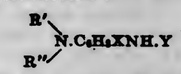
certain of said passages, means for conducting water from the upper ends of certain others of the passages back to the said lateral ports leading into the first mentioned passages, a heating element disposed in the lower end of said unit, and water inlet and outlet means for the tank.



1,900,452. DRIVING MEANS FOR OIL WELL EQUIPMENT. HYMAN LEDEEN, Los Angeles, Calif., assignor to The Falk Corporation, Milwaukee, Wis., a Corporation of Wisconsin. Filed Aug. 18, 1931. Serial No. 557,841. 3 Claims. (Cl. 255—11.)

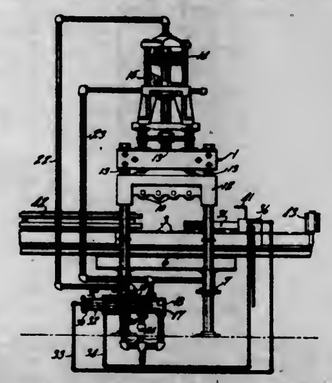
1. In oilwell equipment the combination of a bull wheel, a calf wheel, a walking beam, a sand reel, a speed reducer comprising a casing, a high speed shaft journalled in said casing, an intermediate speed shaft journalled in said casing, a low speed shaft journalled in said casing, and a train of gears within said casing operatively connecting said shafts, a crank on one end of said low speed shaft for driving said walking beam, means on the other end of said low speed shaft for driving said bull wheel and said calf wheel, means on said high speed shaft for driving said sand reel, a unidirectional drive shaft, a releasable driving connection between said drive shaft and said high speed shaft, a releasable driving connection between said drive shaft and said intermediate speed shaft, and means operable to render either of said driving connections effective, selectively, to thereby drive said speed reducer in either direction.

1,900,453. HUMIDIFIER. RONALD C. LUPLOW, Seligman, Ariz. Filed Aug. 26, 1931. Serial No. 559,554. 1 Claim. (Cl. 123—25.)



In combination with an internal combustion engine including its inlet and exhaust manifolds, a casing, a pipe connecting the top of the casing with the exhaust manifold, an exhaust pipe connected with the lower part of the casing, a damper in the first pipe, a second casing in the first casing, a thermostat therein, a rod connected with the thermostat and passing through the two casings, one end of the rod engaging the arm of the damper, a coil in the first casing and surrounding the second casing, a pipe connecting the upper end of the coil to the intake manifold, a valve for controlling the flow of vapor through said last-mentioned pipe, means for adjustably connecting said valve to the rod, whereby said valve will be operated

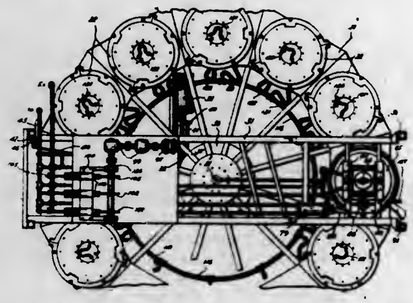
by a movement of the rod from the thermostat, a tank, a pipe connecting the upper end of the tank with the lower end of the coil, a pipe passing through the top of the tank to a point adjacent the lower end thereof and having a port in its upper end opening to the atmosphere, and a valve for controlling said port.



1,900,454. DYEING FURS, HAIRS, FEATHERS, AND SIMILAR ARTICLES. KARL MARX, Dessau in Anhalt, and ERICH LEHMANN, Wolfen, near Bitterfeld, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Apr. 14, 1931, Serial No. 530,138, and in Germany Apr. 30, 1930. 7 Claims. (Cl. 8—5.)

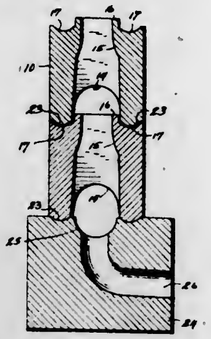
1. The process for dyeing furs, hairs, feathers and similar articles which comprises treating the said material in a bath containing an oxidising agent and a compound of the following constitution:

wherein R' stands for a cyclohexyl radicle, R'' for hydrogen or an alkyl, aryl aralkyl or cyclohexyl group, X stands for hydrogen, halogen or an alkyl, oxyalkyl or nitro group and Y is H or H.HCl.



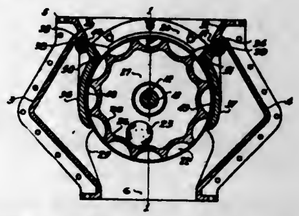
1,900,455. AUTOMATIC MOLD CLOSING APPARATUS. CHARLES EDGAR MAYNARD, Northampton, Mass., assignor to Roland W. Boyden and Charles A. Dana, as receivers of The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Oct. 12, 1931. Serial No. 568,362. 6 Claims. (Cl. 18—4.)

1. A device for closing molds which comprises, a continuously moving flat surfaced mold conveyor forming



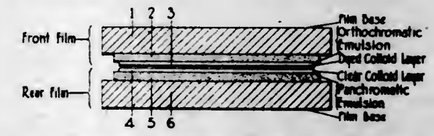
one member of a press, a vertically reciprocable platen positioned over the conveyor and forming the other member of the press, means to move the platen into mold closing contact with a mold on the conveyor, and actuating means positioned to be engaged by the mold, as the latter is advanced by the conveyor, to actuate the platen moving means, said actuating means and said platen moving means being so timed with respect to the speed of the conveyor that the forward edge of the advancing mold is first engaged by the platen, whereby the mold is progressively closed as it is carried beneath the platen by the conveyor.

1,900,456. TIRE VULCANIZER. GEORGE J. MEAD, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Mar. 22, 1930. Serial No. 438,109. 12 Claims. (Cl. 18—20.)



11. In a vulcanizing apparatus, the combination of a rotatable support, a plurality of vulcanizing mold units mounted thereon, each of said mold units having a rotatable locking ring, means including a pressure cylinder for intermittently rotating said support to bring the mold units successively to a definite station where vulcanized articles can be removed from and unvulcanized articles inserted in the molds, means for continuously supplying heating fluid and pressure fluid to the molds as they are carried by the support through a complete circuit, fluid-pressure actuating means for rotating the locking rings as their respective molds arrive at said station, and means for controlling the operation of said locking ring actuating means and said support rotating means.

1,900,457. BUILDING BLOCK. WALTER R. MILLER, Mansfield, Ohio. Filed Sept. 27, 1930. Serial No. 484,900. 4 Claims. (Cl. 72—41.)

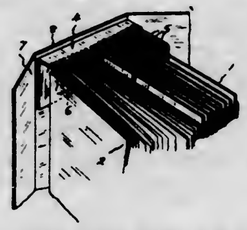


1. In a building, building blocks arranged in courses in vertically staggered relation, the blocks of each course being formed to provide a longitudinally extending drainage and ventilating passage, and the blocks having vertical voids intersecting said passages, and a base upon which the blocks rest formed to provide a gutter registering with the longitudinal voids of the lowermost blocks and having a drainage outlet, the abutting faces of the blocks in each course having medially disposed vertical voids opening into the longitudinal voids, each block of each course having interlocking connection with a superadjacent block, and the end faces of each block being formed with vertically disposed recessed lateral faces extending from top to bottom of the block and bonding material disposed between said recessed faces.

1,900,458. ROLL FEEDER. JOSEPH H. MORROW, Hokendauqua, Pa., assignor to Fuller Company, a Corporation of Delaware. Filed June 18, 1931. Serial No. 544,121. 5 Claims. (Cl. 83—44.)

1. A feeder for handling fine materials at a uniform rate, comprising the combination of a casing having an inlet and an outlet, a hollow roll arranged for rotation between the inlet and the outlet, the surface of the roll being provided with pockets of uniform size to receive the material, a follower plate closing one side of the inlet movably mounted near one side thereof having a portion of its inner surface conforming to the curvature of the roll, and of a depth sufficient to cover at least two pockets, means normally maintaining the follower plate in an inward position near the surface of the roll, the roll having an irregular inner surface and a relatively thin section and provided with circumferential channels at the ends of the roll, the ends of the roll being closed by thin discs, and balls freely movable in said channels within the roll to engage and vibrate both the latter and the discs.

1,900,459. MULTIPACK NEGATIVE SYSTEM. HOLLIS W. MOYSE, New Brunswick, N. J., assignor to Du Pont Film Manufacturing Corporation, Wilmington, Del., a Corporation of Delaware. Filed June 20, 1930. Serial No. 462,471. 3 Claims. (Cl. 95—2.)

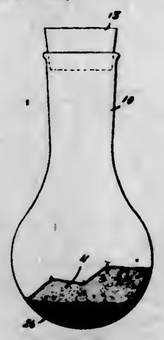


1. In a multi-pack negative system; a front light sensitive emulsion having coalescently coated thereon a relatively thin, transparent, water-permeable, dyed colloid, to minimize the scattering of light, and a rear emulsion having a like coating thereon that is undyed.

1,900,460. JOINT CONSTRUCTION. MATTHYS NUBERG, Grand Rapids, Mich., assignor to American Seating Company, Grand Rapids, Mich., a Corporation of New Jersey. Filed Mar. 12, 1931. Serial No. 521,984. 6 Claims. (Cl. 20—92.)

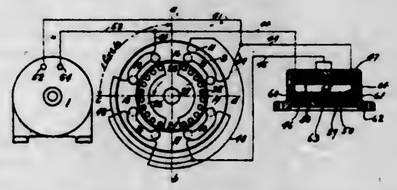
1. In a construction of the class described, a non-metal member provided with a bore and a slit extending therefrom to the outer surface of said member, a metal member having a series of raised semi-spherical portions, said raised portions conforming to the shape of the bore but of slightly greater overall width than that of the bore, said raised portions being adapted to be forcibly slid into said bore to form a metal-non-metal joint.

1,900,461. INDEX TO BE USED WITH TELEPHONE DIRECTORIES AND OTHER BOOKS. FRANCIS JOHN OSUCH, Detroit, Mich. Filed Oct. 12, 1931. Serial No. 568,442. 7 Claims. (Cl. 116—119.)



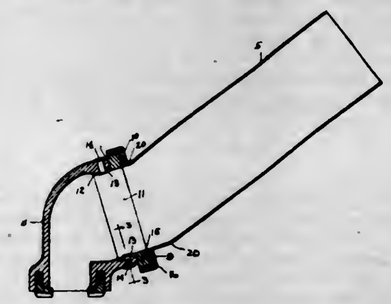
1. An index for bound books comprising a back section adapted to fit against and cover the bound edge of the book, members at the opposite ends of the back section and detachably secured thereto, and a plurality of separate index leaves hingedly connected to said members, the latter and the leaves being applicable to and removable from the bound book as a unit with the index leaves interspersed among the indexed leaves of the book.

1,900,462. INDEX FOR BOUND VOLUMES. FRANCIS JOHN OSUCH, Detroit, Mich. Filed Sept. 12, 1932. Serial No. 632,671. 14 Claims. (Cl. 116—119.)



1. An index for a bound book comprising a backing member, rods secured thereto, fastening elements carried by said backing member and rigidly attaching said rod to said member and index cards having apertured ends adapted to receive said rods.

1,900,463. BULB AND METHOD OF COLORING THE SAME. MARVIN PIPKIN, Cleveland Heights, Ohio, assignor to General Electric Company, a Corporation of New York. Filed Nov. 7, 1927. Serial No. 231,541. 4 Claims. (Cl. 176—16.)

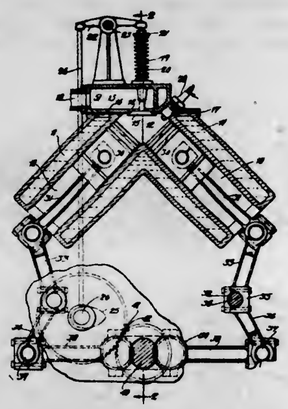


1. The method of coloring electric lamp bulbs which consists in frosting said bulb on the inside and then introducing a dry powdered pigment material comprising tungstic oxide and causing some of it to settle in the depressions of the frosted surface.

1,900,464. ELECTROMAGNETIC RECIPROCATING DEVICE. GEORGE HENRY POTH, Cincinnati, Ohio. Filed June 11, 1927. Serial No. 198,187. 11 Claims. (Cl. 172—240.)

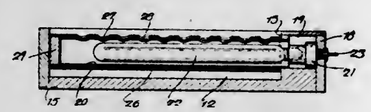
1. The combination with an electro-magnetic reciprocating mechanism, and a supply circuit therefor, of a distributor comprising relatively movable members, means for relatively moving said members, one of said members being provided with windings connected to said supply circuit and to the operating means of said mechanism, another of said members being provided with a plurality of short circuited conductors disposed in inductive relation to said windings of said first mentioned member.

1,900,465. VACUUM CLEANER. FREDERICK RIEBEL, Jr., Toledo, Ohio, assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio, a Corporation of Delaware. Filed Sept. 9, 1929. Serial No. 391,124. 4 Claims. (Cl. 285—120.)



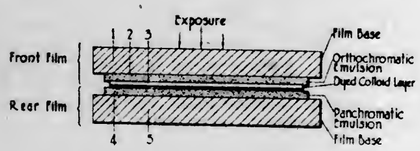
1. For a vacuum cleaner, a tubular suction member provided at one end with an outwardly extending annular flange, a tubular element including an axially projecting flange and a radially inwardly projecting shoulder in fixed relation to said axially projecting flange, a retaining collar threaded upon said element, said collar including a radially inwardly projecting flange spaced from said shoulder to form an annular recess, said outwardly extending flange being freely rotatable in said recess, and a substantially Z shaped securing element having a portion detachably secured flatly against the cylindrical face of the tubular element, a portion extending radially outwardly therefrom, and a portion projecting parallel to said first mentioned portion, the collar being provided with a recess to receive said last mentioned portion.

1,900,466. INTERNAL COMBUSTION MOTOR. HENRY R. SCHROEDER, Omaha, Nebr. Filed July 19, 1930. Serial No. 469,240. 1 Claim. (Cl. 123—53.)



In an internal combustion motor, a plurality of cylinders arranged in communicating pairs in inverted V-relation, means for supplying fuel to said cylinders, a piston in each cylinder, a crank shaft, a connecting rod pivoted

to each piston, a shaft extending lengthwise of the motor on each side thereof below said cylinders and arranged parallel with the crank shaft, a crank for each cylinder mounted on its respective shaft and having a pair of

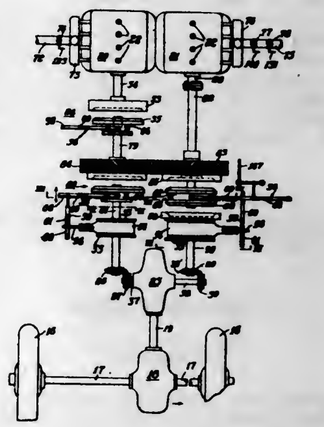


arms disposed angularly with respect to each other, one of said arms being connected to said connecting rod, and a driving link connecting the other arm of each of said cranks with said crank shaft.

1,900,467. JEWELRY DISPLAY DEVICE. CLARENCE H. SCRUGGS, Brooklyn, N. Y. Filed June 7, 1932. Serial No. 615,989. 5 Claims. (Cl. 240—6.)

1. A jewelry display device comprising a base, spaced tubes fixedly mounted upon said base, and having openings therein, illuminating means within said tube, tubular holder members slidably telescoping said tubes and having openings therein in register with the openings in said tube, and over which the jewels to be displayed are positioned.

1,900,468. MULTIPACK NEGATIVE SYSTEM. VIRGIL B. SEASE, Parlin, N. J., assignor to Du Pont Film Manufacturing Corporation, Wilmington, Del., a Corporation of Delaware. Filed June 19, 1930. Serial No. 462,197. 5 Claims. (Cl. 95—2.)



4. A color separation negative material suitable for use in a multipack system, said negative material comprising a transparent support, a light sensitive emulsion upon said support, said emulsion having coalescently coated thereon a relatively thin transparent, water permeable gelatinous coating, said gelatinous coating having a light filtering dye mordanted therein.

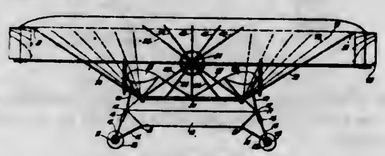
1,900,469. BOWLING BALL RACK. PAUL SKELBC and JOHN BUDNIK, Hamtramck, Mich. Filed Aug. 6, 1932. Serial No. 627,766. 2 Claims. (Cl. 273—47.)

1. A bowling ball rack comprising a pair of spaced, parallel bars, noses mounted on the ball receiving end portions of the bars, ribs on the upper faces of the noses, and tracks mounted longitudinally on the bars and aligned with the ribs.

1,900,470. AUTOMOTIVE SYSTEM. HUBERT P. SMITH, Emsworth, Pa. Filed Feb. 27, 1931. Serial No. 518,776. 20 Claims. (Cl. 180—54.)

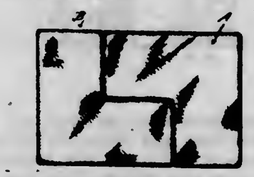
10. In a motor driven vehicle having wheels driven by a torque shaft, the combination of a plurality of driving units and means for coupling said driving units to said torque shaft differentially and accumulatively.

1,900,471. ROD AND PIPE GRAPPLE. FRED M. TIBS, Brodhead, Wis. Filed Aug. 15, 1931. Serial No. 557,363. 5 Claims. (Cl. 294—104.)



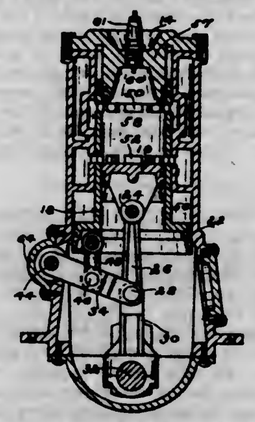
1. A grapple device of the character described, comprising a short cylindrical body having the edge at one end sharpened, a rod member connected with the other end of the body and extending axially thereof, a plate member disposed transversely of and within the body, pivotal supporting means for said plate permitting its oscillation longitudinally thereof and a flexible member connected with said plate to facilitate the movement of the plate from a point remote therefrom.

1,900,472. COATING ON ALUMINUM. MARTIN TOSTRUD, Arnold, Pa., assignor, by mesne assignments, to Aluminum Colors Incorporated, Indianapolis, Ind., a Corporation of Delaware. Filed Sept. 9, 1931. Serial No. 561,991. 4 Claims. (Cl. 204—1.)



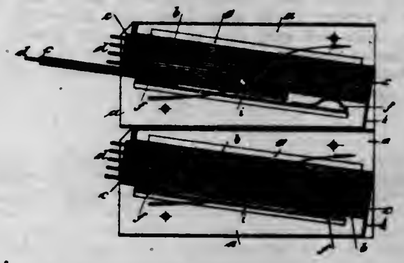
1. A process of producing on aluminum surfaces a thick, compact and pervious oxide coating of emery-like and uniform hardness and of uniform color and thickness, comprising making the aluminum to be coated an anode in an electrolyte containing about 5 to about 12 per cent by weight of sulphuric acid.

1,900,473. AIRPLANE. HUGH C. TULLY, New York, N. Y. Filed Feb. 3, 1932. Serial No. 590,683. 10 Claims. (Cl. 244—29.)



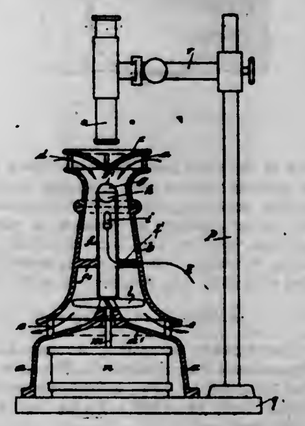
1. In an airplane, a main supporting wing arranged with its longitudinal axis extending fore and aft of the plane, and a plurality of control rudders mounted at each end of the wing said control rudders at each end of the wing overlapping each other in contacting relation when moved to either limits of their movement.

1,900,474. TWO PART COUCH. LAWRENCE B. WILSON, Tucson, Ariz. Filed Apr. 21, 1932. Serial No. 606,676. 1 Claim. (Cl. 155—130.)



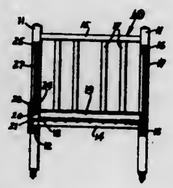
A couch of the class described comprising a pair of separate interfitting sections, each of L-shape in a horizontal plane, the lengths of certain corresponding limbs of each section being the same and their widths being the same as the lengths of the adjacent other limbs.

1,900,475. SLEEVE VALVE TWO CYCLE ENGINE. VICTOR H. WINQUIST, Seattle, Wash. Filed Sept. 22, 1930. Serial No. 483,480. 5 Claims. (Cl. 123—59.)



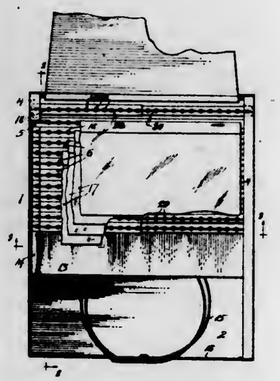
1. A two cycle, multiple cylinder, internal combustion engine consisting of compound cylinders each including a main cylinder and an auxiliary, larger cylinder; sleeves mounted in said main cylinders and having piston portions cooperating with said auxiliary cylinders to initially compress the charge; main cylinder pistons fitting within said sleeves; a multiple throw crankshaft; an oscillating piston rod for each main piston; a walking beam pivotally secured to said piston rod; an arm operatively connecting the walking beam to the sleeve; a connecting rod operatively connecting the walking beam and piston rod to the crankshaft; said sleeves and cylinders having cooperating ports to control the flow of gases; said engine having ports for leading the compressed charge from the larger cylinder of one pair to the smaller cylinder of the other pair.

1,900,476. FILTERING APPARATUS. HANS WITTEMEIER, Berlin-Grunewald, Germany, assignor to Midwest Manufacturing Company, Inc., Louisville, Ky., a Corporation of New York. Filed Sept. 9, 1929, Serial No. 391,416, and in Germany Oct. 27, 1928. 2 Claims. (Cl. 183—69.)



1. A filtering apparatus comprising a frame, filtering units in said frame, each unit including a set of filters and a holder surrounding said set, said holders being adapted to slide, and to fit tightly, in said frame and on each other, and means for exerting an upward pressure on the lowest holder.

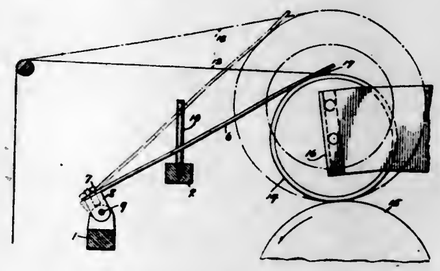
1,900,477. OPTICAL GAS TESTER. HANS WITTEMEIER, Berlin-Grunewald, Germany, assignor to Midwest Manufacturing Company, Inc., Louisville, Ky., a Corporation of New York. Filed Aug. 13, 1930, Serial No. 474,947, and in Germany July 5, 1930. 5 Claims. (Cl. 88—14.)



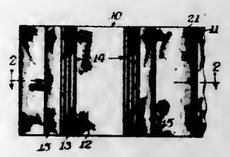
1. An optical gas tester comprising a substantially hemispherical dust collector of transparent material with its pole flattened, means for generating a flow of gas about said collector, and means for illuminating said collector.

1,900,478. COVER GRIPPING DEVICE. MAX E. ZIMMERMANN, Los Angeles, Calif., assignor of one-half to Karl Schumacher, Los Angeles, Calif. Filed Jan. 14, 1931. Serial No. 508,696. 6 Claims. (Cl. 5—100.)

1. In combination with a crib including end portions and side portions, one of said side portions including a panel, a closure gate adjacent to said panel, and pivot means arranged above said panel and connecting said end portions and said gate to mount said closure gate for swinging movement with the lower part thereof moveable outwardly against said panel to thereby hold bed covers against said panel.



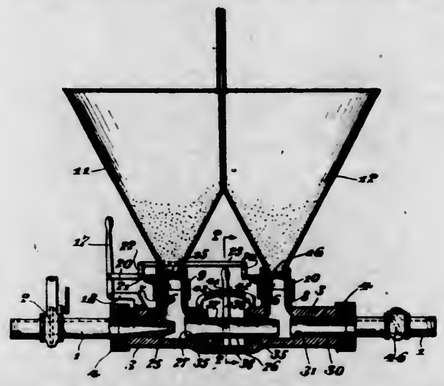
1,900,479. FILING OR RECORDING DEVICE. ZEMACH AUERBACH, New York, N. Y. Filed May 15, 1928, Serial No. 277,813. Renewed July 27, 1932. 7 Claims. (Cl. 129—16.)



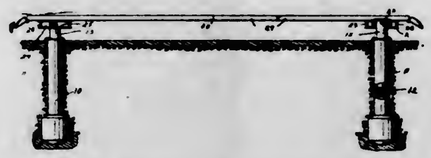
4. A device of the class described comprising a tray having opposed pockets, sliders each engaging in said pockets and having side members, said sliders composed of members adapted to be adjusted in relation to each other to vary the distance between said side members, and a plurality of cards or sheets having hinge members adapted to be engaged with said side members on said sliders.

1,900,480. TRAVERSE MOTION. ROBERT J. BARTHOLOMEW, Germantown, Pa., assignor to Fletcher Works, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 15, 1930. Serial No. 488,801. 4 Claims. (Cl. 242—43.)

1. A traverse motion comprising in combination a pair of traverse bars, a cam operated lever for reciprocating said bars, said bars being attached to said lever at different distances from the fulcrum thereof, a thread guide arm mounted for rotary and pivotal motion on one of said bars, and a pin carried by the other of said bars and extending through a slot in said guide arm for imparting rotary motion to said arm, the position of the pin in the guide arm shifting with increase in the diameter of the bobbin.



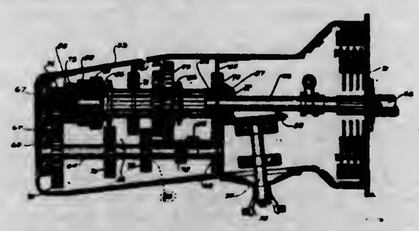
1,900,481. DECORATIVE BOW FOR HAT BANDS OR THE LIKE. SERAPHINE F. BAUWENS, Chicago, Ill. Filed Nov. 20, 1929. Serial No. 408,438. 16 Claims. (Cl. 2—179.)



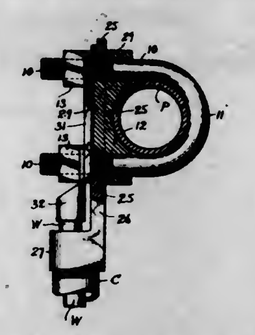
1. In a ribbon adapted for use as a hat band or the like, a bow formed from said ribbon and having a strip of hair cloth positioned along the back thereof, said strip being narrower than said ribbon and having the hair extending transversely thereof, said ribbon and said strip having a flat section extending longitudinally thereof and forming the central section of the bow, and a plurality of small transverse folds in said ribbon and said strip at each end of said section to provide a contrasting border for said section, a larger transverse fold formed in the ribbon and the strip at the outer side of each of said borders, a plurality of wires extending behind said section and through said folds, the ends of said wires being reversely bent along the back of the folds to prevent displacement of the folds toward the ends of the wires, means between said wires and said ribbon to prevent displacement of said folds toward the center of said wires, said strip extending beyond one end of said wires and being attached to said ribbon to form another outwardly extending fold, the reversely bent portions of one of the wires at the other end of the bow being in the form of a hook for engaging the ribbon to form a circular band.

1,900,482. APPARATUS FOR PRODUCING FIRE EXTINGUISHING FOAM. FISHER L. BOYD, Haverford, Pa., assignor, by mesne assignments, to National Foam System, Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Mar. 2, 1927. Serial No. 171,989. 2 Claims. (Cl. 169—15.)

1. In apparatus for producing fire extinguishing foam, the combination of a pipe through which a stream of water may flow, the said pipe having laterally and upwardly extending openings therein, containers supported above the said openings and being in communication therewith, the said containers being adapted to hold separately chemical substances which when combined in the presence of water react to produce fire extinguishing foam, means for simultaneously opening and closing the passageways from said containers into the said openings, means including a combining tube within the said pipe for creating partial vacuums therein opposite the said lateral openings, and means for adjusting the said tube to different positions.

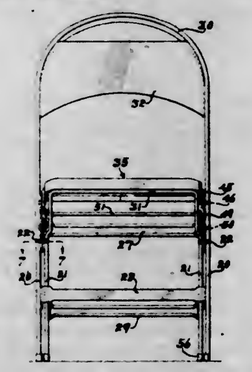


1,900,483. HYDRAULIC LIFT FOR VEHICLES. CYRUS J. BRISTOL, Des Moines, Iowa, assignor to Globe Machinery & Supply Company, Des Moines, Iowa, a Corporation of Iowa. Filed Dec. 15, 1930. Serial No. 502,436. 1 Claim. (Cl. 254—89.)



A lift device comprising two track members spaced apart, two lift devices one under each end portion of the track members, each lift device including a vertically movable rod, a head rigidly secured to each rod, a shaft fixed to each head with its ends projecting beyond the head, means for connecting said shafts to the said track members, said means comprising two spaced apart beams one on each side of the head, said beams being rigidly secured to the track members, and two spaced apart bars fixed to said beams formed with longitudinal slots through which the ends of the said shafts are extended, for the purposes stated.

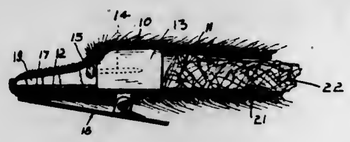
1,900,484. HEAVY DUTY AUTOMOBILE CONSTRUCTION. HAROLD D. CHURCH, Cleveland, Ohio, assignor to The White Motor Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 20, 1929. Serial No. 356,686. 4 Claims. (Cl. 180—70.)



1. In a motor vehicle, a prime mover including a crankshaft arranged transversely of the vehicle, a transmission shaft aligned with said crankshaft, a clutch between said shafts, a speed change gear including a countershaft parallel to said transmission shaft and a sleeve surrounding said transmission shaft but rotatable independently thereof, gear connections between said shafts and said sleeve, and a propeller shaft extending longitudinally of the vehicle driven from said sleeve at approximately a right angle thereto.

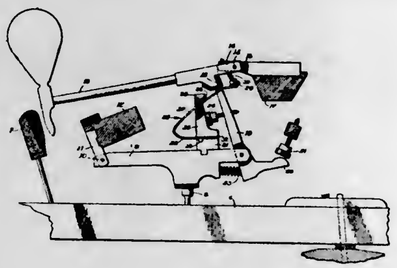
1,900,485. GROUNDING FITTING. LEWIS H. CHURCH, Westfield, N. J., assignor to The Thomas & Betts Co., Elizabeth, N. J., a Corporation of New Jersey. Filed July 25, 1929. Serial No. 380,790. 11 Claims. (Cl. 247—1.)

1. In a grounding fitting, a pipe clamp including a pipe seat, and a yoke having threaded legs extending through the seat, a boss formed on the pipe seat, a ring mounted on the boss and rotatable around the pipe seat, said boss being shorter than the depth of the ring in which it seats and hence providing clearance between the face of the boss and the outer edge of the ring, operating means on the threaded legs of the yoke engaging the ring over the clearance to clamp the ring upon the boss and to actuate the pipe clamp, and means carried on the ring by which a ground wire protective covering is attached thereto.



1,900,486. FOLDING CHAIR. WERNER E. CLARIN, Chicago, Ill. Filed May 28, 1931. Serial No. 540,577. 2 Claims. (Cl. 155—143.)

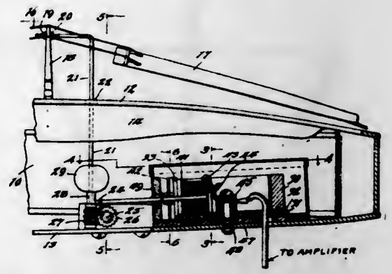
1. A metal folding chair comprising a pair of front legs and a pair of rear legs, pivotally connected at their intermediate parts, the legs of each pair having a top member thereon which is integral and continuous with the top ends of said legs and is of the same stock of material as the legs, said top ends of the rear legs being offset inwardly from the front legs, two links between said offset ends and said front legs, said links being pivoted to the front legs and carrying a rod which is slidable in slots in the offset ends, and a seat pivotally mounted between the front legs, and having its forward



portion detachably resting on the top member on the rear legs, to be readily swung upwardly therefrom without folding the legs, and also to be moved by said member to the folded position when the chair is thrown backwards on the floor.

1,900,487. FOUNDATION FOR ANIMAL HEAD AND BODY. BENJAMIN COHEN, Brooklyn, N. Y. Filed Apr. 30, 1932. Serial No. 608,409. 8 Claims. (Cl. 2—65.)

1. A foundation for an animal head and body comprising a fur skin head and body portion, a foundation over which said head is fashioned, and a spring jaw having upper and lower members, said foundation comprising a sponge like skull portion, a flat base member upon which the skull portion is mounted, having a snout portion projecting forward of the skull, an upright rib piece mounted on the snout portion and projected at one end into the skull, a projecting piece extending rearwardly of the skull to carry the filler into the body of the skin, and means on the snout portion to receive and hold the upper member of the spring jaw.



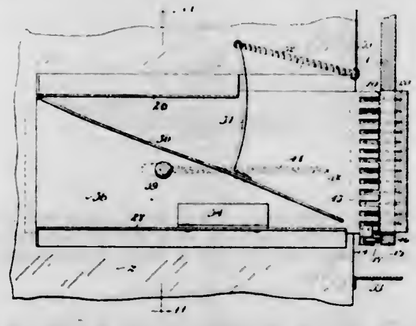
1,900,488. PIANO ACTION. CHARLES H. DASENBROOK, Rockford, Ill., assignor to Thayer Action Company, Rockford, Ill., a Corporation of Illinois. Filed Oct. 26, 1931. Serial No. 570,995. 11 Claims. (Cl. 84—289.)

4. In a piano action, the combination of a pivotally mounted hammer having a butt knuckle, a pivotally mounted whip adapted to be actuated by depression of a key, a jack pivoted on the free end of said whip and adapted to engage at its free end with said knuckle, a post rigid with and upstanding from said whip adjacent the jack pivot, an elongated piece of wire bent at its center to form a spring of the hair-pin type having open and closed end portions with the former anchored in said post, said closed end portion being inclined upwardly and adapted for engagement with said knuckle during recovery of said jack, and shoulders formed at the upper end of said post for engaging both sides of said closed portion.

1,900,489. MUSICAL INSTRUMENT OF THE VIOLIN TYPE. GEORGE EISENBERG, Brooklyn, N. Y. Filed Apr. 2, 1929. Serial No. 351,874. 6 Claims. (Cl. 84—294.)

1. A musical instrument of the violin type having a string and a bridge connected thereto, a magnetic unit mounted on the instrument, pole pieces on said unit having a plurality of gaps of different span, a vibratory

armature extending between one gap and lying closely adjacent a smaller gap at its outer end, and means connecting the armature to the bridge.



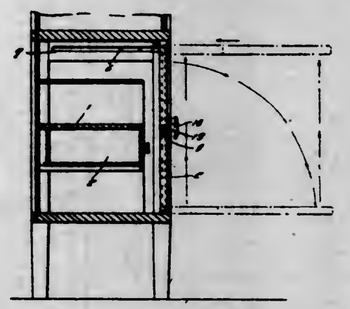
1,900,490. REVERSIBLE NECKTIE. EARL M. FAMOUS, Upper Darby, Pa. Filed Oct. 18, 1930. Serial No. 489,595. 3 Claims. (Cl. 2—146.)

1. A reversible necktie comprising superposed face fabrics having their sides folded inwardly with the edges in abutment approximately at a median line, said edges being united throughout separate longitudinal sections by seams similarly displayed upon both faces.

1,900,491. VEGETABLE SLICING MECHANISM. LEONARD FRANK, St. Paul, Minn. Filed Dec. 17, 1930. Serial No. 502,962. 5 Claims. (Cl. 146—78.)

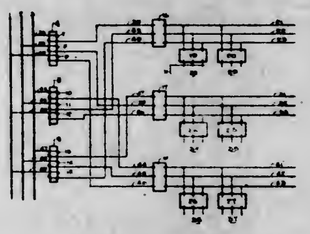
1. A vegetable cutting mechanism of the character described, comprising a supporting frame, a disk rotatably mounted thereon, a plurality of laterally aligned, equally spaced slitting blades mounted to extend above the surface of said disk, a slicing blade mounted on said disk and spaced outwardly from the face thereof a distance not greater than the length of said slitting blades above the face of said disk, a feedway mounted laterally adjacent said disk, a slidable bottom plate mounted in said feedway, said bottom plate having a toothed forward edge, the teeth thereof being disposed to lie normally between the paths of the slitting blades, and cam means operatively

connected to said disk to slidably move said bottom plate rearwardly beyond the path of said slicing blade as said slicing blade passes said feedway.



1,900,492. ARMORED CABLE. OTTO A. FREDERICKSON, Ben Avon, Pa., assignor to National Electric Products Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 1, 1930. Serial No. 440,682. 5 Claims. (Cl. 173—267.)

4. An insulated wire comprising a central conductor, a vulcanized rubber covering therefor, separate individual servings of fibrous fabric therearound immediately adjacent and directly abutting the vulcanized rubber covering, asphaltic material impregnating said fibrous servings and also sticking the said individual servings to the rubber covering thereunder, and an outer stearin pitch-like coating over the asphaltic coating for the purpose described.

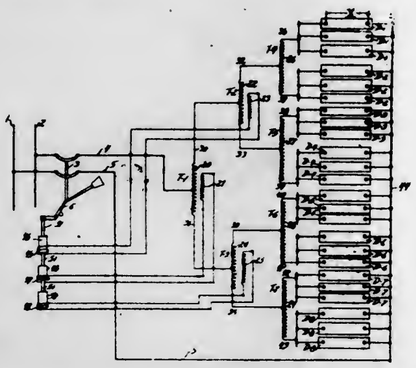


1,900,493. RADIO SECRETARY. FREDERICK M. FRIEDRICHS, Summerville, S. C. Filed Apr. 6, 1932. Serial No. 603,645. 1 Claim. (Cl. 312—189.)

A cabinet having a compartment therein, with an opening at the front of the compartment, the side walls of the opening having vertical guideways therein and the side walls of the compartment having horizontally arranged guideways therein adjacent the top of the compartment, the outer ends of which are in communication with the upper ends of the first-mentioned guideways, a door having pins in its side edges adjacent the lower end of the door for fitting in the guideways, whereby the door can be swung downwardly and outwardly and then moved upwardly to cause the pins to pass upwardly through the vertical guideways until they come into alignment with the horizontal guideways, after which the door can be moved inwardly to cause the pins to

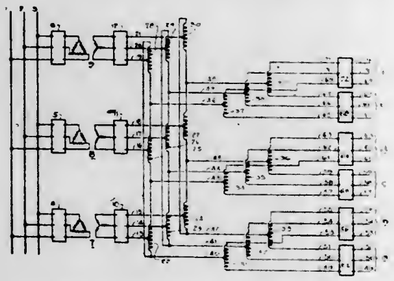
enter the horizontal guideways and bolt means carried by the door and engaging the horizontal guideways, when projected to support the door in a horizontal position with a part projecting forwardly from the cabinet to form a shelf or desk, the said bolt means, when projected, with the door in vertical position for closing the opening, engaging the vertical guideways for holding the door in closing position.

1,900,494. POWER TRANSMISSION SYSTEM. FRAZER W. GAY, Newark, N. J. Filed Dec. 16, 1930. Serial No. 502,734. 3 Claims. (Cl. 171—97.)



2. In a power transmission system, in combination, a three phase station bus having three bus conductors, three three phase lines, each of said lines having three conductors, three reactor-transformer means having a core provided with an air gap and three separately insulated windings on said core, the said windings of each reactor-transformer means being respectively connected in series between a respective one of said station bus conductors and a line conductor of corresponding phase of a respective one of said lines, whereby, upon the occurrence of a fault on the three conductors of one of said lines, a relatively heavy magnetizing current will flow in one winding of each of said reactor-transformer means, thereby building up the voltage on the remaining lines.

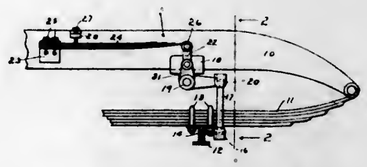
1,900,495. CAPACITOR PROTECTOR. FRAZER W. GAY, Newark, N. J. Filed July 18, 1931. Serial No. 551,670. 5 Claims. (Cl. 171—97.)



1. In a power transmission system, a power transmission line, a plurality of capacitor groups, each of said capacitor groups comprising, a plurality of interconnected capacitor units and a plurality of fuse means, each of said fuse means being respectively connected in series with a respective one of said capacitor units, a plurality of reactor elements each of said capacitor groups being inde-

pendently connected to a terminal of a respective one of said reactor elements, the remaining terminal of each of said reactor elements being connected to receive power from said transmission line, so that the failure of one capacitor unit of any one of said capacitor groups causes the remaining capacitor units of said capacitor group to

be discharged through said defective capacitor unit and effect the rupture of the fuse means connected in series with said defective capacitor unit, said reactor elements serving to retard the flow of current from said remaining capacitor groups to said capacitor group having the defective capacitor, whereby the recovery of voltage across the blown fuse means is built up relatively slowly.

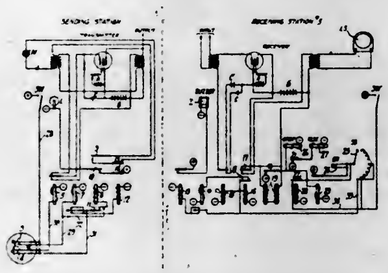


1,900,496. NETWORK OF MID TAPPED TRANSFORMERS. FRAZER W. GAY, Newark, N. J. Filed Dec. 16, 1930. Serial No. 502,735. 5 Claims. (Cl. 171—97.)

3. In a distribution system, in combination, a three phase source of power having three phase conductors, a plurality of three phase feeder circuits, a network of mid-tapped auto-transformers interconnecting said phase conductors to said feeder circuits, each of said auto-transformers having its mid-tap connected to a respective one of said phase conductors for receiving power and its end terminals connected to said feeder circuits, said auto-transformers offering relatively little impedance to the passage of power uniformly distributed among said feeder circuits but offering relatively great impedance to the passage of currents to a fault on one of said feeder circuits whereby voltage is maintained on the non-faulty feeder circuits.

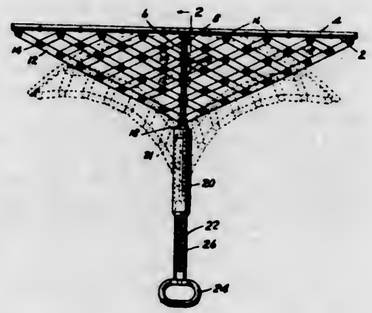
1,900,497. SHOCK ABSORBER. FRED GITZENDANNER, New York, N. Y. Filed Nov. 3, 1930. Serial No. 492,911. 4 Claims. (Cl. 267—19.)

1. In combination with a chassis frame having a spring supported axle, a cantilever spring attached to said chassis frame, a link connected with and actuated by said axle, a series of levers connecting said link with the free end of the cantilever and normally locking it in a neutral



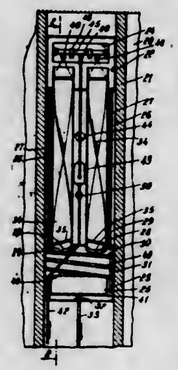
position, the construction of the levers being such as to free the end of the cantilever when the distance between the chassis frame and the axle is varied from normal.

1,900,498. EARTH ANCHOR. WALTER A. HEINRICH, St. Louis, Mo. Filed Feb. 2, 1931. Serial No. 512,932. 14 Claims. (Cl. 189—91.)



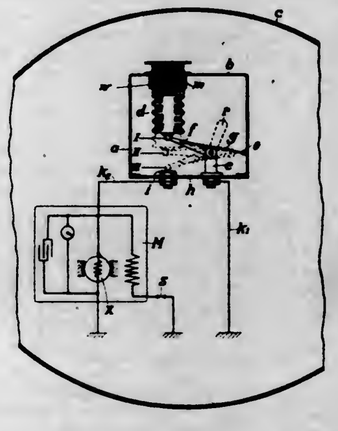
1. A screw-type earth anchor including a blade, a driving point, a torsion and tension shaft and means carried within the body of the blade and about a portion of the shaft, said means being adapted to prevent relative rotation of the blade and shaft.

1,900,499. SELECTIVE SIGNALING SYSTEM. HARRY E. HERSHEY, Oak Park, Ill., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 7, 1930. Serial No. 459,626. 18 Claims. (Cl. 250—6.)



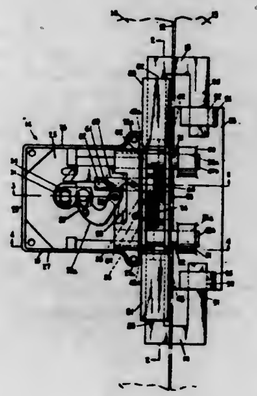
1. In a selective signaling system, a sending station, a plurality of receiving stations, means at the sending station for transmitting coded radio impulses to said receiving stations, a receiving device at each receiving station for receiving said radio impulses and repeating them, and means at each receiving station responsive to the repeated impulses for altering said receiving means for reception of a different character.

1,900,500. ADJUSTABLE ARC. WERNER HINCKELMANN, Philadelphia, Pa. Filed Apr. 14, 1931. Serial No. 529,925. 5 Claims. (Cl. 33—177.)



1. An adjustable arc comprising a flexible ruling edge, a guiding member connected thereto, a member movable along the guiding member, and a linkage connecting the ruling edge and movable member, whereby movement of the movable member effects flexure of the ruling edge, said linkage including links forming a reticulated array of quadrilaterals joined to the ruling edge at a plurality of points.

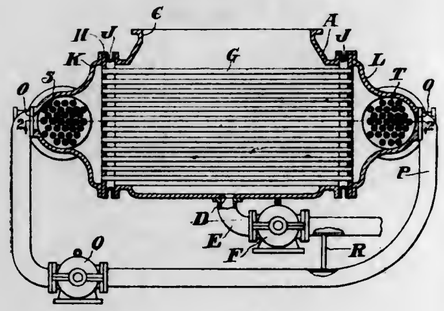
1,900,501. AIR CONDITIONING APPARATUS. EDWARD MCKINNEY HUNT, Montclair, and EDWARD L. FONSECA, Newark, N. J., assignors to The Wilcolator Company, Newark, N. J., a Corporation of Delaware. Filed Mar. 12, 1929. Serial No. 346,285. 16 Claims. (Cl. 261—116.)



1. In an air conditioning device the combination of at least one vertically extending straight tube, two housings, one communicating with each end of said tube, the upper housing having an air intake opening and the lower housing having an air discharge opening, a liquid spray device introduced into said tube adjacent the upper end thereof for creating suction therethrough, a plurality of baffles in said lower housing extending in alternate directions into the air stream for precipitating surplus water therefrom, and a gutter on at least one of said baffles for conducting away the liquid deposited thereon.

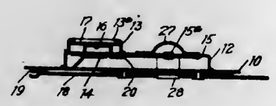
1,900,502. AIRCRAFT. HUGO JUNKERS, Dessau, Germany. Filed Oct. 21, 1931, Serial No. 570,080, and in Germany Oct. 28, 1930. 8 Claims. (Cl. 244—80.)

1. An aircraft comprising an altitude chamber, a pressure-sensitive element in said altitude chamber, and means operatively connected to said element for cutting out the motive power of said craft.



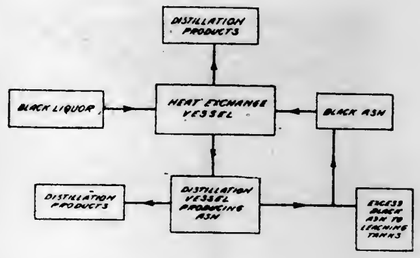
1,900,503. IRVING KEMP, New York, N. Y., assignor, by mesne assignments, to Kemp Lock Inc., New York, N. Y., a Corporation of New York. Filed Aug. 9, 1930. Serial No. 474,110. 13 Claims. (Cl. 292—33.)

1. A lock comprising a casing, a member formed with a helical thread rotatably and non-slidably mounted within said casing, and a bolt slidably mounted within said casing adapted to be protected from said casing, having means coacting with the thread of said member for causing rotation thereof upon slidably moving said bolt, and a second bolt slidably mounted on said casing for move-



ment in a direction transverse to the direction of movement of said bolt, and means on said member operatively engaging said second bolt for moving the same upon causing sliding movement of said first bolt.

1,900,504. CONDENSING APPARATUS. JOHN KIRGAN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Nov. 25, 1930. Serial No. 498,037. 14 Claims. (Cl. 257—44.)

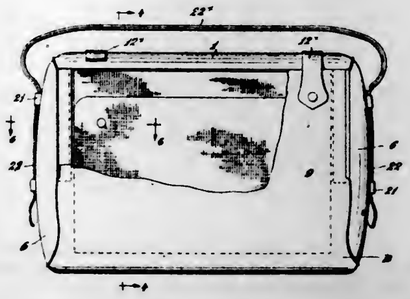


8. Condensing apparatus, comprising a condenser having a casing provided with an inlet opening for steam and an outlet opening for condensate, a condensate removal pump connected to the outlet opening, a circulatory system for the condenser including tubes in the casing and connection means for conveying water from one end of the tubes to the other end, a pump for circulating the water in the circulatory system, a conduit connecting the connection means with the discharge output of the condensate removal pump, and means for cooling the water supplied to the tubes.

1,900,505. FLASH LIGHT. HARRY KORETZKY, Jersey City, N. J., MAX HOROWITZ, Brooklyn, N. Y., and ANTHONY J. DESIMONE, Lyndhurst, N. J., assignors to Bright Star Battery Company, Hoboken, N. J., a Corporation of New York. Filed Mar. 27, 1931. Serial No. 525,804. 11 Claims. (Cl. 200—60.)

1. Switch mechanism comprising a casing, a contact member within said casing and fixed thereto at one end and having an offset portion at its other end, a tubular housing slidably mounted on said casing and enclosing said offset portion, a disk resting on said offset portion, an annular shoulder in said housing engageable by said disk, and means movable with said housing to engage said contact member for holding it in circuit closed position after having been moved into such position.

1,900,506. PROCESS OF DESTRUCTIVELY DISTILLING BLACK LIQUOR. RALPH W. KUMLER, Wilmington, Del. Filed Nov. 7, 1930. Serial No. 494,005. 12 Claims. (Cl. 202—3.)

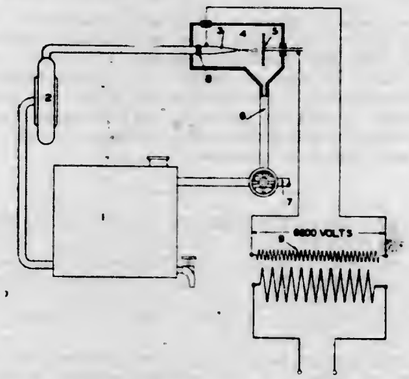


1. A process of treating black liquor, which includes the step of mixing black liquor with hot black ash to remove moisture from the black liquor.

5. A process for the recovery of values from black liquor, which includes the step of mixing black liquor with hot black ash to assist in the removal of moisture from the black liquor, and thereafter removing the volatile values from the substantially dried mixture by distillation.

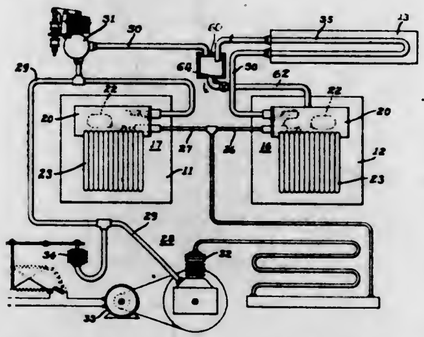
1,900,507. CELLULOSE ETHER COMPOSITION. WILLIAM W. LEWERS, Flint, Mich., and GEORGE L. SCHWARTZ, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed June 12, 1929. Serial No. 370,457. 8 Claims. (Cl. 134—79.)

5. A coating composition comprising 10 parts by weight of cellulose ether and from 0.4 to 4.0 parts by weight of a composite softener therefor, said composite softener comprising petrolatum having a boiling range above 200° C. and a melting range below 80° C. and a solvent softener from the group consisting of dibutyl phthalate, benzophenone, and acetyl laurin.



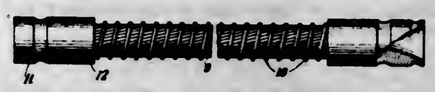
1,900,508. FITTED TRAVELING BAG. FLORENCE N. LEWIS, New York, N. Y. Filed Dec. 16, 1930. Serial No. 502,632. 3 Claims. (Cl. 190—52.)

1. A traveling and motor bag comprising a stiffened top member, a vertical division wall secured to and suspended by said top member, end members secured to the top member, a base closing member secured to each end member at the base thereof and thence extending upwardly



opposite each face of the division wall and continuing until each of the opposite ends of said base covering member lies adjacent one marginal edge of the top member to form a cover section for a compartment inwardly bounded by said division wall, and bounded at the top by the overhanging top member and bounded at the bottom by said base closing member, an upper portion of the cover section at each side of the bag being unattached to the end members so that the unattached portion may be folded down to expose the said compartment, and means for removably securing each of said unattached portions to the top member.

1,900,509. PROCESS FOR STERILIZATION OF LIQUIDS. EARL A. LOUDER, Greenville, Ill., assignor to Pet Milk Company, St. Louis, Mo., a Corporation of Delaware. Filed Oct. 30, 1930. Serial No. 492,209. 8 Claims. (Cl. 204—24.)

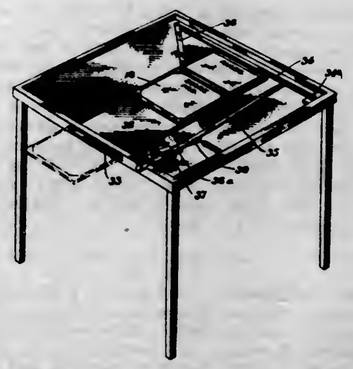


1. The method of sterilizing a liquid which comprises continuously projecting a stream of the liquid against a surface and maintaining sufficient difference of potential between said stream and said surface to maintain electric sparking in the zone of initial contact of the liquid with said surface.

1,900,510. REFRIGERATING APPARATUS. DAVID E. MACCABEE, Dayton, Ohio, assignor to Frigidaire Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Oct. 30, 1928. Serial No. 316,005. 11 Claims. (Cl. 62—115.)

5. Refrigerating apparatus comprising a refrigerating element including a reservoir for liquid refrigerant, a second refrigerating element connected in series with the reservoir and disposed above the level of liquid therein, the connection being arranged to deliver both liquid and gaseous refrigerant to the second element, and a drain from the outlet of the second refrigerating element to the first element.

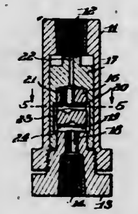
1,900,511. BRAKE OPERATING TUBE. EDWARD J. MADDEN, Bridgeport, Conn. Filed Feb. 14, 1929. Serial No. 339,878. 3 Claims. (Cl. 64—12.)



1. An operating tube for brake connections, comprising an inner helical wire coil, wire layers overlaid in reversely twisted relation about said inner coil, a helical wire coil about said reversely laid wire layers, the end of said inner coil being fastened to and supported by the end portion of the overlying wire layers, an end ferrule socketed to fit over the entire end portion of the tubing structure, said ferrule having a portion compressed upon the outer coil and binding said outer coil upon the overlying layers and the secured end portion of the inner coil, the end of the inner coil being secured by having its end portion drawn out and expanded to a larger diameter over the end of the overlying wire layers and said expanded portion of the inner coil being held by the socket in the ferrule solidly against the end of the overlying wire layers.

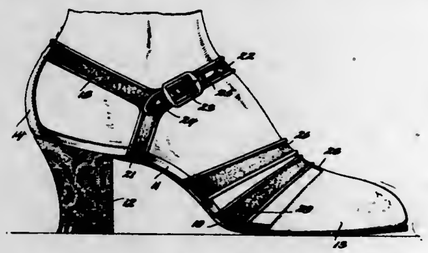
1,900,512. BRAKE CABLE TUBE. EDWARD J. MADDEN, Bridgeport, Conn. Filed Mar. 14, 1929. Serial No. 346,910. 7 Claims. (Cl. 64—12.)

1. A flexible brake operating tube of substantially constant axial length, comprising a spirally interlocked strip of preformed transverse shape having edge portions of greater and lesser diameters connected by an inwardly dished web and an outwardly extending rib of greater diameter than the larger diameter portion of the strip and the portion of lesser diameter having an outwardly extending edge flange forming by engagement inside the larger diameter portion of an adjoining coil, a sliding interlocking connection between adjacent convolutions of the two.



1,900,513. SCORE PAD DISPLAYING AND SUPPORTING DEVICE FOR CARD TABLES. LUCIEN A. MARSH, Mill Valley, Calif. Filed July 1, 1929. Serial No. 375,002. 7 Claims. (Cl. 273—136.)

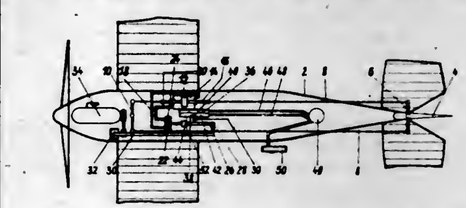
6. In combination with a table having a sight opening formed in its top, a trackway formed on an incline with relation to the top and extending from a position



beneath the sight opening downwardly toward one edge of the top, a data bearing pad mounted for movement along said trackway, and means for latching said pad in a position at the upper end of the trackway and in registry with said sight opening.

1,900,514. AUTOMATIC VALVE. WILLIAM A. MCLEAN, Rochester, N. Y., assignor to C. Schnackel's Son, Inc., Rochester, N. Y., a Corporation of New York. Filed Mar. 25, 1932. Serial No. 601,196. 6 Claims. (Cl. 50—84.)

1. In an automatic valve of the character described, the combination with a shell having inlet and outlet openings, of a fixed piston within the shell having a lateral port communicating with the inlet opening and a discharge port in its head, and a vibratory cylinder confined within the shell and fitted over the piston, said cylinder being provided with a feed port communicating with the outlet opening of the shell and with the piston head discharge; with a by-pass normally connecting the piston head discharge with the lateral port, and with a cut-off for such lateral port effective upon an outward stroke of the cylinder.

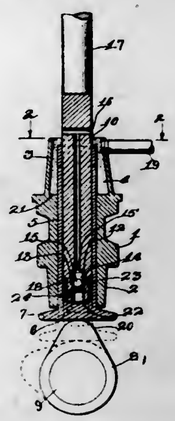


1,900,515. SHOE. CHARLES MILLER, Long Island City, N. Y. Filed Mar. 18, 1931. Serial No. 523,397. 2 Claims. (Cl. 36—2.5.)

1. A sandal comprising an inner sole, an outer sole, a heel, a narrow self-sustaining upstanding rear upper section positioned entirely at the rear of said heel, and a strap attached to the top portion of said rear upper section, said strap having integral longitudinally and downwardly extending portions at both sides of the shoe having their ends secured in position in advance of the heel breast and separable instep strap portions integral with said longitudinally extending portions, the edges of said inner sole at both sides thereof being exposed between said rear upper section and the downwardly extending portions of said strap.

1,900,516. STEERING APPARATUS FOR AIRCRAFT. WALDEMAR MÖLLER, Berlin-Charlottenburg, Germany, assignor to Askania-Werke Aktiengesellschaft, Berlin-Friedenau, Germany, a Corporation of Germany. Filed June 18, 1931, Serial No. 545,229, and in Great Britain July 1, 1930. 17 Claims. (Cl. 244—29.)

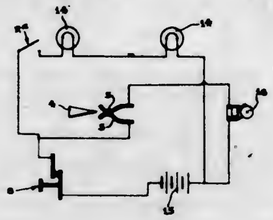
1. Steering apparatus for aircraft comprising, in combination, lateral steering means; pressure fluid driven operating mechanism therefor comprising a cylinder, a piston in said cylinder, passages communicating with said cylinder on opposite sides of said piston respectively, and a nozzle to supply pressure fluid to said passage; pressure fluid operated mechanism to move said nozzle relatively to said passages to supply pressure fluid to said passages in varying ratio, and comprising a diaphragm chamber having a diaphragm connected by a resilient connection to said nozzle, and passages communicating with said diaphragm chamber at opposite sides respectively of said diaphragm; a compass having a relatively movable magnet system and casing; and means, controlled by relative movement of the magnet system and casing, to direct the pressure fluid in varying ratio into said last-named passages.



1,900,517. HIGHLY SOLUBLE CALCIUM GLUCONATE AND PROCESS OF MAKING SAME. RICHARD PASTERNACK, Brooklyn, and WILLIAM RALPH GILES, Richmond Hill, N. Y., assignors to Charles Pfizer & Company, Brooklyn, N. Y., a Corporation of New Jersey. Filed July 6, 1931. Serial No. 549,101. 10 Claims. (Cl. 260—112.)

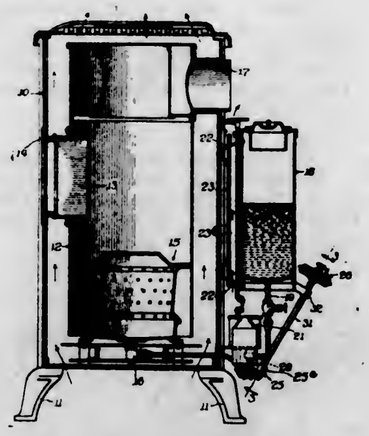
1. As a new product, highly soluble calcium gluconate, capable of forming a cold aqueous solution of up to 40% concentration.

6. Process for the preparation of highly soluble calcium gluconate which comprises spray-drying a hot solution of calcium gluconate at elevated temperatures.



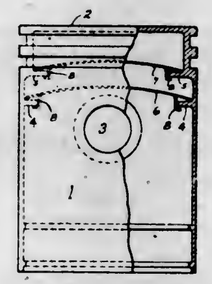
1,900,518. SELF-ADJUSTING VALVE LIFTER, OR TAPPET. AMEL L. PEARSON and JACOB J. GERHARDT, Madison, Wis. Filed Apr. 2, 1931. Serial No. 527,180. 1 Claim. (Cl. 123—90.)

In a device of the character described, a guide having an oil reservoir on the upper end thereof, a cylinder slidably mounted in the guide having its lower end provided with a head and its upper and open and extending into the oil reservoir, a cam for engaging said head and operating said cylinder, a plunger slidably mounted in



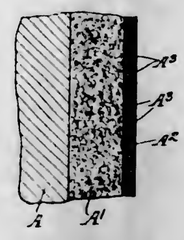
the cylinder having a longitudinal bore and a chamber opening out of its lower end and communicating with the bore, said plunger also having lateral ports adapted to extend into the oil reservoir at certain times, the chamber defining a valve seat at its upper end, a valve in the chamber, the lower end of the plunger being reduced to define a shoulder, and an expansion coil spring fitted around the reduced portion of the plunger and confined between the shoulder and the head of the cylinder.

1,900,519. ALARMED CASH REGISTER. FRED PIANI, New York, N. Y. Filed Feb. 9, 1931. Serial No. 514,626. 1 Claim. (Cl. 235—22.)



In combination with a cash register having a plurality of keys and a drawer, an electrical circuit, a switch in said circuit operable by any one of said keys, an electrically operated signal in said circuit, a second electrical circuit, an alarm in said second circuit, a switch in said second circuit operable by the opening of the drawer in said cash register to cause the sounding of said alarm, a switch the operation of which makes both circuits inoperable and a special key for operating said last named switch.

1,900,520. CABINET TYPE OIL BURNING HEATER. GEORGE E. PICKUP, Newark, Ohio, assignor to The Wehrle Company, Newark, Ohio, a Corporation of Ohio. Filed Dec. 24, 1931. Serial No. 582,952. 6 Claims. (Cl. 126—90.)

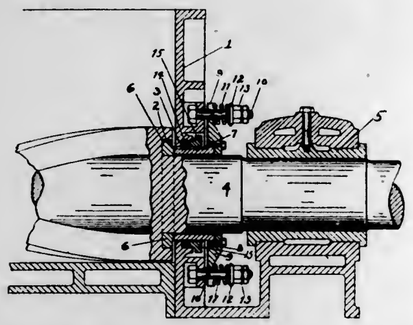


1. A unitary heater of the character described comprising an oil burner, a combustion chamber for said burner, an air circulating casing surrounding and supporting said combustion chamber, an oil supply tank carried by a side wall of said casing, heat-insulating means on one side of said tank between said tank and said casing, a fuel supply connection between said tank and said burner, a valve in said connection, a thermally responsive element supported on the other side of said tank in spaced relation to the top, bottom and side edges of the tank, and means forming a direct operating connection between said thermal element and said valve.

1,900,521. PISTON HEAD GUARD. JAMES H. PRICE, Grand Rapids, Mich. Filed Feb. 6, 1931. Serial No. 513,867. 4 Claims. (Cl. 74—108.)

1. In a perforated splash disc having a pair of oppositely disposed peripheral depending hooks, said disc being adapted to be supported on the upper sides of a pair of oppositely disposed laterally projecting shelves of a hollow piston and said hooks being adapted to engage the under sides of said shelves, said disc when inserted being upwardly bowed for tensional retention by said shelves.

1,900,522. SOUND ABSORBENT MATERIAL AND PROCESS OF PRODUCING IT. PAUL E. SABINE, Geneva, Ill., assignor of one-half to Riverbank Laboratories, Geneva, Ill., a Corporation of Illinois. Filed Apr. 6, 1931. Serial No. 528,045. 5 Claims. (Cl. 72—17.)



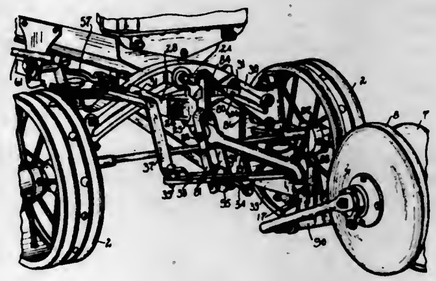
1. The method of rendering walls, ceilings and the like sound absorbent which includes applying to the surface to be treated a sound absorbent layer, applying to the sound absorbent layer a layer of plastic material, and forming a plurality of apertures in said plastic material.

1,900,523. PACKING GLAND. EUGENE SCHMIEDER, Saginaw, Mich., assignor to Baker Perkins Company, Inc., Saginaw, Mich., a Corporation of New York. Filed Feb. 14, 1930. Serial No. 428,322. 2 Claims. (Cl. 286—7.)

2. A packing gland for rubber and other tenacious material working machines comprising a seal member secured to a shaft at the point where said shaft passes through a wall and revolvable therewith, a gland loosely surrounding said shaft and consisting of a sleeve portion and a flange portion, said sleeve portion adapted to contact in sealing relation with said seal member, tightening bolts passing through enlarged openings in said flange portion to secure the said gland against rotation, springs surrounding said tightening bolts, whereby the sleeve portion is permitted to follow the eccentric motion of

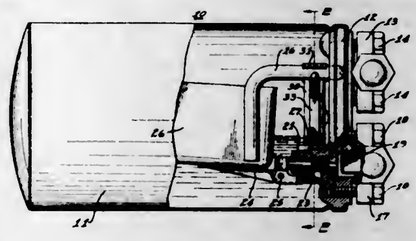
the seal ring, due to shaft deflection and irregular rotation and thereby hold the sleeve portion and seal member in tight contact with each other, a resilient packing surrounding said sleeve portion adjacent said wall, a compression gland loosely surrounding said sleeve por-

tion and having independent means adapted to compress said resilient packing against said sleeve portion and the portion of the wall through which said shaft passes, whereby the compression of the resilient packing may be adjusted independently of the pressure applied to the seal joint for the purposes set forth.



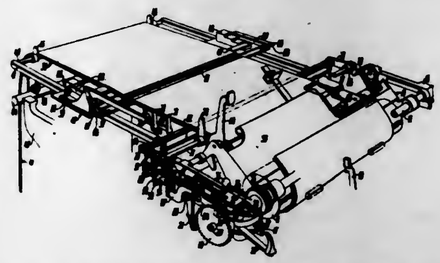
1,900,524. PILE SHELL. FREDERICK A. SCHROEDER, Rochelle Park, and ALBERT E. TWIST, Rutherford, N. J., assignors to Raymond Concrete Pile Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 15, 1932. Serial No. 586,800. 8 Claims. (Cl. 61—78.)

1. As an article of manufacture, a permanent pile shell for driving and subsequent filling, comprising in combination, an outer casing of thin material, an inner lining of corrugated material, and a filler of nonmetallic reinforcing material between said casing and said lining.



1,900,525. TRACTOR GUIDE. WALTER H. SILVER, Moline, Ill., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Sept. 22, 1930. Serial No. 483,501. 26 Claims. (Cl. 97—49.)

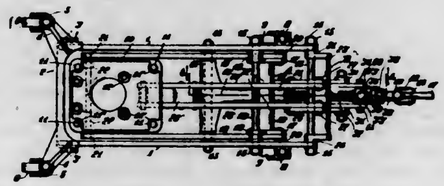
1. The combination with a tractor having dirigible wheels and a manually controlled steering means for said wheels on the tractor, of a steering device for automatically controlling the position of said wheels, both of said steering means being simultaneously operable to steer said dirigible wheels, said steering device being movable



vertically to inoperative position, and means for preventing lateral movement of the device when in inoperative position.

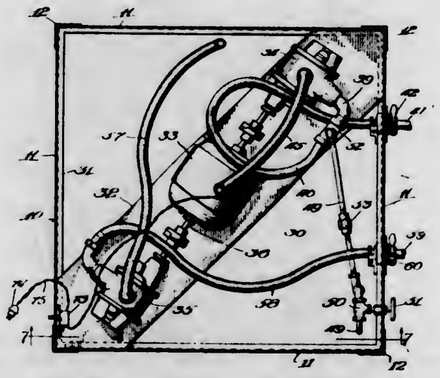
1,900,526. CONTROL MECHANISM FOR EVAPORATORS. FRANKLIN G. SLAGEL, Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed May 29, 1930, Serial No. 457,448. Renewed Jan. 10, 1933. 4 Claims. (Cl. 62—126.)

1. In a refrigerating system, an evaporator, means for automatically admitting refrigerant and oil in solution into the evaporator to maintain a substantially constant liquid body therein, a suction outlet conduit leading from the vapor space in the evaporator to the exterior, a cup in the evaporator, a wick depending into the liquid body and extending into the cup, and means establishing a conduit connection between the cup and the suction outlet.



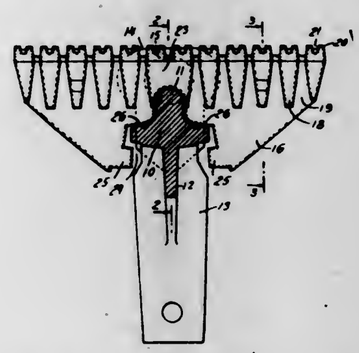
1,900,527. TYPEWRITING MACHINE. JESSE A. B. SMITH, Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed June 27, 1930. Serial No. 464,180. 7 Claims. (Cl. 197—133.)

1. In a web-manifolding typewriting machine having a platen around which may be fed from a source of supply a multiple-ply work-web interleaved with carbons,



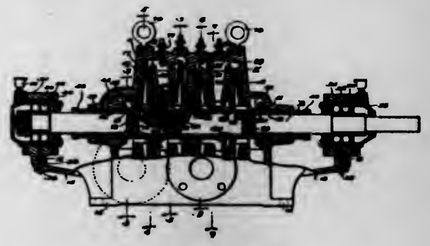
the combination with mechanism for line-spacing said platen, of devices operatively connected to said line-spacing mechanism to be effective at the initial portion of the line-spacing stroke thereof for producing a loop in said web, means for thereupon immediately disconnecting said loop-producing devices from said line-spacing mechanism, the remaining portion of the line-spacing stroke of said mechanism being effective to rotate said platen, and means for releasing said loop-producing devices from said web, so that said loop may cause a slack in the web before said platen is rotated by said line-spacing mechanism.

1,900,528. JACK. ROBERT STATZ, Racine, Wis., assignor to Walker Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Filed Jan. 28, 1932. Serial No. 589,418. 17 Claims. (Cl. 254—7.)



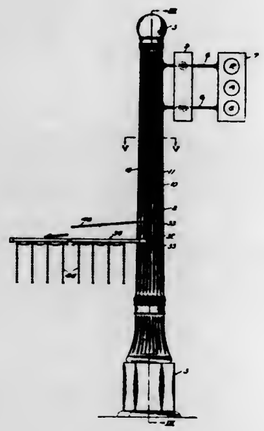
1. A jack comprising a carriage, a load-supporting member, a lever mechanism fulcrumed on the carriage and comprising long and short arms, the longer arm supporting the member, a swinging frame pivoted to the shorter arm of the lever mechanism, a nut pivotally supported in the carriage, a screw shaft threaded in the nut, a thrust-collar mechanism connecting the screw shaft with the frame so that the frame will move longitudinally with the screw, and means for rotating the screw-shaft.

1,900,529. DISHWASHER. ROBERT L. TATHAM, Chicago, Ill. Filed June 29, 1929. Serial No. 374,890. 4 Claims. (Cl. 141—9.)



1. In a dish washer, the combination of a case having a lower compartment, pumping apparatus therein embodying a pump having its intake end connected to a water supply conduit, a dish holding tank removably secured in said case above said compartment, a dish spraying device in said tank, a soap reservoir contained in said tank, a water conduit leading from the discharge end of said pump and connected releasably to the dish spraying device, and a conduit leading from said soap reservoir and connected releasably to the intake end of said pump, whereby the tank and soap reservoir may be disconnected from the pumping apparatus.

1,900,530. GRATE. JAMES S. THOMPSON, New Rochelle, N. Y., assignor to Firebar Corporation, Cleveland, Ohio, a Corporation of Delaware. Filed Aug. 19, 1930. Serial No. 476,265. 16 Claims. (Cl. 126—180.)



1. A grate bar comprising a longitudinal member provided with supporting means at its ends and a plurality of hollow fuel supporting units extending beyond the lateral edges of said member, each unit consisting of a pair of plates of sheet stock having portions remote from their edges distorted out of the plane thereof and serving to prevent cumulative expansion effects.

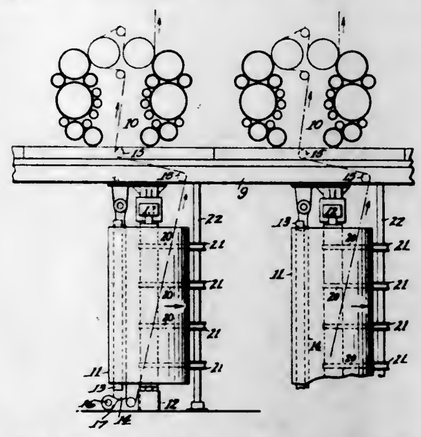
1,900,531. MULTISTAGE CENTRIFUGAL PUMP. JAMES E. VITU, Chicago, Ill., assignor to Well Pump Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 19, 1929. Serial No. 393,603. 4 Claims. (Cl. 103—112.)

1. In a centrifugal pump, the combination with a casing having two adjacent impeller chambers; of an impeller rotatably mounted in each of said chambers, the pressure developed in one of said chambers being in excess of that developed in the other; and means providing a seal between said chambers adjacent the shaft of the impellers, said means including a fixed sealing ring and a loose floating ring cooperable therewith, said fixed sealing ring having an annular flange with a plane surface projecting toward said shaft, and said floating ring loosely surrounding said shaft and having an outstanding annular flange with a plane surface overlapping the plane surface of said flange of the fixed sealing ring and disposed on that side of the sealing ring facing the chamber having the higher pressure, whereby the flange of the floating ring is pressed against the flange of the fixed ring by the pressure developed in said chamber having the higher pressure and the floating ring may shift relatively to the fixed ring in a plane perpendicular to the axis of the shaft.

1,900,532. TRAFFIC REGULATOR. EZRA C. WELSH, Grimsby, Ontario, Canada. Filed Oct. 6, 1928, Serial No. 310,747. Renewed June 24, 1932. 15 Claims. (Cl. 116—63.)

1. In a traffic regulator, a hollow standard formed with a vertical slot, a pedestrian control means, supporting means for the control means movable vertically along the slot and mechanism within the standard for positively driving the supporting means in different directions for effecting up or down movement of said supporting means.

1,900,533. AUTOMATIC PRESSURE RELEASE GAUGE. LELAND JAY WILCOX, Adel, Iowa. Filed June 10, 1931. Serial No. 543,292. 2 Claims. (Cl. 137—53.)



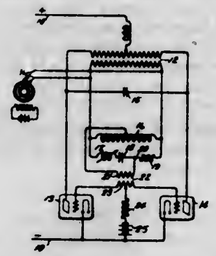
1. In a device of the class described, a hollow member having an opening and a flat bottom flush with its side walls, a hollow stem secured to the center of said bottom and communicating with the inside of said hollow member, said stem having an outer end portion; said bottom having a plurality of air escape ports arranged around said stem, a washer slidably mounted on said stem, a resilient member on said washer capable of closing said ports when said washer is moved toward said hollow member, a nut threaded onto the outer end portion of said stem, and a coil spring embracing said stem having one end engaging said washer and its other end engaging said nut.

1,900,534. ELECTROLYTIC APPARATUS. RICHARD A. WILKINS, Beverly Farms, Mass., assignor to Industrial Development Corporation, Salem, Mass., a Corporation of Maine. Filed Aug. 21, 1928. Serial No. 301,120. 4 Claims. (Cl. 204—5.)

1. Apparatus for electro-depositing zinc comprising in combination, a cathode, an anode containing soluble zinc in proximity to said cathode; said anode so proportioned and so located as primarily electrolytically to supply zinc to the electrolyte at a rate less than zinc is deposited upon the cathode under the desired electrolyte and current conditions; supplemental zinc bearing material relatively remote from said cathode and having the capacity for supplying to the electrolyte, primarily by chemical reaction, more than sufficient zinc to compensate for the excess of zinc deposited over that supplied by said anode; means for circulating said electrolyte in contact with said cathode and anode and in contact with said supplemental zinc bearing material, and means for varying the extent to which the capacity of said supplementl material is used, thereby to increase or decrease the zinc content of the electrolyte.

1,900,535. METHOD OF AND APPARATUS FOR FEEDING PAPER TO PRINTING PRESSES. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed May 13, 1930, Serial No. 451,965. Renewed July 29, 1932. 7 Claims. (Cl. 101—225.)

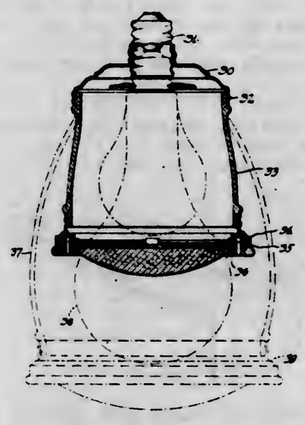
3. The combination with a printing press, of supports for a web roll located below and at one side of the press one over the other, so that the axis of the web roll is located in a vertical position and a vertical guide roll in position for guiding the web from the web roll into the press.



1,900,536. LAMINATED GLASS. JOHN C. ZOLA, Tarentum, Pa., assignor to Duplate Corporation, a Corporation of Delaware. Filed Mar. 3, 1931. Serial No. 519,897. 15 Claims. (Cl. 49—81.)

1. A laminated plate comprising a pair of glass sheets, an interposed sheet of cellulose ester plastic and a joining layer of material between each of the glass sheets and the sheet of plastic comprising the condensation product produced by heating a polyhydric alcohol with a dibasic aliphatic acid containing six or more carbon atoms in a normal straight chain.

1,900,537. CEMENTING COMPOSITION. LESTER V. ADAMS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 9, 1929. Serial No. 384,807. 6 Claims. (Cl. 87—17.)

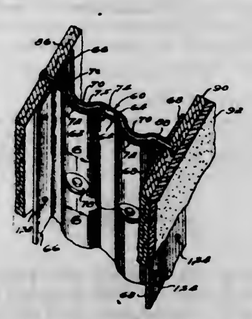


1. A cementing composition consisting of an alkyd resin and a degelled oil homogeneously blended but uncombined with said resin.

1,900,538. PHASE SHIFTING CIRCUITS. BURNICE D. BEDFORD, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 27, 1930. Serial No. 478,165. 8 Claims. (Cl. 172—238.)

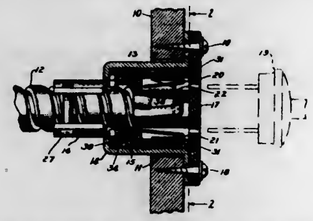
1. In combination with a source of alternating potential, means for obtaining a potential variable in phase with respect thereto over a range of more than 180 electrical degrees comprising means for establishing a point of intermediate potential of said source, a two-part series circuit connected across said source comprising respectively a resistance and an inductance and capacitance one of which is variable, and an output circuit connected between said intermediate point and the junction of said two-part circuit.

1,900,539. READING LAMP. CHARLES T. BRADY, Detroit, Mich. Filed Nov. 27, 1929. Serial No. 410,018. 4 Claims. (Cl. 240—92.)



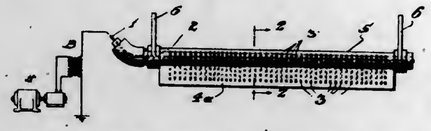
1. A lamp comprising a housing having an open end and a closed end, an adapter mounted in and passing through said closed end, said adapter having one end adapted for insertion in a lamp socket and the other end adapted to receive a lamp plug, a lens frame mounted in said open end, said frame having an inner flange, a lens mounted in said frame and resting on said flange, and a spring ring holding said lens against said flange.

1,900,540. ICE-REMOVER FOR WINDSHIELDS. JOHN H. BRODERICK, Clinton, Mass. Filed Feb. 8, 1930. Serial No. 427,007. 2 Claims. (Cl. 15—255.)



1. As an article of manufacture, a block adapted to be rubbed over a surface for the purpose of removing ice and sleet consisting of common salt and a pyroxylin cement and containing about 20 percent as much cement as salt by volume.

1,900,541. STRUCTURAL ELEMENT. HENRY W. BUELOW, Royal Oak, and GEORGE BUELOW, Detroit, Mich. Filed July 1, 1931. Serial No. 548,134. 9 Claims. (Cl. 189—34.)



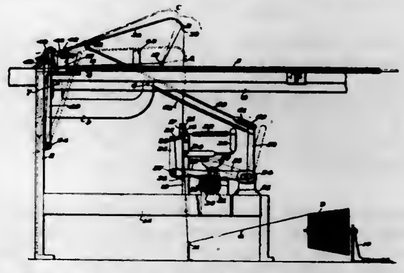
1. In a metallic structural frame element adapted to receive and hold fastening elements, a pair of metallic channel members rigidly secured together in back-to-back relation with the corresponding sides of said channels in co-planar relation and with the webs spaced from each other for reception of said fastening elements, said webs being corrugated longitudinally thereof in complementary relation, with the ridge of one corrugation extending toward the valley of the complementary corrugation whereby to form between them a curved slot to receive said fastening elements, the shape of the slot defined by the corrugations, the spacing of the webs, and the rigidity of the metallic channel members being such as to cause said fastening elements to bend and thereby be held in position by contact with the sides of said corrugations when driven in between the same transversely thereof.

1,900,542. WIRING DEVICE. GEORGE CARLSON, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed May 28, 1931. Serial No. 540,671. 4 Claims. (Cl. 247—15.)

1. In a wiring system, an outlet box adapted to receive a wiring device and having an opening through which a cable may pass, a cable clamp having shoulders to engage the base of said outlet box, a wiring device to which a cable may be connected provided with a stop for the cable armor, and a face plate cooperating with said outlet box to hold the wiring device in position in said box when the outlet box is secured in an opening in a wall.

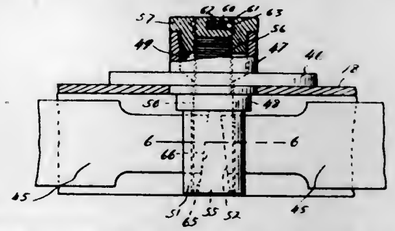
1,900,543. COMBINED INK DRYING AND NEUTRALIZING DEVICE. CHARLES HENRY COCHRANE, New York, N. Y. Filed Nov. 26, 1930. Serial No. 498,399. 6 Claims. (Cl. 175—264.)

1. In a device of the character described the combination of a suitable electrical conductor, said electrical conductor being charged with high potential alternating electrical energy, a suitable insulating covering embracing said electrical conductor, and a plurality of suitably shaped inductive electrical members positioned and held upon said insulating covering for the purpose of creating electrical breezes, and insulating means to completely cover and protect said plurality of inductive electrical members.



1,900,544. PLAYING BALL. WILLIAM D. CRAIG, Meadville, Pa., assignor to Hookless Fastener Company, a Corporation of Pennsylvania. Filed Apr. 10, 1930. Serial No. 443,120. 2 Claims. (Cl. 273—65.)

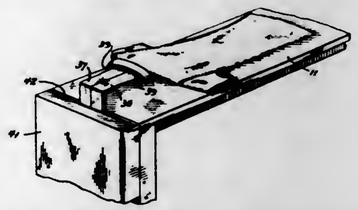
1. In a playing ball, a leather cover having a slit therein, a slide fastener having tape stringers arranged on the inner side of said cover adjacent said slit, metal fastener elements attached to the edges of said tape stringers and a slider movable along said elements to engage and release the same, reinforcing and facing strips arranged over said tape stringers on the inner side thereof and spaced apart sufficiently to allow free movement of the slider, a flap attached along one side to said cover and having its free edge extending over said metal elements and slider, and an inflatable bag inside said cover.



1,900,545. FILLING STOP MOTION FOR LOOMS. ANTHONY DARIENZO, Amsterdam, N. Y., assignor to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn., a Corporation of Massachusetts. Filed Aug. 3, 1932. Serial No. 627,331. 10 Claims. (Cl. 139—370.)

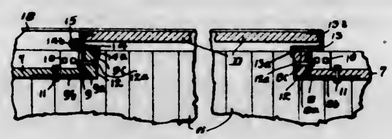
1. In a filling stop motion for looms, the combination of a needle for passing the filling through the shed, a whip for taking up slack in and tensioning the filling, a main tensioning mechanism for the filling, means for rendering the whip and the main tensioning mechanism ineffectual during the travel of the needle into the shed to permit the needle to draw filling from the supply until

the needle reaches the selvage shuttle side of the loom and thereupon freeing the whip and main tensioning mechanism to take up slack and tension the filling as the needle is withdrawn from the shed, and means controlled by the whip to effect loom stoppage should the filling break or become too slack as the needle is being withdrawn from the shed.



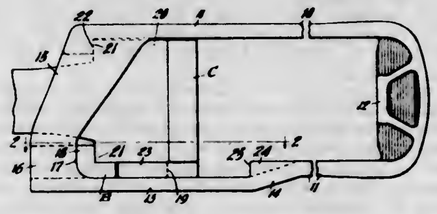
1,900,546. BRAKE CONSTRUCTION. EDWIN R. EVANS, Detroit, Mich. Filed Mar. 30, 1928. Serial No. 265,884. 24 Claims. (Cl. 188—79.5.)

1. A vehicle brake including in combination, a brake drum, a plurality of brake shoes, and means for adjusting said brake shoes relative to said brake drum, said means including a grooved member, and means for axially moving said grooved member.



5. A vehicle brake including in combination, a brake drum, a pair of brake shoes, each being provided with a tapered end, a member provided with tapered grooves adapted to receive the tapered ends of said shoes, said member being movable to force said shoes into engagement with said drum and means for effecting a measured withdrawal of said shoes from engagement with said drum.

1,900,547. COLLAR SHAPER. PATRICK FARRELLY, San Francisco, Calif. Filed Feb. 11, 1931. Serial No. 515,000. 10 Claims. (Cl. 223—15.)



1. In a device for shaping shirt collars, a pair of flat fingers adapted to overlie a folding table in a plane parallel to the top thereof, means normally urging said fingers downwardly and apart, and means for causing said fingers to move upwardly and toward each other.

1,900,548. BOX CAR CONSTRUCTION. OTIS W. GALLOWAY, Minneapolis, Minn. Filed Oct. 27, 1930. Serial No. 491,352. 4 Claims. (Cl. 20—26.)

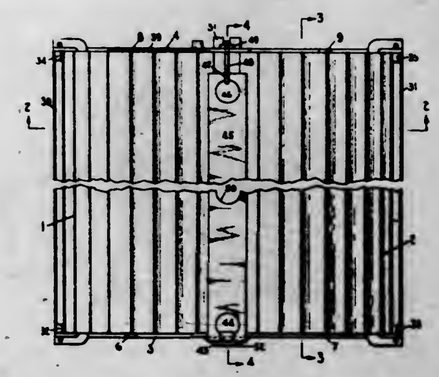
1. In combination with the lintel and sill and siding of a box car, door post construction comprising a pair of metallic posts interposed between said lintel and sill and rigidly secured thereto and cooperating therewith to define a doorway, said posts being of approximately Z-shape in cross section and having relatively wide protective flanges at their inner surfaces, said flanges overlying and protecting the inner surfaces of the ends of the siding members adjacent the doorway, means for rigidly securing said siding ends to said flanges, removable filler members extending longitudinal of said post and secured to the web portions of said Z-bars, said posts having inturned protective flanges covering the outermost edges of said filler members.

1,900,549. COUPLER AND YOKE CONNECTION. WILLIAM A. GEIGER, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a Corporation of Delaware. Filed Nov. 2, 1931. Serial No. 572,615. 8 Claims. (Cl. 213—70.)

1. In a coupler and yoke connection including a coupler having a shank provided with a shouldered butt, the combination with a yoke having top and bottom spaced arms connected at their inner ends by a vertical end section, and connected at their outer ends by spaced vertical side walls, the bottom arm of the yoke having a transverse abutment shoulder; of a locking block seated on said bottom arm and having its front end abutting said shoulder of the arm, said block having a transverse shoulder adapted to engage the lower shoulder of the coupler butt, said top arm having an interior shoulder engaging the top shoulder of the coupler butt; and a front follower within the yoke, said front follower and locking block having interengaging means thereon holding said block against lateral displacement with respect to said follower.

1,900,550. HANGER FOR FUR. MAX GRAY, Minneapolis, Minn. Filed May 24, 1930. Serial No. 455,258. 1 Claim. (Cl. 223—61.)

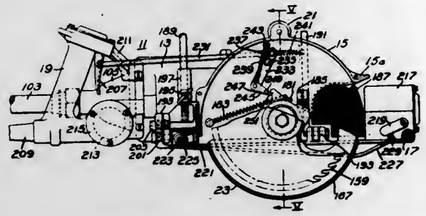
A hanger for animal headed furs having spring lever clips on the fur heads, which hanger consists of a single piece of resilient wire having a shank portion and a pair of vertically spaced, laterally projecting, reversely bent, portions joining the lower end of said shank portion and forming therebetween an open mouthed, resilient loop en-



gageable with the pivot lugs of the spring clip, the outer ends of said reversely bent portions being more closely vertically spaced than the inner ends thereof.

1,900,551. LIGHTING UNIT FOR REFLECTED ILLUMINATION. EDWIN F. GUTH, Webster Groves, Mo. Filed Feb. 28, 1931. Serial No. 518,976. 2 Claims. (Cl. 240—103.)

1. A frame, a reflector mounted therein, a central member on said frame, a plurality of electric lamps at the junction of said wings and extending longitudinally thereof and behind said central member, said reflector having two concave wings, a plurality of longitudinal corrugations on each of said wings.



1,900,552. LIGHTING FIXTURE. EDWIN F. GUTH, Webster Groves, Mo. Filed Nov. 7, 1931. Serial No. 573,561. 6 Claims. (Cl. 240—103.)

1. The combination, with a pair of corrugated reflectors, of end plates therefor, inwardly extending flanges on said

plates having scallops which are fitted to said corrugations, a plurality of lugs on said plates, the edges of said reflectors being bent to form sockets for said lugs and means to hold said plates and reflectors securely together.
